VOLUME IX.

CISCO, TEXAS, MONDAY, MAY 21, 1928.

NUMBER 69

TEXAS

By WILL H. MAYES, Austin.

LUBBOCK FEDERAL COURT—Lubbock is practically assured a new division of the United States Court for the Northern District of Texas, the measure having been reported on favorably by the House Judiciary Committee. The district is to comprise nineteen counties. Should the bill become a law, the new Federal building already authorized for Lubbock, will be made larger to provide quarters for the court. Lubbock is rapidly assuming city proportions.

GALVESTON MARINE HOSPITAL—For many years Galveston has been seeking an appropriation for a Marine hospital of proportions to care for the seamen and employees of the United States Shipping board, private merchant marine and others entitled to hospitalization under the employees' compensation act. With a beginning appropriation of \$100,000 voted by the house appropriations committee, work will soon be started on the buildings which will ultimately cost approximately \$750,000.

SEEKING NATIONAL CONVENTIONS—Picked with the pre-convention publicity of the National Biennial of the Federated Women's Clubs, the San Antonio chapter of the Business and Professional Women's Clubs have started an active movement to secure for San Antonio the National Conventions of that organization to be held in 1931.

As a preliminary step to that end a series of five community advertisements are to be inserted in the official organ of the federation, and as a first evident result a number of delegates to the annual federation in New Orleans will visit San Antonio after that session is ended.

Every national convention held anywhere in Texas helps all the state and active efforts like those put forth by these San Antonio women is a good boost whether they get the convention for San Antonio or not.

RESPONSIBILITY FOR HAZING—To what extent is a school responsible for damages to a student from hazing by other students of the institution? This question will likely be settled in Texas in a suit brought by a Rice Institute student against that school in which it is alleged that he suffered a dislocated vertebrae from a hazing administered by four students prominent in athletics of the Institute.

Hazing in any form is cowardly and is comparable to the action of the mob inflicting punishment. Students who haze should be summarily expelled from school.

WATER PERMIT EXTENSION—The Texas Power Corporation has been granted a two-year extension on its permit on the Gaudaluppe River south from New Braunfels to Comal, Gaudaluppe and Concho counties. The permit was readily granted because the company has shown its good faith in carrying out its construction by the completion of three power dams. The Texas Power Corporation is one of several Insull feeders operating in Texas.

TEXARKANA RAILROAD STATION—The importance of Texarkana, the Texas "Gateway City," is shown in the construction by the railroads entering there of a station to cost about \$1,750,000. The contract has been let, and already about \$300,000 has been expended in preliminary construction work.

HOMESTEAD LAW ATTACKED—Speaking at the recent meeting of the Texas Association of Real Estate boards, several realtors attacked the Texas homestead law as having done more than any other thing to retard the development of Texas. This is rather a broad assertion. However, it is generally agreed that some way should be fixed to compel homesteaders to bear their share of street and sidewalk improvement, just as they are compelled to pay bonds for road improvements. Effective city planning and development are contingent upon this.

PROPAGANDIZING METHODS. Significant because it shows the methods to which public utility corporations will resort to shape public opinion in their favor, was the statement made by the director of the public utility information bureau of North and South Carolina before the Federal Trade Commission. He testified that by appealing to the civic pride of prominent men and women he wrote articles that appeared under their names and that were circulated among 6,500 newspapers, college and trade organizations, and that there were directed against municipal ownership of utilities, government operation of Muscle Shoals, the Boulder Dam project and on other subjects relating to public utilities. All of which goes to show that you can't believe all that you see in the papers about public utilities.

TOLL OF MINE BLAST MAY BE 197

Two Baccalaureate Sermons Heard

Randolph College Graduates to Have Commencement Tonight; 48 to Get C. H. S. Diplomas Friday

Victory a Certainty!

Miller Huggins, manager of the New York Yankees, champions of the world and American League, emphatically states there is not a stumbling block in the path of his team, and that he is certain they will run rampant this season to retain the pennant.

Two baccalaureate sermons were heard in Cisco by graduating classes Sunday. At 11 o'clock the 48 who will receive their diplomas at Cisco high school heard an inspiring address by Rev. P. T. Stanford of the First Methodist church at the high school auditorium. At 8 p. m. the Randolph college graduates occupied the positions of honor in the First Christian church while Rev. J. B. Holmes of Fort Worth exhorted them to continue their efforts toward a higher education.

At 6 o'clock this evening a banquet for ex-students of Randolph college will be given at Rotary hall. Commencement services will be held at 3 o'clock in the First Christian church and diplomas will be presented to the 14 graduates of the college and two who are completing the high school course. The senior class play, "Beds on a String" will be presented in the college auditorium at 8 o'clock Tuesday night. The play is under the direction of Miss Zella Blanche McClinton.

