SPEED KILLS. TAKE IT EASY!

This warning was issued today by Col. E. B. Tilley of Houston, President of the Texas Safety Association, and Services Advisor for the Gulf Oil Corporation who stressed the need for speed control as a curb on traffic accidents. He spoke on behalf of the speed control program the Texas Safety Association is conducting this month

in co-operation with the Texas Department of Public Safety and the National Safety Council. "More than 25 per cent of the drivers involved in fatal traffic accidents annually are violating a speed law at the time of the accident," he said. "Because many factors enter into the making of every accident, Col. Tilley said, "it is impossible to determine to what extent speed is to blame in any single accident. However, he pointed out that we know enough about speed to make us realize that it's dynamite if used unwisely. "For instance," he said, "a speeding car travels a greater distance between the time the brakes are applied and the time the car stops than a slower-moving vehicle. Obviously, a driver's chances of hitting an object that suddenly looms in his path increase as his speed increases. To illustrate his point, Col. Tilley said that a car with good brakes can stop in about 21 feet after the brakes are applied from

GLITTER — Jeweled linen shorts become a cocktail outfit with the help of a tie-on skirt which is slotted at the sides to show the jeweled pockets. The trim pants and sleeveless blouse allow plenty of room for as much sun as one needs before five o'clock. Margaret Newman introduced this in Miami.

stand-out beauty in crisp, taffetized nylon
Smooth fitting at the waist... and terrific the way it billows to a beautiful whirl at the hemline via nylon net ruffles in pastel colors. It's perfect underpinning for your bouffant summer dresses.
It's washable... dries in a wink, and is permanently crisp.
Small, medium, large.
3.99
MODE O'DAY
Mrs. Fred Scott

SOCIETY AND CLUBS

AND NEWS OF INTEREST TO WOMEN

Williams Is Cred At Shower
Betty Williams, bride-elect Everett Suggs, was honored Wednesday evening with a shower at the home of Mrs. W. D. Hazel, president, in charge of the meeting.

A short business session was held after which Mrs. Ray Chapman taught the lesson on simple and attractive flower arrangements. The next meeting will be held at the home of Mrs. C. A. Ditmore with a lesson on shellcraft.

Refreshments were served at the close of the meeting to two visitors, Mrs. Ray Chapman and Mary Ruth Lambert, and Mesdames W. Z. Latch, W. V. Gardenhire, W. D. Hazel, C. E. Whitmore, V. C. Estes, Ray Judia, and the hostess, Mrs. Baum.

Lake Cisco Club Has Regular Meet Monday
The Lake Cisco Home Demonstration Club met Monday at the home of Mrs. W. L. Baum with Mrs. W. D. Hazel, president, in charge of the meeting.

A short business session was held after which Mrs. Ray Chapman taught the lesson on simple and attractive flower arrangements. The next meeting will be held at the home of Mrs. C. A. Ditmore with a lesson on shellcraft.

Refreshments were served at the close of the meeting to two visitors, Mrs. Ray Chapman and Mary Ruth Lambert, and Mesdames W. Z. Latch, W. V. Gardenhire, W. D. Hazel, C. E. Whitmore, V. C. Estes, Ray Judia, and the hostess, Mrs. Baum.

Washington
"As It Looks From Here"

OMAR BURELESON
Congressman
17th District

WASHINGTON, D. C. — The Congress is coming near to completing legislation to use farm surplus commodities for building military strength in the non-Communist countries.

This Country has not lost any time in building airfields and military bases in the important places overseas. The United States has more airfields on foreign soil than it does on American soil. Approximately three billion dollars has been spent for this purpose since 1948. As a result, any target within Russia is reachable within three hours and twenty-one minutes. Before Korea, the time required to do the same job was seven hours. The threat of instant retaliation must remain so great that Russia will not dare start a war.

There are good reasons to believe that this action has been the real deterrent in the last several years.

We still have more bases to build and there is no reason why we should not be using these billions of dollars of surplus commodities which have already been purchased under the price support program or obligated, instead of appropriating new dollars.

We are also greatly in need of certain strategic materials found in countries where people are hungry. I shall introduce an amendment to legislation coming up within the next two weeks to trade this surplus food for raw minerals which otherwise must be bought with cold cash.

