L VERYBODY PROFITS from profit. Here's how. Fifty years ago a good many men were going into the business of making automobiles - in the hope of making a profit.

Some of these men lost their investment, others made money. A few were very successful and they plowed back most of the profits into the business. Today the companies these men founded and nursed along provide more than 8 million highlypaid jobs - and automobiles for 45 million families.

Look at it another way. Forty years ago a good workman made about \$1.85 a day. Today the fellow with a comparable job makes \$12 or more a day.

Back in 1910-1915 money invested in production machines averaged out to about \$3500 per employee. Today the average employee has a "kit of tools" worth about \$12,000. These better tools were made possible largely by the profits that were plowed back into the business.

Profit is not only important to owners. It's equally important to employees and customers. Progress depends on profit.

A family's progress, too, depends to a large degree on its yearly "profit." Plan your family spending so that you can deposit part of every pay check in a bank account - here, we suggest.