FALSE REPORT GIVEN OF DAM HERE BREAKING

An erroneous report gained circulation in neighboring cities that Williamson dam at Lake Cisco had gone out during the recent heavy rains. These reports have hardly caused even a ripple of interest in Cisco, for all realize that there was not a particle of foundation for the rumor, as the Williamson dam is standing firm and gradually storing more water to insure a water supply for several years to come, should another drought visit this section like the one just broken.

W. P. Pulley received a long distance call from his son at Comyn this morning, making inquiry about the report, saying that all sorts of rumors were current there that the dam had gone out. He was informed that the rumor was without foundation, and that the originator of such an erroneous report must have been inspired through malice or a mischievous mind. A report was also circulated in Breckenridge, Eastland, Ranger and Aledo.

Williamson dam is as firm today with the 90 feet depth of water behind it as it was the day it was constructed, and the bass are as hungry as starved wolves, fishermen say. Lake Cisco was the source of water supply during the first months of this year, when the Texas & Pacific road ran daily water trains of tank cars out of Cisco for use in West Texas. The water trains ceased on May 14, when the reservoirs on the western division were replenished by the rains. During the dry season 956 tank cars of nearly ten million gallons of water were taken from Lake Cisco, which did not appreciably diminish the supply.

An additional rain of two inches Saturday night added three more feet to the water level in Lake Cisco, pushing the water west of Eolian bridge, so that row boats crossed the Eolian road and navigated the waters for several hundred yards beyond the bridge.

WARNING GIVEN NOT TO CROSS EOLIAN BRIDGE

Water is running over the dump around the bridge at the head of Lake Cisco, on the Eolian road, and Commissioner Burt Britain requests the Daily News to warn the public against traveling that road at the present time. "The bridge is not damaged," Commissioner Britain said, "but the approaches are not safe, and I hope the people will not attempt to travel that highway until this road can be looked after."

"Many other bridges in the county are in an unsafe condition, and I would advise that all use the utmost care in passing over all bridges. I have a force of men repairing the damaged bridges as fast as the work can be done, and expect to get all in good shape some time this week.

"Three bridges were washed out in this precinct by the recent rains. A 36 foot span on the Cisco and Scranton road, over Love branch, went out, but this has been replaced. On the same stream, on the Salt Tank road, the bridge was moved out of place. This will be pulled back to its proper location today. A bridge on the Dothan and Scranton road also was washed out, but that was repaired Sunday and the road is now open to traffic."

SHE OUGHT TO CAPTURE THE PRIZE

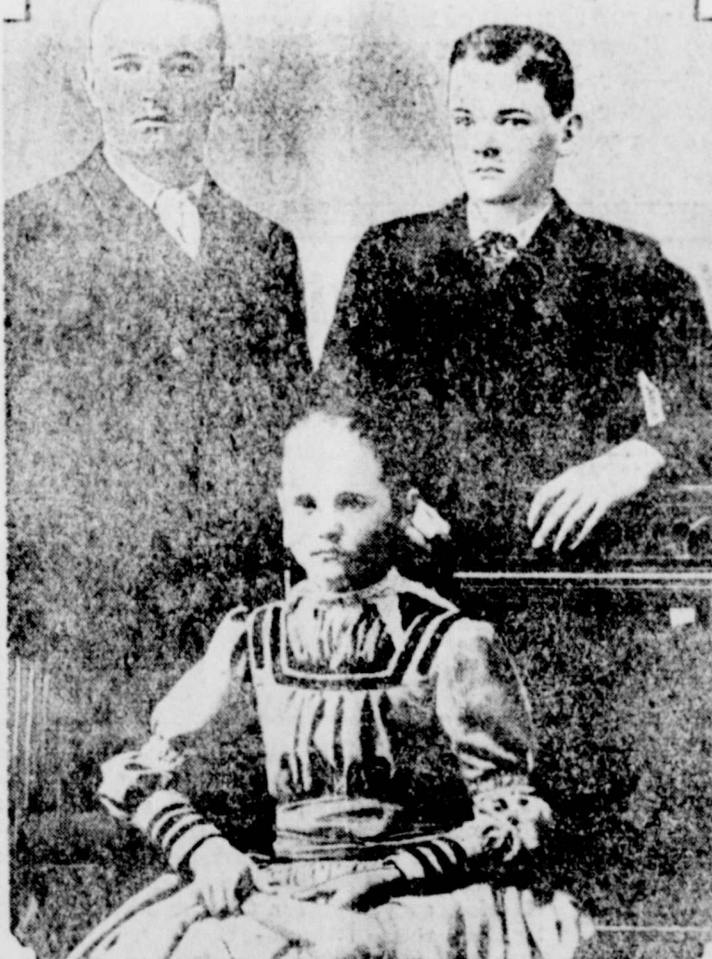

Just take a glance at pretty Betty Dumbis, who has been chosen as "Miss Indiana" and will represent her native state in the International Pageant of Puckitude (that's a 34 word!) at Galveston, Texas, June 2-5. Many foreign countries will have their most beautiful girls in this contest, but we think a study of the photo will convince nearly anyone that Betty'll come pretty near winning the loving cup!

