

Liaison Officers Resume Negotiations

Congress Hurries To Quit

WASHINGTON (P)—Congress created a new record for peacetime appropriations in a rush of law-making last week and headed for early adjournment, possibly by Saturday.

The Senate and House now have passed bills appropriating \$71,136,000,000 for the fiscal year ending next June 30. Another \$15,000,000,000 is involved in pending legislation.

They hope to dispose of these before the week is out. With only a few brief recesses, the 82nd Congress has been in session since early January.

House Almost Finished

The House disposed of appropriation bills committing the Treasury to an estimated \$70,000,000,000 and readied itself for final action next week on a new \$5,750,000,000 tax increase measure.

The appropriation bills provided \$45,000,000,000 for the Defense Department, \$1,043,000,000 for the State, Justice and Commerce Departments, \$4,600,000,000 for military construction and \$4,300,000,000 for foreign military and economic aid.

The Senate Friday passed the big defense bill and the State-Justice-Commerce appropriation. It has yet to act on the military construction and foreign aid bills.

The House also passed and returned to the Senate, for consideration of House changes, a Senate-passed bill cutting down the size of parcel post packages.

Conferees reached final agreement during the week on the new tax bill, which is the main business before the House this week. Its quick approval by both branches is expected.

Any legislation not enacted by adjournment time does not die but will carry over until the next session. (Continued On Page Ten)

Solon Demands End Of 'Political Fixing' In Revenue Bureau

WASHINGTON (P)—Senator Wiley (R-Wis) Saturday demanded that collectors of Internal Revenue be put under Civil Service to end what he called "political fixing" in the nation's tax-gathering system.

Wiley said he and other senators have received word that there has been considerable "fixing" of tax assessments, fixings of recommendations to the Department of Justice for criminal prosecution. He said he had been told there have been contacts between persons within the Democratic National Committee and the Internal Revenue Bureau.

The bureau has been rocked by charges of shakedown, sideline profits and other irregularities. A House subcommittee has been looking into the situation, which has been featured by indictments, dismissals or resignations in such cities as St. Louis, New York, Boston and San Francisco.

The latest development came Saturday, when James P. Finnegan, former collector at St. Louis, surrendered there on an indictment charging that he accepted bribes. He posted \$5,000 bond.

Wiley, a member of the Senate Crime Committee, noted that the collectors are not under the merit (Civil Service) system. "The 94 collectors are politically efficient and they represent a happy hunting ground for political influence," Wiley said. "Such influence can be exerted by the breaking of the spirit if not the letter of the tax law."

Midlander Reports Stabbing By Burglar

A Midland man reported to police early Saturday he was stabbed in the abdomen and arm after he surprised a burglar in his room. James O. Gordon, 106 South Pecoc, said he was lying in bed when he heard someone enter the room. When he jumped up, he said, the burglar stabbed at him with a knife and fled.

He was given emergency treatment at Western Clinic-Hospital.

West Asks Egypt To Enter Middle Eastern Alliance

LONDON (P)—The United States, Britain, France and Turkey Saturday asked Egypt, the touchy leader of the awakening Arab world, to become the pivot of a new Middle East alliance against Communism.

They offered her a full partnership in the regional defense setup agreed upon by foreign ministers of the North Atlantic Treaty powers in Ottawa last month.

Rushing legislation to throw the British out of Sudan and Suez, Egypt received the offer coolly.

King Farouk's government appeared to regard with reserve any arrangement which would lead to establishment on the Suez Canal of an international force, including British, to replace the British troops on guard there under the 1936 treaty of alliance.

Ambassadors of the four powers delivered the invitation to Foreign Minister Mohammed Salah el Din at Alexandria.

Salah el Din stressed that Egypt will go ahead, nevertheless, with cancellation of the alliance and the treaty of 1936, which provides for joint Anglo-Egyptian rule of Sudan. Egypt's Parliament is expected to complete Monday night the abrogation of those treaties, despite a warning by British Foreign Minister Herbert Morrison that Britain will use force, if necessary, to maintain her full treaty rights.

Salah el Din announced that, in talking with the envoys, "I made (Continued On Page Ten)

Super-Highway Opened To Traffic

The new super-highway between Midland and Odessa finally was opened to traffic Saturday afternoon.

The twin highway was placed in use at 3 p. m. and state highway patrolmen, who patrolled the area, said traffic was speeded up in both directions.

Formal opening ceremonies will be held October 20 at the Ector-Midland County line.

\$1,000 CHECK REPORTED STOLEN

Midland Police Saturday were searching for an unidentified man who walked into the Atlantic Refining Company offices here between 12:30 and 12:30 p. m., picked up a check for \$1,000, and walked out.

Ruth Breedlove, an employe in the office, said the check was not endorsed.

Hot Seat Results In Gashed Head

SAN ANGELO (P)—James Eaton sat on a loaded pistol in his car Saturday.

It went off. The bullet missed him but he jumped so high he cut his head on the car top, police said.

He was given first aid at a hospital and left in good condition.

Allies Smash Out Gains On Central Front

EIGHTH ARMY, KOREA (P)—Allied forces rammed almost three miles deeper into Red Korea Saturday in the fiercest fighting since last Spring.

Most of the action was reported on a 22-mile stretch of the central front—a section of rolling hills checkered with rice paddies—which once was the Communist "Iron Triangle" buildup area.

The U. S. 24th Division and the Republic of Korea (ROK) Second and Sixth Divisions punched out the longest gains on the approaches to Kumsong, 30 air miles north of Parallel 38.

Seventeen hills in the area were seized, the biggest some 2,000 feet high.

On the eastern front, American and attached French troops of the U. S. Second Division still were rubbing out Red bunkers on the northern slopes of "Heartbreak Ridge."

On the western front, U. S. First Cavalry troops moved unopposed onto a ridge line northwest of Yonchon, a village eight miles north of Parallel 38. The easy advance followed a costly setback.

The First Battalion of the division's Seventh Regiment was cut up badly by counterattacking Chinese Reds Friday. Survivors were rescued by the Eighth Cavalry Regiment.

Most Red resistance came from artillery behind bunkered hills. One officer called it the worst shelling since the war broke out June 25, 1950, with the Korean Red invasion of the Republic.

The fierce struggle for all-out "Heartbreak Ridge," east of Yonchon, appeared almost—but not quite—finished. The comparative handful of Red troops surviving the month-long battle were making a suicide stand, although the crests were in Allied hands.

U. S. Fifth Air Force warplanes hammered at Communist supply lines. F-84 Sabres jets patrolled "MIG Alley" in far Northwest Korea, some 300 miles behind Communist lines, but met no Red jets.

Man Accused Of Hot Check Tour Of State Held At Sweetwater

ABILENE (P)—A man accused of using false identification cards to cash checks during a tour of Texas was held in jail at Sweetwater Saturday night.

He gave his name as Wright R. Meade, 23, of Birmingham, Ala. Check swindling charges were filed against him at Abilene and Sweetwater.

FBI Agent Johnny Hubbard of Abilene interviewed the man regarding possible federal offenses and said he was "one of those unsatisfactory types."

Both Hubbard and Sheriff Cal Montgomery of Nolan County said Meade gave conflicting stories.

Longview authorities told Montgomery charges of passing a \$100 worthless check had been filed against Meade there. Amarillo officers said they may file charges against him.

Earlier this week, the Dallas County sheriff's office phoned The Associated Press and said Meade had cashed checks there, representing himself as an AP war correspondent.

The Associated Press does not issue identification or press cards to its employes.

The man told Montgomery he was AWOL from Sheppard Air Force Base at Wichita Falls. He said he started a tour of Texas after his marriage August 14 to the former Judy F. Pearce in Troy, Ala.

LATE NEWS FLASHES
WESTERN FRONT, KOREA (AP)—Communists rained 300 rockets on Allied positions above Yonchon early Sunday in the Reds' first full-scale use of the weapon in the Korean War.
MENOMINEE, MICH.—(AP)—Gustave Mowack, 30, was held on an open charge here Saturday night after shooting and wounding his pregnant wife in the abdomen. The baby was born dead shortly afterward.
NEW YORK (AP)—Senator Bowles, accompanied by his wife and children, left by plane Saturday to assume his new post as American ambassador to India.

HAY MAID — Coraleen Jurian, 17-year-old ranch girl of Coyote, Calif., will reign as "Livestock Queen" at the Grand National Livestock Exposition Horse Show and Rodeo at San Francisco's Cow Palace.

Strike May Tie Up Gulf Coast Shipping

HOUSTON (P)—Gulf Coast warehouse loaders and bagmen struck Saturday for an 11-hour pay increase. The strike threatened to tie up shipping from Louisiana to Brownsville.

Reds Appear Anxious For Final Parleys

MUNSAN, KOREA (P)—Allied and Red liaison officers met again Sunday at Panmunjom in efforts to settle the last technical difference barring resumption of the Korean cease-fire talks.

The meeting opened about 10 a. m. and lasted only 20 minutes.

Despite the latest Red allegation that Allied planes had strafed the Kaesong-Panmunjom conference area, the Reds appeared eager to get the talks going again.

The one question was definition of a "security area" around Red-held Kaesong, site of the talks which were suspended August 23.

UN officers meanwhile sent to Tokyo their secret findings on the latest Red complaint—that three American jet planes strafed the conference area late Friday, killing one Korean boy and wounding another.

Strating Charge Justified

There was a growing feeling among Allied correspondents that the inquiry supported the Red complaint.

Correspondents at Panmunjom generally felt the Communists had presented enough tangible evidence to back up their case—although there still were enough unknown factors to make a clear-cut report "impossible," reported Robert H. Tuckman, AP correspondent who accompanied the liaison officers.

The investigators talked by a 12-year-old boy, saw the body of a 12-year-old boy and a wounded 10-year-old, and were shown shell and bullet marks.

Asked by a Chinese officer if he had seen other witnesses at the scene, Col. Dan Dixon replied, "Yes," but added that he could not tell how old the boys were.

A UN Command spokesman noted, however, that the Reds had made only a verbal protest and requested a speedy inquiry.

In the past they have followed up (Continued On Page Ten)

Oswalt Says City Government Keeps Pace With Growth

Midland's city government is going to keep up with the city's growth, City Manager W. H. Oswald pledged Saturday as he wound up two years as the city's chief administrative officer.

"They have been a very pleasing two years," said Oswald, who came here from Jacksonville, "since they have represented a challenge and have presented numerous problems."

"I rather feel that we have made some headway and I get a deep personal satisfaction from what has been accomplished.

"I believe the municipal government can and will keep up with the growth of the city."

Oswalt said the job had been a fascinating one because "we are growing so fast that we can see the development before our eyes."

"And I feel that I have benefited personally through the experience I have gained."

No Reconciliation With Elizabeth Says Hotel Heir

HOUSTON (P)—Nicky Hilton Saturday flatly denied there was any chance of a reconciliation with his ex-wife, beautiful movie star Elizabeth Taylor.

Local sales of automotive equipment, including cars and parts, farm machinery and such, amounted to \$4,335,000 last year, or 29 per cent of the total retail business. Sales of furniture, household equipment and radios came to \$1,947,000, or 14 per cent. General merchandise purchases totaled \$2,288,000, another three per cent. Drug store sales came to \$1,318,000, taking four per cent of the consumer dollar. Better earnings made possible the greater retail activity. Midland residents enjoyed a net income last year, after taxes, of \$1,000 per year.

Nationwide Survey Indicates Midland is Flourishing Market

(Special to The Reporter-Telegram) NEW YORK—With incomes high in Midland, Texas, families there were able to allot a greater part of their earnings toward more luxuries living in the last year. This was noticeable, in large measure, in more liberal spending in food stores.

It also was observed in the ability of Midland residents to indulge more freely in automotive purchases, which correlates closely with living standards in normal years, and in purchases of furniture, household accessories and radios. The spending increase was greater than was called for to meet the rise in living costs.

The facts are brought out in Sales Management's current copyrighted study, covering all 44 states showing how money is spent in each community.

Above Average

The food bill in Midland in 1949 came to \$6,800,000. Divided by the number of Midland families, this represented purchases in grocery stores, meat markets, delicatessens and the like of \$630 per family.

This was more than the average American family spent for food, \$729 a year. It was greater, too, than was spent generally in the west south central states, \$616 per family, and than Texas' average, \$718 per family.

How much emphasis is placed on food in Midland is shown by the fact that store selling edibles receive 19 per cent of all the city's retail business.

An examination of other categories of retail business, used as indexes in the study also bears out the indication that Midland is a flourishing market.

Higher Expenditures

Local sales of automotive equipment, including cars and parts, farm machinery and such, amounted to \$4,335,000 last year, or 29 per cent of the total retail business. Sales of furniture, household equipment and radios came to \$1,947,000, or 14 per cent. General merchandise purchases totaled \$2,288,000, another three per cent. Drug store sales came to \$1,318,000, taking four per cent of the consumer dollar. Better earnings made possible the greater retail activity. Midland residents enjoyed a net income last year, after taxes, of \$1,000 per year.

HOSPITAL SCHOOL—Schoolwork continues for the patients at the Gonzales Warm Spring Foundation for Crippled Children. In a fully state-accredited school, grades one through 12, children are kept abreast of their studies and are prepared to join former classmates when their physical condition permits. Here, Kay King, daughter of Mr. and Mrs. U. S. King, 1406 South Weatherford Street, Midland, keeps up with her fifth grade work with the help of Mrs. Ruth Ragsdale, principal of the school.

Negroes Take Their Bee-Bop Seriously

WASHINGTON —Police Saturday reported Wilmore Watson, 33, in an argument with John Bates over whether a record player should be turned off, had his ears bitten off Friday night. Watson also is suffering from a knife wound. Bates, about 50, is in critical condition from knife injuries. The adversaries were listed as negroes.

Two Teen-Age Bible Students Get Prison Terms For Robbery

KEARNEY, NEB. —Two teen-age Bible school students were under penitentiary sentence Saturday in connection with a 32-hour, three-state crime spree last month. Arnold L. Lingo, 15, of San Antonio pleaded guilty to armed robbery and auto theft late Friday and was sentenced by Judge E. G. Reed to 12 years on the first count, five years on the second, with the terms to be served concurrently.

Michelle Heads Home To Tell Mama Gloria About Bob

PARIS —Pretty Michelle Farmer, 19, flies to New York this week to tell mama about her plans to marry Turkish-born Robert Amou, 37. Mama is Gloria Swanson, star of "Sunset Boulevard." She hasn't met Amou, managing director of a French film company, and all she knows about him is what she's heard in phone calls and letters from Michelle.

Elizabeth Taylor, Ex-Mate Nicky To Meet In Houston

NEW YORK —Film star Elizabeth Taylor and divorced husband Nicky Hilton, the hotel heir, have a date within the next few days in Houston, Texas. But nobody was saying whether a reconciliation is possible. The beautiful actress is scheduled to leave Newark, N. J., Airport for Houston Sunday, accompanied by Nicky's young brother, William, and the latter's wife, Marilyn. Nicky already is in Houston on business.

Racketeer Given Prison Term For War Dead Fraud

KANSAS CITY —A three-year prison sentence and a stinging rebuke from a federal judge have been given a St. Joseph, Mo., man who pleaded guilty to using the mails to defraud. His scheme involved parents of service men killed in Korea. Sentenced was William Charles Hollingsworth, 28. Sam O. Hargus, assistant U. S. attorney, said the scheme worked like this: Hollingsworth obtained from newspapers the names of men killed in the Far East and the names and addresses of their parents.

Heiress Gives Up 190-Room Castle In Lieu Of Taxes

LONDON —An heiress is giving up her 190-room marble castle in Wales because of the high cost of living in Britain. Lady Janet Harper, 28, has agreed to turn over to the National Trust, which acts as government caretaker for some of the country's historic homes, her 104-year-old Penrhyn Castle in part payment of inheritance taxes. Janet, a slender brunette, had been living in four rooms of the castle with her husband, a London lawyer. She inherited the massive marble mansion in 1949 from her uncle, Lord Penrhyn.

Decision Due Monday On Rate Injunction

AUSTIN —A decision is expected Monday in the injunction suit of 33 railroads to block emergency freight rate reductions on livestock feeds in 148 Texas counties. Judge Charles O. Betts advised attorneys in the suit to appear at 10 a. m. Monday.

Mid-Continent Dividend

NEW YORK —Mid-Continent Petroleum Corporation Saturday declared quarterly dividend of 75 cents and extra of 25 cents on common shares. This will bring 1951 payments to \$3.75 against \$3.25 a year ago.

Kidnapers Seize Blockhead Artist

LEEDS, ENGLAND —Kidnapers Friday night made off with Archie Andrews, wooden-faced radio and television comedian. Archie disappeared from a train between London and Leeds, where he was to have appeared Saturday night on a television show. Archie is the British Charlie McCarthy and is helpless without his "voice," ventriloquist Peter Brough. Brough has offered a \$1,400 reward. Scotland Yard and railway police had thrown out a net. They fear he may end up in somebody's fire place—in these days of coal shortages.

Fort Worth Garbage Crews End Walkout

PORT WORTH —City garbage crews tackled an oversized catch-up job Saturday after ending a five-day strike. More than 260 workers manned the entire fleet of 73 trucks. They were scheduled for a 12-hour work day, plus Sunday work for volunteers, in an effort to clean up piles of garbage and trash that overflowed cans since the strike started Monday.

Fort Worth Garbage Crews End Walkout

Coal is consumed in greater tonnage than any other commodity produced by man.

Decision Due Monday On Rate Injunction

Star Trademarks Hit Low Ebb As Menjou Loses Mustache

By BRADKINE JOHNSON NEA Staff Correspondent

HOLLYWOOD—Guys and Dolls: Star trademarks, already pretty much passed, took another K. O. the other day when a studio barber shaved off Adolphe Menjou's famed mustache for a movie role.

Only Jimmy Durante's nose, Gary Cooper's "Yip" and Ann Harding's chignon still are going strong.

But there will be no outcropping of the Harding long tresses no matter how many people wall that she might look more fashionable in a close-gropped hairdo.

"I know how I'd look," Ann says, "and I'm not cutting my hair for anyone. Besides, it's so simple. I just wash it and put it up."

The length of the Harding tresses? "I can just sit on 'em," she whispered.

Still gorgeous Ann and the familiar bun at the back of her neck soon will be on TV in a filmed serial, "Washington Lady," in which the famous star of such pre-war films as "Holiday" and "The Animal Kingdom," plays THE capital hostess. Observed Ann: "I guess I'm supposed to be Evelyn Walsh MacLean."

Movie over Tony Martin, Carl Brisson and Joe E. Lewis. Now it's Mark Stevens who's hawking tunes, personality and jokes about Faye Emerson on the night club circuit in an act that cost him \$25,000 for special material.

Hollywood citizens who knew Mark as a retiring, mild-mannered film star did a double-take when he bounced out on the stage, rattled off gags in the manner of Bob Hope, talked the lyrics to six songs and tried a dance step or two.

But they pounded their mitts as frantically as the rest of the audience and agreed that Hollywood hadn't even scratched the star's talents.

A movie based on the life of Walter Reid now that Hollywood is on a film star biography binge?

Dorothy Reid, the widow of the dashing Wally, doesn't think movie-makers should look backwards into Hollywood's history.

"Why do Wally's story or any other star's story of his era? There's no public for it."

Once an actress, Dorothy's now a film writer, turning out screenplays for "Rhubarb" and Francis, the talking mule.

Write down the name of Eleanor Parker, Betty Hutton and Lana Turner as heroines to movie glamor queen titles in the bewitching traditions of Marlene Dietrich, Gladys Swanson and Pola Negri.

