# Petroleum Protects Freedom

Petroleum, a magic word which long has meant Progress, has assumed another an even more important meaning-Protection-Protection of Freedom.

Yes, Petroleum Protects Freedom, and today the preservation of Freedom and the American Way of Life perhaps are the most important things under the sun. Without petroleum protection, with which the United States is blessed, we might even today be in a hot war, struggling for our very existence.

The strength of a modern nation is judged largely on its ability to produce oil, and surely petroleum is essential in our all-out defense and mobilization effort.

During 1950, the United States produced 1,978,000,-000 barrels of crude oil, which amounted to 52 per cent of the world's supply for the year. At the beginning of Stalin's warning that the United Senate floor. 1950, proven reserves of crude oil exceeded 28,000,000,000 Nations must accept Red China's Senator Vandenberg's ideas barrels-more than a third of the proven reserves of the entire world.

Other countries are endowed by nature with rich oil deposits, but to the American petroleum industry, with its thousands of competing companies, both large and small, diate Soviet military intervention in the movement of more U. S. troops Labor Fireworks credit must go for developing oil production to the point Korea. Instead, Stalin issued his bolicy by a compromise.

Before Labor members of the wage Stabilization Board resigned, where it is protecting the freedom of our nation.

The peculiar importance of petroleum in the mobili-There are signs that Stain was forced to take this action to keep forced to take this action to keep in Chinese puppet in line. For, a serious breach in Squiet-Chinese relations has been reported as a relations has been reported as

## Iron Ore Is Running Out

Not long ago the U. S. Steel Corporation announced it is building a huge new integrated steel plant on the adaptable to making tanks, guns, banks of the Delaware River near Trenton, N. J. Then National Steel Corporation signified intent to

erect a mill on the Delaware farther south.

Now the government has disclosed its approval of a \$250,000,000 steel plant in the New London, Conn., area. This mill. also an integrated one, is designed to satisfy New England's long clamor for a complete steel works.

All these prospective plants are, of course, close to manufacturers secretly have stock big markets. But, being near the Atlantic shore, they're also more vulnerable to enemy air attack. The prime reason they're being placed at tidewater edge is the blunt fact that in the years ahead much of our high-grade iron ore will have to come via water from Labrador and Venezuela. This is one of the facts of life in the new decade.

Fortune tellers are said to be disappearing. They can't stand the competition of the penny scale.

Why is it that folks who intrude always say they hope they don't?

A Kansas town judge ruled that cats and dogs may be kept in apartment buildings. Why not include children, too?

# WASHINGTON COLUMN

#### Limiting U. S. Forces In Europe May Hamper Ike's Crusade

By PETER EDSON NEA Washington Correspondent

WASHINGTON-Main usefulness of the great debate over sending U. S. troops to Europe is to convince the American people this is the correct thing to do.

The current Senate Foreign Relations Committee earings on whether to limit the American contribution to European defense is the second heat of this race.

The speeches of ex-Presi-4 General Eisenhower and the state-ments of President Truman con-Portugal Isn't So Interes stituted the first trial heat.

The final debate in Congress on on this issue will be the third and

The recent Gallup poll indicating people approved sending more troops to Europe might be taken as an in-dication of public sentiment. Only 35 per cent disapproved. The other

That 55 per cent is hardly a big be with pretty full backing of the American people. Otherwise, General Eisenhower will have one hand tied behind his back in his effort. as supreme commander, to organize Western European defenses

Putting any 20 per cent limit, or one U. S. division for every five divisions might well tie both his hands. Touchy Situation

It is a touchy situation which General Eisenhower has to deal with when he returns to Europe and sets up headquarters. Closer examinaon of his statement to Congress and his report to the nation remay have been exaggerated. He did not say that everything was per- may be found in the so-called Truhave worked, if needed, and the wise he did not say the situation was hopeless.

The material resources to defend America and its offspring, the Alum- was needed, since West was Western Europe are there. The manpower is there. The industrial The strategic situation is such that defense is possible.

The one thing that is lacking,

however, is the unity of purpose to Western Europe against Russian imperialism, at all costs This lack of unity in Europe is similar to the lack of unity in the United States. On both continents there are diverse elements, political differences of opinion, hreats to the national security of the 12 countries that make up the North Atlantic Treaty organization.

General Eisenhower's number one task therefore becomes not just Fined \$100, Another military, but political and psycho If his new "Oruse logical. Europe" is to be successful, he must spades would drop, so he just took be backed by unity at home as well as unity abroad.

Consider just a few of his prob Little Denmark, up on the Baltic Sea, is on the exposed northern flank of any Russian aggression

TODAY'S QUESTION

With both sides vulnerable, your partner deals and bids one spade The next player passes. You hold: Spades K-8-4-2, Heart 6, Diamonds A-J-5-3, Clubs K-8-7-2. What do

dent Herbert Hoover, Sena-tor Taft, Governor Dewey less their neighbor to the south, and others; the reports of Western Germany, is brought into Portugal Isn't So Interested

Portugal, at the other extreme, is safe behind Spain and the Pyrennes on to set American policy Mountains. Being the last country that might be invaded by any successful Russian aggression, Por doesn't care much what happens on German rearmament.

General Eisenhower's own exarmament question has been pushed too far and too fast. It should be allowed to cool off till German public opinion is itself unified enough majority to be convincing, Willing to contribute its share to a unified Western Furgore. unified Western Europe

Germany is not now a member of the North Atlantic Treaty organization. Neither is Spain nor Yugoslavia. Technically, as supreme commander of the NATO forces, General Eisenhower can't talk to the heads of these governments, their foreign and defense ministers, their generals. Nor can he integrate their contributed, forces into a European defense

scheme. He can't have real and complete Western European unity until the 12 Allied countries give him a directive on what to do in every given situation, such as a Red attack on Germany or Yugoslavia-or Turkey and Iran, which also aren't in

American policy on such matters man doctrine. This policy, as applied in Greece and Korea, is to aid any country that seeks to resist Communist aggression. But this is not NATO policy. Until it is, there can be no complete NATO unity

of purpose.

In building up this unity, General Eisenhower must rely first on the American willingness to support That will be measured first by U. S. divisions sent to Europe. If there is a limit placed on that support, it well may wreck the selfconfidence that General Eisen-hower must build up in the European countries in order for them to defend themselves.

# One Drunken Driver **Bound To Grand Jury**

One drunken driver was fined \$100 and costs Saturday in county court while another was ordered held under \$2,500 bond for action of the Midland County Grand Jury.

The fine was levied when the driver pleaded guilty before Judge Clifford C. Keith following his arrest

The second driver was arrested late Friday by Col. Milan N. Playsic, director of the city's Department of

Public Safety. Colonel Playsic said the man was given a two-year suspended sentence last October in District Court at Odessa as a second offender

He was arrested again in Ector County in January and fined \$70 on charges of drunken driving.

GROWING

That is a different story.

In December, crude oil and pro - The petroleum jor industries to go under the lid of price controls, authorized by Consurprise action, especially since drude oil had held a constant price level three years, it was perhaps more surprising that not a single ongressman from an oil producing state took serious issue with the

price control action. While price control may be essential, it remains to be seen whether in the current mobilization effort, the crude oil industry will be held to a constant level, while virtually all other prices and wages are permitted to advance. That's what happened in the last war, and it did little good for the oil industry or the nation.

Further than that, the oil indus try is under new attacks from President Truman, the Treasury Department and some in Congress about the depletion allowance. This allowance advises oil producers to subtract 27.5 per cent from their gross revenues each year, before starting in to figure their income tax. The 27.5 per cent is to repay the producer | court-appointed | counsel | for for using up a "depleting" asset.

# 'Job Well Done' Is **Proud Record Of Petroleum Industry**

By TOM CONNALLY Written Especially for the Oil n of The Reporter Telegram)

Reporter - Telegram hosen an apt thame in building its nnual Oil Progress Edition around the slogan, "Petroleum Protects

It is unnecessary to emphasize the crucial role which petroleum plays n our national defense. It is sufficient merely to attempt to imagine, if you can, what the armed forces and civilian economy of this country would be like if we literally 'ran out of gas."

On any list of strategic materials petroleum is at, or near, the top. But, unlike some other materials happily absent from lists of strategies materials in short supply. This fortunate circumstance is in large in itself, and in this connection I means of making its full contribution to the would like to call attention to the happily absent from lists of strategic materials in short supply. This Just finding them is quite a job sight, and the resourcefulness of the petroleum industry.

would like to the vigor, the lost depletion allowance provisions of our tax laws which, I am convinced,

have stimulated the industry to Even during the days of gasoline more exploration and more developrationing and other civilian short- ment. We are this year again con- 800,000 Volumes ages in World War II, there was fronted with strong demands for never a serious possibility of the operations of the armed forces be-CIC, air intelligence, aerology, photo interpretation, electronics, aviation age. The industry, in fact, has done gress will take, but as one member of the Senate Finance Committee, I its job so well that the public takes

Now, this availability didn't "just off the list of shortages, the indushappen." It is true, of course, that there did "just happen" to be huge try has to cope with shortages in officials of the Western powers, the course other items necessary in page 1 did to the western powers, the reserves of crude petroleum beneath the production, refining, and disthe soil of Texas, and particularly tribtution of petroleum and petro-West Texas. But before they did

ingly unrelated product vital to oil production, take the case of sui-phur. Sulphur is the principal in-gredient in sulphuric acid, which in turn is used in making hydrochloric acid. And hydrochloric acid is used

THE REPORTER-TELEGRAM, MIDLAND, TEXAS, FEB. 25, 1981-

Tom Connally

In its efforts to keep petroleum

for acidizing oil wells.

When sulphur is in short supply. as it is now, there are resultant shortages in sulphuric acid and hydrochloric acid.

These shortages recently became so acute that the Department of Commerce reduced American ex-ports of sulphur for the first quarter of 1951 by 30 per cent of the

1950 average.
Official of the Commerce Department, with whom I have dis the situation, are concerned over dwindling sulphur supplies and have the matter under constant review in their efforts to avoid seri-

ments and consumption. I am afraid that the story of sulphur will be repeated many times anybody any good, somebody had to in connection with other materials find them, refine them, and market before this year is out. But I know from past experience that, whatever be counted on to find the ways and

# **Hungary Exports**

BUDAPEST -(P)- Hungary exported 800,000 books last year, "Magyar Nemzet" reports. Most for granted the availability of the propose to continue to support the thousands of petroleum products that go into the things we use in that go into the things we use in stand in the law. In some cases books sent to the countless other items necessary in paper indicates.

ne most revolutionary business machine since the typewriter, having more "firsts" than any other dictating machine. Hundreds are in use by busy people in the oil, insurance, and kindred business. They still are available for immediate delivery.

Art Metal steel office furniture is another major line of the Howard

Art metal steel office furniture is shother major line of the howard company. The oldest name in steel office furniture, Art Metal for years has been the leader in West Texas. Howard's franchise extends from Sweetwater to El Paso on this splendid line. Like most everything else in steel, stocks are becoming imitted, and those moving into new offices at a later date are urged to place their orders and take delivery just as

soon as they can.

National Adding Machines, formerly known as "Allen-Wales" are distributed from Midland by the Howard Company, Delivery is slow, but Howard's position as a distributor gives them a much larger allotment than dealers in larger cities. This product is made by the National Cash

Register Company.

One of the leading lines of the Howard Company is the Southworth

One of the leading lines of the Howard Company is the Southworth Paper Line. This company made the first sheet of typewriter paper over 100 years ago, so naturally they were called upon to make the paper for "The Permian Basin" illustration above. They make a complete line of fine rag papers, and a dealer handling their line is immediately accepted as one of the leaders in the industry.

One of the most popular lines of the Howard Company is that of The National Blank Book Company, makers of "Eye Ease" bookkeeping forms, and America's outstanding line of ring binders and ledger binders. This merchandise is becoming hard to get, but again Howard's position in the industry is better than most dealers. In addition to National, they handle Wilson-Jones products, which are well known and accepted in this area. In fine office Furniture, the Howard Company is distributors for such outstanding lines as Executive Office Furniture Company. Myrtle Desk, Imperial Desk, Alma Desk, National Desk, Jasper Desk, and other leading desk manufacturers. In the chair line they handle products for Stanley.

Imperial Desk, Alma Desk, National Desk, Jasper Desk, and other leading desk manufacturers. In the chair line they handle products for Stanley, Jasper, Sikes, Marble, Huntington, Thomas, and many other. Both desks and chairs are in critical supply, and the Howard Company urges all whe will be in the market for these lines later in the year to place their orders now, either with them, or with some other good office supply company in

Midland.

No one need go out of Midland to buy their every office need. The Howard Company is representatives for several leading safe manufacturers, as well as makers of check writers, check signers, check perforators, coin counters, and specialty equipment. They stock the Remington-Rand line, and at present are delivering from stock.

One of the features of the Howard Company is its up-to-date catalogue files of major manufacturers. If you want a coin wrapper, they can tell you where to get it. If you want a \$7,000 desk, they are on intimate terms with the manufacturer. Being members of the National Stationers and Office Equipment Dealers Association, the Howard Company gets first knowledge of anything new in the industry.

You are urged to "Get the Howard Habit" for any of your business needs ... The Heward Company at 114 South Loraine Street in Midland

needs... The Howard Company at 114 South Loraine Street in Midland can supply most anything available. Free delivery service is prompt and courteously handled by Midland boys training for future positions of responsibility. And one thing about the Howard Company is, they really

# **Program Announced** For APIDP Meeting

The program has been announced for the Spring meeting of the Southwestern district of the American Petroleum Institute Division of Production in Beaumont on March 7, 8 and 9.

An unusually large attendance is indicated for the session. Permian Basin Chapter of API is a part of the Southwestern district and a large number of oil

operators from this area plan to be present for the gathering esses will be presented on several important matters connected with the oil business. Several periods will be given over to dis-

cussion of some of the problems of Roy Carter of Kermit, chairman give a report on the activities of to the essential character of petro Midland will preside at one of the industry and fuel-hungry war equip-

COLORADO CITY - Approxi-, able to accomplish far better results than a government-controlled petro leum industry."

Fell said there were four essential factors to a strong, healthy, aggressive domestic producing branch of the petroleum industry able to search for and develop needed petroleum reserves and productive capecity. These essential factors are:

"Adequate money . . . sufficient and the expensing of intangible controls consistent with conditions

Fell praised the work of Bruce Fell highlighted the meeting in Brown, R. G. Lawton, Frank Watts his address, when he said, "A free, and Minor Jameson, Jr., in the dynamic petroleum producing in- Petroleum Administration for Defense. He stated they are "men of high integrity, know the problems of oil men, believe in the fundamental principles on which our government was founded and in the com-

petitive system of free enterprise. "Percentage depletion and the option to expense intangible drilling and development costs have been a major factor in stimulating the exploration for and development to meet the growing need for petroleum products in our growing domestic economy," Fell said.

He further pointed out that "In seace and war our domestic output quet program Friday night. panded supply has brought about marvelous changes in our lives. It enabled us to furnish 83 percent of all the petroleum products utilized by ourselves and our allies to win World War II.

"Because of adequate supplies. prices have been low. Wholesale ommodity prices generally increased even more since that time, of tax, of a much better quality, is now less per gallon than own public relations firm. it was in 1926, and 9 cents less per gallon than it was in 1920.

Depletion Allowance "Any reduction in the percentage depletion allowance will diminish the incentive to explore for oil and

the less will be the incentive. The less the incentive, the less risk capital will be available and ources, with resultant less produc-

tive capacity being developed . Eventually this proposed reduction in statutory depletion provisions of our present tax laws would bring troleum products. # Babe, Alice Stanton In In Two-Ball Regional Final Round Cage Finals

Babe Zaharias and George ton advanced to the finals of Bolesta, and Alice Bauer and the Region 2-B basketball Pete. Cooper played sub- tourney here Saturday mornpar golf Saturday to enter ing, defeating Pottsville the finals of the International 63-45 in the semi-finals. Mixed Two-Ball Open Golf Tourna-

The two teams will meet in the 36-hole title match Sunday.

The Babe and Bolesta, both from Tampa, eliminated Peg Kirk of Findlay, Ohio, and Dick Chapman of Pinehurst, N. C., 4 and 3, while Miss Bauer of Midland, Texas, and Cooper, Ponte Vedra Beach, back the darkhorse team of Grace DeMoss of Corvallis, Ore., and Walter Burkemo of Detroit 5 and 4.

The Babe and Bolesta were one under par 71 when they closed out their match on the fifteenth green of the 6.454-vard course.

In the other match, it was simply a case of Cooper's long distance clouting and Miss Bauer's amazing accuracy around the greens. They played five under par.

#### Mild Cold Epidemic Hits Braves Camp

BRADENTON, FLA. -(P)mild epidemic has hit the Boston Braves training camp and sidelined First Baseman Earl Torgeson and Southpaw Pitcher Bob Chipman. They are suffering from colds, as are Pitchers Warren Spahn, Chet Nichols and Nohmke Roy. The latter three, however, are able to report for practice

The Bluffs were to play Valley Mills in the finals Saturday night. Bobby McClain poured 22 points through the meshes to pace Stanton to its semi-finals victory.

The Buffs were to play Valley ney favorite. Avoca, in the opening 47-41 and topped Early (Brownwood) 46-29 in the second

Valley Mills edged Lipan 53-46, comped over Lohn 62-38 and nipped Westbrook 45-41 to reach the championship, round.

> been somewhat less effective in combating the production of marihuans C. W. Cunningham, deputy U. S. that scorns bigness without beauty the plainting at a cost of \$600 to park employes could do it for \$50 a cosmissioner of narcotics, stated has won its acclaim. federal laws are generally adequate except that the situation would be improved if mandatory penitentiary sentences of substantial length were

subsequent offenders. "Narcotic addiction is actually contagious' in that it spreads from the initiated to the new thrill seeker. Bearing that in mind, most state laws may be deficient in the given primarily for beautification matter of compelling addicts to take

Narcotic officers believe the public can do little to combat the evils of narcotics other than to report suspected violators to officers and to see there is thorough support for all laws directed at the problem.

As McLaughlin notes, "It is probably not wise to attempt to educate children to the dangers of narcotics. In instances where this has been ried, a dangerous curiosity has been developed with harmful results."

The North Cowden Field was discovered in 1930.

REPORTER-TELEGRAM'S OIL DEPARTMENT-From this corner in The Reporter-Telegram's newsroom flows a constant stream of news on oil activities in the vast Permian Basin Empire. The Permian Basin oil news-reliable and complete-is gathered and written by a four-member oil department staff headed by James C. Watson, the newspaper's veteran oil editor. Staff members pictured, left to right, are Bobbie Logan, Pansy Burrus, Watson and Joe Salman. Watson also operates the Permian Basin Oil News Service, which, in addition to furnishing complete oil news to The Reporter-Telegram, provides West Texas-New Mexico oil reports to more than 25 other Texas and out-of-state publications. Covering the oil front in the headquarters city of Midland is a big job, but Watson and his efficient staff accomplish the task and meet all news deadlines.

# Proud Corpus Christi Dug In And Planted To Win Beauty Prize Motorist Recovers

ROTARY CHAPLAIN -

The Rev. Luther Kirk, pas-

tor of the First Methodist

Church, has been ap-

pointed chaplain of the

Midland Rotary Club, suc-

ceeding the Rev. Howard

Hollowell, who moved to

Dallas recently

An announcement that Corpus the park superintendent, nursing blocks. Private owners were pre-

Christi had won the sweepstakes award in the "More Beautiful America" contest conducted by the required in cases of second and magazine, Better Homes and Gardens, vindicated citizens who have carried on a vigorous campaign for civic beautification. The award. made for work carried on between April 1, 1949 and No. 1, 1950 was of the city's bayfront.

That, however, is only part of the story. The improvement movement, still progressing rapidly, covers a score or more projects. It has enlisted the support of countless individuals, organizations and con cerns.