3 DAUGHTERS OF EDITOR ARE FIRE VICTIMS

NEW ALBANY, Miss., May 21.—Elizabeth, Blake and Helen, the three daughters of J. S. Owens, editor of the New Albany Gazette, were fatally burned today when fire swept their home. Their parents narrowly escaped with their lives.

ODD GLIMPSE OF HOOVER

Taking a peep into the old family album of the Hoover family, there would be found many cozy family groups; the customary old-fashioned "fifties," and live, interesting pictures of family members and friends at work and at play. The most that the old ones would bring forth would perhaps be the silly giggle of a very modern flapper and great astonishment at the tremendous amount of clothing worn by the women. Here is shown one picked at random. After a casual glance and perhaps a tolerant smile at the "old fashioned" group, let's find who they are. At the left is Theodore J. (Ted) Hoover at the age of 20; Herbert C. Hoover at the age of 16, and seated, Mary Hoover at the age of 14 when the family lived at Salem, Oregon. Theodore is now head of the Engineering Department of Stanford University, California, and Herbert, present Secretary of Commerce, is candidate for President.

MUDDY WATER IN MAINS HERE FOR 36 HOURS

After 36 hours of coffee colored water, Cisco Monday afternoon was again with clear, sparkling aqua pura. The lightning Saturday struck the pump at the city purification plant and put it out of commission. As a result the water that Cisco householders and business places got from Saturday evening until Monday forenoon was quite muddy, the tingeing the same as that in the lake and other places.

The well-known Saturday night bath was dispensed with in many homes and most of the housewives boiled the water before using it in the preparation of meal and for drinking purposes. Monday, usually the family washday was the wash tubs idle. The muddy water, the first in several years in Cisco mains, caused other home and business routines to be changed.

The pump was repaired Monday forenoon and normal water service resumed immediately.

NEGRO SOUGHT IN FORT WORTH COP'S MURDER

FORT WORTH, May 21.—Tennola Moore, negro, today was being sought through Texas and Oklahoma for the slaying of Motor-cycle officer, George Turner, here Sunday morning. Moore's brother lives at Bartlesville, Okla. Turner was shot when he and another officer stopped two negroes and a negro in an automobile for questioning. He died half an hour later in a local hospital.

PHONE SERVICE IS IMPROVED TO NEARBY TOWNS

For some time past the Southwestern Bell Telephone company has been engaged in connecting the towns of Cisco, Breckenridge, Eastland and Ranger with new toll service lines. This work has now been completed according to District Manager Phil Pettit.

"There is now a complete four-circuit line between Cisco and Breckenridge, and a five circuit connection between Cisco and Ranger, Pettit said. "This new service is the 'AB-Two Number' type, by which the operator may complete a station to station call between Cisco, Breckenridge, Eastland and Ranger without interfering with the patron or toll operator."

HEARING IS STARTED AT AUSTIN ON SUGAR RATES

AUSTIN, May 21.—The suit of railroads and Houston interests attacking the order of the state railroad commission equalizing sugar rates to Texas points was begun in the 3rd district court here today. The petitioners claim that the order is discriminatory against Houston and in favor of Port Arthur, Texas City, Galveston and Beaumont.

WEATHER—All Texas—Tonight and Tuesday partly cloudy, probably continued local showers.

what makes the MAYTAG so popular!

BERLIN, May 21.—Germany's general election resulted in a virtual landslide for the socialist-communist factions and the defeat of the Marx government, according to compilation today at noon. Political experts attributed the landslide to the women and others of the 2,000,000 who voted for the first time.

Mrs. W. T. Hobart, Methodist missionary to China at Tientsin, China, is the first American reported killed in the recent China-Japan situation. She met her fate by a bullet fired through a window of the Mission Station by a Southern Chinese soldier, according to reports of friends.

BIDS RECEIVED ON U. S. - MEXICO AIR MAIL ROUTE

WASHINGTON, May 21.—As a link between the United States air mail service and the proposed line between Mexico City and the international border, Postmaster General New today received bids for a contract for air mail service between New Orleans and a point on the border not yet selected as the northern terminus of the Mexican line. The route will be by way of Houston and may terminate at San Antonio, Laredo or Brownsville.

COOLIDGE VETO OF FARM BILL IS INDICATED

President Coolidge indicated today that he would veto the McNary-Haugen farm relief bill. He conferred this morning with the two co-authors of the bill after which Senator McNary said "It looks rainy. The weather man says the prospects aren't good."

