

The Friona Star

DEVOTED TO THE INTEREST OF FRIONA AND FARMER COUNTY.

VOLUME 5—NUMBER 48.

FRIONA, FARMER COUNTY, TEXAS, FRIDAY, JUNE 20, 1930.

\$1.50 PER YEAR

USE OF CITY WATER SYSTEM URGED BY COMMISSIONERS TO HELP DEFRAY EXPENSES

H. G. White, city secretary and manager of the city water works reports that he has installed 25 water connections to the city mains, all of which are rendering service. He also reports 34 users of water from the city's mains, there being a few connections which serve two or more users. Following is a list of those patronizing the system:

W. H. Hughes, B. B. McCandless, C. C. Wiess, J. P. Wilson, G. E. McClellan, W. O. Thompson, C. M. Jones, S. J. Sanders, Friona Consumers Co., J. C. Wilkinson, J. W. Parr, M. E. Parsonage, E. B. McLellan, Texas Wheat Growers, Miller & Pitman, J. M. Osborn, W. C. Nichols, J. L. Landrum, G. E. Taylor, T. J. Crawford, 2; J. B. Lang, W. H. Warren, 2; T. H. Simiard, City Drug store, Dr. R. R. Wills, Hughes barber shop, Friona Star, O. C. Jones, R. F. Rankins, Everett Harry, W. H. Sylvester and the post office.

Manager White says he has a number on the waiting list and he is anxious to get all applications in so he may be kept busy until all city water users are on the mains.

City Commissioner J. R. Roden also states to a Star reporter that the city commission is anxious that all water users get their connections made as the city must have the revenues to meet its obligations and that it is cheaper on the citizens to meet this fund with revenue from the water system than it will be to pay their taxes and their water rent in addition.

Mr. Roden feels sure that if all water users in the city, who are in reach of the city mains will get their water from the city this revenue will meet all payments of warrants.

Therefore, the economical plan to attach to the city water supply.

REVIVAL BEGINS SATURDAY

A series of meetings will begin Saturday night, June 21, at the Church of Christ. These meetings will be conducted by Elder Van Bonneau of Dodsonville, Texas, who comes to Friona highly recommended as one of the best Bible students and preachers in Texas.

CHURCH ANNOUNCEMENTS

CONGREGATIONAL

Sunday school each Sunday at 10 o'clock. F. W. Reeve, superintendent. Church services each first and third Sunday at 11 and 8:00. Christian Endeavor each Sunday evening at 7:30 o'clock.

J. L. Beattie, Pastor.

METHODIST

Sunday school 10:00 a. m., A. S. Curry, superintendent. Preaching services each Sunday at 11 and 8:00. Senior League will meet at church at 7:00 o'clock.

DeWitt VanPelt, Pastor.

BAPTIST

Sunday school at 10 o'clock, C. W. Dixon, superintendent. Preaching on second and fourth Sundays of each month at 11 and 8:00. B. Y. P. U. meets each Sunday evening at 7:00 o'clock.

M. M. Robinette, Pastor.

RIPPER MACHINE SPEEDS UP VAN BIBBER GRADING

(From The Hereford Brand)

The ripper-type of road machine, a new device recently purchased by the county, is doing effective work on the Van Bibber road in the west part of the county, according to Judge Earl W. Wilson, and the grading of this important lateral route is proceeding rapidly.

It is estimated that the grading of the road will be completed within a few weeks. The Van Bibber road traverses the county north and south, linking Farmer and Oldham counties, and a large district of local territory intervening with the Harrison highway.

The ripper machine is found to save several trips over the ground with the grader. It is run ahead through the hard road to loosen or rip up the soil, and the grading then comes much easier.

RETURN TO FLORIDA

Mr. and Mrs. J. B. Lang and family left Tuesday on a return journey to their former home at Sarasota, Florida.

This splendid family come here about a year ago in order to be with Mrs. Lang's father, the late C. M. Stevens, during his last days on earth, and remained looking after the property left by Mr. Stevens, but have found it necessary to return to supervise their Florida business and on account of Mrs. Lang's health, which has not been as good here as in Florida.

While here they made many friends who regret to see them leave, but wish them a successful journey and prosperity and happiness in their Florida home.

T. H. MURRY HOME

T. H. Murry of the Bovina community, who has been a hospital and under a physician's care in Amarillo for the past ten weeks, was so far recovered as to be able to return to his farm home Wednesday morning.

Mr. Murry underwent a surgical operation and other unfavorable health conditions have prolonged his convalescent period to the extent that he is rejected to be able to return home, although he is yet far from well.

He stopped a few moments here and friends had opportunity to greet him. He was accompanied by Mrs. Murry and his brother. He will go to Amarillo each week for further treatment until fully recovered.

UNION AID PROGRAM

At the next regular meeting of the Union Ladies Aid, June 27, at the Congregational church, the following program will be rendered:

Subject: Our Community.
Welcome: Mrs. Beattie.
Response: Mrs. Van Pelt.
Prayer: Mrs. Meade.
Paper: Community Recreation.
Mrs. J. M. Highfill.
Vocal solo: Mrs. Grant Musick.
Paper: The influence of the church at large: Mrs. E. R. Furlong.

Paper: Home life and its influence upon the community: Mrs. D. W. Hanson.

Vocal solo: Mrs. Cason Jones.

IMPROVING CHURCH PROPERTY

People of the Congregational church have begun improvements of the church property by installation of a kitchen sink in the basement. An indoor toilet and other plumbing work will be installed.

The water entry will be changed to the north where the kitchen is located, making it more convenient. Piping will be laid in the church yard so that water will be available for watering trees, the lawn and flowers. E. L. Sympton is doing the work.

MAGAZINE CANVAASERS HERE

It appears that the season for magazine canvassers has arrived for Friona, owing to the fact that two or more groups of these canvassers have been soliciting our people during the past week.

They all want to win a large prize or a scholarship in some college and always have a very pretty story to tell, and our people fall for them without hesitation, just as they do in all other places. The last group which visited us was composed of three young ladies supposedly coming from Des Moines, Iowa.

ENJOYED C. E. CONVENTION

Mrs. T. J. Crawford and daughters, Misses Mary Kathryn, Helen, Dorothy and little Gene, and Misses Esther and Mary Reeve returned Monday from Wichita Falls where they had been in attendance at the state convention of Christian Endeavor.

They report a most pleasant, entertaining and instructive convention and that they fully enjoyed each and every session of the programs. Of the 1700 registrations there were over 1500 present.

The people of the Church of Christ will have an all-day session at their new church building on Sixth street, beginning at 10:00 a. m., and continuing until 4:00 p. m. A basket dinner will be served on the grounds at the noon hour.

UNION LAYMEN'S MEETING

The Union Laymen's meeting held Sunday night at the Methodist church was well attended and an interesting and attractive program was given. This was the first of a series of such meetings that has been arranged for to be held during the summer and if found practical will be continued.

Arrangements had been made for Prof. Condron of Canyon to deliver an address, but sickness in his family prevented his being here. The committee secured the services of Rev. Lucian J. Marsh of Oklahoma City, who was here and who made a most practical address on "Cooperation," forcibly depicting advantages of man's co-operation with God.

Other features were a vocal solo by Mrs. Grant Musick and male quartet by Messrs. Hamlin, Curry, Hartsfield and Osborn.

In order to more easily facilitate the work a president and secretary were selected and a program committee composed of one member from each of the churches taking part in the movement. This committee will have charge of the selection of the program for each meeting, held the third Sunday of each month, unless otherwise arranged. George M. Baker was chosen secretary and will look after any correspondence that may be necessary.

At this program the auditorium was filled and it is hoped that other meetings will be as well attended.

EARL DAY DEAD

Earl Day, son of Mr. and Mrs. B. C. Day, departed this life at Hereford Sunday, June 15, after a lingering illness of several weeks due to a severe burn.

The young man received severe burns on Tuesday, April 15, when the barn at his father's home caught fire. He was taken to the hospital at Hereford, where he died.

Mr. Day was born in Granite, Oklahoma, on June 19, 1907, and had for several years been a consistent member of the Christian church. He was married on August 3, 1929, to Miss Hazel Lower, of Arnette, Oklahoma, and moved to Friona two years ago.

He was a young man of genial disposition and sterling qualities and was loved and honored by all who knew him. He leaves his father, mother, wife and one sister, Mrs. Wolf of Oklahoma, besides other relatives and a host of good friends to mourn his untimely death.

Funeral services were held in Friona Tuesday afternoon at the new Church of Christ building, conducted by Rev. J. W. Boultinghouse, pastor of the Christian church at Hereford. Following the funeral services at the church the body was laid to rest in the Friona cemetery, attended by a host of his mourning friends and relatives, being one of the largest gatherings that ever attended a funeral at this place.

RURAL TELEPHONE SERVICE

J. G. Singer, Littlefield, division superintendent of the State Telephone Co., at Lubbock, was a business visitor in Friona last Saturday, and stated that his company has made what he feels sure will be satisfactory arrangements for the installation of phones on its rural lines leading into Friona.

He believes farmers will consider these terms most satisfactory than what they had asked and all persons wishing phones installed on rural lines call at the central office and place their request for same and learn the terms on which they will be installed.

It has been hoped by the chamber of commerce that arrangements could be made whereby people living on country lines could have phone connections with Friona and Mr. Singer has been working diligently on the proposition for several weeks and the people of Friona are pleased that such arrangements have now been completed.

OUR FRIONA WEATHER

Since last Thursday we have had with a few slight exceptions, delightful weather.

It has been fair and with plenty of breeze to make it pleasant, with the exception of Monday night when the clouds came over just a little after dark and gave us a few refreshing showers, producing about three-eighths of an inch of moisture. On Wednesday afternoon and Thursday for a large part of the day it was excessively warm, there being not much breeze, the thermometer registering 98 in the shade, which is a very unusual temperature for this locality.

COACH MIMS TO TRAVEL

Perhaps all our local readers will at once recognize the above likeness as that of Coach Mims, of our last year's school and who will return to us for the coming term.

A recent letter from Prof. Mims received at the Star office states that he is getting the paper regularly and enjoys reading it. Prof. Mims will leave his home in Fort Worth June 23 for an extended trip through some of the Southern States and across the Mississippi River. Among points of interest to be visited are the old battle grounds of Stone River and Murfreesboro, the gap in the Cumberland mountains through which the tide of immigration flowed when it began its westward march from the Atlantic seaboard states.

Mr. Mims has assured the Star of his willingness to furnish regular weekly contributions for the Star during the coming school term and we may hear more of him during his extended trip thru the Mississippi River States.

Mr. Mims has assured the Star of his willingness to furnish regular weekly contributions for the Star during the coming school term and we may hear more of him during his extended trip thru the Mississippi River States.

VISIT IN F. A. CANNON HOME

Mr. and Mrs. Emmett Porter of Dallas arrived here the latter part of last week and remained until Thursday as guests of Mr. and Mrs. F. A. Cannon and family. Mrs. Porter is a sister of Mrs. Cannon.

On their return home they will go by way of Carlsbad and visit the famous caverns. They were accompanied by Miss Merle Cannon who will visit with them in Dallas for a while.

FIRST LOAD OF NEW WHEAT BY G. L. MINGUS

The first load of new wheat to be dumped into the Santa Fe Grain Company's elevator this season was brought in by G. L. Mingus, living south of Friona.

The wheat was said to have been in prime condition and tested 62 pounds. The load arrived Wednesday afternoon and Mr. Mingus received 73 cents a bushel for it. Two other loads arrived about the same time that Mr. Mingus came in, which tested 59 pounds and sold for 72 cents.

WHEAT PROSPECTS BETTER

The prospects for a fair yield of wheat seem to be growing better as harvest approaches, some even anticipating a yield with some profit.

Many who thought a few weeks ago that they would have no wheat at all or at least not more than enough to pay harvesting expenses now believe that there will be something left for them above expenses, and some fields are estimated as high as fifteen bushels to the acre.