The crescent-shaped city of 108. 063 (there are about 168,000 in the metropolitan area), is built along Corpus Christi Bay, off the Gulf of Mexico. Stretching along the bayfront adjacent to the downtown area is a three-mile driveway. The driveway and the piers abutting it which form a yacht basin were part of a storm protection development completed just before World War II. The parkway was planted in grass and palms were set out, but no further beautification was attempted during the war. The piers
—locally called T-heads because of the shape-became an unsightly mess, their sandy surface decorated only by abandoned boats and bits

Line Boulevard Fifteen blocks of oleanders now line the boulevard and the T-heads

have been converted into parks with ample space not only for palms, shrubs and grass, but also for band where square dances are held. Two larger parks a slight distance down the shoreline now are

in the making.

The recently-completed beautification, plus that now underway, will aggregate \$100,000. Gus Heinmann city park chairman, declares the municipal expenditures constitute only a part of the cost of Corpus Christi's face lifting, however.

It started when a group of citizens formed the Civic Beautification Association with annual dues of \$1, and started the oleanderplanting project. The association's president, Mrs. W. Armstrong Price, prevailed on practically every civic organization and a great many private citizens to join the association or else endorse its projects.

Garden club members rooted pleander cuttings from their own plants and nursed them until they were ready to start the intensiv plantng of the first block on Shore line Drive.

After the first block of planting had been finished the city took

# Gold Buying In Malaya Flourishes

SINGAPORE -(P)- A Chinese goldsmith in Johore Bahru feared the worst when 10 Chinese women dressed in black, entered his shop and ordered him to shut the front door. He was sure they were women bandits and that he was going to be robbed when one of them asked him

to go into the back room. The woman ordered him to bring out his gold ornaments from a showcase, then produced \$1,000 in \$10 bills and said, "Give me gold bangles to that amount." The awestricken goldsmith complied. Then each of the other nine produced \$1,000 and asked for gold.

When the \$10,000 deal was closed the women said: "We had to do this in secret. If anybody saw us buying all this gold we might have homes." With fear of another war, gold has become preferred as a security to cash among laboring classes in Malaya.

IVAN H. WOODS HERE Mr. and Mrs. Ivan H. Wood of Fort Worth were Midland visitors

# CORPUS CHRISTI -(P)- A city | over. Nurserymen had offered to do | his funds carefully, figured that

vailed upon to do the rest. Crowning Achievement The crowning achievement of the There had been for many years a cluster of shacks on the bayfront which officials termed a health

menace. Mrs. Price worked every scheme she could think of to ob-Finally, she 'urned her attention to the city's plumbing code. The city legal department moved in; the shacks were moved out. In only one announced objective did the association fail, but the movement to get unsightly billboards removed from all entrances

month the Chamber of Commerce's Civic Affairs and Beautification Committee petitioned the zoning commission to bar such billboards. Announcement of the "More Beautiful America" award is expected to create a new wave of enhusiasm for civic feautification. Tipped in advance of the announcement, a committee was chosen immediately to plan a bangup celebration on the bayfront April 29 when editors of the magazine will be here to deliver the plaque and

\$2,000 prize check.

104 E. Texas St.

HEADED FOR MIDLAND-Clyde Beatty, greatest wild animal trainer of all time, will come to Midland with his own huge circus on Wednesday, March 28, under sponsorship of the Midland Kiwanis Club. Beatty, who steps into a cage filled with 40 lions and tigers, will appear at performances starting at 2 and 8 p.m. The shows open with a gorgeously-produced processional pageant, "Spangleland on the March," in which great masses of people and hordes of animals take part.

Thanks ... **CONTINENTAL** Travelers for the Biggest Year in our 16-Year History!

We thank the more than 206,000 persons who flew Continental Air Lines more than 72,300,000 revenue passenger miles during 1950, enabling us to record the biggest 12 months business in our 16-year history

Thanks for your patronage. We of Continental A Lines really appreciate serving you.

We will continue to do our best to provide the finest and most reliable service... In 1950 we completed 99.57 percent of our scheduled miles.

# Beckworth Keeps Up His Campaign For Overhaul Of Cotton Control Law

WASHINGTON -(AP)- Rep. Lindley Beckworth of Texas is keeping up his campaign for an overhaul of the cotton crop control law for the purpose, as he puts it, of giving the little farmers a better break.

Since he's not on the House Agriculture Committee. Beckworth airs his views largely in the Congressional

Record and in conversations

with colleagues. As a top-

ranking member of another

committee - that on com-

merce-he knows it's generally a

futile gesture to sponsor an import-ant bill not handled by the com-

A VICTOR STIEBEL REPRODUCTION . . . Superbly simple of cut, and superbly tailored. One of the fold-back peplum pockets conceals a tiny mad-money pocket.

Our authorized reproduction is such a fashionsure style that we've had it made in two aristocratic fabrics. Choose Gray or Beige in MIRON'S Worsted Flannel . . . or JUILLIARD'S Planateen in Middy, Red, Violet, Gold or Black. Sizes 10 to 18.

Klingrite original in sheen GABARDINE, especially designed for Half-Sizes . . . petal lapels are gently repeated by fine yoke seaming . . . and it's newly collarless in back. The 5-gore skirt keeps its slim line . . . little pleat for walking ease. Sizes 121/2 to 221/2 in Middy, Luggage, Violet and other Spring of

Now ... and on Easter Morning.

silhouette

very 1951 ... our wrinkle-

proof, reed-slim twosome in

corded faille. Craftsmanship

shows in the little touches ...

pearl ball fasteners, double-flap

pockets with tiny self-buttons,

Wear it as a suit or a dress;

have it in black, brown or navy

with fine chalk stripe.

Regular and half-sizes.

Jeanie Original

There's the Easter feeling in the dainty lilies of the valley around the folded crown in the velvet bows, the fresh white under - brim. Finest Pettipurl straw braid flattering to every age, every woman. Navy and all the Spring

# Going Forward With Midland

BARNEY GRAFA

REALTOR

CLASSIFIED DISPLAY

Midland is a mighty fine place to live in. It's a city in which to invest your future and the future of your family and business. Oil, Agriculture, Industry, Merchandising, Insurance . . . all have accounted for the onward march of Midland, headquarters of the Permian Basin.

To A Future That's All Ahead ....

The W. F. Chesnut Agency is a part of Midland and the Permian Basin. We are proud of our relationship to this vast area and pledge our experience and faith to the future of Midland!

# W. F. Chesnut's Agency

Building - Mortgage Loans - Insurance - Real Estate W. F. CHESNUT - NORA CHESNUT - TOM CASEY REALTORS

eum Protects Freedom

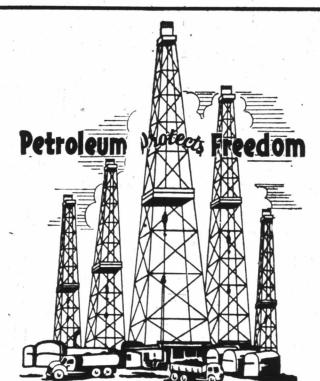

# Doesn't "Just **Progress**

# In Real Estate Mortgage Loans

Our real estate mortgage loan department has enjoyed substantial expansion in both scope and quality of service, keeping pace with the ever - increasing demand brought about by progress and development of the area we serve. This progress didn't "just happen" . . . we feel that the people of this section prefer to deal with "home folks," providing the service is of the kind they are entitled to expect. Many, many local people have made their home and commercial loans through this firm, where all phases of the loan are processed in Midland . . . and where all loan records, including balance, taxes, and insurance are available immediately if required. When you require a home or commercial loan, deal with your neighbors!

We cordially invite new residents to make our office their "Headquarters for Housing."

Progress didn't "just happen" in the petroleum industry in West Texas, either. The tremendous development of oil activity in this area is the result of hard work, technical know-how, and the willingness to gamble these things against the chance of wresting critically-important oil from the earth. We salute the oil industry for their part in the progress of Midland and of West Texas.

# In Insurance and Real Estate Sales

Our records of sales in real estate and in all types of insurance are steadily increasing, a fact of which we are very proud. Our real estate department is complete, offering a service to buyer and seller that cannot be excelled in speed, efficiency and competent handling. Along insurance lines, we represent capital stock fire and casualty insurance companies, offering unlimited facilities for the handling of all classes of insurance and bonds, including fire, windstorm, hail, automobile, physical damage and liability, workers' compensation and contractors' general liability, life, health and accident and group hospitalization. The progress we have made in these departments didn't "just happen" . . . we've done our best to EARN it with constantly improved service! Remember, under all is the land we love. And your Realtor is a creator of homes, a builder of cities, a developer of industries and productive

# Petroleum Progress Is the Progress of All!

The tremendous progress of Midland in recent years has been based largely on the development and expansion of the oil industry in West Texas. When the industry chose Midland as their Permian Basin headquarters, the growth of our city received an impetus that will be felt by EVERY MIDLAND RESIDENT for many years to come. For their important part in the progress of all, we salute the petroleum industry!

# Look for this Emblem of Progress

When you want to buy or sell a home or any other kind of real property, or when you need advice regarding real estate, look for the "Realtor" emblem . . . the sign of a progressive, ethical, dependable real estate dealer. The Realtor serves both buyer and seller with efficiency and dependability.

In order to use the name "Realtor," a real estate dealer must promote and maintain the high standards of conduct in the transaction of real estate business as expressed in the Code of Ethics formulated by the National Association of Real Estate Boards and by the Texas Real Estate Association.

# Pardon Us For Pointing

But we are humbly grateful (and humanly proud)

# RIPLED

# Our Annual Volume Of Business In The Past Year!

We consider it a matter worth "pointing out" that our insurance, real estate sales and real estate loan volume in 1950 more than tripled the amount handled in 1949.

Gratitude and pride are our uppermost feelings when we think about the past year. We are deeply grateful that the people of Midland have placed such a largely increased amount of confidence in our firm, for public confidence is the foundation and corner stone of an agency such as ours. And we are very proud to be in a position of taking an even larger part in the growth and development of Midland. When we sell a home or furnish the capital needed for home purchase, we feel that it is much more than just a business transaction . . . it is the establishment of another vital step in the forward movement of the area in which we live, and in the improving welfare of all Midland citizens.

And here is something else of which we are proud. This agency was formed with the idea of continual improvement of the scope and quality of service rendered. The rightness of that idea (which we still follow) has been borne out through our record of steadily increasing public acceptance.

# Oil Is More Important Than Ever Before

Oil has always been an important factor in the economy of any region wherein it was discovered, and of late years has become of nationand world-wide economic significance. But petroleum has come to mean more to a free world than increased wealth and a generally higher standard of living.

It is truly said today that "Petroleum Protects Freedom." Without it we cannot defend ourselves from aggressors, for oil is the lubricant, the fuel and the propellant of modern armies. So it is with double appreciation that we salute the oil industry, and the men who have brought it to West Texas.

Oh, Yes...That Reminds Us

To Point Out That We Have Changed The Firm Name To

Years of Progress with Midland!

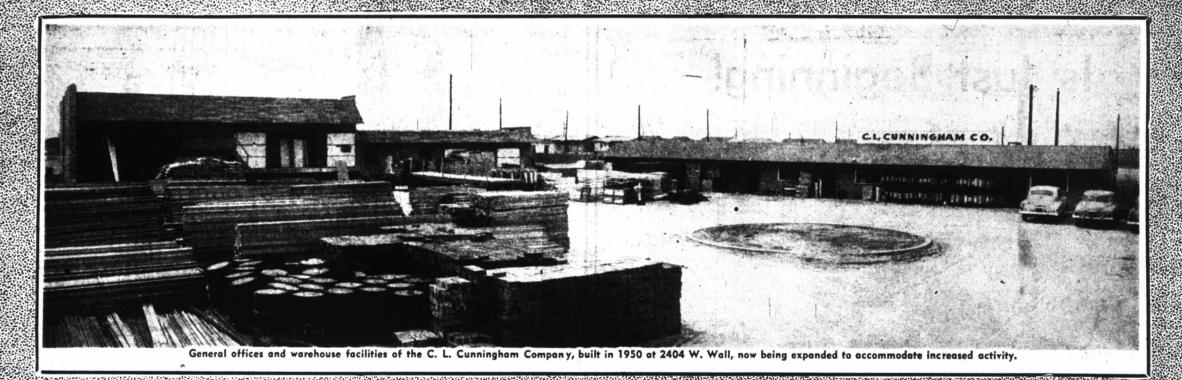

It was in February, 1945 that the C. L. Cunningham Company began operations in Midland. Since that time, we have had the distinct pleasure of taking a substantial part in the phenomenal growth of the Capital City of the Permian Basin. Looking back over the past six years, we are very proud of the fact that we have been a "Partner in Progress" with the oil industry, the cattle industry, and all others in the Midland area who have had a share in the development of Midland into a potent force in the world of today.

# Construction Records Broken!

In the six years we have been doing business in Midland, we have done our best to keep pace with its rapid growth. That we have succeeded in this may be judged from the fact that each year since 1945 has been busier than the one preceding. In addition to our remodeling and re-conditioning activities, we have built many new homes and commercial structures in Midland. We pledge our full efforts in the future growth of Midland . . . as a partner in Midland progress!

# You Can't Measure

# **PROGRESS**

IN

# **Dollars and Cents!**

PROGRESS is defined by Webster as a "movement forward... an advance to an objective." And that is the definition we have in mind when we think of progress in our own business or the progress of the area we serve. It is our belief that true progress in the real estate, mortgage loan and insurance business cannot be measured in dollars and cents... it is measured in ABILITY and WILLINGNESS TO SERVE the needs of the public.

Vast strides forward have been made in the progress of Midland and West Texas in recent years, mainly due to the establishment of a steadily-expanding petroleum development in this area. It is our constant aim to keep pace with the progress of Midland ... to cooperate in every way with those interested in small or large developments here . . . from the purchase, financing or insuring of a small home to large commercial propositions . . . and to offer an ever-improved real estate, mortgage loan and insurance service to the public. The progress thus far of The Allen Company is based on customer satisfaction . . . we are interested not so much in HOW MANY we serve, but in how many we can serve WELL!

# The Allen Company

R. W. "Smokey" Allen, Realtor

Walter Hemingway Harold Cobb 401 NORTH BIG SPRING — TELEPHONE 3537

# Partners in Progress

Many things have contributed to the phenomenal progress of Midland and West Texas in recent years, with the development of oil production leading all others. The oil industry has brought tremendous growth to this area . . . not growth of the "here today, gone tomorrow" variety, but a solid, continuous expansion of every phase of every-day living.

It is a source of great pride to us that we have been privileged to take a considerable part in the huge building program that has been taking place in Midland in the past 5 years. We have made every effort to become a "partner in progress"... to conscientiously fulfill a vital role in the expansion of the Capital City of the Permian Basin Empire!

# In The Past 5 Years We Have Built 278 NEW HOMES IN MIDLAND!

34 Now Under Construction

For Example . .

# 50 Brick Homes in Parklea Place

Pictured above is one of the beautiful brick homes we are now completing in Parklea Place. These homes represent the best residential values available on today's market. A variety of designs and floor plans provides individual appearance in each one and gives prospective owners ample opportunity to make a 'personalized' selection. Drive out to Parklea Place today and see these homes. You'll admire the solidity, permanence and economical maintenance of the brick construction. You'll love the design, planning and ample living area. And you'll want a brick home in Parklea!

# Fine Homes – Built to Specification

The home pictured here was recently completed by the Boyce Construction Company for Mr. and Mrs. Miles Hall at 1508 Cuthbert Avenue. We consider it to be an excellent example of translating a customer's ideas into a home. Of the many homes we have constructed in Midland, a large part have been built in this manner... conferences with the owner... drawing tentative plans... further talks with the customer until every individual idea is incorporated into the plans... final blueprints... actual construction. This method has proven to be most satisfactory, especially in the building of better type homes

# A Partner In Progress

FOR A

# Quarter of a Century

Progress means a lot of things . . . it means an increase in the number of people living in any given area . . . it means higher standards of living . . . better homes . . . better schools . . . better churches. Progress means to us a reaching out for achievements called improbable or impossible, and, making that dream a reality, dream again.

A bountiful Nature has made real progress possible for Midland and West Texas, but it has always been and always will be up to you and to me to turn possibility into accomplishment. For 25 years, we have enjoyed taking as large a part as we were capable of taking in the development of this area along solid, progressive lines.

# We Salute the Oil Industry and the Men Who Brought It to West Texas!

No other one thing has so greatly contributed to the development of Midland and West Texas as has the oil industry. The prosperity that accompanies petroleum activity, added to the economy of a prosperous cattle and cotton area, has resulted in the fast-moving, aggressive Midland of today — not a "boom town" in the ordinary sense of the word, but a city building for tomorrow!

For their very important part in making this area one of the finest places on earth in which to live, we salute the oil industry and the men who brought petroleum development to West Texas!

The oil industry is striving confort, and the livestock man is doing his best to produce sufficient meat to supply the ever-increasing demand brought on by conditions at home and abroad. Difficult To Distinguish

It is difficult to distinguish between the oil man and the rancher oday-most ranchers being in the oil business in one way or another and many oil men being in the ranch business. It is a most enouraging and satisfying situationit is a healthful condition in so far as West Texas and the entire nation are concerned. their problems, but both have as their goals the preservation of the American way of life

On this occasion, the livestock industry of West Texas salutes the petroleum industry of West Texas on the noble job it is doing in the defense effort.

All will agree that "Petroleum Protects Freedom."

Cattle prices centinued upward at the Midland Livestock Auction Company sale Thursday. Bidding was strong and active on 490 head consigned and sold.

Fat calves and vearlings sold for \$31 to \$35, mediums and common kinds \$27 to \$C1. Fat cows drew \$25.50 to \$28, medium cows \$23 to \$25.50, canners and cutters \$18.50 to \$23.50. Bulls cashed for \$27 to \$29. C. A. Travelstead got \$35 for six bull calves "hat weiged 475 nounds. auctioned for \$39 to \$44 and heifer calves were about the same. Steer yearlings went at \$32 to \$37. Wilkie Roberts paid \$19,656 for 96 steer yearlings he bought for John Osborne of Buckeye, Ariz.

of livestock will compete for \$6,826 signs of Vitamin A deficiency are in premiums. This is the largest night blindness and unnatural hoof number of animals ever to be exhibited in the San Angelo Show since its beginning 18 years ago.

Trophies will be awarded to the Grand Champion of the Boys' Baby Beef Show, the Grand Champion of the Boys' Fat Lamb Show and the Champion Pig of the Boys' Pig Show. The FFA chapter or 4-H Club winning the rotating trophy three times in a row will own the trophies permanently. This is the first year these trophies will be awarded.

A 30-day waiting period began Wednesday after 15 days of testimony taken in the U. S. Department of Agriculture hearing on a der for North Texas, according to IN TSCW CLASS STUNTS from Dallas.

parties have until 20 the briefs and a transcript of ers of the Freshman Class Stunt the hearing will go to the Department of Agriculture

If the department decides there need for federal controls in North Texas a proposed order will be isued and voted upon by milk producers in the area. Two-thirds of those voting must approve the order for it to become effective.

The order was asked by the North Texas Milk Producers Association, representing between 1,700 and 1,800 dairymen. Later the Wichita Falls Producers Association asked that the Wichita Falls milk shed be included

During the hearing, dairymen contended they were squeezed between rising costs and non-rising prices for the milk they sell. They accused milk plant operators of discriminating against association members and said some operators gave short weights and under-tested he butterfat content.

Milk plant operators opposed the order, saying the market is stable and prosperous for both plants and producers. They denied the charges of discrimination and the mishandling of milk

First With The News

MIDLAND, TEXAS, SUNDAY, FEBRUARY 25, 1951

SECTION THRE

# Women

The petroleum industry has progressed until now it is one of the most important in America-and women are playing important roles in its development.

Women connected with oil companies make up a large part of Midland's population. Approximately 1,300 women are engaged in the oil industry in Midland, the headquarters city of the vast Permian Basin Empire.

Young women from many sections of the United States actively are engaged in the petroleum industry here.

Some of the positions they hold are secretaries, receptionists, geologists, computers, typists, editors of company magazines, laboratory technicians, draftsmen, reproduction specialists, and statistical secretaries.

Many women also are employed in the land and scouting departments and other important phases of the

Others operate their own oil industry service firms. A geological record service was organized and is operated by a Midland woman. She obtains and makes permanent records of geological information on oil and gas wells drilled in the Permian Basin Empire. This information is available to clients in Midland and other oil centers.