Cisco Golfers Win Six of Seven Matches Played With Gorman Club on Links Here Sunday Afternoon

NEGRO SLAYER IS LYNCHED ON CENTER SQUARE

CENTER, Texas, May 21.—Buddie Evans, negro, was lynched on the public square here this morning upon being brought there from Timpson by Sheriff Burns. Evans was accused of slugging John Wheeler, prominent Timpson farmer, May 12. Wheeler died May 17. The negro was first jailed there and then transferred to San Augustine, where he slugged the jailer and escaped. He was recaptured in Timpson early today.

After suffering two defeats at the hands of the Albany Country club golfers, Cisco came to life and defeated the Gorman club Sunday afternoon on the Cisco course by winning six matches of the seven played.

The course was in very good condition considering the hard rains that have fallen the past few days. Other than the fairways being slow and the traps filled with water, no trouble was encountered. The greens withstood the rains in fine shape.

The result of the matches Sunday follow: Jeff Duncan, Cisco, defeated C. H. Grow, of Gorman, nine up and eight to play; Jack Kelly defeated Alex Phillips five up and three; G. M. Simpson defeated R. J. Wolge two up; J. P. Goyen defeated C. R. Wood one up; Chapman Williamson lost to T. E. Richardson four up and three; G. B. Kelly defeated H. Wood four up and two; W. W. Moore defeated D. Reeves one up.

THROW AWAY YOUR FISH POLE; 24 POUND CAT FOUND IN CROSS PLAINS PUDDLE

CROSS PLAINS, Texas, May 21.—Here's another fish story. Heavy rains for the past week have caused a tank on W. M. Franke's farm three miles southwest of here to overflow. Saturday morning as C. S. Burris, gauger for the Humble Pipe Line Company, was passing below the tank on his way to the field, he noticed something moving about in a large puddle of water in the road. Upon examination he discovered a large yellow cat-fish which had evidently been washed from the tank above. The fish was brought to town and registered 24 pounds on good reliable scales. Mr. Franke allows no fishing in his tank and says that this is only one of a number of large fish that he knows to be in there.

powers to have anything to do with the Nationalists. Now, in the Nationalists' progress toward complete domination of China, it seems particularly good policy to treat them courteously. They offer the best hope in sight of enabling the western powers to deal with an authority speaking for all China. They also offer, in the eyes of western liberals, a wholesome breaking away from the inveterate reaction of Peking, and promise of modern political and economic development.

Even railroads have some rights, and every right-thinking citizen should refrain from grudging them the verdicts they get against automobile drivers who insist on ramming their locomotives.

ENGLISH ANTIQUES

Two centuries ago, an English art lover reminds his countrymen, English collectors used to tour the continent picking up gems of art. Now they have almost stopped that practice, and Americans have taken it up. The worst of it is that Americans also come and carry off native English art treasured for its historic and artistic value. "We do not mind," he says, "the Americans having a certain number of our treasures, because we have so many; but things are going too far. American antique furnishing and collecting is the fashion. It is time a similar note was established in England. To that end, the Antique Dealers' Association of Great Britain is starting a campaign to keep works of art in England and develop English appreciation of old furniture, tapestries, etc. This attitude is natural on the part of British antique dealers and fanciers. But they are fighting against tendencies even more natural. America, being new, and having great wealth, wants antiques and buys them. England, being old and less wealthy, naturally sells them. America needs old things, and England needs modern things.

General Motors has broken all records for April sales. Same old story—they won't walk.

FISHING BY RADIO

The Canadian Department of Marine and Fisheries, which broadcasts weather conditions for fishermen, announced recently that it intends soon "to broadcast also time signals, bait and ice conditions." This service is intended primarily for commercial fishermen, but it might be adapted to fishing as a sport. Some enterprising sporting equipment house might put on the market a tiny radio receiver that could be carried in the fisherman's tackle box. When ready for operations, he could then set it up, connected with a flashlight battery, using a metal fishing rod for an aerial, and get from headquarters the latest dope on how and where the fish were biting, and what bait they preferred. The time signals, though, would be of little use. What does the amateur fisherman care about time?

IMPEDIMENTA

Nancy Ann Miller of Seattle that was, now Maharane of Indore, is at Paris again with her dusky lord and master, having arrived with 205 trunks and a retinue of nine persons. Americans who have traveled in Europe will say unhesitatingly that nine servants are none too many to take care of 205 trunks, not to mention rendering any other service. That situation, though, grows horribly on an ordinary humble American. Who would want to go touring with 205 trunks and nine flunkies? Count 'em and vision 'em as you're going to sleep, if you dare run the risk of nightmare. Well did the ancient Romans use the word "impedimenta"—impediments—for baggage. Grandeur comes at a heavy price. Poor Nancy Ann may soon think wistfully of the days when she traveled carefree with one suitcase.

