Usually we try to steer clear of editorializing in this column, but this week we ran across a subject that right now is of utmost importance to the people of this area.

Labor Unions!  
 Life magazine, although strongly Republican in its administration printed an editorial recently with which we strongly agree.

With the question of farm labor still a point to be settled, we'll agree wholeheartedly with Life when they say--"something urgently needs to be said about the labor mess in our country."

We'll go back and substitute the word "done" in place of "said" in the above sentence. Labor racketeering has become a cancer on the face of our country.

The shameful thing about the situation has become that our congressmen and other representatives in Washington are fearful to pass any legislation on this subject because they are afraid of biting the hand that feeds them.

This is sad because it looks as if only the labor party, and we do have three parties in our nation, is the only party interested in backing a candidate for public office with their pocketbooks and wholehearted support.

Life calls our lawwriters "chicken."

They go on to say "We've got some news for the chicken Congressmen. The ordinary people of this country--including the rank and file members of the unions--are fed up to the teeth with the arrogance, violence, lawlessness, bribery and stealing of corrupt union bosses. They believe in unions. They are aware of the great contribution union power has made to our high-wage, mass-consumption economy. But they are likewise angry at the misuse of unions by malefactors of great power who today stand in the role once played by male factors of great wealth..."

"The American people want this mess cleaned up...and pronto."

We'd like to add a loud AMEN!

Is the workingman of today going to go ahead and let such men as Walter Reuther and Jimmy Hoffa call the shot for him?

Legislation protecting this workingman and his right to speak up is what we need.

You'll have to go a long way to prove to this scribe that the average worker wants it this way.

He, like all the rest of us, wants the right to speak out and voice his opinion.

Labor monopolies, like the industrial monopolies of yesteryears should have controls.

But--when are we going to demand that the Congressmen stop sidestepping this issue?

The final answer is up to (Continued on Page 8)

**JUST IN TIME**--Betty Drake, 15-year old Friona student, seems to have made the bus just in time. Betty is pictured with Mrs. Bill Woodley, Kay Coffey and Mary Ann Bogness shortly before the Friona Rainbow Girls left for San Antonio.

## Jack Briscoe Brings First Wheat Here

Jack Briscoe who farms southeast of Friona brought the first load of wheat for the 1959 season to the Friona Wheat Growers Inc. elevator Friday morning at 10:30 a.m.

The wheat, weighed out at 58 pounds per bushel, tested 14.8 per cent moisture.

The wheat variety was Early Wichata and is cutting about 16 bushels per acre.

The wheat was irrigated, hauled out and was estimated to be a field that would've yielded 50 to 60 bushels prior to the hail last week.

The wheat was on summer tilled ground from a plot of 60 acres.

Friona Wheat Growers paid the load which was about 130 Briscoe a premium of \$25 for bushels.

## \$700 Damage In Local Wreck

Approximately \$700 damage was sustained to two vehicles Thursday at 6:15 p.m. at the corner of Main and Eighth, according to the investigating officer Ben Moorman.

He turned into the path of a 1956 Ford driven by Daniel Louis Koelzer who was driving south on Main.

There were no injuries involved but both drivers were shaken up as a result of the collision.

Jessie J. Sinclair, driver of a 1950 Ford, was traveling north on Main and attempted to make a left turn onto Eighth.

# City Council Says No Zone Change

## Cemetery Fund Drive Slated to Begin

**BY DAVE McREYNOLDS**  
 By unanimous decision members of the city council voted not to change the zoning designation of Lots 4, 5 and 6, block 30 and lots 8 and 9 block 29 of the original township from a "B" Zone back to an "F" Zone.

The change from an "F" Zone to the "B" Zone was given this particular area only last year and recently the city received a petition to change it back to the original designation.

The changes had been okayed by the city's planning and zoning commission and passed on to the city council.

Monday night residents of the area involved met at the city hall at the public hearing concerning the proposed rezoning and asked the city not to change the property's status.

Nelson Welch and Tommy Jones, speaking for the property owners represented told the council that they had gotten a petition last year signed by people who either owned prop-

erty or lived in that vicinity asking to change the designation which would prohibit multi-housing facilities to be erected in that area.

"We still feel that way about it," the men said. After discussion of the proposed change the council voted to leave the area designated as a "B" Zone.

In other business 30 interested persons met with the council concerning the Friona Cemetery.

After discussion the two groups found that there has been many misunderstandings about the cemetery's present set up.

(ED. NOTE: Several years ago the Cemetery was under the direction of a Cemetery Association who handled all the business of the plot. Following a meeting held in the high school the association voted to turn over the running of the cemetery to the City of Friona. Since that time the city has handled the matter.)

City fathers told the people Monday night that to their knowledge and according to the minutes of the council that they had not been responsible for the upkeep of the old section of the cemetery.

This statement came as a surprise to the group who told the council that it was the opinion of the people that the city was responsible for the whole area.

After more talk the city and the group decided that if initial funds (which was supposed to have been turned over to the city when they first took over the cemetery) was gotten together then the city could make a go of the program.

"As it stands now the city has been out the cost of one well plus many other incidentals and have gone in the red on the upkeep of the cemetery every year to the tune of about \$3,000," Mayor R. L. Fleming told the group.

The group decided to try and raise \$4,000 for the purchase of a pump and other necessities at the cemetery. Then, with this initial fund the city could make the cemetery a success and keep it in shape.

In addition the persons told the city they would contact people who have members of their families buried there and see if they would be willing to give a small donation each year. This idea was discussed and when the meeting adjourned the persons had agreed to form an association again to handle the drive.

This group will meet at the Golden Spread Restaurant Friday morning at 6 a.m. for a kickoff breakfast. All persons interested in helping with this project are urged to attend.

Loyde Brewer, commander of the American Legion Post here told that a total of \$850 has been collected already. This came from the Lions, Progressive Study Club and Modern Study Club.

Mrs. A. H. Boatman said (Continued on Page 8)

**AND THE SKEETERS CAME TUMBLING DOWN**--After postponing the spraying of the city Friday morning due to high winds Bengier Air Park gave the area a through going-over Saturday morning when conditions were ideal. Above the spray plane is shown as it came down Main Street and crossed the highway pouring out its load of BHC and DDT.

## Rainbows Travel To Assembly

Six sponsors and 18 Rainbow Girls left Saturday for San Antonio to attend the Grand Assembly of the Order of the Rainbow for Girls.

The Grand Assembly will convene on Monday and will last through Wednesday. While there, Jimette McLean will participate in the Grand Choir and the Rainbow Girls will attend five sessions.

On Thursday, the girls will go to the Bandera Mayan Dude Ranch.

Friday, the girls will go on a sightseeing tour of Austin. They will begin the return trip to Friona Friday night and arrive sometime early Saturday morning.

The group will be staying at the Menger Hotel during their three days in San Antonio.

Sponsors for the girls are Mrs. Bill Woodley, mother advisor, Bill Woodley, driver, Mrs. U. S. Akens, Mrs. James Collier, Mrs. Irby Carlisle and Mrs. Ralph Roden.

## Troop 226 Slates Awards

Girl Scout Troop 226 will hold their annual Court of Awards Thursday at 4 p.m. in Fellowship Hall of the Methodist Church.

All parents are invited to attend, according to Mrs. W. M. Massie, troop leader.

Co-leader for the troop is Mrs. Estes Bass and assisting this summer is Jim-ett McLean.

The Girl Scouts are participating in a six weeks summer program which began the first week in June. The program will end the third week in July with a 3-day trip to Roaring Springs south of Matador.

**TEDDY COMES HOME**--Teddy Renner of the Hub baseball team crosses homeplate after hitting the first of two home runs credited to him during Monday night's slug fest between Hub and Brookfield. The game ended in a 22 to 22 tie but will have to be replayed due to a protest which was upheld by league officials. The catcher is Robert Stewart of Brookfield.

## Hub, Brookfield Battle To A Tie

In a home run, hit and error affair, Hub and Brookfield battled to a 22 to 22 tie Monday night at Little League ball park. The game was protested in the third inning by the manager of the Brookfield nine and will have to be replayed at a date to be announced.

The protest came over a ruling that no pitcher will wear white sleeves below the elbow. Hub pitcher Jackie Clark had white sleeves and the protest was upheld by the league officials.

During the course of the game six home runs were hit by members of both teams. Teddy Renner hit two with two men on and the bases loaded. Doyle Mabry hit two with one man on and two men on base. Both of these players are on the Hub team.

For Brookfield, Jackie Stowers hit a homer with two men on base and Delbert Davis connected for a homer with no men on.

Errors were made on both sides in the slug fest and hits

were made at random. However, as the protest was up-

**Tuesday Night Results**

Ethridge-Spring	28
Co-op	3

held, the game will not be listed as an official contest and will have to be replayed.

In other league action for the week Hub bested the Plains-Hurst nine by a score of 14 to 6. Winning pitcher for this game was Teddy Renner and losing pitcher was Bobby Sims. Two home runs were made, one by Danny Nettles, both of the Hub nine.

(Continued on Page 5)

## Friona Lions Give \$500 To Cemetery

Members of the Friona Lions Club voted to give a check for \$500 to the Cemetery Well fund of Friona at their regular meeting Thursday night.

The check will go toward the purchase of a submersible pump and other equipment which is designed to aid the beautification of the cemetery.

James Mabry, Farmer County Soil Conservation Farmer of the Year was awarded an engraved plaque by Bill Nichols, secretary-treasurer of the

club.

Mabry was named the outstanding Soil Conservation Farmer for this region at a banquet held in Wellington last month.

In other business the Lions voted to hold off an announcement concerning their Ladies Night and officer installation program which was originally slated for their next meeting.

Boss Lion Dean Awtrely told members that so far they had run into difficulty in securing someone to serve the

## L. Goodwine Dies In New York

Lucy V. Goodwine, pioneer Friona resident and teacher, died at 6:20 p.m. Sunday in New York City, where she had lived about 35 years. Miss Goodwine moved to Friona from Indiana with her parents, the late Mr. and Mrs. W. E. Goodwine, in 1908.