Midland women own and operate oil producing properties and scores of others are associated with the industry in various capacities.

Women, too, are leaders in their respective fields within the petroleum industry, and several Midland women hold or have held official positions in technical organizations associated with petroleum.

STATISTICAL SECRETARY-Mrs. Delores Wilson. a statistical secretary for the TXL Engineering Committee, goes over her reports for the day. Mrs. Wilson figures gas-oil ratios, checks completion reports, bottom hole pressures, annual pressures, monthly production and changes of status which govern the oil production for the TXL oil field.

REPRODUCTION SPECIALIST-Charlene Koonce is a reproduction specialist and handles sales for the West Texas Reproduction Company, 209 North Colorado Street. For several years she has operated the machines which make blueprints and photostats.

PUBLIC STENOGRAPHER-Grace Hoffman, a public stenographer, has a switchboard of her own and answers the telephone calls for 20 independent oil operators. Besides the telephone assignment, she keeps plans on various building projects in the Permian Basin Empire and makes them available to sub-contractors, draws leases, contracts, assignments and takes care of lease rental payments for numerous oil men. She also writes letters and reports and receives and forwards mail to various manufacturing concerns. Mrs. Hoffman has been in the business since 1949, when she came to Midland from Dallas. She was a private secretary in Dallas. She considers the oil business "most fascinating and the oil people the most democratic and genuinely pleasant." Mrs. Hoffman has her own office in Midland where she spends many busy hours each day.

GEOLOGICAL DRAFTSMAN-Women play an outstanding role in the petroleum industry in Midland, holding down jobs of importance. Mrs. J. W. (Marguerite) Graybeal is a geological draftsman for the exploration department of the Humble Oil and Refining Company: Mrs. Graybeal draws maps and colors cross-sections

OIL SECRETARY-Anna Belle Walker is secretary to George Carr and Oliver Daniel, independent oil operators. Besides doing general secretarial work she supervises the office and checks lease titles. Another of her duties is to obtain legal documents which assure her employers they have clear titles to the leases and oil properties which they handle.

LABORATORY WORKERS-Women working in the Paleontological Laboratory examine oil well sample cuttings, removing fossils preparatory to making thin sections of them. Pictured, left to right, are Mrs. Welna McCain, Mrs. Patsy Pannell and Mrs. Odell Pearson.

Leave it on for 30 minutes, tissue it off...and...incredible surprise!: dry skin comes off, and your skin looks exquisitely fresh and moist! Midland Walgreen Drug Co.

# Mrs. J. H. Hodge Is Outstanding Texan

Mrs. J. Howard Hodge of Midland, president of the Taxas Federation of Women's Chube has recently add-

the nine outstanding women of Texas and was one of the honorees at the annual "Party of the Year" held Pebruary 9 in Mineral Wells. At the dinner Mrs. Hodge was cited as a "distinguished civic lead-er and club worker."

She recently received a resolu-tion passed by the congressional houses commending the outstanding omen of Texas.

Mrs. Hodge also was given an honorary degree from her school, Howard Payne College, Besides be-Howard Payne College, mesides se-ing TPWC president she is co-chairman with Gov. Allan Shivers of the Gonzales Warm Springs Foundation and is a member of nomic Committee, Oil Committee and many others. In her annual report to the TPWC Mrs. Hodge said, "Serving as your president has been one of the most

Mrs. J. H. Hodge

presidency in November, 1980, her aims were high and she has succeeded in making the federation one of the most influential organizations in the state.

1. Continuation of our support o

the Latin-American Scholarships. 2. Outstanding state projects which will promote Education for

World Citizenship.

3. To enhance the prestige and effectiveness of the United Nations. 4. Promote the study of Spanish in our public schools.
5. To interest clubwomen in legis-

ation on all levels.

6. At least two women on every chool board.

7. Closer cooperation with the State Department of Public Health in finding ways of being of greater

9. At least two Junior Clubs in every town.

10. A better communities project

for every club. Scholarships Doubled 11. Changes in our juvenile courts. 12. Greater respect for the federation as an organization.

During Mrs. Hodge's administration the amount for the Latin-American scholarships has doubled. atifying experiences of my life."

Her aims have been listed by When Mrs. Hodge took over the Mrs. Hodge carrying out her theme. Cancer Hospital in Houston, the are living at 2504 Cuthbert Street. jects and to help all veterans and build morale and confidence.

in the interest of better health.

Through the administration Mrs. Modge has gone far toward achiev-ing each aim of her administration.

Every week Mrs. Hodge speaks in Texas. She addressed each dis-Mrs. Hodge was born in West

Texas, the youngest daughter of a Baptist minister. Her father con-sidered a good education the best heritage he could give his children She is a graduate of Howard Payne College at Brownwood and pital, presenting a flag to Explorer has taught at her alma mater and derprivileged child for school and trustees for nine years.

Her years of experience in lesser tasks prepared her for the president's chair, but she admits that "it isn't possible to realize quite how big the job of federation usiness is until you face it first hand."

#### MOVES TO MIDLAND

"custom-built" for you, your home and

# your budget.

You may be driving that same car of yours for some time yet—but you won't miss the benefits of new car performance, if you take it to WOODY ASCUE'S HUMBLE SERVICE STATION, 702 West Wall. Expert attendants will keep it running as amoothly as the day you bought it. A complete line of Humble Products and the finest of auto accessories and supplies are featured. All new equipment has been installed to serve your needs better.

### Fetch A Feather-

of course, women don't faint any more!

But the drudgsry of home laundering also went out with smelling saits. Modern housewives have learned that the services offered by SOUTH SIDE LAUNDRY, 906 South Dallas, can banish "washday blues." The laundry does wet wash and rough dry and also finish work on clothes you have washed at home. If you want deluxe service, you can have your clothes washed and finished. Call 3417-J for more information.

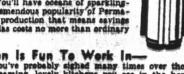

## Repairs By Experts-

Don't let dented fenders detract from the Don't let dented fenders detract from the appearance of your car. WELLS BODY SHOP, 208 South Westherford, will straighten them out and paint them to look like new. Body dents, hent axles, etc., are quickly and expertly repaired at the shop, and the men will be gled to give you a free estimate, if you drive your car in. The shop maintains a completely equipped repair department, manned by a trained mechanic. Remember Wells' Body Shep when something goes wrong with your car.

The "Inside Story"

Outside, water heaters may look slike, but the difference is inside. Permaglass, with its tent of glass-surfaced steel, cannot rust because glass does not rust. Get a Permaglas Water Heater from SANITARY PLUMBING COMPANY, 2600 West Wall, and say goodbys to tank rust. You'll have oceans of sparkling-clean hot water. The tremendous popularity of Permaglas has brought mass production that means sayings to you, because Permaglas costs no more than ordinary

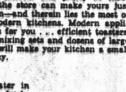

# The Modern Kitchen is Fun To Work in— You've probably sighed many times over those gleaming, lovely kitchens you see in the home magazines. Well, why not have one? PHILLIPS ELECTRIC COMPANY doesn't promise to make your kitchen as colorful and pretty as those you've seen but the store can make yours just as easy to work in—and therein lies the most of the charm of modern kitchens. Modern appliances will do this fer you... efficient toesters, electric cookers, mixing sets and doesns of large and small stems will make your kitchen a small world of efficiency.

finance its activities are the projects of the Band-Aides Club.

This year the club bought a re ording machine for the band and last year they purchased a public address system for the Band Hall. The money the club raises from the band concerts goes into the school activities fund. This fund is used to purchase awards for the vice president, Mrs. John Murphey

Each year the Band-Aides give a secretary, and Mrs. Earl Chapman, anquet for the band members.

# Wednesday

Organized and federated in 1903 he Woman's Wednesday Club has the distinction of being the first federated club in Midland. It is also a oneer group in the Texas Federation of Women's Clubs.

Like other Midland clubs, the roup has given much of its time to promoting the proposed Woman's Club Building. Another major project of long standing is the support of the Midland County Library.

The club maintained a free library before the establishment of the county library and has been active in book donations to this organization. The Memorial Section was established by the club and 200 volumes were presented to the Dunbar tranch Library.

Looking close to home for its 1949-50 study program, the group chose "Our Environment" as its subject. The programs that year were given entirely by club members and included such topics as "State Lands," "Oil," "Church and School" and "Air Influence.

During the first part of that year programs on land, plants, unusual places and people were given, as well s ones on the development of law and the cattle industry. Historical points of interest and the history of Midland County were also touched

Officers of this club are elected in odd years to serve two-year terms. Current Officers

Currently, Mrs. R. M. Turpin is ness meetings also on the agenda. president and Mrs. Marion Flynt, As always, programs of the Midvice president. Other officers are Mrs. Guy Cowden, second vice presiorganization in dent: Mrs. Paxton Howard, secretary-treasurer; Mrs. Allan Cowden corresponding secretary; Mrs. An-Fasken, historian, and Mrs. C. R. Steinberger, parliamentarian

The group is studying "Women of America." Their chief projects ent Education on the Midland City are assisting the leader of a Latin American Brownie troop and the memorial bookshelf in the Midland County Library. February has been designated as memorial bookshelf month. A project in the Fall was raising funds for the proposed

Club City's First Midland Music Club Stresses Progress

Midland Music Club Reporter Progress is one word Midlanders And, with that in mind, the

Midland Music club decided last April on a drastic change of pace from previous years. Beginning with the nomination

and election of M. O. Gibson, president of the club, and first man ever to serve in that capacity, the music club systematically has changed its At the start of Gibson's term of

office the name of the club was changed from Civic Music Club to Midland Music Club in order to avoid conflict with the Civic Music Association. Prior to the formation of the CMA, the local club had, almost single-handedly, been responsible for bringing good out-of-But, with the advent of the CMA. it was decided that function had become less useful. During the 1950-51 season, club members have concentrated on knowing their artistic neighbors right here in Midland and have achieved remarkable success.

One of the signs of progress is apparent in the club's decision to separate business meetings from program meetings. The reason Many prospective visitor: to the club programs obviously hesitate to attend when there are long busi-

As always, programs of the Midland Music Club are open to the public and, this year, have been of more than usual interest to music been developed for each of the once-a-month presentations.

November marked the first fortheme was "Church Music" spirituals, psalms, instrumental church music and French by the trends in liturgical music, the latter demonstrated on the organ by Harston.

M. O. Gibson

'first" in December when, for the first time in their history the Silver Strings of Midland presented the entire program. This performance featured ensemble work, a oncerto, a quintet and an octet. Many members of the music club also belong to the Silver Strings The latter is an all-woman organization-unique in Midland.

The usual interesting annual family night which presents family the home was the theme of the first meeting of the club in 1951. Another innovation in the club took place late in January when the programs of it and of the Community Theater's annual meeting were combined because several performers were scheduled for both places

is arranged in conjunction National Music Week.

Another sign of club progres enters around streamlined busines meetings. During the sum committee memb that a sugar-coating of busines meetings was in order. Consequently, the 1950-51 season has seen large attendance for such meetings since they are held in the homes of various members and feature a socialbusiness hour instead of the usual cut-and-dried motions, votes and adjournment.

New members have been admitted to the club and several of those have participated actively on committees and in the recent music club-sponsored trip to Big Spring to furnish a program for the Vet-erans Hospital there.

Changes Meeting Place

The club has moved, much to the advantage of the Junior High cafeteria, its present program site The cafeteria was badly in need of 000 worth of radio equipment for piano, and, since the club owns an instrument, the new meeting Navy made the offer.

"Music For Everyone," and the place had, an unqualified stamp May open program which usually of approval from school authorities Along the civic line, club members, of course, are active as al-ways. The club reported almost 100 per cent in subscribing to the Civic Music Association and many members sold tickets or acted as drive captains

The Silver Strings, cooperating with the high school, provided the "string" part of the small orchestra which played for the recent high school operetta, "Chimes of Normandy."

Local officers for the current season include Gibson; Mrs. L. S. Melzer, first vice president; Mrs. Benton Howell second vice president; Mrs. Frank Miller, reco secretary; Mrs. M. O. Gibson, corresponding secretary; Lotta Williams, treasurer; Mrs. Sam E. Geffen, historian-reporter, and Mrs Frank Thompson, librarian.

## Cameron's 13th Year of Service

... and progress

When Cameron's Pharmacy was established 13 years ago the oil business was of little consequence to Midland, therefore oil was not the main reason for our locating here. However with the great development of oil and gas in the Permian Basin during the past decade Midland has developed at a rapid pace. Cameron's has tried to meet the challenge by modernizing our store from time to time and by constantly improving our service and enlarging our stock of merchandise. A few months ago new and modern fixtures were installed throughout, making of this one of the most modern drug stores in West Texas. A complete stock of known brand drugs and sundries is carried, as well as many other household and office needs. Our good customers have shown their appreciation of our efforts to serve them during these years by their ever increasing patronage. For this we are grateful, and pledge a continuation of our efforts.

CAM - WORTH REAGE DRUG

## Established June, 1950

In June, 1950, Cam-Worth Drugs was established by A. E. Cameron and Charles Worthen, with Worthen as manager. That this store has filled a need for the folks in Northwest Midland is evidenced by the splendid patronage it has received. Besides drugs and drug sundries many other everyday needs are carried, such as: Yard and garden tools, light hardware, fishing and picnic supplies, etc. A modern fountain and sandwich bar is also maintained. A constant program of improvement has been carried forward in this store . . . and will be continued.

Rey. G. H. M. Wilson, who served until November, 1895, when he resigned and moved to Beeville. After calling some two or three preachers, the services of the Rev. W. N. Simms were obtained. Mr. Simms began his ministry here in January, 1896, and served until January, 1900.

The Rev. J. C. Burkett (1900-1912) served as pastor of the church longer than any other one man. Following his ministry the Rev. U. S. Thomas was pastor for several months in 1912, and he, in turn, was succeeded by the Rev. L. E. Finney (1913-1914).

During the ministry of Mr. Burkett, a new brick building was built to replace the former frame structure, this being the first unit of the present building. During the ministry of Mr. Finney, an addition was built to the east of the church building, completing it as it is today.

The Rev. E. Quick (1915-1917) was was succeeded by the Rev. O. J. Hull (1918-1922). Under the leadership of Mr. Hull, the present parsonage property was acquired and Here Since 1942

Since that time, there have been five other pastors of the church: The Rev. W. S. Barnett (1923-1924); the Rev. George F. Brown (1925-1931); the Rev. Winston F. Borum. #### GOURIELLI'S ESTROLAR THROAT OIL

keeps your throat as young as your face!

#### Formerly 750 Now 500\*

Nothing gives away your age faster than a wrinkled, crepey throat. Your throat skin is extrathin-quick to lose the natural substances which keep it firm and full when you are young.

Gourielli's remarkable Estrolar Throat Oil re-supplies these youth-giving substances in the form of potent estrogenic hormones. By filling out your under skin, these hormones actually help wrinkles disappear! In addition, special emollients soothe and soften your throat-tending to give it the smoother youthful look!

Estrolar Throat Oil is so rich, you need only a half-teaspoonful massaged into your throat every night. It is so thoroughly absorbed - you can wear some all day under your make-up, too -for a complete 24-hour beauty treatment. Start using it today - at its new low price. \*plus tax

# MIDLAND DRUG COMPANY KEEPS ABREAST OF MIDLAND'S GROWTH

Midland Drug Company is located in the very heart of thriving,

progressive and ever-growing Midland

## The Home of Walgreen Drugs in Midland!

Walgreen drugs are known the nation over for their quality and purity. We maintain one of the largest and most complete stocks of drugs to be found in West Texas . . . always fresh . . . always pure.

YOUR Midland Drug Company has tried at all times to keep abreast of the growth and development of Midland and this section with a program of constant improvement and expansion. We now have one of the largest and most modern drug stores in this section of West Texas.

From the beginning, the policy of the Midland Drug has been to carry full lines of quality, known-brand merchandise, to keep a fresh, up-to-date stock and sell at the lowest prices possible. To this policy we attribute our growth from a very modest store in 1935 to our present large, modern store covering 3,900 square feet of floor space and located in the heart of Midland's busy shopping district.

We are proud of the fact that this is Midland's oldest drug store under the same continuous management. We have been in our present location since 1940, In 1935 ...

- Midland's population was around 7,000.
- The Midland Drug Company had it's modest beginning.

In 1951 ...

- Midland's population is more than 25,000.
- The Midland Drug Company is one of the largest, most modern and busiest drug stores in West Texas.

Over One-Third
Of A Million
Prescriptions
Filled
Since 1935 . . .

Our Prescription Department\_is one of our most important departments. Important because to it we attribute to a great degree the success we have achieved. Important because so much depends on the accuracy with which the prescription is filled, and the quality of the ingredients used. The importance we place on all these things is shown by the fact that not since this business was established in-1935 has even one prescription been compounded by anyone other than a REGISTER-ED and FULLY ACCREDITED PHARMACIST. And great care is taken in maintaining the high quality and freshness of all ingredients used. We do not know of another drug store in this section of the state that can equal our record of having filled over one-third of a million prescriptions during the past 16 years. Four registered pharmacists are on duty at ell times in our Prescription Department.

## MHS Choir Operetta At At Clinic MHS Is Give MHS Is Given Friday Night

Midland High School's first operetta, "The Chimes of Normandy," was presented in the high school auditorium by the A Cappella Choir Friday night.

The production was a condensed version in two acts from the original light opera, "The Chimes of Normandy," by Robert Planquette.

The setting for the operetta was Normandy, France during the reign of Louis XV. The stage revealed a large patio with Odessa College Choir during the the Castle de Cornville in the disclinic as a demonstration of how a tance. The play took place around choir group should function. He little village of Cornville at the also organized the entire audience time of the annual fair. The Count of 1,000 into a choir, using the same principles as with the smaller to claim his castle and fortune, only to hear legends that the castle is haunted. When he investigated he found the ghostly aspirations were caused by old Gospard, a miser, who had hidden the treasure there. In

maid of Gospard who is revealed to be a Marchioness. The cast consisted of James prior to the classical period of Weathered as Henri, Count de Cornville; George James as Grenicheux, In the second section the group a sailor; Stan Coker as Gospard, a miser; John Petty as Bailli, the village governor; Peggy Greathous The final portion consisted of and Isleta Terry, as Germaine and

# Partners in Progress

We are happy to have played a part in the development of this great petroleum area, and to number among our thousands of customers' families from every branch of the Oil Industry. The men and women of the Permian Basin have learned to turn to Piggly Wiggly for the finest foods and friendliest service. As Midland has grown into a city, Piggly Wiggly has built and expanded to keep pace with progress in order to bring our many friends and customers better foods at lower costs. We now have two stores conveniently located to serve you, and soon will open a third.

#### THE OLD WOOD BURNING STOVE ...

When the old wood burning stove was replaced with gas and electrical heaters, we passed a milestone in American progress. Chopping and carrying wood became a memory . . . trying to kindle a fire on a cold morning was a thing of the past. America was beginning to appreciate modern methods. The new was replacing the old.

#### THE OLD CRACKER BARREL GROCERY ...

It was a friendly place, full of warmth and courtesy. But like the wood stove, progress began to make changes. Clean, sanitary stainless steel took the place of wood counters. Refrigerated meat boxes replaced the old cool-room. America's self-service groceries, like PIGGLY WIGGLY, came into being. But at PIGGLY WIGGLY you can still find the same friendly, courteous service. However, it has been combined with the most modern food-handling methods to bring you the finest in foods of all types at lower prices.

Chanc The earliest Methodist church Mary Scharbauer; Mrs. W. P. Progroup was the Methodist Aid So thro, Belle Bennett; Mrs. W. N. Ford, Laura Haygood; and Mrs. L.

C. Stephenson, Winnie Prothro. The organization is concentrating this year on a drive to bring inactive and prospective members into the church and the WSCS. A visitation program is being worked out in accordance with this project

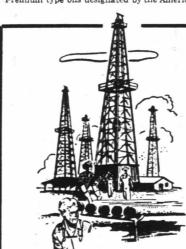

## The New "RPM" helps your Chevron Man take even better care of your car

He wants to be sure that you—his customer get the best. He knows he's taking better care of your car with New RPM because it's the first motor oil in history to be developed through Atomic Energy. Using piston rings treated at the Atomic Energy Commission's Oak Ridge Plant, Standard scientists measured engine wear as it happened. From these tests, a New RPM was developed so superior that, compared average auto engines between major overhauls due to lubrication!