Hospital News
A. J. Davis, who was taken to Graham Hospital a few days ago suffering with a heart ailment, was reported as slightly improved Thursday morning.

Mrs. Raymond Thackerson and baby were reported as doing nicely, as was Mrs. W. R. Gressett of Cisco. The little Scott baby, who has been in the hospital since it was born several weeks ago, was reported as gaining ground steadily.

Dismissed recently were Mrs. Charles W. Sash of Albany, Mrs. Charles Ray Burnett of Kingsville, Bill Boles of Cisco, Mrs. R. G. Murrell of Rising Star, Cecil Carter of Rising Star, Mrs. Tommy O'Shields and George Lee Ramsey of Putnam, Mrs. Gordon Cannon and baby of Cisco and Carol Thames of Cisco.

ingly no definite answers to many of the big questions. There is always a set of "ifs" and "ands." Plans are set forth to be used under various conditions which may occur, but the trouble appears to be that none of the top-ranking officials are in full agreement on any of them. The Joint Chiefs of Staff have come to no unanimous decision. There are, however, certain choices in case of a full scale war, which is not now in sight; direct involvement, which would mean fighting forces on a limited scale; or indirect involvement, which would require the furnishing of supplies and arms, but no forces. It is not probable that President Eisenhower would want the Congress to leave Washington under present conditions.

Another threat is right at our back door in Guatemala. A dictatorship in the Red Russia style is evidently in operation. This is in addition to Indochina, and our actions will depend upon a joint agreement with other Latin American countries. A meeting of these countries, in which the United States will participate, is scheduled right away.

State Capitol NEWS

By VERN SANFORD Texas Press Association AUSTIN.—It will not take long to cast your ballot in the Democratic primaries on July 24. There are only six contested races, as certified by the State Democratic Executive Committee, making up one of the party's shortest ballots. There are but 26 names on the ballots for 14 statewide elective offices.

Governor's Race Governor Allan Shivers, running for re-election, designated Ralph Yarborough and his back-solution of all our ills centralizers as "dreamers" who see as a tion of our government in Washington. As an example of his meaning, Shivers said his opponents were blaming him for supporting the Republican nominee for President in 1952.

"They say I'm a traitor," Shivers commented. "If getting the tidelands back for our school children means I'm a traitor, then I plead guilty." The governor added: "Our opposition paid lip service to the tidelands. This two-time loser's biggest backers said the tidelands belonged to the federal government."

Yarborough had hurled the charge of disloyalty at Shivers because of the latter's support of Eisenhower. Yarborough also struck out against Shivers' bid for a third elective term, saying, "Texas tradition condemns a third term. We approved the Twenty-second Amendment which forbids a third term for President."

Women in Politics Two Texas women took over prominent spots in the state's political show last week. Mrs. Pat Dougherty will manage the campaign of her husband, Dudley T. Dougherty, for the United States senate. Mrs. Charles Devall of Kilgore, whose

husband is publisher of the Kilgore News Herald, was appointed state chairman of Texas Democratic Women for Shivers.

Demo Convention A decision that will give big city counties who voted Republican in 1952 a strong voice in the Texas Democratic Convention was made by State Democrats in agreeing to count both parties' 1952 votes in deciding their convention strength.

The Democratic Convention convenes in September at Mineral Wells. The committee, meeting in Austin, agreed unanimously on the proposal after being told by its legal committee that the total vote was the correct basis on which to determine delegate strength.

Insurance Investigations One Texas insurance firm went into receivership and another appeared ready in another week of insurance shake-ups.

Ralph W. Hammonds of Houston, head of the Lloyd of North America Insurance Company, admitted insolvency and his firm went into permanent receivership.

Also caught in the whirling door of insurance investigations was the suspended General American Casualty Company with headquarters in San Antonio. Suspension followed a voluntary request of the firm's president Ralph D. Stokes. Incomplete checks of the company's books showed it was "approximately one million dollars in debt," Insurance Board Chairman Garland Smith said.

State Senator George Parkhouse told a meeting of insurance men in Austin that most of the controversy was being played out of true import.

He said that most of the trouble was being "generated artificially and unnecessarily to

serve the political purposes of a little group of men." He added that the Legislature should, however, patch some present law loopholes and pay examiners better salaries.

