SMITH-HARMONYITES IN SADDLE

TEXAS APPROPRIATIONS.—Texas fared well in the second deficiency appropriation bill passed by the National House of Representatives, and will receive an immediate appropriation of \$267,000 on seven projects including five public buildings, which will cost when completed \$1,730,000. Public buildings at El Paso, Lubbock and Taylor get \$50,000 each; the Beaumont postoffice, which will ultimately cost in excess of \$200,000, gets \$40,000; Galveston Marine Hospital, to cost completed \$740,000, gets \$100,000; the Galveston Quarantine Station, \$37,000; and the Alabama and Couchatta Indians in Polk county, get \$40,000 for buying lands and equipment.

UNIVERSITY WITHOUT DEBT.—It is a bit unusual to hear of a church school that is not in debt. In fact, an indebtedness seems to be the best asset of some church schools, for it does not allow the school to be forgotten and keeps the church hard at work to keep the school running, and hard work is good for any church membership. Texas Christian University at Fort Worth announces that its property is worth \$2,000,000, that it does not owe anything and that it has been promised \$167,000 by the General Education Board of New York.

SOUTH TEXAS TRANSPORTATION.—The report of Edwin Jadin, chief of the United States Army engineers, on the Point Isabel project is encouraging. Covering every phase of the proposed construction, the report says: "There has been in recent years in the territory directly tributary to the Brazos Island harbor an enormous development. Further extension of the cultivated areas and increased development seem assured. The high cost of rail shipment to Eastern markets is a severe handicap to the Rio Grande valley. The benefits which would result from water shipments would be large and of considerable general interest." Approximately \$1,000,000 was cut from the original estimate of cost of the project, but it is estimated that the maintenance would cost \$50,000 a year more than at first thought. The project now seems well assured.

INTRODUCING TUNG NUT.—A San Benito real estate man has been making an investigation and has decided that the tung nut, a Chinese nut from which oil is extracted for paints and varnishes, is adaptable to the soil and climate of the Lower Rio Grande Valley. The trees grow in China under conditions very much like those in the Rio Grande valley section, and about 500,000 trees are now growing in Florida under very similar conditions. The nuts are to be planted and given a trial in the belief that a new industry will be added.

POPULAR INDOOR SPORT.—Just now banqueting and toasting Jesse H. Jones has become the popular indoor sport in Texas. Mr. Jones is much in the limelight. It is admitted that he brought the National Democratic Convention to Texas. He has prospered—probably beyond any other Texan of the day. He is a city builder. More than that of any one else, his influence will be felt in shaping the proposed Texas Centennial and in determining its location or locations and its scope. For these reasons and because he has an admirable personality aside from his great influence, cities are wanting Jones to visit them, more than that he may look them over than that he may be looked at. San Antonio is asking for a date with him, and Austin has intimated that it would like to see him at his convenience.

AUSTIN'S BOND ISSUE.—Austin has awakened from its sleep. Perhaps it is more correct to say that Austin was aroused from its coma several years ago, but has suffered from a disposition to relapse and is now overcoming that lethargic feeling. Austin has voted bond issues totaling \$4,250,000, of which nearly half is for street improvements. Parks and playgrounds get \$700,000 and the remainder goes to various things needed, including schools, public library, hospital, abattoir, sewers, airport—ten projects in all. Austin has too long depended on nature and the state of Texas to look after its welfare, but has decided to try to do something for itself. The capital city now bids fair to become the pride of the state—the most beautiful of all Southern cities.

GREAT SULPHUR FIELD.—Texas now produces nearly all of the sulphur of the country. President H. A. Meyer of the Pathfinder Oil Co. says that the Wharton county proven minimum of 7,000,000 tons will more likely be 15,000,000 or 20,000,000 tons and that oil will likely be produced around the sulphur dome. Wharton county is also rich in rice, cotton and other farm productions.

POLA THROUGH WITH THE MOVIES

Pola Negri, temperamental Polish flicker favorite, who failed to repeat her European film triumphs when transplanted to the esthetic surroundings of Hollywood—who, in the terse language of the cinematographer, "did a flop"—has packed up, closed her coast home, and with her husband, Prince Mdivani, has left for the more hospitable climes of her native land.