New RPM doubles protection against gummy carbon deposits, acid, corrosion, rust and varnish... maintains the low oil-consumption of the average engine twice as long. It's sold with a money-back guarantee of satisfaction at all Chevron Gas Stations . . . where they "take better care of your car" with the New RPM, famous Chevron Supreme Gas Atlas Tires, Batteries and Accessories, and expert service.

with conventional oils\*, it doubles the life of

Premium type oils designated by the American Petroleum Institute

#### We take pride ...

... in the part Standard Oil Company of Texas has played in the development of the vast Scurry County oil field, one of the nation's most productive petroleum deposits. Your petroleum product needs are being fulfilled today - and will be assured for many, many years to come. This is because over a million and a half workers in the petroleum industry are making it their business to see to it that you get the oil — the way you need it, when you need it and where you need it.

## McCamey, Once A Boom Town, Now Is Solid City

was the toast of the country as she pleted. kicked up her heels, told the hovs to come on in and gave West Texas its first taste of an oil boom

Well, the old lady's settled down now, after 25 years.

The Federal Petroleum Board,

Board, was created under authority

of the Connally "Hot Oil" Act by

order of the Secretary of Interior

Under the supervision and direc-

tion of the Oil and Gas Division,

the Board administers the Connal-

Texas and suboffices at Houston

and Midland, Texas, and Lafayette,

under the act in the States of Tex-

as, Louisiana, New Mexico, Okla-

laws which limit and prorate pro-

duction of crude oil, whenever war-

ranted and to the extent feasible.

In administering the act and en-

forcing the regulations thereunder

the Board directs a small examin-

ing force which makes physical in-

spections of production, transporta-

tion, storing, and processing of pe-

troleum, and investigates the re-

ports filed monthly with the Board

The personnel attached to the Midland suboffice consists of Sel-

man J. Lones, Alternate Member in Charge, and Examiners Nelson

Puett, Henry L. Bray and Robert E.

Boothe. Secretarial duties are performed by Mrs. Daisy A. Daniel.

far as possible, in the areas where disregard the act and regulations

application of the penal provisions

of the act, to secure the redressing of the more important violations which occur notwithstanding the preventive measures employed. The Board actively cooperates

with the local oil and gas conser-

vation and other State and Federal uthorities in the several states

Enforcement activities are directed primarily toward the pre-

pursuant to the regulations.

# Large Number Of New Discoveries

During 1950 the Permian Basin is credited with the discovery of 197 new oil fields or new oil pools. The West Texas sector of the two-state area developed 169 of the new sources of oil production. Southeast New Mexico had the other 28 of the Permian Basin's wildcats which turned out to be new producers and the openers of new petroleum reservoirs.

The map on this page which was prepared by the The map on this page which was prepared by the owner has with the oil industry.

# Midland Basin Has A 150-Mile Spraberry Trend

## Lower Leonard Sandstone Opens New Oil Play On Par With Reef Hunt In Scurry

The Spraberry sandstones of the West Texas area are developed in the lower Leonard section of the Permian Series and are generally restricted in a real extent to the Midland Basin province of the Permian Basin.

The Spraberry section is usually 1,000 feet thick over most of the area indicated on the accompanying structure map. The "Upper" Spraberry section from 200 to 250 feet thick, containing three developed sandstone members, with intervening black shale and argillaceous lime-

stone. section is composed primartetal thickness of this "Middle" section varying from 300 to 350 feet per" Spraberry sandstone section. It is this condition of fracturing

## WHY I ALWAYS CALL THE WESTERN COMPANY

I know I will have an entire staff of experienced acidizing geologists and chemical engineers, using all their knowledge and modern facilities to design the best possible acid treatment for my individual well.

Western's perforating units are especially designed and JOB - TESTED for the work they do — the best and most rugged equipment in the field! THIS MEANS DOUBLE CHECK ACCUR-ACY ON EVERY JOB.

In addition to all these advantages which mean the best in oil well acidizing and perforating services, I will have the advantage of faster ervice, too, through Western's car-to-car, officeto office two way FM radio network.

ACIDIZING and PERFORATING STATIONS • ODESSA • SEAGRAVES • SNYDER

• LEVELLAND • BORGER • EUNICE, NM. • ULYSSES, KANSAS and . HOOKER, OKLAHOMA

Obviously exploration will continue. More

> The process of change constitutes with an abundance of men who will dare assume the roll of leadership, and because of that, the process of change will find itself channeled into that direction which will make Midland the Queen of cities in West

#### VFW Auxiliary Has Varied Duties

The Temple and Weldon Harris Auxiliary to the Veterans of Foreign Wars Post 4149, Midland, was charter members, Mrs. Lige Midkiff was the organizations' first

Each year the auxiliary makes lonations to the Cancer Research fund, polio drive, Community Chest Girl Scouts, veterans hospital, and the national home for orphans and widows of veterans.

The auxiliary also has furnished a room for the Memorial Hospital, presented a flag to Explorer Scout Troop 152, outfitted an underprivileged child for school, and purchased a portable wheelchair to be used free by any Midland resident needing one temporarily.

Armistice and Memorial Day me morial services are held by the auxiliary when flowers are placed on the graves of veterans.

The auxiliary sponsors a student nurse's loan fund for use by any girl needing financial assistance for schooling.

The auxiliary's primary duty is to help the VFW in all projects and to establish themselves in morale and confidence

## Eleven Years of LeRoi Service to the West Texas Oil Industry—

NOW -A New LeRoi Service Point In Snyder!

1951 marks the eleventh year of clock-around LeRoi service rendered to the petroleum industry of West Texas and New Mexico by General Machine & Supply Company, 713 W. 2nd St., Odessa.

The new Snyder store is located 3 blocks north of the "Y" on the Post Highway.

The effectiveness of that service may be measured by LeRoi's popularity in the Permian Basin oil fields.

Now-complete sales, service and replacement parts facilities have been provided in the center of the Canyon Reef area—Snyder.

#### AN INTRODUCTION TO VARICYCLE

The Salentine VARICYCLE Pumping Unit has been developed in answer to a long-felt need in the oil industry-for a long-stroke, hydraulic pumping unit designed, built, and priced for stripper wells.

VARICYCLE introduces a new method of producing wells. Instead of pumping fluid from the formation in high speed "jerks," it allows the fluid to come in from the formation at its own optimum rate, under conditions which approach very nearly to constant flow!

This revolutionary method is derived from a simple, patented arrangement which allows downstroke speed to be varied independently of the upstroke speed. For example, the optimum plunger speed might be such that the upstroke should be made in thirty seconds. This is set by the power pump speed and displacement. The downstroke, in this case, could be set as low as 21/2 seconds, by a simple adjustment at the cylinder. Result—a low speed at constant velocity during 90% of the cycle, then a quick drop of the plunger, cushioned at the end by a dashpot—the machine is operating within 10% of constant flow!

The advantages of long, slow strokes are well known: increased production, both ultimate and immediate; less sanding up; greater overall efficiency because of less repetition of sucker rod stretch; longer life and lower maintenance costs, on both surface and sub-surface equipment; and

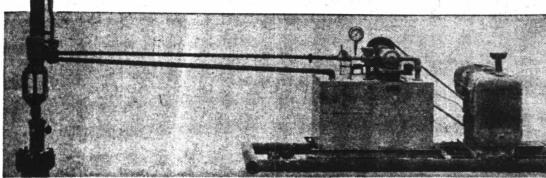

VARICYCLE offers all of these advantages in greater measure, because only VARICYCLE can give you minimum plunger velocities for any given rate of production.

The VARICYCLE unit represents a saving in initial investment and installation costs. The unit consists simply of a cylinder, bolted to the well head, and a compact power unit, which includes a positive-displacement power pump and a storage tank. No foundation is necessary. Installation time may be four hours or less. An A-frame is sufficient to

Approximately 100 units are now in service. Many of these have been operating for as long as four years without a single service call!

We stand ready to back all our claims with proof -in the field, on your well. Please call or write us and let us show you how VARICYCLE can increase your production earnings.

Single Cylinder unit in operation in South Texas showing 36 GPM power unit with gas engine drive.

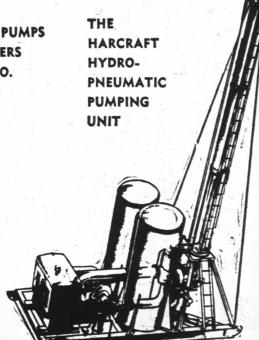

#### Representing

HARVEY MACHINE CO. — HYDROPNEUMATIC PUMPS EXNER DODGE, INC. — EQUIPMENT ENGINEERS ALLIED SUPPLY' and MANUFACTURING CO. S. C. CARTER - VARICYCLE SALES CO. ROBERTSON SALES CO.

The HARCRAFT HYDROPNEUMATIC PUMPING UNIT is designed to operate on deep wells, or trouble wells, which have a high Polished Rod load.

The HARCRAFT Long, smooth stroke with especially easy reversals, not only increases bottom hole pump efficiency, but decreases rod-breakage which reduces "down time." Designed to 13,000 feet.

#### Skelly Uses Giant Map Keeping Up With Oil Industry You Pay For Coffee

It is doubted the oil industry could function without its maps. The Skelly Oil Company has one of the largest in its land and scouting department.

This map is 37 feet long and 18 feet wide, actually. It is mounted on rollers and is cased in a mahogany cabinet.

Scale of the map is one inch to the mile. The map takes in a territory of approximately 85,265 square

The map covers a territory extending from part of New Mexico on the west to the east line of Scurry County to the east, from Castro County at the north to the Ric te on the south.

In the picture above. Skelly is us ing the map. At left is Frank J. Evans, draftsman, making an entry. In the foreground at the typewriter is Mrs. Elena Sharpes, clerksecretary, who is filling out completion records. Pointing to the map, right, is Edwin H. Magruder, scout. He is telling Hilton H. Twenty years ago, Otis pioneered an avenue in the Petroleum Industry that today is a highly-technical, highly-specialized phase of modern production practices. Each year, as newer and better drilling methods struck deeper and deeper reservoirs. Otis developed more and more techniques, equipment, and production tools to control sub-surface pressured during the completion and production of deep wells. Otis also pioneered the advancement of many two-zone completion and production methods ... originated and marketed special tools and equipment such as the Otis Side-Door Choke, "Selective" Cross-Over Packer, Two-Zone Pump, and many others. Exclusive methods of running and pulling tubing and drill pipe under pressure, cutting-off and perforating tubing under pressure—without killing the well—have made Otis outstanding in the Industry for pressure control—an organization with experience and technological facilities from top to bottom.

shots should be looking forward to the North Course of the Midland the 7,353 yards perhaps the best the "wide open spaces" of the North Greens either can make or break a golf course, so the saying goes. The course is 6,905 yards long If this holds true, the new Midland layout will have no peer.

The bent grass putting surfaces will range from 5,000 to 7,000 square feet. More than 35,000 yards of dirt were moved in building the greens

Proper drainage is an important factor in growing bent grass, thus requiring a porous top soil and proper construction of the green to allow excess water to run off.

Each of the greens will drain in at least three directions, which is keeping with authoritative suggestions. To concoct a porous top soil. MCC mixed peet moss, sharp sand and ordinary top soil. Twelve train carloads of peet moss and 18 carloads of sharp sand were brought in for the construction of the greens

The course also boasts another

There is one hole on the course where, if the golfer should tee di-rectly toward the fence, a long

divot digger with the spraying tee

The mixing of the top soil was done at the same location, with the same type of each ingredient. Thus, all the top soil was obtained in one place, and the same held true for

Pea gravel also was used in construction of the greens. Eighteen carloads of the gravel was imported, and six inches was used for the base of each green.

There are 20 greens-18 on the course, one for putting and a green for the pitching practice. The putting and pitching greens are built along the same lines as the playing greens, with the same contours, so the golfer will face similar problems in practice as he will encounter

in touring the course.

And putting on the greens will not be of the cut-and-dried variety. Before stroking the ball on the smooth bent carpets, even an abbreviated three-footer will require a neek to calculate the "break."

The roll of the greens also will pose an approaching problem seldom encountered in this section of the

country. The water system is quite elaborate and very complete. Five wells pump into a 420,000 gallon steel tank. Two booster pumps at the tank feed water into the distribution system at a rate of 1,500 gallons per minute at 100 pounds pres-

Each fairway has either a seven or eight inch water main, with the largest irrigation - type sprinklers used to toss the water to the thirsty grass. Down the fairways, Buckner type outlets are spotted at 90-foot intervals to serve the sprinklers.

The huge sprinklers water an area 250 feet in diameter, easily reaching from side to side of the extra wide fairways. Four outlets are spaced at each green. It has been found that, because of the size of the pipe and the high pressure, it is not necessary to use a hose for water ing the greens. According to a workman, the sprinklers break the water into a fine mist when the pressure is 100 pounds or more. Twonch lines lead to the outlets at the

All Fall and Winter, water at the rate of around a million gallons a day has been used. With the adven of warmer weather, the amount of water applied will be stepped up a

The abundant supply of water and the proper distribution system

from the No. 1 tee, will be similar to the fairways with identical water outlets. The area is 350 yards long and 200 yards wide—which will rival any practice area in size and con-venience to the course. The pitching green is adjacent to the practice

The first lake a golfer will en-counter is on No. 3. The hole is a three par, and the water laps around the front of the froghair and to the right. On No. 4, a five-par hole, the of the green. It will cause the long ing to reach the putting surface in wo blows.

The same body of water winds

menacingly around the edge of No. 11 green. Another lake spreads from the front of No. 5 green around the right side to the back, and ripples to the edge of No. 4 fairway and No. 6 tee. The fourth lake is in the rough between fairways of Nos. 10 and 18, where a careless shot from either hole will reach it. This lake is visible from the clubhouse area.

A draw has been created to add to the sportiness of the course. It will affect play on seven holes, and adds tremendously to the beauty

The draw makes the distance de ceiving on two holes, particularly On Nos. 12 and 17 a person may stand 150 yards from the green and the distance appears to be slightly over 100 yards

The largest of the mesquite trees which were native to the land the course occupies, have been shaped and left on the course. A tree program has been started already, with 652 elms cottonwoods and poplars to serve as backdrops for greens nazards, and along the fairways. In the rough between holes eight

planted to keep golfers from straying to the wrong fairway. This is one spot on the course where it is "enormous" and "tremendous"—be- who wish to get in a few licks after best fairways ever seen in this land even likely a person could shoot to the wrong fairway

of oil wells, cattle and sand dunes. Winter rye has been cross sown in the fairways, and a sprigging Country Club is a long, tough layout machine methodically placed berwith rolling greens. Is the briefest five part of the club parts, and No. 15 measures 602. The tees are so constructed that the best authorities, prevents "bot-the best authorities, prevents best

## SYMBOL FREEDOM

In the light of what has transpired in nearly a century of time in the development of oil we may view with deep satisfaction the tremendous extent of the industry's progress, so broadly reflected in the growth and prosperity of our nation

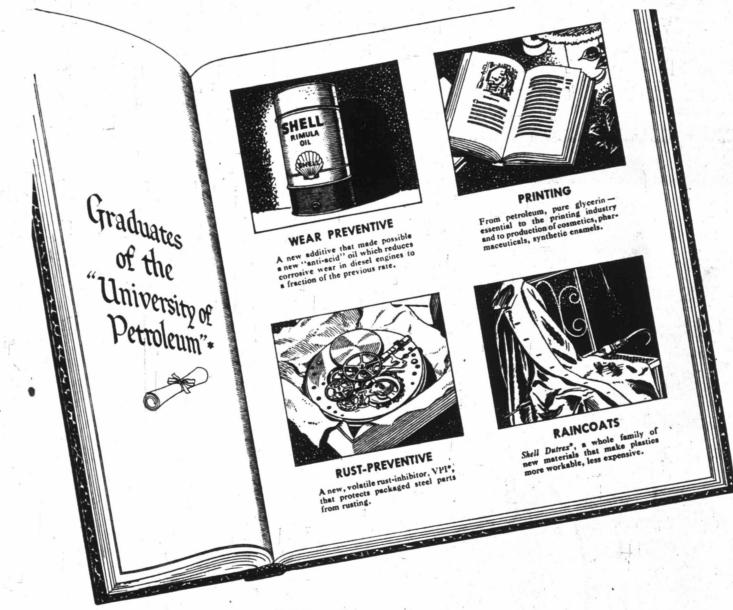

If we look at oil simply as a factor of material accomplishment we can count progress in the terms of 34,000 independent American companies, engaged directly or associated in its production. We can count it in terms of 250,000 service stations and millions of workers engaged in the various branches of oil activity, and while these figures are tremendously impressive the progress of oil has far greater and more vital significance

In America, the oil industry has meant and continues to mean a symbol of freedom. It was conceived out of the fabric of individual freedom by men who pioneered its humble beginning ninety years ago, and through the years its development has accentuated the full freedom of our American birthright; the freedom of individual incentive, individual ability, and individual, courage.

### WT-NM Area Has 509 Oil Fields, Pools

That survey showed there were 509 such reservoirs. West Texas was

predited with 403 of those petroleum producing pools and Southeast New Mexico was shown to have 106 oil fields or pools.

In common language an oil field is defined as any area which pro-ces oil from one or more strata or pay sections. An oil pool is an individual reservoir in a district where there is one or more proven pay ne on top of the other. Each pay section in such area is classed as a separate pool or reservoir.

ne Fields Have As Many As Five Pay Zones Some Permian Basin oil fields contain as many as five separate and distinct pools-some of them all being present under the same surface

Practically all of the established oil fields or pools of the area are listed in another place in this issue of The Reporter-Telegram. Herewith some pertinent data on the producing areas of the Permian which have had sufficient development to give definite ideas as to their extent and producing ability. These reservoirs are classed as

major oil pools.

The list below and the data is reproduced from the 1951 Forecast-Review issue of The Oil and Gas Journal:

### This Year—

sees the 50th Anniversary Celebration of Spindletop, where Texas Oil got its first real start. The rickety wooden framework of the original derricks have grown into what is today our giant petroleum industry ... an indispensable giant whose nerve fibers are pipelines that supply the nation's needs. This is progress in the American way. The Daniel Orifice Fitting Company is proud to be an active partner in such progress. As the leading producer of metering equipment to accurately measure the flow of piped petroleum products, Daniel Orifice has a consistant record of keeping ahead in research, engineering and man-

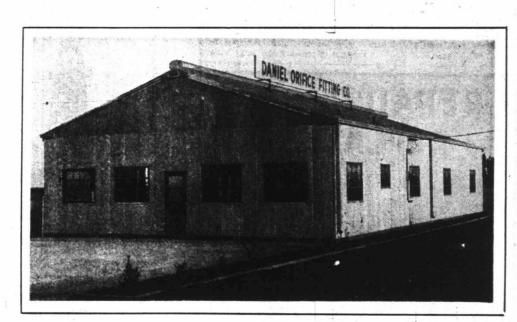

an's Auxiliary, two Girls' Auxiliary

groups, a Royal Ambassador group

reached a height of 60 children.

and two Sunbeam bands.

another step has been taken to maintain the record. In answer to the constantly increasing demands of the petroleum industry for greater production, storage and distribution facilities for metering devices, Daniel Orifice announces the opening of a new Odessa branch. A large store and warehouse at 2216 East Eighth Street will serve the West Texas and New Mexico area efficiently and promptly. Personnel and stocks have both been increased for your convenience and service. We welcome your inspection and will cooperate in every way to quickly fill your requirements.