Then make a note that fashion designer Don Loper slipped us the word.

Don, who just opened a new salon in Beverly Hills, is the leader of the down-with-the-girl-next-door type of movie heroine, and chief drum buster for the let's-have-a-more-movie-queens-in-split-skirts-like-Marlene Dietrich.

Don's theory on Hollywood's lost glamor: "Hollywood stifled glamor when the girls-next-door charged onto the screen in puppy love stories."

"The producers tried to sex 'em up in plunging necklines but they still looked phoney because they weren't thinking glamor. You can't make a doll look sophisticated unless she thinks it."

"Now they're thinking again—and Eleanor, Betty and Lana are going to surprise a lot of people. There's glamor in clothes, sure, but real glamor is still in a woman's mind and not on her back."

Stars Aren't Needed

Irene Dunne and Gary Cooper may want to argue the point, but Hugo Haas, who acts, directs, writes and produces, is swearing that unknown actors are box office these days.

"It's no longer important to have established people in good pictures," says Haas, who's just completed his third independent, "Thy Neighbor's Wife."

"If a picture's right, big stars aren't needed. Even Clark Gable and Cary Grant can't save a bad picture."

Haas' new discoveries: Blonde, busy Cleo Moore, who once was wed to Palmer Long, Hugu's son, and Ken Garga, a Mitchumish-looking lad who spent a year at MGM without facing the cameras. "These kids have an off-beat quality," Haas opined. "The public will appreciate seeing their fresh, new faces."

GRIDER INJURED

Lawrence LaFord, Hobbs, N. M., negro football player, suffered a broken arm in a game here Friday night. He was given emergency treatment at Western Clinic-Hospital.

Ground wires and battery cables often are broken by a loose automobile battery bouncing around in its container.

What's RIGHT?

You are introducing your mother-in-law to an old friend. WRONG: Introduce her as "my mother-in-law, Mrs. James." RIGHT: Since it is an old friend, be less formal and introduce your mother-in-law as "Jim's mother."

With The Services—

Capt. H. B. Arnold Is 'Century Fighter'

Capt. Howard B. (Hap) Arnold, Jr., son-in-law of Mr. and Mrs. John P. Butler of Midland, was added to the Air Force's list of "Century Fighters" before returning to the states from Korea on rotation recently. He completed his 100 missions while serving with the 18th Fighter-Bomber Wing, the only Mustang unit operating in Korea. During his missions, the 26-year old pilot participated in close support, armed reconnaissance and mass formation strikes of the bomber wing, which has an enviable record of more than 25,000 effective combat strikes in Korea.

The son of Mr. and Mrs. Howard B. Arnold of Arkadelphia, Ark., Captain Arnold graduated from the Arkadelphia High School, and from the U. S. Military Academy at West Point in June, 1947. After receiving his commission, he attended flight training and received his wings a year later. He was promoted from first lieutenant to captain, Sept. 1, 1951.

He has been awarded the Distinguished Flying Cross, the Purple Heart and the Air Medal with two Oak Leaf Clusters.

Captain Arnold and Jane Butler were married here in 1947.

The captain last week reported to his new assignment at McGuire Air Force Base, Camp Dix, N. J. Captain and Mrs. Arnold and their son, Butler, are residing at Borden-town, N. J.

Pvt. Joe N. Dorsey, son of Lt. Col. and Mrs. E. C. Heikkila of Camp Chaffee, Ark., and Midland,

Pvt. Joe Dorsey

is serving with a motor platoon in the 23rd Infantry Regiment of the Army's Second Division in Korea, according to information received here.

He entered the service in February, 1951, and took his basic training at Fort Knox, Ky. He sailed from Fort Lawton, Wash., last August for Japan and assignment in Korea.

Private Dorsey was born and reared in Midland, and with the exception of two years of high school study in Europe, he was educated in the Midland public schools. He graduated with the MHS Class of 1948. Before entering the service he was employed in the Engineering Department of The Texas Company.

The Midland soldier is a grandson of Mrs. Bertha Johnson and Mrs. Sara Dorsey, both long-time residents of Midland.

Jerry D. Bohannon of Midland has been promoted to the grade of sergeant in Sendai, Japan, where he is serving with the 49th Infantry Division.

A rancher in civilian life, he is the son of Mr. and Mrs. A. G. Bohannon, and is an ammunition sergeant with Battery B of the 143rd Field Artillery Battalion.

Pvt. John N. Larsh, son of Mr. and Mrs. N. B. Larsh, Midland, recently entered the Airplane and Engine Mechanics School at Sheppard Air Force Base, home of the largest technical school of this type in the world.

He is a graduate of Midland High School and received the degree of bachelor of science from Sul Ross College and was formerly engaged in ranching with Guy Cowden.

Pfc. Glen Ralph Wallace, Jr., has started training in aircraft maintenance fundamentals at the Aero Industries Technical Institute at Oakland, Calif.

Wallace, son of G. R. Wallace, 304 North D. Street, enlisted in the Air Force last March and will complete his current course in 15 weeks.

Jerry J. Parsley, airman, USN, son of Mr. and Mrs. L. E. Dover, 810 South Fort Worth Street, was recently graduated from the Aviation Structural Mechanic School at the Naval Air Technical Training Center at Memphis, Tenn.

Parsley entered the naval service in September, 1950, and received

THE BIG SHOW—Jack Hope, left, and Lester Short herald the coming of the Bob Hope Show to Midland October 21 at Memorial Stadium. Jack is Bob's brother and the show's advance man and Short is president of the Midland Shrine Club, sponsor of the show. Tickets are on sale at Midland Hardware and Furniture Company.

John Speir Named Raindeer Distributor

John T. Speir of Midland has been appointed distributor for Texas Raindeer Soft Water Systems in this area, it was announced Saturday.

The new distributor said the Raindeer Systems offer the latest in design and quality, and provide the "luxury and satisfaction of wonderful soft water and gracious living."

He invites persons interested in owning a soft water system to telephone him at 2-2449.

MIDLAND STUDENT ELECTED AT TCU

PORT WORTH — David L. Harlin, Jr., 1709 North Bryant Street, Midland, has been elected representative to Texas Christian University's Student Congress.

Harlin is a freshman majoring in biology.

The Capt. Johnson Deep, off the Philippine Islands, was discovered by the U. S. naval transport Cape Johnson in 1945.

his recruit training at the Great Lakes Training Center.

College graduates in the Midland area have an opportunity to become Marine Corps officers under an expanded officer training program.

M. Sgt. A. B. Sealy of the Marine Corps recruiting office in Odessa said graduates 20 to 27 years of age, including married men, are being sought to meet the expanding needs of the Marines and to fill vacancies caused by the release of reservists. Further information can be obtained from the recruiting office in Odessa.

Pfc. Joyce M. Beasley of the Women's Air Force, daughter of Mrs. Ida M. Beasley of Midland, left Wednesday for Fort Meyer Air Base in Arlington, Va., after spending a 10-day furlough here. She will be assigned as a typist-clerk in the Pentagon Building in Washington, D. C. Private Beasley received her basic training at Lackland Air Force Base in San Antonio and later was graduated from a typing school at Francis E. Warren Air Base in Cheyenne, Wyo.

Congratulations To:

Mr. and Mrs. James E. Leonard, 606 Burlington Street, on the birth Wednesday of a daughter weighing six pounds, 10 ounces.

Mr. and Mrs. H. H. Rogers, 1305 West Holloway Street, on the birth Wednesday of a son weighing seven pounds, 12 ounces.

Mr. and Mrs. Charlie Russell, 105 North Jefferson Street, on the birth Wednesday of a son weighing seven pounds, 12 ounces.

Mr. and Mrs. B. H. McWilliams, 511 North Baird Street, on the birth Wednesday of a son weighing seven pounds, 10 ounces.

Mr. and Mrs. Glen Geneva, 207 East Kansas Street, on the birth Wednesday of a son weighing six pounds, 13 ounces.

Mr. and Mrs. Jim Dobbins, 809 Weatherford Street, on the birth Friday of a daughter weighing six pounds, five ounces.

Mr. and Mrs. Buddy LaRue, West Carter Street, on the birth Wednesday of a son weighing nine pounds, three ounces.

Texas Building Awards Decline

AUSTIN —(AP)—Texas construction lagged last week. The Texas Contractor, building trade journal, reported contracts totaling \$12,815,812, down almost 4 1/2 million dollars from the previous week.

Residential and non-residential building ran an even race, awards for the two types of work reaching \$5,867,000 and \$5,857,829, respectively.

In the residential bracket, lettings on 239 homes costing an average of \$16,661 totalled \$3,982,000, while 182 low-cost homes averaging less than \$7,000 were put under contracts amounting to \$1,127,500.

Non-residential lettings placed \$1,065,045 on schools; \$674,348 on churches and theaters; \$273,875 on hospitals and hotels; \$36,543 on public buildings; \$750,000 on industrial buildings; and \$3,058,182 on business buildings.

Engineering contracts added \$1,090,983.

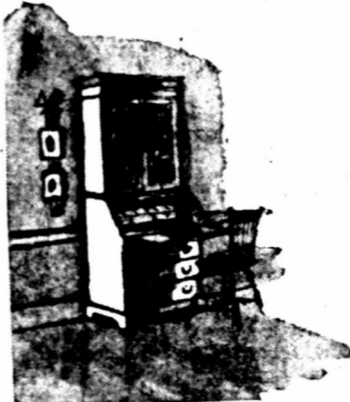

The year's aggregate reached \$655,638,424.

Hats Off To Oil!

Oil Progress Week opens Sunday, and surely in Midland and throughout the Permian Basin Empire the observance should receive the endorsement and enthusiastic support of all residents of this prosperous and fast-developing area.

The annual observance is nationwide in scope, but right here at home, Oil Progress Week certainly should mean a great deal more to individuals, organizations and business firms than in some other sections which have not been blessed so abundantly by the benefits of petroleum.

Consider, if you will, the rather limited resources of this section of West Texas before the discovery of oil, and then consider further the vast and almost unbelievable changes and improvements and the rapid growth which have resulted during the comparatively few years since oil came into its own in the Permian Basin Empire.

Such reflection surely will bring one to the full realization that petroleum truly does mean progress, and that every citizen, regardless of whether he directly is engaged in the oil industry, is dependent upon the petroleum business at least to a certain extent.

In line with that thought, Mayor Perry Pickett has proclaimed the observance "Midland Oil Progress Week," and if ever a community should join with an industry in celebrating such an occasion, it is Midland.

Although some Midlanders perhaps do not realize it, Midland and Midland County today are the "white spots" of the oil world. The tremendous growth of the city and the fast development of the oil resources of the county are attracting the attention of Americans from coast-to-coast.

It is oil—it is progress, which largely are responsible for the enviable position held today by this headquarters city of the Permian Basin Empire.

Let us, then, during Oil Progress Week, give serious thought to this all-important industry which means so much to Midland and to West Texas.

Oil men here and elsewhere will take advantage of the special observance to report to the nation just what they have done and what they plan to do to meet the ever-increasing demand for crude oil and refined products for defense, private and commercial needs. It strikes us that since all of us more or less are in the oil business, we should give the oil boys an "assist" in carrying out their program of education during Oil Progress Week. It is a project in which all of us should join wholeheartedly.

The oil industry deserves a real pat on the back for its openhandedness in keeping us informed as to operations and new plans.

Yes, the oil industry has multiplied problems, too, and it behooves us to consider these problems so as to have a better understanding of the troubles which face the business on which most of us are dependent, directly or indirectly.

Despite the high level on which the industry operates, and despite its importance in local, state, national and world affairs, there still are those who would place additional burdens upon petroleum, stumbling blocks, if you please, in the path of petroleum progress. There is a definite assignment for each and every one of us in assisting oil men and women in telling their true story of petroleum and its place in world affairs.

Let's join hands in making the 1951 Oil Progress Week the most outstanding observance of its kind ever held in the Permian Basin Empire.

Air Base Problem

The North Atlantic Treaty nations are agreed that American air power is fundamental to Western Europe's defense. They acknowledge, too, that to make that power effective the United States must have many new bases on the Continent, particularly in France.

Yet very little is being done to expand the air base system in Europe. Why? Because the United States and the nations of Europe cannot agree on a formula for sharing the cost of the necessary facilities.

No one can pretend fairly this is an easy matter. France already is strained to support an armed force far, far smaller than its World War II army. Other countries feel themselves in similar straits. We on the other hand believe this is one place where Europe ought to make the chief contribution.

Admittedly, NATO is an experiment in international military cooperation on a scale never before tried. New problems of sharing responsibilities and burdens were bound to arise. But there is scant hope for this experiment if so vital a matter as paying for essential airfields cannot be settled readily. Peace will not be preserved if we insist on haggling over international bookkeeping.

Help do the dishes with a hum, sweet hum, and you'll help to make a home, sweet home.

World's Tightest Talent Monopoly

The Washington Merry-Go-Round

By Drew Pearson

(Copyright, 1951, By The Bell Syndicate, Inc.)
Drew Pearson says: U.S. finances Philippine immorality; Senator Capehart speaks to empty seats; Truman considers national physical fitness program.

WASHINGTON—The Veterans Administration is holding its ears for explosions when this gets out, but several millions of the taxpayers' money is being spent annually to finance immorality in the Philippine Islands.

This is because widows of Philippine veterans of World War II are entitled to disability and death pensions, just as the widows of American G.I.s, but lose their pension if they remarry.

As a result, living out of wedlock has become widespread among Philippine war widows so as not to lose the monthly benefits from Uncle Sam. In some cases the practice has fantastic aspects. Philippine widows even have lived with married men, splitting their pensions with the men's wives.

V. A. examiners have run across cases of a man having three or four children in a period of two years—obviously impossible with one wife. However, how to break up these "harems" subsidized by Uncle Sam has the V. A. puzzled, partly because there is little or no enforcement of adultery laws in the Philippines and partly because the common-law marriage is not recognized there.

The V. A. has cut off the pensions of some widows living with single men, since cohabitation without marriage is considered the equivalent of common-law marriage, whether or not such is recognized in the islands. However, such cases sometimes are tough to prove. V. A. investigators get little cooperation from neighbors of the couple, and the woman takes separate lodgings when word is flashed that an investigator is in the neighborhood.

It even is tougher to get at pensioned widows living with married men—especially when the wife gets a slice of the pension. V. A. Solicitor

trumps. He couldn't afford to ruff another diamond, since that would reduce him to the same number of trumps as West; and West would be able to lead still another diamond when he got in with the king of trumps. South therefore had to get to his hand with the ace of hearts to knock out West's king of spades.

Now West could lead a heart, and East had two heart tricks to set the contract. Of course West was not cured of doubling by this fortunate result.

After ruffing the second diamond, South should have led a trump to dummy's ace, disdaining the finesse. He could then overtake dummy's jack of spades with his own queen, forcing out West's king. Nothing could prevent him from regaining the lead with the ace of hearts to draw the rest of the trumps. Then dummy's clubs would furnish enough tricks to make, the contract with an over-trick.

CARD Sense

Q—With East-West vulnerable, the bidding has been:
West North East South
1 Heart Pass 7
You, South, hold: Spades Q-J-9-7-2, Hearts 3, Diamonds K-J-4-3, Clubs A-10. What do you do?
A—Bid one spade. The hand is strong enough to reopen the bidding, but it is ill suited to defensive play. If you reopen with a double, your partner may make a doubtful penalty pass. If you reopen with a suit bid, and your partner subsequently doubles the opponents, he knows that he can-

NO SURVIVORS

BY WILL HENRY
REPRODUCED BY NEA SERVICE, INC.

THE STORY: John Clayton, reported and edited by Henry Henne, told the whole game of the frontier activity. He has outlined the tactics in facing the Army's double-dealing policy, but now he says that Clayton is coming into the U.S. country and that his moral position becomes intolerable.

"If I go, I will go as a white man. If they will not stop I will come back with them. I shall be at Yellow Hair's side. But if I can stop him, all will be saved for the Sioux. Peace will be in this land of the Spotted Eagle."
"I am a traitor, yet who among you will say I have lied? Who among you will stop me and so lead all his people to their deaths? I have spoken. I go."
I did just that, turning slowly to walk head-high, among them, my course laid straight through the

WASHINGTON COLUMN

Tax Men May Be First Ones Hit By 'Pay Showdown' Law

By PETER EDSON
NEA Washington Correspondent

WASHINGTON—President Truman's special message to Congress recommending that all government officials put on public record their income from all sources, public and private, stirred up a congressional hornets' nest.

Yet a House Ways and Means subcommittee under Rep. Cecil R. King of California now is seriously considering a requirement that employees of the Bureau of Internal Revenue—the tax collecting agency of government—be required to fill out annual questionnaires giving their private source of income.

The question that naturally arises is, "If it's all right to apply this to BIR, why not to all government employees, including congressmen?"

A further question is, "Will the Ways and Means Committee—the taxation committee of the House—create a precedent which other committees of Congress have to follow for the departments over which they ride herd?"

And having applied this financial X-ray test to the executive branch of government, why shouldn't it be applied to the legislative and judicial branches?

Indiana now is having a go-round with Federal Security Agency Administrator Oscar Ewing over making public the names of people on relief rolls. The recent Governors' Conference in Gatlinburg, Tenn., went on record as supporting the Indiana stand.

Income Tax Records
What all this seems to be leading to is a return to the days when all income tax records were public property. How much money various and sundry citizens made was published in the newspapers. It caused many jealousies and embarrassments and finally was abandoned, save for corporation executives making more than \$75,000 a year.

These private enterprises now seem reconciled to having their pay made public. But in government, only the President makes that much, and his private income, if any, is his private business.

Senator Paul Douglas of Illinois says he is perfectly willing to make public his outside income, over and above his senatorial salary, and soon will do so. Other lawmakers aren't so inclined. But concealed in this woodpile is a whole raft of private legal fees, lecture fees, magazine article fees and similar by-product income of government jobs.

Commissioner John B. Dunlap, the two-listed treasury career man who has been head of Bureau of Internal Revenue since Aug. 1, says he is perfectly willing to subject his employees to private income questionnaires if Congress directs him to do so.

He points out, however, that any crooks in his organization would be inclined to give him crooked answers. And he has a better source of information in his employees' income tax declarations. If they file

not expect an ideal defensive hand from you.

TODAY'S QUESTION
The bidding is the same as in the question just answered. You, South, hold: Spade A-Q-J-9-7-2, Heart 3, Diamonds K-Q-J-8, Clubs A-10. What do you do?
Answer Monday

"You are not going. I think we will kill you."
A dozen braves seized me, threw me roughly against a convenient ceremonial pole, lashed me there with rawhide.

ABOUT three that morning, June 24, Yellow Bird came for me, a detachment of 10 heavily armed Sioux with him. They untied the bonds which held me to the post, leaving my hands bound. Yellow Bird led me away like a captive animal, heavy leather lead-though around my neck, five ugly-eyed Sioux on either side.

"Is your heart bad against me, my brother?" I had a real affection for this tall, clown-minded killer. If any among the Sioux would remain constant, it would be he. But his answer let me know where the wind lay before ever I heard my sentence.

"My heart is bad," There wasn't so much as a hint of regret in his tones. "If Crazy Horse tries any of his big talk to prevent the peeling-off of your skin there'll be trouble."
We entered Sitting Bull's lodge, which now had the side-steps down light. Sitting Bull, Crazy Horse, Gall and White Bull were present. "You may go," Sitting Bull directed Yellow Bird. The latter gave me a hard shove forward into the tipi, so that I would have fallen face into the fire, bound as I was, had not Crazy Horse sprung up. In one smooth move the war chief checked my fall and reversed my bonds.