MORAN WOMAN IS INJURED BY WILD DRIVER

Mrs. J. S. Dennis of Moran is a patient in the Graham sanitarium where she is being treated for injuries sustained Monday afternoon when the Ford car in which she and Dennis and a Mrs. Jones, all of Moran, were returning home from Cisco. The accident occurred on the Dotlan road, east of the Herrell farm. Mrs. Dennis received an ugly gash on the side of her face, and one arm was broken when the car left the highway, going into the ditch. The other occupants of the car were not seriously injured. L. B. Campbell, of Abilene, with the West Texas chamber of commerce, arrived on the scene soon after the accident, and brought Mr. and Mrs. Dennis to the hospital. Dennis told Campbell that another car whipped around in front in passing, struck his car, knocking one wheel off, and throwing his car into the ditch, where it turned over and went through the fence. The driver of the car did not stop to render aid. Two other cars were at the scene when Campbell arrived. Campbell said that a car passed him near the Harrell crossing, on the Texas & Pacific road, going at a high rate of speed, forcing him to drive on the gravel to avoid being struck. It was reported at the hospital at noon today that Mrs. Dennis' injuries were not serious.

PRESBYTERIAN CHURCHMEN TO STUDY DIVORCE

ATLANTA, Ga., May 22.—Montreat, N. C. was selected Monday as the place for the next meeting of the general assembly of the Presbyterian church in the United States. The assembly also adopted an overture, submitted by the Atlanta Presbytery, reaffirming the position of the church on the advisability of arbitration for settlement of international disputes and disapproval of war. An element of surprise was injected by the adoption without debate of the report of the committee on bills and overtures declining to recommend that the church withdraw from the Federal Council of Churches of America. Last year the same proposition was debated for more than an hour and the church remained in the council by a margin of only one vote. The ad interim committee to study the whole subject of divorce, after the adoption of a joint overture which declared that the number of divorces had increased threefold in the last forty years, which "combined with new interpretations of the marriage relation, brought a threat of still more extensive breaking down of all that is holy in marriage and family relationship." The overture, which was presented by the Presbyterians of West Texas, Central Texas, Mangum, Ok., and New Orleans, asked that the whole subject be studied "most carefully, and especially those phases of it and those passages of scripture which are claimed to warrant divorce on grounds of desertion." It pointed out that there is a great diversity of opinion as to the matter of proper grounds for divorce and that there has been a "rapidly growing resort to provisions recognized in both church and state for divorce on grounds of desertion." The overture added that reproach had been brought upon the church because ministers solemnized marriages between persons who had been divorced on that ground.

Dean Named Chairman of State Democratic Convention by Huge Majority Over Constitutionalist

BEAUMONT, May 22.—Clicking beautifully, the Smith-harmony combination smothered the opposition at the state Democratic convention in Beaumont's new auditorium and elected former Senator W. L. Dean, Huntsville, temporary chairman this afternoon on the first ballot. The vote was: Dean, 573 5-9; Collins, 189 2-3; Berry, 16 1-2. Former Senator W. L. Dean, Volstead supporter, was proposed for temporary chairman by the harmony group. The constitutionalists offered V. A. Collins and former Governor Jim Ferguson sprang a surprise by offering E. A. Berry of Houston. Ferguson was indignant because of the Smith supporters joining the Moodyites in support of Dean. John Boyle, Smith leader of San Antonio, jumped up when Ferguson proposed Berry and demanded that he "didn't want Governor Smith's candidacy foisted by either Tom Ball or Jim Ferguson." Boyle seconded Dean's nomination and a Smith-harmony demonstration followed. George Paul, Dwight Lewellen and Frank C. Davis all nominated speeches seconding Collins' nomination and were backed by Smith adherents. The convention was almost out of hand until Tom Ball of Houston moved a rollcall on the candidates for temporary chairman. The tone of the convention indicated a close union of the Smith and harmony groups against the constitutionalists. Congressional districts in which Smith delegates are in a majority will be permitted to select their own delegates, it appears. Governor Moody has consistently denied that he is party to any agreement along these lines, but the Smith leaders admit that they expect to have Smith men on the delegation. Their claims are that at least ten delegates will be for Al Smith. Reports also were current that the unit rule will be abandoned. Governor Moody has expressed the opinion in many times, however, that the unit rule should be enforced. Senator Tom Love of Dallas was indignant over the action of the state executive committee in seating consulting delegates from Wichita county favorable to Al Smith. He branded the committee's act "rank thievery" and said that Governor Moody should do all in his power to correct the committee's action. Contests were filed in Brazos, Camp, Grayson, Limestone, Mitchell, Palo Pinto, San Patricio, Shackelford, Smith and Wilcox counties. It was said that pledges were not taken in Brazos, Grayson, Camp, Mitchell, San Patricio and Shackelford counties.