### **Products of the Daniel Orifice Fitting Co. Include:**

- \* ORIFICE FITTINGS
- \* ORIFICE PLATES
- \* ORIFICE FLANGE UNIONS
- \* CHECK VALVES
- \* CALIBRATED METER RUNS
- \* LEVELING SADDLES
- \* OTHER GAS MEASUREMENT SPECIALTIES

# A POWER LOS TEXAS HELPS YOU!

Chances are, you've never seen a Texas map like this. It is the Texas power grid. The lines you see are HIGHWAYS OF POWER.... power lines of a dozen different electricity supply companies like the Texas Electric Service Company. They carry electricity from scores of steam-electric generating stations to the homes, industries, stores, farms and ranches in the cities, towns and rural areas of this state. Only the biggest power lines of Texas Electric Service Company and of the eleven other power companies are shown on this map.

The customers of all the electric companies benefit from this grid, which makes large amounts of electric power readily available anywhere in Texas . . . . in the largest city or smallest town.

There is twice as much power in the Texas grid today than at the close of the war. The power companies have been busy building new steam-electric generating plants, and enlarging others. Many miles of heavy transmission lines have been built to deliver more power from the plants to new and enlarged substations. But this is not all. The already strong Texas grid will be further strengthened by plants and other facilities now under construction and on order. Within 24 months, the grid's generating capacity will be three times as great as it was at the close of World War II.

Texas has been able to grow rapidly largely because of the ample electric power this grid supplies. Texas industries, now busier than ever as a result of the international situation, have the power they need to swing into all-out production. Texas workmen have the power machinery they need to do a better job and to earn

This huge power grid assures you the best possible service because it is a product of American free enterprise, dependent for its continued success upon its efficiency and its ability to provide you superior service. None of the money represented in investor-owned systems has come from the Federal Treasury or any other government body.

Yes, a POWERful Texas helps you!

MAJOR TRANSMISSION LINES OF TEXAS ELECTRIC SERVICE COMPANY'S POWER SYSTEM, AN IMPORTANT PART OF THE TEXAS POWER GRID, ARE SHOWN IN RED.

Lines of this company are interconnected with lines of neighboring power companies. Tied together, these power systems form a power network vital to Texas' growth and development and to national defense.

There's twice as much power in the Texas grid today as at the end of the war; it will be three times as great within the next 24 months.

TEXAS ELECTRIC SERVICE COMPANY

J. B. Thomas, President

### Aidland Post Office Work At Record Peak

"If a person can visualise the last year. On February 18, delivery mail delivery of today compared to that of even a year ago, he can see blocks. how it reflects the growth of Mid-

who has lived in Midland since 1928 and has guided the operations of the Post Office here since he cting postmaster in 1944. N. G. Oates, whose appointmen

nent postmaster was made and outgoing mail hand-

led, the jump in receipts, added personnel and the addition of vehicles as definite signs of the city's ued growth.

The receipts for 1950 reached an all-time high of \$310.896, easily eclipsing the \$255,160 mark set the previous year. And the daily average of receipts thus far in indicates a busier year for the Midland office.

Receipts have been about \$1,000 a day, and Oates said this year. With the addition of office space here this year, a heavier mail volume is expectedjump in receipts and a heavier

oad on delivery service. Parcel Post Increases The rise in postal receipts indicates the increase in the amount of out-going mail handled here But, says Midland's postmaster, the incoming mail has increased even The average daily amount of incoming parcel post is 200 sacks, which requires a truck to make sev-

eral trips from the Texas and Pa-cific Railway depot. Five full-time employes have been idded to the Midland postal staff in the last year, bringing the total to 67. In 1940, 19 employes were adequately handling Midlanders'

Increased delivery service is largely responsible for personnel some 70,000 acres of the 577,280 additions. City delivery has been tal in the county are devoted expanded by some 300 blocks in the farming.

Twenty-one mail routes inter-weave over the city to deliver letters, cards, packages and other items to homes and offices in Mid-land. The business district is covered by two routes, there are four parcel post routes and 15 routes for

As late as 1944, there were only our residential routes and one parcel post route here.

The Midland office added two vehicles in 1950, and now has two vehicles on mounted routes, one for special delivery, four parcel post trucks ad one for inter-station service. In 1946, only one vehicle was available, and it was on a contract

Large Volume Oil Mail

Oil companies add tremendously to the increase in the volume of mail handled here. Shell Oil Company, according to Oates, is the biggest mailer in Midland, and also has the largest volume of incoming mail. Humble Oil and Refining Company, The Texas Company, Gulf Oil Corporation, Magnolia Petroleum Company and Texas and New Mexico Pipeline Company are among the other big mailers.

Most of the larger concerns have postage meters, which saves the user as well as the post office much operation here. Eight of the meters have been installed in the last year. As Midland continues to feel its

growing pains, the post office seeks

to expand its facilities as well as services in an effort to keep pace. Station A on Marienfield Street was opened in 1949, but at that time used only half of the building in which it was located. In No-

vember, 1950, the remainder of the building was occupied. All in oming parcel post is sort-ed at Station A, and foot, rural and parcel post carriers operate out of the station. All window services, with the exception of postal savings and bonds, are available at the sta-

Sets Receipts Pace

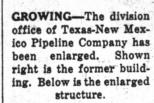

Permian Basin, and its post office also is setting the pace in receipts. Last year the Midland office showed a \$15,000 bulge over Odessa, its nearest competitor. Midland's 1980 receipts almost doubled those of the Big Opring office.

Although delivery has increased continually, the demand for boxes is greater than ever, and the gendelivery section is more crowded than ever.

Keeping up with the progress of an ever-growing oil capital is quite

A Leader In Fashion For 43 Years

Proud of our maintained leadership in Midland since 1908... we continue to bring the foremost in fashion to the women of West Texas ahead of many metropolitan markets... offering the finest in nationally advertised brands... featuring the ultimate in smartness and quality... constantly striving thelp keep Midland the leading West Texas City in which to shop..., and live.

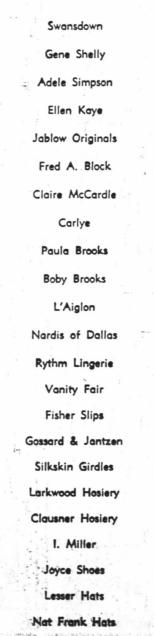

Since the opening of this store back in 1908 it has ever been the aim of the owners and operators to bring to the women and girls of Midland and West Texas the very latest fashions of the leading designers of America... and the world. Progress has been our watchword — service our motto — quality our guarantee. Therefore — we proudly claim — and will continue to justify — a partnership in this great area.

Although oil did not bring Colbert's to Midland, we are certainly aware of what it has meant to us. Many, many of our good customers over the past decades are associated with the oil business in one way or another and we attribute a great part of our progress and success in recent years to their patronage.

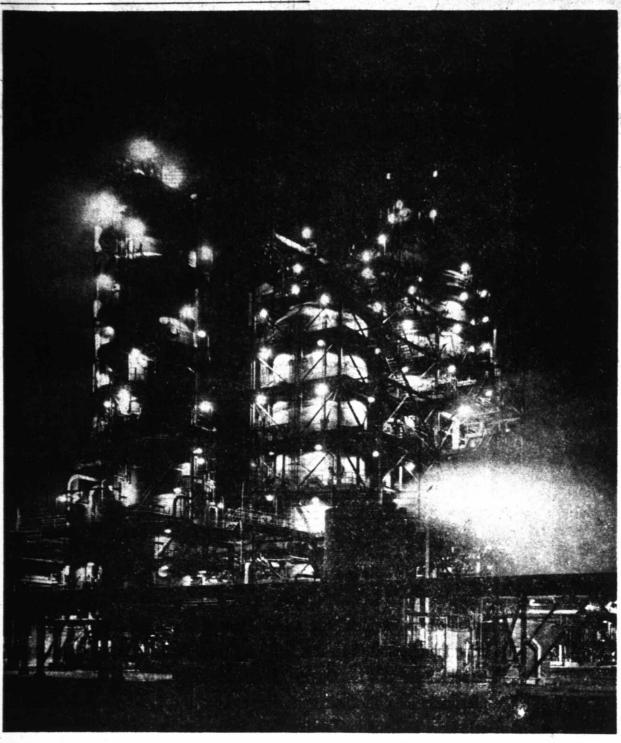

As Midland grows and West Texas grows—we shall grow—and offer even finer merchandising and service to our good customers in the years ahead.

As evidence of our ability to continue to set the pace for modern merchandising in West Texas, we point with pride to the edjoining list of leading names in the fashion world of today.

'CAT-CRACKERS' AND THE OIL INDUSTRY-Mode rn refining techniquies, such as catalytic cracking not only improve the quality but also increase the yields of high octane gasoline and other important products from each barrel of crude oil. Shown in this spectacular night view is an 18-story giant cat-cracker of the Shell Oil Company's Houston refinery. This one works around the clock and processes about 35,000 barrels of oil daily. Refineries dot Texas as important links.

### Our job is to keep the Permian Basin

... and we believe that we have filled the necessary requirements of that job! With our delivery trucks, our routes, and the fine quality ice that we manufacture, we are doing our best to fill the demand that the Permian Basin issues us. The inflow of oil company employees has been demanding more and more from our plant . . . and we have done everything possible to satisfy their ice needs . . . we will continue to grow with the oil industries of this area!

Council Has Roots In Early Organization

Officially organized in 1942, the Midland Council of Church Women had its roots in a similar group be-gun in 1933 and known as the Fifth Monday Union

Churchwomen belonging to this early organization were Mrs. J. M. Prothro, Mrs. W. P. Knight, Mrs. Charles L. Klapproth, Mrs. J. L. Green, Mrs. Glenn Brunson, Mrs. J. H. Chapple, Mrs. John P. Butler and Mrs. W. L. Miller.

Out of the group observance the World Day of Prayer which began in Midland in 1933 came the custom of having joint meetings of various missionary societies on fifth Mondays.

At a meeting held in the home of Mrs. S. H. Hudkins in July, 1942, the Midland Council of Church Women lected Mrs. Louis Caddell, now of Plainview, as its president. The group is affiliated with the Texas and United Council of Church

During its existence it has emphasized and assisted with improved sanitation and recreational facilities for negroes and Latin Ameri-cans in Midland. Through the organization many families have been fed, clothed and housed with council donations and a recreational park was established for negro children in the Moody addition In Cooperation

The Council worked in coopera tion with the Midland Army Air Field in the opening of the Pagoda Swimming Pool. Bundles of clothing, shoes, bedding, toys and food are still being packed and sent to Church World Service for distribution where they are most needed

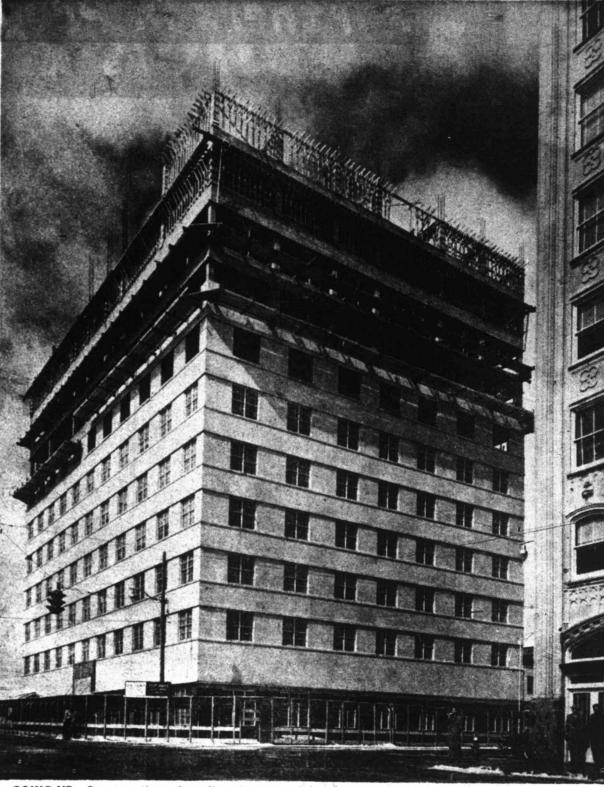

The group has also been active in and migrant work and has helped with the Vacation Bible Schools of Midland.

Open to members of all denominans, the Council is composed of the First Presbyterian, First Christian, Trinity Episcopal, and First and Asbury Methodist Churches.

Officers at the present time are: Mrs. F. N. Shriver, president: Mrs. E. B. Van Saun, Mrs. Sam Preston, Mrs. R. S. Llewey, Mrs. W. H. Black, Mrs. W. F. Schaffer and Mrs. Alber Russell, vice presidents; Mrs. Earl Chapman, secretary; Mrs. W. P. Knight, treasurer; Mrs. Charles Klapproth, reporter; Mrs. William Bumpass, councellor, and Mrs. L. G. Byerley, historian.

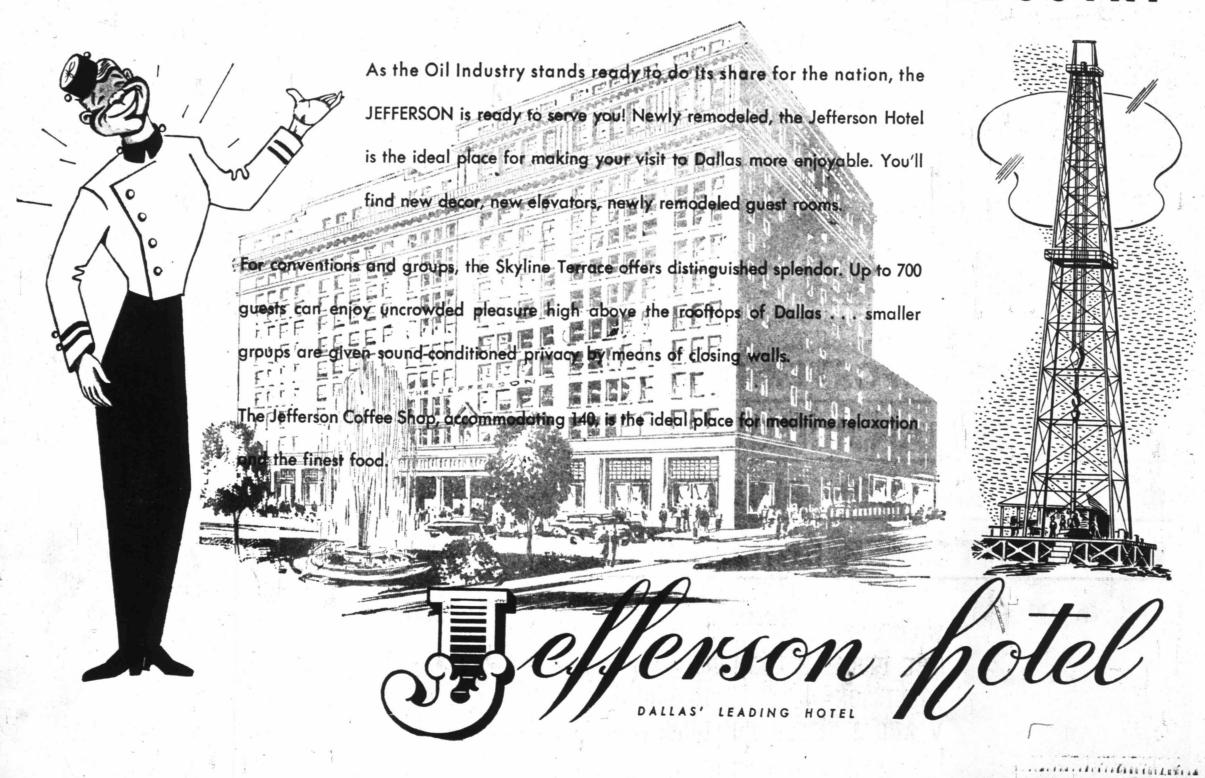

western. She also was a teacher

# A City?

Midland is more than concrete and bricks and wood. Midland is a city.

Who builds a city? Builders of a city are many. Men of vision draw the plans. Men of skill build the structures-whether it be homes or office buildings.

And it takes supplies and materials to build. Midland always has been privileged to have good firms for the supplies needed to build.

The foundations of Midland's homes and business houses are permanent and strong. They were built that way-to stay. The structures themselves are things of strength and beauty.

More than lumber, stone and hardware have gone into the structures of a growing city. The dreams and sweat of many men are therein contained.

May Midland continue to so build.

### Achievements Of 1951 Assure Ability To Meet Challenges, Humble Official Says

HOUSTON—Achievements of the the peak demand of World War II petroleum industry in 1980 offer Since the end of the war, the urances of oil men's ability to OIIC chairman said, the industry meet the challenges of 1951, according to Roy M. Stephens, Texas chairman of the Oil Industry Information Committee.

Stephens, who is acting sales manager of Humble Oil & Refining Company, called attention to new records established by oil men in 1950 in supplying the American people with the greatest quantity of history. He said:

"Domestic consumption of pe-troleum hit an all-time peak last year. This is the eighth consec year consumption has topped the previous year, and is high tribute to the keen competition which affects every branch of petroleum, from exploration and discovery right

through marketing and research." Stephens noted that, according to a recent government forecast, the American people will want an additional 468,000 barrels per day in "Leaders of the industry are con-

fident that they can meet this demand. A lot, of course, rests with what happens in 1951. Depending upon developments in Washington and abroad, and the availability of men and materials, there is every reason to believe that the industry can continue its excellent record of supplying our people with their petroleum needs."

To Meet Demand To meet this demand, the OIIC spokesman said, the oil men in 1950 drilled approximately 43,000 wells, the greatest number in history; poosted refinery capacity to an alltime peak; processed more crude oil than ever before; passed the bilduction: and set new records for production of distillate fuel oil and ian, and Mrs. H. S. McFadden, parnatural gas. The capacity of the liamentarian and reporter. per cent greater than it was during members

ce the end of the war, the has invested more than 10 billion dollars in capital expansion and development—an average of more than two billion dollars a year.

"The industry is well along in its program to meet the challenge of 1951, Judged by its 1950 operations and past achievements, there is no doubt in my mind that the oil industry is better able now than ever before to meet the demands of an uncertain future

### YEAR AFTER YEAR SINCE 1934

We have been giving to the ever-growing Midland the best in skilled craftsmanship . . . . . . . .

Craftsmanship and the production of craftsmen are basic to our American economy . . . The secret of our American way of life, but the highly skilled craftsman is no accident of our industrial system. He is rather the refined result of a time-proven method of agreement which provides the training and educating our youth in the practice of a skilled trade . . . thus our membership in Midland has grown to 600.

No city was ever built without carpenters, therefore we are proud of our part in Midland's Fabulous growth.

### Water Wells And Oil Wells Run In Monahans' History

MONAHANS-When Pat Monahan dug a water well in Ward County the 1880's for the T&P Railroad and the site became known as ahan's Well", he couldn't possibly have foreseen the impact of wells for broader purposes upon the Ward County of today. The story of Monahans can be told in terms of wells-water wells

Future history may place as much emphasis upon the drilling of wa-ter wells toward the development of Monahans as oil wells, but no one can dispute the fact that, for the present anyhow, the story of Monahans is the story of oil developement. . . . . specifically, more than 100,000,000 barrels since 1928.

To quote from E. J. Slayman, former Permian Basin was a loneman, "In 1895 Monahans was a lonely dot on the West Texas horizon It amounted to nothing but a Texas & Pacific train depot, a water tank and three houses—two belonged to the railroad and one to a hardy rancher . . . . . There wasn't much excuse for the town's existence then, except that the railroad had a well here to provide water for its locomotives, which travelled the still new route to Pecos, and someone had to be around to take care of the company's interests.

By 1896 the local seat of learning had about 13 students, the majority of them members of two families. In those days prior to that time "the broad expanse of country be-tween Amarillo and the Mexican border was grazing land, owned by the government. Elmer Hill, a Monahans old-timer who still lives here, tells a tale of that age about how cattle herds drifted south into this region during bad weather, causing cowboys from 50 to 60 ranch outfits to claim them. On one occasio when Ward County was still a part of Tom Green County, Hill said itinerant cowboys are believed to have voted themselves and their pet horses in an election, causing a change in the outcome of a political

"Ranches were huge affairs in those days, annually branding up to 14,000 calves per season. He said that one ranch, the W outfit owned by Johnson Brothers, covered parts of Loving, Ward, Reeves, and Wink-

"All the while Monahans was growing slowly and had gained an estimated population of 500 in 1926, when oil was discovered in nearby Winkler County. Then a discovery was made in Ward County in 1928 and the foundation for today's prosperity was laid. The town, remaining 'peaceable and quiet' in the er's estimation started fattening on the rich oil business. Electric lights and tlephones were brought in, and in 1928 the city was incorporated. The town born as a railroad settlement fittingly had a railroad man, Fred G. Gibson, T&P agent, as its first mayor."