In one smooth move the war chief checked my fall and reversed my bonds.

"It is not good for a chief to stand among his equals bound like an animal."

(To Be Continued)

By BOYCE HOUSE

In Hollywood, several men were talking about an individual. One said, "He's his own worst enemy," Groucho Marx exclaimed. "Not while I'm alive!"

Someone (maybe it was Senator Taft) said, "There will always be an England—as long as the United States can afford it."

"A dog that will bite shall be muzzled," snapped Sitting Bull. The others nodded grunting assent. "Crazy Horse began."

"There are no more pretty speeches. Every vote here but mine would have you given the Fox Lodge traitor trial, even as the Mouse had it. But I have argued for you, not because I love you and you are my son, though both of these are true things, but because you are a great warrior. You have lived among us with bravery always."

"Some among us"—here his gaze lingered speculatively on Sitting Bull—"do not have so long a memory as Crazy Horse."

ALTHOUGH you are ready to betray us, you stand forth like a man, saying, "This I am going to do, and I am not afraid of you. You have said, I have seen you are sick of heart and will be bad medicine for us."

"Because he honors my vision of this, Tanaka Yotaku who has the final word in all points of our law, has consented to place your fate on the knee of Wakan Tanksa."

"When the sun tops the hills of the Greasy Grass, you will be made ready. You will be stripped naked! You will have no weapons. Behind you in a long line will stand 30 braves, also naked, but each armed with a buffalo lance. At the signal you will take 10 paces forward and halt. Then will come another signal and you will begin to run. You will begin to run because behind you the 30 braves will begin to run. And then will be the lance. If your medicine is good you will reach Yellow Hair. If it is bad your blood will be on your own hands."

"A little on the prairie, too, maybe?" I interrupted, sarcastically. I was mad now, as I always got when I penetrated my rawhide skull that people were shooting at me.

"It is fair," concluded Crazy Horse. "You have lived a brave life. I gave your life back to you. I looked at him hard. His face was given as granite. But in his eyes was something I had never seen there before. "It is fair," I answered, adding softly, "my father."

Bulldogs, Parrots Tie, 13-13

Last Quarter Splurge Saves Canine Bacon

FORT WORTH—A short aerial toss from the arm of Ralph Brooks settled into the outstretched hands of Ed Robert Keisinger on the 12-yard line and he scooted on to score and earn the Midland Bulldogs a 13-13 tie here Saturday night with the inspired Parrots of Polytechnic High.

A try for extra point by Larry Friday, which would have broken the deadlock in the closing seconds of the game, was unsuccessful.

Midland moved 69 yards to pay dirt in the final two minutes to recover from a precarious perch on the brink of defeat.

It was, in fact, a game of catch-up for the Midlanders all night after allowing Poly to take a 6-0 lead in the opening quarter and then run the count to 13-0 in the third period.

But that desperate last quarter earned 13 points and a Midland deadlock as the small but excited crowd of 3,000 fans yelled themselves hoarse.

Brooks Gets Going

Midland first scored early in the fourth quarter, going 67 yards. Brooks hit Freddy Bilbo with a 15-yard pass to the middle stripe and Poly was penalized to its own 26 shortly thereafter for unnecessary roughness. Brooks personally took

GAME AT A GLANCE

Midland	Fort Worth
15	14

Yards rushing, net	173
Gained Passing	66
Passes Completed	11
Passes Attempted	5
Passes Intercepted by	2
Punts	3
Average Punt	30
Fumbles Lost	1
Penalties	5
Lost by penalty	85

charge, running the ball five times, sweeping over from five yards out.

Friday's try for an extra point after this first touchdown was unsuccessful.

After stopping Poly, Midland again took over and drove on the ground toward Fort Worth's goal line. But a southpaw pass by Roy Kinsey was intercepted and Poly took over on its own 30.

Stan Coker, Bill Leonard, Bill Mims and Jimmie Lineberger, along with Dan Black, who played a fine defensive game, stopped the Poly attack and they kicked out to the Bulldogs 31.

Then came the thrilling finish. Brooks screened a pass to Friday for 11 yards and then lost the 11 on an attempted pass. He then hit Johnny Kennedy at the Poly 49. After a pass was incomplete, Kennedy hauled in another and stepped to the 22. Brooks faded back, found Keisinger in the left flat, and Keisinger romped over with a Poly defender desperately trying to cut him off from the flag-guarded goal line.

First Half All Poly

Poly, after its first score, got another in the third quarter on a 64-yard drive. Bill Ellis' 16-yard dash being the payoff. His kick made it 13-0.

The Parrots took charge completely in the first half, piling to 10 first downs while holding the Bulldogs to three. They marched 84 yards after taking the opening kickoff, with Johnny Howerton scoring on a six-yard burst up the middle.

The Bulldogs lost a golden opportunity with only a minute and 45 seconds to play in the first half when they failed to score from the Poly 14 after Roy Kinsey dropped on a Parrot fumble at that point.

Three passes, all incomplete, and an end sweep could gain but two yards.

Midland moved for three first downs in a drive which started in the first quarter and bogged down at the Poly 36, after covering 32 yards in its only first half threat.

Camp Polk Beats Randolph, 25-13; Waldo Young Stars

CAMP POLK, LA.—(AP)—Camp Polk upset Randolph Field, Texas, 25-13, in a football game here Saturday.

Polk's Alec Thompson, Bakersfield, Calif., broke through left tackle in the first quarter and dashed 53 yards to score. Tackle Louis Tilotson converted.

Left halfback Wilson White, Gadsden, Ala., raced 46 yards to make the halftime score 13-0 for Polk.

In the third quarter, Walter Triple, former Detroit Lion star, went 50 for another Polk TD. Waldo Young called up one for Randolph in the same period, and he repeated in the final quarter. Jerry Olias, former TCU griddler, kicked the extra point.

White tallied his second TD and clinched victory by driving over from the 13 in the fourth.

Aggies Swamp Trinity

SAN ANTONIO—(AP)—The mighty Texas Aggies, No. 4 team in the country, steamrollered Trinity University here Saturday night, 53-14.

It was no contest from the opening gun as the Aggies scored four touchdowns in the first period, two in the second, one in the third and one in the fourth.

The Aggies wrapped up the game with a smooth mixture of power and finesse. Two touchdowns came with passes. The others with lightning stabs at the line for distances up to 70 yards.

Raymond Haas, a junior from Kingsville, sped over for two touchdowns on a 66-yard run in the third period and a 20-yard thrust in the second.

Touchdowns To Spare

Other touchdowns came like this: Glenn Lippman, on a 13-yard pass play from Dick Gardamel; Augie Saxe on a 61-yard sprint around end; Connie Magouirk, on a 70-yard run; Pete Mayeaux, on a 63-yard ramble; Roy Dollar on a quarterback sneak from the one-foot line; Jerry Crossman, on a 14-yard pass play from Ray Graves.

Bob Smith, the bulldozing fullback, did not play. He favored a charley horse. Neither did Billy Tidwell, out with a kashed foot, nor Cary Anderson, benched with a hurt knee.

Trinity was able to make a game of it only briefly, but learned early that the way to keep the Aggies from scoring was to hang on to the ball.

Tommy Majors scored both of Trinity's TD's, one in the second period on a three-yard sprint and another in the third, capping an 83-yard, sustained drive with a seven-yard scramble through the middle on a fake reverse.

The Aggies picked up 305 yards rushing and 185 through the air. Since those long breakaway runs didn't add up to first downs, they had only three to 13 for the Tigers. In fact, the Ags didn't dent this column till late in the third period.

Stanford's Indians Upset UCLA, 21 To 7

PALO ALTO, CALIF.—(AP)—Stanford's Indians, with Olympic DeCathion Champion Bob Mathias in one of the starting roles, scored a spectacular 21 to 7 upset victory over the UCLA Bruins Saturday to stamp themselves as Coast Conference title challengers and contenders for the Rose Bowl. A crowd estimated at 35,000 saw the contest.

Mathias, 203-pound fullback, playing his first year of college football, this season, scored two of his team's three touchdowns.

Stanford, hitting with tremendous power on the ground and completing thrilling passes in the clutches, showed over touchdowns in the second, third and final periods. UCLA's Bruins powered 81 yards in the third quarter to gain a momentary tie with their rivals, but succumbed before a Stanford comeback.

Carver's Hornets Down Hobbs, 37-20

The Carver Hornets Friday night won their third ball game of the season, defeating the Hobbs Tigers by a 37-20 score in Midland's Memorial Stadium.

The gridlers of Coach Johnny Williams previously had defeated Vernon and Odessa after losing to Lubbock and Amarillo.

Kansas JayHawks Roll Over Utah, 26-7

LAWRENCE, KAN.—(AP)—Kansas mixed a concoction of running plays to score all of its points in the first half and beat Utah University, 26 to 7 Saturday.

Utah never threatened the Jayhawk lead but did retaliate in the second half to score one touchdown.

Tech's Raiders Surprise Frogs

Victory Is Upset Of Year

LUBBOCK—(AP)—Texas Tech arose from two straight defeats Saturday night to knock down Texas Christian of the Southwest Conference 33-19, in one of the biggest football upsets of the season.

Tech roared to a third quarter lead of 33-0 and coasted to an amazingly easy victory over the Frogs before 19,000 fans.

The Red Raiders tallied their first touchdown nine minutes deep in the first quarter, punched over another first period score and continued to turn the game into a near rout. Coach De Witt Weaver finally made things even by using his third string.

Horned Frogs Surprised

Tech's vicious blocking and hard charging line took the Horned Frogs by surprise. Before the startled visitors, picked for no worse than third place in the Southwest Conference could get organized the Raiders had won the game.

TCU stormed back late in the game for three touchdowns in the final stanza against Raider reserves, piling up tremendous yardage through the air. Ray McKown sparked their drive.

The statistics fail to show how thoroughly Tech outplayed the visitors. The Raiders rolled to 335 yards on the ground to 106 yards for TCU. The Frogs completed 17 aerials of 30 attempted for 208 yards, with three interceptions. Tech had 49 yards on three completions in only eight attempts.

Cavaasos Runs Wild

Halfback Bobby Cavaasos, an elusive wraith for the Raiders, ran the Horned Frogs crazy with three touchdowns scampers. His first was for five yards and touchdown with nine minutes gone. He plunged three yards for his second touchdown in the second quarter with a minute and 10 seconds gone. And his third score was Tech's final. On that he rammed tackle for two yards.

Halfback Jim Turner scampered 39 yards behind beautiful blocking by Tackle Jerrell Price and half the Tech team for the second Raider score. Guard Punk Whitaker converted on the first of his three successful placements.

Quarterback Junior Arterburn, scored the fourth touchdown on an 11-yard bootleg toward the end of the second quarter.

The Horned Frogs didn't get started until late in the third stanza. Jack Ray, subbing for Bobby Jack Floyd, took a shovel pass from Gil Barstosh to cap a 74-yard march, moving 13 yards to score with 10 seconds gone in the fourth quarter.

WELL MET, QUIMET—Francis Quimet makes golfing history as he makes the traditional drive which installs him as the first American Captain of the Royal and Ancient Golf Club at St. Andrews, Scotland. The 58-year-old Bostonian thus joins a distinguished group whose members formerly have been exclusively royalty and other world leaders. Quimet made history once before in 1913, winning the National Open as a 20-year-old amateur. (NEA)

Midland B's Drop Contest To Lamesans

LAMESA—Midland's High School B team lost to the Lamesa B's here Saturday night, 12-14.

Midland's play in the first half was erratic but in the second half the visitors improved their ground game to stay in Lamesa territory. But they failed to deliver the scoring punch needed to win.

Rusty Rutledge and Clinton Nobles scored the Midland touchdowns. At the half the score was 14-6, Lamesa.

The Midland touchdowns were tallied in the first and third quarters. Lamesa's in the first and second. The teams stuck to ground plays for the most part and each was able to block a kick. Lamesa set up one of its touchdowns on a blocked punt.

Coaches Keith Bobo, John Higdon and Dub Orr directed the visiting team.

USC Beats Oregon State In Third Period Uprising

LOS ANGELES—(AP)—Frank Gifford's third quarter field goal brought the Southern California Trojans from behind to a 16-14 win over Oregon State Saturday in a Pacific Coast Conference game.

USC left the field at halftime trailing by a 14-6 count.

But the Trojans came back with a rush in the second half to hold control of the ball almost completely and despite their own miscues, stayed off the Beavers' bid for a coveted triumph.

Rice Owls' Passes Smash Navy, 21-14

HOUSTON—(AP)—Rice smashed Navy, 21-14, Saturday night on the pin-point passing of Dan Drake and the perfect catching of Big Bill Howton.

Howton snared two touchdown passes and two others that gave him 132 of the 157 yards the Owls gained, passing.

Drake connected on seven of 10 passes, his scoring pitches to Howton covering 74 and 21 yards, respectively.

Navy grabbed a quick touchdown on a blocked punt less than two minutes after the game began, then cut the Owls' margin in the third period when Don Fisher grabbed David Johnson's punt and scooted 59 yards.

Bill Wright booted three extra points for the Owls, and Ned Snyder made good on both attempts for Navy.

It was all Rice as Jess Neely's blue-clad warriors won their first game of the year and handed Navy its second straight loss. The Midgies haven't scratched the win column this season, but have a 7-7 tie with Yale for moral comfort.

A Texan, Bob Hempel of Galveston, broke through to block Bill Burkhalter's punt after 1:35 minutes of play, picked up the ball on the 16 and gave Navy a quickie score.

It looked like the crowd of 58,000 was going to see the Midgies cover themselves with glory.

Then Howton and Drake took over. In about six minutes they had tied the score, Drake hitting his big target on the Navy 40.

In the second, the same combination clocked to climax a 12-play, 91-yard march.

The Owls wound up their scoring in the third and this time it was Teddy Riggs' running that ate up most of 70 yards they covered. He scored from the three.

A bruising defense kept Navy's Bob Zastrow, Frank Hauff and Fred Franco almost completely bottled up.

The Midgies gained only 128 yards on the ground and 49 through the air to the 323 yards Rice picked up rushing and passing.

Kentucky Wildcats Find Scoring Punch After Three Losses

LEXINGTON, KY.—(AP)—End Bob Fry blocked a Mississippi State punt in the first quarter to set up a touchdown and erupt Kentucky's long dormant scoring punch in a 27-0 football victory here Saturday night.

Kentucky, loser of three straight games by a total of 11 points, found its punch against the defensive-minded Mississippian and scored its other touchdowns on drives of 59, 76 and 44 yards.

Mississippi State, on the other hand, mustered only one serious threat, but it sizzled against a stout Kentucky defense at the Kentucky line after a 39-yard advance in the opening minutes.

Babe Parrill, Kentucky's All-America quarterback candidate, pitched two touchdown passes as Kentucky vacated the Southeastern Conference cellar with its victory.

Irish, SMU Sign Four-Year Contract

SOUTH BEND, IND.—(AP)—Notre Dame and Southern Methodist have signed an agreement for a four-year, home-and-home football series starting in 1963, it was announced Saturday.

The first game will be played at Dallas in 1963.

The agreement was signed by Athletic Director Matty Bell of SMU when he came here for Saturday's SMU-Notre Dame game, which SMU won, 27-20.

Tulsa Hurricane Jolts Houston U With 46-27 Win

TULSA, OKLA.—(AP)—Defending champion Tulsa, using an irresistible rushing attack, jolted ambitious Houston's Missouri Valley Conference football title hopes Saturday night, rolling up a 46-27 score.

Still smarting from a close loss to Cincinnati two weeks ago, Tulsa broke the game open with a three-touchdown surge in the third quarter after leading, 19-7, at halftime.

The Golden Hurricane did this on the powerful running of Fullback Howard Waugh and Halfback Billy Parsons, with Waugh reeling off a 71-yard touchdown ramble on the first play of the third quarter.

Colorado A&M Puts Blister On Wyoming

FORT COLLINS, COLO.—(AP)—Colorado A&M's determined, hard-socking rank took advantage of faulty Wyoming punting to hand the Cowboys their first Skyline Conference loss since 1948 here Saturday, 14-7.

The Aggies' line outcharged the Wyoming forwards, bottling up triple threat Tailback Harry Gielden. A&M parlayed a stiff breeze and the passing and quarterbacking of lanky Don Burroughs for the victory. First by a conference team over Wyoming since Denver won, 13-0, on Thanksgiving Day, 1948.

The spirited Rams drove 72 yards for a touchdown in the first period. They added another in the third.

Except for the final period, the Cowboys showed little in the way of offense. Only twice in the first half did they pass midfield.

Powerful Illinois Clobbers Syracuse

SYRACUSE, N. Y.—(AP)—Powerful Illinois manhandled Syracuse Saturday, 41-20, for its third straight win in a manner calculated to impress all visiting Big 10 scouts.

Piling up a 41-7 lead in the first three periods, Illinois ran up an impressive total gain of 416 yards.

Johnny Karras, Illinois' hope for All-America honors, and Don Stevens, his halfback, running mate, teamed up on the Syracuse Orange. Karras bulldozed 76 yards in 15 carries for two touchdowns and also caught two of Don Engels' passes. Stevens smashed 100 yards in 13 trips, scoring once.

Washington Slashes Oregon Eleven, 63-6

PORTLAND, ORE.—(AP)—Washington's Huskies, burning from last week's upset at the hands of Southern California, slashed through Oregon Saturday, 63-6.

Fullback Hugh McElhenney led the rout, ripping off long runs until called to the bench early in the second half.

McElhenney went back thereafter only to kick the conversions, and he booted nine in a row.

Goode Sparks H-SU Cowboys To 39-14 Victory Over Tempe

TEMPE, ARIZ.—(AP)—Driving back after trailing shortly after the start of the third quarter, Harding-Simmons' Cowboys whipped Arizona State College at Tempe, 39-14, here Saturday night.

Danny Goode, senior left halfback, led the Cowboy stampede as he scored three touchdowns. Goode, Bill Davis and Jim Cox paced the powerful Cowboy running attack. Linebacker Gene Offield proved a tower of dynamic strength and on several occasions stopped the Tempe Sun Devils when they appeared to have drives underway.

Maryland Runs Wild Over Georgia, 43-7

ATHENS, GA.—(AP)—Maryland, tenth ranked team in American football, launched a campaign for higher recognition Saturday night by turning loose a split "T" attack with five great backs who ran completely away from a good Georgia team, 43-7.

The wreckage unbeaten Maryland caused was the worst for Georgia since 1944 when Georgia Tech scored 44 points. It made up for a 27-7 licking Maryland took on this same field in the first game of 1960, when Maryland was the pick to win.

Oklahoma Aggies Ring Up First Win

STILLWATER, OKLA.—(AP)—Thrice defeated Oklahoma A&M ran over helpless Wichita University Saturday, 43-0, for its first football victory of the season.

The Missouri Valley Conference contest was the first for the Aggies.

DIES AT GRID GAME

Abilene Rambles
Over Angelo, 33-7

ABILENE—The San Angelo Bob-
cats were no match for the power-
ful Abilene Eagles here Friday
night, losing 33-7 to the Pete Shot-
well Warbirds.

Joe Youngblood and Gene Boyd
sparked the Abilene offense. The
Eagles scored the first two times
they got the ball and coasted to the
win. James Eblin, San Angelo back,
suffered a broken leg.

Kermit Blanks Andrews, 19-0

By TANNER LAINE
Reporter-Telegram Staff

ANDREWS—Kermit's big Yellow Jackets capitalized on two fumbles by Andrews and tossed an aerial counter to manufacture three touchdowns and beat a full-of-fight Mustang eleven here Friday night, 19-0, on wind-swept Hamilton field.