After attending school here, she taught in Deaf Smith and Farmer County schools several years before moving to New York City where she was a member of the teaching staff of Hunter College. During her years as a teacher in the college she took an active part in improving educational facilities for women.

Hunter Collette is a part of Columbia University where Miss Goodwine continued her studies. Prior to her recent illness she had made preparations for conducting summer courses at Hunter. For the past several months she had been under the care of a physician.

Final rites for Miss Goodwine were conducted in New York City Monday. Following cremation, the remains will be brought to Claborn Funeral Home from which an announcement of memorial services will be announced later.

Survivors other than Lola Goodwine and Clyde Goodwine, who are in New York City, are Glee White of Friona, Nelda Bragg of Brownfield, Floy Enochs of Deer Park, Margaret Price of Yuma, Ariz., and LeLand Goodwine of Bellflower, Calif.

## TRIGG ATTENDS BROTHER'S FUNERAL

Gibbie Trigg returned to Friona Sunday morning from Oklahoma City, where he had attended the funeral of his brother, Zac, who died Thursday in a Shattuck hospital.

Trigg was accompanied from Amarillo by another brother, Haskell.

club and a place to hold the meeting.

If any plans are made for the occasion prior to June 25 it will be announced and members notified, Awtrely says.

Don Lewis, son of Mr. and Mrs. Henry Lewis of Friona and a recent graduate of Midwestern University, entertained members with several musical selections. He was accompanied by Mrs. Eva Miller.

Members of the Can-Can chorus and the Cowboys were guests of the club.

## Rhea FB Hears Plans For Research

Water research, recharge and future plans of the High Plains Underground Water District were outlined by Bill Broadhurst of the Water District, at the Friday night meeting of the Rhea Farm Bureau.

Meeting the Rhea Parish Hall, Broadhurst told members that "we have plenty of water now, but the future generations are looking to us to save some for them."

Recalling a short history of the water district, its formation and goals, Broadhurst told of several studies being made by the district promoting the preservation of water on the High Plains.

He told of a new chemical, just out by Dow Chemical Co., which has been designed to filter out quickly the silt in our lakes and perhaps making it possible to use this water for recharge purposes.

"We have just begun to work with this chemical," he told the group, "but we have high hopes that perhaps this will be the answer to much of silting problem in recharge wells."

Another item which interested those present was the idea of tax depletion for irrigation wells.

"We have petitioned Washington for three years on this question," Broadhurst said. "We hope to have an answer to this problem this month."

Following the meeting refreshments were served.

Walter Schueler presided in the absence of Jack Patterson, president of the group.

The next meeting of the group will be for the annual Chicken Supper on July 4.

## WHEAT GROWERS--

## Wilson, Anthony Re-elected Tuesday

Ralph Wilson and A. W. Anthony were re-elected to the board of directors of the Friona Wheat Growers at their annual barbecue and meeting held Tuesday evening in the Friona cafeteria and auditorium.

There were 910 people in attendance and considering that many farmers remained in the fields and the competition from other meetings, baseball games and weddings, it was a good crowd, said Arthur Drake, manager.

Joe Jones, county agricultural extension agent, talked on his recent tour of Italy. He was in Italy as a representative of Grain Sorghums Producers Association trying to encourage more use of sorghums in that

country. Frank Pharris, assistant manager of Producers Grain Corporation of Amarillo, discussed the Producers Export Company.

Other out of town guests included Jim Russell, manager of the Bovina Wheat Growers, C. O. Roach, manager of the Hereford Grain Corporation, Oscar Applequist, publisher of Producers News of Amarillo, Wes Anthony of Dimmitt and Printice Mills, ASC office manager of Farwell.

Music was furnished for the evening by Charlie Phillips and his Sugar Time Band from Clovis.

Ten \$5 door prizes were given away at the close of the meeting.

### How Interested Are You In Our Cemetery?

Monday night a series of misunderstandings were aired and both groups got an insight on the ideas and outlook of the other. We are referring to the meeting of the city council of Friona and the group of folks interested in the Cemetery.

What brought about this meeting is an old problem on the Plains---water.

Water is the one thing essential to the growth of just about anything you can name and grass, trees and shrubs at the cemetery is no exception.

Since last year the cemetery has been dry, and despite talk and plans no concerted effort has been made to remedy this situation.

The attitude of the city has been to keep the cemetery as well as possible with what they had to do with.

They have been carrying water for the trees on the old city truck, but now that has broken down and they have been told to get a MVI sticker will cost about \$250 to put it in shape.

As the entire truck isn't worth half that much this hasn't been done, so . . .

But Monday night something got started, and with the help of all of us perhaps something can be done besides coffee talk.

First of all the cemetery needs a well.

The city has agreed to maintain the cemetery---ALL of the cemetery, keep records and everything else that goes into a smooth operation if the Cemetery Association will do their part.

Seems that when the city was handed the cemetery it was with the understanding that certain lots would be sold by the association and this money (some \$3,000) would be given to the city for use as initial operating expense.

And, until today this same missing amount is the money which would enable the city to operate the cemetery in the black.

Since getting the cemetery (incidentally according to the records of the city they only got control of the "new" part of the cemetery, the "old" part was still under the sayso of who knows?)

The above was another misunderstanding brought out at the meeting.

Anyhow the city has paid for a well,

which doesn't pump, as it was supposed to have been an 8-inch well but only would produce about a 4-inch pipe of water without sanding down.

The arrangement was between Carl Maurer and the city for the water.

Mr. Maurer would furnish the pump and motor and use the pump to water his wheatland and the city would furnish a hole.

This arrangement ended last year when the endless stream of sand wore out the bowls on the pump.

At this time the city fathers figured this was a good time to end this arrangement since neither party was too well satisfied.

So, following the pump pulling the cemetery has been dryland.

Last year the city spent around \$3,500 maintaining the cemetery while only receiving about \$1,800 in return from plots sold on the site.

As you can see this operation just didn't pay off. On top of this the city spent quite a chunk of money putting mowers together keeping the grass cut.

If you can imagine cutting 15 acres of grass with your power mower at home you get the general idea of wear and tear on the mowers.

At one time last year the council investigated the idea of purchasing a heavy-duty mowing machine, self-propelled, with the point in mind of mowing both the cemetery and city park.

But the price of such a machine (about \$1,200) quickly sent this idea skidding.

But if all of us would help, get to work and raise about \$4,000 to equip the cemetery with a motor, pump, some new water pipes and other equipment then the city says they can operate it without too much loss each year and keep it looking nice.

Then, if the Association will send out statements or letters asking those people who have loved ones in the cemetery to give \$10 to \$12 a year everything will work out and we can have a cemetery we can be proud of.

But---it is like everything else---it isn't worth having if we aren't ready to put out for it.

### in and around FRIONA

WITH JUNE

Combines are seen in a few fields around over the country. Some barley and wheat fields are ready to harvest, but it will probably be ten days or two weeks before cutting of these two crops begins on a large scale.

From conversations we have heard recently it seems that the grasshopper threat has been controlled. Some farmers are spraying for thrip and other insects. The strangest looking implement we have seen in a long time was running in Albert Rolan's field at noon Monday.

We were not close enough to it to determine exactly what it was but it appeared to be a cross between an airplane and a tractor. Possibly the wings were tanks of some sort and it wasn't really flying, but it surely was moving across the field at a rapid clip.

Anyone who hasn't seen the operation at the caliche and gravel pit in the Rhea community should drive out and take a look at it. Up until now we've seen absolutely no publicity on the production of road building materials in Parmer County.

There's a lot of equipment out there and from our observation point it looked like quite an operation. Think the land belongs to Mrs. Floyd Schlenker. Maybe in the future we will see signs that read, "This roadbed was built of Parmer County materials."

Our apologies this week go to Mr. T. J. Crawford, long-time resident of Friona. In writing a story about his grandson, Charles E. Watson of Tucumcari, we inadvertently left out two sentences which

should have been in the story. Charles, son of the former Dorothy Crawford, was an honor student and graduated with honors. Our story didn't mention this fact and we're sorry.

Although Mr. Crawford has been ill recently, he is able to be up and around town and was able to attend the graduation exercises at New Mexico State University at Las Cruces the last of May.

The gas lights seen at different places around seem a little bit old-fashioned. We like them, but it seems that there should be some way of turning them off. Perhaps the amount of gas they burn is so small that the cost of burning them constantly doesn't add up very fast, but those of us who are in the habit of turning off electric lights have an urge to switch these off, too.

Gary Mingus, young son of Mr. and Mrs. Lloyd Mingus, is greatly disturbed over the loss of his John Deere tractor. It is one of the large sized toy tractors and was taken from the Mingus yard Tuesday evening.

His parents are interested in getting the tractor back and will appreciate it very much if the person who removed it from the yard will return it.

If you've seen what appears to be "Unca' Donald, Huey, Louie and Dewey," running around town in a red low slung car, don't get the impression that these famous ducks have moved to Friona.

Steve Messenger is getting to be quite a "horse swapper" when it comes to cars and is currently driving a little red job. The three Messenger boys wear red caps and share their dad's enthusiasm for odd cars.

The effectiveness of Star classifieds was proved two times last week. We doubt that any paper gets better results from ads that do not run than we do.

Early in the week Mrs. George Jones called to tell us she had found some glasses which apparently belonged to a child. We typed the ad but before it got in the paper learned that the glasses had been lost by Shirley Johnson, daughter of the Truett Johnsons.

Then later D. D. Myrick of Hart, who owns a farm south-east of town came in to place an ad that he had a stray cow at his farm. About two hours Layon Renner called to have the ad cancelled. One of John's cows had taken up board with the neighbor.

Our stock of manila envelopes is again complete, so anyone who has asked for any size envelope can come back now and get the desired size.

Every driver must remember to be extra cautious during the next few months as there will be more children on the streets and at times they forget to look before crossing streets.

