MORE ADULTS IN SCHOOL.

This year the Cleveland (Ohio) Board of Education expects 14,000 people to attend its night classes for adults. There are, in general, two sorts of classes -one in elementary subjects, especially English, for the foreign born, and one in the regular high school subjects or specialized subjects for adults who wish to improve their skill at their jobs, to complete high school educations, or even to prepare for college.

These public school classes for adults have been increasing in number and attendance yearly. Other educational opportunities for adults, such as the classes offered by the Y. M. C. A. and the Y. W. C. A. and other institutions, are accepted just as eagerly,

This is a tendency to be observed all over the country. The age limit for formal schooling has been It was our pleasure to hear pushed back indefinitely into old age. Grandparents Senator Joe Robinson of Arkansas of 70 years and over enter adult education classes

GO-GETTING.

A Christian minister rises up to remark that there here, we are proud to say, that has been an over-production of go-getters in this the democratic ticket from concountry. He doesn't think much of the type of fellow stable to president-Never scratch who must always be "doing something." The ideal ed the tieket, and get this boy, thus represented, he says, is a low one. Sure enough, in this election. And as we see the merit, if any, in go-getting, depends on what a breaking over the hill tops person goes and gets. Action in itself is neither good god of Democracy, booted nor bad. The value of doing things must be judged the old flee buten gray steed by what is done, and how, and why,

CASTLES, WET OR DRY.

Mrs. Mabel Walker Willebrandt, assistant attorney general in charge of prohibition prosecutions, takes pains to explain that the government is not trying to harass or persecute citizens. She thinks some Americans are hysterical on the supject of prohibition, and have in fact what alienists would call a "prosecution mania.

The federal authorities, she insists, are not sitting up nights devising ways to destroy the rights of American citizens. The American home is still its owner's castle, amply protected by the law, and the government has no desire to break down that law. The law makes a distinction between a man's home and his place of business.

'No search warrant can be issued for a private dwelling unless an affidavit has been issued that liquor is being sold there. After this affidavit is passed upon by a judicial officer, and if a warrant is issued, then and only then can this dwelling be

searched." Illegal search may be severely punished. It must be admitted that the federal authorities generally have conducted their work according to these principles. There has been, however, a great deal of unconstitutional and mischievous work done by local authorities in some states, to the disadvantage of prohibition itself.

CANOES FOR STUDY.

Sixteen geology students of Northwestern University have left Evanston, Ill., for an academic canoe trip to the Lake Superior region. They will study as they paddle, or at least between paddling times. The adventure is regarded as a practical course in geology, and will be conducted in person by two professors. The party will be absent from civilization for many weeks, doing "field work" on little known region

THE CISCO DAILY NEWS and making maps of rock strata, beaches, etc. This kind of college work ought to appeal to students. It recalls the year's voyage around the world indulged in recently by a larger group. All in all, academic life is becoming attractive. Let this sort of thing continue, and it will soon be possible for ambitious parents to persuade almost any young fellow to attend college.

House, said to be worth \$8,000,000. Last year she sold her Long Island home for a figure running into millions. She has bought a eastle in southern France, where she now spends most of her time, merely retaining her magnificent Fifth Avenue home for use on casual visits to New York. You can't blame Mrs. Belmont. It must be hard to keep house in several different houses, not to mention states and countries, at the same time. Even the most wealthy and ubiquitous person can't live in much more than one house at once. There are even some folks who would say it's impossible really to live in any house costing a million dollars. Also that nobody really owns any place or thing he doesn't use.

ACTIVE DAY IS AHEAD OF REVIVAL WORKERS TODAY

Religious Census before Sunday School and Church; Mass Meeting at 3 p. m.; Regular Sermon at 7:30

A day of intense activity will mark today's program for the big union revival new in progress at the specially constructed tabernacle under the leadership of the Will Hogg Evangelistic party. Beginning ligious census, the program calls for the same workers to heave the tabernacle at 8:30 o'clock and scatter in groups all over the city for town having been so districted unmorning worship in the churches.