MR. AND MRS. TEAGUE HERE

Mr. and Mrs. Biddle Teague of near Adrian were visiting with friends here Wednesday and Thursday. Mr. Teague is a son of Mr. and Mrs. J. M. Teague of Lubbock who formerly lived in Friona while Mr. Teague was in the grain business here. These young people are now living on a large farm near Vega. Mr. Teague does not yet know whether they will continue on the farm during the winter or secure positions in some school and both spend the winter teaching.

SOLD BARBER SHOP

Homer Pemberton has sold the barber shop on the west side of Main street to a Mr. Walker and Mr. Pemberton and wife left Friona Monday and will likely spend some time touring the country before returning to their old home in Central Texas.

A GOOD MEETING

The annual meeting of the Panhandle Association of Congregational churches, which met here last Saturday and Sunday was one of the best in the history of the association.

The meeting was called to order at 11:00 o'clock Saturday morning and was spent in the election of officers and appointment of committees. The afternoon session was spent in a round table discussion of problems of the work and expressions of ideas and the evening session was taken up partly by a talk by the new superintendent, Rev. Lucian J. Marsh of Oklahoma City, and a discussion of missionary topics.

The Sunday program consisted of the regular Sunday school session, followed by a short talk by Rev. Richardson. After the Sunday school hour, the 11:00 hour was used as the usual preaching service, when Rev. Kenny of Amarillo preached a most excellent sermon, the subject being "Will Christianity Survive?" The sermon was followed by the sacrament of the Lord's Supper.

At one o'clock the congregation adjourned to the church basement where a sumptuous dinner was prepared and all present had the pangs of hunger appeased.

Following the repast the workers again assembled in the auditorium where the closing session was held in the form of short talks by members of the various congregations represented.

Rev. Miller of Amarillo was present and served as moderator of the association, and Brother Richardson served as secretary. There were six delegates present from Amarillo and about twenty from Spring Lake.

Rev. Marsh departed for his home in Oklahoma City Monday morning, stating that he will return to this field again in August.

COMBINES GOING OUT

The past week has witnessed a constant decrease in the number of new combines to be seen in Friona as they have been gradually going into the country and into the wheat fields where they will all soon be busy.

These combines have been plying the highways, drawn by tractor either singly or in trains of two or more at a time, which forms quite an inspiring sight even to those of us who have been witnesses to similar scenes for the past several years.

The largest sale of combines this territory has ever known would have resulted had it not been for the unusually dry season, which the country has just experienced, but despite this fact there has probably been as many of these machines sold this season as in any season past.

Practically all dealers have complained of having many of their orders cancelled on account of the short crop of the farmers who had ordered them. So far as the writer is informed there was only one local dealer who did not suffer any cancellations.

FAREWELL PARTY

A large number of the members of the local Christian Endeavor society gathered at the home of Miss Alice Guyer Monday night, for a farewell party in honor of Miss Louise Lang.

Miss Lang has been one of the interested members of the society since her arrival in Friona about a year ago, and was starting on her long journey to her former home in Sarasota, Florida, Tuesday morning.

A large number were present and spent a most enjoyable evening in spite of the rain which began falling about the time the group assembled. All present wished Louise a pleasant journey to her Southland home, while at the same time regretting to lose her from their society.

Y. P. M. S.

Leader: Mrs. Ware.
Subject: Being a Missionary.
Roll call. Favorite missionary.
If you would choose to be a missionary, in which country would you prefer to serve? Why?
What preparation would you make for your work?
China: Mrs. Currin.
Japan: Mrs. White.
Korea: Evelyn.
Latin: Mrs. Gore.
Special music: Mrs. Fleet.
REN.

NOTICE, Y. W. A.

The Young Women's Auxiliary will meet next Tuesday evening at the Baptist church. All members be sure and be present.
REPORTER.

GREAT NEED OF UNDER-PASS SHOWN DURING TIME OF FRIONA'S HARVEST SEASON

HARVEST IS ON HERE

The harvest season in the Friona territory was ushered in Wednesday when two loads of wheat were received by local elevators.

Messrs. Mingus and Black came in Wednesday and Thursday L. F. Lillard started his combine to be followed Friday by F. W. Reeve and a number of others will begin early next week.

F. N. Welch has 1900 acres to harvest and says a part of it will do to harvest first of the week and that it will ripen as rapidly thereafter as he can get over the ground with two combines.

Fallwell Brothers, with 2500 acres to cut, will probably get busy early next week, and it appears that by the middle of the week the harvest season will be on in full force and be a general thing throughout the territory.

HAS GAS EXPLOSION

What might have been a most serious disaster occurred at the A. N. Wentworth home Saturday night at ten o'clock, when an automatic water heater in the bath room exploded.

The heater had been installed a short time before and a cracked pipe allowed gas to escape into the house, which was noted by Mrs. Wentworth who complained of the smell. Mr. Wentworth believed the smell to come from the paint on the new heater. When he left Mrs. Wentworth closed the bathroom door and after a few minutes a terrific explosion blew the door from the bathroom, tore the door from another room, shattered glass in the front door and one of the kitchen windows.

Mrs. Wentworth was not in direct line of the force of the blast and escaped with slight burns on her hand and stinging her face with splinters. She grasped a quilt and smothered the flames, saving the house from destruction.

It appears that when the door of the bathroom was closed the gradual leak filled the small room until it came in contact with the pilot light which caused the explosion.

FIRST "TALKING" SATURDAY NIGHT

Friona is to have its first real talking picture in the Marvelette theatre Saturday night and it is expected that a large number of Friona people will take advantage of the opportunity to see a real talking movie.

Manager Eberling has gone to a large expense and a large amount of labor to install this up-to-date and first class photophone apparatus so that Friona might boast of as good as the best in tone moving pictures.

The Saturday night show will be followed by a matinee on Sunday afternoon and other shows Monday and Tuesday nights of next week.

INCOME TAX MAN HERE

Two of the men engaged in the collection of Uncle Sam's income taxes spent a part of the week here interviewing a number of our citizens.

It appears that quite a number of people had come under the scrutiny of the sharp official eyes as being subject to income tax and who had not filed a report on their incomes, not knowing it necessary to file such a report. It appears that very few if any of those called before the examiners were asked to pay any income tax. The gathering was jokingly referred to by some who were present as an "old settlers' reunion."

GOOD STAGE TRAFFIC

The Sunset Stage which passes through Friona, seems to be doing a satisfactory business since it rarely passes through without a fair load of passengers and is often crowded.

Many Friona people take advantage of this popular stage line, since it passed directly through town and has its ticket office conveniently located at the City Drug Store.

METHODIST

Sunday school 10:00, Will Osborn, superintendent, preaching services each Sunday at 11 and 8:45; Senior League, 30; Junior League, 7:30.
DeWitt VanPelt, Pastor.

Traffic into and through Friona has increased during the past year and a half to the extent that one railroad crossing is insufficient for the needs of the people and a strong desire has arisen for an underpass at the west side of the city. Some steps were taken to secure this kind of crossing several months ago by the highway committee of the chamber of commerce but no action was secured from the railroad company.

Efforts are again being made to arouse interest in this matter with the hope that something may be accomplished and results secured to the extent that a roomy underpass may be built.

Reasons for this are that during harvest Main street crossing, the only one we now have, is often blocked by waiting wheat trucks and some other means of crossing the track is needed to relieve the congestion and to allow those who must proceed on their way to do so. Another reason is that train men are not careful to clear the crossing when they are delayed here for a considerable time, and often the cluster of cars and trucks gathered there are forced to wait until the train gets ready to clear the crossing and thus cause considerable confusion and loss of time.

Another reason for the underpass is that it is dangerous for school trucks owing to the fact that it is often hard to see or hear trains coming from the west and at times some of them have narrowly escaped being struck by trains thru this fault and an underpass could be used entirely by the school buses and thus escape the danger of being struck by a train and at the same time avoid delay from finding the crossing blocked.

MRS. MULVHILL HERE

Mrs. T. E. Mulvihill of 3924 Manheim Road, Kansas City, arrived here Wednesday to look after the harvesting of her wheat crop on her half section of land a few miles northwest of town.

Mrs. Mulvihill has been in Friona on other occasions and is well acquainted with the country and prevailing conditions. She has also been in a number of other states and the Dominion of Canada, and gives as her opinion that the Friona country is the best and finest she has ever seen. She is a booster for the Plains country and believes her half section of land here to be the prettiest in the Friona territory, which means the prettiest in the world.

Finding that the wheat on her land is still quite green and will not be ready for harvest for several days, she decided not to wait for it and so returned to Kansas City Friday morning.

CONGREGATIONAL SERVICES

Morning services will be under charge of Elsworth Richardson, who will speak on "This Man Called Jesus." The evening program will be devoted to "Another Story as Told by Jesus."

Many of the young people attended the Christian Endeavor conference at Wichita Falls last week and shall have charge of an Echo meeting. They will also introduce another song that was sung for the first time at the convention. The speakers include the Misses Helen Crawford, Mary Catherine Crawford, Dorothy Crawford, Mary Reeve and Esther Reeve.

CONGREGATIONAL

Sunday school, at 10:00, F. W. Reeve, superintendent. Preaching service Sunday, 11 and 8:30. Pastor Beattie preaches first and third Sundays; assistant Pastor Richardson each second and fourth Sundays. Christian Endeavor each Sunday at 8:00 o'clock.

PRESENT IMPROVEMENTS

Work on the Farmers Pool Elevator and the new building for R. J. Hicks is being pushed and both will be completed soon.

Work on the J. L. Landrum residence has been at a standstill this week, while the R. H. Kinsley residence is about finished.

J. W. Parr has a force busy on a new room between the Friona Garage building and Galloway hardware. The room will be finished this week and will likely be occupied by a cafe.

The Photophone equipment at the Marvelette theatre is being installed and will probably be ready for use Saturday night.

CHAPTER VI—Continued

—13—

"You must keep on hoping," pleaded Miriam.

"They like Hiram," continued their father. "They evidently want him."

"Oh, no," gasped Marjory. "Not Hiram, father. Not in your church."

"I like him myself," said her father gently. "Better him than—some others."

But Marjory shook her head passionately. "No, no," she whispered. "Not in your church."

Ginger hurried back with the "Discipline."

"Find it, Miriam. You're up on indexes."

Miriam deftly turned to the index, referred to section 841, hurried down to paragraph 2, and read aloud.

"The annuity claim of a Retired Minister shall be not less than one-seventieth (1-70) of the average salary, house rent excluded, of the effective members of his Conference who are Pastors or District Superintendents, multiplied by the number of his years of service in the effective relation, including two years on trial, as a member of an Annual Conference of the Methodist Episcopal Church."

"Mercy," interrupted Ginger. "It's geometry. We'll have to wait till Horace comes home."

"Why, it's very simple," explained her father. "One seventieth of the salary of our conference—we are not a very rich one, you know—is twenty-one dollars. Multiply that by—"

"X—darling, you forgot x," interrupted Ginger again.

"X is the number of years one has been preaching. My x is twenty-three. Multiply twenty-one dollars by twenty-three years, and it comes to four hundred and eighty-three dollars. But we have not quite enough money in our treasury to meet the claims in full, so the pro rata reduction would allow me about three hundred and twenty dollars a year. Approximately twenty-five dollars a month. That will hardly support a family."

"Oh, dearest, you have supported us long enough," said Miriam. "It is our turn now."

"Why, father, with your twenty-five a month, and my—er prospects—Why, darling, you'll be—simply—jake."

At eleven o'clock, Eddy Jackson came with Hiram Buckworth and the two men listened in silence as they told them, as indifferently as they could, of the purport of the special meeting.

"So that's what it was," Eddy said soberly. "I was afraid of it."