Since 1928 Monahans has continued to grow steadily. The population in 1940 was 3.944. In 1950 it was 6,260 with a large segment of the immediate Monahans area not being included in the city limits—a Gulf camp with 75 houses, for example,

the Texas Electric camp, and others. The story of municipal growth is not new for the Permian Basin. Monahans runs true to form in this respect. With more than 1.600 prowells in the county and being on the T & P main line, the Texas & New Mexico Railway (a T & P subsidiary), U. S. Highway 80, and State Highway 82, Monahans is rather proud of the fact tha not once since its inception has the population dipped below a previous year's count.

Statistics Encouraging Statistics are encouraging. Retail sales show a jump from \$1,792,000 in 1940 to \$10,552,000 in 1950. In the same period bank deposits have increased from \$914,000 to more than \$5,000,000, motor vehicle registration from 3,864 to 6,470, telephone installations from 505 to 2.004, and postal receipts from \$23,769 to more than \$50,000.

Ward County is the fourth heavjest populated in the 16th Congressional District, ranking next to El Paso Ector and Midland Counties Only part of the story statistics. Two banks, a twice-a-

### **Rotary Engineers Cage Team Rated Among City's Best**

The Rotary Engineers has been one of Midland's top flight basketball teams the last few years—and most of the Engineer players are employed in the-you guessed it-

All Rotary players aren't Rotary employes. There's one from Humble one from Shell and several from other companies. But the boys are real "allies" on the court-as shown by their record. Rotary last year won 31 of 35 ball games, and this season has won 12 of 14 contests.

One of the mainstays of the Rotary team is Charlie Kelly, who was a star on Midland's most successful high school basketball five. That would be the 1944 outfit which won the district title, defeated Ysleta in the bi-district and finally was eliminated by Sunset, Dallas, the eventual champion, in the state tournament at Austin. Outstanding Squads

Several outstanding cage squads have appeared in Midland in the House of David Hardin-Simmons University, the Vagabond Kings, and recently Phillips 66 famous outfit.

Midland also has had some top flight cage competition in the city Bleague here, with merchants sponsoring teams in the league. And Midland Army Air Field furnished some top hoopsters during World War II.

Basketball has not been as popular here at has football or baseball. But with outfits like the Rotary five-who ran up Midland's highest recorded tally recently in defeating Odessa 126-62-and the high school putting in a lot of time to improve the game, the the hardwood sport should gain in popularity here.

### Lion Tamers Club Has 25 Members

# IN MIDLAND AND WEST TEXAS

### WHAT WOULD GRANDPA SAY?

He would wonder what in the world had happened here in Midland during the past few years. He would ask where the horses and buggies were, where the mud puddles in Main Street were, where the old pot bellied stove in the general store was. He would be amazed that his old home town had grown from a village into a modern city, serving as the headquarters of the Permian Basin. But he wouldn't understand about the importance that oil now plays in this area. He wouldn't know that it is business, like ours, serving the petroleum industry, that is bringing this new era to Midland. No, he wouldn't know that, but we. in the petroleum business, do know it and take pride in the part that we are playing in West Texas progress.

The Western Plastic Company is a group of specialists in the vast oil field industry. Our products, and our services, are designed to reduce costs of production for oil companies and drilling companies, thereby holding down prices of finished petroleum products and costs of drilling. Our company is primarily concerned with preventing corrosion in oil field equipment. We line drill pipe, casing, tubing, line pipe and oil storage tanks with a plastic coating. This process has materially reduced failures in drill pipe, and has increased the service life of all types of metals used in the

### Speaking Of Progress—Midland Football Has Come Along

Well-Dressed Elevens Of Today, Far Cry From Old

By LARBY KING
Reporter-Telegram Sports Editor

Speaking of progress:

Midland football, like Midland the town, has progressed a long way since first it was played in crude organized groups without the formality of abiding by excessive rules and regulations. Gridiron gladiators in the 1939 when Midland still was a small first days of West Texas football didn't bother much with deception and finess.

But rough? Oh my Records of the Midland the Staked Plains gaining popula-High School teams are complete only from 1929. One document shows that Midland played at Midland again went back into the least three games in 1920, smother—A class. And then came AA. Now, were then called, defeated Pecos Monahans 90-0.

what power!

But from 1929, records are comhas won 111 games, lost 93 and tied booths and green grid sod is a far early season tie with Wink was six tilts. There are better records, cry from the old Cowden Park, home played. Frank Hallman and Lloyd of each and every game in its his-tory. For each contest has been a in 1930. Lackey Field served Mid-In

in classification. It started as an real step upward for Midland foot-"outlaw" brand of play many years ago, with cowpokes, students, towns-"outlaw" brand of play many years ago, with cowpokes, students, townspeople, "ringers," and perhaps even game with Marfa at Lackey Field in game with Marfa at Lackey Field in ever, Midland had a boy who played bystanders participating. Then 1933, only 200 fans were present.

Midland went into organized footThe loss at the gate was \$7.90. Comball and was placed in a Class B pare that with the average attend-league. The MHS team competed in Class B until 1931, then spent two for the five home football games seasons in Class A before it de- The largest crowd in Midland prior cided its enrollment was too small to 1940 to witness a pigskin skirmish for that loop. So then Midland turned out for the formal dedication football took a backward step to of Lackey Field in October, 1930

### Don't Let Them Hamstring The Oil Industry!

Government co-operation is one thing. Government control is another. Given government co-operation, the Texas oil industry can do whatever job is necessary in the crisis that lies ahead. In World War II the U. S. Petroleum industry supplied about 69 per cent of total oil requirements for carrying on the actual war outside this nation. Shipments of petroleum products equalled the combined total in tonnage of all other types of cargo. Each soldier in the field required more than 50 gallons of gasoline per week at the height of the war. These requirements are certain to be exceeded in any future war.

### **Did Government Control Make This Record Possible?**

A common assumption is that these oil industry accomplishments were the result of government action in clearing the way to maximum effort. Facts, however, would indicate the contrary is true. Drilling activity dropped 45 per cent within the first year after World War II broke out-under the stringent control of government experts with accompanying subnormal prices and inadequate materials. Crude production capacity fell between 1941 and 1945 from 4,756,000 barrels daily to 4,579,000 and the excess or reserve production capacity that had been built under free operation was lost. When Federal controls were relaxed, capacity jumped to approximately 6,000,000 barrels daily and the reserve production capacity was soon restored.

Nor did our Federal government retard development for all industry segments uniformly. For the most part; small producers suffered while their large competitors found themselves able to deal with big government. The thirty largest companies during the war-control period 1941 to 1945 increased their share of U.S. curde oil production from 53.6 per cent to 62.9 per cent. Small producers, making up the remaining approximate 22,000 operators, lost ground correspondingly.

But after controls were eliminated, the smaller units within the industry increased their relative position from 37.1 per cent to 39.3 per cent-while the thirty major companies dropped from 62.9 to 60.7 per cent.

### Can Industry Withstand Such A Beating This Time?

Mistakes, costly mistakes, were made by government experts in World War II. Many of them were unavoidable, the result of being forced to traverse an uncharted course. Today, however, we have a pattern which, if used wisely, can assure oil industry mobilization without the errors that almost robbed America of her oil independence. As a matter of cold fact, if the same government mistakes of World War II are not avoided this time American forces may be fighting a war with insufficient fuel and civilian consumption will be cut to the barest minimum. The truth is, our reserve production capacity today is only about 5 per cent above demand as compared with some 25 per cent at the beginning of World War II. If we are to fuel a major war, it is absolutely essential that drilling activity not be curtailed as was done during the early part of the last war. This time we cannot afford the luxury of short-sighted government experts. The oil industry must not be hamstrung.

### Is Industry Preparation Now On Schedule?

The domestic oil industry is proceeding at unprecedented speed to expand facilities for meeting any demand. Drilling activity is at peak levels. Some very costly delay in industry expansion has been experienced since the end of govrnment controls, however, as a result of excessive oil

Independents—the group consistently advocating plenti-

ful porduction-feel strongly that the time is here to pile up in storage every drop of petroleum that can be processed and held in stock for the time it may be needed. Some have urged publicly that stocks be increased from their present approximate 246 million to at least 265 million barrels, pointing out that only about 63 per cent of stocks represent oil avaliable for processing.

### What Are The Obstacles To Plentiful Oil?

Barring the most drastic military requirements, the supply picture is quite good. Experts tell us that no civilian rationing whatever can be foreseen in the present picture. Biggest obstacle to continued oil aplenty is the steel shortage. Steel is oil. Without steel for uninterrupted drilling, our supply of oil would quickly dwindle below requirements.

Many independent operators today stand ready to increase the supply with the completion of hundreds of wells, but are unable to do so for lack of steel. Maldistribution rather than actual steel shortage has been largely responsible for the failure of steel to reach those urgent cases.

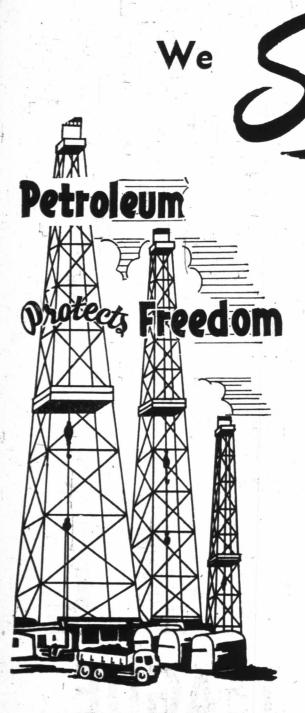

To solve that problem, TIPRO and other groups are working constantly on plans designed to alleviate the shortage through improved distribution. Right now efforts are being aimed at preventing the shortage in 1951 certain to result unless the National Production Authority allocates enough steel to the oil industry to do the job. Wherever possible TIPRO is seeking to do the job with a minimum of Federal participation in the knowledge that government help inevitably brings government control. And government control could mean—as in World War II—unnecessary spacing regulations and other restrictions that would make it impossible for the industry to drill the 43,000 wells in 1951 necessary to adequate production.

Government is working out a special urgency program under which priorities can be given certain operations for obtaining steel. Such machinery, however would require Petroleum Administration for Defense (PAD) screening of applications for priorities, bringing on inevitable controls over just how such materials so obtained would be used

Remembering that government controls invariably follow government help and that some Washington officials never relax controls voluntarily, TIPRO is overlooking no chance to solve industry problems without Federal parici-

#### TEXAS IS FIRST IN PETROLEUM

The enterprise and daring of the independent wildcatter have had a vital part in the discovery in Texas of 55% of the nation's oil reserves and 54% of its natural gas. Consumers of petroleum products can depend on Texas independents to maintain adequate reserves for the future.

It's Hard To Believe

Who would have thought the "Horse and Buggy" Midland of a few years ago ever would develop into the fastgrowing, ultra-modern city that it is today. The old-timers wouldn't believe their eyes, and even the present-day citizens watch in awe as new buildings and new streets and new homes spring up over night. Yes, its hard to believe, yet it's true. And it has been brought about by the gigantic petroleum inicistry, exiting through West Texas. As a part of this industry, we are proud to claim our share of the honor and responsibility of being "A Partner in Progress."

Barry pulled a super "boner" in the Big Lake game. Thinking he had an "easy touch," he failed to have the Midland varsity suit up for the game. Big Lake promptly scored 14 quick points before Barry could rush his varsity into the fray. But it was too late, and the Big Lake team took a one-point decision. You can imagine how the grandstand wolves howled about that one! Baumgarten Coach

Dutch Baumgarten replaced Barry as head coach at the start of the 1934 football season. His first team won four, lost four and tied one. 13-12 win over Wink that broke a Wildcat string of 33 consecutive unbeaten games. Sam Midkiff was described as the "greatest back on the field," and led the team all year. Other wins were over Big Lake, 7-6, Stanton 13-7 and Odessa 6-0. Besides a 13-13 tie with Marfa, Midland lost to Crane 13-0, Colorado City 12-0, Lamesa 31-0 and Pecos

Midland was upset by Odessa 6-0 in 1935, but finished with a 5-3 won-lost record. The Purples gained by taking Colorado City 13-0, defeating Big Lake 39-0, blasting Stanton 39-7, and taking Crane 14-0 and Monahans 13-0. Sam Midkiff again was the big gun in the backfield with Woody Adams being a line standout.

Midland's greatest record of all time was compiled in 1936. Dutch Baumgarten-coached team swept to a regional championship, having but one tie to blot a 12game card, Appreciative Midlanders sent the 1936 team on an expense paid trip to the Rose Bowl witness the Washington-Pitts-

burg clash. Bowie (El Paso) tied the Midland team 13-13, and Pecos held the score to 7-7 but was defeated in first downs, 17-6. Midland took everything else that came its way. With Dave Wafford scoring 166 points during the season and Gordon English holding the line steady Midland romped by Big Lake 26-6 Colorado City 7-0, Kermit 32-0, Crane 20-0, Wink 12-7, Stanton 53-0, Monahans 19-6 and Odessa 6-0, in regular season play. McCamey was chopped down 56-2 in a bi-district clash, and Littlefield fell victim to the Purple power in the regional game, 25-7.

The team dropped somewhat in 1937, but still won six of nine games. Jay Francis started his domination of West Texas gridirons and led Midland to wins over McCamey 6-0. Roby 18-13, Big Lake 7-0, Kermit 38-0, Stanton 36-7 and Odessa 30-6. Pecos beat the Bulldogs 19-7, Crane did it 25-13 and powerful Wink poured it on 46-0. Two Good Years

Midland lost but one of eight games in 1938, losing to Wink 45-21. The Bulldogs ran over Roby 53-0, Big Lake 66-0, Iraan 32-0, Stanton 49-6, Kermit 40-6, Pecos 37-7 and Crane 18-7.

In 1939, Bud Taylor took over as head mentor and Midland was moved into Class AA. Only one loss in 10 games was chalked up against the Bulldogs. Sweetwater came from behind to defeat Midland 36-13. after trailing for three quarters. The Mustangs had a boy named Audrey Gill who played linebacker, and he was described as the "best defensive man in the clash," by

newspaper records.

Midland defeated Thomas Edisor of San Antonio 19-0, Pecos 26-7, Wink 27-12, Monahans 6-0, Big Spring 21-13, Abilene 45-7, Lamesa San Angelo 18-7 and Odessa 12-6. Jay Francis and Dale Truelove were the Midland backs with the most scoring punch, while Paul

Klatt had no peer as a lineman. The Bulldogs again finished sec-ond in the league in 1940, falling to Big Spring 6-0 for their only conference loss, and getting a 6-6 tie with Lamesa. A non-district tilt was dropped to Austin (El Paso)

13, Austin (El Paso) 20-12, Plair view 32-6, Big Spring 25-8, Cisco 13-7 and Lamesa 52-13. McCellum's Last Year McCellum's last year was 1948,

one win, one tie and eight defeats. over Big Spring. Lamesa was tied That was about all Midland had to write home about, as Pampa took Midland 25-6, Austin (El Paso) did it 24-6, Plainview racked the Purple 20-0, Sweetwater won 19-6, Abilene 27-6, San Angelo 13-7, Cisco 19-0 and Odessa 48-0.

Barnes Milam inherited what was practically an all senior team in 1946, and the boys started off as if they were going to be the greates in the school's history. With Bobby Cole and Dunny Goode leading way in the backfield and Jim Edwards and Royce Higgs line standouts, Midland swept by Ysleta 26-0, Brownfield 19-0, Plainview 24-6 and Austin (El Paso) 20-12, before los-That disastrous season was Clark's ing to powerful Sweetwater 33-6. Abilene 27-12, then faltered and lost their last four games in a row San Angelo 14-7, Big Spring 6-0, Lamesa 13-6, and finally to the state championship-bound Odessa Bronchos, 55-0.

The 1947 team went further down the ladder, picking up wins over Brownfield 13-7 and Lamesa 12-7 for its only victories. Losses were to Ysleta 13-7, Austin (El Paso) 6-0. Plainview 13-6, Sweetwater 19-0, Abilene 20-0, San Angelo 33-13, Big Midland reversed its 4-5 record Spring 20-0 and Odessa 46-0. Dunny Goode, R. A. (Bull) Whitson and Memorial Dedication

## Freedom

## Dear to the Heart of America

Oil is indispensably necessary to our national security and defense. Oil is our most valuable natural resource in industrial progress. Our Petroleum Industry, operating under the American system of free enterprise -free competition for an open market—has never failed in fulfilling the requirements of the nation in both war and peace.

Dear to the Heart of West Texas

- West Texas is one of the world's greatest oil producing areas.
  - West Texas has one-third of the estimated oil reserves in the State of Texas.
    - West Texas has one-fifth of the estimated reserves in the United States.
      - West Texas offers a great future and opportunity in petroleum.
      - West Texas petroleum is ready to do its job -in war or peace.

Have Been Planted In

Midland County

As A Nucleus Only Of

BIGGER and BETTER THINGS TO COME!

Tex-Harvey Drilling Company

Tex-Harvey Oil Company
(Producing)

Tex-Harvey Pipe Line Company
In Cooperation with Ashland Oil & Refining Co.
(Gathering Line for Tex-Harvey Field)

UNDER CONSTRUCTION:

Tex-Harvey Water System
(for Drilling Operations in Tex-Harvey Field)

UNDER ENGINEERING STUDY:

Tex-Harvey Gasoline Plant
(for processing gas from wells in Tex-Harvey Field)

TANK WAGON, TANK TRUCK-In the so-called good old days, creaking wagons and plodding horses, shown above, moved big supplies of petroleum. The tank wagon of the early 1900's had a capacity of 200 gallons. Modern tank truck delivers petroleum products anywhere desired. They carry thousands of gallons and have many special safety devices.

#### Continental Lifted Midland Into Air

land off the ground. It was on June 12, 1944, that a chapter in Midland's transportation history was started and

it was Continental which wrote the Oil Center Flights Midland felt at home with air-

lanes.

Its skies were busy with the restriction of the growing oil industry in West training craft that soared off the of the Midland Army Air Field with youngsters learning how urated at the rate of only two o drop bombs on America's enemies But, except for private planes,

seded to get places in a hurry. Then Continental came to town.

was no aerial transportation

## Vast System Transports Nation's

## This Is Age **Automotive**

Whether the Midlander travels by air, rail, bus or his own automobile—he must travel. He must be trans-

And his goods and supplies must be transported. These carriers ply the highways and roads by day and by night.

At the turn of the century, America entered an automotive age. With this age came the oil industry-no longer was grease for the wagon wheels enough. There had to be oil and gasoline.

More wheels were turning-faster and faster. Until now, there are approximately 40,000,000 motor vehicles in our nation.

Midland County has seen a great increase in motor vehicles. In 1940, there were 5,167 motor vehicle registrations here. Compare that with 13,714 registrations in

The 1950 figure includes registrations of 10.843 passenger cars and 1,763 commercial vehicles. Then you atrport, the airline offered convenient schedules direct to impor-

Total registrations have all but tripled in 10 years. From bicycle tires to special-built oil field trucks, Midland firms supply and service the many vehicles. They are sold here, used here.

Fuel is available, as are the many specialized services.

#### Transporting Oil Is Big Job Itself

During the postwar years, the | dled by our entire railroad system of domestic petroleum On the average, during 1950, more mount transported by pipe lines, tankers, than 250,000,000 gallons of petrobarges, tank cars and tank trucks leum products were delivered to fields to bolster the reserves that please. Note bulk oil dispensershas been almost half as great as American consumers each day the total volume of ton-miles han- the year.

#### **Magic Carburetor** Story Spiked

Bill Burns, the oil industry's well-known fable killer, spikes the old story about the oil companies suppressing a carburetor gave 100 miles to the gallon.