The Floyds have another dog. It seems just about impossible for us to keep one, but we keep acquiring first one than another. The new addition to our pets is a Boston Bull named "Tammy." She formerly belonged to the Gramams and we're hoping no disaster befalls her.

DeWitt Holden and son Jimmy Don of Richmond, Va., and Harvey Holden of Granite, Okla. were weekend visitors in the home of Mr. and Mrs. J. H. Boyle. Holden, a brother-in-law of Boyle, had never visited this section of the country before and was very favorably impressed, says Boyle.

# Money Bills Bring Solon Disagreement

BY VERN SANFORD

AUSTIN, Tex.—When tax bills finally were passed by both the Texas House and the Senate, it was not dollars, but ideas that delayed agreement.

House bill was designed to raise about \$150,000,000 over the next two years; Senate bill, about \$160,000,000. Big difference was in where the money would come from. House bill was divided evenly between selective sales taxes and taxes on natural resources and corporation franchises.

Senate, which heard a long string of witnesses on the dangers of shutting prosperity-making industries out of Texas, changed the ratio. In its version, natural gas and corporations pay about 18 per cent of the tax; selective sales taxes, 8 1/2 per cent.

Senate voted a 15-15 tie on its bill, with Lt. Gov. Ben Ramsey breaking the tie in favor of the bill.

Named to a free conference committee to adjust differences were Sens. R. A. Weinert, Seguin; Dorsey Hardeman, San Angelo; Charles F. Herring, Austin; Jimmy Phillips, Angleton; Bruce Reagan, Corpus Christi. Also Reps. V. L. Ramsey, Beckville; W. T. Oliver, Port Neches; Don Kennard, Fort Worth; Alonzo Jamison, Denton; George Cook, Odessa.

HOW THEY STACK These items were hit, in varying degrees, by the House and Senate bills that went to conference committee:

CORPORATIONS--Senate, raise \$10,800,000 by hiking franchise tax from \$2.25 to \$2.75 per \$1,000 capitalization. House, raise \$12,000,000 by a new two-factor tax on interstate corporations.

NATURAL GAS--Senate, raise \$8,000,000 by increasing the production tax from 7 to 8 per cent. House, raise \$36,000,000 by lowering production tax to 5 per cent and adding a 5 per cent severance beneficiary tax.

MOTOR VEHICLE SALES--Both houses agreed on increasing sales tax from 1.1 to 1.5 per cent to bring in an additional \$7,000,000 to \$8,000,000.

CIGARETTES--Senate, raise \$31,500,000 by boosting tax 3 cents a pack. House, raise \$10,500,000 (estimated) by a 1 cent a pack increase.

UTILITIES--Senate, increase

the tax on water, gas and electric utilities by 20 per cent, for an estimated \$2,600,000. House, increase all other utilities to the telephone company rate of 2.3 per cent for an estimated \$8,000,000.

ALCOHOLIC BEVERAGES--Senate, increase liquor tax from \$1.40 to \$1.65 a gallon, to raise \$2,000,000. House, increase it to \$2.25 a gallon for \$7,000,000.

Wine, Senate increased tax by 20 per cent, for \$201,000. House doubled it for \$1,000,000.

Senate also tripled fees for selling beer and wine, doubled permits for liquor selling, for an estimated \$1,600,000. House bill does not include this.

TOBACCO PRODUCTS--Senate, would tax all such products, except snuff, by 12.5 per cent, to raise \$5,400,000. House tax is twice this.

SULPHUR--Senate voted to retain present rate. House would reduce from \$1.40 to \$1.03 per ton. There is disagreement as to whether production increase would offset the tax increase in total revenue received.

THEATER ADMISSIONS--Both Senate and House lopped this by about \$120,000 a year.

SOUND EQUIPMENT--Senate added a 2.2 per cent sales tax on radios, televisions, hi-fi and stereophonic sets for an estimated \$3,200,000.

BOATS--Senate added 1.5 per cent sales tax on boats and motors for an estimated \$5,000,000.

PROPERTY BILL NIXED

For the second time this year, the House of Representatives has refused to sweep unclaimed property into the State Treasury.

The vote of 66-66 killed efforts in the Special Session. Vote that killed the bill earlier in the regular session was almost as close.

Gov. Price Daniel had urged the measure as a means of raising an estimated \$25,000,000 the bill would have produced.

Bank lobbyists were blamed for defeat of the bill. He said they must accept responsibility for the state's having to raise, through new taxes, the \$25,000,000 the bill would have produced.

Bankers have contended the escheat procedure would undermine depositors' confidence in the safety of their deposits. LICENSE PLAN STUDIED Economy forces are taking a good look at whether or not the state's licensing practices might be unnecessarily expensive.

Historically the state has issued licenses annually. There's now some thinking that a lot of the licenses could just as easily be issued permanently, subject to cancellation for cause. Fees would still be collected annually, but a lot of time and money possibly could be saved by not having to type out and mail a new document each year.

Such a procedure was authorized by the Legislature in regular session for insurance companies.

**Gibson Makes Expert Marksman**

Army PFC Thomas G. Gibson, son of Mr. and Mrs. Thomas W. Gibson of Friona, recently qualified as an expert in firing the M-1 rifle while assigned to the 24th Infantry Division in Germany.  
 Gibson, a rifleman in Company B of the division's 21st

Infantry, entered the Army in February 1957 and arrived in Europe in December of the same year.  
 Prior to enlistment in the army, Gibson was a student at Friona High School.

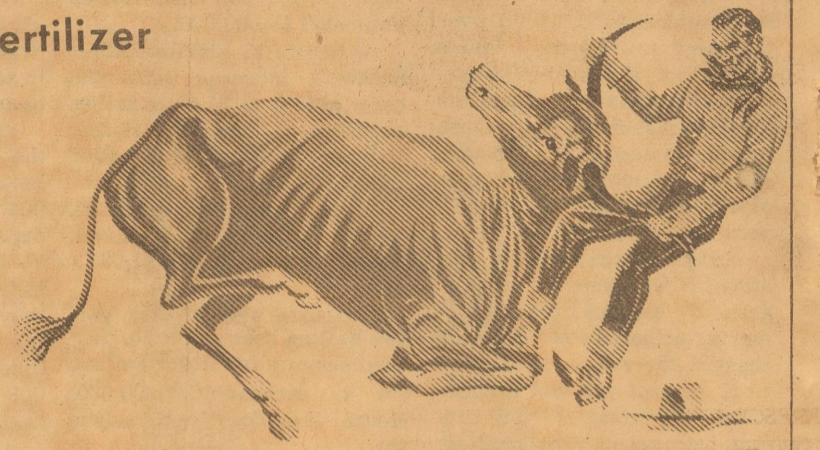

**Leonard Burnett Joins Air Force**

Leonard Burnett, 19, son of Mr. and Mrs. Don Burnett of Route 3, Friona, enlisted in the U. S. Air Force last week. Burnett has lived in the vicinity of Friona all his life and attended Friona schools.  
 His air force life begins at

Lackland AFB at San Antonio where in basic training he will learn military customs and courtesy, drill, study the mission of the air force and other related subjects.  
 For initial enlistment Burnett chose the administrative career area. During the first few weeks of his basic training he will be interviewed by a classification specialist and will choose a specific technical training school.  
 After basic training he will be assigned to a technical school or on the job training at an air force base.

Petersburg, Texas, Man Reports—  
**1500-pound Increase on Grain Sorghum**

Frank Stanton, successful young Hale County farmer, says: "By chiseling in 85 to 100 pounds of Phillips 66 Ammonia as a side dressing, I increased my maize yield 1500 pounds per acre. This represents a \$4 profit on every \$1 invested in ammonia."  
 "This proved to me that using Phillips 66 Ammonia is profitable. I am using it on both my cotton and grain sorghum land this year. There are not many investments I know that will return 4-for-1."  
 Other successful Southwestern farmers have discovered that they make more profit per

acre, using Phillips 66 Ammonia. They get more cotton that classes higher at the gin... yields of sorghum grain or ensilage are increased... profits on wheat and small grains are increased through higher grain yields and improved forage... more marketable vegetables are harvested.  
 Phillips 66 Ammonia can be easily applied as a side dressing either by you or your distributor. See us today for your supply of Phillips 66 Agricultural Ammonia... it gives you more nitrogen per dollar than any other form of fertilizer—a full 82%.

**Phillips 66** Order Your Supply of Phillips 66 Agricultural Ammonia Today!

PRESCRIPTIONS WITH A SMILE—Adelle Smith, 17-year old Friona High School senior is spending her summer to good advantage. She is working in the prescription department of the Parmer County Community Hospital.

## Not All Teenagers Are Delinquent

BY DON WATKINS

(Ed. Note: This is the second in a series of articles designed to show the good qualities of our local youth. It is an answer to all the reports, past and present, saying that juvenile delinquency is rampant and prevalent among the majority of our young people.)

Inasmuch as critics of our young people do not stop to consider whether it is a boy or girl they are criticizing, the female gentry among the teenage set also fall prey to the unfairness this adverse publicity is creating.

One or two young girls may get disgusted, emotionally upset, to the point of a nervous breakdown, and fairly scream for something, they know not what themselves, until finally they run away to search for this intangible lack in their lives. And this intangible lack could easily be love, affection, understanding and even a little companionship on the part of the elders with whom they are associated.

But the critics of the young folk do not take time to consider the causes. They can only see what is in front of them. Two girls caught running away from home or stealing some little something in a store are automatically classified as juvenile delinquents, as are all young people. What one does, so do they all, or so the critics would have us believe.

But we in Friona cannot hold to that line of reasoning. We have too many young people who prove beyond any reasonable doubt that the harsh critics of the young are wrong or at least that adults do not take the time to know them.

Adelle Smith, 17 year old daughter of Mr. and Mrs. Hoyt Smith of Friona, can easily prove the point we are making in this series.