'Ridiculous' Charges Charges by a former agent of the State Liquor Board that the liquor industry and politicians run the board was termed "absolutely ridiculous" by Administrator Coke Stevenson, Jr.

Stevenson said the accusation of former member Weldon Burney, who called the board corrupt and dominated by politics, was without basis. The San Antonio man resigned May 27. Stevenson said that he had been demoted in grade and appeared dissatisfied when he couldn't get a transfer back to McAllen where he was stationed when Stevenson took office.

Water is Big Problem Water is one of the state's big problems, the president of the Texas Water Conservation Association told Texas University attorneys and water engineers.

Guy C. Jackson Jr., asking for water improvements, called for a "state-wide water plan" and for the state to assume financial responsibility for dams and other water improvements.

Joins Campaign Staff A manager of Governor Allan Shivers' successful 1952 race has

Happy Is The Day When Backache Goes Away

Nagging backache, loss of pep and energy, headaches and dizziness may be due to slow-down of kidney function. Doctors say good kidney function is very important to good health. When some everyday condition, such as stress and strain, causes this important function to slow down, many folks suffer nagging backache—feel miserable. Minor bladder irritations due to cold or wrong diet may cause getting up nights or frequent passages. Don't neglect your kidneys, if these conditions bother you. Try Doan's Pills—a mild diuretic. Used successfully by millions for over 50 years. It's amazing how many times Doan's give happy relief from these discomforts—help the 15 miles of kidney tubes and filters flush out waste. Get Doan's Pills today!

been named to help manage the Governor's campaign for re-election. Jack Dillard, director of Alumni Affairs for Baylor University, will assist Senator Ottis Lock of Lufkin in forming strategy for the campaign which was fired off Monday with a rally and radio broadcast at Lufkin, Shivers' home.

Tax Exemption Asked Two Texas turnpike corporations have asked the State Supreme Court whether toll roads built by private firms can have tax exemptions.

The Texas Turnpike Company and the Sam Houston Turnpike Corporation appealed from the Dallas Court of Civil Appeals.

Both are seeking to build toll roads in the state; one from Dal-

las to Houston, Thursday, Another pini, legendary statues cover pus, has been location. The bronze called "Freedom the Texas State ciation by Mc ton Magruder. The work is a private collection. Mr. and Mrs. and boys of O expected over a vacation visit. Mr. and Mrs.

Swimming Pool News . . .

From Page One
Abilene have purchased their first swim pass for 1954. They bought several last year. Speaking of Abilene, drug-store operator and office-supply man Nick Crain was in swimming Sunday with a number of friends.

Mr. Crane is a big booster for our swimming pool. He passes along "the good word" to his many Abilene and Odessa friends. He believes that our business will improve rapidly once the deep pool is open. Other Abilenians have told us that the big-pool opening will bring us plenty more Abilene business, too.

Burton W. Hancock, the Californian staying at the Connellee Hotel at Eastland, and who swims with us nearly every day, reports that he is swabbing his oil well three miles south of Eastland on the Nancy Ussery Survey. The swabbing operations made the well appear as a possible 80 or 90 barrel producer, the man from San Jose believes.

Jimmy Flores, Cisco Cat's ball player, is looking for his misplaced cap with a yellow "C" on it.

There have been no claimants for the boys wrist watch found in the pool by Freddy Hayes several days before the pool was last drained.

Mrs. L. F. Foster, whose hus-

band is Cross Plains West Texas Utilities local manager, said she swam at our pool often about 17 years ago. Wednesday she watched her grandchildren enjoy themselves in the big pool. The Albany native reported that the children learned to swim at the municipal pool at McCamey.

"I would not take a hundred dollars for the fun I had this afternoon." That's the way sign-man Harry Schaefer expressed his satisfaction after he swam with five boys last Friday in the big Lake Cisco pool. It took some urging on his part to get the boys out of the water. They included Gene Thetford, James Webb, Delbert Schaefer, Butch Wilcox and Ronny Awalt.

Another Cisco American Legionnaire who likes to swim with his son is J. D. Yardley, proprietor of the SPOT. Still another is one of Texas' professional electrical engineers, Humble executive Joe Comingore, who swims with his family daily while in Cisco.

Saturday evening we observed the Jack Farleighs teaching their grandson, Mike, some of the intricate points about diving and swimming.