It was the 8-AA opener for both clubs. And it was homecoming at Andrews' High, therefore the embattled Mustangs dug in and really fought it out with the heavier Jackets.

It was not until Kermit utilized Andrews' second costly fumble and scored a second TD in the third quarter that the spirit of the fired-up Mustangs was broken by the favored Winkler County boys.

A fourth quarter score by the visitors was just for insurance.

They battled to a scoreless stymie in the first quarter. Then one minute deep in the second quarter, Kermit tallied. The Yellow Jackets punted with the wind at the close of the first quarter and sent the ball booming to the Andrews five-yard line. It was returned to the 14-yard marker.

Gobbles Up Fumble
Then the teams traded sides of the field. After a yard gain at center, the eager Mustangs fumbled trying a pitchout. Big Jack Kroedel, Jacket end, gobbled up the ball on the Mustang seven-yard line. On

the first play, back Don Sandlin, a speedy lad indeed, took a hand-off, went to his left, cut sharply in between tackle and end of the Andrews' right side, and went over standing up. Back Bobby Almond booted the extra point for Kermit 7, Andrews 0.

And that's the way it was at the half.

Kermit was handed another golden opportunity early in the third quarter and cashed it for another tally. Backed up to their own one-yard line by a punt and then a penalty, the Mustangs tried to run it. K. D. Ives, 206-pound Kermit tackle, broke through and broke up the play and ended up with the pigskin for a TD behind the goal-line. Almond's kick for point was wide. Kermit 13, Andrews 0.

The Yellow Jackets drove 64 yards for their final score early in the fourth stanza. The TD came on a 20-yard pass from Almond to End Tom McKelvey. The Jacket terminal was all alone in the right flat zone when he fielded the ball and he raced over unmolested. Almond's placement was no good. Score: Kermit 19, Andrews 0.

TD Nullified

At that, Kermit had a touchdown nullified by a clipping penalty seconds later. Reserve Back Jim Schlosser intercepted an Andrews' pass at mid-field. Then, the fleet Sandlin took off along the east side-lines for 34 yards and across the goal-line going away. But the infraction on the play nullified the TD.

It was a rough ball game all the way and grew vicious in the fading minutes. A player from each club was ejected from the game. Kermit drew 125 yards in penalties. Andrews drew 41.

Sonny Earle, quarterback; a little 118-back called Huestis; and Dale Jobe, back, kept Andrews threatening to break loose at any moment. But the big break never came for the Mustangs, who were playing before their "Football Sweetheart," pretty Mary Beth Haight, who was crowned in pre-game ceremonies.

With Louis Eisenwe, Gutierrez' favorite passing target on the side-lines with an injured back, the amazing little passer only attempted one pass which he completed.

When the St. Louis Browns dumped the New York Yankees in both ends of a double header in Yankee Stadium recently it marked the first time the Browns turned the trick since Sept. 19, 1945.

Lamesa Tramples Mineral Wells, 27-6

LAMESA—Favored Lamesa came through Friday night bumping Mineral Wells 27-6 in a non-conference mele.

Jerry Millaps ran for two Lamesa TD's and passed for another. The first quarter was scoreless, then the Tornados blew hard. Mineral Wells scored on a pass in the fourth stanza.

Jimmy Robinson ran 45 yards for one Lamesa score and passed for another to End Ray Taylor.

Lamesa racked up 16 first downs, 13 for Mineral Wells. The Tornados got 275 yards on the ground and 113 yards in the air. Mineral Wells ground for 121 yards and amassed 153 by air.

Lubbock Pummels Amarillo, 47 To 6

AMARILLO—The strong Lubbock Westerners struck for two touchdowns in four minutes and demoralized the Amarillo Sandies 47-6 in a District 1-AAAA battle here Friday night.

Lubbock got 227 yards net on the ground. Seven Amarillo fumbles certainly hurt the Sandies. All were recovered by alert Westerners.

The U. S. Open golf championship has been played according to the same basic system since 1898, but the sectional qualifying rounds were added in 1924.

PENALTY COMING—This remarkable series of action photographs taken at the Yale-Bates football game shows a clipping infraction which caused Yale to be penalized and Bates' center and captain, George Brinkerhoff, to be hospitalized. Top picture shows Yale end Ed Woodsum applying the illegal block on Brinkerhoff, No. 51, as Yale's Ed Senay, No. 25, starts out on a long run. Second panel shows Brinkerhoff on one knee as Senay goes by. Woodsum is rolling off the defender's leg. Third panel has Senay being nailed from behind and Woodsum, No. 82, getting up. Brinkerhoff squirms in pain. Bottom p. o. shows the Bates captain grimacing and holding his injured leg as Woodsum starts to his aid. The play cost Eus 15 yards, but they won game, 48-0. (NBA).

ABILENE—The San Angelo Bobcats were no match for the powerful Abilene Eagles here Friday night, losing 33-7 to the Pete Shotwell Warbirds.

Joe Youngblood and Gene Boyd sparked the Abilene offense. The Eagles scored the first two times they got the ball and coasted to the win. James Eblin, San Angelo back, suffered a broken leg.

Broncs Toss Borger 53-13

By BOB ADAMS
Reporter-Telegram Staff

ODESSA—Borger's Bulldogs fell from the ranks of the undefeated with a thud that reverberated throughout the state Friday night as the top-ranking Odesa Bronchos took the first 1-AAAA conference game for both teams. The score was 53-13.

"How am I gonna write this for the fans back home?" worried a Borger sports writer, as it became apparent early in the game that the Bronchos would turn it into a rout.

"People in Borger actually thought we had a good chance to beat Odesa," he said.

Actually the Bulldogs were never in the game after sophomore Quarterback Carl Schlemeyer threw a beautiful 25-yard pass to End John Held for a touchdown with only three minutes gone on the clock. Robert Baker converted.

After that the Bulldogs, playing a sloppy brand of football, only contributed to an already potent Broncho offensive attack.

Other plays which figured in the scoring came when Borger Guard Bill Wiseman deflected a 14-yard Schlemeyer pass into the hands of Broncho End Weldon Holly for a TD. Odesa back Gene Babl intercepted another pass deflected by Borger's Chappy Spencer and ran 33 yards for the TD.

Broncho Back David Guber ran around left end on a pitchout 17 yards for a touchdown. Back Ward scooted through the center of the line for 31 yards and a TD.

The half ended, 33-0, Odesa.

Promptly taking up where they left off in the first half, the Odesans scored on a quarterback sneak by Quarterback Tommy Harris.

At this point Borger's sputtering offense struck twice against Odesa's substitutes to score 13 points. Borger's White intercepted a Broncho pass and ran it for a TD. Then Cleburne Bybee passed to end Chippy Spencer who lateraled to White. The latter covered the 46 yards for a touchdown.

Odesa's last touchdown came when Tyler ran 13 yards for a touchdown with 15 seconds remaining on the clock. The Broncho's Robert Baker converted 5 of 8 attempted conversions.

Basketball Gets Boost In Southwest

DALLAS — A major boost for southwest basketball is expected to come from the first annual pre-season Southwest Conference tournament to be held here Dec. 26, 27, 28 and 29.

This tournament of eight teams will be a feature of Cotton Bowl week.

Southwest Conference teams haven't been making much of a showing in inter-sectional basketball, especially early in the season. The reasons are the late start, due to the long football season, and the fact that the game isn't stressed in Texas as in other areas.

Founders of the pre-season tournament think great interest will be generated and also that it will develop stronger teams. Coaches say that a team from the Southwest playing in the east, mid-west or far west has a couple of strikes on it—travel and difference in officiat-

ing. One coach said a Texas team had to spot an eastern team about 10 points in playing on the eastern team's court.

The seven Southwest Conference members, plus Vanderbilt of the Southeastern Conference, make up the tournament this year. Vanderbilt defeated mighty Kentucky last season. Texas A&M, Texas and Texas Christian, which tied for the Southwest title, all will have veteran teams. Arkansas is expected to be quite strong and Baylor and Rice will be better. Southern Methodist does not look as good as last season.

The eight teams that play here will have their expenses paid and share in the net receipts. The tournament will be in the Fair Park gymnasium, which seats 5,000.

Big Lake Edges Crane, 7 To 6

BIG LAKE—The Reagan County Owls of Big Lake won their fifth victory of the season and their first conference counter here Friday night, edging the Crane Golden Cranes, 7-6.

Jackie Holmes' placekick for extra point proved the margin of victory. Crane scored first. In the third quarter, the Golden hords stalked to a tally. Malcolm Garrett, ace back, raced 90 yards for it. Ingram's extra-point kick was wide.

Big Lake tabbed in the fourth quarter. Short passes from Don Barber to Billy Cutbirth advanced the ball to the Crane 49 where Jerry Thompson went all the way. Downfield blocking by Eddie Compton and A. J. Vinson paved the way. Then came Holmes' important kick.

Monahans Trips Chiefs

MONAHANS—A strong wind and the Monahans Lobos dropped the Lake View Chiefs, 13-0, here Friday night.

The Lobos tallied in the first and second quarters and held off Lake View threats the rest of the night. Three fumbles recovered by Lake View kept Monahans on edge in the late stages.

Monahans drove 48 yards for its first TD. Successive runs by Wayne Rainey put the Lobos on the Chief seven-yard line. A line play netted three paces and Bill Shoemaker, 160-pound back, scooted over for a score.

Highlights of the game was a 99-yard dash for a touchdown by Monahans' Dennis Condon. He took off for a scrimmage play and rambled all the way. A Lake View drive had spluttered out on the Lobo one.

Lake View blocked a Monahans punt on the Lobo 11-yard line late in first half but couldn't score. Later in the game, the Chief twice recovered fumbles on the Lobos' 25-yard line and 20-yard line respectively, but still couldn't dent Monahans.

Monahans led in first downs, 16-4; in yards rushing, 230-110. The Lobos completed two passes of 18, while Lake View completed six of 18.

Unbeaten Elevens Dwindle To 60 In Schoolboy Ranks

By The Associated Press
The unbeaten rolls dwindled to some 60 teams in Texas schoolboy football Friday night as Odessa Lubbock and Lamar of Houston rolled with devastating fury over their foes in the super Class AAAA division.

Brownwood, Palestine, Temple and Longview, powers of Class AAA, crunched onward: Arlington, a standout of Class AAA, knocked Weatherford of Class AAA from the unbeaten ranks; and Wink indicated it was the ace of Class A as it swamped Marfa, 48-7.

In the feature games, Odessa slammed Berger, 53-13, and Lubbock whipped Amarillo, 47-6, in boisterous District I of Class AAAA; Baytown kicked Galena Park from the undefeated, untied list in Class AAA, 40-8; Lockhart and Bay City, unbeaten, untied teams of Class AA, played to a 14-14 deadlock, while Dallas, unbeaten but tied in Class AA, loked White Deer, unbeaten and untied Class A outfit, 39-14, and Farmerville, dropped Leonard, 33-12, and Hondo swarmed Pleasanton, 41-8, in battles between undefeated, untied teams in Class A.

Arlington's 7-4 victory over Weatherford was a major upset and branded Arlington as the team to beat in the AA ranks in the fight for the championship.

Lamar rolled over San Jacinto (Houston), 33-7, to continue as the power of the south in Class AAAA. Brownwood Unblemished.

Brownwood blasted Austin (El Paso), 55-14. Palestine remained unbeaten and untied with a 23-14 victory over Paschal (Fort Worth); Longview trimmed Tyler of Class AAAA, 14-0, and Temple blasted Arlington Heights (Fort Worth), 34-0.

Only seven unbeaten teams are left in Class AAAA—Pampa, Abilene, Lubbock, Ray (Corpus Christi), Lamar, Milby (Houston), which played Jeff Davis (Houston) Saturday night, and Odessa, which is undefeated but has been tied.

In Class AAA there are seven undefeated, untied teams left. They are Brownwood, Stephenville, Grand Prairie, Gladewater, Kingsville, Palestine and Longview.

Littlefield, one of the top rated teams of Class AA, was the victim of a major upset. Littlefield took a 26-24 defeat from Seminole. But Brownfield, which continues to look like a best bet for a high place in the championship race, swamped Rotan, 42-13.

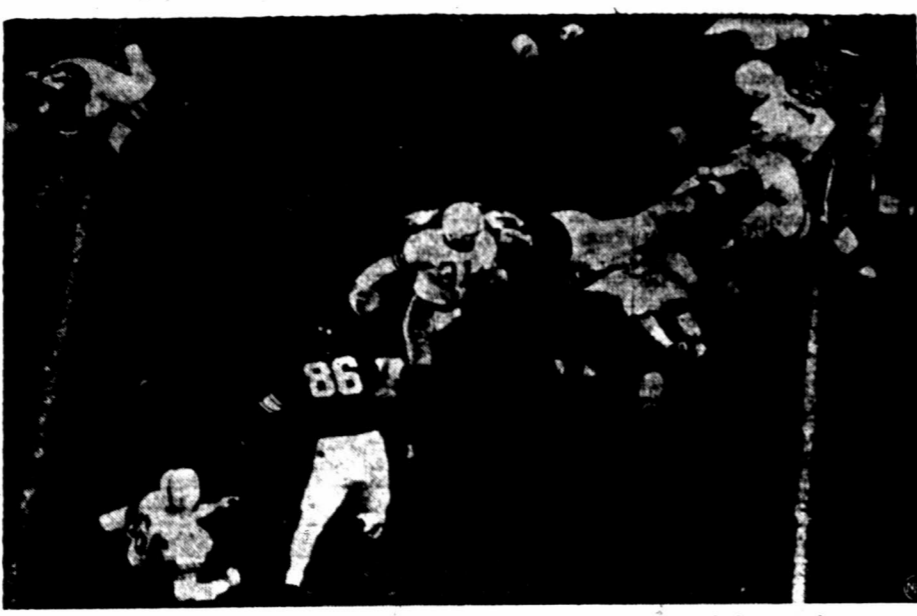

Texas Opens Cage Practice Monday

AUSTIN—A new head coach will manufacture basketball plays for the University of Texas as practice begins Monday.

The coach is Thurman B. (Blue) Hull, successor to Jack Gray. A former basketballer for the Longhorns, Hull will have seven lettermen to work with, three of them starters from last season.

George Scaling, a standout sophomore last year, Jim Dowles and Don Klein are the team's nucleus. Jimmy Wramonites, diminutive speedster from Las Cruces, N. M., and Ted Price from Cincinnati, Ohio, may round out the starting quintet.

Lettermen Leon Black, Dickie Harris and Cecil Morgan and sophomores Gib Ford and Billy Powell will be strong challengers for regular posts. Texas opens its season December 3 against Oklahoma at Norman, Okla.

BUCKEYE BEAUTIES—Ohio State's Vic Janowicz (31) gets off on one of his frequent long runs of this season. With Janowicz and 24 other lettermen returning, experienced personnel is plentiful in Columbus. The Buckeyes have the inside track on the Big 10 title (NEA).

Hurrah! Buffs Steers Down Once Mighty Sooners, 9-7

SEAGRAVES—The Stanton Buffaloes scored their first touchdowns of the season here Friday night, but dropped their first District 6-A encounter to the Seagraves Eagles, 26-12. The Buffs previously had dropped three and tied one in non-conference play.

The Seagraves team is coached by Leo Fields, who last year tutored the Stanton Buffs to a bi-district championship, winning 11 of 12 games. Coach Charles Read is his successor at Stanton.

In Friday's night's tilt, the Stanton squad started off the scoring midway in the first period after recovering a Seagraves fumble on the Eagles' 11-yard line. A jump-pass to Creech advanced the ball to the three, with Halfback Billy Rowden going over for the TD. Stanton had scored. The conversion attempt failed. The quarter ended 6-0, Stanton.

Early in the second period, the Eagles started flying, advancing the ball 66 yards to paydirt on less than a half-dozen plays. Hough, Roberts, Raper and Stafford carrying. Danny Raper went over for the initial Seagraves score. Gene Hough passed to Stafford for the extra point.

Later in the same period, Quarterback Hough went over from the one-yard marker for Seagraves second TD after a pass interception by the Eagles had placed the oval in scoring position. The conversion attempt failed. The half ended 13-6, Seagraves.

The Eagles increased their lead in the third quarter, Hough scoring on a 17-yard gallop. The kick for extra point was good, and Seagraves led 20-6 at the end of the period.

A 27-yard touchdown run by Paul Stafford, early in the fourth period, put the game on ice for Seagraves. The try for extra point failed, but the Eagles were out in front, 26-6.

Then the Buffs turned on the field, moving 70 yards down the field and scoring in the last 10 seconds of play. It was a passing combination, Hopkins to Davenport, Hopkins plunged over for the counter, but the conversion for extra point failed. The gun sounded the end of the fast and furious battle, with Seagraves on top, 26-12.

The Stanton Buffs showed considerable improvement in the encounter as they neared their last year championship stride. Standouts included Poik, John Cal Woody, Rowden, Overby, Davenport, Dave, Hopkins, Creech and Cross.

But the heavier and more experienced Seagraves line spelled out the difference.

HERE'S HOW—Bill Carey, left, of Michigan State, watches twin brother Bob pluck a pass out of the air in practice at East Lansing. The Careys are first string offensive ends for the Spartans. Bob's an All-America candidate. (NEA)

Iraan Pops McCamey

IRAAN—Flashing a sparkling running attack, the Iraan Braves hustled away from a heavier McCamey Badger team here Friday night to win a decisive 28 to 7 victory.

Spearheaded by Roy Robicheaux and Billy Pete Huddleston, the lighter Braves moved over what was expected to be one of their most formidable opponents.

A pair of blocked McCamey punts led to a safety for Iraan midway in the first quarter as they took a 2 to 0 lead. The Badgers had stalled an earlier Brave drive on their one-yard line after the Iraan team had tried to push the ball over on four downs.

Two 15-yard roughing penalties, a Belcher-to-Barbes pass and two runnings plays from scrimmage by Belcher, were enough for a Braves score in the first quarter.

McCamey used the same combination shortly before the half ended to score their first touchdown. A poor Iraan punt gave the Badgers the ball deep in Iraan's territory. A 15-yard penalty against the Braves set them back on their own 10-yard line where Billy Stokes passed to Mack Patterson for the McCamey score. The Braves led at half-time 9 to 7.

Huddleston and Robicheaux took turns advancing the ball for Iraan to start the second half before Robicheaux broke loose for a 45-yard touchdown gallop. The Iraan back added another six points when he swept 10 yards off left tackle to end an 80-yard Iraan drive.

Huddleston completed the Iraan scoring by shaking off two Badger tacklers to romp six yards around end for the score.

Wink 'Cats, Cream Of Class A Bump Marfa Shorthorns 48-7

WINK—Wink's Wildcats rolled to an easy 48 to 7 victory over Marfa here Friday night to remain one of the undefeated teams in the state.

Dan Villarreal tacked up six points in the scoring column for the Wildcats on the first play following the kickoff when he darted 66 yards for a touchdown. Dale Dodd added the second Wildcat touchdown, going over from the two; Rusty Wallace added the extra point.

Kenneth Vinson passed to Fuzz Herring on a play which covered 46 yards for the third marker and Wallace again converted.

Dodd intercepted a pass on the Marfa 32 and ran it back for a touchdown. On the attempted conversion, the pass from center was fumbled by Vinson so Wallace grabbed the ball and ran it over to put the Wildcats ahead 27 to 0 at the half.