"They needn't offer me your church," said Hiram Buckworth stoutly. "I wouldn't accept it for any consideration—either financial or spiritual."

Marjory glowed at him. "Unless," he added reflectively, "unless they would make some arrangement to let us both work along together, and use me as your assistant—until your eyes are restored."

"You couldn't work as my assistant, Hiram. You are too good a man for that. And I couldn't even assist you—blind as I am."

"I don't believe the church as a whole will stand for it," Eddy Jackson broke out, finally. "Old Jop has just talked them into this. And I'll bet I can talk them out of it. I say we just walk out on them and start a church of our own. They might keep most of the money, but we'd take most of the religion."

"An affectionate thought," smiled Mr. Tolliver. "But not a very Christian one. No, Eddy, this is the thing a minister accepts, and does not fight."

"Put up your sword, Peter," quoted Ginger softly.

"Well, if worst comes to worst," declared the young man, "I'll move the whole gang of you out to Pay Dirt, and install you in the lab. And we'll start a farmers' spiritual union."

Laughing at that, they walked slowly out the flagstone path to the curb.

"How's the private business coming along?" Eddy asked in a low voice.

"Rather slowly, in the face of such an emergency as this," Ginger Ella sighed. "I may have to forge another link or so."

CHAPTER VII

A stricken silence prevailed in the sturdy little touring car that Eddy Jackson guided carefully along the country roads from Red Thrush to Pay Dirt. Not one word was spoken. But in the rear seat, Miriam, the sensible twin, sat with one of her father's hands crushed tightly between both of hers, and now and then she pressed it against her cheeks in a wordless passion of sympathy, longing to comfort. It was not until the car stood before the side porch of the big white house, and Miriam, with firm, light hand, had led her father up the steps that Eddy spoke.

"Mr. Tolliver," he said awkwardly, "don't worry. It's a raw deal, all the way round, but honestly—they mean all right. We'll do something about it, that's all."

"There's nothing to do, Eddy. And they not only mean all right, they are all right."

"And if it goes through the way they have planned, we'll start something on our own account. We're right in the midst of the farming district here, and a lot of these people don't bother to go so far to church. Pay Dirt is big. We'll build a little chapel of our

own, and run it to suit ourselves. I don't want you to leave Red Thrush."

"You're a good friend, and a good man, Eddy," said the other gratefully. "But don't have me too much on your mind. It's all right. I will never do anything that does not completely accord with the policy of our church, you understand. Good night, my dear boy, and to repeat your own words, don't worry."

Silently, up the stairs to the right wing, Miriam guided his steps. She turned back the covers of his bed, carefully spread out the things he would need for the night, placed a fresh towel on his rack.

"Father, shan't I read to you a while?" she offered. "Until you feel tired enough to sleep."

"No, thanks, dear, not tonight. You're a nice girl, Miriam, but I don't

want to be read to. I have many things to think of."

"But, darling—they aren't nice things."

"Well, some of them are. You, for instance."

"Father," her voice was low, almost apologetic, "father, you know we are so used to each other, you, and we girls, living together all the time, and arguing, and quarreling, and making up. We—never say the real things that are in our minds. But father, in our hearts, we—all of us—think you are just wonderful, father."

His arm tightened about her shoulders. "And I tease you girls, and laugh at your little tricks, and your vanities, and what Ellen calls your man-madness. But all the time I know you are the very best girls in the world."

"Oh, father, we aren't. Well, Helen, she is awfully good. And Ginger is good, too, in her funny way. But Marjory and I are not much."

There was silence between them, as each smiled tenderly into the darkness, thinking of the thousand sweet, ridiculous, whimsical, pathetic happenings of the shabby old Methodist parsonage. But after a little while, he sent her back to bed, and to sleep. But Wesley Tolliver himself lay awake all night, thinking of many things.

When Miriam entered his room the next morning she found him standing by the window, fully dressed.

"Oh, father, you're getting too smart for me," she said regretfully. But when he turned to look at her, the expression on his face sent a swift glad brightening over her own.

"Oh, father," she cried again. "You've thought of something! Everything is all right again, isn't it?"

He laughed quite merrily at her young eagerness. "Perfectly all right again," he assured her.

"Oh, tell me all about it," she begged.

(TO BE CONTINUED)

Souvenirs From Garden of Eden for Tourists

If, on your vacation you happen to stumble into the town of Qurna at the junction of the Tigris and Euphrates rivers you may not be impressed by the scenery or the city but you will soon be informed that it is the site of the Garden of Eden and to prove it you will be shown the "Tree of Knowledge," says a writer in the Washington Star. The tree is merely a decayed trunk with a few scraggly branches and these will soon be out of business, but the natives have thoughtfully planted another tree nearby and this baby will probably do service as "the tree" when the older one has departed.

Anyone visiting this locality is presumed to have come to see the tree, for there is little else, and the children of the town are eager in their efforts to act as guides to visitors. The new arrival is at once spotted and

surrounded by the juvenile guides and almost dragged to the tree. Arriving on the ground the boys will bound into the branches and offer chips of souvenirs.

Pigs as Currency

A traveler who has returned to England from the Pacific has been telling some amusing stories of things that go on in the New Hebrides. Pigs, he says, are not only eaten on a large scale, but they are the standard currency in the island. There are certain ceremonies at which it is very important to have pigs, and they are frequently borrowed. The men who lend pigs are like money lenders, demanding interest on their loan, and when the pig is paid back it must be the size of the pig that was loaned would have grown to during the time it was borrowed.

Monologist Appreciated

"You often buy things you don't exactly need."

"Yes," answered the amiable lady. "When a capable salesman appears, whether I think much of his wares or not, I feel as if so good a monologue ought to be worth something."

Too Extravagant

"Darling, I offer you my heart and my fortune."

"Don't be extravagant, dear. Your fortune will be quite enough."

Just Came True

"I'm beginning to believe in fortune-telling."

"Why? Something come true?"

"Yes. A fortune-teller told me yesterday that I would have money left after paying my wife's dressmaker's bill."—Stray Stories.

Explained at Last

"How do you suppose that Chicago came to be such a great railroad center?"

"Why, to furnish a quick getaway for the bandits, of course."

Tear for Ellis

"I had a tear."

"For Ellis Bree?"

"The car he hit."

"Was marked 'P. D.'"

Liquid Chicken

Freshman—We sure have a fine landlady. She saved me the tenderest part of the chicken when I was late for dinner yesterday.

Soph—What part was that?

Freshman—The gravy.—Capper's Weekly.

No Good Cook

Ichiban—My wife is a canny housekeeper.

Sayonara—My wife doesn't know how to cook either.

Current Wit and Humor

JAMI

A meeting of the members of two clubs was held for the purpose of deciding whether the clubs should be amalgamated. After the voting had taken place, the chairman announced: "This meetin' has voted in favor of the two clubs bein' marmalated."

"I suppose you mean, Mr. Chairman, that they be jammed together?" inquired the secretary of one of the clubs.—Montreal Star.

A WEAKNESS OF HERS

"Well, dear, I'll be at the altar tomorrow at ten sharp."

"If I'm not there, darling, please wait. I'm so often late for my weddings."

Photographs

I saw an old-time photograph.

As I contrast it with the new I pause to sigh and then to laugh.

It looks so young—and foolish, too.

Alimony for Him

"I guess I'll have to give him up as hopeless," she sighed.

"Is he as bad as ever?" asked her dearest friend.

"Yes," she replied. "I've bought him the right shaving cream, the right tooth paste, made him use the proper tobacco; in fact, I haven't overlooked a single ad, and still he is impossible."

First Reading

Mistress—Isn't that the postman, Mary? Who's gone to the door?

Mary—Please, ma'am, cook has.

Mistress—Well, what's she such a long time for?

Mary—Please, ma'am, I think it must be a postcard.—Monmouthshire Beacon.

Just Came True

"I'm beginning to believe in fortune-telling."

"Why? Something come true?"

"Yes. A fortune-teller told me yesterday that I would have money left after paying my wife's dressmaker's bill."—Stray Stories.

Monologist Appreciated

"You often buy things you don't exactly need."

"Yes," answered the amiable lady. "When a capable salesman appears, whether I think much of his wares or not, I feel as if so good a monologue ought to be worth something."

Too Extravagant

"Darling, I offer you my heart and my fortune."

"Don't be extravagant, dear. Your fortune will be quite enough."

English Beadle Passing But Tribe Not Extinct

The passing of beadies is being lamented in England. One of the last existing specimens, the beadle of Kew, seeks peace and retirement after a generation of service. Manifold were the powers and duties of this worthy. In addition to being beadle, he was head-borough, constable of the manor court and herdsman. His beadleship gave him authority to whip naughty boys who talked in church, and attack sinners who broke the customs of the manor. There are, however, plenty of beadies today, here as well as in England. They are the self-appointed variety. Lacking the historic robe, cocked hat and decorated staff, they are clothed in a shred of brief authority. The gaudy uniform may go, but the Bumble spirit we shall have always with us.—New York Herald Tribune.

Old Turkey Lining Up With Modern Nations

Engravers street, a short passage near the grand bazars, Constantinople, has suffered a change in the past year. Seal makers, who formerly cut signets in the old characters, now are reduced to such inartistic pursuits as painting signs reading "Keep the Halls Clean" and "This Way to the Janitor." This is entirely due to the influence of compulsory education. Thousands of illiterate people who formerly depended upon a stamp with which to place their names on documents, now sign for themselves. Not many years ago the signet was something to be proud of. Frequently it was cut from semi-precious stones and even emerald seals were used. But the signet has now been replaced by the fountain pen.

Corn Borer

The corn borer is one of the most serious pests of the farm. It enters the cornstalk at the ground and operates through the length of the stalk and ultimately the corn is destroyed. A. Russell Marston, entomologist at the Michigan State college corn borer experiment station, has developed a strain of corn which the borer refuses to attack. Why, Marston cannot tell. There is something in it the borer does not like; he knows the strain intuitively, and lets it alone. The resistant strain that has been developed is a cross between the maize abargo, a South American strain the borer will not attack, and a commercially productive North American strain.

Quicker

First Father—My son at college supports himself by typewriting letters in his spare time.

Second Father—Huh! Mine sends telegrams.—Chicago Daily News.

Man with a double chin is such an accumulator that he generally has plenty of money, too.

PAINS

No matter how severe, you can always have immediate relief

Bayer Aspirin stops pain quickly. It does it without any ill effects. Harmless to the heart; harmless to anybody. But it always brings relief. Why suffer?

BAYER ASPIRIN

Weevil controls all cotton damaging insects. No investment necessary for agents to handle Weevil or our fly spray for dairy and household use. Write for literature and details. Weevil Laboratories Co., P. O. Box 84, Houston, Texas.

City people do talk about their neighbors, whom they usually don't know, but it isn't malicious. They don't care.

FAMILY DOCTOR

MADE MILLIONS OF FRIENDS

Fifteen years after his graduation, Dr. Caldwell became famous for a single prescription which now, after forty years, is still making friends.

Today Dr. Caldwell's Syrup Pepsin is the world's most popular laxative. Millions of people never think of using anything else when they're constipated, headachy, bilious, feverish or weak; when breath is bad, tongue coated, or they're suffering from nausea, gas, or lack of appetite or energy.

Dr. Caldwell's Syrup Pepsin made today according to the original formula, from herbs and other pure ingredients. It is pleasant-tasting; thorough in the most obstinate cases; gently effective for women and children. Above all, it represents a doctor's choice of what is safe for the bowels.

A political minority is always angry. You can count on that.

Being entertained because you are famous is terrible work.

Aid to Motorists During Night

A new device to assist motorists at night has just been placed on the London market. It is a red light fixed to an elastic band which may be worn on the hand, enabling a driver to indicate his movements to any car following behind, as the brilliant red glow can easily be seen.