From many Texas points and a few in Oklahoma came the Morris-ises to hold a family reunion at

How Herbicides Work in Controlling Weeds

Ten years ago, farmers had never heard of a chemical with ability to kill weeds and at the same time increase the yields of crops. Now, such chemicals are being used by farmers all over the world. In 1952, 71 million pounds of herbicides and hormone materials were produced, and they are being used increasingly and successfully.

In this country the herbicides used are of three general types: contact herbicides, soil sterilants, and the growth-regulator or hormone group. The contact herbicides must be sprayed on the plant or sprayed on the ground where they come into contact with plants as they emerge. The soil sterilants kill all vegetation when used at high rates and are considered as nonselective herbicides, although some of them show selectivity when used at low rates.

The third group consists of growth-regulators like 2,4-D and others. They can move downward in a plant and also be absorbed by plant roots. They are valuable because of their selective action in killing only weeds in such crops as corn, small grains and legumes. Although these chemicals are termed "selective" herbicides, we must realize that the

degree of selectivity is relative. At high rates, 2,4-D will kill many plants which we list as resistant. When we speak of a crop as being resistant, it is always at a recommended rate which the crop will tolerate.

The 2,4-D group is of most interest to farmers. Besides being selective, these compounds are harmless to the soil as well as to men and animals. They are not corrosive to equipment, they are noninflammable, and best of all, they are reasonable in cost.

As far as we know, compounds of the 2,4-D group applied at normal rates do not have any important effect on soil microorganisms. Users of these chemicals often ask about their possible effect on livestock. Careful tests have shown that the chemicals themselves are harmless at rates used for weed control, although oil used for spraying could be injurious if large enough quantities were taken.

Because of the many factors that enter into the use of herbicides and the rapid advances being made in a knowledge of the use of chemicals, a farmer should always consult his county agent for the latest and best information on this subject.

the local Legion Hall Sunday. It was the W. J. Morris meeting, so local garage operator Derwood

Morris informed us while in swimming with his family. There were over 40 members present.

Gone Are the Good Old Days -

. . . when grandfather boasted that he bought bananas at a dime a dozen and his farm from the State with only one deed in the chain of title. Today the chain may contain hundreds of transactions and as it lengthens defects multiply and enlarge. The abstract is the only means yet devised which may reveal these defects and place them in position for correction. That's why more and more people are demanding an abstract when they buy real estate.

NEW "COLOR-WARE" PREMIUMS IN MOTHER'S OATS!

PIGGY BANK

PICNIC PACK CUTLERY

4 CORN HOLDERS

- Like gifts! 12 exciting premiums—one inside each package.
- Attractive and gay for your table, your kitchen shelves.
- They're useful and durable—you'll want to collect them all.
- So treat your family often to creamy-delicious Mother's Oats.

Easy to make as coffee!

And just as quick. Simply pour Old Fashioned Mother's Oats in boiling water. It cooks completely—creamy, smooth and full-flavored—in only 5 minutes. And costs less than 1¢ a serving!

GRAIN HARVEST GAINS HEADWAY AS OPEN WEATHER PREVAILS

Field work moved along about on typical mid-June schedule. Combining wheat started in extreme northern high plains counties and gained momentum in central high plains and northern low rolling plains counties. Most grain was already out of the field in the southern low rolling plains and northern blacklands. Hail damaged some high plains wheat during the showery weather early in the week.

North of a line about San Angelo, Brownwood, Waxahachie and Marshall, crops and pastures were making very satisfactory development as scattered showers provided additional moisture over most of that northern and northeastern area. South of that line, however, feed crops and pastures deteriorated as soil moisture in that area was depleted by growing crops, strong winds and blazing sun. Droughty conditions were shaping up rapidly in central, southern and southeastern counties.

Sorghum planting, with considerable replanting, continued in the high plains and to a limited

extent in other northwest areas. Growing crops in the north and northwest were in good condition but fields were weedy. The crop needed moisture, however, in central and eastern areas, and growth was at a standstill in many southern counties. Combining continued in the coastal bend and south Texas.

Corn was also showing the effects of continued dry weather in most southern blacklands and southeast Texas counties. Prospects were excellent in areas favored by recent rains, but general rains will be needed soon, particularly for late corn. The rice crop was in good condition. Rains would be helpful, however. Hay baling was very active with continued open weather. Peanuts were in fair condition with planting about completed. Broomcorn harvest continued.