WATER ROADS

"A river," says Trader Horn, "is nature's idea of a road." It is man's idea of a road, too, in primitive, pioneer life. Wherever there are navigable rivers, they facilitate the opening up of the country. They carry its freight and people. They bring it from savagery and poverty to civilization and wealth. It was so in this country, as all who are familiar with our history and traditions know. Then came the railroads, and seemed an improvement, because they ran where rivers did not, and over them traffic moved faster. In our enthusiasm for steel roads we neglected our water roads. Now the trend is back to water, for heavy traffic. The great government enterprise for safeguarding and developing the Mississippi brings new realizations that that river is naturally the most valuable highway system in America. It will be restored to usefulness matching that of another magnificent water highway, the Great Lakes-St. Lawrence system. And as these develop, others will be re-opened, all together serving 200,000,000 people as they once served a few thousands.

The number of men in public life who are steadfastly wet-and-dry grows every day.

TRAIN-PLANE TRAFFIC

The railroads are progressive and far-sighted in hooking up with airplanes so early in the game. A notable beginning will be made this year, with the opening of a transcontinental train-plane trunk line from New York to Los Angeles. The running time will be cut in half—from four days to two. Passengers will ride in the airplanes by day and the train by night. Tickets for the through trip will be bought at the railroad offices. The cost is expected to be about double that of an all-rail trip. The biggest, most modern planes will be used. This service will be extended as rapidly as possible, establishing feeder lines for the trunk line, and creating new trunk lines as they are needed. It will be observed that this plan merely co-ordinates traffic facilities already existing—there is no new element in it except that the railroads start working in cooperation with the air lines. It will be a natural development a little later on for the railroads to take over the air branches of the new system altogether, as they have done in many cases with motor bus lines. Some railroad systems have been looking ahead to air expansion for several years. Air rights were included, for instance, by the Van Sweringen in the charter of the Nickle Plate when they first planned their new trunk system.

RUSSIAN MENACE IN CHINA

Russian meddling is reported in China again. Japan officials, who maintain that the hostilities in Shantung were started by Chinese Nationalists firing on Japanese troops, say the Chinese were incited thereto by Communist emissaries from Moscow. Whether that is true or not, Moscow would love to mix in the game in that fashion. Reports from Geneva indicate that League of Nations officials are quite aware of that fact, and are keeping an eye on Communist activities. They are showing more consideration to the Nationalists, realizing that coldness to them at this time may throw them again into the arms of Russia. This is a hopeful turn. The red menace in China a year ago came largely from refusal of western

Ranger Wins District Convention of American Legion

Mineral Wells and Brownwood are Defeated; Breckenridge Leader Endorsed for State Commandership

BRECKENRIDGE, May 21.—The district convention of the American Legion will be held in Ranger. That city won the honor at the closing session Sunday of the two day convention of legionnaires held here. Mineral Wells and Brownwood both sought the next meeting but the Eastland county town won on the second ballot.

The convention opened Saturday night with a dance on the roof garden of the Burch hotel and a Forty and Eight society celebration. It came to a close with a business meeting Sunday afternoon, at which endorsed Ben J. Dean, commander of the local post, for state commandership.

At the Sunday morning services at the First Christian church, Dr. W. Hunt of Abilene addressed the delegates. Following a lunch at the Y. M. C. A., the business session was held.

The principal address before the

business meeting was by Ross Cole, department adjutant, who urged the members to advocate the location of a veterans' hospital in Texas, and an initiation fee for legion membership to prevent loss of members, and the use of discretion on the part of posts in assisting ex-service men who are professional "floaters." He also presented the local post with a citation from the national commander for its record in obtaining more members than their quota. This is the only citation of this kind presented to a post in Texas.

Mrs. Mollie Wright Armstrong urged the legionnaires to assist the auxiliary in increasing its membership.

Coleman won the right to keep the silver trophy until the next meeting by having the largest man mileage. Cross Plains was second and Brownwood third.

Miles of wires interlace the building, forming the most intricate alarm system in the world. Many new and secret devices which will not be used in any other building, have also been installed.

The bank is now the finest structure in the British Empire and is calculated to last 1,500 years.

BUSTLE BOW BACK AMONG "REVIVALS"

By ALICE LANGELEIR
International News Service Staff
Correspondent.

PARIS, May 21.—The bustle bow is back again to join with many other "revivals" of the season. Of course it really is not the old bustle of fifty years ago, but falling draperies behind in an enormous bow or large fan of the material at the back which, except for the fact that it is no longer awkward and cumbersome, takes one back to the days of 1870.

There is also the revival of the tucked-in blouse, a fashion which, when the jumper appeared on the horizon, fair women vowed they found it untidy and uncomfortable and were certain it meant the return of the pinched-in waist and the wearing of the corset.