Joe Martina's Little Trick Tried on Swatter Babe Ruth

When Tom Zachary was with the Washington team he used a trick of standing in front of the rubber and pitching from a distance several feet closer to the batter than the regulation distance. The batters had to watch Zachary closely to keep him from stepping on their toes as he wound up.

Oyster Joe Martina, who spent a season with the Nationals, thought Zach's trick an excellent one to be used in case of emergency. He reserved his first use of it for the emergency of holding a one-run lead with two on and the invincible Babe Ruth at bat.

Bucky Harris, who was managing the team, ran over to the box to caution Martina to be very careful. Joe waived Bucky back, saying, "Don't worry, boy, I'll stop this guy. I'm gonna walk up a few feet and bust one past his whiskers so fast he'll think I'm throwing express trains at him. Just keep your weather-beaten eye on me."

"I walked up, all right," said Martina in telling the story afterwards. "I moved five feet in front of the box, wound up and blazed away. Ruth swung and I ducked. When I got up

the ball was dropping in the center field bleachers for the longest hit I ever saw in my life and the old ball game was gone."

Big Star at Lacrosse

Bobby Pool, third attackman of the St. John's college lacrosse team, who is called the greatest player in the United States. Although of midget size Pool shoots from either his left or right and can drive a ball through a knot-hole, so great is his accuracy. Pool's team won the national lacrosse championship last year.

Interesting Little Notes of Various Sporting Events

Benny Frey seems to be the pitching find of the National league.

If the new trans-Neptune planet is that far away, they might call it Pennant.

Bert Riel of Waseka, Ill., was elected captain of the 1930 Northwestern university basketball team.

Six American college football teams have been scheduled by the University of Mexico for games next fall.

Alva Martin, half-mile champion while at Northwestern, is teaching track to school children in Peru.

Tom Zachary, thirty-two-year-old Yankee southpaw pitcher, was released to the Boston Braves on waivers.

Harvard and the University of Texas will meet in a football contest at Cambridge, Mass., on October 24, 1931.

Bucky Harris, Tiger manager, has solved five radio sets as a gift. May they're kidding Bucky that the only

way he can get a world series is to tune in on it.

"Father Bill" Daly, dean of thoroughbred trainers in the United States, is credited with the development of more good jockeys in his time than any other turfman.

Catcher Al Kimbrell of the Oglethorpe university team turned in his uniform, and announced that he had signed a contract with the Brooklyn Robins.

Henry Greenberg, the young first baseman considered a sensation in the Detroit camp this spring, has been returned to the Tigers by Hartford of the Eastern league. He was unable to connect with the pitching served in the Eastern loop.

George Sisler, now a second stringer for the Boston Braves, made 246 hits in the 1922 season, while playing with the St. Louis Browns.

Manager Walter Johnson of the Washington Senators, dissatisfied with Goslin's stick work, ordered Goose to

spend an additional two hours at batting practice every morning in an effort to snap out of his slump, and the big outfielder showed immediate results.

Head Coach Anse Cornell of the College of Idaho has announced there will be no more captains of football or basketball teams. He will appoint an acting captain before each contest.

Motor trucks were used extensively in hauling cattle to market during 1929. More than 14,500,000 head were marketed in this manner.

Earl Smith, catcher released recently by the Cardinals, had a batting average of .345 with the club last season.

Pete Westra, University of Iowa tackle of All-American fame, has signed a contract to play football with the Ironton Tanks next fall.

The cost of gasoline for running a light car is about 22 per cent of the total cost per mile. In a heavy car it is about 15 per cent.

When trouble descends on Burt Shotton, manager of the Phillies, he reads mystery stories to keep his mind off baseball.

Simile (inspired by occasional trips through a hotel lobby): An unemployed as a big league ball player on a rainy afternoon.

All courts take cognizance of facts that are matters of common knowledge, without proof, and we doubt whether you could sue a promising young shortstop for breach of promise.

New Car Caution

Many believe it still is in order to caution new car owners that the speedometer does not show the speed of the engine, and that the limitation of 30 miles an hour during the breaking-in process refers to high gear. A speed of 20 may be too high in second, while in low from five to eight miles an hour is nearly correct. Engine speeds will be nearly the same for all these car speeds in various gears. A consultation with a garage man will help.

Many Racing Events Are Wrongly Labeled Derby

A glance at the conditions governing most of the events that are labeled "Derbies" proves that they deserve the title less than some events which are not so called.

For example: The Tia Juana, the Louisiana, the Kentucky, the Fairmount, the American and several smaller "Derbies" are not rightly called by this name because they do not fulfill the distance condition of the true derby, which is at one and one-half miles. Most of them do not conform to derby weight conditions, which call for 126 pounds for colts and 121 for fillies.

The only two major three-year-old feature races run under approximate derby conditions are the Belmont Stakes (sometimes referred to as the "Belmont derby") and the Latonia derby.

Overcoming Trouble With Ratchet Type Auto Jack

The ratchet type auto jack always seems to work out to its full length in the tool kit, causing a delay while it is racked back to its telescoped position. The illustration shows a

Spring Keeps Auto Jack From Working Out to Full Length in Tool Kit. Figure at Right, Shows Homemade Device for Testing of Bearings.

way to overcome this trouble. A light spring is attached at one end to the head of the jack and at the other end to the toe.—Popular Science Monthly.

Gallant Fox May Equal Zev's Record

Gallant Fox With Saddle Up.

By his successive victories in the Woods, Preakness and Kentucky derby, in all of which he came from behind when called upon to win, drawing away easily, Gallant Fox has won approximately \$138,000, and there does not seem any sound reason to suppose that any of the horses that finished behind him in these three rich stakes can beat him in any of the races to come, unless the son of Sir Galahad III should state off suddenly.

The real chance for an upset in the three-year-old division is for some of last year's crack juveniles that have not been seen under colors so far can get ready in time to whip Gallant Fox. Such a list includes the Whitney pair, Whiccone and Boojuns, Curuso, Hi-Jack and one or two others.

Should none of these disappointments of 1930 get into condition and none arrive on the scene to challenge the supremacy of Gallant Fox in the three-year-old division, it is by no means impossible that the Woodward colt can reach or come close to the all-time purse and stake winning record of Zev, which stands at \$313,000.

Road Markers Protected by Law in Different States

Eighteen states now have laws making it a misdemeanor to willfully damage official road signs and with traffic steadily increasing there is a tendency to impose severe punishment on those who interfere with these utilities of travel, according to the

research department of the American Automobile association.

The national motoring body pointed out that official road signs include all those erected by the state or local governments or by A. A. A. motor clubs with approval of the interested authorities.

The A. A. A. appeals to affiliated clubs, in states where such protective legislation has not been enacted, to conduct a vigorous campaign.

States in which it is now a misdemeanor to willfully damage, destroy, mutilate, tear down or deface any official road sign, warning or directional marker on highways are: Alabama, Arkansas, California, Delaware, Idaho, Louisiana, Maine, Michigan, Minnesota, Nebraska, New Jersey, New Mexico, New York, North Carolina, North Dakota, Pennsylvania, South Dakota and Virginia.

Will Weigh Trucks

Determined to enforce the law that denies overloaded trucks the use of certain highways, the Michigan highway department will install pit scales along principal trunk roads. State police will halt and weigh trucks suspected of carrying loads in excess of what the pavement will stand. The driver of an overloaded truck will be compelled to unload part of his cargo on the spot. He also may get a ticket

pin' at the bit. She was one of them restless yaps rarin' to go.

Then she went, dashed into the street draggin' that poor kid with her. A truck was comin' and she thought she could beat it but a drivin' fool in a tourin' car was passin' that truck on the left while goin' over the crossin' and she couldn't see it from the curb. She saw it when she was in front of the truck, got petrified with fear and stood stock still in her tracks until the truck hit her and knocked her under the wheels of the tourin' car. She got off with a busted leg and couple of ribs stove in. But it was the finish for the poor little kid with the trustin' eyes and childish confidence. Even the hard boiled cop turned his head away. The truck driver, a tough lookin' egg, stopped his death wagon and got out, shakin' like a leaf.

On the pavement back of the hind wheels lay a crushed little bundle in a white sailor suit, curly yellow hair matted down with streaks of red and little face smudged with oil and dirt.

Does the kick hurt a little? If it does write this in your book of good resolutions and stick to it: "When crossin' streets I will not try to beat traffic. I will obey all traffic rules same as automobiles are supposed to do because I don't want to get bumped off yet."

Red Sox Get Star

The Boston Red Sox secured the star of the season when they signed Tom Oliver, outfielder. He has shown wonderful hitting and fielding ability in all of his games thus far.

BILL, THE BUS DRIVER SAYS

"A minute's wait ain't expensive. It's the life, the pain and the dough you sometimes pay for bein' in a hurry that's costly."

(By MARCUS A. DOW.) I said this was goin' out and for that reason I am goin' to bruise the shins of a million or two yaps.

A dame come to a crossin' on a busy street in a thrivin' town in the Middle West. They had a cop on that corner. They also had traffic lights which turned from green to red just as the dame got there. She was leadin' a little boy by the hand. It was her kid, about four years old, and he kept lookin' up into his mother's face, trustin' like. Did that dame wait for the traffic light to change or for the cop's whistle? She did not. She stood a flectin' second or two leavin' over the edge of the curb like a horse cham

Burns' Portrait Found
A Raeburn portrait of Robert Burns, painted in 1803 and lost for more than a century, is reported to have been found recently by a miner's wife in Larkhall, Scotland. The picture, said to be a striking likeness of Burns, is a canvas 27 by 23 inches inside the frame and carries an indistinct signature which experts believe to be that of Raeburn. It was "picked up for a few shillings," according to a Glasgow newspaper, in a second-hand furniture shop.

History, when it repeats itself, is not responding to entreaties.

"A WONDERFUL HELP TO ME"

Read What Mrs. Arnold Says About Lydia E. Pinkham's Vegetable Compound

Dothan, Ala.—"What a wonderful help Lydia E. Pinkham's Vegetable Compound has been to me. I was so nervous and rundown I couldn't be up half the time. When I had taken one bottle of Vegetable Compound I could tell I felt better, so I took seven bottles and I recommend it highly. It helped my nerves and keeps me strong to do my housework and wait on four little children. I hope some other suffering woman will try it."
—Mrs. PORTER L. ARNOLD, 1013 S. St. Andrews St., Dothan, Alabama.

COGITATIONS and APHORISMS of JODOK

It seems that these rains which have been coming since Saturday have put as much pep into the people as they did into the growing crops. Strange what a little moisture may do.

It seems that the ladies of the county through their local clubs and county federation of clubs are putting forth an effort to secure either a county health nurse or a county home demonstrator for the county, or perhaps both.

I have been paying some attention to what these clubs have done in the past, their accomplishments have always been of a very worthy nature, and another thing I have noticed is that they have always come through with what ever they have undertaken.

These ladies had their representatives at Farwell Monday before the commissioners' court pleading their cause, and judging the future by the past they are going to get what they are going after, be it a county health nurse or a county home demonstrator, and mayhaps both.

A group of men have been busying themselves to a certain extent for the past few weeks to secure a county farm advisor, but so far it has been vain.

It occurs to me that if the men who want a county farm demonstrator will take the pains that these ladies are taking they may

POLITICAL ANNOUNCEMENT

The Friona Star is authorized to announce the following persons as candidates for election to the various county offices under which headings their respective names appear, subject to the action of the Democratic Primary Election in July.

For County Judge:
 JOHN ALDRIDGE, Jr., of Farwell, (Re-election).
 CLYDE V. GOODWINE

For Sheriff and Tax Collector.
 W. L. VENABLE, Bovina.
 W. W. Hall.
 W. D. (Bill) KIRK

Ticket Office: City Drug Store

got somewhere with their proposition.

