## First Presbyterian Church Circles Study 'Stewardship'

"Jesus' Prayers" was studied by the Women of the Church of the First Presbyterian Church when they met in circles Monday. The monthly emphasis was on "Stewardship and Negro Work."

Mrs. F. A. Stout was hostess to Circle 1 and Laura Hitchcock was co-hostess. Mrs. L. G. Byerley conducted the Bible study and Mrs. Harvey Sloan discussed "Stewardship and Negro Work."

Others attending were Mrs. A. Faaken, Mrs. W. G. Whitehouse, Lena Osborne, Mrs. S. S. Stinson and Mrs. Otto Deats, chairman.

Circle 2 met in the home of Mrs. M. A. Murphree. Mrs. R. L. Miller presided over the meeting. Mrs. Paul Levery gave the Bible study and Mrs. Miller discussed the monthly emphasis topic.

Others present were Mrs. Bates Hoffer, Mrs. J. G. Harper, Mrs. Allen Watts, Mrs. Paul Lathrop, Mrs. William Crenshaw and Mrs. W. E. Lyle.

Mrs. Rettig is hostess

Mrs. Roy Davis gave the Bible study at the Circle 3 meeting in the home of Mrs. Jack Rettig. Mrs. W. F. Knight discussed "Stewardship and Negro Work." Mrs. A. H. Vineyard, chairman, presided over the business session.

Circle 5 met in the home of Mrs. J. L. Green. Mrs. John Richards conducted the Bible study and Mrs. W. T. Harris discussed "Stewardship."

Others attending were Mrs. Freeman Ward, Mrs. Sol Bunnell, Mrs. Don Johnson, Mrs. Newell Ellis, Jr., Mrs. Harry Parkinson, Mrs. A. E. Lynch and Mrs. Nelson Wallace, chairman.

Circle 5 Meets

Circle 5 met in the home of Mrs. J. L. Green. Mrs. John Richards conducted the Bible study and Mrs. H. M. Spangler discussed "Stewardship."

Others attending were Mrs. C. H. Collins, Ida Bodine, Mrs. E. C. Hitchcock, Mrs. W. E. Mitchell, Mrs. B. M. Vick, Mrs. O. L. Wood, Mrs. D. N. McKee, Mrs. Louis Waterstreet, Mrs. J. P. McMullan and Mrs. White. Mrs. Gale was a guest.

Mrs. E. A. Voelger conducted the Bible study at the Training Circle meeting in the home of Mrs. A. P. Shirey. Mrs. John Leigh discussed "Stewardship and Negro Work."

Others attending were Mrs. S. B. Westerman, Mrs. R. E. Clark, Mrs. Louis Williams, Mrs. Roger Sidwell, Mrs. Paul Jordan, Mrs. Ralph Howell, Mrs. H. M. Spinning, Mrs. J. H. Shelton, Mrs. R. G. Patterson, Mrs. Raymond Howard, Mrs. William Carter and Mrs. Dayton Bliven.

Others attending were Mrs. T. R. Wilson, Mrs. D. A. Ross, Mrs. James T. Wilson, Mrs. P. R. Patterson, Mrs. C. E. Bissell, Mrs. W. H. Gilmore and Mrs. R. DeChicchia.

Mrs. Roy Davis gave the Bible study at the Circle 3 meeting in the home of Mrs. Jack Rettig. Mrs. W. F. Knight discussed "Stewardship and Negro Work." Mrs. A. H. Vineyard, chairman, presided over the business session.

Mission Study Held By Baptist Church

Mission study was conducted by Mrs. Ulys Barber at the Monday meeting of the Katie and Alvin Hatton Circle of the Calvary Baptist Church, held in the home of Mrs. Luther Martin. The study was on "Old Jerusalem In Our City."

Mrs. A. E. Bauman opened the meeting with prayer.

Others present were Mrs. V. C. Barber, Mrs. Hoyt Burris, Flora Baker, Mrs. W. G. Flournoy, Mrs. C. D. Johnson, Mrs. R. L. McPadden, Mrs. J. D. Roberts, Mrs. Claude St. John, Mrs. Kirby Thompson and a guest, Mrs. Nelson Adam.

MARRIAGE LICENSE ISSUED

A marriage license was issued Monday by County Clerk Luelle Johnson to Harvey P. Herrington and Evelyn Taylor.

Improvements in operating procedures of the City of Midland were discussed by City Manager W. H. Oswalt at the February meeting of the Midland Real Estate Board Monday noon in Hotel Scharbauer.

The speaker was introduced by Clifford E. Hogue, program chairman. Maurice Howard, administrative assistant to the city manager, also was introduced.

Twenty-five members and guests attended the meeting, which was presided over by President Roy McKee.

Oswalt, in his address, said changes in operating procedures have resulted in substantial savings to the city.

"From a \$48,000 deficit in October, 1949, city finances have improved to the point where bills now are paid currently," Oswalt said.

The streamlined procedures, the city manager stated, resulted in enough savings that the City Council recently had a choice of lowering taxes or improving services. It was decided to leave tax rates at the current level and to improve the standards of city services, Oswalt said.

STYLE SHOW COMMITTEE—The ticket committee for the annual style show, to be given by the Auxiliary to the Midland Memorial Hospital, discusses the ticket sale campaign which is now in progress. Ticket committee members pictured are left to right, Mrs. Robert G. Cobb, Mrs. D. T. Guyton, Mrs. C. M. Linehan and Mrs. Harry Russell, seated, and Mrs. Harry Murray and Mrs. B. R. Schabarum, standing. The style show will be given February 26 in the high school auditorium.

## Three Episcopal Guilds Meet For Study Of Bible Lessons

Lessons from the Bible were studied by members of the Women's Auxiliary of the Trinity Episcopal Church in their Monday guild meetings.

Mrs. John Fitzgerald led the lesson on the Old Testament at the meeting of the All Saints' Guild Monday in the parish house. Mrs. K. C. Slough was the hostess. Following Mrs. Fitzgerald's talk, a question and answer period on the Bible was held.