Adelle will be a senior in Friona High School this fall. She started school in Friona. During her years in the grades she took part in many activities, had the highest scholastic average in the seventh grade and

## Mrs. O'Connor Local Couple Buried At Clayton Injured In Wreck

Funeral services for Mrs. Phebe O'Connor, 81, were conducted at 1:30 p.m. Friday in the Winchester Funeral Home at Clayton with Rev. Bob Ware Baptist minister, officiating.

Mrs. O'Connor died Wednesday in the Underwood Hospital at Amarillo. She was born March 10, 1878, in Kentucky and was a member of the Baptist Church.

She is survived by a daughter, Mrs. Emily Forbes of Amarillo; two sons, Harold R. Ellis of Phoenix, Ariz. and D. A. O'Connor of Friona; a brother, R. R. Froman of Louisville, Ky.; two grandchildren and two great-grandchildren.

For the past several months Mrs. O'Connor had made her home with her son here.

Mr. and Mrs. Jackie Allan Dickerson of Friona were injured early Saturday morning when the pick up in which they were riding overturned on Harrison highway four miles east of the New Mexico state line.

The couple was taken to the Parmer County Community Hospital by passing motorists for treatment of lacerations and bruises. They remained in the hospital for two days and were released.

According to the investigating highway patrolmen, the 1955 1/2 ton Chevrolet pick up blew a tire and turned over at least two times. The pick up was a total loss and estimated damage was placed at \$400 to \$500 according to the officers.

delinquency, Adelle had this to say. "I believe that all young people are a good group. More people should work with them and try to understand them more. If they would do this, I believe it would prevent a lot of the juvenile delinquency that we do have."

Adelle is a good example of the initiative, ability and perseverance displayed by our local teenagers.

We feel that the critics should look more for the good qualities in our young people. We believe they should show more patience and understanding of their problems and remember that they too are a magnificent part of the human race.

Add to this her part time job at the Parmer County Community Hospital and it all amounts to a very complete and time consuming schedule. She has worked on Saturdays at the hospital since September, 1958 and is now employed for the summer. Her duties at the hospital are typing labels for prescriptions, stocking the shelves and she is the receptionist from 5 to 6 p.m.

H. E. Barnett, manager of the hospital, says of Adelle, "She is a fine and willing worker and has a wonderful personality."

When asked about juvenile

### HUB, BROOKFIELD

In the Pee Wee game of the week, Rockwell outscored Co-Op by a score of 15 to 11. Winning pitcher was Bobby Gutierrez and losing pitcher was Eddie Wood. Home runs were credited to Call and Davis of Rockwell and to Steve Buckley for Co-Op.

Thursday evening the Black team played Brookfield. Black came out on top by a score of 11 to nine according to the official scorebook. The winning pitcher for this contest was Ray Braxton and losing pitcher was Jackie Stowers. The only home run credited to this game was made by Larry Buckley of Black.

### Ginsburgs Attend State CPA Meet

Mr. and Mrs. Robert N. Ginsburg are attending a tax convention at Dallas and will go from there to San Antonio for the State CPA meeting to be held later this week. They plan to return about the middle of next week.

Mrs. R. W. Ginsburg of Columbia, Mo. mother of Robert N. Ginsburg arrived in Friona Friday for a weekend visit. She was joined here by Mr. and Mrs. Jonathan Clark

Providing residences for business women in large cities across the country is one of many Salvation Army Community services.

of Amarillo. Mrs. Clark is Mrs. Ginsburg's daughter.

Late Sunday the Clarks and Mrs. Ginsburg returned to Amarillo accompanied by Robert Howard and Kathy Ginsburg, who will stay in the Clark home until their parents return.

## PRIDE

(Johah 4:1-11) Jonah had been the recipient of great grace when he was in need in the fish's belly, yet he was angry when God was gracious to Nineveh. "And the Lord God prepared a gourd," using a homely object to teach a great lesson. "Should not I spare Nineveh?" God asked his servant. God's anger with sin is born of His love for the sinner. His attitude today is the same as it was toward Jonah. Jesus had pity on Jerusalem and wept over it. He weeps over your city and my city today. But he must have messengers. How far have we obeyed? Be faithful to God and remember to attend church this Sunday.

M. ALVIN ASKINS

# Evelyn Ray Becomes Bride Of Glen McDowell Saturday

MRS. GLEN McDOWELL

The First Baptist Church of Friona was the scene of the wedding of Miss Evelyn Ray, daughter of Mr. and Mrs. John L. Ray of Route 2, Friona, and Glen McDowell, son of Mr. and Mrs. J. S. McDowell of Fort Worth, at 8 p.m. Saturday. Rev. L. R. Cobbs, director of the Baptist Student Union at Texas Technological College in Lubbock, read the double ring ceremony before an altar centered with a white wrought iron pre-dieu covered with a crushed velvet throw. On either side stood white colonades holding urns containing arrangements of white gladioli and white chrysanthemums. Pyramids of seven branched candelabra holding white tapers interspersed with large palms of woodwardia and emerald completed the altar decoration. The bridal aisle was marked with a white aisle cloth

and crystal hurricane gleam lights were caught at the base with white satin bows and clusters of greenery.

Mrs. C. M. Porter of Denton, organist, presented traditional wedding selections. Don E. Lewis of Friona sang "I Love Thee", "Why Do I Love You" and "The Lord's Prayer."

Miss Patty Burke of Sundown was the maid of honor. Bridesmaids were Miss Denise Magness of Friona, Miss Helen Pittman of Garland, cousin of the bride, and Miss Ruth Radack of Houston.

Bridal attendants wore identical gowns of ice blue chiffon over taffeta fashioned with low necklines accented by folds of chiffon. The princess fitted bodices flowed to bouffant waltz length skirts. Their headdresses were of pressed posies veiled in ice blue.

Miss Burke carried a colonial bouquet of white carnations centered with white French tulle and streamers of white picot ribbon.

Candles were lighted by Charles Ray of Friona, brother of the bride, and Gary Barnard of Fort Worth, cousin of the groom.

Comie Ray of Friona, brother of the bride, served as best man. Groomsman were William Hamilton of Lorenzo, Mack Porter of Denton and George Schorner of Lubbock. Floyd Gammill and Steve Noble of Lubbock and Fred Cross of Snyder were ushers.

Given in marriage by her father, the bride wore a gown of silk bombozine combined with Chantilly lace. The lace empire bodice was accented by a sabrina neckline sprinkled with pearls. Long sleeves tapered to petal points. The princess skirt of silk bombozine flowed to a chapel train and was enhanced at the center back by a bustle bow.

She carried a bouquet of white phalaenopsis orchids entwined with cascades of stephanotis and streamers of imported Swiss braid which rested upon a white Bible.

Mrs. Ray, mother of the bride, wore a sapphire blue lace and crepe dress with blue and white accessories. Her shoulder corsage was of cymbidium orchids.

The groom's mother, Mrs. McDowell, wore a mauve lace dress with matching accessories and a corsage of cymbidium orchids.

Immediately following the wedding a reception was held in the church parlor. The bride's table was covered with a floor length cloth of white net over taffeta. Blue satin bows of ribbon decorated the net.

A centerpiece of blue and white carnations centered the table. Mrs. William Hamilton of Lorenzo and Miss Joy Ann Ashby of Lubbock presided at the table.

Guests were registered by Miss Judy Blankenship of Wilson. Piano selections were presented by Mrs. Floyd Gammill of Lubbock and Miss Judy Ray, cousin of the bride, of Greenville. Other members of the houseparty were Mesdames Joe Douglas, Clyde Weatherly, Ralph Shelton and John Wright all of Friona.

For a wedding trip to Colorado Springs and Denver the bride wore a two piece pink linen suit with matching shoes and bag. A white picture hat and white gloves accented the dress. Her corsage was styled of phalaenopsis orchids.

Mrs. McDowell is a 1955 graduate of Friona High School and a 1959 graduate of Texas Technological College where she received her bachelor of science degree in home economics.

McDowell, a graduate of Birdville High School in Fort Worth and Arlington State College received his bachelor of science degree in industrial engineering from Texas Technological College this spring.

The couple will live in Dallas following a wedding trip. The groom will be employed by Standard Manufacturing Company as an industrial engineer.

Out of town guests attending the wedding were J. W. Shelton, and Mrs. Guy Ray and Judy of Greenville; Mrs. Carl Pittman and Carla of Princeton; Mrs. Lena Lambert and Mrs. Gaylord McMillan and Eliza-

## Of Interest To THE WOMEN

### WSCS Has General Meet

The Woman's Society of Christian Service of the Friona Methodist Church met in Fellowship Hall Tuesday morning for a general meeting.

Mrs. Dick Rockey, the new president of the organization, directed the business session. There was also called meeting of the executive committee prior to the general meeting.

Mrs. Raymond Whatley resigned her office of "Literature and publications" and Mrs. W. M. Stewart was appointed to fill this office for the coming year.

The devotional was given by Mrs. Howard Ford who also had charge of the program. In her discussion she brought in the annual report of each officer.

Hostesses, Mrs. Wayne Stark and Mrs. Roy Slagle, served coffee and cake to one visitor, Mrs. Mildred Hilton of Lockney and the following members: Mesdames Will Osborn, Howard Ford, Jean K. Anthony, W. M. Stewart, Joe Moyer, O. C. Jones, Arthur Drake and Ernest Anthony;

Also Mesdames Jake Lamb, J. H. Boyle, H. C. Kendrick, I. T. Graves, Wayne Stark, Dick Rockey, J. G. McFarland, Roy Slagle, Coy Patton, Andy Hurst Jr., J. L. Shaffer and Kenyth Cass.

Mrs. J. H. Boyle directed the closing prayer.

### Jan Edelman Directs Youth

Jan Edelman, daughter of Mr. and Mrs. W. L. Edelman, has accepted a position as youth recreation director for a group of ten and eleven year old boys at the Wells Park Recreation Center in Albuquerque.

Miss Edelman, a 1958 graduate of Friona High School, attended the University of New Mexico the past school year and plans to enroll as a sophomore this fall.