Farmers were busy cultivating and spraying cotton over a wide area and ginning picked up a little in the valley. Older cotton responded well to hot, open weather and recent plantings in the northwest were coming up to even stands. Rain would benefit much acreage in central southeastern and southern counties, especially the non-irrigated sections of south Texas. In the northwest, the crop is late but planting is about finished. Wind and hail destroyed small local acreages in that part of the state. Grasshoppers were becoming increasingly bothersome, especially in fields adjacent to pastures.

Livestock generally, were in good condition and stock water was adequate throughout the state. In northern and northwestern counties, range and pasture grasses remain in fair condition despite high, drying winds that rapidly deplete soil moisture. In central, southeastern and southern counties, ranges were showing the effects of dry weather and some supplemental feeding was becoming necessary in south Texas. Marketings of cattle continued relatively heavy but were much below the "drough run" that was on a year ago.

Moran News . . . From Page One

The building. The public was invited to come and enjoy the cool comfort of every service.

Last Wednesday evening in the Church basement, Rev. and Mrs. J. B. Cole were guests at a party by members of the Methodist Church.

The public was invited to attend the reception to meet the new pastor and wife and to join in welcoming them into the Community.

After refreshments of cookies and punch, Rev. and Mrs. Cole thanked the public for the fine shower given them.

The second week of wheat harvest 40 car loads and 13 trucks were shipped. 5 car loads are on the ground to be shipped when we get storage.

\$1.85 a bushel was the price paid for wheat. All hands worked 18 hours a day.

The barley and oat crop was the big surprise. They made 35 bushels to the acre. The peak has passed, but much more will be coming in all along.

L. L. Walker and family arrived home from their Eastern trip on Wednesday evening of last week. When they got to Dallas the bus strike was on, and they had to be re-routed by the deep South.

Leaving Dallas, they went by Atlanta, Ga., to Washington, D. C., Baltimore and Philadelphia. The longer way took 3 days, but the route was a beautiful one they had not seen before.

Arriving at West Point, they found Prosper well and happy. They took in the summary of June Week, graduating two weddings of classmates.

Prosper purchased a new Plymouth to bring them home in. They started up the Northern route, visited Niagara Falls, and on into Canada. On the way home they stayed one night in Chicago, St. Louis, Springfield, Mo., on to Okla. City, Wichita Falls and to Moran.

Prosper will be home until the middle of August.

Mowing Pastures Gives Effective Weed Control

Hereford cattle grazing on good pasture of Bermudagrass, native bluestem, and clover, which has been mowed for weed control.

A mower is one of the most important tools a farmer has in managing pastures, especially if he has good pastures of improved varieties. In addition to helping control weeds and brush, a mower is valuable in getting more uniform grazing of a pasture.

You can't expect grass and legume pasture plants to make their best growth if they have to compete with weeds and brush for moisture and plant nutrients in the soil. These pests must be eliminated if you are to have good pastures.

The best method of controlling weeds is to fertilize and graze your pastures in such a way as to keep ground covered with a dense and uniform stand of grasses and legumes. Most young weeds will then be choked out for lack of sunlight, moisture, or plant food soon after they come up. But some weeds are likely to emerge and grow even though the pasture crops are dense in most spots. Then is the time to use a mower. Each pasture should be mowed frequently during the growing season if there are many tall weeds or small brush/sprouts on it. Such

mowing will greatly reduce weed and brush competition with the pasture plants.

The mower is also a valuable tool in helping get more uniform grazing on most pastures. Even with an excellent system of grazing management grass will grow faster, at times, than livestock will eat it. Some plants are likely to get so rank that stock will refuse to graze them. Under such conditions the taller plants should be clipped with a mower. In this way all the pasture plants can be kept about uniform in palatability. Furthermore, livestock will often eat tall stemmy plants as wilted hay when they would not touch them while growing. Thus you get more complete use of the forage.

If rotation grazing is practiced, the best time to mow a pasture is a day or two before removing livestock from it. This will give the stock a chance to eat the wilted hay before they are moved to another pasture. Also it starts all pasture plants off more evenly for the growing period and should result in more uniform palatability among the plants during the next grazing period.