It is true, as we have been told, that the county has no money with which to pay a person for either of these three services, but it appears that the county has a group of men forming the commissioners' court who are proving themselves pretty good financiers, and have to date succeeded in paying off the greater part of the county's indebtedness against the general fund, and at the present rate of debt reduction hope to have met all these obligations, and that by the next year they hope to have enough funds to supply the county with at least one of these most desirable officials, and perhaps all three of them.

Speaking of compliments, it seems that nearly everybody enjoys a compliment. However, I have had so few of them during my long and uneventful life that I have scarcely become well enough acquainted with them to really know whether I like them or not.

And especially is this true when they come in such form that it is hard to tell whether they are compliments or merely a polite slam, as was the case with me a few days ago when a man told me he would rather be in hell with fellows like me than to be in heaven with some people he knew.

I stepped into a local barber shop recently for a hair cut. I got a good job and was pleased with it, but thought the man who did the work had never cut my hair, so I asked him if he was the man who cut my hair the other time, and he replied that the thought not as he had only been there six months.

Our city fathers are now in a position to tap us in on the city water mains and have connected several, but I am told that many refuse to take city water on account of the connection fee being charged by the city.

I am not telling any other citizen what to do in this matter, but as I see it the city has not funds available at this time to stand this connection expense and if I were in a position to use the city water I would do my utmost to raise the necessary funds to pay for that connection and help the city over a period of close financial conditions.

No one can fail to realize the fact that the more water the city can sell to its citizens the better able it will be to pay for the water system, and with sufficient patronage it may be made to produce a revenue to help meet other expenses and at the same time sell water to its citizens at a rate they can easily afford to pay.

As I see it Friona has been one of the healthiest growing towns during the past year to be found on the Plains, and it will continue to grow under certain conditions, but I believe I can easily see that these conditions may easily be stifled to the extent that city growth will be greatly retarded or perhaps entirely stopped.

Since the prosperity of our city must mean certain degree of prosperity to its citizens, it occurs to me that Friona people ought to think twice before doing or refusing to do a thing that might so easily stifle our city's growth.

We have elected a force of city officials who are evidently doing their best to keep the machinery of our city government working satisfactorily and moving toward prosperity, and it illy behooves any good citizen to throw a wrench into the gearing.

I heard a man say on the streets the other day that the women of Friona should be ashamed of themselves, or words to that effect, because they did not show a more social disposition toward strangers who move in and make them feel more welcome by visiting them in their homes.

Personally I have always found the people of Friona most hospitable and sociable. It is true that a family may move into Friona and not be visited except by some of their closest neighbors, and this fact may easily be accounted for by the fact that it is quite likely that none but their nearest neighbors know of their coming.

I have found by experience that one good way to let people know that you live here is to attend regularly some one of the various church services that are held in the churches each Sunday. My reason for stating this is that there are very few people in Friona who do not attend one of these institutions.

Progressive News

BY MISS OLIVE PERKINS

The Progressive community club is giving a play Saturday, June 21 at 8:30, "A Fortunate Calamity." See Rastus and Dinah.

Mr. and Mrs. T. E. Baker spent Saturday in Amarillo with relatives.

Mrs. Jeff Roberson and son and Mrs. Cecil Hodges and daughters spent last Tuesday with Mrs. C. P. Caldwell.

Miss Olive Perkins called on Mrs. Saylor Wednesday afternoon. The girls club met in the Ricketts home last Wednesday with Ruth Botts president and Catherine Ricketts secretary, in charge. It was decided that the girls join the 4-H club. Refreshments of ice cream and cake were served. It was decided that the club meet at the home of Mrs. J. W. Vick on June 18 to plan for more definite work.

Mr. and Mrs. J. E. Henry and family spent Sunday in the J. L. Park home.

H. L. Hershey and Mr. Hester Riggins spent Sunday in the Ray Hershey home.

Mr. and Mrs. Luke McBrayer and daughter spent Sunday in the Ira Ricketts home.

Mr. and Mrs. Joe Andrews of Friona spent Sunday in the Benson home.

Mrs. Arch Conklin and sons, Ben and Donald, and Mrs. Ray Hershey were in Canyon Saturday.

Glenn and Ira Jeanne Ricketts are spending a few days this week visiting their sister, Mrs. Luke McBrayer.

The play, "A Fortunate Calamity" is being given for the benefit of the Progressive Workers Club, and is coached by Mrs. J. E. Blakemore.

Martha McBrayer of Amarillo is visiting this week in the T. E. Baker home.

Mr. and Mrs. Jack Baker spent Sunday in the T. E. Baker home.

Owen Neel's father and mother of Memphis visited him last week.

After the First Twenty-five Thousand Miles

THE VALUE of sound design, good materials and careful craftsmanship is especially apparent in the new Ford after the first twenty-five thousand miles. Long, continuous service emphasizes its mechanical reliability and economy of operation and up-keep.

As you drive the Ford through many months and years you will develop an increasing pride in its appearance and a growing respect for the substantial worth that has been built into it. From every standpoint—in everything that goes to make a good automobile—you will know that you have made a far-seeing, satisfactory purchase.

Wherever you go, you hear enthusiastic praise of the car and this significant, oft-repeated phrase—"I'm glad I bought a Ford."

A FORD owner in New York tells of a 13,000-mile trip across the United States and back in sixty days and says "the car was extremely economical to operate, comfortable and speedy." A grateful father tells how the Triplex shatter-proof glass windshield saved his wife and children from serious injury.

To test tires, a large company drove a new Ford day and night, for an average of 500 miles every twenty-four hours. It was still giving satisfactory service after 105,000 miles.

A Ford car that had fallen into Fernan Lake was submerged for twelve days before being raised. After a new battery and carburetor bowl were installed, it was driven back to Spokane under its own power.

Many police departments have written of the special advantages of the Ford in crowded traffic because of its alert speed, acceleration, and ease of control. An increasing number of fleet owners are also purchasing the Ford because their cost figures have given conclusive proof of its economy of operation and up-keep.

In addition to important triumphs in Germany, France and Italy, the Ford won six out of seven leading places in a contest in Finland, first and second in the Rafaela races in Argentina, first and second in the

run from Copenhagen-to-Paris-to-Copenhagen, three gold medals in England, first ranking in the durability test over the tortuous Amancaes road in Peru, and first place in the 1930 reliability run conducted by the Royal Automobile Club of Sweden.

This contest was an exceptionally severe test of endurance and sturdy construction because it was held in the dead of winter and covered 600 miles of steady running over snow-covered country roads and mountainous hills.

WORK AND GROW—

When Rip Van Winkle took his sleep
 He lost a lot for he missed a heap.
 Some people now, this present day,
 Let the world go by the very same way.
 They simply stop while the world goes by,
 They don't catch up and wonder why.
 Old Rip was slow and would not work,
 And they, also, life's duties shirk.
 The Friona State Bank has much to show
 You have to work if you want to grow.

UNDER THE OLIVER FLAG

The Ideal Plow for the Wheatlands—The Oliver One-Way Disc Plow

The Oliver One-Way Disc Plow is the most economical plow you can use. Some farmers hook two or three of them behind a big tractor and plow their land at unbelievably low cost.

The Oliver One-Way Disc is a plow that will stand up for years under the hardest kind of work. It is built with extra strength in every part.

The new electrically heat-treated steel discs will last more than twice as long as ordinary discs without re-tempering.

Come in and see the One-Way Disc.

Star Will Show Film On Grain Smut Removal

(From The Hereford Brand)

The Star Theatre will show an educational film Monday and Tuesday night, June 23 and 24 on the destructive diseases among grains, according to J. C. Parker, manager, who believes the feature will be worth something to wheat growers.

More than two hundred million bushels of grain is the annual toll levied by diseases upon America's cereal crops—a staggering waste—a terrific leak in the profit of the grain growers of this country.

A method of avoiding paying this disease toll is shown in the intensely interesting and entertaining movie "Seed Disinfection Increases Your Grain Profits." The film cites the tremendous losses caused by cereal diseases; shows scenes in famous wheat growing states; the various steps in marketing the crop, including inspection, dockage and dumping a carload of grain at the terminal elevator; the life story of smut, and the easy dust method of applying the remedy, a seed grain disinfectant.

An unusual feature of the film is a growing picture taken over a period of 21 days, illustrating the striking difference in stand and vigor of treated seed grains, the improved stands and increasing yields.

The Corner Drug Store has been selected local distributor for the noted disinfecting product.

Mrs. Weathered and Mrs. Jeff Roberson called on Miss Olive Perkins last Tuesday.

"Run-Off" After Rainfall Affects Water Power

In the study of the matter of rainfall, it has been gradually realized that the "run-off" calls for just as much investigation as the precipitation. In fact, it has been found that the "run-off" is even more variable than the rainfall. The "run-off" is that part of rainfall which finds its way to the streams and is available for generating hydroelectrical power. This "run-off" is not a fixed percentage. When the ground is very dry it absorbs all the rainfall and there is no "run-off." When the earth is saturated practically every drop of rainfall runs off. Thus, when a severe drought strikes an area usually well watered, the drop in "run-off" is much more pronounced than the shrinkage in precipitation. All of this has been known in a general way, but it has taken a prolonged dry spell to make it really appreciated, and water power plants that were planned from rainfall records without proper allowance for the still greater fluctuations in "run-off" have suffered.

The recognition of this relationship will undoubtedly save the industry many millions of dollars in unprofitable investments and will safeguard the consumer because of greater reserves that will be provided hereafter.

Wright Brothers Showed Genius in Early Years

According to the first biography of the inventors, "The Wright Brothers; Fathers of Flight," by John R. McMahon, they showed their inventive minds at an early age. When Orville was ten and Wilbur fourteen they constructed a wood-turning lathe out of lumber from the wood pile, parts from an old buggy and marbles for ball bearings. Its power plant was a foot treadle long enough to accommodate the feet of six boys. When Orville was seventeen and Wilbur twenty-one they built a printing press with a second-hand tombstone as the flat bed. Their first revolutionary discovery was made from a cardboard box from which Wilbur had just sold a bicycle inner tube. Orville had previously concluded that lateral balance would be necessary to successful flight. As his brother twisted the sides of the box he evolved the very principle they had been seeking. This became the warp which, in its present form of aileron, is essential to the sidewise balance of airplanes.

Insect Resembles Leaf

The walking leaf, an insect species the female in which has disguised herself to resemble vegetative life probably more cleverly than any other, comes originally from the island of Ceylon, but has been raised in Europe, whence eggs have been imported to America. When the young emerge from the eggs they are very active and a bright red in color, says Nature Magazine. They do much walking about, but do not begin to eat until they are about one week old. A week later they have begun to turn brown and by the time a fortnight has passed the females are green, which color they maintain until they perish. The older and larger they get—and they grow to be four inches long—the more do they resemble a leaf. In their native country they feed on tea leaves and leaves of certain species of lemon trees.

Planned Great Memorial

Nearly eighty years ago a Santo Dominican, Don Antonio Delmonte y Tejada, conceived the idea of a fitting memorial to Columbus. His proposal was: "Let us erect in the most visible and notable place in America, in a central point and where it may be visited by travelers as they approach her shores, the statue that his greatness and remembrance demand. Let this statue be a colossus like that of Rhodes, and let it be designed by the best sculptor available and with funds raised by popular subscription in all the cities of Europe and America, and let this statue have its arms extended and pointing to one and the other of the American continents."

Prickings of Conscience

The first contribution to the national conscience fund was made in 1811. Money received for this fund is not carried on the books of the Treasury department as such, but is listed as miscellaneous receipts. The amounts sent in range from two cents for a person who failed to put a stamp on a letter when mailed, to several thousand dollars from persons who smuggled goods into the United States without paying import duty. Usually the sums sent are small. The total amount sent in now amounts to about \$578,000.