Others present were Mrs. E. J. Cramer, Mrs. Bertha Day, Mrs. J. D. Wheeler, Mrs. R. W. Hamilton, Mrs. Dan Hudson, Mrs. W. Dave Henderson, Mrs. Gad Jenkins, Mrs. Paul Kolm, Mrs. William Kerr, Mrs. J. D. Peoples, Mrs. M. Clyde Parrish, Mrs. C. Puckett, Mrs. Ray Rhodes, Mrs. J. P. Ruckman, Mrs. Don Sivals, Mrs. F. N. Shriver, Mrs. A. G. Williams, Mrs. Carl Westlund and Mrs. W. A. Yeager.

Mrs. Mount Gives Bible Lesson

Mrs. E. L. Mount gave the Bible lesson at the meeting of the St. Catherine's Guild Monday morning in the parish house. Mrs. A. T. Barrett and Mrs. Turner Wynn were the hostesses.

Mrs. R. W. Allen presided over the meeting in the absence of the

## Doctor's Atom Course Scheduled At Lubbock

GALVESTON — (AP) — University of Texas Medical School scientists will stage their fourth and final session on atomic warfare preparedness Thursday in Lubbock.

Other courses have been given in Corpus Christi, Tyler and El Paso. Dr. Ivan Bruce, head of the post-graduate division, said the courses have been prepared by experts, many of whom received training at Oak Ridge.

They are geared to giving the family doctor knowledge of how to treat blast victims.

C. L. HAY OF MIDLAND IS IN DALLAS HOSPITAL

C. L. Hay of Midland is recuperating in a Dallas hospital, where he underwent surgery Saturday, according to word received here.

Hay expects to return to Midland within a week or 10 days.

He was in Dallas on a business trip when he became ill and entered the hospital there.

WYCOFFS HAVE GUESTS

Mr. and Mrs. Fred Wycoff had as their guests this week Mr. Wycoff's sister, Mrs. Paul Booher of Las Gatos, Calif., and Mrs. Wycoff's sister and brother-in-law, Mr. and Mrs. C. W. Rhine of Rogers, Ark.

## Congratulations To:

Mr. and Mrs. R. L. Ferguson, 811 East Maiden Lane, on the birth Monday of a daughter weighing six pounds, 13 ounces.

## Midland Livestock Show Officials To Meet Wednesday

A meeting of officers and division superintendents of the Midland Livestock Show will be held at 3 p.m. Wednesday in the county agent's office in the courthouse here, Charles Green, secretary, announced Tuesday.

Rules and regulations for the seven-county stock show to be held here early next month will be established, Green said.

Fluorescent powder or paint on the pull-handles of fire alarm boxes not only make them more visible at night, but identify false-alarm ringers by their fluorescent fingers.

## Crooner Bing Crosby Undergoes Operation

SANTA MONICA, CALIF. — (AP) — Bing Crosby is booked for a week's engagement at St. John's Hospital following an operation for a kidney ailment.

The singer was operated on Monday by Dr. F. C. Schumberger and was reported resting comfortably. The surgeon said Crosby would be hospitalized at least a week.

### Dr. Hubert Hopper To Become Pastor Of Houston Church

Dr. Hubert Hopper, pastor of the First Presbyterian Church of McAllen and formerly pastor of Midland's First Presbyterian Church, has accepted a call to become pastor of the new Memorial Oaks Presbyterian Church at Houston, effective March 1, according to information received here.

He resigned his pastorate here to become pastor at McAllen three and a half years ago. He was active in civic affairs here, serving as president of the Midland Lions Club and Junior Chamber of Commerce.

Dr. and Mrs. Hopper and their two daughters are expected to move to Houston late this month.

### St. Andrews Church Will Meet In David Crockett Auditorium

Worship services of the recently-organized St. Andrews Presbyterian Church will be held for the first time Sunday morning in the auditorium of the David Crockett Elementary School, the Rev. Lewis O. Waterstreet, pastor, announced Tuesday.

Since the church's organization in December, worship services have been held in a classroom in the elementary school.

Mr. Waterstreet said the auditorium has a seating capacity of approximately 200 persons. A nursery will be provided during the morning services.

Advertise or be forgotten.

### Rayburn Commends 18-Year Draft Bill

WASHINGTON —(AP)— Speaker Sam Rayburn (D-Texas) said the 18-year-old draft bill "is a very good one" on the eve of the Senate Armed Services Committee hearing Tuesday on the proposal.

The bill was written by the Senate Preparedness subcommittee.

The subcommittee version would extend the draft to 18-year-olds after all eligible men in the present 19-to-26 age group are called.

FIRE RAZES 13 DWELLINGS

FORT WORTH —(AP)— Thirteen dwellings were destroyed and six others damaged by fire Monday at a partially finished negro housing project. Damage was estimated at \$40,000.

### Carbon Monoxide Found In Bodies Of Dead Children

AMARILLO —(AP)— State poisons expert Durwood Nollner, who said he found carbon monoxide in the bodies of three children who sickened and died while on a picnic, said he was going to make further tests at Austin.

The children were John Wesley Patton, four months; Jerry Allen Patton, 18 months; and Katherine King, 15, the boys' aunt.

Robert Henry Patton, 34, of Amarillo, father of the boys, brought the bodies here Sunday. His wife, Eula, 22, was seriously ill.

Patton said all but the four-month-old boy became sick after eating scrambled eggs and calf brains while on an outing in Palo Duro Canyon, near here, Saturday night. The baby had only its milk formula and prune juice, he said.

Patton said he also became ill and the party was forced to spend the night in the canyon after his car got stuck in a stream bed. He said he ran the car heater and engine for not more than half an hour.

Nollner said his unofficial findings showed a large quantity of carbon monoxide in the body of the girl and strong traces in the bodies of the boys.

No charges have been filed.

### Cold Weather Cuts Nation's Oil Flow

TULSA, OKLA. —(AP)— Cold weather again cut into the country's crude oil production during the week ended February 10, lowering the daily average output by 72,150 barrels to 5,798,800 barrels. The Oil and Gas Journal reported Tuesday.

The overall decline came in spite of gains in Texas, up 5,850 barrels to 2,560,450; Louisiana, up 5,800 to 605,200; New Mexico, up 1,175 to 136,325; and Oklahoma, up 600 to 505,300.

### Applications Taken From Medical Groups For AF Commissions

WASHINGTON —(AP)— The Air Force again is accepting applications for reserve and active duty commissions from doctors and dentists in the top draft classification.

They are medical men trained at government expense but who have had less than 90 days active service.

The Air Force discontinued voluntary commissioning of men in priority one class last November. Applications again are being accepted, the Air Force said Monday, because of a large increase in Air Force manpower resulting from enlistments.