EMPLOYMENT

Employment figures vary. It is impossible to be complete and accurate. There is no way of telling how many are idle because they want to be. But the big fact emerging from every employment inquiry lately is that the situation is not bad. The National Association of Manufacturers, with returns from more than 1,000 representative firms throughout the country has found a little more employment than there was a year ago.

The ease with which municipal and state bonds can be sold makes it reasonably sure that there will be no unemployment during the summer, because all those who want work can find it on roads and in public improvements that are in process of construction or authorized.

As for the menace of a "presidential year," few intelligent observers take that seriously any more. The general view is that the national campaign will have little effect on business, one way or the other.

WET REMINDERS

A writer in the current issue of The Survey has a suggestion for American tourists abroad. It is particularly recommended to "people whose memory does not go back to the days of the saloon in this country. The suggestion is to turn from museums and cathedrals and literary shrines and to stand for a while on a street corner in a populous section in any or all of the great capitals of Europe, simply watching the life that goes on in the neighborhood.

TOO MANY FARMERS

Prof. C. T. Dowell, of the Agricultural and Mechanical College of Oklahoma, is not at all worried by the trek from farm to city. Our land policy has always been wrong, he says. We have had too many acres under plow. With better means of production, our food supplies and other agricultural products have outrun the growth of population.

PLENTY OF NEWS

There surely is no reason for anyone to find the news dull or monotonous. For a while there were people who complained that there was nothing in the papers but crime news. Of course they were wrong. There was a vast amount of other news which the critics missed because they were so busy reading the crime stuff.

Arctic explorations. The public gives impartial attention to anything and everything. It's a lively old world, with enough constructive, good things going on to justify faith in spite of the occasional bad things and the numerous foolish things.

THE FREIGHT IMMIGRANT

The immigration department, sometimes accused of official inhumanity in its treatment of immigrants, is turning humane. John Thoenig of Duesseldorf, being a thrifty soul, had himself shipped to America as "household goods." As freight, he could come cheaper than as a human being.

Reed Flays Hoover for Wartime Policies and Attitude on Farm Goods; Calls Him "Englishman"

WASHINGTON, May 22.—Secretary Hoover was the target of a round of fire in the senate Monday. Reed, Democrat, Missouri, denounced his war-time control of grains as food administrator; Bleese, Democrat, of South Carolina, criticized him for permitting negroes and whites to work together in government bureaus, and Norbeck, Republican, of South Dakota, inserted in the record a newspaper editorial condemning his attitude toward agriculture.

Senator Reed, who is a candidate for the Democratic presidential nomination, repeated his charge that Hoover was responsible for the fixing of the price of wheat during the war. Reed was speaking for his expert debenture farm relief plan as an amendment to the tax reduction bill.

Hoover Called Englishman The Missouriian said Hoover had resided in England for 20 years and now has the "temerity to offer himself as a presidential candidate."

Recalling the war-time plea for the farmers to plant more wheat, Reed said they had responded to such an extent that the necessity of a fair price guaranty became apparent.

"At that point," he continued, "President Wilson stepped in and called to this country—at the suggestion, I understand, of Colonel House and Lord Balfour and other English statesmen—Herbert Hoover who had gained a reputation in Belgium."