Most Expensive Avocation

The most expensive avocation which a wealthy man can find is dairying, according to the business monthly Fortune. Blooded cows cost from \$300 to \$25,000 a head, bulls up to \$100,000. With tiled walls, vitra glass windows, ice plants and ventilating systems, equipment of dairy and barns have cost around \$600 a head. And, of course, there's the pay roll. At a luncheon Mr. Charles M. Schwab once offered his guests their choice of champagne or milk. "Gentlemen," he said, "they both cost the same."

Salmon Fisheries Blessed

Carrying out an ancient ritual, a church of England clergyman blessed the River Tweed salmon-fishing industry in England at the beginning of the season. Homes are also "asperged" with holy water and services held in government offices to increase the piety and efficiency of the employees.

Dairy Expert Is Coming June 20; Will Give Talk

(From The Hereford Brand)

J. H. McLean, dairy specialist of Washington, will talk to the dairymen and business men of Hereford and Deaf Smith county next Friday, June 20, at 2:00 p. m. in the county court room, according to R. O. Dunkle.

McLean's talk will deal with subjects in which all dairymen are interested and things most essential to dairy farming, such as securing better prices for cream, pasture utilization and herd improvement.

"We realize that this is a very inopportune time for such a meeting," said Mr. Dunkle, "on account of harvest, but owing to the im-

portance of the subject and that the services of a man of the calibre of McLean is only available possibly once in ten years, we urge those interested to attend if at all possible."

The meeting will be held under the auspices of the Hereford Creamery Association. This is the first time a dairy representative of the national department of agriculture has ever visited the Pan-

handle, and the association here feels fortunate in securing the services of this man who can talk intelligently on the problems now confronting the dairymen.

Mrs. Cecil Hodges spent Sunday with home folks, Mr. and Mrs. C. Caldwell.

Mrs. Webb's niece, Ruth Gray, of Amarillo is visiting in the Webb home this week.

JOHN QUINCY ADAMS
by Edmund T. Quinn

By ELMO SCOTT WATSON

RECENTLY there were unveiled in the Hall of Fame on the campus of New York university, busts of nine great Americans. It is a remarkable fact that of these nine immortals who have thus taken their places in this American Valhalla, seven were natives of the same state and five of them were graduates of the same university. Insofar as Massachusetts this year is celebrating its tercentenary and honoring the men who helped add to her renown as a colony and a state, the ceremony at the New York institution might properly be regarded as a part of the tercentenary celebration. For those seven men all sprang from the soil of the Old Bay state and five of them were graduated from Harvard!

The nine who were thus honored in this year's ceremony included two statesmen, two historians, an author, a poet, an educator, an inventor and a jurist. Their names and their records of achievement are as follows:

John Quincy Adams was born in Braintree, Mass., July 11, 1767. After graduation from Harvard he practiced law in Massachusetts and first entered public life in 1794 when President Washington appointed him minister to Holland and two years later minister to Portugal. In 1797 he became minister to Prussia, and at the end of his career in that post returned to Massachusetts where he was elected to the state senate in 1802. The next year he was elected to the United States senate. President Madison appointed him minister to Russia in 1809 and he played an important part in arranging the treaty of peace which ended the War of 1812 between Great Britain and the United States. Adams was next appointed minister to England, and after an absence of eight years abroad he was called back to America to serve as secretary of state under President Monroe.

Adams' principal achievement as secretary of state was the treaty with Spain, whereby Florida was ceded to the United States for \$5,000,000. In the campaign of 1824 he was elected President over Andrew Jackson when the election was thrown into the house of representatives, but in the election of 1828 Jackson was the victor. However, the ex-President did not long remain in private life. In 1831 he was elected to congress where he remained, representing the same district of Massachusetts, until his death in Washington February 23, 1848.

George Bancroft, born in Worcester, Mass., October 3, 1800, was also a Harvard graduate. After studying abroad he selected history as his special branch and soon became widely known, both in Europe and America as a historian and teacher. The first volume of his greatest work, "History of the United States," was published in 1834. When James K. Polk became President he appointed Bancroft secretary of the navy and his greatest achievement in this position was to win the title of "founder of the United States Naval academy" by establishing the training school for our future sea captains at Annapolis, Md. Bancroft died in Washington, January 17, 1891.

James Fenimore Cooper, born in Burlington, N. J., September 15, 1789, was the author who immortalized the American Indian in his "Leatherstocking Tales," and whose sea stories revolutionized the literature of the sea.

One day while reading an English novel he made a remark which has become a classic of would-be authors: "I believe I could write a better story myself." Encouraged by his wife, he attempted it, and in 1820 his first novel "Precaution" was published anonymously. It attracted some attention in England and it encouraged him to continue his writing. The result was "The Spy," published a year later, and "during the winter of 1821-22 the American public awoke to the

JAMES FENIMORE COOPER
by Victor Salvatore

ELIAS HOWE
by Charles Keck

fact that it possessed a novelist of its own." Cooper died in Cooperstown, N. Y., September 14, 1851.

One phrase, "Give me liberty or give me death" is synonymous for the name of Patrick Henry, "the Orator of the Revolution." Born at Studley, Va., May 29, 1736, the future advocate of freedom was an indolent pupil in school and a failure in business. But when he took up the study of law he found himself and soon became known as one of the most brilliant lawyers in a state noted for its legal luminaries. By 1763 he had acquired renown as an orator and this was increased in the famous "Parson's Case" when he denied the right of the British king to abrogate acts of the colonial legislature.

Henry was an influential member of the Continental congress from 1774 to 1776 and a signer of the Declaration of Independence. In 1776 he was chosen governor of Virginia and served until 1779. He sat in the legislature from 1780 to 1784, again served as governor from 1784 to 1786, and once more, from 1786 to 1790, was a member of the state assembly. He declined to serve in the Constitutional convention and opposed the ratification of the Constitution. Again in 1799 he ran for the legislature and was elected but died in Charlotte county, June 6, 1799, before he could take office.

Elias Howe, inventor of the sewing machine, was another Bay State product, having been born in Spencer, Mass., in 1819. In 1843-45 he experimented with a lock-stitch sewing machine and finally perfected it, securing a patent in 1846. For years he vainly sought recognition of his invention, both in this country and in England, where he sold his rights in 1847 for 50 pounds sterling. While absent abroad his patent was infringed upon by others, but eventually the courts decided in Howe's favor, and after years of wretched poverty Howe suddenly found himself wealthy. In 1863 he erected a large sewing machine factory at Bridgeport, Conn., where he died in 1897.

James Russell Lowell, born in Cambridge, Mass., on February 22, 1819, was one of the famous groups of writers which Massachusetts gave to the nation during the middle half of the Nineteenth century, and of them all Lowell was undoubtedly the most versatile. Having been graduated from Harvard in 1838 he immediately entered the Harvard law school, took his degree in 1840 and began to practice.

After several years abroad Lowell returned to become a teacher in Harvard and to enter upon an epoch in his life as a scholar and critic. He became the first editor of the newly established Atlantic Monthly in 1857, resigning in 1861 to become associated with the North American Review in 1864. He resigned that position in 1872 and again went abroad, where the famous English colleges of Oxford and Cambridge conferred degrees upon

him. In 1877 he was named United States minister to Spain and in 1880 was transferred to England, returning to America in 1885. On August 12, 1891, he died in Cambridge.

Horace Mann, born in Franklin, Mass., May 4, 1796, after his graduation from Brown university became a teacher, and then a lawyer. He was a member of the Massachusetts legislature from 1827 to 1837, and from 1837 to 1848 served as secretary of the Massachusetts board of education.

Mann visited Europe in 1843 and brought back with him reports on foreign school systems which attracted wide attention. Due to his efforts the school system of Massachusetts was entirely reorganized and became a model for many other states. From 1848 to 1853 Mann served as a member of congress. After his term was over he became president of Antioch college in Ohio and served there until his death in 1859. History has preserved his fame as the founder of the normal school system in this country and "father" of the American public school system.

John Lothrop Motley won his fame as a historian of a European country. He was born in Dorchester, Mass., April 15, 1814, and was graduated from Harvard in 1831. He then went to Germany to study, and upon his return to this country studied law, although literature was more to his taste. He published an American novel in 1839, but it attracted little attention. After a short career at the American legation in Russia he returned to America again to serve a term in the Massachusetts legislature.

After ten years of hard labor, during which he returned to Europe and found it necessary to rewrite much of that which he had already written, he published his "History of the Dutch Republic" in 1856 and was immediately acclaimed both in America and abroad. Along with these literary honors came a call to public service, and from 1861 to 1867 he served as American minister to Austria, and from 1869 to 1870 to Great Britain. Motley died in Dorchester, England, May 29, 1877.

A statesman, a writer, an educator and inventor and two historians—such was the contribution of Massachusetts to the 1930 Hall of Fame ceremonies. To make it complete, she also provided a great jurist—Joseph Story. He was born at Marblehead, Mass., in 1779. Harvard graduated him in 1798 and Salem saw him begin practice as a lawyer in 1801.

He was elected to congress in 1808 and in 1811 became speaker of the house. Soon afterwards President Madison appointed him associate justice of the Supreme Court of the United States, and during his long career of 34 years on that high tribunal he assisted in the development of American constitutional law and in fixing the status of the American admiralty, patent and equity jurisprudence. He died in Cambridge in 1845.

Daddy's Evening Fairy Tale

By MARY GRAHAM BONNER

SWIMMING PARTY

"How about a party for the Every-Day-Is-Nice club this afternoon?" asked Peter Gnome.

He was talking to Billie Brownie. They hadn't seen each other in a long time, so, as usual, they hugged each other so hard that each fell down, and all the other brownies and gnomes laughed heartily.

"What sort of a party would you suggest, Peter Gnome?" asked Billie Brownie.

"Well, as it's a warm day, and the water is cool, I think a swimming party would be as nice as any."

"Fine!" shouted all the brownies and gnomes.

"Shall we call together all the other members of the club?" asked Bennie Brownie.

"By all means," said Billie. "I'll get Mr. Giant to call out to them with his great and powerful bugle."

So Bennie Brownie went off to Mr. Giant's cave. Mr. Giant was sitting by the door of his cave, fanning himself with a branch of a pine tree.

"Hot day," he said.

"Yes, it's a hot day," agreed Bennie Brownie.

"It's nice, though," said Mr. Giant. "I enjoy a hot day when I have the cooling breezes of my beautiful pine fan."

"The Fairy Queen gave me that fan last Christmas. She said to me that I wouldn't be able to use it in the winter, of course, but that it would be most useful to have when the summer came, and as it was often a good plan to think ahead and have things ready in plenty of time, she would give it to me along with the new winter mittens she gave me."

"It's a wonderful fan," said Bennie Brownie.

"I'll fan you a little," said Mr. Giant.

But as soon as he started to fan Bennie Brownie, poor Bennie Brownie fell over, for to him it was like a great blast of wind.

He was so much smaller than Mr. Giant.

"I'm so sorry," said Mr. Giant. "I beg your pardon. I do indeed."

"No harm done," said Bennie Brownie, laughing, and picking himself up, while Mr. Giant put his fan away inside his cave.

"I've come," said Bennie Brownie, "to invite you to the swimming party of the Every-Day-Is-Nice club."

"And will you call on your powerful bugle and ask all the other members?"

"It's to be held this afternoon at the lake."

"Good," said Mr. Giant. "I've got a handsome new bathing suit, too."

Mr. Giant called on his bugle.

"Come to the swimming party, come all, come all, Peter Gnome, president of the club, is giving a swimming party. Come to the lake."

And how they all did come! They wasted no time, and many of them were there almost before they received the last words of the invitation.

Such splashing and such water fights as they had. Such swimming and diving races, such boat races where they all upset.

Such water ball games and tilting of canoes, and all the wonderful water sports as they all did have.

And Mr. Giant, who could stand up in the water which was well above the shoulders of every one else, let them all climb up on his shoulders and dive into the water.

Witty Witch made one of the best dives of all, for she did a perfect backward dive, but how they all did clap when they saw it, for it was a surprise, too.