But it has come back, and no one has ever thought of suggesting a corset and scarcely even the normal waist-line. It strikes a new note especially when the skirt mounts over the blouse in a diagonal line as seen on one of Rasmus' new models. It is sufficient old to seem quite new and fresh, but will probably be most popular with the young and slim.

Trains are another revival, mere phantoms of the great "floor-sweepers" of other days, but trains just the same. Worth puts two pointed ones on a charming evening gown of old fashioned flowered silk in red, yellow and green. It has a high bodice and intricately tiered skirt.

On soft chiffons and tulle the train is merely a long end which touches the floor at the back or side.

DOUG FAIRBANKS WINS AUDIENCE IN "GAUCHO"

Douglas Fairbanks again "rang the bell" with his new United Artists production, Douglas Fairbanks as the Gauchito, which opened at the Palace Theatre last Sunday. Romance, tense action, originality of treatment and captivating humor characterize the story of the South American border.

The star appears as a Robin Hood of the pampas, the dauntless cap-

FENCE MOVING PROGRESSING ON HIGHWAY 67

GORMAN, May 21.—The county has put two crews of men at work on moving the fences back on the highway from Carbon to Gorman and they are making a good showing on the work. Many of the farmers since the rains have contracted to do their own moving with the county and it will not be long until this section of the road will be completed. Where the fences have been moved the road already looks better and where the wider surface and shoulder is put on by the highway department the road will look to be a real highway.

Several knots have been run into on the work that will have to be straightened out before actual construction starts and some of them will give a little trouble likely. However most landholders want to do what is right and they will do it when the parties concerned get together. It will not be long, is the hope of most of this section, before the work of actual construction starts.

Excuse Us, Please

Heart of British Safecracker Can Be Broken Quicker than Vaults of Bank of England Costing \$25,000,000

LONDON, May 21.—The newly built Bank of England vaults, estimated at a cost of \$25,000,000 will be no "heartbreak house for cracksmen."

Pressure on one button will flood the bank; doors will weigh 18 tons, and yet a child could move them; and there will be miles of electric alarm wires.

While the business of the bank as been carried on as usual for the last three years, fifty vaults have been made surrounded by walls 50 feet deep and eight feet thick, such as the provision for safety that it would take 100 cracksmen a year to get into the main vault—even if there were no guards of vaults.

The main vault lies 50 feet below the ground. It is a room 40 feet square, with ten tons of dynamite and modern oxy-acetylene apparatus could not penetrate.

Strong Guards

The entrance to the vaults is stationed in "bogy-holes" at various points of vantage, and so delicate are the alarms that a glove or pocketbook dropped in a most unlikely spot would stir half a dozen electric bells into activity.

The first obstacle to be overcome in obtaining entrance to the vaults is the penetration of a wall of solid concrete fifty feet deep and eight feet thick, each large block "keyed" to the other. Beyond this great wall is a long dark winding passage and zigzagging down it every few yards are "alarm spots" connected with bells.

Then there is a double door of steel grills—two-inch bars of the finest steel, two inches apart.

No key will open these defenses. They are worked electrically and the cracksmen who penetrates the 50 foot wall would find himself with a full day's work here. Even now the secret of the main vault remains intact. Here are two huge steel doors, riddled with keyholes—each door weighing 18 tons. So finely balanced are the blocks of steel that a child could move them with ease. They respond to the touch of a little finger—when unlocked.

When the massive locks and bolts are shot home dynamite enough to wreck the whole building would have to be used in order to burst them.

Beyond is what is to be the treasure house of the nation, and the person who puts one foot inside it will immediately summon two detectives.

Tunnel Defense

The remaining forty-nine vaults are on the second and third floors. On the second floor has been con-

Grenfell's Dream of Labrador Hospitals Is Now Realization

Sir Wilfred Grenfell, upper left, doctor and missionary, has endeared himself to the natives of Labrador by his work in their behalf. "It won't hurt" Dr. Carl Ederbach, University of Michigan dentist, upper right, is assuring one of the many patients who come to the hospital ship. At the lower left are three of the small charges of the orphanage maintained by the Sir Wilfred at St. Anthony Island. The tiny Eskimo tot in the lower right is one of the thousands of Eskimo children whose physical welfare is looked after by the doctors of the hospital ship that travels through the islands in the frozen north.

find out - what makes the MAYTAG so popular!

PHONE for a New Maytag. Do your next washing with it. Find out why this "new-day" washer has sold itself to over a million homes. If it doesn't sell itself to you, don't keep it.

FIND out how to have easier washdays, how to make your hardest household task easy and pleasant. Let the New Maytag do your next washing FREE. It will take only an hour or so, and you will discover real washday happiness.

Find out how the Maytag washes everything clean without hand-rubbing, even grimy work-clothes. It is speed and thoroughness which won world leadership for the Maytag.