Secretary Blamed Reed ascribed to Hoover the plan early in the war for European countries to control wheat prices by

combining and refusing to buy and declared congress had refused to accept a plan devised by Hoover to further that end. The Missouriian then sketched the wartime anti-hoarding act and contended that this had been illegally abused by Hoover as food administrator, so that \$2.20 was set as the wheat price for both domestic and foreign markets. This was described as an "act of usurpation, willfully and deliberately entered upon and consistently pursued."

"Hoover ordered the dealers not to pay more than \$2.20 for wheat," Reed said, "and thus made it impossible for the farmers to sell for more than \$2.20. That left only one other place to sell, in the export market. But the Export Grain Corporation was formed, with Julius Barnes at its head. This was completely dominated by Hoover. It was made impossible by law for any other agency to export wheat and Hoover arbitrarily fixed the export price there also at \$2.20."

MISS EZZELL TO REMAIN AT HEAD OF HOSPITAL RANGER, May 22.—Miss Fleeta Ezzell, superintendent of the City-County hospital, who recently tendered her resignation to the board of trustees of the institution, has been retained as superintendent. An increase in salary was given Miss Ezzell and her resignation was not accepted.

Coolidge Signs Bill for \$5,000,000 to Fight Cotton Pest

Farmers in Non-Cotton Zones to Be Compensated in Eradication of Pink Bollworm in West Texas Area

WASHINGTON, May 21.—President Coolidge has signed the Senate joint resolution by Senator Ransdell of Louisiana, authorizing the federal appropriation of \$5,000,000 to be used in paying compensation to farmers in the eradication of the cotton pink bollworm throughout non-cotton zones. The Ransdell resolution is a duplicate of that by Congressman James P. Buchanan and reported by the house agricultural committee.

Also, Senator Sheppard of Texas has introduced an amendment to the second deficiency appropriation bill appropriating the full amount for the purpose indicated in the resolution, which had been recommended by the bureau of the budget. Where non-cotton zones are established to fight the bollworm, in connection with 1928 crop, the federal government pays the entire compensation to farmers, but thereafter eradication by that means will call for half of the cost being appropriated by the states in which the pink bollworm is found.

Approval Required
The legislation was brought about by discovery of the dead specimen of the worm in the West Texas cotton area. Scientists of the federal and state governments will not be able to determine whether the live worm is in the cotton fields until the crop is further advanced. Establishment of non-cotton zones, that is establishment of a restricted area in which no cotton culture is permitted, is under terms of the Texas law, which also sets up machinery for assessing the damages to farmers by reason of the process, and all damage claims require the approval of the secretary of agriculture in Washington before being paid.

Under an amendment to the resolution offered by Congressman Jones of Texas the federal fund can not be used for paying compensation in connection with the establishment of a non-cotton zone in any county unless and until the live pink worm is found within a radius of five miles.

Zone Already Established.
The state of Texas, through its pink bollworm commission, has already established the non-cotton

zone in Brewster county, where the worm has been for several years. Compensation to those farmers will be from the fund which this congress will appropriate.

Scientists have agreed that the establishment of non-cotton zones is the only method by which this pest can be eradicated, and have the record of the Trinity Bay section in Southeast Texas in support of the claim, it being the only instance where an agricultural pest has been eradicated completely. When the boll weevil first appeared in Texas from over the Mexican border the United States department of agriculture refused to approve the establishment of non-cotton zones to eradicate that pest, although it was urged at the time. Had this been done belief is that the boll weevil would have been kept out of American cotton.

SMITH'S FUND IN CAROLINA ONLY \$3,500

RALEIGH, N. C., May 22.—Trailing reports of a slush fund for Alfred E. Smith in North Carolina, a senate campaign fund subcommittee was unable to uncover Monday only \$3,500 expenditures in this state on behalf of the presidential candidacy of the New York governor.

George Gordon Battle, New York lawyer and native of North Carolina, contributed \$2,500 of this sum, the senate investigators—Steiner, Republican, Oregon and Bratton, Democrat, New Mexico—were told. The remainder was raised locally. A number of the witnesses assailed Senator Hefflin of Alabama for his attacks on Governor Smith in the senate and several indicated their belief that he had furnished the information which led the subcommittee to visit Raleigh. They were assured that they were in error.