They had thought she was going to dive forward, but not a bit of it—she made the finest backward dive that was ever made.

And they all felt cool and happy after the gay swimming party!

Dangerous Beasts
The teacher had been telling her class about the rhinoceros family.

"Now name some things," she said, "that are very dangerous to get near to, and that have horns."

"Automobiles!" promptly answered Johnny.

A Literary Aspirant
Margery (reading newspaper)—What's a literary aspirant, I wonder?

Vera (a little older)—I suppose it's what an author takes when he has a headache.

Dirigible and Plane Combined

Claude H. Freese of Los Angeles, who has become nationally famous through his creation of models of unusual aircraft, with his latest imaginative model of a future air liner. A combination of heavier and lighter-than-air features, the finished ship, measuring 902 feet in length, would have thirteen 600-horse power motors, a lifting power of 215 tons and a theoretical speed of 150 miles per hour.

ROCKET PLANES MAY REACH GREAT SPEED

German Expert Tells of Liquid Gas Motors.

Berlin, Germany.—Dr. Paul Heylandt, one of Germany's leading authorities on the application of liquid gases for industrial purposes, predicts that the time is not far off when airplanes can be shot thousands of feet into the sky by means of a new type rocket motor and can reach the United States from Europe in from six to eight hours.

More than that, Dr. Heylandt says, so high will be the speed—between 300 and 600 miles an hour—that this rocket-propelled plane that the motors can be turned off over Newfoundland and the pilot can glide the rest of the way to New York.

Dr. Heylandt holds some 500 patents in all parts of the world for processes and apparatus. Interests like the German dye trust use his inventions under license and the Berlin Polytechnic has conferred an honorary degree upon him in recognition of his scientific achievements.

Rocket Car Viewed.

The engineer received the correspondent as the first newspaper man to see in action what had been carefully kept from the public, namely, Max Valler's "rocket car."

"My real interest in Valler's car is that it affords a means of testing our rocket motor out practically," said Dr. Heylandt. "Our tests already have convinced me we have solved the problem of combining liquid fuel with pure liquid oxygen to achieve a continuous recoil propulsive power. The next step will be to build a rocket motor into an airplane driven by an ordinary motor. We plan that this plane shall take off the ground with an ordinary motor and then as it reaches high altitudes the operator will switch on the rocket motor. After this has proved successful the next step will be to construct a plane with a rocket motor only. We plan at present to shoot across the English channel with it as the first large test."

Liquid Oxygen Motor Used.

In tests with the rocket car Valler has used a liquid oxygen rocket motor developed by Dr. Heylandt. In the front section of Valler's car is a gasoline tank and behind the driver is a tank of the new liquid oxygen. Both are fed into a narrow bottle-shaped tube in the rear of the car where they are ignited and produce a recoil propelling the car forward. The exploded mixture escapes by a rear aperture leaving a long trail of fire behind, but no smoke.

Power Rockets Work.

Dusseldorf, Germany.—Gottlieb Espenlaub, German glider enthusiast, attained a speed of 95 miles an hour in a tailless airplane driven by powder rockets.

His arrow-shaped plane was loaded with three rockets, each burning six seconds. At a height of 65 feet he flew over the entire airfield and reached the 95-mile an hour speed. The rockets developed 600 pounds of propulsive power.

Espenlaub's project is different from that of Max Valler, who developed 50 miles an hour in a motor car using the rocket motor of Dr. Paul Heylandt.

Weather Charts by Radio

Transmission of weather charts and maps to airplanes en route by radio looms in the near future as a result of the successful experiments of the German Luft Hansa, officials report.

182 Women Are Pilots

Women pilots licensed in the United States total 182. California, with 42 aviatrices, leads all states having supplanted New York, which is second with 31.

Quebec Buys Seaplane to Hunt Rum Runners

Montreal.—Owing to the difficulties in coping with the operations of the illicit liquor trade in the lower St. Lawrence an aerial patrol seaplane with a 500-mile cruising range has been purchased by the Quebec liquor commission and put into service. Officers of the commission fly with the pilot and scour the waters for bootleg parties. Much of the contraband is said to go through the French islands of St. Pierre and Miquelon.

CHINA GETS WINGS FOR PEACE, WAR

Nationalist Government Is Becoming Air-Minded.

Shanghai.—China is becoming air-minded, both for peace and war.

An air line extending over western China through Szechuen province and perhaps connecting with Tibet is one of the Chinese government's major projects.

Six airplanes for the line will be purchased with money now being sought from the wealthy residents of Szechuen by the aviation department of the ministry of war. The sum needed is \$500,000 gold.

An air line connecting Japan with Shanghai and Nanking also is to be launched by a Japanese firm under a contract with the national government.

A China-Berlin aviation line to be operated jointly by the Lufthansa interests and the Chinese government is another proposed development. Soviet Russia refuses to let the line pass over its territory until "proper representation" has been made, however.

Meanwhile Chinese military chiefs are realizing the value of aircraft in modern warfare.

In Manchuria Marshal Chang Hseuh-liang is developing a strong air force of bombers and scouting planes with the aid of French instructors. He learned his lesson at the time of the Russian invasion of Manchuria, when the Soviet air forces had things pretty much their own way.

In China proper, likewise, Gen. Chiang Kai-shek has met with unusual success in downing rebellions with bombing planes, and this may have been a factor in the Manchurian general's decision to increase his own armament.

New Air Line Opens Area in West Canada

Edmonton, Alberta.—One of the most difficult and northernmost of air lines in the world to open an immense trade area from Alberta to the Arctic ocean has just been established from Fort McMurray, Alberta, to Aklavik, on the Arctic ocean.

The airline serves a territory rich in mineral deposits and abounding in fur-bearing animals. The inhabitants are few in number, however, as only prospectors and traders live in the country.

It is hoped by officials of the Canadian government that new settlers will be attracted to the territory because of fast transportation afforded by airplanes to and from the larger settlements.

Fast ships will ply up and down the Mackenzie river in winter, skills will be attached as landing gears and in summer pontoons will take their place. Mail and supplies will be transported. Low fares considering the expense of operating the airline will prevail. Freight and express will be handled on a cost basis comparable to passenger fares.

THE FEATHERHEADS

Ditching the Intelligentsia

INEZ' DRESS DIRECT FROM PARIS

INEZ CONKLIN sat in the deep chair trying to embroider a pink rosebud on a bit of sheer lawn which was intended for her daughter Beverley's new baby. But her hands were so unsteady that she could scarcely hold the needle. Inez was greatly agitated. Her plump cheeks glowed, her dark eyes sparkled, her gray hair was not so neat as usual. And at four o'clock in the afternoon she had not yet changed from her cotton house dress to the dark silk she always wore.

The most wonderful thing in the world had happened. After twenty-six years of quiet wedded life, with stern economy practiced in every department of her tiny household, Inez suddenly found herself in command of money. Not just money—money. It had come about in the most unexpected way. The small business at which Lewis had worked so long and so hard against such discouraging odds had suddenly opened up into astonishing possibilities. It had been of so much use in a merger that Lewis had been offered a big sum for it. He had, of course, sold out, for he was fifty-four years old and a bit tired. Lewis had never had a vacation in all the years he had been struggling and planning and he was going to have one now—a long vacation full of rest and sight-seeing and quiet luxuries. Like Lewis, Inez had never had a vacation. She had been on her job twenty-four hours every day, raising babies, keeping house, mingling with the neighbors, sewing, cooking, scrubbing, carrying on a thousand activities. But now she was going to rest, see something of the world and have a few of the things she had always yearned for.

Just that morning they had decided to go abroad—to Paris. Next day Inez went over to take the finished dress of the pink rosebuds to Beverley. "It's settled. We are going to Paris," she said. "Now, mom," Beverley said, "there's just one thing I want you to do. I want you to get a real nice dress in Paris—you've never had a real nice dress in your whole life. Remember, you are a good-looking woman yet, mom. This is your wedding trip, the one you never had. Get you a Paris dress, something different from what you've ever had or seen here at home. A dress of the right kind, mom, will do more for you than you can imagine. And don't haggle. Pay a stiff price if you have to."

Inez looked at her daughter's glowing, earnest face. Her dark eyes filled with tears. Funny how Beverley had hit the nail on the head. Paris meant dresses to Inez. Middle-aged as she was, she would have been ashamed to admit it, but she did want a dress out of one of those Paris shops. The Conklins had a wonderful time abroad. But when it was over Inez was glad to be on her way back home, for they had been away three months. The morning after they reached home Beverley rushed over, trundling the baby, Lewis William, in his rubber-tired carriage. For an hour Inez could do nothing but feast her eyes on her first grandchild. Then she began to bring forth the gifts she had bought for her children and friends. Beverley exclaimed over the wisdom and love that evidently governed their selection.

"And now, mom," Beverley said when there came a lull in the fascinating review. "I want to see what you got for yourself."

"Well, I had to have a pair of shoes," Inez said. "And I got me a small hat. And a few underthings. And some stockings..."

"The dress, mom! Didn't you get the dress?"

"Beverley," Inez said, looking flushed and guilty, "you will think I'm silly. But, you know, I just made up my mind that I'd have something so different that everybody'd know it came direct from Paris. I didn't care whether it was so awful becoming. I wanted it—different."

"I understand," said Beverley. Inez went to her closet and took a dress off the hook. When Beverley saw it she gave a start and gasp.

"I told you it would be different," said Inez. It was different. No mistake about that. It was slinky and sparkly in places. Green! Such a green! Beverley bit her lip. Inez looked at her wistfully.

"It's different, anyway," she repeated. "Yes," Beverley put her arm about her mother. She also made a repetition of her words—"I understand."

Beverley decided to make a party for her returned travelers. Inez was delighted. Thrill upon thrill. Life was interesting. But after the party she and Lewis were going to settle down again. Lewis was going to take a job—no use of rusting out with idleness. And she was going to get busy fixing up her home. It needed a thorough cleaning. They had played long enough.

Inez was going to wear her new dress to the party. When folks saw it

they might be a bit startled, but they certainly would know where it came from without being told. Take Miss Todd for instance. That dress would make her blink. Inez giggled girlishly at the thought of making Miss Todd blink.

That morning she went marketing as usual with her little green basket on her arm. Oh, but it was good to be walking the old streets again! The dear shop windows! Seemed like they had perked up some in her absence. This window of Werner's store now—she stopped to peep in.

Suddenly Inez turned white. She turned red. She looked round to see if anybody was watching her. Then she went into the little shop.

That evening she came to the party wearing a simple black crepe that had been one of her standbys on her trip. Everybody said she looked fine. She did.

Beverley took her aside. "Mom! I thought you were going to wear your Paris dress. What in the world made you change your mind?"

Inez fingered the beads on her daughter's white neck. She looked almost shy. "The joke is on me, Bev," she said. "I—I went into Werner's this morning and they had a dress—"

"Not—" breathed Beverley. Inez nodded. "Yes, it was. The same. Identical," she confessed.

Nature Produced Freak

in New Zealand Kiwi

To New Zealand the kiwi is a sort of national mascot. It owes its selection, apparently, to the fact that it is one of the strangest creatures living in an area of the world that is famous for curious beasts and birds. Kiwis are first cousins to the cross-word puzzle emu bird and are relatives of the rhea and cassowary.

The kiwi has no wings. It cannot fly. When collectors brought the first kiwi skin and carcass to London, naturalists doubted there could be such a bird. Even today observers describe it as a cross between a gourd and a football.

The adult kiwi is about as large as a hen, has oversize feet and a long bill. The kiwi, like the possum, sleeps in daytime rolled up in a hole under the roots of a tree. It is also like a dog. It ranges through the bush at night, sniffing noisily as it smells the ground for earthworms, and it is said to growl if disturbed during the daytime.

Occasionally it emits a penetrating cry, "ki-ki-wi."