Find out why the big, roomy, cast-aluminum tub holds an unusual amount of clothes, and how convenient it is to be able to take clothes out or put them in with the washer running.

Find out about all the features recently introduced with the New Maytag—its quiet, smooth-running, steel-cut gears, the "power-leg" drive, the neat, durable, lacquer finish, and the marvelous soft Roller Water Remover. This exclusive Maytag feature is the latest, safest, handiest and most efficient method of soap and water removal.

- Why the NEW MAYTAG leads the World**
- Automatic-feed. Soft Roller Water Remover, which swings to seven positions and reverses. Does not crush buttons and has instant tension release which is the utmost in safety.
 - Non-breakable, heat-retaining, life-lasting, cast-aluminum tub which cleans and empties itself.
 - Quiet power-drive with precision-cut steel gears.
 - A week's washing done in an hour.
 - Tubfuls washed in 7 to 7 minutes.
 - No hand-rubbing—even of cuffs and collars.
 - Adjustable legs which raise or lower the tub to your height.
 - Hinged cover which forms handy shelf when open.
 - Beautiful lacquer finish, sanitary and enduring.
 - Lifetime washing service—the Maytag is the most durable washer made.
- One out of every three washers sold is a Maytag.

Maytag Aluminum Washer

Big Opportunity Is Offered Workers

Chance is Continued to Gain Total of 1,500,000 Points Through Club of \$10; Many Good Prizes at Stake

The country-wide subscription drive for the Cisco Daily News and the Weekly American and Roundup offered the greatest opportunity to the ladies who have been selected to conduct the drive to earn thirty valuable prizes besides cash awards for their cooperation and efforts at their spare time.

While many nominations have been made, with quite a number who have accepted the nomination, there were only a very few who made up a portion of their first \$10 Club and but few have started actual work in the drive.

The opportunity is wide open to own one of the Chevrolet cars, the Viva-Tonal Columbia, the Atwater Kent Radio, four splendid scholarships, wrist watches, strings of pearls, choice of ladies' hats from the Sport Shoppe, two Lobo season tickets, two one-year season tickets to the Palace or Ideal theater, two photographic portraits, done in oil by Walton, two large cameras, carving and kitchen sets, besides the cash to be given to those who do not get a prize.

This is the last week for nominations and there are only five more short weeks until the drive will close and the awards will be made. With so many taking part in the drive the opportunity to own one of the better prizes, for a small number of subscriptions, will perhaps never be presented again. This kind of a chance does not come along every day.

The workers who finish up the \$10 Club this week will be awarded 1,500,000 extra points besides the regular points for each subscription. Get up a club and get a good lead of points.

This is political year—election of officers, nationally, besides state election. The Cisco Daily News with the American and Roundup, at \$1.50 a year is going to be a big seller. Every home in the Cisco country should have this paper.

The points for coupons count in the same way as the points for subscriptions and the most points win and not the most subscriptions in this drive.

Texas Drys May Put Morris Sheppard Against Smith

Opponents of New York Governor May Get Behind Senator Author of 18th Amendment as Counter Move

BEAUMONT, May 21.—The ultra-dry bitter anti-Smith group leaders seriously discussed Sunday the alignment of their forces behind United States Senator Morris Sheppard as Texas' favorite son candidate for president.

Developments here Sunday indicate strongly that the ultra-dry leaders have agreed to seek instructions for Sheppard at the state convention, although State Senator Thomas B. Love of Dallas said it is by no means certain the Texas for Sheppard plan will be adopted. The name of Sheppard, senior senator from Texas and author of the eighteenth amendment, will be presented to the caucus of the constitutional Democrats on Monday night, it is understood, and if ultra-dry delegates, led by Love, accept the decision of the leaders, his name will go before the state convention with their backing.

Love, former State Senator V. A. Collins of Dallas, chairman of the constitutional Democrats; Marshall Hicks and Frank C. Davis of San Antonio and former Governor O. B. Colquitt of Dallas were in conference practically all day Sunday in Love's rooms at the La Salle hotel.

May Quit Negative Fight
The fight of the anti-Smith faction has been solely against Al Smith up to the present time. Love and other leaders of the anti-Smith move are said to have agreed Sunday that their negative fight and lack of a candidate to shout for has been a glaring weakness. The decision to make Senator Sheppard their standard bearer is intended to remedy that defect in their armor of combat and defense.

In seeking instructions for Sheppard, if that is done, the opposition to Al Smith will not be lessened in the least, Love said. "The question is whether the Texas delegation will be solidly anti-Smith or whether Al Smith delegates will be permitted on the delegation from congressional districts controlled by Smith delegates," Love said. "If we win, there will be no Smith men on the delegation. If the harmony Democrats win, there will be a sizable number of Smith men going to Houston, and these Smith delegates, by shouting and cheering for Smith at Houston, will be aiding him just as effectively as if they were voting for him."