The oil industry spends millions of dollars each year on research in an effort to squeeze the most mileage out of every gallon

you think the first guy to get his hands on such a gadget would put it into mass production and

Key to this half century of pro gressive increase in the state's protucing ability has been the ceasing search for more oil and the that sign—it was lighted with discovery in every decade of large

But Ben and Al Stanley had a ervice station from the start. Look at that early Midland service station. Note the hand gasoline pumps. Yessir boy, and look at many separate light bulbs, if you good old Pierce lube, mister

Service station, you bet. Note the

may not have had the first "filling" the station. That was the old Army Note sign, "Free Road Maps." Another sign says, "Ask Me I Know The Road."

That got us plenty of customers one of the Stanley boys remembers Wall Street-Highway 80

The station was located on Wall Street on a spot which is now just back of the Jenkins Luggage Company. One of the trees that were around the station is still standing. Look and see.

This location also was on the famous Bankhead Highway (U. S. Highway 80).

"We wiped the first windshield in (Continued On Page Four)

#### Producer To Consumer

The public has little

Perhaps the best way to vis example of the staggering of crude oil and petro oved annually:

It is well over half of all the ton-mileage of all freight carried by all class 1 railroads in the

The petroleum industry's trans-portation system would cost more than \$5-billion to replace, of which about \$2-billion is invested in pipe lines, \$2-billion in tankers and barges and the balance in tank cars and tank trucks.

There are 150,000 miles of pipe lines, more than 7-million dead weight tons of tankers and barges which is half the merchant marine of the United States and 105,000 tank trucks and 130,000 tank cars. Approximately 200,000 men are

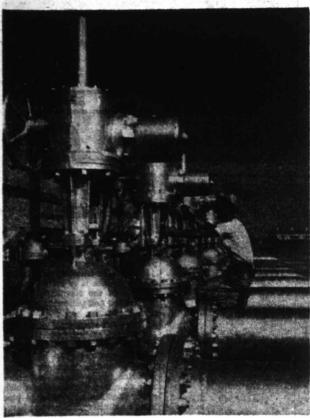

employed in this transported service. The average value about \$25,000. It is the most efficient system

for the movement of a comm ever devised by man. All of it is dedicated to the service of millions of users of petroleum. It is a necessary link in the efficient operation of the petroleum industry, a vital key to the industry's and and in war.

In January, 1942, only 22 oil refineries were producing 100-octa gasoline or its components. Today, plants manufacturing this fuel which is so vital to our national

estimated 20,000, then, are of the large and very small type.

Ed Warren says: "In the aggre-Ed Warren says: "In the aggregate, which is the only true way had given up the area as non-proto consider the function and the economic worth of the independents who produce oil, the contribution to the national economy and security is very great." Permitted To Prosper

It was the opinion of the Senate It was the opinion of the sample of this.

Special Committee Investigating Per The Benedum Field near Midtroleum Resources, popularly known land stands today as a tribute to as the O'Mahoney Committee, that the perseverance of independents permitted to prosper if for no other reason than to prevent a drift into monopolistic practices with resultant governmental intervention."

In a recent article, "The Independent's Place In Oil Production", Warren wrote: "We independents like to be known as a class that applies sound business principles. For the greater part we use the latest in scientific methods-geology and

Olin Culberson, in an article Enlargement Planned "Role Of Independents", says: "The role of independents in the Texas role of independents in the Texas oil picture can never be evaluated By Calvary Baptist in anything approaching scientific

"In a very real sense, certainly, the plentiful oil supply that has characterized our nation can be tent and with only 70 charter memattributed to these men who, in bers, the Calvary Baptist Church lending their efforts and risking has grown to 650 members and now capital, make up the more has a fine church building located at than 20,000 independent oil and 1001 South Main Street. gas producers of this nation."

"Oil finding is not yet 100 per Sunday School is 300. The Training cent science. Until it is, indepen- Union averages more dents will continue to find oil where members per meeting. The Woman's truly, is where you find it."

"The lesson America should have learned from the history of the oil ndustry, as no other, is that small independents will continue to find oil and are essential to progress. The economic climate in America therefore, must be kept such that men may have the same opportunity to engage in business, even on a 'shoestring', tomorrow as they have been

Free Enterprise

Independent oil operators are the bulwark of free enterprise. In that light, here is a conclusion

given by The National Petroleum Council in report on "A National Oil Policy For The United States": "The American oil industry is distinctively a product of the American way of life. For many years it

has operated under one of the most effective and efficient industrial policies in our economy.

"The industry will continue to produce the optimism economic and bership and making much progress social gains inherent in the nation's petroleum resources, granted extent that plans now are being the condition of a free economy and, made for a still larger auditorium continued recognition of the eco- and the possibility of a new educanomic laws which direct its opera- tional building is being discussed.

... and a DIFFERENT FORD IN THE FIELD!

It is the aim of Murray-Young Motors, Ltd., to acquaint each person in this great area with their service through courtesy. dependability, reliability, and the effort to anticipate every need of this great oil producing area.

Shown here is an over-all picture of the new, different 6-man cab that is made in the body shop of Murray-Young Motors, Ltd. More than ten of these are now operating in the Permian Basin oil fields.

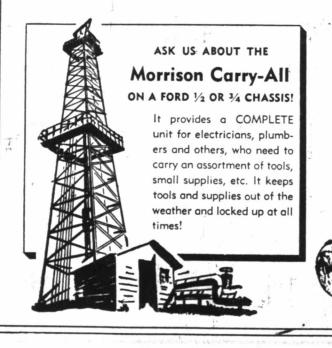

Here is shown the roominess inside this wonderful adaptation of the rugged Ford truck, for oil field safety and comfort. With the two standard-size seats you can carry your complete well-servicing crew in this one dependable unit.

MURRAY-YOUNG'S NEW FORD

## 6-MAN CAB TRUCK

Designed for OIL FIELD USE!

The Murray-Young 6-man cab installed on the powerful Ford Truck chassis. equipped with oil field bed, gin poles and winch, not only carries a full well servicing crew, but also is capable of performing all heavy duty well servicing jobs. Eleven of these units are now in use and four more are on the way! With three or four doors, these 6-man cabs give the safety and comfort not found in any other type of gang truck. Rather than using two or three units with men riding where they can . . .use the Murray-Young 6-man cab Ford Truck that gives a combination of speed, ruggedness, dependability, safety, comfort, and economy never before achieved! Let us show you this aid to oil field progress!

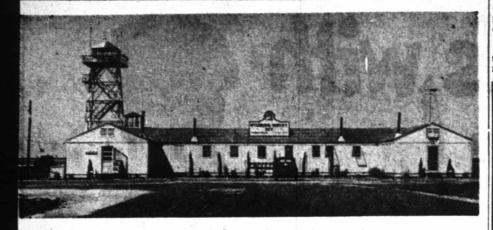

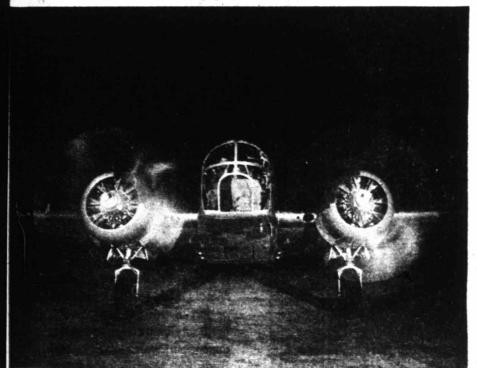

Our service department is complete with the most modern tools and equipment . . . the highly trained, factory supervised mechanics necessary to operate the tools . . . and the factory inspected parts necessary to complete the job. All at Ford low prices!

Shown here is the Ford truck with three doors. Available in three or four doors, the rugged dependability of this Ford truck is proved

daily in oil fields. Ask the operator who uses it!

REMEMBER WHEN?-During World War II, Midland's air base was converted into the world's largest bombardier-training base. Midland Army Air Field turned out thousands of bomb-droppers, who carried the war to the Nazis and the Japs. The headquarters building and the flight line and the air over West Texas ranges, were all busy places then. Many fine friendships were formed then, between Midlanders and the young men in training, some a long way from home.

The Tillman bands to the VFW Hall, post made a contribution, collected ganization. A banquet was money from other groups, and still is striving to gain funds for the foundation

And March Of Dimes
The March of Dimes campaign also received a boost from the VFW. When Bob Wills' orchestra played here January 29 a booth was set up in the VFW Hall for March of Dimes donations

Aiding ex-servicemen also is a big task which the VFW tackles, Midland veterans may receive aid in problems dealing with the Veterans Administration, and transient veterans often receive a boost when they are "down and out."

The VFW avails its hall to other organizations for dances and parties, and the swimming pool is open to the public during Summer onths. The swimming meet spon sored last year by the JayCées was held in the VFW pool.

The VFW Hall and pool are leased from the City of Midland. In addition to the hall, the organization plans to build a private home near Midland. Funds to purchase a lot already have been set aside.

John Henderson is completing his second consecutive term as commander of the VFW. Other officers are Charles Post, Jr., senior vice commander: Johnny Carter, who now is on active duty with the Air Force, junior vice commander; F. G. Abbott, quartermaster, Pat Mc-Mullan, adjutant, and Ray Koen,

Officers for 1951 will be elected

Sports in Midland have found the VFW an interested and active group. Last year it sponsored a basketball league, and the league's all-stars played a well-known team, the House of David.

Loaned Equipment More recently, the VFW loaned its boxing equipment to the Youth Center. This equipment was used by the Midland boxers in prepara-tion for the regional Golden Gloves tournament in Odessa in January. The VFW currently has a bowling team entered in a Midland

#### Sashaway Club Founded 1947

Approximately 50 couples "swing their partners" in the Sashawa Square Dance Club, a group which has been active since August, 1947 The club began with only 13 char ter member-couples.

First officers were B. R. Mathews president; R. P. Bruthertin, vice resident, and Earl Chapman, secretary-treasurer.

Charter members included Mr and Mrs. Bruthertin, Mr. and Mrs. S. C. Cummings, Mr. and Mrs. R. E. Gillespie, Mr. and Mrs. Paul Lathrop, Mr. and Mrs. Mathews Mr. and Mrs. Roy A. Minear, Mr and Mrs. Ralph Troseth, Mr. and Mrs. Chapman, Mr. and Mrs. Max David, Mr. and Mrs. E. W. Halfast Mr. and Mrs. Louis Mabee, Mr. and Mrs. J. M. McDonald and Mr. and Mrs. Ken Slough.

Herb Greggerson of El Paso was engaged during 1948 and part of 1949 to call one dance each quarter but now the club provides its own callers from its membership

The 1951 officers are B. R. Math ews, president; Mrs. Earl Chapman secretary, and Mrs. Ralph Troseth

#### Texas In '50 Were \$6,704,900,000

AUSTIN-Texas retail sales for 1950 totaled \$6,704,900,000, up eight per cent as compared with 1949 the University of Texas Bureau of Business Research reported. Total durable goods sales for 1950 advance ed 21 per cent, but nondurable goods

sales slid one per cent.

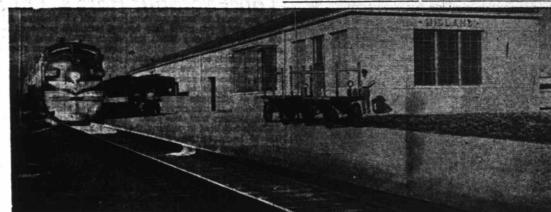

Retail sales in all 31 reporting cities showed 1950 increases as com-

Largest sales increases during 1950 were in Wichita Falls, 39 per cent Lubbock, 38 per cent: Plainview, 24 per cent; San Angelo, 23 per cent; Austin, 22 per cent; Abilene, 21 per cent; and El Paso and Mineral Wells, 19 per cent.

December sales of Texas retailers totaled \$694, 100,000, a 24-per-cen increase over November. Durable goods sales advanced 19 per cent in December from November, as compared with a 27-per-cent increase in sales in nondurable goods.

All cities reported monthly in-creases in December. McAllen led with a 66-per-cent advance; followed by Marshall, 64 per cent; Plain view, 61 per cent; San Angelo, 54 per cent; Denison, 52 per cent; Brownwood, 49 per cent; and Por Arthur, 45 per cent.

Natural gas marketed production in the United States has increased 356 per cent during the last 26 years. In 1949, this production was 5,400,000,000,000 cubic feet, compared with a 1925 total of 1,200,000,000,00

MODERN. ATTRACTIVE RAILWAY STATION—The Texas & Pacific Railroad constructed a new, modern and attractive station in Midland in 1950. Sleek streamlined passenger trains arrive and depart. And long freights with diesel-powered locomotives also come and go. Midland also has a new railway express office.

# 4 Years of SERVICE to Midland and the Permian Basin!

We Have Tried To Establish And Maintain Courtesies And Pleasant Relations With Associates And To Do A Business In A Forthright Manner, Honestly, Efficiently.

We Are Justly Proud of the Progress That Has Been Ours To Enjoy . . . Thanks To You! "There are no some 45 million cars, trucks and busses operating in the U. S.—and with 250,000 service stations covering the country from coast to coast, the competition for this business—your business—is simply terrific.

"You benefit—because this competition pays off for you in higher standards of service, helps bring you better and more efficient oil products.

"Yes, Mister, outfits like ours are out to beat everybody and his brother in winning and holding your trade. We'll pull out all the stops in keeping your car serviced and running smoothly. That's plain good business for us.

"We're just one of the thousands of individual companies that make up the oil business. The same spirit of rivalry that makes us tick is working for you in every branch of the industry — refining, production, transportation, research and marketing. Competition produces better and better oil products—better service for you and your family.

Professional baseball-making its first appearance in Midland in 1937 -has caught on fast here. The first team was called the Cardinals, and kept that name until 1939. And fessional then, since this is West Texas, the name was changed to Cowboys. And after the 1939 season when the team was moved to Abilene, Midland had land schools years ago, but was no baseball until the Longhorn League was organized in 1947. That year, the Midland team was tagged on and was disbanded before it was the Indians,

But long before 1937, interest was just didn't pay, as fans wouldn't high in Midland concerning amateur turn out in large numbers for the or city league, baseball. Midland game and active interest never was baseball fans turned out in great numbers to watch the local clubs play in their own league, and some of the teams did all right for them- gram, it kept a lot of kids out of selves playing teams from nearby Texas towns. Midland's first professional base-

ball team in 1937 didn't complete the season. The club was losing, wouldn't draw at the gate, and had many troubles, so the club manager, Davis, was told to seek employ ment elsewhere and the club folded. But again in 1938 found Midland with professional baseball. This time Fitcher Withers managed the club and it finished third. Clovis clobbered the Cardinals in the playoffs Back in 1939-this time as the Midland Cowboys—the team again a former distance runner of some finished third, with Jim Kerr as renown who performed in the South-manager, but fell victim to Clovis west Conference some years back.

in the playoffs once again. The club then was moved to Abilene, and Midland had on baseball at all during the war years. Telegram. Midland Army Air base fielded some fine teams, but the action was at clads in 1919. "I wasn't fast enough the military post and Midlanders or smart enough to run the dashes," saw little of the sport. By this time. Watson relates, "so I decided to try in fact, Midland had no baseball the distance races." park. New Start

# GROWING

## Midland County Oil

The County of Midland rapidly is coming into its own as one of West Texas' leading oil producing counties-progressing hand-in-hand with the City of Midland which long has been the recognized headquarters city of the oil industry in the vast Permian Basin Empire.

Midland County oil development has been rapid during the last year and today the county is at the top in drilling activity. Scenes of drilling operations in Midland County are pictured on this page.

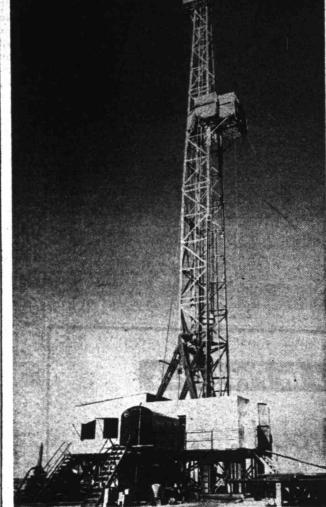

The new activity has brought added wealth and increased population to the city and county.

Midland County now is producing an estimated 10,000 barrels of oil daily from approximately 100 wells, whereas a year ago the daily production was less than 500 barrels from five wells. And experts say the long-range development program just now is getting underway.

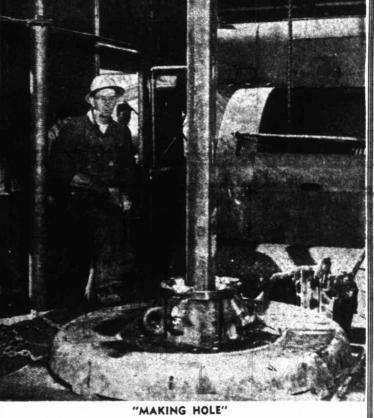

Yes, Petroleum Is Progress, which means that Progress will continue unabated in Progressive, Ever-Growing Midland.

There are 17,000 independent producers. It does seem that these facts alone would constitute a complete answer to all except those who have eye and see not and ears and hear not.

### Drilling For Oil

America's first commercial oil in a ramshackle wooden structure 35 feet high, was drilled to a depth "4. Frequently we hear that the of 69 1/2 feet with a creaking six boiler.

> Modern rigs average about 120 feet in height, and may go as high as 220 feet. Some cost as much as a million dollars.

> Today's wells average 3,500 feet in depth, but drillers sometimes go down 12,000 and 15,000 feet in their search for oil. The all-time record depth is 20,521 feet.

### **Producing Facilities** Large Investment

The lion's share of the more than two billion dollars invested in new and improved facilities in 1950 by the domestic oil industry went into producing operations - searching for and developing oil and natural gas reserves.

In 1950, approximately \$1,360,000, 000 was spent on these activities.

SMALLEST HOUSE

London's smallest house, six feet wide by 20 feet long, is situated between two large mansions in Hyde Park Place. You have to climb a narrow ladder to get upstairs, and miniature furniture is used throughout.

of petroleum products and the na-

tion is the fact that the domestic

2,153,000,000 barrels - roughly neighborhood of nine trillion cubic for more than half of the 1950 outlay. In 1950, approximately \$1,360. pose. Refinery expenditures are estconsuming public.

Gross assets employed by the U. S petroleum industry rose from \$30,-200,000,000 at the end of 1949 to about \$32,000,000,000 at the end of 1950. Overall, the petroleum indus try is topped only by the railroads and the utilities for capital investment by industry .

Although these figures for capita expenditures and assets are impres sive, the real story behind these data lies in the wealth created by petroleum and the economic impact of its widespread distribution into the income stream of this country. Studies of 1949 financial reports of 30 companies, compiled by a leading New York bank, show that 80.0 cents of very oil income dollar are distri buted in the form of payrolls, supply purchases, lease rentals and taxes. Dividends to stockholders account for 4.3 cents. Income reinvested by the business amounted to 6.3 cents and charges for depreciation, depletion, etc., accounted for

9.4 cents. Research, Scientific Progress

Scientific progress continued its steady march in 1950. Another 100 million dollars was spent for research work to find new production methods and uses for petro leum and to improve known products. One specific example of the fruits of this laboratory work is the testimony of a recent study which showed that two gallons of 1950 motor fuel does the work of three gallons of 1925 vintage. This is a 50 per cent increase in efficiency, at the same cost to the consumer,

The field of petrochemicals also was extended in 1950. One important development was the start of large-scale commercial production of benzene from petroleum. This critical material, formerly available almost solely from coal tar, is used in the production of synthetic rubber, plastics, nylon and other products. In 1950, almost one-half of the organic chemicals produced in the United States used raw materials derived from petroleum or natural gas. Prior to 1940, petrochemper cent of total organic chemicals produced in this country. This demonstration clearly the initiative of the vigorous American oil industry

operating in a competitive syste The wholesale price index of crude petroleum and petroleum products advanced only one percentage point in 1950, despite the squeeze of spiraling costs and other economic factors. This is in contrast to a 4.1 point increase in the index of wholesale prices for all commodities during the same period. The average retail price of motor feul in 1950 declined slightly. The average total cost per gallon to consumers was under the 1949 postwar peak by a

### 50th ANNIVERSARY OF OIL IN TEXAS!

In 1901 the first oil well in Texas was drilled at Spindletop, near Beaumont. Today the Permian Basin accounts for more than 25% of the total oil and gas reserves in America. And the American oil industry is greater than that of the rest of the world.