While the chief purpose of the long bill is to root out earthworms, some writers report that the kiwi also uses its bill as a cane or prop to rest its head and neck when fatigue overtakes it.

When the mother kiwi lays an egg or two she is through. The male kiwi must sit on the egg or eggs and hatch them.

And such eggs! Naturalists marvel that the kiwi, a bird the size of a hen, can lay an egg eight inches long and three inches wide; an egg weighing one-quarter as much as the bird herself.

Rebuking a Skeptic

Cardinal O'Connell of Boston, who banned the "Beautiful Isle of Somewhere" as a hymn both "inane" and "trashy," has a short way with skeptics. A skeptic, at a dinner in Boston, asked Cardinal O'Connell if he did not find in the Bible many things that were difficult to understand.

"To be sure I do," the cardinal agreed. The skeptic then asked him what he did about it.

"My friend," said the famous cardinal, and he laughed heartily as he spoke—"my friend, I do just as I do with this excellent trout here on my plate. When I come to a bone I calmly lay it aside and keep on eating the delicious trout flesh—I let any idiot who wishes to choke himself on the bones choke away."—Detroit Free Press.

Making the Masterpiece

Director—Have you found an unused title that combines sex and scandal?

Author—Yes, sir.

Director—Have you made a list of all parties connected with this super-film?

Stenographer—Yes, sir.

Director—Have you shot the scenes in the latest fashion show?

Photographer—Yes, sir.

Director—Have you dug up those travelogue scenes of Paris and the news reels showing the boys marching on Fifth avenue?

Keeper of the records—Yes, sir.

Directors—All right. Call the company together and see if anybody can think up a little story to make continuity for this stuff.—Kansas City Star.

Walnut Poison Isolated

Everett F. Davis of the agricultural experiment station of the Virginia Polytechnic Institute at Blacksburg has isolated the poison of walnut trees that keeps the ground under them bare of plant life. The cumbersome name of the substance is pentahydroxy-alpha-naphtha-quinone. As this chemical term is unwieldy, Mr. Davis has chosen another—juglone. The botanical name of the walnut is juglans.

Farmers have known for a long time that the walnut tree poisons other plants growing near by. Attempts to grow alfalfa, the tomato and the potato in the vicinity of walnut trees have been unsuccessful.

At home or away

Feen-a-mint is the ideal summertime laxative. Pleasant and convenient. Gentle but thorough in its action. Check summer upsets with Feen-a-mint at home or away.

Rewarded!

THIS eight year old athlete is the son of Rev. and Mrs. C. F. Jenkins, Lyndon, Kansas. Mrs. Jenkins says: "Both my boys are the very picture of health. We have been more than rewarded for our faith in California Fig Syrup."

"During babyhood we used Fig Syrup with them quite regularly. Since they have been older we have used it to regulate their bowels during colds or upsets."

All children love the rich, fruity flavor of California Fig Syrup. A pure vegetable product, it does not gripe or sicken. It always acts gently but thoroughly to cleanse the digestive system of bilious, headachy, constipated babies or children. Bad breath, coated tongue, feverishness, disappear with its use. Doctors say it strengthens weak bowels!

Look for the name California when buying. That marks the genuine.

THE RISEN LORD AND THE GREAT COMMISSION

Matthew 28:1-9, 16-20

Golden Text: Go ye therefore, and make disciples of all the nations. —Matthew 28:19.

Introduction.

The lesson we studied last week by itself would be a dreadful one; that is, if it ended the story. But the cross never ends the story of the gospel of the Son of God. This is one of the splendid things about it. Its dark, hopeless incidents always have a bright, hopeful conclusion. The resurrection throws back upon the crucifixion a radiance that robs it of its horror, that transforms the cross into a symbol of the victory of heaven's King over earth's sinfulness, of life over death.

The Resurrection.

"It was blackness of despair for the disciples. The Master had indeed raised Lazarus from the dead, but now the grave held Jesus himself fast. With him they had buried all their hopes. No conspiracy on the part of these dejected disciples to revive Christianity with the announcement that Jesus was alive, though he was not, is inconceivable. If it be said that the women imagined that they had seen angels and Jesus, and so restored the hopes of the disciples, it is to be observed that the disciples did not believe the women. If it be said that the narratives are conflicting, one must remember that this shows independence in the testimony. In simple truth, no theory has yet been advanced that harmonizes with the fact of the revival of a dead Christianity save the fact of the resurrection of Christ. The disciples say Jesus." —Prof. A. T. Robertson.

There Was a Great Earthquake.

"And behold, there was a great earthquake." Matthew is going backward a little with this verse for the earthquake evidently took place before the arrival of the women at the tomb, which was at the break of dawn. "For an angel of the Lord descended from heaven. If ever these celestial beings came to earth, it would be to attend the birth and the resurrection of the Son of God. "And came and rolled away the stone." The women as they approached the tomb were worrying about the great stone that closed the entrance, and how it could be moved by their feeble

I Cannot Praise This Konjola Too Strongly

Says Wichita Lady Suffered for Twelve Years from Stomach Trouble.

"I cannot praise this Konjola too strongly, because I tried many other medicines and treatments, but none gave the remarkable relief that Konjola did," said Mrs. Della Stettin, 1719 Mildred Avenue, Wichita. "I just had to force myself to eat, and nearly everything I ate made me sick. I had cramping pains in my stomach and bowels until I could hardly endure them, and I simply felt miserable all the time.

"Finally I decided to put Konjola to the test. That proved to be a wise decision. Right from the start I noticed improvement. I now have a much better appetite, and meals are a pleasure as food digests without pains or misery in my stomach. My bowels are functioning as they should, and it is certainly a relief to be rid of that tired, worn-out feeling. I gladly endorse this splendid medicine that restored my health."

Konjola has become the most talked medicine in America because it makes good. And Konjola makes good in the most stubborn cases when given a fair trial and from six to eight bottles are used. Konjola is sold in Friona by the City Drug Store, and by all the best druggists in all towns throughout this entire section.

strength—a fine example of the uselessness of worry. They did not know about the sealing of the tomb and the Roman guard in front of it, or they could not have attempted their errand at all.

He Is Risen, As He Said.

"He is not here." He was in the world, but not in the grave. "For he is risen, even as he said." These women had been with Christ throughout his ministry. Probably each of them had heard him prophesying that he would rise from the dead on the third day. This is the most stupendous announcement ever made, more wonderful even than the angels' proclamation of the birth of Jesus at Bethlehem. It is the most blessed for us, taking away the fear of death forever. It placed the crown of triumph on the life of the Saviour. "Come, see the place where the Lord lay." The empty tomb would be more convincing than the stone rolled away. When Peter and John, who came next, running, entered the tomb, they were powerfully impressed by the sight of the grave cloths in which the body of Jesus had been wrapped, and especially by the headbands, lying there rolled up in the shape of the Lord's head, like a chrysalis shell from which the butterfly has emerged. (John 20:1-8)

Appearance of the Risen Lord.

"The New Testament is an effect, the cause of which lies in the fact of the risen Christ. If Jesus Christ had remained buried in the tomb, the story of his life as recorded in the New Testament would have doubtless been buried with him. The death of Christ shattered the faith of the disciples. This is evident from a study of the conduct of the disciples between the death and appearance of Christ. It is a question as to whether we should have heard anything more about them, or any further messages from their lips had not the risen Christ appeared to them and resuscitated their faith." —Dean William Evans. "And behold, Jesus met them.

saying, All hail." No one but a true historian would have related, in those days when women were not held in the honor as they are now in Christian lands, how the Lord showed himself first to a woman. A false historian would have told how the risen Saviour showed himself to the Sanhedrin and Pilate to confound them, or to the chief of the apostles, Peter and James and John.

The Report by the Guard.

Matthew interrupts his narrative at this point to relate the report of Christ's resurrection made to the chief priests by the Roman guard, the dismayed meeting of the Sanhedrin, and their bribing the soldiers to say that while they (the soldiers) slept, the disciples came and stole the body of Jesus, a falsehood repeated by the Jews even to this day. The Sanhedrin agreed to protect the soldiers if Pilate should threaten to punish them, for it was death for a sentinel to sleep on duty; but it is inconceivable in the first place that the soldiers would be asleep, and in the second place that the disciples would have taken such a step. We know that they were honest men. They died for their faith in Christ, based on his resurrection. Men do not die for the sake of a cheat which they themselves have accomplished.

"We are not to think of the Lord's resurrection as a mere appendix to our religion. It is a fundamental part of our Christianity. We are justified in believing in Christ as our Lord only by the completed fact of his resurrection." —Rev. D. W. Frances, D. D.

Go Ye, Therefore.

Because I have authority, therefore I command you to go forth. Because I will empower you, therefore go. Because there is no other way to get the gospel to all the world, therefore go. It is to be noted that the first two letters of Go-spel spell go! The people will not come to Christ? Then it is our business to go to them with Christ. "And make disciples of all the nations." Christ said he was sent only to the lost sheep of the house of Israel; but he sends his disciples to all the lost sheep, of all lands and races. "The method by which Jesus proposes to subdue all things unto himself appears to be utterly inadequate. To teach, to make disciples, and to instruct them further in the faith! Good Master,

are these the weapons of our warfare? Not thus do the princes of this world contemplate conquest, for they rely on monster guns, iron-clads, and engines of death-dealing power. Yet what are these but proofs of their weakness? Had they all power in themselves they would not need such instruments. Only he who has all power can work his bidding by a word and dispense with all force but that of love." —C. H. Spurgeon.

Teaching Them.

"Teaching them to observe all things whatsoever I commanded you." "We men are, at our best, always learning, always revising, correcting, supplementing what we have learned heretofore; never able to express ourselves positively on subjects which deeply interest us, without feeling that we, or others, will trace shortcomings or exaggerations, or elements of paradox or falsehood, in what we say. Our Lord is haunted by no such apprehension as this. He is confident that what he has taught his disciples will hold good for all time; for all races and classes of men; for characters, moods of thought, moral and intellectual atmospheres the most diverse. As he said, 'My words shall not pass away' (Matt. 24:35) so now he fearlessly bids his apostles teach the nations. He reigns, alike in the moral and the intellectual world; and he is certain of the authority of the commission which he gives us to teach." —Dean H. P. Liddon.

I Am With You Always.

"And, lo, I am with you always." Literally all the days, dark days, bright days, busy days, restful days, "all the way my Saviour leads me." And notice the verb "I am." To Christ, the Lord of eternity, all time is one and present. The name of Christ, as of the Father is "I Am." Remember his great saying, "Before Abraham was born, I am." (John 8:58) "So shall we ever be with the Lord." (I Thes. 4:17) "Even unto the end of the world." The margin reads, "The consummation of the age," the close of this world-age. The coming of the Holy Spirit, and his constant abiding with Christians, is the fulfillment of this great promise. "This last and wonderful world in Matthew is a worthy close for any book, for any career, even for the life of Jesus the Son of God." —Prof. A. T. Robertson.

Tri-State Fair Will Be Staged All Dressed Up

Amarillo.—The Amarillo Tri-State Exposition will be held this year September 22 to 27 inclusive in "dressed up" surroundings. Between thirty and thirty-five thousand dollars will be spent improving and beautifying the home of the Tri-State fair before the exposition opens in September. The work is under way. Construction of an automobile building, the first permanent structure to be erected—will be the biggest item of cost but will be smaller than other projects in adding to the appearance of the grounds. Cattle and hog barns are being enlarged and improved at a cost of \$3500. Of no little interest is the new Potter county zoo just

left of the main entrance. Although the zoo is small in comparison with others, it is a new attraction and contains 40 or 50 animals.

This number will be greatly increased by fair time. The county has spent \$4500 on improvements of the zoo.

Those Pretty New Dresses

Have just arrived and "Pretty" is the word. They're good, too. Why not be the best dressed girl in the group? No matter what the occasion, there's a dress here to suit it and to fit you.