Intercepted Pass
Wildcat end Paul Jette intercepted, another Marfa pass which he ran back 15 yards for a touchdown. Wallace converted.

Marfa scored its only touchdown in the fourth quarter when Abram Villarreal carried the ball over, following an 80-yard drive. Villarreal also added the conversion on a running play.

Wink's Dan Villarreal duplicated his earlier stunt following the kickoff by again sprinting 65 yards for a touchdown. Wallace converted.

Wink's last touchdown was set up when they received the ball on Marfa's seven-yard line after an exchange of fumbles.

Wink recovered a Marfa fumble on the Marfa 10. Vinson passed to Jette for 8 yards, when Wink fumbled on the two-yard line with Marfa recovering. Marfa fumbled on the next play and Wink pounced on it on the seven-yard line.

Tommy Dewitt, Wink halfback carried to the touchdown and Wallace converted to make the final score 48 to 7.

Sporstlane

With TANNER LAINE
Mugs, we mean faces, are an interesting study of football players. How does the dashing halfback's face look as he rips 49 yards for a touchdown? What shows on the map of the big end as he cuts down the blocking convey?

Here's a look at Gib Dawson's face as he runs for TU against all comers. Can't you just read his mind—'umm, gotta turn on the heat—big tackler coming up.' —SL—

Often you have heard somebody say—"they sure spend a lot of money on football up at Midland High."

Here's a little secret—they make some money, too.

A winning team and Tugboat Jones are putting the old folding kind in the bank for the school.

Football pays its way and more, too.

DIMag Again Says He Will Retire

NEW YORK —(AP)— The question of whether Joe DiMaggio, whose spectacular career with the New York Yankees began 15 years ago, is going to retire, apparently was settled Saturday—The Clipper has made up his mind to quit.

He declined to come right out and say he was finished, but he made it plain before heading for California Friday night that he was delaying the inevitable only in deference to the wishes of Yank President Dan Topping, with whom he talked two hours Friday.

"I have made up my mind to retire and that is my present intention," said the great outfielder. "I have given it considerable thought."

When DiMaggio entered Topping's office for the confab, he was ready to lay his cards on the table. Topping listened to the slugger and instead of just saying, "OK, Joe, it's up to you," asked him to delay the decision for a time.

"You might feel differently a month from now," Topping told DiMaggio. "Why don't you go on your trip to Japan (where DiMaggio and teammates Billy Martin and Ed Lopat, along with Lefty O'Doul, will entertain the troops) and give this matter a little more thought." DiMaggio agreed.

He pulled a "girl bullfighter" skit (taking off on the famous girl matador from Big Spring, who is at Texas Western). The old bull wouldn't cooperate and fight, so the kids poured a big container of Hadacol down him and brother, he revived. The gal whipped him, though.

It was real clever and the PA announcer ended by saying "if Hadacol has any representatives in the stands, let him make the check out to Andrews High."

ROUNDUP THE STRAYS... Dr. V. P. Neissl of Midland enjoyed the World Series and now is back to his practice... Vernon's El Rancho polo team meets a Juarez, Mexico, team Sunday in a tournament at Vernon billed as the Southwest Championship Polo Tournament... Teams are entered from Dallas and San Antonio... Oklahoma Saturday was the 219th out-of-state opponent to be played by Texas and the Longhorns had a 145 won, 64 lost, nine tied, record going in the conflict... We personally think, as do lots of others that Burns McKinney and his mates did a fine job of officiating in the college game here recently... Another Kell is getting a chance to become a major league baseball player and if he's half as good as his brother, he will... The Phillies are bringing up Everett Kell, brother of the famous Goerge... Coach Pat Patterson of the MHS staff recently gave a unique present to Coach Bob's son—it was a little musical football which plays, "On You, Bulldogs"... Tugboat sat in the stands the other night at the college game and relaxed... We tried to get him to join us in the press-box, but he said "Oh no, you guys would have me on the spot before two minutes"... He's a grand guy, one of the best and all Midland loves him... Midland looked like a deserted village Saturday and we didn't realize that many people had tickets to the Texas-Oklahoma game, and Tech-TCU fracas at Lubbock... One anxious voice on the telephone Friday asked: "Have you any tickets to the Texas game advertised for sale?... We had to tell him that like good apartments, they don't have to advertise... Who is it always saying "if you like good sports, be one?... He's right... 30 for strays."

BOWLING

Results last week in the Petroleum Bowling League: Seaboard over West Texas 3-0; Honoluh Oil over Plymouth 3-0; American Trading over Tex-Harvey 3-0; State Exploration over Standard of Texas 2-1; Stuart Photo Print over Tide Water 2-1; Muldrow Reproduction over Ohio Oil 2-1; Shell Oil over Union Oil 2-1; Ralph Lowe team over West End Magnolia 2-1; Superior Oil over Core Lab 2-1; Phillips 66 over Rotary Engineers 2-1.

High team series was rolled by Seaboard with 2,550. High team game went to Seaboard with 879. Joe Williams had high individual series with 562 and K. Jastrow took high individual game with 213.

Three members of Michigan State's 1950 football team are now officers on active duty in the Army. They are halfback Sonny Grandelius, guard John Yocca and safety man Jesse Thomas.

Oklahoma Comes Back

Then in the second period occurred an amazing Oklahoma recovery. The Sooners hadn't netted a single yard in the first period and appeared to be getting nowhere when Bob Raley intercepted a Crowder pass on the Oklahoma 49, and, with Jones running and passing, pushed to the Sooner four. But Jim Weatherall and Ed Rowland tossed the Texas ball-carriers for repeated losses and Oklahoma took over on its six. With Buck McPhail, Dick Hearty, Billy Vesels and Crowder battering the line and sweeping the ends, the Sooners rushed to a touchdown. Crowder made it with a two-yard sneak over guard. Weatherall kicked the extra point.

Marsden Winner Of Senior Crown

SAN ANTONIO — (AP)— John Marsden of Dallas won the senior championship of the Texas Golf Association Saturday, beating Col. W. R. Stickman of San Antonio, 1-up.

Stickman turned the out-going nine, 2-up, but Marsden evened it two holes later. He went 1-up for good on No. 17 when Stickman three-putted. They parred No. 18 with one-putters.

Marsden shot a 73, one over par on the 6,483-yard San Antonio Country Club course. Stickman had a 75.

NORTH WINS

North beat Terminal, 40-27, Friday in the only game scheduled for girl kickball teams of the elementary school league. Officials for the game were Colma Jackson, Joan Tovey and Barbara Timmons.

WILSON'S

TENTATIVE TIGERS—Defending champion of the Big Three and Ivy League, Princeton hopes to repeat last year's undefeated season with this probable starting lineup. Left to right in the line are Len Lyons, RE; Bill Ellis, RT; Capt. Dave Hickock, RG; Ed McClain, C; James Ota, Jr., LG; Bob Cowen, LT; John Emery, LE. Backs are George Stevens, Dick Kazmaier, Dick Pivrotto and Russ McNeil. Charlie Caldwell, inset, was 1950's Coach-of-the-Year. (NEA)

Michigan Staters Overcome Deficit To Whip Marquette

EAST LANSING, MICH.—(AP)—Michigan State's "pony" back field pulled one out of the fire Saturday by scoring two touchdowns in the final quarter to quell upset-hungry Marquette, 20-14.

The speedy young sophomores and freshmen did all the scoring after Marquette took a 14-6 half-time lead over surprised Michigan State.

Quarterback Jim Leahy made both Marquette touchdowns with passes to End Jim Tobias in the end zone. And for a while it looked as if Michigan State, No. 1 team in the Associated Press poll, was in for a beating.

Billy Wells, a sophomore back, ran 89 yards through the Marquette defense for Michigan State's only touchdown in the first half.

State started its victory drive from its own 14 early in the final quarter. Leroy Bolden, a freshman, contributed a 34-yard run for the longest yardage as MSC worked down to the Marquette 40.

Quarterback Al Dorow threw a long pass to wells on the Marquette 24, and he spotted over.

A 50-yard pass from Dorow to End Paul Dekker set up the winning tally with less than eight minutes left. Bolden went over from the Marquette 13.

Duke Rallies Late To Down NC State

DURHAM, N. C.—(AP)—A fumbling Duke football team struck for two quick last-period touchdowns Saturday to overcome a 21-13 deficit and snatch a free-scoring 27-21 Southern Conference thriller from North Carolina State.

Duke roared over for two first-period touchdowns and it appeared the Blue Devils would turn the game into a rout.

However, State's Wolfpack came back to score twice and hold a 14-13 halftime lead.

VOLS SPANK CHATTANOOGA

KNOXVILLE, TENN.—(AP)—Hal Ledyard, a passer with the marksmanship of a frontiersman, gave Tennessee a real scare Saturday, but the Volunteers had too many weapons and defeated Chattanooga, 42 to 13.

SMU's Aerial Circus Upsets Irish, 27-20

SOUTH BEND, IND.—(AP)—Fred Benners, a human windmill hit on 22 passes in 44 attempts for 336 yards and four touchdowns Saturday to pilot Southern Methodist to victory over bewildered Notre Dame, 27-20.

The six foot, three-inch senior shattered all of his own aerial records in unharnessing the most furious passing game ever fired at a Notre Dame team.

Bears Edge Cougars In Scoring Bee

PULLMAN, WASH.—(AP)—Checked through a wild first half by Washington State, Johnny Olszewski and the California Bears cracked through for 21 third-period points Saturday and hung on grimly for a 42-35 Pacific Coast Conference football victory.

A lot of the gilt had been rubbed off the Golden Bear—ranked second in the nation—when it came back to start the second half all even with the Cougars at 21 to 21.

Olszewski romped 80 yards to the tie-breaking touchdown on the second play of the half.

The Bears chopped out two more touchdowns. Olszewski ripped off 28 yards and then Harry West broke into the clear and added 46 more to make it a two-play goal.

One other 28-yard scamper by Cal's hard-to-handle fullback featured a 56-yard drive to another—and the last—California touchdown. With a lead of 42-21, it looked like all the golden color had been restored but the Cougars chewed out 67 yards in 18 plays and the count was 42-28. On they came again.

Grid Star's Dad Dies Before Game

DALLAS — (AP) — Gilbert H. Dawson, 55, of Douglas, Ark., who came to see his son, Texas Halfback Gib Dawson, play against Oklahoma Saturday, died less than three hours before game time of a heart ailment.

Dartmouth Blasts Feeble Army, 28-14

WEST POINT — (AP) — The full extent of the disaster which struck Army's football forces two months ago became evident Saturday when the Dartmouth Indians, previously humbled by Fordham and Penn., vanquished the immature Cadets, 28 to 14.

Princeton Makes It 16 Straight In Win Over Pennsylvania

PHILADELPHIA — (AP) — Princeton punched over two second period touchdowns on Dick Kazmaier's passing and then stove off a rally Saturday to squeeze past Pennsylvania, 13-7, and extend football's longest current winning streak to 16 games.

Michigan Crushes Hoosiers, 33 To 14

ANN ARBOR, MICH.—(AP)—Michigan's Big 10 champions made a sparkling league debut Saturday by smashing a penalty-ridden Indiana team, 33 to 14.

Morey, Maxwell Beaten

FORT SMITH, ARK.—(AP)—George Bigham, a 23-year-old Oklahoma A&M College student, upset National Champion Billy Maxwell and Medalist Dale Morey in successive rounds Saturday to advance to the finals of the Willard Memorial Golf Tournament.

Missouri Halfback Hurt In Colorado Tilt

BOULDER, COLO.—(AP)—Bobbie Harris, 20, Missouri University halfback from Lockwood, Mo., suffered what his doctor called a severe brain concussion in Saturday's Missouri-Colorado football game.

Zaharias, Romack Gain Open Finals; Bauers Eliminated

FORT WORTH — (AP)—Mrs. Mildred Zaharias nipped Barbara Romack of Sacramento, Cal., 1-up, Saturday to gain the championship round of the Women's Texas Open against Defending Champion Beverly Hanson of Indio, Cal.

Miss Hanson scored a 2-up victory over pro Marilyn Smith of Wichita, Kan.

Sunday's 36-hole title struggle will be the second meeting between the long-hitting Babe and the mathematical Californian. Mrs. Zaharias was the winner in the first match in 1948.

Friday, the Babe played one under par and closed out her match with Alice Bauer of Midland on the 14th hole for a 5 and 4 decision.

Miss Romack beat Marlene Bauer, one-up, Friday.

Tulane Wave Sinks Eastern Crusaders

NEW ORLEANS — (AP)—Tulane absorbed all the offense vaunted Holy Cross could dish out and struck back with sophomore Quarterback Pete Clement's passing for a 20-14 victory over the Eastern Crusaders here Saturday.

Clement passed for two touchdowns and set up a third after Holy Cross lost its punch in the second quarter.

Holy Cross' Coach, Dr. Eddie Anderson cost his team a touchdown when he walked onto the field to protest a 15-yard roughing penalty that had put the ball on the Holy Cross 13. His action drew a 12-yard penalty to the Holy Cross one for unsportsmanlike conduct.

Right Half Roy Bailey of Richmond, Va., bucked it over and Tommy Co-maux failed to convert.

That was the touchdown that put Tulane ahead 13-12. Holy Cross got both of its touchdowns off Tulane fumbles, while Tulane drove 90, 80 and 56 yards. The winning touchdown came in the third quarter on a 10-yard pass from Clement to End W. C. McEhannon.

Two Gridders, School Principal Among Five Injured In Collision

KILGORE — (AP)—Five persons, including the principal and two football players of the DeKalb High School, were injured in a three-car collision near here late Friday night.

Marvin Payne, 48, DeKalb principal, was injured seriously in the crash, which occurred 18 miles south of here, near Turnertown, as he and the two players were returning home from the DeKalb-Jacksonville football game at Jacksonville.

Others injured were Lee Murgill, 18, and Joe Bob Davis, 18, both DeKalb football players; G. Gilbert Dukes, 2, Carlisle, and Joyce Annette Miller, 15, Henderson.

Unbeaten Tech Rocks LSU, 25-7

ATLANTA — (AP)—Ignited by their sensational sophomores, unbeaten Georgia Tech scored on the ground, in the air, by safety, field goal and extra point Saturday to shove Louisiana State from the unbeaten ranks, 25 to 7.

Ranked eighth nationally by The Associated Press, Tech kept its record spotless and was convincingly superior. Sophomore running ace Leon Hardeman and Glenn Turner combined with seniors Darrell Crawford and George Maloof to raise the Yellow Jackets' power to the season's peak.

Hardeman scored the first two touchdowns—one a spectacular 25-yard dash, besides converting twice. The bull-like Turner provided most of the momentum between scores. The only LSU score followed a first-quarter fumble.

Using a new-type rubber ball for the first time in a major college game seemed to improve Quarterback Crawford's passing. His throws accounted for one touchdown and set up two others and the field goal.

Vanderbilt Upsets Favored Mississippi

MEMPHIS — (AP)—All-America Candidate Bill Wade's fabulous passing pulled Vanderbilt from behind in the last quarter here Saturday to give the Commodores a 34-20 victory over Mississippi in a thrilling Southeastern Conference game.

The Commodores scored 27 points in the final period to surpass their opponent's 20-7 lead that looked for all the world like a favored Mississippi win.

Wade completed 17 of 32 passes. He threw one touchdown aerial and ran for another score. Halfback Dick Foster teamed with Wade for offensive honors, scoring two touchdowns.

THESE CROSSES FELL TO "HEARTLESS ECONOMY"—Protests sounded from Hawaii to Washington over the "heartless economy" that caused the Army to remove these white wooden crosses from graves of 13,000 American war dead in Hawaii's National Memorial Cemetery and replace them with flat stone markers.

Tarheels Smash South Carolina

CHAPEL HILL, N. C. — (AP) — North Carolina's football Tarheels, searching two years for an explosive halfback, came up with two Saturday to blast South Carolina, 21-6, and gain their second straight Southern Conference victory.

Columbia's Victory Sets Off Fire Alarm

NEW YORK — (AP) — Columbia's football Lions beat Yale Saturday, 14 to 0. The victory brought four fire engines, three hook and ladder trucks and three radio cars speeding to Baker Field.

CATS CLAW MINNESOTA

MINNEAPOLIS — (AP) — Chuck Hren, elusive, hard-plunging fullback, was the big gun of the Northwestern attack Saturday as the Wildcats handed Minnesota, his home-state team, a 21 to 7 lacing.

STOCKTON CLUBBER WINS

KANSAS CITY — (AP) — Patay Posey of Fort Stockton, Texas, won first Saturday in the 4-H Club heavy Hereford class of the American Royal Livestock and Horse Show.

Advice To Men: Come Home Early Or Not At All

LOS ANGELES — (AP) — A 23-year-old bride shot her husband in the leg early Saturday because, she told officers, he came home late from his job on the night shift.

Police booked Mrs. Kathleen Goodwill on suspicion of assault with intent to commit murder and quoted her as explaining:

"He came in with a smile on his face and said, 'Hi, Honey.' I didn't really mean to shoot... my finger just seemed to tighten on the trigger."

She said her husband, Jeffrey Goodwill, 24-year-old aircraft worker and amateur anthropologist, had been coming home late every night for the last week. "The later he was, the madder I got," she said.

ADMITTED TO HOSPITAL

Bobby Opodwin of Rankin was admitted to Midland Memorial Hospital Saturday as a medical patient.

Skeleton Found At Dallas May Be That Of Phoenix Woman

DALLAS — (AP) — A skeleton found Thursday near Dallas may be that of Mrs. Alice Kirkpatrick, 70, who left her home at Phoenix, July 4, Sheriff Bill Decker said Saturday.

Decker declined to say that there was more than "a chance" that the skeleton was that of Mrs. Kirkpatrick. The sheriff received a letter Saturday from Mrs. Maud Krouskop of Phoenix, saying she had put the woman on a bus bound for Trion, Ga.

The letter quoted the bus company as saying Mrs. Kirkpatrick's ticket was used only as far as Dallas. A niece, Mrs. L. C. Treadway of Trion, said her aunt never arrived there.

MEDICAL PATIENT

J. C. Roberts, 211 West California Street, was admitted to Western Clinic-Hospital Friday as a medical patient.

ANTI-COMMIE COPS—Making their first public appearance, members of the new West Berlin "alert police" march as smartly as West Pointers as they enter the Olympic Stadium in Berlin's British Sector.

Organized to quell future Communist riots, the carbine-armed force will be expanded to about 3,000 men by year's end. (Photo by NEA-Acme Staff Photographer Werner Kreisbach.)

5,000 GI's To Take Part In 'Exercise Desert Rock' A-Tests

LAS VEGAS, NEV. — (AP) — Five thousand GI's who may have wondered what it's like to be on a real hot spot should get more than a rough idea in the first atomic testing exercise this week.

"Exercise Desert Rock," the joint Atomic Energy Commission and Army show, is designed to prove the battlefield value of America's new weapons. The series of brilliant blasts also may throw light on two vital questions:

- 1. Is the military getting ready to take over atomic control? 2. Are the new weapons adaptable for use in Korea, if necessary?

With AEC and armed forces brass converging on the Nevada test site, about 75 miles northwest of Las Vegas, all signs point to either Monday or Tuesday as the opening day for tests.

On display will be "the great new tactical weapons" mentioned by AEC Chairman Gordon Dean recently just before he quickly inspected the test site.

Two-Point Speculation

Upon his return to Washington, Dean conferred with Secretary of Defense Robert Lovett, and speculation arose on two points: (1) That the tests may be the first step in turning A-weapon custody over to the military; and (2) that the tests, if successful, might be a potent persuader to the Communists to make peace in Korea.