He then took up in order some of the objections raised by scientists as to man's inability to exist for that period of time under such conditions and in this connection quoted the choir platform Friday night by morning service, each person in at from articles appearing in Wichita Palls and Fort Worth papers in which the name of a man was given with copies of his affidavit to the effect that he had been swallowed by a whale while on a whaling exedition, the monster being haroned 30 hours later and the man taken out alive with no ill effects except that he was unconscious during his experience and that the gastric juices of the fish had act

injuriously on his eyes and skin. The message, aside from its dramatic and entertaining feature was a masterpiece of preaching, th evangelist taking full advantage his grip on the great audience to drive home telling truths in an un-

forgettable way. An audience which packed the tabernacle heard the message on Jonah and the splendid musical program which preceded the sermon The choir was at its best and the special numbers by musicians from the large Abilene delegation were much enjoyed. Another good crowd heard Dr. Hogg on Saturday night preaching on "Pack Up.

Out of town visitors are expected to attend the services this afternoon and tonight by the hundreds and all during the coming week large delegations from out-of-town are scheduled to be present in the services and local leaders are urging Cisco people to rally to this great spiritual opportunity in full strength and exert every effort to make it count for the most in lasting good to the town and churches.

The new Buick is the New Style

Graceful contours instead of straight lines .. the gleam and sparkle of brilliant colors and chrome plating instead of drab effects · · · the most beautiful bodies ever built · · · Buick's masterpiece bodies by Fisher

At a time when motor car beauty was practically standardized when imitation was the vogue - when there was a glaring lack of originality in body design-Buick has swept far beyond the commonplace and achieved a style which the entire country is acclaiming as the most distinctive and beautiful ever shown!

Fisher, the world's foremost builder of automobile bodies, has cooperated with Buick, the world's foremost builder of fine cars, to create a new mode-a new fashion

- and so luminous is the result and so sagerly is the public welcoming it that Buick's great factories have reached new

production levels in an effort to keep pace with an ever increasing demand!

Inside and out, the new Buick bodies by Fisher are the most beautiful ever built. Together with the wonderful new standards of performance introduced by the Silver Anniversary Buick, they are winning the greatest demand and the greatest preference ever enjoyed by any fine car!

The new Buick is the new style! And by that is meant, not merely a new type of

beauty - not merely a thrilling turning point in body design-but a great countrywide vogue!

BRAKES cause accidents or prevent them

-which kind are yours?

It only takes one skid-one emergency in which brakes fail to hold-to cause an accident. It might be slight-perhaps jammed fender-and it might cost a life. Why gamble with chance? Brakes, out of balance or not equalized will cause a car to skid to the right or left. Fourwheel brakes-when out of adjustment add no more to your ability to stop than two-wheel brakes. Your car is only as safe as its brakes. Keep them in perfect adjustment.

We have installed a new JUMBO Giant Brake l'ester that scientifically tests two or four-wheel brakes. Use our accurate test every 1900 miles. If adjustments are needed we will make them quickly—at a very reasonable charge.

RELIABLE ELECTRIC SERVICEand West Texas Progress

VER Plains, Ranches, Farmlands, Hills, Valleys and Streams, in the Heart of West Texas, the Electric Transmission Lines of this company cover 1898 miles.

These Power Lines carry Electrical Energy from large Generating Stations to 102 cities, towns and villages, lighting streets, homes, stores and offices.

This Energy turns the wheels in oil fields, furnishes power for factories, mills and other industrial plants, and operates labor saving machinery and appliances on farm and ranch. Wherever it goes, this flow of electricity increases production and wealth, encourages industry, speeds progress, reduces drudgery and hardship, provides comforts and conveniences. The continuous, single aim of the company is to supply efficient service at a fair price. By always improving operating efficiency and constantly investing more capital in expansion and equipment it is able to do so.

DRESSES-COATS-MILLINERY

Ladies and the Miss

As one who is interested always in whatever is new in fashions, you have doubtless wondered what the main factors in fashions for Fall would be.

Will panels, flares or circulars be extensively used what relation, if any, will the circular skirt have in combination with the snugly fitted hip as applied to dresses? Will hemlines be irregular—what will be the leading colors and what color combination, if any, wiil have precedence?

How are the coats to be made-will circular lines or flares affect their styling? Will wrapped and tunic lines play an important role—will furs be used as trimming? If the sport coat is to be popular this season, in what respect will the styles differ from last season?

These and a hundred other questions could easily be asked, and for each one there is a correct answer in our display of stylish fall apparel for women, and misses. A display that surpasses in every detail our very best efforts of the past.