SQUATTERS GROW FOOD

SINGAPORE —(AP)— Almost 90 per cent of the fresh food consumed by Singaporeans is produced by this colony's 25,000 squatter settlers. The squatter's average earning, however, amounts to little more than \$80 per month.

The perfume from the rose is an oily chemical that is manufactured in the petals, and the thorns are hardened hairs.

## Two Drunks Rob Bank Of \$11,000, Then Surrender

NIXON, TEXAS —(AP)— Two drunks who, County Attorney E. W. Patterson said, decided to rob a bank were to be charged Tuesday with taking \$11,000 from the Nixon State Bank.

One of the men sat on the Post Office steps, a sack of money at his feet, and waited to be arrested Monday by a posse of fast-walking citizens.

The other one gave up after a brief shooting flurry. One man was wounded slightly.

District Attorney Willis Ellison of Gonzales identified the men as Glenn H. Hayes, 27, and Ed Dugie, 39, both of Marble Falls.

Patterson said both would be charged with robbery by firearms.

### Breakfast Will Launch Andrews Boy Scout Drive

ANDREWS —(AP)— A kick-off breakfast to launch the financial drive of the Black Gold District of the Buffalo Trail Council, Boy Scouts of America, will be held at 7 a.m. Wednesday in the high school cafeteria.

Final preparations for the drive were made at a recent meeting. M. O. Woolam, high school principal who is chairman of the drive, presided at the session. Stuart Painter, Scout field executive from Odessa, attended the meeting.

Working groups of five or six men, headed by a captain, were organized. The groups will obtain prospect lists, and contact the persons listed.

Attending the initial meeting were Max Ramsey, R. S. Dillard, Thomas D. Hamilton, Claude Neely, Charlie Carruth, Francis Tubbe, P. F. Kennedy, O. D. Huckabee, James Roberts, Jake Roach, Woolam and Painter.

### Mother Admits Dishpan Drowning Of Young Daughter

FORT WORTH —(AP)— Mrs. Robert H. Taylor, 30, was charged with murder Monday after she tearfully admitted drowning her three-year-old daughter in a dishpan.

She told police the child began crying soon after the mother arose. She said she ran some water into a small dishpan, placed it in the sink, then held the girl's face in the water for "I have no idea how long."

"I couldn't have done it if I had been in my right mind," she said.

Her husband, a student of sacred music at Southwestern Baptist Theological Seminary here, was taking an Army physical examination prior to returning to duty as a lieutenant in the armed forces when his daughter died.

Taylor said his wife had been under medical treatment and had been extremely nervous recently.

The Taylors have another daughter, Sarah Lee, six.

### Connally Backs Bill For GI Combat Pay

WASHINGTON —(AP)— Legislation to give combat soldiers in Korea additional pay was given added support Monday by Senator Connally (D-Texas).

Connally expressed hope the Senate Armed Services Committee would approve a bill to give combat pay of \$50 additional per month for enlisted men with the ground forces and \$100 more to officers.

TEXAN GETS OPS POST

DALLAS —(AP)— George Sergeant, former Dallas mayor, has been named regional counsel of the Office of Price Stabilization for Texas, Louisiana, Arkansas and Louisiana.

Celebrated for Flavor!

Each bite of Borden's new Cherry Jubilee Ice Cream calls for another. It's lusciously delightful... juicy bits of chopped cherries blended with Borden's smooth, rich Vanilla Ice Cream. Your taste will tell you it's a real festival of flavor. Ask for Borden's Cherry Jubilee Ice Cream at the fountain... in cones... or in handy packages to take home.

# Borden's

## CHERRY JUBILEE ICE CREAM

IF IT'S BORDEN'S, IT'S GOT TO BE GOOD!

A FESTIVAL OF FLAVOR FOR DESSERT!  
CHERRIES JUBILEE WITH ICE CREAM

Take a No. 2 1/2 can of pitted Bing Cherries, drain and measure out 1 cup of juice. Heat cherries, drain and boil very slowly until they come just to the simmering point without boiling. Place two scoops of Borden's Cherry Jubilee Ice Cream in each of four serving dishes. When ready to serve, pour the hot cherries and juice over the ice cream. Serves four.

VALLEY VIEW—A church spire against a background of rugged hills, a valley stream, a winding road, all framed in the boughs of a gnarled evergreen—it might be a countryside scene from his own Wisconsin. But Cpl. Earl Dansberry of La Crosse, standing guard near the UN battlefield, hears bursts of gunfire in the distance to remind him that the scene is strictly Korcon and that the war is very close indeed. Note the blasted buildings and military vehicles before the abandoned church. (Exclusive NEA-Acme photo by Staff Photographer Ed Hoffman.)

## Eye-Opening Report From Zoo: Shakespeare Maligned Shrew

WASHINGTON — (NEA) — A burning question—Does an African elephant shrew always sleep with its eyes open?—has kept Ernest P. Walker awake nights.

Walker is the assistant director of the National Zoo, the man who made the startling revelation earlier this year that bats are friendly, clean, not blind, don't carry bedbugs, aren't forever plotting to entangle themselves in some woman's hair.

"I have kept some shrews in my den to study them at all hours of the day and night," he said drowsily, "and I have yet to see them with their eyes closed.

"I'm not saying they always keep them open," he said. "But I would rather doubt that they ever close them."

**Research On Cot**  
He did his research stretched out on a cot in the darkness, with a small pocket flashlight by his side. Every single time he switched on the flash and looked, the shrew was looking right back.

Another thing. The shrew is not the nasty-tempered little animal it is reputed to be.

"That is a damnable, maligning thing put out by Shakespeare," Walker said. "He just had to have

Without Bating An Eye, Zoologist Walker lets a bat take a nap on the arm of his spectacles during animal sleep study.

some word that would rhyme, I guess."

Walker just published a paper on animal behavior. Here are some other things his sleepless

nights have taught him:  
**Are Best Sleepers**  
Sounded sleepers are burrowing animals, "even when they take their naps above ground, as may be in the case in captivity."  
Animals accustomed to slumber above ground must always "keep one eye open." This may be literally true in some cases, he said, but there isn't an animal in the kingdom that can hold a candle to the elephant shrew in this respect.