The maneuvers primarily will involve an Army combat battalion of 1,000 men who will establish a battle position, dig trenches and foxholes and string barbed wire before each explosion. They will move to safe positions as the explosion comes, the Army says, turn away from the point of burst and wait three seconds before looking toward the fireball.

After detonation, the combat team, preceded by trained monitors with heat recorders and Geiger counters, is slated to move up to "the front." The Army has announced for the benefit of relatives, that soldiers will not be permitted to enter any area where they might be endangered by residual radiation.

There is no definite indication of how many tests the troops will undergo. The AEC merely has acknowledged that another series of blasts is coming up—perhaps as many and over as long a period as last winter's "Operation Ranger."

CUT BY GLASS

Jesse Moreno, 608 North Terrell Street, a lumber yard employe, suffered a lacerated hand Friday when a piece of glass that he was cutting slipped. He was treated at Western Clinic-Hospital.

UNDERGOES TONSILLECTOMY

Sandra Barnett, four-year-old daughter of Mr. and Mrs. F. J. Barnett of Terminal, is a patient in Midland Memorial Hospital after undergoing a tonsillectomy.

Congress—

(Continued From Page One) sion of the 82nd Congress, starting in January.

Among such bills may be one to raise the pay of every member of the military service by 10 per cent.

A House Armed Services subcommittee approved the measure last week. Only two members were present, but there was no indication of any opposition at this stage.

Described as a "cost of living" measure, the bill was requested by the Defense Department. It is unlikely Congress will act on it before the Fall adjournment.

The status of major legislation at the end of the week:

Taxes: The House has passed a bill raising taxes by \$7,200,000,000. The Senate cut this down to \$5,500,000,000. Conferees have agreed on \$5,750,000,000.

Appropriations: All the regular departmental budget bills have passed both branches.

Pay: The Senate and the House have passed separate bills giving Civil Service workers, postal employes and postmasters pay raises effective last July 1. The bills are in conference.

Foreign aid: Both branches have authorized a program of military and economic aid to non-Communist nations. A separate bill financing the program has cleared the House.

Draft Law Changes

Draft: A law has been enacted extending the draft act until July 1, 1955; lowering the induction age to 18 1/2 years; extending the period of service to 24 months, and laying the groundwork for universal military training.

Reciprocal trade: A bill extending the trade agreements program two years from June 12, with some restrictions, has become law.

Defense housing: Congress has enacted a law boosting government mortgage insurance authority as an incentive to home building. The measure also relaxes residential credit terms on houses costing \$12,000 or less.

Controls: The 1950 Defense Production Act has been extended another year but without all the powers President Truman said he needed to control wages and prices and limit inflation.

World War II Ace Pappy Boyington Jailed As Drunk

LOS ANGELES — (AP) — Gregory (Pappy) Boyington, Marine Corps ace hero of World War II, was jailed on a felony drunk charge Saturday following an altercation with two deputy sheriffs.

The officers said they spotted Boyington's auto weaving along the street and halted it to the curb. The former ace became abusive and flunked a sobriety test, they reported.

Boyington, 38, gave his occupation as special representative for a beer concern.

Bang-Up Climax Is Decided By Officer

SANTIAGO, CHILE — (AP) — Miffed at the constant interference of his sweetheart's mother with his courting, a 26-year-old army officer decided on a bang-up climax.

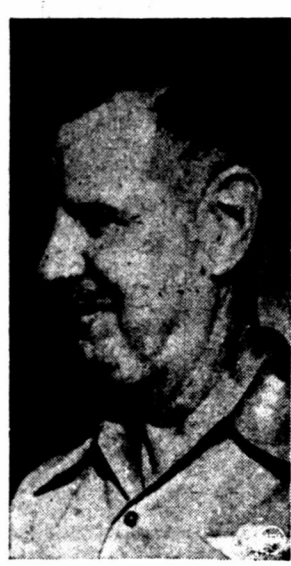

To cinch his efforts to win daughter's hand, he let go with a hand grenade recently in the dead of night. The resultant clatter woke up the whole town of La Cruz. They had visions of a military uprising at the nearby military garrison of Quillota.

No marked change in the attitude of Senora Morales was reported.

Fense of Western Europe

Defense housing: Congress has enacted a law boosting government mortgage insurance authority as an incentive to home building. The measure also relaxes residential credit terms on houses costing \$12,000 or less.

Controls: The 1950 Defense Production Act has been extended another year but without all the powers President Truman said he needed to control wages and prices and limit inflation.

TO RETIRE—Lt.-Gen. George E. Stratemeyer, above, former commander of the Far East Air Forces, will return to the United States soon to retire. Stratemeyer, 60, who suffered a heart attack last May, will recuperate at Winter Park, Fla. He has been in service 36 years.

Fair, Mild Weather Covers Entire State

By The Associated Press Saturday was a nice day in Texas. No rain fell on football games or weekend picnics. Temperatures ranged in the 70's and 80's.

Presidio was the hottest place in the state. It got up to 94 there. The coolest afternoon temperature was 78 at Houston, Beaumont, Galveston, Palestine and Dalhart.

Continued mild weather was forecast for Sunday, with slightly cooler temperatures in the Panhandle.

Read The Classifieds.

Negotiations-Trumanites—

(Continued From Page One) such protests with violently-worded formal complaints from the top Chinese Red and North Korean commanders.

The fact that they had not done so in this instance and that they still were going along with liaison talks, bolstered speculation that the Communists actually want to resume truce negotiations.

Communist correspondents at Panmunjom contented themselves with tear-jerking accounts of the incident, but said the Reds "reserved the right to make further demands." They also repeated the standard Communist charges that the Allies were "insincere" in the effort to arrange an armistice.

Up to the time of the strafing complaint, the UN and Red officers apparently were separated on only one point—whether to establish a 3,000-yard "security area" around Kaesong. They had agreed on a 1,000-yard area around the conference tent at Panmunjom, six miles southeast of Kaesong, and on a 3,000-yard area around the Allied camp at Munsan, 13 miles farther southeast.

Egypt—

(Continued From Page One) it clear that I received these proposals according to diplomatic custom and that the fact of receiving them meant nothing more."

In addition to the proposals by the four powers, Britain alone sought a settlement of Egypt's demands for placing the cotton-growing Sudan, a region of 8,000,000 population, under Farouk's crown. The defense move was a tactic admission by Britain she no longer can carry on single-handedly as the traditional guardian of the Middle East.

It also recognized that the Middle East itself must be given a voice in planning the defense of this strategic crossroads of the world.

(Continued From Page One) ing to control precinct, county and state conventions in 1952. They passed a resolution urging the national committee to write a rule requiring all delegates to the national convention to pledge themselves to support the convention's nominee for president and vice president.

Another resolution bucked Governor Shivers' proposal that Texas send an uninstrusted Democratic delegation to Chicago. It recommended that the Texas delegation be instructed to vote for the May, 1952, state convention's choices for president and vice president.

Ball NAMED Chairman The Volunteers named Walter G. Hall, Dickinson banker and former State Executive Committee member, chairman of its permanent organization. He accepted in a fighting speech rapping Shivers' leadership on state issues.

Other resolutions commended the Truman Administration, condemned the "so-called Mundt-Dickelrath plan as contrary to the spirit of party government" and condemned "character assassins in the form of McCarthyism as a trend in our political life."

Brannan also directly referred to Senator McCarthy, saying "His own folks will take care of him," and predicting McCarthy was on the way out.

Also missing at the breakfast were most members of the State Democratic Executive Committee, which is dominated by friends of Shivers.

VISITING IN MIDLAND

G. L. Allen and family of Reseda, Calif., are visiting in Midland in the home of Mr. and Mrs. Bill Allen, 3326 Mariana Street. C. L. and Bill Allen are brothers.

Despite the old theory about the "busy bee," wasps are said to be far more intelligent and active than bees.

WHAT'S THE MOST VITAL THING ADVERTISING DOES FOR YOU?

- * BRINGS INFORMATION TO MAKE SHOPPING EASY. * GIVES YOU BETTER GOODS FOR LESS MONEY. * RAISES STANDARD OF LIVING. * MAKES JOBS MORE SECURE. * ENTERTAINS AND AMUSES.

This Case History Shows How Advertising Gives You Greater Personal Security

TAKE this actual case of a brand of soap. A big company had developed a better, faster-acting soap powder that washes dishes faster, makes clothes whiter with less work.

Nobody Lost For the amazing fact is—this new brand of soap didn't take money from other soap companies. The product and its advertising increased the total consumption of soap. So there was more business, better business—more and better jobs.

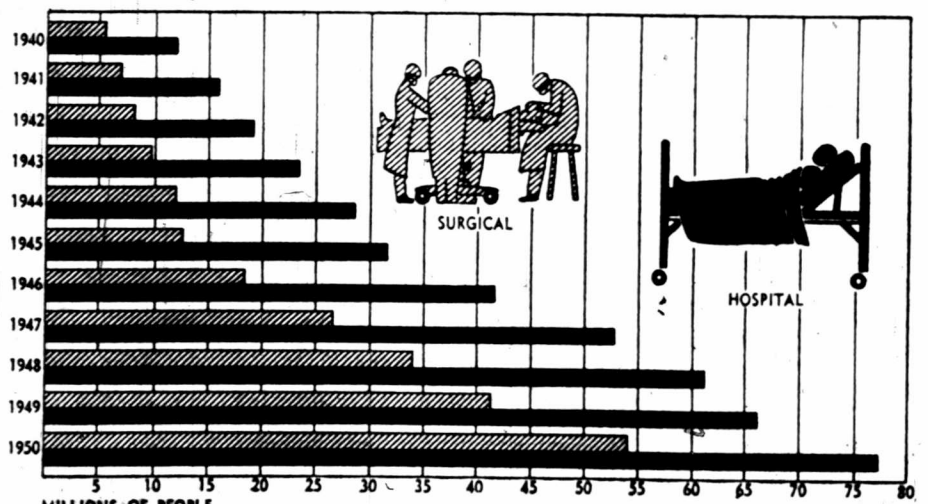

Today they sell millions of dollars of this soap powder per year—making hundreds of new jobs in a huge factory, hundreds of jobs with firms who supply the raw materials, more and better jobs in stores that handle that soap—and in banks, railroads, truck lines, insurance companies, all of whom have more work to do—and more money coming in—because of this added soap business.

You're More Secure Apply this very prosaic soap story to the more glamorous fields of automobiles, refrigerators, clothing, furniture—everything you buy. You'll see plainly how advertising acts as the spark plug of business. You'll see how advertising—today and tomorrow—is creating opportunity for you, and making your present job more secure.

What Others Say:

- LABORER—There are no layoffs when things are busy. A rush means overtime for me. So when advertising sells goods for my firm, I get more in my pay envelope. EXPRESSMAN—My job depends on goods being shipped. And the main reason goods are shipped is because they are sold. So by selling goods, advertising helps me be sure of steady work. HOUSEWIFE—It's a perfect circle. When advertising makes us women go to the store to buy, we stimulate business. And it's when business is good that our husbands are secure in their jobs. So let's be grateful for advertising. SAILOR—A ship's business is to transport goods. Always there has to be a buyer—or we tie up. So advertising to sell goods is important in giving sailors steady work and a chance to get ahead.

Advertising... BY SELLING MORE GOODS TO MORE PEOPLE Makes your job more secure

PRIVATE HEALTH INSURANCE BOOMS—While public health insurance plans meet stiff opposition, Americans are flocking to private organizations for voluntary health insurance protection. The Newschart above shows how hospitalization coverage has spread to \$5,000,000 more people since 1940, with a corresponding rise in surgical insurance coverage. The tremendous rise reflects growing anxiety on the part of Americans for protection against economic hazards of sickness and accidents. Data were gathered by the Health Insurance Council.

Chill Wills

Cavalcade Of Screen Stars To Play In Midland Tuesday

A cavalcade of movie stars will be in Midland Tuesday afternoon for a 30-minute downtown show. Heading the group will be Chill Wills and John Barrymore Jr.

Stalin Agreement To Talk Seen If Churchill Victor

MOSCOW — Western observers here believe that if Winston Churchill wins control of the British government in the October 25 elections, Prime Minister Stalin will agree to a Big Three meeting with him and President Truman.

Five pretty starlets with the group are Joan Taylor, Laura Elliott, Virginia Hall and Mary Murphy. Also made actor, Peter Hanson, is also as we used to have when we were allied in the war could not do any harm and might conceivably lift a load of anxiety from the shoulders of our children.

The British Conservative leader is reported here to have made this statement in reply to a question from the audience as to whether he would call a three-power conference with Prime Minister Stalin.

The Soviet press has not as yet referred to this suggestion, but westerners believe such an invitation from Churchill would be accepted.

Sells every Thursday. Begins at noon. 1211 W. 50th, MIDLAND, TEXAS.

Reds Hope To Keep Iran Oil From West Europe, Is Belief

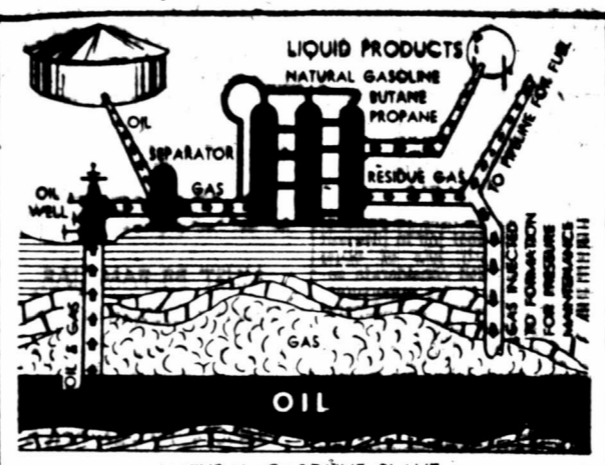

WASHINGTON — (AP) — Russia probably is more interested in keeping Iran's oil from Western Europe than in getting much of it into Russia.

That's the view here. The basis for it is the physical difficulty of moving oil from Iran to Russia. "The Russians probably are not as interested in buying any large quantities of Iranian oil as they are in keeping the crude from some other countries," one official said Saturday.

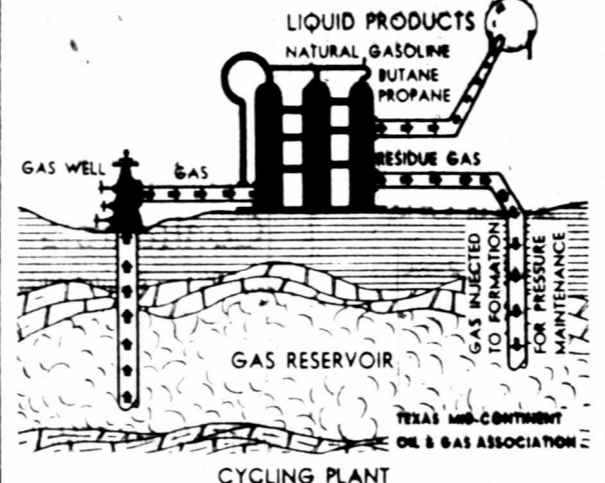

Movement of crude oil in large quantities requires pipe lines or tankers. Theoretically, Russia could build a pipeline through the mountains and over rugged terrain to Iran. But oil men say this would be a tremendous undertaking—one that would take two or three years even if Russia had the steel.

The belief is that Russia doesn't have enough tankers to move any great quantity of oil. One official said Russia has nothing to approach the fleet of 300 tankers which the Anglo-Iranian Oil Company pulled out of Iranian waters when it was forced by the Iranian government to give up the big Abadan Refinery.

Transportation by motor truck or aircraft would be slow and expensive.

NATURAL GASOLINE PLANT

CYCLING PLANT

ALIKE BUT DIFFERENT—Both of these plants are dedicated to conserving Texas natural gas resources. Two hundred and fifteen such plants processed more than three trillion cubic feet of gas in 1950, recovering more than 18,000,000 gallons of liquid fuels daily. Natural gasoline plants (top) operate in fields producing oil and gas; cycling plants (bottom) operate in gas, or distillate, producing areas.

So-Called 'Fantastic' Weapons Far From Reality, It Appears

By ELTON C. FAY
WASHINGTON — (AP) — What are fantastic weapons and does the United States have some?

Out of what has been said publicly and otherwise it may be concluded that:

1. The U. S. apparently has ready for battle variations of the standard atomic bomb in which either the explosion or the effect can be controlled so they can be dropped on enemy troops at a battlefield without endangering American forces or equipment.

2. It has in development other atomic weapons including projectiles fired by a form of artillery or as guided rockets. But it does not have them now in a form free of all the "bugs" a new weapon possesses. Thus they are not ready for mass production or battlefield use.

3. More than six years of work on drawing boards, in laboratories and on proving grounds have brought some basic types of guided missiles along to the point where they either are in actual production or will be in a matter of months. These are medium-range missiles for use against enemy ground, sea or air forces.

Unorthodox Better Word
Are these weapons "fantastic"? Military scientists don't include that word in their working vocabulary. To them, a weapon is unconventional or unorthodox if it does not fall in the category of standard explosive or incendiary bombs, aimed rockets, artillery, aircraft or similar weapons generally used in World War II.

President Truman said at San Francisco last month: "It is fantastic what can happen with the rise of the weapons that

Special Iron Lung Ripped For Airplane

HONOLULU — (AP) — An iron lung is being adapted to operate off airplane batteries to the polio-stricken wife of a Marine sergeant can be flown to her Fresno, Calif., home. American Royal Show Opens In Wake Of Ruinous Flood

KANSAS CITY — (AP) — The American Royal Livestock and Horse Show—the nation's second largest—opened Saturday, living up to the tradition "the show must go on."

Just three months ago Saturday the Royal just about lost its home in the devastating flood that inundated more than 10 square miles of the Kansas City area.

But Saturday, the Royal with its \$125,000 in prizes for farmers, stockmen and horsemen, was back at its old stand for the fifty-third presentation. Last July 13, 20 feet of water rolled through the rambling American Royal Building. Ramps were washed away, debris and muck covered the cattle pens, the horse stalls and the exhibition area. Some pens were washed away.

Announcement Comes
Skeptics said the 1951 Royal would have to be held in circus tents, if at all. In the first weeks after the flood, Kansas City forgot about the Royal in the gigantic clean-up task. Then came the announcement from President Harry S. Truman, Kansas City, Kan., industrialist, that the Royal would go on.

Crews worked night and day to clear away the debris, rebuild the lower floor and paint the structure on the inside in the traditional gold and blue.

Officials of the Royal said Saturday it is on the way to the biggest ever.

For the next seven days, activities will be centered in the Royal building, a million-dollar barnyard with hundreds of prize cattle, sheep, hogs and horses, all ready for the judging ring or the tan bark arena.

VFW Encampment Is Underway Here

The Fall Encampment of District 23 of the Veterans of Foreign Wars and the VFW auxiliary got under way here Saturday with the arrival of delegates from the 19 posts throughout the district.

Registration Began
Although only a few signed the register at the hall of Midland Post No. 4048 at Terminal Saturday, Midland VFW members said the majority were to arrive Sunday.

A dance was held Saturday night in the Midland hall, situated on Highway 80 between Midland and Odessa.

Johnny U. Foster, state senior vice-commander of the VFW from Lubbock is scheduled to address the delegates Sunday while L. E. Bender of Odessa, newly elected commander of District 23, will preside at the auxiliary's meet.

Mrs. Brucilla Hopper, president of the state VFW auxiliary, will make her official visit to this district during the two-day meet, while Mrs. Pat McMullan, auxiliary president for district 23 will preside at the auxiliary's meet.