Mr. and Mrs. H. C. McDowell and Mr. and Mrs. Lenn Barnard, Gary and Bobby of Fort Worth;

Also Mr. and Mrs. Roland Thompson, Mr. and Mrs. Bill Reynolds, Mr. and Mrs. G. D. Horton and Joel Tankersly of Lubbock; and Mr. and Mrs. H. A. Brotherton and L. H. Brotherton of Canyon.

After June 20 Mr. and Mrs. McDowell will be at home at Dallas where he will be employed in the engineering department of the Gem Manufacturing Company.

### Whites Return From Colorado

Mr. and Mrs. E. S. White Sr. and son, Richard, and Mr. and Mrs. Robert Holder and sons of Fort Worth spent several days last week touring places of interest in Colorado. They visited the Seven Falls, the Royal Gorge and several other Rocky Mountain points west of Denver.

Upon their return they reported a wonderful trip with fine weather all the way. Mrs. Holder is the former Mae White.

Other dinner guests in the White home Sunday of last week were Mr. and Mrs. Vernie Roberts and children of Amarillo and Mr. and Mrs. Edward White and son of Friona. Afternoon visitors were Mr. and Mrs. Tommie Hamilton and daughters of Dimmitt.

The Holders visited in Amarillo this weekend in the home of Mrs. Holder's sister, Irene Roberts, and family and also visited another sister, Sue White, who is attending summer school there. They plan to visit another sister, Ann Campbell, and family at Seminole before returning home.

### Families Gather At Palo Duro Park

The families of Mr. and Mrs. W. O. Elliott and Mr. and Mrs. L. C. Tims all of Clarendon met at a picnic spot in Palo Duro Park Sunday for lunch and an afternoon outing. Mr. and Mrs. Tims are former Friona residents.

Others present were W. T., Wanda and Ann Elliott of Clarendon, Glenn Reeves of Clarendon, Mr. and Mrs. Ben Talley and family and Mr. and Mrs. Jack Brogdon and family of Borger, Mr. and Mrs. Bud Williamson, Paula and Brenda, Mr. and Mrs. Clyde Tims and Sally and Mr. and Mrs. Dan Tims, Pam and Jerry all of Friona.

### Jim Rules On Vacation

Mr. and Mrs. Jim Rule and children, Melva, John and Ruede, left Tuesday morning for Albany, Georgia, where they will spend several weeks visiting in the home of Staff Sgt. and Mrs. Bill Young and children. Mrs. Rule and Mrs. Young are sisters.

### Former Residents Visit Relatives

Mr. and Mrs. A. H. Hadley spent several days week before last visiting in the home of Mr. and Mrs. C. B. Hanson and children at Athens, Texas. Mrs. Hanson is a daughter of the couple.

Mrs. Hanson and her children returned to Friona with the Hadleys and spent about a week visiting in the homes of her parents, Mr. and Mrs. Leo Bails, Mr. and Mrs. James Pope, Mr. and Mrs. Alfred Bevers and Mr. and Mrs. Windle Sikes.

Hanson came Saturday and after a weekend visit with relatives and friends the family returned home late Sunday.

Saturday evening the visitors were guests of honor at a backyard supper in the Leo Bails home. Others present were Mr. and Mrs. Donn Tims, Shere, Sheena and Shasta Hadley of Fort Smith, Ark., Mr. and Mrs. A. H. Hadley and the families of James Pope, Alfred Bevers, and Windle Sikes.

## No rest for this Chevy... round the clock the engine never stops!

At Washington's bustling National Airport, Allied Aviation Fueling counts on its radio-equipped Chevy to get crews and tank trucks to the right planes at just the right time. Aside from occasional time out for the usual service, its Thrift-master 6-cylinder engine has been running 24 hours a day for the past 9 months!

Once you've got that kind of endurance working you don't worry much about lost job time. Breakdowns go out of style the day your Chevy goes into action.

The fact is, Chevrolet trucks are dead set on dropping the word "downtime" right out of the English language. And they just might, if precision engineering and top-quality materials have anything to say about it. Chevy trucks are put together to stay together—incorporating the most advanced chassis developments, the most efficient 6-cylinder and V8 engine designs. They're built to last, built to keep Chevrolet's hard-earned reputation for reliability flying high.

Going into the real heart of Chevrolet advantages is where your dealer comes in. He'll show you, in feature after feature, that you can't buy more truck dependability—in any weight class—at any price.

No job's too tough for a Chevrolet truck!

See your local authorized Chevrolet dealer

MISS RAYE JENE JONES

**Raye Jene Jones Plans Fall Wedding**

Mr. and Mrs. W. H. Jones have announced the engagement and approaching marriage of their daughter, Raye Jene, to Jerry London, son of Mr. and Mrs. P. L. London of Lubbock, former Friona residents. A fall wedding at the First Baptist Church is being planned by the couple. London is a 1958 graduate of Friona High School and Miss Jones was a member of the 1959 graduating class.

**Janice Miller On Dean's List**

Janice Miller, daughter of Mr. and Mrs. Roy V. Miller Sr., has been listed on the spring Dean's Honor List at Wayland Baptist College at Plainview. A 1957 graduate of Friona High School and sophomore student at Wayland, Miss Miller finished the spring semester with an average of 2.61. She is a science major and was a member of the Dorm Court at Mays Dormitory this year. She is spending the summer with her parents.

**Littlefield Exes Plan Reunion**

Plans have been completed for the seventh annual Littlefield High School class reunion. All classes from 1946 and 1954 are invited to attend the meeting which will be held in the

Community Center at 8:30 p.m. June 20. This invitation includes husbands and wives of the class members. Registration fee will be \$1 per person. A prize will be given for the class with the largest representation.

**Teachers Host Swimming Party**

Mrs. Marion Fite Jr. and Mrs. Lloyd Rector sponsored a swimming party for the group of intermediates in their Bible school class at the swimming pool at Hereford. Members of the class attending were Tom Gee, Eric Vance Rushing, Larry Hough, Jimmy Stokes, Ronnie Awrey, Kay Johnson, Marcia Lynn Masie, Linda Rector and Linda Beaty. Guests were George Rushing, Sharen Awrey, Bruce and Terry Fite, Ricky and Larry Rector. Adults making the trip were Mr. and Mrs. Marion Fite Jr., Mr. and Mrs. Lloyd Rector, Mr. and Mrs. Deon Awrey and Mrs. Dorothy Hough.

**Club Members Study Flower Arrangements**

A study of flower arrangements was directed by Betty Renner at the Friday afternoon meeting of the Hi-Point Home Demonstration Club in the home of Lilly Mae Baxter. Mrs. Renner led a panel discussion following the demonstration. Others present were Mary Joyce Renner, Cherry Ann Mingus, Gertrude Renner, Mildred Mingus, Erma Lea Tims, and Betty Rector. Refreshments were served by the hostess.

MISS DELORIS FLEMING

**Deloris Fleming Sets Wedding**

Mr. and Mrs. G. W. Fleming have announced the engagement and approaching marriage of their daughter, Deloris, to Raymond Earl Clement, son of Mr. and Mrs. L. B. Clement of

Bowie. Wedding vows will be read at the First Methodist Church in Burkburnett at 4 p.m. August 23. After a wedding trip the couple will be at home at Denton where both will be students at North Texas State College.

**IN THE COURTS**

**CORPORATION COURT**  
The following cases were tried before Judge Thelma Jones in City Court during the week ending June 16:  
Jack R. Auburg, muffler violation  
Clifton L. Coffman, excessive noise, excessive speed and resisting arrest  
Jessie J. Sinclair, failing to turn without safety.

**JP COURT**  
The following cases were tried before Justice of the Peace Thelma Jones during the week ending June 16:  
Lovell Brewer, improper parking  
Darwin G. Bagley, operating unregistered vehicle on public road  
Travis W. Huddleston, operating unregistered trailer on public road.

**Mrs. L. R. White Hosts Class Meet**

The regular business and social meeting of the T. E. L. class of the First Baptist Church was held in the home of Florene White Monday evening. Opal Maynard led the opening prayer. The financial report of projects completed was given by Nellie Ray.

During a brief business session new officers were elected. Refreshments were served by the hostess to Eva Miller, Nell Gogans, Opal Maynard, Nellie Ray, Mary Roberts, Geneva Williams, Gladys Wright, Waneta Taylor, Phyllis Sanders, and Wilma Carroll.

Mrs. A. C. Winchester of Houston is visiting in the home of Mr. and Mrs. Earl Drake and sons, Owen, Larry and Bobby this week. Mrs. Winchester is Mrs. Drake's mother.

**SALUTE to the QUEEN of the PASTURE**

**JUNE IS NATIONAL DAIRY MONTH**

**Did You Know That Just 3 Glasses Of Milk A Day Help You Live Better 5 Ways?**

1. Protects You With "Armored Calories." There is a difference in calories. "Naked" Calories . . . found in sweet starchy foods . . . supply only body fuel. With "Armored" Calories you get proteins, vitamins and calcium in addition to body fuel or energy. Milk contains more highly "armored" calories than any other food . . . makes you feel better, more energetic.
2. Prevents Loss of Pep When Dieting. Milk is your best source of digestible, low-cost protein, vitamins and calcium which you need for vitality and a sense of well being. Milk builds strength, not fat. High protein reducing diets built around milk are comfortable and safe . . . help you live better, feel better.
3. Keeps You Feeling Young. Calcium starvation makes you feel old before your time. Most Americans suffer from this dietary lack. Without calcium you tend to become nervous and irritable, to have poor teeth and bones. Milk is the only practical source of calcium. Drink at least three glasses every day to get the calcium you need to keep feeling young, vital and strong.
4. Eases Nervous Tension. Tests on nervous children and adults prove that drinking three glasses of milk every day helps reduce fatigue and strain. Milk is good for you and refreshing. It contains no stimulants that may increase your nervousness. Instead, it regulates the heart and nervous system to tone the muscles.
5. Makes You Sleep Better. Scientific tests definitely show that a glass of milk before bed-time relaxes you, makes sleep come more quickly, helps you sleep soundly all night through. Milk relaxes the blood-vessels, aids circulation, eases the hunger pangs that sometimes cause wakefulness. If you like warm milk, that's even more relaxing.