Sleep habits are well adjusted to needs. Bats, to use a rather upside-down example, hang by their feet "in a good position for sudden flight at an alarm." All they do is "let go with their toes and spread their wings."  
Armadillos tremble almost continuously in their sleep (at least while being watched), "particularly when lying on their backs or sides."

"Most mammals when they have an opportunity to awaken naturally, like to sit and 'think' like many people who cannot start off in high gear."

With Its Eyes Wide Open is the way this African elephant shrew apparently sleeps. Navy doctors brought it to Washington to study the malaria germs it carries. Zoologist Ernest P. Walker stayed awake to see if the shrew ever shut its eyes.

## FUNNY BUSINESS

"What kind of hair is this? It started growing in the rain!"

## Rubber Supply For '51, Greatest In History, Promises Enough Tires For U. S., Civilians

By JOHN L. COLLYER  
President, B. F. Goodrich Co.  
AKRON, OHIO—(NEA)—Barring an all-out war or a substantial reduction in crude rubber shipments to the major consuming countries, there should be enough crude and man-made rubber available to meet all military and essential civilian needs in 1951.

The world supply of new rubber in the coming year should reach almost 2,800,000 long tons—by far the greatest in history—unless there is a major outbreak in the Far Eastern rubber-growing areas. This figure would be made up of 1,860,000 tons of crude rubber and 940,000 tons of man-made rubber, of which 880,000 tons would be produced in the United States.

World consumption of new rubber in 1950 totaled about 2,240,000 long tons, which also established a new record. The United States alone consumed 1,240,000 tons of rubber in 1950, approximately 80 per cent more than in 1949. In 1951 this country should use slightly less rubber than in the previous year, despite higher military requirements.

**Situation Better**  
Since last Fall, when the standby government-owned rubber plants were ordered reactivated, the rubber supply situation has improved somewhat. Six months ago, all the government-owned, industry-operated plants were producing American rubber at the rate of about 43,000 tons each month. Approximately 61,000 tons were turned out in January, 1951, and by April this output should reach approximately 880,000 to 900,000 tons a year, compared to 525,000 consumed in 1950.

On January 15, the giant Institute, W. Va. plant, operated by B. F. Goodrich Chemical Company started production of man-made rubber after being in standby status for several years. The task of reactivating the first of three units in the world's largest rubber-producing plant was completed in approximately 70 days. Full production will be achieved early in April. At that time Institute should be producing at its rated capacity of 90,000 long tons a year, almost equal to one month's rubber consumption in the United States.

A chemical plant at Port Neches, Texas, is producing considerably in excess of its 60,000-ton rated capacity. The combined production of American rubber from both plants is greater than that of any other company.

The rubber industry expects to produce as many passenger car tires in January and February of this year as in November and December of 1950, despite government cutbacks in the consumption of new rubber for use in civilian products.

Total passenger car tire produc-

tion last year was more than 77,000,000 units, an increase of 12,000,000 over 1949. In addition, about 2,000,000 more replacement truck and bus tires were sold in 1950 than in the preceding year, largely as the result of "scare buying" during the third quarter.

Although fewer tires will be sold to motorists and new car manufacturers in 1951, increased military buying is expected to partially offset this reduction. Last year only two per cent of the rubber industry's production went to the armed forces. The government has not yet placed any heavy military orders, but we understand large defense orders are contemplated.

**To Meet Demands**  
Unless there is a full-scale war and another round of "scare buying" the rubber industry should be able to make enough tires to meet demands of the motoring public.

The nation's rubber stockpiling program and our industry's production have reached the point where they can sustain a major defense program. In fact the government's and industry's rubber stockpile now is as high as it was in the pre-Pearl Harbor days. The tire price outlook for the remainder of the year still is up in the air. However, since more man-made rubber will be used in the manufacture of tires and since it costs less than crude rubber, we hope to be able to hold the price line.

We want to emphasize that last year's tire shortage was entirely man-made and caused by the buying of tires by some un patriotic persons who did not need them. If Americans buy tires and other rubber products only when they really need them, there should be sufficient supplies available to meet all military needs and all essential civilian requirements.

## Cheesecake's There But It's Not On Menu

Down In Front: Model Elise Rhodes models the new plunging neckline uniform for waitresses. Pfc. Walter Brandenburg, of Hawthorne, N. J., seems to approve.

NEW YORK —(NEA)— Civilization, if you want to call it that, has just taken another giant step. For the first time, waitresses are being equipped with plunging necklines.

In case you've been sleeping the last few years, the plunging neckline is the invention which has done most to make life bearable, next to the incandescent light and indoor plumbing. Now it threatens to make even dining out a pleasant business.

As an experiment, the Hotel Edison restaurant is equipping most of its girls with the throaty dresses. The idea, of course, is to lure business.

As an experiment, the Hotel Edison restaurant is equipping most of its girls with the throaty dresses. The idea, of course, is to lure business.

This is research on a high scientific plane. There is a control; some of the waitresses will continue to wear the same old covered-up dresses.

**To Take Plunge**  
After a while, the management will see if the added visible skin area has helped sell more bean soup. If the experiment proves successful, all the waitresses will take the plunge.

Some of the patrons seem pleased, others aren't. One skinny chap said he's happy because he's wanted to put on weight. It seems his appetite has gone up as the necklines went down.

Another man said, "I like the dresses, but I'm starving to death. Who wants to eat at a time like this?"

One fellow complained that since the waitresses went glamorous, he can't make up his mind what he wants to eat. It seems he orders, then when the waitress turns to leave, he calls her back to change his order.

**Floor Show Too**  
"I'm very much in favor of the new uniforms," said a ruddy-faced gentleman. "It's the first time I've ever had a floor show with breakfast."

The waitresses themselves appear happy in their work. One

## Organization To Aid Crippled Children

MILWAUKEE, WIS.—(AP)—A national organization to aid crippled children after their release from hospitals has been established here by members of the Masonic Order.

The organization proposes to supervise the rehabilitation and education of crippled children throughout the United States, Canada and Mexico regardless of race, color or creed. Funds to carry out the program will be obtained through voluntary gifts, bequests and contributions.

Advertise or be forgotten.

