ing last Monday, instructed Downing to make every effort to co the project, which was started last year.

Community-Wide Basis

Downing said the broadcasts are resented by merchants and busiessmen on a community-wide basis No individual credit is given to those who finance the program, the "commercial" time being devoted to the promotion of Midland as an area shopping center. Downing handles the football play-by-play, and his assistant, Burvin Hines, gives most of the "commercials."

The total cost of the 10-game The movie spies are at it again on the set of "Five Fingers," with roadcast project is \$1,500, but only \$750 has been received to date Downing said. Fifty additional subscribers at \$15 each are needed if the project is to be continued Otherwise, the remaining games probably will be sponsored by indi-vidual firms, Downing stated.

#### Blemish Must Be Removed

Now that State Health Department technicians from Austin have called attention to Midland's sanitation problem, termed "a méchanical framework for an epidemic," it is hoped city officials will lose no time in correcting the condition, which Mayor Perry Pickett said "has become of increasing concern."

Something must be done and NOW to remedy the condition, which is of utmost concern to all residents of Midland, who have a perfect right to demand prompt action in this all important matter.

Most citizens perhaps already are asking why this critical situation was allowed to develop and just why city officials apparently were "so surprised" to learn that such a problem existed.

It appears the health of the fast-growing community has been overlooked by those whose responsibility it is to look after such things.

But that is neither here nor there. It still is not too late to do something about it, but that something should be started NOW

And while city officials are taking the proper steps, as we hope they will, residents, particularly householders, duction at a time when jet fighter must join in the sanitation program if it is to be the success are desperately needed to turn back "it should be. The city, county or Health Department cannot do the job alone. It is a community-wide project and A-bombs. The situation is so critiall citizens must cooperate to the fullest extent by observ- cal the Air Force actually has been lously short of machine tools. Labor. ing all health and sanitation standards. An all-out, city- forced to accept planes without enwide clean-up campaign would help.

It is unfortunate that sanitation has to be forced upon either labor or management, the Desome people, but it may be necessary in this instance. Some citizens apparently have not abided by the rules.

It is encouraging to note that the State Health Department has been asked to set-up an extensive fly control the General Electric Lockland plant program here, and it is hoped the "mechanical framework for an epidemic," will be removed completely by next Summer. Midland may not always be as fortunate as it has been this Summer.

And it matters not whether the City of Midland or the County of Midland foots the bill. The job must be done and the sooner the better, regardless of cost.

Let's all pitch in and remove promptly this blemish on our prosperous, attractive, progressive and ever-growing city.

It's easier—and more fun—to live up to a reputation than live it down.

#### Matador Story Release Shows Security Program Weakness

By PETER EDSON

WASHINGTON - Release of information on The Matador B-61 guided missile presents the best possible example of problems involved in carrying out President Truman's September 25 order directing all government agencies to withhold military secrets. The President declared that if newspapers had wanted to protect this country, they should not have?

The newspapers, however, got photographs and story Blair's copy "Not approved for pubon The Matador from Department lication. of Defense, as a handout release on September 13. It announced the Air missile" squadron for training in handling the B-61 at the Banana River base in Florida. Since this information was handed to them on a platter, newspapermen at the President's press conference couldn't

see what was wrong with printing it. After the conference, White House Press Secretary Joe Short issued a clarification of President Truman's clarification which said it would be all right for newspapers to use information given them by authorized government officials. This seemed to make more sense,

THE CHURCH FOR ALL

ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship.

It is a storehouse of spiritual values. Without a

strong Church, neither democracy nor civilization

strong cattern, netter democracy for civilization can survive. There are four sound reasons why every person should attend services regularly

every person should aften services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the

sake of his community and nation. (4) For the sake of the Church itself, which needs his moral

and material support. Plan to go to church regularly and read your Bible daily.