We, at French Tool and Supply, have always prided ourselves in being an integral part of the Permian Basin oil industry . . . primarily through the medium of these outstanding names:

• GOODYEAR INDUSTRIAL RUBBER GOODS • WALFORTH VALVES & FITTINGS • AMERICAN STEEL & WIRE ROPE CO. • PITTSBURGH STEEL CO. • BYRON-JACK-SON PRODUCTS . INTERNATIONAL POWER UNITS . INTERNATIONAL TRUCKS • INTERNATIONAL REFRIGERATION • HOBBS FLOATS & OIL FIELD BODIES, BOOM-ERS & CHAINS FOR TRUCKS • TULSA WINCH • BENDIX DYROVAL • AC PRO-DUCTS.

We have constantly endeavored to live up to the reputation these names imply and we sincerely appreciate the confidence and loyalty placed in us by our many customers. Our aim is continued improvement in service, continued growth to help meet the demands made upon our oil industry by our country's needs at home and abroad.

### Plenty Now Used Beside Kerosene

Kerosene was the principal pe-troleum product in existence in 1859 and it was called "rock oil": today there are more than 1,200 petroleum products.

Petroleum products have been developed and improved as need and opportunity stimulated the many important centributions ne troleum has made to raise the American standard of living.

Today almost half the total enrgy used in the nation comes from petroleum and natural gas. Aided by the supply of vast quantities of oil at reasonable prices, the

out goods in an unending stream. With the aid of oil. Americans travel freely and transport goods speedily and cheaply from one end of the country to the other. Aided by oil, farmers produce enough food to feed America well receive more than 250 million gal- and still have a surplus to send to nations overseas.

### Sticky Asphaltic Oil Preserves Skeletons

California's oil history goes back beyond the first white man and even the first Indians. Within the rather extensive city limits of Los Angeles, for example,

is a group of large oil springs known as "La Brea," from which water and sticky asphaltic oil spread over an area of several acres. For many thousands of years birds and animals have come to these springs to drink and have become entangled and finally engulfed by the asphalt, which has almost perfectly preserved their skeletons.

The first overland expedition to Monterey Bay made note of the springs in 1769.

Within recent years, thousands of bones have been exhumed from the springs including those of the saber-toothed tiger and other animals that have become extinct, so Oil was discovered in Andrews far as we know, before the first beings migrated

# The Crawford...Oil Headquarters FOR THE PERMIAN BASIN!

Daily, more and more oilmen of this vast Permian Basin Empire are turning to the Crawford Hotel for the finest in hotel accomodations. They know that at the Crawford they can expect and get the kind of hotel services they require. The Crawford is located in the center of the business district in Milland, making each trading and ail center within easy walking distance.

During these critical times, the Crawford pledges that the problems that arise with housing shortages will be solved by the best possible methods. We have strived to keep up with a progressive area by recently completing and furnishing an additional floor on our hotel. We believe that it has no equal in the West Texas area. Luxuriously furnished, roomy and neat, these rooms will give our guests great pleasure. Other rooms in the hotel have also been remodeled and refurnished for additional comfort. In this way, we at the Crawford have already started to meet the demands of the "world's greatest oil reserve"!

An up-to-date hotel with up-to-date features!

Rooms at the Crawford are furnished for maximum comfort. Each piece of furniture is of finest quality, each bed is complete with innerspring mattress for maximum rest, each room is sparkling clean and neat. You will find maximum courtesy from each of our employees!

### Always a friendly welcome . . . . ,

tality here and each visit will further impress you as to the friendliness that is evident. It is our desire to do everything to make your visit comfortable . . . to assure more and more visits to the Crawford Hotel while you're in Midland.

Crude production averaged over 5,900,000 barrels a day, a record, in late September. Gasoline output reached an all-time high of 21,-319,000 barrels during a 7-day July

August and September by process-

And there was indication in early cember more new wells would be apleted in 1950 than in any pre-Completions the first ten months

ere estimated at 36,600, compared to 32,150 the same period last year nd the 12-month record of 38,800 in 1948. Proved underground re mated 28.000.000.000 barrels.

### Livestock

FORT WORTH -(P)- The year 1950 was a golden one for livestock producers in the Southwest as dewas stepped up by the tense world and the preparedness program of the United States.

giant strides of livestock prices stemmed from broad condemand for meat and the fact that larger numbers of sheparticularly ewes and cows and heifer calves, were held back reasonable demands made on it." as farmers and ranchers sought to estock depleted herds.

Strangely, although the Southwest s gripped in one of its severe Fall and Winter drouths demand for stocker animals has remained strong

at the beginning of 1950 reflects certainties—economic and political, sharp climb.

WASHINGTON -(A)- The year 1950 crossed up forecasters in the boards of the nation's cotton ex field of agriculture.

This time last year the experts dourly shook their heads and predicted a sharp downturn in farm prosperity that might pull the whole ountry into a recession.

The dark forecasts were borne out during the first half of the year. Prices had weakened. Farm income was going down. Surpluses were continuing to pile up.

But then came the outbreak of war in Korea. war brought a quick and

mediately. They increased 6.5 per cent in the first month of the fighting. By the end of the year they were up more than 12

per cent. the end of the year averaged almost 3 per cent above the 1949 average. and most abnormal year" in automotive experts had predicted they motive industry history . . . would be down at least 10 ner cent. Nevertheless, they still were almost 10 per cent below the record set in January, 1948.

Likewise, farm income turned out to be considerably higher than officials had expected.

By the end of the year, agriculture was drafting plans for a 2. Retail deliveries of approxisharp increase in production in 1951 -perhaps the largest of record. Topping the production program cent more cotton. The 1951 corn, meat, tobacco, wool and peanuts, but fewer potatoes. Potato production has been far above needs for several years.

### Wool

BOSTON -(P)- Wars are tending to make wool a luxury rather than a utility fiber.

Since 1946, the average world consumption of wool has been between 17 and 20 per cent greater than world production - and the needs of the military now indicate even heavier demands.

A backlog built up by the United War II has been exhausted.

However, Harold Bishop, presi-Association says confidently feel on top of the situation we feel the industry can meet any

### Cotton

NEW ORLEANS -AP- Following its most sensational price rise in Comparison of prices during the history in 1950, the cotton market closing days of the year at Fort nervously faces the horizon of a worth livestock market, with those new year confronted by many unat home and abroad.

Prices which topped those of the boom twenties went up on the changes in the history-making advance of 1950. Never in the 79-year history of the New Orleans Cotton Exchange had there been a price posted such as the 44 cents a pound top hit by the December contracts. Previous high was 41.9 cents reach ed by May in April, 1920.

The record high levels resulted from a change in production prosshort crop, inflationary pressures booming general business condi tions, increasing domestic consumpsharp expansion in government tion of cotton, mounting exports as spending for national defense. This Marshall Plan countries continued Marshall Plan countries continued spending was reflected in increased to reach out for American staple. employment, higher wages and a rising trend in parity, and most

### Steel

PITTSBURGH -(AP)- Steel pro duction in 1950 soared to an alltime record of about 97,000,000 tons of ingots and castings, breaking the top set in the war year of 1944 by 10,000,000 tons.

The 1950 figure is an estimate by the American Iron and Steel Institute. It compares with 89,-642,000 tons in 1944 and 77,978,000 tons in 1949.

The 1950 output leaves the peacetime record of 88,640,000 tons, set in 1948, far behind.

American steel mills established the new record by expanding capacity while working full blast a big part of the year. Steel producers look forward to more expansion and even greater production in the coming year.

### Electric

THE RENDEZVOUS

# District RRC Office Is Busy Nerve-Center Liquefied Gas Is Now Major Product Now & major product, Sequefied Business opportunities for

district supervisor of the Rail road Commission of Texas, oil and gas division, came to Midland about three and one-half years ago to take charge of the District 8 office here, they told him:

There is no oil

To that, Greer replied: "Oil is to month. where you find it.'

was asked his opinion then about oil in Midland County. He these details. Tests deemed necessaid it looked good to him here that oil was under us.

They laughed and said: "You are going against geology." But Joe Greer held to his opin-

ion. Now he can sit back in his office in the Petroleum Building and tell the doubters who greeted him

There likely is oil right under this

Because not only has Joe Green seen it found, but so have we allplenty of oil right here in Midland

Where there once were about four drilling rigs in Midland County, just recently a count showed 68 drilling rigs.

And that isn't all. It is predicted that within 60 to 90 days there will be more drilling rigs in Midland County than in any county of the state. Joe Greer was right.

The district supervisor has not been concerned only with oil profrom that The District 8 office West Texas counties, a wide area

that produces one-third of the oil The far-flung District 8 is as large as some states. It is onefourth of Texas.

It extends from Cottle County on the north to the Mexico border in Brewster County to the south; and from Mitchell County on the east to El Paso on the west.

In a short period here, the Midland office gets reports on 27.825 oil and gas wells. The majority of these are oil wells. There are approximately 233 producing gas and ndensate wells in the district.

Nothing of major importance in the oil industry can be done without first being reported and approved through the district office here. Through this office pass the applications to drill, records of production, permits for transportation and many, many other routine mat-

This keeps Greer and his staff pretty busy. This staff contains ens, accountants, inspectors and clerks with wide experience in all phases of the oil and gas industry. Here daily, one will find, either working in the office or field from it, C. T. Slack, J. B. Thomas, Frank Qualia, W. H. Arrington, Jr., H. L. Hildebrand, E. D. Costhorpe, J. B. Roche, Mrs. Catherine Self. W. C. Westbrook, G. D. Lobley, Elzy Cox. Mrs. Joyce Hale and Mrs. Shirley Underwood.

Branch Office L. J. Slentz heads a branch office at Lubbock and L. M. Pittman is field inspector, stationed at Crane Basically the work of the district

office in Midland is concerned with the regulation of drilling and production in the many fields of the area. It is charged with the enforcement of rules and regulations and field work and to keep records. It charts and surveys production by It approves tenders of oil trans-

How hig does this job get to be? answer is tremenduous

For example, as of January 1951. there were 406 different fields in the district.

Let's trace a well in District 8 The RRC office first learns of the well through the application by the operator to drill a well. It is indicated on Form 1 whether the well will be a wildcat or in an existing The well is completed and again

the operator has contact with the RRC office. He must indicate if the well is a dry hole or producer. If it is to be plugged and abandoned, then the RRC must receive such plugging reports as are pre-

If the well is a producer. Form III must be filed with the district office, indicating potential, the well's producing capacity.

There also are forms for the drilling log, how deep, what formation, well's bore, etc.

The RRC then assigns an operator's allowable based on the potential and general field rules of this area. Bonus Allowable

If our well is a discovery of a new reservoir, a bonus allowable for a certain period of time may be granted by the RRC. This encourages exploration drilling Our well now is producing. We

West Texas of today is vastly different from West Texas a hundred years ago. In 1849 Captain Randolph Marcy, an eminent United States Army explorer, passed across West Texas, and in his official report said: "It is a region almost as vast and trackless as the ocean—a land where no man, either savage or civilized, permanently abides; it spreads forth into a treeless, desolate waste of uninhabited solitude, which always has been, and must continue, uninhabited forever." But the captain was wrong-completely wrong. Little did he realize that a vast treasure lay hidden deep beneath his feet and that one day it would be brought forth to provide fuel for progress, build empires and help protect the freedom of his country.

# Partners in Progress

In the book of progress and growth which makes up the history of Midland, one of the most important chapters is titled OIL.

The discovery of oil in this area . . . its subsequent development, has contributed in a large part to the development of Midland and the Permian Basin. Because of oil and allied industries, we have experienced a period of prosperity unknown to other . . . less fortunate sections . . . of the country.

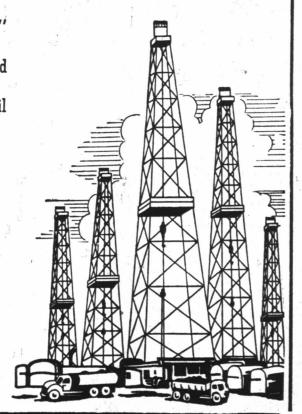

The progress made in the past is just a token of "greater things to come" for this vast area. The First National Bank looks forward to continued growth with Midland and West Texas. We renew our pledge to give the oil fraternity the highest type of service.

### One Extends Up, The Other Down

The Empire State Building in the city of New York is known throughout the world as the tallest structure ever erected by man. It rises 1.200 feet above the streets of Manhattan.

Yet it would take 17 such buildings piled atop one another to equal the depth of the world's deepest hole drilled for oil, the 20,000-footer in Sublette County, Wyoming.

Drilling is continuing. Oil drillers have developed an uncanny ability and skill in drilling holes straight even at such

### Oil Gives Power To in Midland, as well as his hotel Industry

It fuels industrial furnaces, propels ships and heats homes. Oil lubricates America's machines and paves its roads.

And in World War II the oil industry in America not only provided the oil products which totaled two-thirds of the bulk of all war supplies shipped overseas, but also met the needs at

Its ground floor also houses the Oil-powered automobiles have made America a nation on wheels. Oil supplies the concentrated efficient energy that makes air travelry Company, Neely Insurance el possible. Agency and the Grammer-Murphey

Powerful oil-driven diesel and soline engines generate electricity, haul fast, modern trains, power construction machinery and plow this country's farms.

Oil has become a major source of raw material for the rapidly expanding chemical industry From oil comes synthetic rubber ertilizers industrial alcohols ar commercial solvents. Through oil a supply of raw ma-

Just as his control board tells a terial is found for the mountin pilot about the operating condition production of plastic materials and synthetic textile fibers. of his plane, a few statistical indicators tell the oil man about the Varied Uses

On the farm oil does much besides providing power for tracand other equipment. It is used in insecticides, fungicides, disinfectants and weed - killers. It heats brooders, cures tobacco and protects citrus groves from frost. Specialty products prevent trees from budding too soon and keep fruit from falling before it rip

Many household products depend upon petroleum. Among them are Another vital indicator shows such varied things as candles and crude oil output from wells in the shower curtains; upholstery fabrics, United States running at high levoil cloth and synthetic leather; parels. During a July week, 1950, for affin for canning, many varieties example, crude output averaged of paints and a host of medicine 5.475,000 barrels daily, 1,819,000 cabinet articles.

Even the housewife's bedroom is stocked with oil products. Her Even this production was well dressing table displays petroleum under the Maximum Efficient Rate plastic compacts, combs and brushthat can be obtained without injury es. Cold cream, hair-setting lotions lipsticks, perfumes, nail polisher and polish removers are made with oil products.

# Celebrating 4 YEARS of Steady Progress

Near the end of our fourth year of business here, we want to thank our customers for their patronage. Thank you for the complete fatih and confidence you placed in our ability and product. We hope we shall continue to serve you to your complete satisfaction in the future, as we have in the

# Partners in Progress

The most dynamic business in the world and the world's finest airplane made for action . . . they both go together as partners in this mighty nation, whose power is greatly based on their oil supply! Oilmen everywhere are turning to Beechcraft for ease of travel, speed, safety and comfort. These oilmen realize the importance of saving every minute . . . they can count on plenty with a Beechcraft at their disposal!

### Beech-Approved Factory Repair Maintainence

There is complete service for every type of airplane in our service department. Factory trained mechanics supervised by Virgil E. Fisher, service engineer for Beechcraft for 12 years, give you unequalled repair service using the latest in airplane service equipment. A complete stock of parts and fast, dependable repairs will make delays short. We also maintain a complete aircraft radio repair department.

### Service

To round out our COMPLETE airplane service and sales company, complete gas and oil needs can be filled with all other requirements of a service station. The very best in airplane fuel is handled by Glober Aviation Co.

### Storage

Large roomy hangars give your airplane storage without chancing on collision because of crowded conditions. All-metal, heated hangars protect it from the direct intensity of the weather . . . there's always plenty of space!

### Beechcraft Bonanza

The new Beechcraft Bonanza cruises at 175 m.p.h., consumes 10 gallons per hour, carries four 170-pound people and 260 pounds of baggage, lands at 46 m.p.h. Its range is 750 miles at 170 m.p.h. It has a direct operating cost of as low as 1 cent per passenger mile. It's delivered complete for day, night and instrument flight.

### Twin-Engine Beechcraft

The twin-engine Beechcraft 18 is a seven-tonine place executive transport. It is a familiar airplane on airports in all parts of the world. Its sturdy, dependable performance and the flexibility of seating and cargo arrangements make it ideally adaptable for excutive personnel or as an air carrier. Design and performance permit operation from small landing fields.

The interior of this wonderful airplane is modern, spacious comfort is the theme on the interior of the new Beechcraft 18. All the comforts of home are included in the plush upholstery, the adjustable seats, the windows that give wide visibility, thermos bottles for hot and cold liquids, and many other features.

### Beechcraft Twin Bonanza Six Midland customers are waiting delivery

on the new Beechcraft Twin-Bonanza, a completely new design of an all-metal, sixplace, twin-engine airplane now in production. It combines the safety of the multiengine airplane with the flight advantages of the single engine type. It is expected to be ready for delivery in 1951 unless circumstances prevent it.

vels, Illuminants
The liquefied gases are used in cessed derivatives are broken down o olefins and diolefins. These are used in butadiene and styrene for synthetic rubber; polymers for lube oil additives; anti-knock agents for viation gasoline blending; alcohols, fat, lacquer and drug solvents; synthetic plastic waxes for inks and paints, and resins for non-special-

The light distillates are made up of two groups, gasoline and kerosene. Under gasoline are light naptermediate napthas for aviation and hiene, and xviene, and heavy napthas for uses in varnish, paints, dyes and cleaning fluids and in turpentine

Refined kerosene is utilized in stoves, camp and tractor fuels, rail-road signals, lighthouse oil, ship ilmniants and gas-absorption oils. eil and absorber oil. Gas oil is used tives, paint driers and fungicides, as metal lurgical fuels and heating and benzol recovery are realized from

The heavy distillates with major ns of lubricating oils and lubricating oil residues have the under lubricating oil include white oils with technical uses as insecti-cides, tree sprays, slab oils, recoil oils, hydraulic oils and by bakers candy makers and egg packers.

White oils are used medicinally in osmetics and medicine. The satufind uses in textiles, leather, paper, wool, twine, coal, spray, dust laying,

### Oil Is Best Hired Hand For Those Who **Produce Our Food**

family looked forward to Summertime because of the greater supplies of fresh vegetables and fruits on the market. Gone for a few onths were the canned and preserved foods eaten most of the year. Now, thanks to speedy transportation and increased output on farms in sections which produce year round, we have fresh foods available able in all the months.

The benefits to housewives from this higher year-round output are obvious and depend upon many things, among them these four factors: first, more machines on farms than ever before; second, newer and better fertilizers to nourish the ground; and third, continued progress in the farmer's neverending battle against insects and other crop destroyers, and, fourth, improved preservatives.

Most of us have had skirmishes with flies, mosquitoes, moths, ants and other insects. But, consider the hard-pressed farmer; he has more than 80,000 varieties of insects to away his crops or endanger his live-

One of the farmer's chief allies is the oil industry. Just as it provides feed for his mechanical horsepower and raw materials for his fertilizers, oil helps make the newest and most deady bug killers. Oil is used as a carrier for insectieides to attack such crop killers as grasshoppers. Oil scientists even the death-dealing strength of their

gus growths which attack crops. Weeds, which can choke a plant by particularly vulnerable to oil treatment. As in this constant war on

ment. As in this constant war on weeds, petroleum serves the farmer in everything from sheep dip to fuel for his orchard heaters.

If the men who produce our food had been asked by the census taker to name their best "hired hand," they might well have replied, "OR!"

Midland is the location of a dision office of the Atlantic Refinvision office of the Atlantic Rein-ing Company. Several districts were merged into the office here in 1949, although the company had operated in the Basin for many years. Prior to the merger, land and geology de-partments only were here.

Amerada Petroleum Corporation oved its district office from San ngelo to Midland in 1933.