## Happy Is The Day When Backache Goes Away . . . .

When kidney function slows down, many folks complain of nagging backache, loss of pep and energy, headaches and dizziness. Don't suffer longer with these discomforts if reduced kidney function is getting you down—due to such common causes as stress and strain, over-exertion or exposure to cold. Minor bladder irritations due to cold or wrong diet may cause getting up nights or frequent passages.  
Don't neglect your kidneys if these conditions bother you. Try Doan's Pills—a mild diuretic. Used successfully by millions for over 50 years. While often otherwise caused, it's amazing how many times Doan's give happy relief from these discomforts—help the 15 miles of kidney tubes and allow flush out waste. Get Doan's Pills today!

### Red-Trained Witch Doctors Stir Up Natives In Africa To Hit Uranium Supplies

WASHINGTON (NEA)—Moscow-trained Africans, masking as witch doctors, are playing on ancient superstitions and modern grievances to foment discord among the workers mining uranium in the Belgian Congo for A-bomb production.

Congo witch doctor: The new-style medical degree came from a Moscow education.

The managers of the Shinkolobwe mines repeatedly have been confronted by a new pattern of labor demonstrations believed organized by Russian agents. These take the form of seemingly spontaneous native gatherings, where syncopated music and plaintive melodies played on the flute exalt the natives to disobedience.

Belgian security police have been singularly unable to lay their hands on the witch doctors who instigate these demonstrations among native uranium miners.

The pro-Commie World Federation of Trade Unions is active at the Katanga mines, where strategic pitchblend is mined, and at Leopoldville, principal seaport of the Congo from which uranium ore flows to the United States.

Members of the French delegation said the Reds were exploiting native superstitions, abject poverty and the rigid color bar. Stringent measures taken by the Belgian Service of National Security had failed to prevent the development of a vast, political-religious movement among the natives.

Uranium ore from the Katanga district is of high grade and furnishes about 90 per cent of the world's uranium. The rich Shinkolobwe mine, 100 miles northwest of Elizabethville, produces most of the uranium ore for the U. S.

By paralyzing production of uranium, Moscow would hit the North American allies at a vulnerable spot. President Truman recently said that the Congo was America's biggest supplier of uranium ore. It also supplies 43 per cent of our cobalt, needed for heat-resistant metals used in jet planes.

Last year 67 Congo natives were reported to have received instruction at the Lenin University in Moscow, famous training school for

### Gay Paree Is 'So Thrilling' To WAC Detachment, But Those Paris Gowns Are Beyond Poor Privates

Lucky Girls are these three WACs, part of a 16-woman detachment now on "temporary duty" in Paris. These girls are (left to right) Sgt. Ruth Maddox, Gloucester, Mass.; Sgt. Mary Goodwin, Van Buren, Ark., and Patricia Lane, Lenex Dale, Mass.

PARIS (NEA)—A detachment of 16 wide-eyed WACs arrived in Paris for "temporary duty" in Communications at the Hotel Astoria, temporary SHAPE headquarters. Twenty-four hours later they were already hard at work on their regular Army schedule.

But they had managed to snatch a few quick glances at gay Paree. What little window-shopping they have done has made them doubt whether they will ever be able to afford that little Paris frock they always dreamed of owning.

The group now in Paris was chosen out of a company of 120 stationed at Heidelberg, Germany. Some have spent almost six years in the Army, others signed up a little more than a year ago.

Cpl. Dorothy Craven of Thomaston, Mass., who spent two weeks of her furlough in Paris last Spring, none of them had ever been there before.

Their knowledge of French is of the high school brand. "But we somehow know enough to catch a taxi . . . It's wonderful how these

cab drivers seem to understand," said one of them.

Anxious To Return "It's all so thrilling," said Cpl. Rose Retallack, of Easton, Md. "We only knew 24 hours ahead where we were going. Personally, I'd love to stay on but I'm getting married to an Army corporal next month and naturally I'm anxious to get back to Germany."

Pfc. Dorothy Moore, a pretty brunette from Ashland, Mass., was torn between the desire to stay on and that of going back to her "swabbie" fiancé in Heidelberg. She thought at least half the girls had boy friends back there.

What they are most ecstatic about is their billets: "After barracks life, it's just heavenly to share your room with only one other person and be able to luxuriate in a real bath," said Pfc. Patricia Lane, of Lenex Dale, Mass. "First thing I did was to buy the biggest jar of bath salts I could find."

Patricia has spent six years as a WAC. She left a clerical job in Washington to join up in 1943, served five years in the Pacific, went home for a year and rejoined for another three years.

"Sure you get tired of Army life—parades, the chow, living in barracks," she commented, "but then most other work is routine, too. In Heidelberg we are well taken care of—plenty of entertainment, excursions and so forth. It's an easy life to slide into but I bet we'll have no difficulty in sliding into this particular way of living."

The girl in charge of the detachment is Sgt. Ruth Maddox of Gloucester, Mass. She has five years Army service behind her.

"I'm keeping my fingers crossed I'll be detached permanently to this GHQ," she said, "because I know I could be very happy here."

Off duty, the WACs are allowed to wear civvies. "I saw a dream of a dress just around the corner—white brocade silk, terribly simple, a wide green velvet belt. I suppose it costs the earth!"

This from Corporal Retallack who planned to buy her wedding dress, perfume and really feminine lingerie in Paris. She was drawing \$100 a month, she explained, and even in francs that didn't seem to go a long way, judging from prices she'd seen so far.

### Deer At San Angelo Getting Acquainted

SAN ANGELO (AP)—They've named her Silly, but perhaps she's a lot smarter than other deer now roaming the wilds and dodging hunter's bullets. Silly is an 18-month-old doe which lives unmolested in the 3600 block of Sprague Street, making friends with humans and dogs.

She was found by O. B. Thornton, sick and half starved beside the road near Christoval where Thornton was squirrel hunting. She was only two weeks old.

THIRD MAN—Striving to improve his competitive position (third) in New York City bubble gum blowing circles is Steve De Luca, 12. Steve copped the third prize in a contest sponsored by the Madison Square Boys' Club, but his ambition is to be bubble gum blowing champ. So he blows and blows, with the results seen above—and below.

Here is Mr. Horton's own statement: "Lee was very weak and rundown and just didn't want to eat at all. We heard about HADACOL on the radio and decided that was what we needed. After he started taking HADACOL, his appetite picked up right away. He started gaining weight and eats real well now, and has been feeling real good. HADACOL has been good for Lee and I heartily recommend it to everyone."

Boys and girls, here's a gift for you. A free Captain HADACOL comic book. Just write to The LeBlanc Corporation, Lafayette, La.