Another Bid to Moody
At the same time that Morris Sheppard was tentatively picked as the national standard bearer of the Texas anti-Smith group, the decision was reached to make another bid to Moody and the harmony Democrats to join with the ultra-drys. This invitation was addressed to Lynch Davidson of Houston, chairman of the Democrats of Texas, by Collins, head of the constitutional Democrats. The formal statement did not mention the Sheppard plan.

The reaction of Governor Dan

Moody and his followers to the Sheppard instructions move is holding the interest of delegates Sunday night, as the news of the latest Love move became known among the early arrivals. Reports were current that Love proposed Sheppard to Moody some time ago and that Moody did not look with favor on the plan to select the senator for a favorite son candidate. Unwillingness to offer Jesse H. Jones of Houston was said to have entered into Moody's objection to the plan.

Talk of Jesse Jones There was another report circulating among the delegates Sunday to the effect that Jesse Jones will be offered by the Moody harmony Democrats as their candidate for temporary chairman, instead of Milton Blalock of Marshall or W. A. Tarver of Corsicana.

Core Johnson of Tyler is the choice of the ultra-drys for temporary chairman, but his physical condition may cause him to decline the honor of being nominated. Johnson is expected here Monday, when it will be definitely decided whether he will be presented for temporary chairman. Frank Davis or Marshall Hicks are considered likely timber if Johnson is unavailable.

The tenseness of the Texas political situation was plainly evident as delegates assembled here Sunday for preliminary conferences and for the state committee meeting and the factional caucuses Monday, the day before the main convention starts.

While Governor Moody, leader of the harmony democrats, spent most of the day in Houston conferring with his adherents, Senator Love of Dallas and his cohorts drew up their plans of battle on the actual fighting ground. Love has been here since Saturday.

TOM MASHBURN BUYS RANCH IN ERATH COUNTY

Tom Mashburn, who recently purchased a 1,400 acre ranch near Alexander, Erath county, moved 100 cows from his ranch north of Cisco Friday to his new possession. This ranch has just been acquired by Mashburn, and is said to be one of the nicest little ranches in this part of Texas. It was acquired at a bargain, so it is reported, and it is also said that Mashburn has been offered \$2 per acre profit on his investment. The deal was made through J. W. Triplitt, of Cisco, and R. H. Skipp, of Stephenville. Consideration was not announced.

AMERICAN LEAGUE.
Washington at Philadelphia.
Boston at New York.
(Only games scheduled.)

THESE TWO HOPE TO FIGHT FOR LIGHTWEIGHT CROWN

West Texas isn't the only part of the country that has been having rain lately. Sammy Mandell, lightweight champion, and Jimmy McLarin, challenger, have been trying to get together in New York City since last Thursday night. Tex Rickard, promoter, postponed the bout until Friday night, then until Saturday and again until Monday night because of rain. Although champions as a rule are always favored to win, this fight is an exception as the Irish lad is conceded an even chance to whip the champion.

ANOTHER GREAT BIG SHOW Engagement Extraordinary!

MAY 27-28-29 3-DAYS-

THE GREATEST SCREEN ACHIEVEMENT IN YEARS

Supported by Molly O'Day and Mathew Betz

Fires of youth and courage that will set your heart ablaze! The love romance that Broadway held dear to its heart for four months! It's here at last!

He couldn't understand his "Caucasian" his Country. Life itself—Things moved too fast—Now he couldn't even understand himself. An unforgettable drama of a supreme love—tremendous spectacle—hilarious comedy.

MAKE A DATE "The Patent Leather Kid" You Will Never Forget Him

On Scratches or Skin Abrasions —an antiseptic should be used to prevent infection, insure quick healing. Therefore, remember to Use BOROZONE at Once!

Borozone Liquid, a powerful antiseptic, cleanses cuts and wounds and kills germs... Borozone Powder applied after the liquid, hastens healing. Keep both handy.

Sold By Tomlin-Young Drug Co.

Furniture

We want you to see our new furniture now being displayed. New goods arriving daily, which is making our stock very complete—Everything for the home. We think you will find our prices very satisfactory and cover a range that will fit any purse.

We ask that you call and let us show you all the new numbers.

Cisco Furniture Co. "Your Home Should Come First"

BANKHEAD - Feed Mill -

A HOME INSTITUTION OWNED BY HOME PEOPLE

Just moved into our own new quarters in the twelve hundred block on Main street, opposite the Moss gin. We have a complete line of poultry, hog, stock and dairy feeds, made from home grown grains from the farms of Eastland county. We grind your poultry feed according to any formula you may desire.

Money Spent at Home Remains at Home to Circulate Among Home People

Money sent away from home will be a long time in getting back to you again.

We invite you to see us at our new home. We think you will like our service, once you have tried us.