ORDINANCE NO. 322 An ordinance by the City Council of the city of Friona, Texas to amend ordinance number ninety-four (94), passed by the board of commissioners on the 10th day of August, 1953, and declaring an emergency: Now, therefore, be it ordained by the city council of the city of Friona, Texas, that hereafter Section Five (5) of said Ordinance 94 be amended; Therefore, Section 5 of said ordinance is hereby revoked, cancelled, rescinded and that said Section 5 shall henceforth read as follows: Section 5 - Then when the property served is made a part of, or brought within the City limits of the City of Friona, Texas there shall be no refunds or reimbursements, what-

soever, by the City of Friona, for the cost of such water and/or sewer mains with appurtenances.

The fact that the present ordinance, being Ordinance No. 94, is inadequate for the regulation of the extension of water and sewer mains outside of the City limits creates an emergency and public necessity that the rule requiring all ordinances before final passage be suspended and said rule is hereby suspended and the ordinance shall take effect immediately after its passage and publication.

Passed and approved this 1st day of June, 1959. R. L. Fleming, Mayor ATTEST: Albert L. Field, City Manager 36 3tc

Decorate Your Home

With Con - Tact Printed Patterns

Make Your Own Con-Tact Cut-Outs using Con-Tact Printed Patterns

Decorate anything artistically with your own CON-TACT Cut-Out Appliques, following the outlined patterns printed on this protective paper. Use CON-TACT printed patterns again and again to cut beautiful, professional shapes out of different CON-TACT colors and designs.

Cut-Outs of CON-TACT are washable and colorfast... adhere to any smooth surface. Trim and decorate walls, furniture, cabinets, toys, accessories, gifts and gift packages. It's easy, it's fun, and it's the newest arts and crafts idea for a delightful home-making hobby!

MATERIALS: Con-Tact, a pair of scissors, and your imagination!

GENERAL DIRECTIONS: Choose your favorite set of patterns. 1. Cut through the CON-TACT plastic and paper, following the printed outline of each motif. Or: 2. After using CON-TACT for another purpose, cut shapes out of paper backing and trace outlines on paper back of other pieces of CON-TACT. Then cut out.

(SEE DIRECTIONS FOR APPLYING CON-TACT) Separate the paper from CON-TACT by twisting one end of Cut-Out slightly, and gently peel off paper. Simply smooth into place with fingertips. Use contrasting CON-TACT designs and colors on your Cut-Out, to "paint" and define the lines drawn on paper shapes such as donkey eyes, train wheels, polka dots, etc.

## A More Prosperous Community Doesn't Guarantee

# Happiness

*...but it helps*

Buy . . . where your  
trade reinforces  
the material  
foundations of  
your own  
happiness

The recipe for true happiness calls for various ingredients to satisfy different people . . . just as cakes are baked with a variety of frostings and flavorings to please different palates. But . . . with cakes . . . the basic ingredients are always about the same . . . flour, sugar, shortening, etc. Much the same thing is true of happiness.

- No matter what type of trimmings each of us may prefer on our individual happiness, the fundamental elements are about the same for all . . . good health, a good job or a prosperous business, ade-

quate schools for our children, strongly supported churches in which to worship . . . and many good neighbors, friendly and secure.

- These latter things . . . call them the material essentials to happiness. if you will . . . can be assured by a substantial and ever-growing trade volume in our community. Which we, ourselves, can create if all of us spend our money here . . . where we live and make our living. Spending away from home strengthens the foundations of our city neighbors' happiness, and weakens our own.

*It Pays to Buy  
where you Live*

These Friona Business Establishments Are Genuinely

# Early Fruit Set A Must

Since from 40 to 60 per cent of the Farmer County area cotton crop has had to be planted over following the heavy rains, hail, and wind of three weeks ago, cotton growers are in a contest with Father Time that

will be nip and tuck all the way. County Agent Joe Jones, after a survey of crops across the county, this week issued a strong recommendation to cotton growers to take particular

care that their early fruit is set and that they not allow insects to retard plant development. "We have heavy infestation of insects, particularly thrip, all over the area," he says,

"and they are definitely holding our cotton back." The county agent urged that measures, such as spraying and dusting, be taken to control this menace to the crop. Some farmers may not see

the significance of insect control at this stage of the game, says Jones, but it is very important that the cotton be given every chance it can to set fruit and start on its long road toward maturity.

"The insect is one thing we have a pretty good control over," says Jones. "We can't do much about the weather and will just have to take our chances, but we can keep the bugs out."

If the end of the growing season comes at a normal date this fall, growers have only about 120 days in which to produce their cotton. This is already several weeks short of the "normal" time for most varieties to mature, and so

the farmer is already critically behind nature.

The weather now is warm and the cotton should be advancing rapidly. "Everyday we lose at this stage is just like moving the first freeze up a day," points out Jones. "Farmers should get out into the fields and really make a close inspection of their crop. If they will examine the first true leaf being made by the plant, chances are they'll see that the thrip is curling the leaf and holding the plant back."

The county agent says that it is true that the raggedness of the cotton leaves in many fields is not all attributable to insects, since flying sand, rain, or hail has had its definite effect. But he reiterates that something can be done about insects, while it can't about these other hazards.

No one can say how the growing conditions will be from

now until harvest time, but the county agent says that farmers should continue to think in terms of one watering when the cotton is blooming, as any other irrigation may produce unwanted growth that will pull down the quality of the cotton and lower crop profit.

Farmer County growers have the most "shook up" crop in history. About half of the stand is very young, just having come up after re-planting following the bad weather. Another approximate one-fourth of the crop has suffered moderate to heavy weather damage, but farmers have decided that a thin early stand is better than a good late one, and left the crop in. The remaining one-fourth is in good to excellent condition, being mainly constituted of those fortunate fields where severe weather passed them by.

## THE HIGH PLAINS FARM AND HOME

DEEP IN POTATOES--Hardy May, Friona farmer, inspects his potato crop southeast of Friona. The potatoes are doing real fine so far, he says.

ONLY FIELD OF ITS KIND---This is the only field of sweet potatoes in Farmer County. Joe Morris, who farms 2 miles east and one mile south of Friona, planted this 40 acres as a result of the 10 acres he grew last year.

### Potato Outlook Best Since 1956, Says O'Haugherty

"This looks like the best potato crop in many years. None of the potatoes were hit by the recent hail, the market is high and there is no sign of disease."

This is the report received from John O'Haugherty salesman for Friona Growers and Shippers.

There are approximately 650 acres of potatoes in the Friona area, the great majority of

them the red variety. If nothing happens this year will be better on potatoes for yield, quality and the market, O'Haugherty says.

Area farmers report their crops are all looking good. Those areas that did receive a small amount of hail were not damaged any appreciable amount.

Hardy May, who farms one mile south and two miles east of Friona, says his potatoes are looking good. He has 90 acres in the red variety and so far is well pleased with them.

The onion crop this year will not be too great. The onions that have been planted were planted from seed, as the blight got the onion sets to be used while they were still in the valley.

Carrots are the second big vegetable crop this year. There are about 200 acres that are already in a good stand. There will be more planted and a medium market is expected this

year. Some acreage was lost during the heavy rains. May says he lost 20 out of 45 acres, but that he will replant.

Peppers are planted in only small acreage. The pepper crop last year was low and many of the farmers did not plant them this year. Of the small amount of peppers that were planted, many of them were washed over during the rains.

From all the reports, potatoes are the big vegetable crop for the year. O'Haugherty says that Friona Growers and Shippers have added about \$6,000 or \$7,000 worth of potato machinery this year to help with the processing.

Another potato, but a different variety from the red, is the sweet potato. Joe Morris, who farms next to May, has 40 acres planted to sweet potatoes. He planted about 10 acres last year, and was pleased with them so he increased his acreage this year.

They are the only sweet potatoes in the Friona area. Morris and May are co-owners of the only transplanter in Farmer County. They use the machine for transplanting tomato and sweet potato plants.

### Date Set For '60 Wheat Quota Vote

Marketing quotas for the 1960 wheat crop have been proclaimed by the secretary of agriculture, as required by legislation whenever the available supply of wheat is more than 20 per cent above the normal supply.

However, quotas will not become effective unless they are approved by at least two-thirds of the producers voting in the referendum, which will be July 23.

If quotas are approved for the 1960 wheat crop, it will mark the seventh consecutive year they have been used for wheat. Wheat quotas and acreage allotments apply only in the 39 so-called "commercial" wheat states, of which Texas is one.

The present law, says Prentice Mills of the ASC, states that to be eligible to vote in the referendum, a grower must expect to have more than 15 acres of wheat for harvest as grain in 1960.

A wheat grower who signs an application under his

wheat provision permitting him to produce up to 30 acres of wheat as feed on his farm will not be eligible to vote. Every wheat grower will be informed of the individual wheat allotment for his farm in advance of the referendum date.

As usual, the ASC committee will set up polling places throughout the county for the convenience of farmers in voting. Locations will be announced later by the county ASC office.

If quotas are not approved, there will be no restrictions on wheat marketings.

# NEWS

The Place Where Most People Trade Friona, Texas Wednesday, June 17, 1959

John Bill, who went swimming and blistered over nine-tenths of his body, remarked, "I feel like a package marked 'fragile' handle with care."

International Harvester makes twelve Farmall and International tractors in six power sizes and virtually unlimited number of models to suit your every need.

The Ralph Sheltons have had a built-in baby sitter at their house this week and Rex and Tammy have really enjoyed him. He's their granddad Shelton from Greenville and Mrs. Shelton has been especially happy to be able to go visiting all by herself and not think of getting the children ready.

Mr. Shelton came to Friona especially to attend the wedding of another granddaughter, Evelyn Ray, who was married Saturday.

Attention combine operators! We can help you with the harvest. Need parts? We've got 'em. Call us days at 2091 or nights at 5021.