### Prep School Goes On Air For 'Letters' Back Home

Talking Letters: While Francisco Pietri talks with his parents back home in Puerto Rico, Thomas Roberts (extreme left) of Washington and Roy Goshorn of Allentown, Pa., await their turn at the ham radio at the Hill School, Pottstown, Pa.

POTTSTOWN, PA. (NEA)—The teen-age boy leaned close to the microphone, and rattled off a stream of excited, high-speed Spanish. From the receiver came the answering voice, an old woman's voice. It was another triumph for W3MWL.

The boy is a student at the Hill School, a prep school for boys here. The old woman was his ailing grandmother, in Caracas, Venezuela. The two were brought in contact by W3MWL, an amateur radio station at the school and one of the few "ham" stations attached to a prep school.

The outfit is run by the school's Radio Club, under the direction of faculty advisor Ken Jackman. On almost every Saturday and Sunday morning, foreign students at the school cluster around the set, talking with their parents via W3MWL and pre-arranged contacts with ham operators in other countries.

Recently, they heard a station in Germany calling anybody in the U. S. They answered and were told that a GI, stationed in Germany, had just received his transfer orders.

The soldier's wife was about to leave her Kansas home, to join her husband. Could W3MWL telegraph the girl and tell her to wait? The boys at the Hill School Radio Club carried out the request.

Jackman, in addition to advising the Radio Club, also teaches. In one of his classes, the question of how salmon fingerlings got past the Grand Coulee Dam came up.

Jackman contacted a ham in Seattle, who was an engineer at the dam. He relayed the boy's questions to the Seattle operator, and took down the replies on a tape recorder.

### Mineral Production Grows In Pakistan

KARACHI, PAKISTAN (AP)—Production of all important minerals in Pakistan showed increases in the first half of 1950 as compared with the first half of 1949, the Ministry of Industries has announced.

Crude oil production in the period totaled 539,493 barrels against 411,775 in the corresponding period of 1949, coal 243,936 tons against 165,982; chrome 9,000 tons against 7,836; gypsum 9,422 tons against 7,822; limestone 149,916 tons against 138,413, and silica sands 3,082 tons against 800.

# DADDY RINGTAIL

By WESLEY DAVIS

## Daddy Ringtail And Secret Whisper

Laughagaroo, the kangaroo form Klamazoo, was only a baby. Yes, and she had started to suck her thumb!

They shouldn't have done it, of course. A thumb isn't always clean. It makes a mouth grow like the shape of a thumb, if one is held in the other through many days. Besides, thumb-sucking is a very stupid thing for others to see. Nossir, Laughagaroo just shouldn't have done it. Daddy Ringtail said she shouldn't.

she was big enough to say that she with her thumb in her mouth. Oh, she was only a baby, of course, but

didn't want to see how stupid she looked. She wouldn't look at the mirror.

Mother Ringtail thought that maybe some scrambled coconut cookies would do the job. She brought some on a plate, and they did do the job as long as they lasted. Laughagaroo's thumb came out of her mouth as long as there were cookies to eat. Then in her mouth went the thumb again.

Along about then came the Huffen Puffen, the friendly wolf, walking his Huffen Puffen walk, singing his Huffen Puffen song, all to show how important he was, he thought. He listened while Daddy Ringtail explained the problem of a kangaroo baby who wouldn't stop with the sucking of a thumb. She only laughed when people asked her not to do it. She laughed without taking her thumb from her mouth.

Oh, but the Huffen knew what to do, he did. He said he knew. He remembered what folks had done for him when he was a baby who sucked his thumb. Yesir, a secret whisper had stopped the Huffen when he was a baby, and he thought that the same secret whisper would stop little Laughagaroo. The Huffen leaned over and whispered to her the secret whisper. Hardly had he finished when out of her mouth came the thumb.

Never again did she suck her thumb, for she was big enough, you know, to remember the words of the secret whisper. Yesir, a secret whisper wumby. Take it out-y or spanky wanky. See what I mean? Happy day!

It Takes Time To Get Rid Of Troublesome Dandruff

BY EDWIN F. JORDAN, M. D. Written for NEA Service "I am troubled with excessive dandruff and itching scalp. Little bumps come from scratching. I wear my hair short and shampoo it once a week. My hair is thick but I'm wondering if this condition won't thin it. Is dandruff transmittable?" This note is typical of the difficulty caused by dandruff, one of the most common ailments of present-day society.

comb or hair brushes which have come in contact with a scalp troubled with it. This has led to the belief that the cause is some infection, but so far it has not been possible to agree on any single germ as the cause. There is so much dandruff that it is almost impossible to avoid it. Almost everyone has at one time or another developed dandruff, and once established it is difficult to get rid of entirely. You think it is gone and then if some illness develops or you get overtired there it is back again worse than before.

Fat Coming Off Troops In Germany

FRANKFURT, GERMANY.—The fat is coming off Uncle Sam's troops in Germany. GI's and generals alike have been ordered to shake off those extra pounds. The new order is part of the "get-ready-for-anything" program of the new commanding general in Europe, Lt. Gen. Manton S. Eddy. All officers and men, regardless of assignment or age, are required to take part in a new physical conditioning program, which includes marches, running, sprinting, pull-ups, push-ups and squat jumps.

Care in avoiding the use of combs and brushes used by others is about all that can be done to try to prevent dandruff. So far as treatment is concerned there are many things which can be done. The general health should be kept up. Iron is advisable if there is anemia; cod liver oil or other vitamin-containing foods may help. Fresh air and exercise, tonics, nutritious foods and anything else which contributes to the general well-being may not cure dandruff but often help to keep it under control.

Valise Crashed, He Didn't

Capt. Fred V. Clark: At 66, he has no talent for loafing.

NEW YORK —(NEA)—Some- where between Frankfurt and Berlin, airline pilot Capt. Fred V. Clark reached for his briefcase. It was on the bottom of a pile of luggage, and a valve fell off the top of the stack and cracked his collar-bone. That accident happened last October, just about two months before Clark retired, at the age of 60, as a pilot for Pan American World Airways. It was the only accident Shorty Clark ever had in 33 years of flying.

In the 33 years, including 13 in the Navy, Clark flew more than 21,450 hours. Statisticians estimate he covered more than 3,000,000 miles. And, in all that time, he's never had an accident, nor has any passenger ever so much as suffered a scratch. Shorty—he's only five feet four—insists that his safety record isn't unusual. He says there are a lot of pilot who fly just as carefully and safely as he does.