J. T. Rutherford, immediate past commander of the VFW from Odessa also will speak.

Following a memorial service for American soldiers killed in the service of their country Sunday morning, the group was scheduled to hold Sunday noon dinner at the club and a joint meeting of the VFW and VFW auxiliary Sunday afternoon.

Tibet, Red China Pact Not Ratified

NEW DELHI — (AP) — The Times of India said Saturday Communist-occupied Tibet has not yet ratified its treaty with Red China and is asking for modification of terms. The treaty was signed in Peiping May 23.

The Times story said the Dalai Lama had not yet put his seal on the pact which defined measures for the "peaceful liberation of Tibet" by the Communists.

City Officials To Attend League Meet

Several Midland city officials will go to Mineral Wells next Sunday for the opening of the four-day annual convention of the League of Texas Municipalities.

The group includes J. M. Orman, director of the city's Department of Public Works, who is president of the Texas Public Works Association, one of the league's affiliated groups.

POSTMASTER NAMED

WASHINGTON — (AP) — President Truman has sent to the Senate the postmaster nomination of Alba A. Hall, of Roby, Texas.

Badman Bill Cook Pleads Insanity In Salesman's Murder

EL CENTRO, CALIF. — (AP) — Badman William Cook, accused of leaving six dead along his trail of escape to Mexico, pleaded innocent and innocent by reason of insanity Saturday to a charge of murdering Seattle salesman Robert Dewey in the California desert last January.

Cook already is under sentence of 300 years in Alcatraz Prison on his federal court conviction in Oklahoma City, Okla., of kidnaping in the abduction and slaying of Mr. and Mrs. Carl Mosser and their three children of Atwood, Ill.

Defense Attorney John Connolly of Oklahoma City Saturday asked Superior Judge L. J. Mouser for a stay of proceedings pending an examination of Cook by alienists.

Judge Mouser set the trial for November 19, and appointed three psychiatrists of state institutions to examine Cook before the trial.

Donnell Acquitted In Triangle Slaying

SAN ANTONIO — (AP) — The murder trial of Raymond Donnell ended Friday night with the Lubbock clothing salesman set free.

Donnell, charged with murder in the death of Dr. Clyde C. Craig, said he was expecting the acquittal. A crowd of 50 spectators applauded.

Craig was shot last July 3 in the bedroom of Mrs. Donnell's San Antonio apartment.

The jury deliberated less than an hour. Mrs. Donnell, to whom Craig declared his affection in letters read during the trial, was present when the verdict was read.

Texas Family Gets Together In Chicago

CHICAGO — (AP) — A Texas family was together Saturday for the first time in 10 years at the National Methodist Conference on Family Life.

Mr. and Mrs. Tom V. Elizay, Amarillo, met their sons and families for the conference. The Elizays, in their seventies, have been married 47 years.

The oldest son, W. Clark Elizay, 45, head of the department of marriage and family at Stevens College, Columbia, Mo., is a discussion and panel leader at the meeting.

M. Lawrence Elizay, 40, is a rancher at Perryton, Texas, northeast of Amarillo; the Rev. H. J. H. Elizay, 36, is pastor of the Methodist Church at Commerce, Texas, and Charles H. Elizay, 27, New York, is studying for the ministry at Columbia University.

Panama Gets Five Million Dollars Worth Of Swank To Lure Dollars From Yankees

Panama's El Panama: Inside the lobby, banks of orchids grow from the walls to give Panamanians a new sense of prestige.

By DOUGLAS LARSEN
NEA Staff Correspondent
PANAMA — NEA — Plush American-type, out-of-this-world luxury has been installed in this Central American crossroads.

It consists of the newly-opened \$5,000,000 El Panama Hotel which comes close to outswanking the most luxurious hotels of Miami Beach, or any in the world, for that matter.

Although only a bare handful of citizens of the Republic of Panama can even afford to walk in the lobby, the new hotel has become the pride and joy of every Panamanian. The El Panama removes a long-suffering blemish on the side of Panamanians, greatly enhances their prestige in Central and South America, and, they hope, will lure new business and tourist money for their limp economy.

Every year since 1958 opened the Tivoli Hotel in the Panama Canal Zone. Panamanian officials have been irritated. They felt that the U.S. hotel was an unnecessary competitor with the Republic's hotels.

Now they have something better — better than any Zone employe or Panamanian thought possible. A group of wealthy Panamanians collected \$1,500,000 for the project.

With the backing of their government they got a loan of \$2,500,000 from the Export-Import bank in Washington to help in the construction, and another \$2,500,000 for its operation. The Tivoli is now closed except for a few visiting U.S. employes.

El Panama's designer, Architect Edward B. Stone, received an award from the Architects Association of New York for the hotel as the outstanding building of the year.

Ninety per cent of the shingles used to house the nation come from the Pacific Northwest.

... brings you news about better products you need ... tells you where to get what you want when you want it ... makes lower prices possible through mass production and mass selling

Yet Picture How Little All This Costs
For instance, it costs less than 1/10c a quart to advertise the best-known brands of milk.
Any other method of selling would cost the manufacturer more and therefore raise the price. Otherwise he wouldn't use advertising.

A MANSION IN COLORADO

This beautiful country estate, a delightful French Provincial house was planned for convenience, distinguished atmosphere and for perfect harmony with the pines and spruce, in the most spectacular setting in the Rocky Mountains. Magnificent view of snow-capped Mt. Evans and many other peaks. This house was built by one of Colorado's wealthiest families and no expense was spared in the superior construction and appointments. It has dignity, charm and structurally will stand the most rigid inspection. It is what you would call a large small house. 6 rooms, 3 baths, fascinating interior details, too numerous to mention. In excellent condition, leaded casement windows, asbestos slate roof, quick vapor heat, automatic oil burner, all interior hardware and light fixtures especially designed, a most livable patio, 33 x 35 feet, a large portion roofed over, flagstone floors, many beautiful hand-carved stone pillars, large pine tree in center, with breathtaking views in all directions.

MIDLAND, TEXAS, SUNDAY, OCTOBER 14, 1951

SECTION THREE

NE Midland Explorer Finds Interesting Production Signs On DST Of Strawn Section

Flowing Opener In C-W Dawson Takes Potential

Greenbrier Oil Company has completed its No. 1 M. C. Lindsey, et al. as a discovery from the lower Pennsylvanian lime in Central-West Dawson County for a 24-hour potential of 402.96 barrels of 45.2 gravity oil.

That well, located 650 feet from north and 860 feet from east lines of section 32, block M, EL&RR survey, was completed for a potential of 735 barrels per day, flowing through a 50 64th inch tubing choke, after the pay had been washed with 500 gallons of mud acid. It did not make any water.

Interesting indications of possible production from the Strawn lime section of the lower Pennsylvanian have been found in Northeast Midland County at Greenbrier Oil Company and associates No. 1 O. H. McAllister.

This wildcat had the shows in a drillstem test at 10,335-373 feet. The tester was open for three hours. Gas surfaced in 14 minutes. There was a good blow of gas for the remainder of the test period.

Six New Producers, Seven Projects Added To Upton Midland Spraberry Trend

Six new producers and seven more projects have been added to the Spraberry Trend in Midland and Upton Counties.

Humble Oil & Refining Company No. 1 Donald L. Hutt Fee is to be drilled as an 8,100-foot, one-location north offset to Mid-Continent Petroleum Corporation No. 1-T TXL, recently completed southwest extension to the Tex-Harvey field of Central-East Midland County.

Moore Is To Show Geologists Slides Of Big Game Hunt

John I. Moore, Midland oil operator will provide the program for the Tuesday luncheon meeting of the Midland Geological Society.

Much Interest Is Being Indicated In Study Session

The widespread interest being shown in the symposium on the Spraberry Trend oil fields of West Texas which is to be held in Midland Friday and Saturday indicates a large and representative attendance for study session from several different segments of the oil industry and from many different oil centers.

The affair is being sponsored by the Texas Petroleum Research Council. A steering committee of Midland citizens is assisting the council in arranging for the presentation of the program.

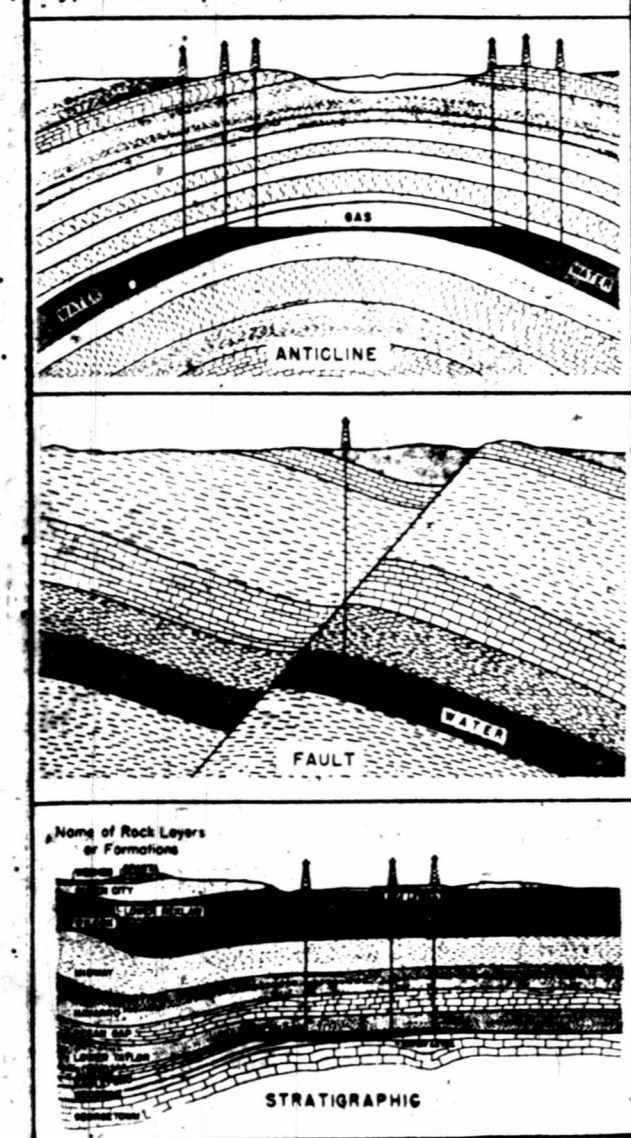

The symposium is designated Oil Recovery Conference. The primary purpose of the affair is to present the best authorities obtainable to give prepared papers on various features of the subject being studied and then to follow up by having general discussions of all the papers which are offered.

API Is To Make 13 Appreciation Awards At Chicago Meeting

DALLAS—Thirteen men, whose services to the American Petroleum Institute and the oil industry total two and three-quarter centuries, will be awarded Certificates of Appreciation at the API's 31st annual meeting in Chicago, November 5-8, inclusive.

The various types of jointing and general geological terminology connected with the subject will be covered and the paper will be illustrated with kodachrome slide photographs.

Types of Traps in which Oil and Gas Accumulate

THREE TYPES OF TRAPS—Top diagram shows an "anticline" where petroleum is caught in a porous formation sandwiched between non-porous layers.

Amerada Schedules 10,000-Footer In C-W Borden Area

Amerada Petroleum Corporation No. 1 Charles C. Cannon is to be a 10,000-foot wildcat in Central-West Borden County.

Midland Prospector Is Acidized To Test Pennsylvanian Lime

The Blackwood & Nichols Company No. 1 Hofferkamp, wildcat in North-Central Midland County, one and one-half miles northeast of the city of Midland, is running tubing to acidize open hole in the Pennsylvanian between 11,128 feet and total depth of 11,318 feet and test.

Second Oiler Seen For Neva West Pool In C-N Schleicher

Wesley W. West of Houston appears to have a second Pennsylvanian lime producer assured for the Neva West field in Central-North Schleicher County at his No. 2 Mittel.

Oil Produced From Midland Area Pools In August Tops 1,000,000-Barrel Mark

By JOE SALMAN Reporter-Telegram Oil Writer Midland County's monthly oil production, which could have been stored in one small tank two years ago, soared past the 1,000,000-barrel mark in August.

The most prolific area, from the standpoint of barrels of oil produced per well, is the Pegasus field of Southwest Midland and Northwest Upton Counties.

In August it made 80 barrels of oil. The Beauman-Pennsylvanian field, the newest field in the area did not have a production figure for August.

Well Completions Above Last Year's

AUSTIN—(P)—The Railroad Commission reported 190 oil wells completed last week, running the year's total to 8,534 compared with 8,317 a year ago.

Gas well completions numbered 13, and 83 dry holes were drilled. Wildcaters drilled nine oil wells, four gasers, and 50 dry holes.

Operators plugged 83 dry wells and 40 oil wells. The total average calendar dry crude oil allowable as of Saturday was 3,103,365 barrels, up 10,538 barrels from a week ago.

Seven producers will receive their certificates "for long and faithful service" for long and faithful service to the industry.

Representatives of some of the largest metal concerns in the United States are to take part in the programs. Among the big companies which will be represented are International Nickel Company, Aluminum Company of America, Reynolds Metal Company and American Mining & Smelting Company.

The Tool Pusher

WTGS Makes Final Plans For Annual Fall Field Trip To Apache Mountain Region

Final plans have been made for the Fall Field Trip of the West Texas Geological Society which is to be held October 26-27 in the Apache Mountains of Culberson County.

The purpose of this field trip is to offer geologists an opportunity to study an important area of upper Permian outcrops, in and near the Apache Mountains, which lie north of Highway 80 between Van Horn and Kent. The first day will be spent in the eastern and central parts of the mountains. The high point of this day is an optional four mile hike through the crest of the mountains where excellent exposures of Permian reef may be seen.

The second day will be spent in the western Apache Mountains, in Seven Heart Gap just north of the mountains, and in the southern Delaware Mountains. Relationship between the reef facies and the

Brasher Is Named Assistant District Geologist Of SO&G

Nugent T. Brasher is the new assistant district geologist for Standard Oil & Gas Company for West Texas.

He takes the place formerly held by Gayle Crawford who was transferred to Rosewell, N. M., a short time ago and made district geologist for the concern for Southeast New Mexico.

Brasher had been area geologist for Standard for the north section of West Texas for four years prior to his promotion to be assistant district geologist.

He has been employed by the company for more than 15 years. He started working for Standard in Iran in the Yates field as a roustabout.

Texas Tech Graduate
He is a graduate geologist from Texas Technological College at Lubbock. He served in the U. S. Army during World War II.

He has worked as a roustabout, engineer, geological engineer and staff geologist before being made an area geologist supervisor.

In his new job he will work directly under Gordon T. Buskirk, Stanolind's district geologist for West Texas.

The concern's West Texas headquarters are in Midland.

NEW SERVICE—E. R. Osburn, of Midland, who recently started a new service for the petroleum industry. He is working as a consulting engineer for pipe line transportation of oil and gas. He resigned as assistant general manager and director of the Texas Pipe Line Company and of the Texas-New Mexico Pipe Line Company at Houston, to come to Midland and enter the consulting work.

Sulphur Recovery Unit Is To Be Built At Slaughter Plant

A sulphur recovery unit will be constructed at the Slaughter gasoline plant located near Sundown, in Hockley County, according to John R. Evans, manager of Stanolind Oil and Gas Company's North Texas-New Mexico division. Stanolind operates this plant for a group of eight owners.

Fluor Corporation, Ltd. of Los Angeles, Calif., will install the unit, which is expected to be in operation by March of 1952. Approval for the construction has been received from the Petroleum Administration for Defense, Evans said.

At the present time, the Slaughter plant can process 50 million cubic feet per day of casinghead gas, which is produced with oil from wells in the Slaughter field. Butane, propane, and natural gasoline are recovered from the casinghead gas.

When the gas enters the plant from the Slaughter field, it is "sour," containing up to one and one-half per cent of hydrogen sulphide and up to seven and one-half per cent of carbon dioxide. These gases are removed from the casinghead gas during processing, and were formerly flared.

When completed, the new unit will recover approximately 40 long tons of elemental sulphur daily from eight and one-half million cubic feet of acid gas.

Owners of the plant, in addition to Stanolind, are: The Texas Company, Honolulu Oil Corporation, Magnolia Petroleum Company, The Devonian Company, The Atlantic Refining Company, Salmount Oil Company, and Mid-Continent Petroleum Corporation.

Killgore Is Named Assistant Geologist For Continental

C. B. Killgore has been appointed to the position of assistant division geologist in the Midland office of Continental Oil Company. He will succeed W. O. Ham, Jr., who was recently made area geologist for the company in Fort Worth.

Killgore received a degree in geology from Centenary College in Shreveport, La. He joined Conoco in that city as a geologist in 1946, following five years of service in the Army in World War II. Came From Shreveport.

He came to Midland in the Summer of 1950, after having served as district geologist and division geologist for Continental in Shreveport.

Ham had been in the company's Midland headquarters for the past year, after service at Ponca City, and Abilene. He is a native of Atlanta, Ga., and was graduated from Southern Methodist University and joined Continental in 1943.

Charles D. Vertrees is division geologist for Conoco in Midland.

RUSSELL'S OFFICES ARE NOW IN FNB BUILDING

Offices of Harry J. Russell, geological consultant are now at 302 First National Bank Building in Midland. Telephone number at the new place is 4-5941. His offices were formerly at 210 North Big Spring Street.

Announcement

O. H. GRUBBS DRILLING CO.

wishes to announce the opening of new offices at—
602 Citizens National Bank Bldg.
BROWNWOOD, TEXAS
and
3820 Ross Ave.
DALLAS, TEXAS

New Equipment, Drilling Contractors and Farmout Deals solicited. Will participate in good drilling deals.

NE Midland Explorer—

(Continued From Page One)

However, unofficial sources report that it has flowed oil on two drillstem tests and it is understood that West is due to run casing and complete the well, which is a one-location northwest of the owner of the Neva West field.

Sirawa Top

The unconfirmed report on No. 2 Mittel says that it topped the Sirawa lime at 4,196 feet, which is on a datum of minus 3,850 feet. It is credited with topping the porous zone in the Pennsylvania at 4,229 feet, which is on a datum of minus 3,881 feet.

According to some correlations the No. 2 Mittel is 194 feet low on the top of the porous zone to the same point in West No. 1 Mittel, the field opener.

It took a drillstem test at 4,206-4,208 feet. The tool was open one and one-half hours. Gas surfaced in six minutes and oil started flowing at the top in 58 minutes.

28-30 BOFH

It flowed for the remainder of the test at the estimated rate of from 20 to 30 barrels per hour. Gas-oil ratio was 900-1.

The wildcat then deepened to 4,354 feet and took a drillstem test with the packer at 4,310 feet. The tool was open 40 minutes.

Gas surfaced in one minute and oil began to flow out at the top in 14 minutes.

1.7-Inch Choke

The well flowed at the estimated rate of from 40 to 50 barrels of oil per hour from the remainder of the test. There was no sign of formation water. Gas-oil ratio was 1,300-1. The flow was through a one-half-inch bottom hole choke.

It is understood that the No. 2 Mittel will run a production test in the near future.

West has filed application with the Railroad Commission of Texas for permission to start drilling it once on his No. 3 Mrs. Christina Mittel.

It will be 1,650 feet from north and 3,087.14 feet from east lines of section 7, block T, TCR survey. That makes it 1,420 feet west of the No. 2 Mittel.

This development is projected to 6,500 feet, to test the Pennsylvania lime. It may not go that deep if it can develop commercial production at a higher level.

Spencer Prospector In Lubbock Is To Be On Skelly Farmout

Morris G. Spencer of Dallas No. 1 Lubbock Irrigation Company, slated 5,000-foot exploration which is one location west of the discovery well of the Stinnet field in East-Central Lubbock County, is to be drilled on acreage secured by Spencer in a farmout deal with Skelly Oil Company.