A Texas Oil Millionaire went to Washington and was visiting with a native. "In Texas" he said, "people own their own planes." "Oh! So do we," said the Washingtonian. "Most Texans also pilot their own planes," said the T. O. M. "So do we," replied the native. "In your own backyard?" asked the Texan.

See the big IH fertilizer distributor at our warehouse. To avoid skips that stunt crops burned spots that waste fertilizer, use an IH fertilizer distributor.

Don Clements feels like the original "Hard Luck Harry." He bought a Weimaraner puppy in Gooding, Idaho not too long ago. The pup thrived and the whole Clements family grew very fond of him. His favorite pastime was playing ball and he would even play by himself.

Then he chose the wrong ball--a big steel ball bearing--and accidentally swallowed it. He died following stomach surgery.

See the new farmer proved --farmer approved go-devil. One plow that does six operations--weeds the row--pulverizes crust--knives middles--discs--and loosens tractor tire hard pan.

Hollis Horton was one of the judges for the beauty contest in Clovis last Thursday. He helped select the Dairy Princess for district four on New Mexico. Just goes to show that you can't be sure what your in-laws may do. Other judges at the contest were Steve Bavousett and Flake Barber.

The new roto-matic precision power steering is far easier, much more responsive, even better road fuel, new cornering stability, straightens out automatically, safer control, stays "on course" better, pin point precision. You'll never know what you are missing until you try it.

Think how much time is wasted by ministers of the

churches. There's such a little bit of difference between church members and non-church members a minister may waste quite a bit of time trying to "save" a man only to find he's already a steward or deacon in somebody else's church.

John Gaede drove into Friona Saturday with three new International V-8 pickups. Better drop by and see these. John doesn't argue much about going to Springfield, Mo., after the new pickups since he must pass directly through Columbia, Mo., where Maurice, John's son, and his wife live. So he is able to combine his visiting with his business.

Wes Izzard says Americans are more worried about their weight and a place to park than about the atom bomb and communism.

Scientific farming has come a long way in the last few years. Farmers have learned to control the moisture, by irrigation, the land with fertilizer, the seed by certification and the bugs by spraying, but so far they haven't been able to control the hail. Maybe that, too, will be controlled before long.

Flake Barber of the Ethridge-Spring Agency has been busy most of the last couple of weeks with hail insurance adjusters. Flake says usually an adjuster can work 3 or 4 farms per day but they averaged about 13 per day in Farmer County because so many wheat fields were a total loss.

# Many Need 'Hopper Control

Control measures against grasshoppers have become necessary on many farms in the Parmer County area. County agent Joe Jones reports that much spraying activity has been going on to combat the locusts. Grasshoppers can be controlled with aldrin, chlordane,

toxaphene, or heptachlor. Spraying on the chemicals has proved very popular and effective. The worst areas of infestation have been in ditches, turn-rows, and along the edges of soil bank land. Wheat, cotton, and young grain sorghum fields are all getting their share of the "hoppers, who migrate from undisturbed land.

Some spraying formulas that are successful: aldrin, 1 1/2 to 2 ounces; chlordane, 1/2 to 1 pound; heptachlor, 3 to 4 ounces; and toxaphene, 1 to 1 1/2 pounds. This is on a per-acre basis.

Use the higher dosages when vegetation is tall and dense, or when grasshoppers are adults. The higher dosages are needed for the treatment of barrier strips or for when temperatures are high and grasshoppers are full grown.

as some bills if passed would have done. We have another year of operating our tractors without paying for public roads with road tax. Smokers will contribute more to the tax til, which we think is all right. Liquor distillers and distributors and drinkers will pay more, too, and we believe it still is not enough.

As the bill stands now, it appears that most of the increased revenues will come from the less necessary items of life. The only thing we would like to see, that is not being done, is more economy in state government. There is plenty of room for improvement in this field in the federal government too.

Farm Bureau members have had another successful session in state and federal legislation. Not all, but much of the desired legislation championed by your representatives has been achieved.

We have a copy of "Let's Be Right on Flag Etiquette," published by The National Americanism Commission of

## THE HAPPY HOMEMAKER

BY JUNE FLOYD

Last week we ran several recipes that were selected to help use home canned fruits and vegetables in a variety of ways. Our first recipe this week makes use of canned vegetables and canned chicken.

### CASSEROLE OF BAKED CHICKEN

1/2 cup cubed potatoes  
2 tablespoons butter  
1 tablespoon flour  
1 teaspoon salt  
1/4 teaspoon pepper  
1 cup milk  
1/2 cup chicken broth  
1/2 cup grated American cheese  
2 cups cubed canned chicken  
1 cup canned peas  
1/2 cup chopped celery  
1/2 cup crushed corn flakes  
Cook potatoes in rapidly boiling water until tender. Drain. Melt butter in saucepan; stir in flour, salt and pepper. Add milk and broth and cook until slightly thickened. Add the cheese and heat until cheese is melted.

Mix the chicken, peas, celery and potatoes. Put in breaded baking dish and pour the cheese sauce over it. Top with crushed corn flakes. Bake in 35 degree oven for 25 minutes.

If you've made peach cob-

The American Legion. Some of the things included in Public Law 829 are very commendable. Three of the suggestions are: The flag should be displayed daily, weather permitting, on or near the main administration building of every public institution.

The flag should be displayed in or near every polling place on election days.

The flag should be displayed during school days in or near every school house.

We would like to see the flag displayed more than it is. We are going to get a flag and join those who do display them at appropriate times. We believe in America.

CONSIDER THIS: As a bird that wandereth from her nest, so is a man that wandereth from his place. Prov. 27:8

blers until every member of the family is becoming tired of them, you might like to try this variation.

**PEACH CUSTARD PIE**  
1 pint canned peaches  
milk  
1/3 cup sugar  
1/2 teaspoon salt  
3 tablespoons corn starch  
2 eggs, separated  
1 tablespoon butter or margarine  
1 teaspoon lemon juice  
1/8 teaspoon almond extract  
1 9-inch baked pie shell  
Drain juice thoroughly from peaches. Slice peaches. Measure juice and add enough milk to make two cups. Combine sugar, salt and corn starch. Add peach juice mixture and stir until blended.

Heat to boiling, then boil gently 1 minute or until mixture thickens, stirring constantly. Beat egg yolks; gradually add the hot mixture, stirring thoroughly. Return to saucepan and continue to cook 2 minutes.

Remove from heat, add butter, lemon juice and almond extract. Mix well. Gently fold the hot mixture into the stiffly beaten egg whites. Pour a small amount of custard in bottom of pie shell. Place peach slices over custard, add remaining filling. Chill. Makes one 9-inch pie or 6 to 8 servings.

Mrs. G. W. Morris of Friona makes a delicious German Fruit Cake. About one year ago her recipe was printed in the Amarillo News-Globe and we are reprinting it here.

**GERMAN FRUIT CAKE**  
1 cup butter  
2 cups sugar  
1/3 cup jam or jelly  
1/3 cup chopped raisins  
1 cup chopped nuts  
1/2 cup sweet milk  
1 cup mashed potatoes  
4 egg yolks  
2 cups flour  
1 teaspoon cloves  
1 teaspoon cinnamon  
1 teaspoon nutmeg  
2 teaspoons baking powder  
4 egg whites, beaten  
1/4 teaspoon salt

Mix all ingredients together and bake in 3 layers in 375 degree oven.

**ICING**  
2 cups brown sugar  
1 cup cream  
2 tablespoons butter  
Combine ingredients and cook until soft ball is formed in water, add 1 teaspoon vanilla, beat until creamy and add nuts if desired.

If there is someone in your family who is underweight, encourage the drinking of a glass of half milk and half cream immediately before retiring each evening.

If you have difficulty remembering the number of drops required when the recipe calls for a teaspoon and other like factors, you should clip the following table out and paste it inside your favorite cookbook:

**STANDARD MEASURES**  
40 to 50 drops--1 teaspoon  
3 teaspoons--1 tablespoon  
2 tablespoons--1 fluid ounce  
16 tablespoons--1 cup  
2 cups--1 pint  
2 pints--1 quart  
4 quarts--1 gallon  
8 quarts--1 peck  
4 pecks--1 bushel  
2 2/3 cups brown sugar--1 pound  
2 cups granulated sugar--1 pound  
2 sticks oleo--1 cup

## July 1 Deadline On Wheat

The ASC county office is accepting wheat allotment applications for certain farms, announces Prentice Mills, office manager. Archie Tarter, ASC committee chairman, explains the procedure like this: "A producer who intends to seed wheat for 1960 on a farm on which no wheat was

seeded for harvest as grain in 1957 and for which a 1958 and 1959 wheat allotment was not established, irrespective of whether wheat was seeded for harvest as grain in either 1958 or 1959, and who desires to be considered for an allotment, must apply." Application forms are avail-

able in the county office. The producer must apply in writing by July 1.

### NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

We have found keeping up with the tax proposals on the state level very confusing this session. We have thought, from reading news reports from time to time, that some phases were passed; then we would find they were only passed out of a committee, to be turned down by the House or Senate. Anyway, some of the things have been kept out of the bills that would be discriminatory to farmers, and we hope by the time final passage is made, it will be a bill acceptable to Texans as a whole.

It appears that the farm to market road program will not be harmed this session.

# Rural Electricity IS YOUR PARTNER

## For Greater Dairy Profits

The great network of power through this area has helped make today's dairy as modern as today's factories, and electricity is always on the job--ready to serve the dairy farmer economically--at the flick of a switch.

To the dairymen of the area we say, "More Power To You." Let's all observe Dairy Month by using plenty of fine dairy foods and continue to use them throughout the year.

### The Dairy Industry

is observing National Dairy Month during the month of June. Let us take time to say "Thank You" to the men and women who make it possible for us to offer our youngsters good pure milk and milk products every day of the year.

### Rural Electricity

has been one of the most important factors in the growth of the Dairy Industry in our area. This economical workmate of the dairyman makes possible the power and machinery that is needed to operate a dairy farm.