Blames Carelessness "Most accidents," he says, "are caused by carelessness. The best safety precaution is for a pilot to follow every instruction of the GAA and the airline. Especially, never be afraid to turn back." On one flight, a passenger noted oil leaking over the wing. Clark's instruments soon showed the leakage, and he immediately turned back to the airport he had taken off from.

Now that he's retired, Shorty Clark isn't going to loaf. He's applied for a safety inspectorship with the GAA, and, as a retired Navy warrant officer, he wouldn't be surprised at a call from Uncle Sam. "Loafing is a fine art," says Clark, "and I don't have the talent for it."

Leak In Gas Bomb Makes Official Cry

GRAND PRAIRIE.—Police Commissioner John Daugherty sat in a cafe, tears forming in his eyes. A sympathetic waitress and others wondered why the commissioner was so sad. "Maybe somebody is dead," they thought. The commissioner squirmed. Something really was wrong. Then it came out... out of the commissioner's pocket. A leaky tear gas bomb.

SEE THE NEW '51 CAR THAT THRILLED FAMOUS AMERICANS AT SECRET PREVIEWS FROM COAST TO COAST

New Inside...New Outside... with a Completely New Kind of Ride!

NEW IN MORE WAYS THAN CARS COSTING UP TO \$1,000 MORE! COME IN and see it... the exciting new 1951 Dodge See for yourself why famous Americans, and hundreds of experts, in secret previews, marveled that a new car with so many advancements could sell for so little!

NEW "WATCHTOWER" VISIBILITY! An even wider, bigger "picture window" in the rear. Wider windshield, with narrower "posts"—for even greater visibility and safety.

NEW OVERFLOW SHOCK ABSORBERS "float" Dodge down roughest roads that stop other cars. Here's new smoothness over roads that jarred and "hammered" you in the past!

BETTY HUTTON—"It's so big, so roomy and so luxuriously appointed—with greater visibility for every passenger," says exuberant film star.

JOHN ROBERT POWERS—"I could hardly believe it was offering so much could sell for so low a price," says John R. Powers, distributor of "cover girls."

DOROTHY LAMOUR—"Here's fresh youthful styling that will set a fashion trend," exclaims Dorothy Lamour, noted for her keen appreciation of beauty.

The Beautiful New DODGE Now on Display

\* Soon to be seen in Cecil B. DeMille's "THE GREATEST SHOW ON EARTH." • Paramount Release. Color by Technicolor.

MACKAY MOTOR COMPANY • 200 S. Loraine St.

### Scarcity Of Books Reported In Israel

TEL AVIV —(AP)— The choice of books is small in book markets here. Book-sellers complain that the amount of foreign currency granted to their trade in no way corresponds to the needs of Israel's reading public. They say it would be possible to sell a great many European, and American books every month, but the monthly foreign currency allocation they receive from the Israel Government for the import of books and periodicals is too small.

The biggest book collection in Israel, at the Jewish National and University Library, is practically inaccessible because it lies in the UN zone and is cut off from the Israel-administered part of Jerusalem by a stretch of Arab-held territory.

**IRISH DIET UPHELD**  
**KENTVILLE, NOVA SCOTIA**  
 —(AP)— The old Irish diet of salt and potatoes was not bad, said R. E. Goodin of the Ontario Agriculture Department in a speech here. He said that by adding a little milk, cream or butter to a potato a food combination is produced that provides every element contributing to health and energy.

"Inspected and Bonded"

Here's one of the greatest iron tonics you can buy to

## BUILD UP RED BLOOD

## to GET MORE STRENGTH

if you have SIMPLE ANEMIA

You girls and women who suffer so from simple anemia that you're pale, weak, "dragged out"—this may be due to lack of blood-iron. So do try Lydia E. Pinkham's TABLETS.

Pinkham's Tablets are one of the easiest and best home ways to help build up red blood to get more strength and energy—in such cases. They are a pleasant stomachic tonic, too!

Pinkham's Tablets also relieve painful distress, nervous, weak.

Irritable feelings of "certain days" of the month—when due to female functional periodic disturbances. Just see if you, too, don't remarkably benefit!

**Lydia E. Pinkham's TABLETS**

MARRIED NO CHILDREN	MARRIED TWO CHILDREN	SINGLE
\$4000 ANNUAL INCOME	\$5000 ANNUAL INCOME	\$6000 ANNUAL INCOME
		
PRESENT SCHEME \$488	PRESENT SCHEME \$522	PRESENT SCHEME \$1048
PROPOSED SCHEME \$584	PROPOSED SCHEME \$596	PROPOSED SCHEME \$1720

**TAXES GOING UP**—The newscharts above compare selected individual income taxes paid now and those that would be paid under the new increase proposed to Congress by President Truman. Government fiscal experts estimate the income tax increase would bring in another \$4,000,000,000.

### Professor Gives 15,000th Lecture

WINNIPEG —(AP)— Dr. Spencer Elliott, now professor of Systematic Theology at St. John's Anglican College here, recently delivered his 15,000th lecture.

Dr. Elliott, who came to Canada in 1938 from England has recorded each of the addresses by location and subject in nine volumes.

He has preached, lectured or given addresses at Westminster Abbey, St. Paul's Cathedral, in a cave, on board ship and in a number of countries including India, Switzerland, Germany, the United States and Canada.

### Rewards Offered For Captured Reds

SINGAPORE —(AP)— More than 1,850,000 leaflets printed in Chinese, Tamil and Malay have been dropped by air all over Malaya, offering high rewards for the capture of top Communists, dead or alive.

The "price list" ranges from \$20,000 for the Secretary-General of the Malayan Communist Party and \$17,500 for members of the Politburo to \$700 for party members and fellow travelers.

Advertise or be forgotten.

## Father Of Radio, 77, Eyes New Invention

PHOENIX, ARIZ. —(NEA)— The "father of radio" still is going strong at 77.

When is Dr. Lee de Forest, holder of about 300 patents, going to give up inventing?

"When I've licked this problem I'm on now maybe I'll retire. But

Dr. LEE de FOREST: "... I'll be working for 20 years more."

the way I feel now I'll be working for 20 years more."

He laughs as he says it, and you can see that, in a way, he means it. Short of death, the inventive electrons flow on in a brain like his.