Circulation Drive Interest Spreading

Last Week for Workers to Enter; Participants Are Amassing Points But Race Is Still Open to Anyone

Interest in the Cisco Daily News and the Weekly American and Roundup Countrywide Subscription Drive is fast spreading into all the towns and rural districts in the Cisco territory.

The keen interest in District One, which is made up of the workers who reside in the surrounding towns is best shown by the number of points each one of the nominees has received up to this time.

The work of securing names for sample copies and taking subscriptions is being waged in this district for the week.

The readers of both papers are saving the coupons and will no doubt renew their subscription, some of them during the week.

This is the last week for nomination and there is yet plenty of time to enter the drive and get an even start by securing a \$10 club made up of three months to the Daily News with the Weekly American which is \$2.50 a month to both papers \$5.00 and both the Daily and Weekly for one year for \$5.00.

The best plan is to send in the names of neighbors and friends and have free sample copies sent to them one issue of the Daily and one issue of the Weekly. Get the free coupon, good for a high number of points, and some of the will subscribe.

Mandell Whips McLarnin to Hold Lightweight Crown; Champion Too Elusive for Challenger to Catch

NEW YORK, May 22.—Seeking the end of the lightweight rainbow, Fighting Jimmy McLarnin chased a fleeting, dark-haired shadow in vain Monday night and Sammy Mandell is still 135-pound champion of the world.

In his slashing, bristling, jumping, jabbing, elusive, jumping jack, repulsed the challenge of the young Irishman in decisive fashion with one of the greatest exhibitions of boxing skill the lightweight class has seen since Benny Leonard was his prime.

Mandell's victory over the California challenger was as startling as it was convincing. Off to a hurricane start, the champion had McLarnin dizzy and bewildered with a fast, furious and varied attack from start to finish. Sammy piled up a margin of points that never was threatened in spite of McLarnin's most courageous rallies.

McLarnin found out to his annoyance and sorrow that a chin that can't be reached can't be cracked. Not once during the entire 15 rounds was Jimmy able to reach Sammy's jaw with any of the two-fisted dynamite that had carried the young Irishman to the top of the challenging heap in the lightweight brigade. Seldom, for that matter, was McLarnin ever able to penetrate Mandell's jumping-jack defense or pin the champion to one spot long enough to swing a few solid punches.

It was Mandell's first fight in New York since he won the title nearly two years ago from the aging Rocky Kansas in Chicago, his first title bout of any consequence since then and one of the best exhibitions of his career.

The champion put up a smart, well planned and well executed exhibition against one of the most gallant and hardest hitting lightweights the ring has produced in years. He won because he outboxed, outgeneraled and outfooted the challenger nearly all the way. Mandell could not stop McLarnin's pug-nacious rushes. He couldn't discourage fighting Jimmy but he took most of the sting out of the Irish lad's attack.

Mandell's clinching, wrestling and jabbing tactics drew boos from the crowd at times, but they were nevertheless effective. Sammy picked Jimmy's most vicious swings out of the air or ducked as they swept harmlessly by. Sammy never forgot to duck. He might not have remained champion if he had, for Jimmy

swung often and earnestly. McLarnin simply couldn't solve the champion's defense. The way Sammy held Jimmy off with that tantalizing left became so monotonous as the fight wore on that the crowd, which had come chiefly to cheer the challenger's title bid, was forced to laugh.

MILK HAS MORE "KICK" IN IT
THAN ANY OTHER DRINK!

Does that sound strange? It may, but it is nevertheless true. There is more substantial nourishment in milk than in any other food drink. Healthy people drink milk because, in addition to its fine taste and its thirst-quenching power, it helps them to keep healthy. Sick persons are advised by physicians to drink milk in order to regain their strength.

Yes, milk has a "Kick" to it; and unlike other drinks with a "Kick," builds up the bodily tissues rather than tending to break them down. Be sure it's pasteurized.

All of these are our regular line but we do not have a complete run of sizes in any particular shoe but have nearly all sizes and widths in the lot.

Some of these shoes sold as high as \$8.50 but to keep our stock clean we are offering them at\$3.75 pair