LEWIS GORE, who has a dairy farm north and west of Friona, utilizes the services of Deaf Smith County Electric's Willie Wirehand to the fullest extent to trim the work involved in his operation. Above, Lewis uses electricity to make the job of milking easier, as he put it, "both for the cow and myself." Below, following the milking operation itself, the milk is stored in an all stainless steel milk tank where it is cooled and kept moving by electricity.

## Wheat Rolling In

The season's first wheat has been received at nearly all points in the Farmer County area, either this week or the latter part of last week. Reports that are coming in are raising optimism about the crop. Estimates of the weather damage had ranged up to 60 percent of the crop, but farmers seem to feel they'll be able to recover substantially more than that.

Weather has been almost ideal for the past 10 days to finish out the crop, and if it remains dry, combines will be going full blast before another week is out. In recent years, wheat harvest time has shortened to only a few weeks in duration. Modern combines now give a "mop up" effect to harvest whenever the golden grain finally reaches maturity.

Reports of the harvest will be printed in the usual community roundup style of Farm and Home in another week or two.

### SOIL CONSERVATION DISTRICT NEWS

OUR SOIL \* OUR STRENGTH

Proper use of crop residues was one of the farming practices developed to combat the wind erosion that plagued the plains country in the mid-thirties. It likely played one of the greatest parts in getting a return to normal conditions at that time and it is surprising to find burning of stubble still practiced in this area.

Soil needs a protective cover at all times whether it is in the form of crop residues on the surface or growing crop. The soil also needs to have the crop residues returned for plant food and as a soil conditioner.

It's quite true that these residues create a problem in preplanting. By burning the stubble the number of tillage practices needed to get the kind of seedbed desired is reduced considerably. Doing this also shortens the time needed for preparation. Reason for burning of crop residue is based largely on the idea that it provides a reduction in cost. It means that a seedbed can be

prepared without extra time and expense.

By doing this future gains in production are sacrificed for immediate reduction in cost. Fortunately not a great many have gone this route. Proper use of residues is one thing that is keeping the soil down and production high. To those who are planning to burn wheat stubble--look at it this way--It is an immediate reduction in cost with the prospect of future losses of soil and lower production.

Loss of soil is a permanent one. Loss of productivity may be regained to a certain extent through additional fertilizers, which of course means increased cost.

Another undesirable feature of destroying crop residues by burning is the effect it has on soil condition. The condition of soil gradually deteriorates in cultivated land over a good many years. Burning steps up the pace of de-

terioration. To prevent this lowering of soil condition, all crop residues possible must be returned to the soil.

When soil was in its native original condition, it was in its most productive state. At this time the soil was filled with grass roots, decaying organic material and millions of both microscopic and small visible soil organisms. When this soil was plowed for farming it was permeable and productive. It had all the organic material and soil organisms that were necessary for breaking down these residues into plant food for growth. The soil was also open and porous and the organisms could do their work in the presence of air and moisture which are necessary for their survival. If crop residues are burned, the food needed not only by these organisms but by future crops is taken away. Burning also directly destroys these organisms present in the soil making the condition more serious.

As this same soil is farmed year after year the original and productive condition gradually disappears unless all the crop residues are returned to the soil and a soil improving crop such as legumes or grasses is used in the crop rotation. The residues returned to the soil merely replace a part of that which is harvested. To take all and return none results in an unproductive and diminishing return from the land.

We have all observed how irrigated land gradually loses its ability and capacity for taking up water. This, again, is where the proper use of crop

## Special Light Spot Grade Worth Millions to Growers

Light spotted cotton on the Texas High Plains is going to be worth several million dollars more to farmers this year.

Separate price support rates for split grades are a feature of the 1959 cotton law and represents attainment of one of the major goals of the Plains Cotton Growers, Inc.

Just recognition for light spots was one of the first goals adopted by officers and staff members of the PCG more

than three years ago. "It took nearly three years of hard work negotiating with the U. S. Department of Agriculture, other producer organizations, and leaders throughout the cotton industry as well as with Congressmen and Senators before the PCG saw light spotted cotton recognized for its true value," W. O. Fortenberry, president, said.

Records show that the Texas High Plains crop sometimes averages as much as 50 percent light spot during the crop year. Previously the Commodity Credit Corporation did not recognize light spots as a separate grade. A producer putting light spotted cotton into the government loan received only the value for full or heavy spotted cotton.

The cotton trade has at times given substantial premiums for light spots over the full spot, which accounted for the fact that light spotted cotton was nearly always the first cotton from the Plains to move into trade channels. However, the producer had no real price protection on light spots other than the full spotted loan.

"The loan difference between spotted and white cotton has been widening rapidly the past several years. In 1956 the difference between a bale of Middling inch white cotton and a Middling inch spotted or light spotted bale was 440 points or \$22 per bale. In 1957 this difference had widened to 575 points or \$28.75 per bale, and in 1958 had widened still further to 725 points or \$36.25 per bale," according to George W. Pfeiffenberger, executive vice president of the PCG.

"Since all spinning records and experience show that light spotted cotton is practically equal to white cotton in value and the physical difference in classing is often quite small, the difference of \$36.25 per bale has become ridiculous," Pfeiffenberger stressed.

Recognition of light spots in the government loan this year guarantees the farmer a loan on light spotted cotton 355 points above the spotted loan price. This would be the same as a premium of 355 points for his light spotted cotton this year, whereas last year he had no guarantee in the loan and his actual sales depended on what

to form this curd in the rinse and the clothes will eventually become grayish. In the tests made in South Dakota, cottons rinsed in hard water, after a soft water wash did not come out as clean as those rinsed in soft water. In fact, it was found that the cottons washed in soft water were three times as clean as those washed in hard water.

Fatigue comes easier during hot weather. A tired feeling often brings an irritable disposition and cuts down efficiency on the job. It can also increase susceptibility to disease or accidents, according to extension home management specialists. If you are feeling more tired than usual, stop and analyze yourself and your working methods -- specialists say that boredom and frustration, as well as such physical factors as overwork and strain, will cause that tired feeling.

Short rest periods from 10 to 20 minutes will work wonders if you are tired from heavy work. A change of environment or activities will often relieve fatigue caused by boredom or monotony.

Efficient, happy homemakers have found that these simple rules will help to fight fatigue and make work more interesting. First -- check your kitchen and household storage -- is everything within easy reach? Keep cleaning tools in good repair and located close to the job.

Wear comfortable work clothes and sit as much as possible while you work. Study your jobs and organize the work in assembly line fashion . . . Use both hands whenever possible. Don't try to stay with a heavy or difficult job too long -- Intersperse big jobs with

Be practical but not drab. When in doubt, don't take that extra dress. . . . In sections of the country where the water is hard, women are accustomed to the fact that you must soften the water to get cotton clothes really clean when laundering, but sometimes overlook the fact that you must soften rinse water as well as the washing water. Some interesting tests have been made in washing cottons in the South Dakota Experiment Station, say extension home management specialists.

Most women understand that soap unites with the minerals in hard water to form a soap curd or scum which clings to fabrics and leaves them with a gray, dingy appearance. Many do not realize that this can take place when you rinse with hard water as well as when you wash with hard water. There is enough soap left in the clothes

to form this curd in the rinse and the clothes will eventually become grayish. In the tests made in South Dakota, cottons rinsed in hard water, after a soft water wash did not come out as clean as those rinsed in soft water. In fact, it was found that the cottons washed in soft water were three times as clean as those washed in hard water.

easier ones and rest at intervals. . . .

Thorough cleaning and correct spray treatment will protect carpets and rugs from clothes moths and carpet beetles, according to extension home management specialists.

Regular care with the vacuum cleaner is the first step. It prevents dust, lint and hair from accumulating and offering extra food for the pests. It can also remove the insects themselves and their eggs. These usually feed under heavy furniture where it is difficult to clean. Rotate rugs and carpets occasionally to make sure all areas are exposed to regular cleaning, light and air.

Entomologists advise a five percent DDT oil solution on rugs and carpets every 1 to 18 months. For a 9 by 12 rug of average weight, you will need 1 1/2 to 2 quarts of spray. Rug pads of animal hair or wool, will need spraying on both sides unless they have been treated previously.

When spraying wall-to-wall carpeting give special attention to edges and parts that have been under a piano, sofa or other heavy furniture piece.

Call on the expert help of a carpet-cleaning or pest-control firm if you have qualms about doing expensive rugs.

### H. D. AGENT'S CORNER

Jimmie Lou Wainscott

Going away this summer? Take no more clothes than is absolutely essential, suggest extension clothing specialists.

Traveling with light baggage is lots easier these days with all the new fabrics and finishes which make clothing so much easier to care for.

Make a plan and build your wardrobe around a basic color scheme. Well chosen separates and such small accessories as scarfs, flowers and jewelry help vary your costume.

Take the type of clothes you know you like to wear. As useful as separates are to most women, if you don't like to wear them at home you won't like them away from home. The same thing applies to knitted suits and dresses. They're ideal for packing but remember you want clothes ideal for wearing, too.

Be practical but not drab. When in doubt, don't take that extra dress. . . .

**HOW TO CODDLE A GOOD EGG**

Instructions on how to treat Father on Father's Day or any other day.

The care and feeding of father is not to be taken lightly. It's important to keep him happy at all times, at any cost... and this requires much coddling from every member of the family. The best way for mothers to ply fathers is to gorge them with their very favorite food. And since it seems to be a universally accepted fact that fathers like to eat outdoors, why not have a barbecue for the father in your family on Sunday, or any other day he feels like it. It also seems to be a fatherly trait to show off... to feel important. And nothing does more for his ego than to play chef and prove that he is a better cook than mother. So let father have his fun on Sunday. Let him loose at the barbecue pit he's so proud of. It will mean a day of rest for mother in between running numerous errands for the cook, and taking the blame for anything that doesn't turn out as well as expected. It won't hurt to humor him on Father's Day or any other day. After all, it works both ways. Maybe this will mean a new dress or a fancy hat for mother.