Dr. de Forest's biggest contribution to mankind was to slip a piece of twisted platinum wire into a vacuum tube back in 1906.

Out of the resulting amplifying tube came radio broadcasting and reception, transcontinental and transoceanic telephoning, sound movies, television, aircraft-guiding beams, medical progress, Telephotos and radiophones—you could go on for a long time naming things.

And what's his present problem? "I'm trying to turn heat directly into electric current without the intervention of dynamos and engines and the like."

"I think I'm on the right track. But it may be a couple of years before I can be sure."

Dr. de Forest does his work at the United Engineering Laboratories, Los Angeles, of which he is director. He was in Phoenix on vacation.

In his lifetime the inventor, more scientist than businessman, has made and lost four or five fortunes.

But Dr. de Forest has always bounced back. During World War I, he developed short-wave diathermy machines for the Navy.

**Attractive Hostess**

He's had four wives. His present wife, for 20 years, is the former Mary Mosquini, a gay and attractive hostess.

Dr. de Forest, who has white hair, round pink cheeks, and merry eyes, recently set down his life story in "Father of Radio," published by Wilcox and Follett, Chicago.

He was born at Council Bluffs, Iowa, son of a Congregational minister. His father soon became president of Talladega College, for negroes, in Alabama. He was ostracized by other children. For this and other reasons he turned inward.

From Mt. Hermon Preparatory School near Northfield, Mass., he wrote his father:

"Dear Sir: I intend to be a machinist and inventor because I have great talent in that direction."

While at Sheffield Scientific School at Yale he became an agnostic and reaffirmed his decision to devote himself to science.

## American Colleges Join Forces With Industry To Fill Gaps In Labor Ranks, Boost Production For Defense

NEW YORK —(NEA)— American industry is going to get a helping hand from colleges in its fight to boost production for defense.

The Association of University Evening Colleges, which embraces the 76 U. S. colleges having extension courses, is embarking on a nation-wide program to help industry.

On The Spot Training for industry already is being conducted by many U. S. colleges. This is a field trip to a nationally-known plant by a CCNY production management class.

As explained by Dr. Robert A. Love of the City College of New York, AUEC's president, the national emergency is creating a tough problem for industry.

"Our labor force is already tight," Dr. Love says, "and as we draft more and more men, it will grow tighter still. Yet, at the same time, we must call on this smaller force to produce more and more goods—civilian goods as well as arms and equipment."

**Training Needed**

"The only way they can step up production is through upgrading, education, training, improvement of skills and knowledge. We must train existing workers to take on extra duties and bigger responsibilities, and we must train new workers to step in."

It is in this training phase that the colleges will play their part. Most of the colleges with extension courses already give some training in various aspects of industrial work.

CCNY, as an example, lists such subjects as "Plant Layout and Materials Handling," "Induction Procedures and Training Programs," "Industrial Purchasing," "Ocean Shipping," and "Management Techniques in Offices."

Dr. Love points out that other member colleges give other courses. By exchanging ideas and actual teaching materials, each one of the 76 can be equipped to give any type of course in the industrial field.

**Not So Simple**

But the plan is more than simply listing the courses in a catalog and giving them to any student who enrolls.

It is the belief of the association,

and primarily of Dr. Love, that the actual need for a certain type of worker should come first. Then a course should be given to produce the worker.

"Industry, itself, knows what it needs. We don't. But we have the know-how and facilities to produce the precise type of employe that industry is looking for," Dr. Love explains.

The plan calls for close cooperation with industrial trade associations. These associations, in every field of industrial endeavor, are the spokesmen for all America's plants and shops.

Already, 326 associations, in fields ranging from librarians to scrap iron and steel, cooperate with AUEC member colleges in producing courses tuned to industry's needs. More have indicated they'd like to help with future courses, as defense production grows.

As outlined by Dr. Love, here's how the educational program for industrial defense will operate: Suppose (as is actual) the case there is a shortage of trained fore-

men in steel fabricating plants. The trade association involved will contact AUEC or a member college. Or any industry can get in touch with the association and work out a needed course directly.

Together, the industrial men and the educational experts will work out a course plan. Possibly the teachers will be drawn from industry itself. Dr. Love thinks men with actual experience do a good job in the classroom.

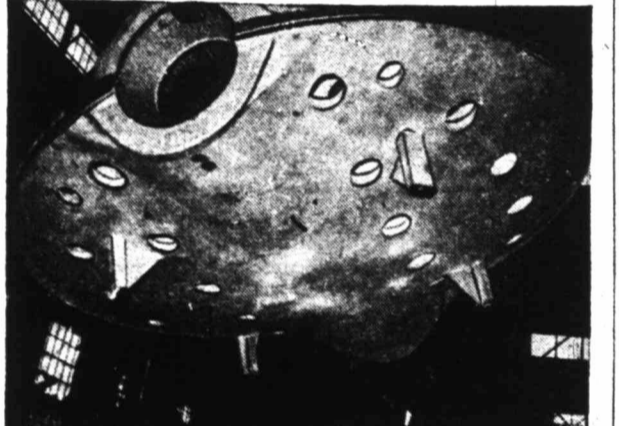

**Lots of Incentive**

Then, factory workers will be either invited to attend, or else attend on company time. There's plenty of incentive for them to come voluntarily; for one thing, if there's a wage freeze, the only chance they'll have of better pay will be upgrading.

If it works out better that way, the course can be given right in the plant. This might happen frequently, as new factories are built. AUEC, operating as a clearing house, will be able to send the course plan and, if needed, all the material and even an instructor, right to the plant.

If the courses are given in the colleges, AUEC points out that its 76 colleges are within commuting distance of 60,000,000 Americans in 26 states. Among the members are such institutions as Harvard, Columbia, Carnegie Tech, Northwestern, Rutgers, Johns Hopkins and Texas Christian.

"We've got the facilities," Dr. Love says, "and industry has the need. What's more natural than the two of us getting together for the common good?"

**SAUCER? NO, SIR!**—Let the port lights blink and a couple of tiny men crawl out of the cockpit and there's no question about it, here is a real flying saucer. But is it? Nope, it's a 27,000-pound, bronze-rimmed cast steel leaf for a butterfly valve being manufactured by Westinghouse at Sunnyvale, Calif. The valve will control the flow of water at a big Southern California hydro-electric power station.