That Was An Error

It was previously reported that the prospector was to be on a farmout from Stanolind Oil & Gas Company. That was an error.

Location is 660 feet from south and east lines of labor 17, league 4, San Augustine County School Land survey. It is 10 miles east of the city of Lubbock.

Operations are to start soon.

Rocker A In Garza Gets North Outpost

R. S. and P. W. Anderson of Midland and Neville G. Penrose of Fort Worth have staked location for a one-mile north outpost to the Rocker A-San Andres field of Southeast Garza County.

It is their No. 1 Skelly-Stokes and is located 330 feet from north and 660 feet from east lines of section 939, block 97, H&TC survey.

Projected depth is 2,900 feet with rotary tools. Drilling will begin at once.

NW Loving Wildcat Plugged, Abandoned

Hill & Hill of Fort Worth has plugged abandoned No. 1 TXL wildcat in Northwest Loving County, after testing the Delaware from 3,581 feet to total depth of 3,650 feet. That zone was barren.

It was 330 feet from north and west lines of section 23, block 56, T-1, T&P survey and three miles west of the Mason field and 11 miles northeast of Oria.

North Reeves Test Dry And Abandoned

Louis Crouch of Lookhart has abandoned his No. 1 Mrs. Olive McCamey, wildcat project one mile southwest of the Tunstall-Delaware sand field in North Reeves County, at 3,450 feet. It was dry.

Location was in section 16, block 46, T-2, T&P survey.

Field In SW Ector Gets New Outpost

Ralph Lowe has staked location for his No. 1 Vest as an outpost to production in the Yarbrough & Allen field of Southwest Ector County.

Location is 330 feet from south and west lines of section 8, block B-14, pal survey and eight miles northwest of Penwell.

Rotary tools will be used to drill the venture, beginning immediately. Projected depth is 10,900 feet which will take it to the Ellenburger.

SE Nolan Discovery Gets West Offset

Seaboard Oil Company of Delaware and Continental Oil Company have staked location for a west offset to their No. 1 Billie Hanks, Pennsylvania discovery in Southeast Nolan County.

The new project is No. 1-A Hanks and is 1,980 feet from north and west lines of section 28, block Z, T&P survey and seven miles north of Blackwell.

No. 1-A Hanks is scheduled to drill through the Pennsylvania and it might be carried to the Ellenburger.

Seaboard and Conoco No. 1 Hanks was completed for 383 barrels of oil and five per cent basic sediment and water through perforations at 5,540-5,560 feet. Flow was through a one-quarter-inch choke.

Central Kent Field Gets West Offset

Sun Oil Company has staked location for a one-location west offset to the same company's No. 1-D Wallace, producer on the south side of the Clairmont-lower Pennsylvania field of Central Kent County.

It is No. 2-D Buby Wallace and is 2,080 feet from west and 660 feet from north lines of section 8, block 98, H&TC survey and one mile south of Clairmont.

Rotary tools will be used in drilling to projected depth of 7,200 feet. Operations will begin at once.

Spiars Starts New Concern To Serve Petroleum Industry

Early N. Spiars of Midland has started a new Permian Basin industry service concern. It is Spiars Equipment Company. Headquarters will be in this city.

The new company will act as manufacturers representative in distributing an assortment of oil country specialties.

It will represent Bell Rubber Company of Dallas, manufacturers of Bell tubing and drill pipe swabs and stripper rubbers; J. M. Huber Corporation of Borger, makers of the Huber rotating paraffin scrap.

Early N. Spiars

ers and incidental equipment, and the Diamond Oil Well Drilling Company of Midland, distributors of J. K. Smit diamond bits and Diamond Oil Well Drilling core barrels. Is Well-Known

Spiars is well known in the Permian Basin oil fields. He has lived in Midland several years and was formerly a partner in Spiars & Wells Equipment Company, a general oil field supply company.

For more than a year he has been connected full time with Diamond Oil Well Drilling Company in that concern's sales department.

He will continue to work with Diamond under his new arrangement.

Engineering Graduate

Spiars graduated from Oklahoma University in 1933 with a degree in petroleum engineering. He took his junior and senior work at that institution after having been a student at Texas A&M College during his freshman and sophomore college years.

Prior to his association with Spiars & Wells Equipment Company he had worked as a petroleum engineer for Humble Oil & Refining Company; had been with Parkersburg Rig & Reel Company at Dallas for three and one-half years, and had been division manager at Dallas for Buda Engine & Equipment Company.

Served In Navy

He served three and one-half years as an officer in the U. S. Navy during World War II, and after being released from that service came to the Permian Basin.

He has taken over the Bell Rubber Company account in the Permian Basin from Jack W. Anderson, veteran oil field specialist man, who is going to take up farming in another area.

C-W Midland Field Gets New Oil Well

Magnolia Petroleum Company has completed its No. 4 Parks as a new well in the Parks-Pennsylvanian field of Central-West Midland County.

The well flowed 206.45 barrels of 43-gravity oil in 24 hours. There was no water. Gas-oil ratio was 1,980-1.

Total depth is 10,550 feet and top of pay is at 10,481 feet. Five and one-half-inch casing is cemented on bottom.

Production is natural through perforations at 10,483-513 feet.

The new oiler is one-location west of the discovery well of the field and 660 feet from north and 990 feet from west lines of section 10, M. Daugherty survey. That makes it 11 miles southwest of Midland.

NE Crockett Pool Gets Second Oil

Continental Oil Company has completed its No. 3-A J. M. Shannon as the second producer in the Elkhorn-Ellenburger field of Northeast Crockett County.

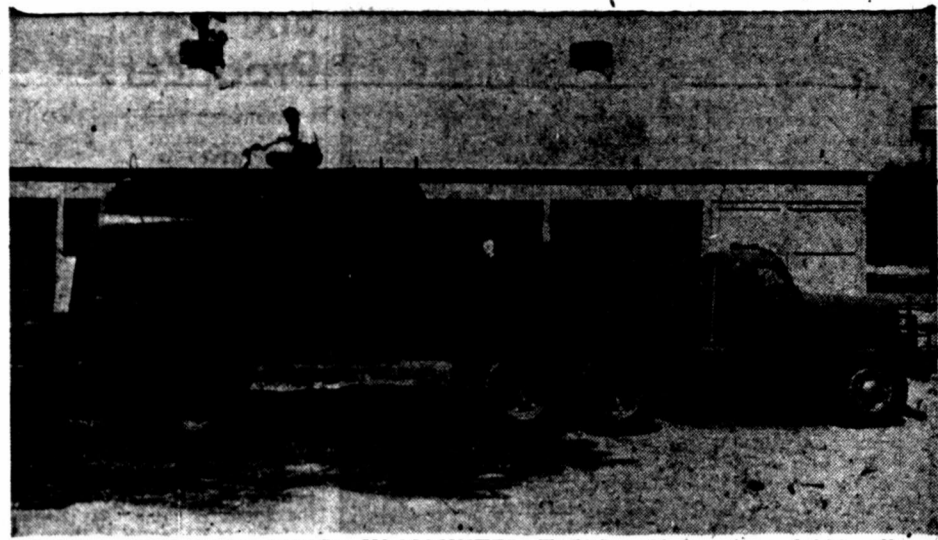

The well flowed five hours through a 32 3/4-inch choke to make a calculated 24-hour potential of 2,949.12 barrels of oil. Gravity was approximately 36 degrees. There was no water. Gas-oil ratio was 434-1.

Through Perforations

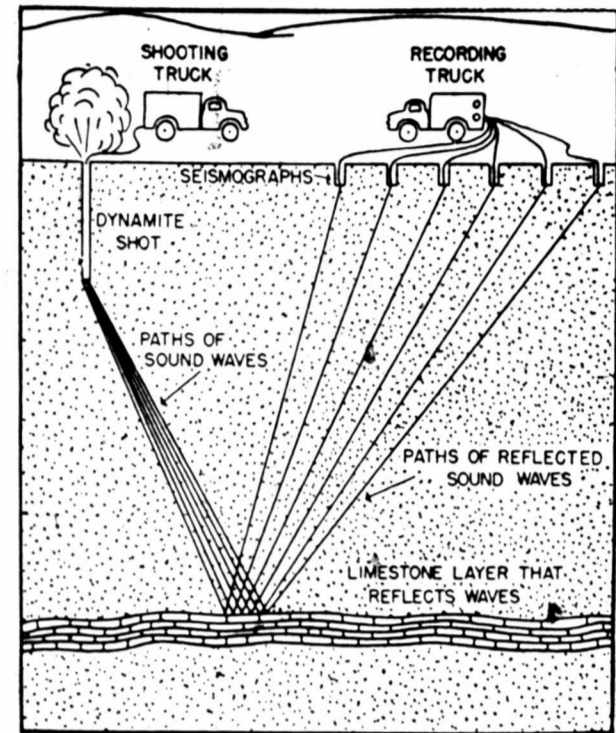

Production is coming through perforations at 7,130-7,220 feet. Five and one-half inch casing is cemented at 7,500 feet and total depth is 7,433 feet in line.

The Ellenburger was topped at 7,125 feet.

Location of the new producer is 1,980 feet from north and 660 feet from east lines of section 22, block UV, GC&ST survey. It is five-eighths of a mile northeast of the same operator's No. 1-A Shannon estate, the discovery well of the pool.

STRATA FRAC GEL MIXED IN MOUNTED TANK—Shown is a 2,000-gallon mixer tank of Dowell, Inc., which is used to mix Strata Frac gel, a new process treatment which is increasing production from the Spraberry. Dowell technicians and engineers are shown atop the big mixer tank and at the forging engine. Strata Frac is only a month old but is proving successful in field tests.

EARTHQUAKE CREATED—Diagram above illustrates how small man-made earthquake is created and "listened to" by seismograph instruments. Interpretation of this data gives clue to types of formations existing underground.

WASHINGTON OIL—Veteran Oil Men Wonder About Rationing Talk In Government Circles

By JOSEPH HUTTLINGER
Reporter-Telegram Washington Oil Correspondent

WASHINGTON—Warnings of gasoline and heating oil rationing are heard so often, and from such seemingly authoritative sources these days they make even veteran oil men wonder.

The situation is in contrast to the early days of the defense mobilization when Deputy Petroleum Administrator Bruce K. Brown was asked if any rationing were ahead.

In reply, he pulled forth a mimeographed statement saying the supply was all right as far down the road as he could see. He was going to paste the statement on his door, he said, and didn't want to be asked such a silly question again.

That was last February.

But last summer, PAD warned that "rationing" was inevitable unless much more steel was made available to the oil and gas industry. The warning came in a letter to the National Production Authority.

On July 17, Secretary of Interior Oscar L. Chapman went so far as to give a time when "rationing" might come. He said eight or 10 months, without more steel, Chapman, who also is Petroleum Administrator for Defense, was testifying before the Senate Interior Committee.

Privately, PAD officials advised newsmen to take a skeptical view of the secretary's statement.

Then the Iranian oil crisis came to a sad climax, and oil operations were shut down. With the loss of 150,000 barrels daily of crude oil there, and 460,000 barrels daily of products, a new drain was seen on the United States to fill the gap. Again, the rumblings of oil shortages ahead broke out.

"Stand-By" Plan

The Office of Price Stabilization urged a study which would draft a "stand-by" rationing plan, for use in case needed. According to one report, the OPS got a go-ahead for this on a small scale. The study is not to go so far, it is understood, as to print ration coupons.

The PAD maintained a silence on the subject for some time. Then came a statement September 21 at Jennings, La., from PAD head

Texas Plant Construction At Top Mark

Stimulated by a defense economy, Texas' petroleum and petro-chemical industry has gathered speed in a move to expand facilities by well over one-third of a billion dollars, assuring a high level of plant construction for the state that will extend into 1952 and possibly 1953.

Petrochemical refinery expansions, including those announced and those already in the process of construction, will reach approximately 371 million dollars, according to estimates tallied by the Texas Mid-Continent Oil & Gas Association.

The state's billion dollar petrochemical industry, which depends upon petroleum as its raw material, is undergoing an expansion program paced by the Ethyl Corporation's 44 million dollar chemical manufacturing plant at Houston, Dow Chemical's 30 million dollar expansion at Freeport, and The Pure Oil Company's 11 million dollar plant at Nederland.

It is no accident that these major industries that are so important to the state's economy are located in Texas.

"The Southwest is favored by expansive tendencies in most of the forces making for industrial growth. The production of industrial raw materials, paced by the continuing discovery of oil and gas resources, has been the basis for growth in the oil refining and petro-chemical industries," economist Keith W. Johnson, Federal Reserve Bank of Dallas, recently commented.

Attract Industry

Texas' huge supplies of natural gas, which were available in locations affording economical transportation facilities, have attracted the metals industry, including the Aluminum Company of America's plant at Point Comfort, which is undergoing a 15 million dollar expansion, and the now-under-construction million dollar Reynolds Metals plant at Corpus Christi. These plants are dependent upon natural gas as a source of power.

Born of the petroleum industry, chemical plants along the Texas Gulf Coast have rapidly grown in number over the past 10 years. Approximately 80 per cent of all chemical plants built in the nation since 1940 were erected in the Gulf Coast area. Natural gas is now processed to yield valuable hydrocarbons which in turn are made into such everyday products as synthetic rubber, plastics, medicines and insecticides.

Because of the Texas petroleum industry's vital role in the nation's economy, refineries are expanding or new ones are being built to handle the needed increase in oil and gas production. Still on the designing block is a 40 million dollar refinery of Gilmore Refineries, which is slated to be built at Odessa. The proposed plant has a daily capacity of 80,000 barrels of crude oil per day.

In projects costing 10 million dollars or more, Gulf Oil Corporation is constructing a 15.4 million dollar ethylene plant and an 18 million dollar catalytic cracker, both at Port Arthur. The Pure Oil Company has announced a proposed 27 million dollar expansion at Houston, which will include a catalytic cracker and desalting unit.

Standard Oil Company of Texas is constructing a catalytic cracker at El Paso and the Phillips Oil Company has announced a 15.5 million dollar alkylation expansion at Borger. Still in the planning and design stage is a 15 million dollar petrochemical plant planned by the Pontiac Refining Company at Corpus Christi. Other refineries over the state are either constructing, or soon will be, facilities totaling many additional millions of dollars.

Through petroleum, Texas is growing into one of the world's mightiest industrial areas. The growth of petroleum's dependent industries will add thousands of workers to the chemical, metal, and allied fields. More will be added to the 44,000 already employed in refinery operations. The highly important production phase of the petroleum industry has already experienced an employment increase of 9.5 per cent over the past year, which will probably continue to climb for an indefinite period.

Seven Rivers Test To 3,900 Feet Is Spotted In SE Lea

HOBBS, N. M.—Shell Oil Company will drill its No. 1-E State as a 3,900-foot wildcat in Southwest Lea County, 20 miles northwest of Eunice.

The project will be drilled in an area two miles northwest of the West Wilson-Seven Rivers pool which is surrounded by dry holes.

The West Wilson field produces from above 3,750 feet.

Exact location for No. 1-E State is 1,980 feet from south and east lines of section 7-219-34e.

McAlister Fuel Company No. 1-C Pat H. McClure has been completed as a new oiler in the Denton field of Central-East Lea County. The new well was completed from the Devonian for a daily flowing potential of 407 barrels of 47-gravity oil and no water through a 20/64-inch tubing choke.

Gas-oil ratio was 967-1. Perforations from 12,504-18, 12,530-80 and 12,624-50 feet were washed with 11,000 gallons of acid.

No. 1-C McClure was drilled to total depth of 13,983 feet in granite. It went from the Fusselman to that zone without finding the Ellenburger. It was then plugged back to 12,624 feet for completion. Pay was topped at 12,564 feet.

Location is 330 feet from north and 990 feet from east lines of section 44-154-37e.

Texas Pacific Coal & Oil Company No. 2-B State is to be drilled as a Pennsylvania test in the Bagley-multipay area of Northwest Lea County. It will go to a possible bottom of 9,500 feet. Location is 660 feet from north and 1,980 feet from east lines of section 11-124-33e.

Amerada Petroleum Corporation No. 2-A Mathers is a project to the Pennsylvania in the same field. It will be dug 1,980 feet from north and west lines of section 3-124-33e.

Sinclair Oil & Gas Company has spotted location for a northwest offset to McAlister Fuel Company No. 1-A Brownfield, discovery well of the Gladiola-Devonian field of Northeast Lea.

It will be dug as No. 2 John Schultz, 330 feet from south and 660 feet from east lines of section 13-124-37e. The 12,100-foot project is a twin to Sinclair's No. 1 Schultz, a Wolfcamp producer.

Atlantic Refining Company No. 2-A Bettie C. Dickinson is a new oiler in the Denton-multipay field Central-East Lea County. It was completed from the Wolfcamp for a daily flowing potential of 2,047 barrels of 43.8-gravity oil through a three-eighths-inch choke after 4,590 gallons of acid in open hole from 9,256-9,510 feet.

Location is 1,980 feet from south and 660 feet from west lines of section 1-154-37e.

Atlantic No. 3-A Bettie C. Dickinson is to be drilled as a one-location south offset to Phillips Petroleum Company No. 1 Fort, recently completed Devonian wildcat in the Denton area.

No. 3-A Dickinson will be dug 1,980 feet from north and 660 feet from east lines of section 34-144-37e. It is to drill to a possible bottom of 12,700 feet for a test of the Devonian.

Southern California Petroleum Company No. 2 Bettie Reid, project in an unnamed field in Southeast Eddy County, has been completed as the third Delaware producer in the newly opened area.

Operator reported a daily flowing potential of 74 barrels of 44-gravity oil and no water through a one-half-inch tubing choke. Completion was from open hole section at 2,783-2,791 feet. Tide water Associated Oil Com-

pany No. 1 Grady Best wildcat in Northwest Roosevelt County, is at plugged back total depth of 3,035 feet. Operator is running seven-inch liner for a test of the San Andres. The project was drilled to granite, without finding any shows for possible production in any formation below the San Andres which had some shows of oil.

Location is 1,980 feet from north and east lines of section 27-25-29e.

Carpenter Drilling Company No. 1 W. A. Shugart, indicated shallow discovery three and one-half miles southwest of the McMillan pool of Northeast Eddy County, is at total depth of 1,256 feet, balling open hole from 1,232 to total depth.

Tests have recovered four barrels of oil per hour for 16 hours, after which 22 gallons of oil were bailed per hour for two hours. Operator set eight and five-eighths-inch casing at 1,228 feet for completion. Location is at the center of the southwest quarter of the southwest quarter of section 22-206-26e.

One mile east of the North Brunson area of Southeast Lea County, Fullerton Oil Company No. 1 Elliott-Federal recovered 875 feet of clean oil and 150 feet of drilling mud on a 90-minute drillstem test from 5,800 to 5,983 feet in the Clear Fork. Gas showed at the surface in seven minutes at the estimated rate of 100,000 cubic feet daily.

At last report operator was taking a drillstem test from 5,894 to 5,954 feet.

Location is in section 1-214-37e.

Malco Refineries, Resler and Yates No. 1-14 State has been plugged and abandoned as a failure in North-Central Eddy County. It was quite in an unidentified lime at 6,014 feet.

Location was 660 feet from east and 1,980 feet from south lines of section 5-118-27e.

Location is in section 1-214-37e. Malco Refineries, Resler and Yates No. 1-14 State has been plugged and abandoned as a failure in North-Central Eddy County. It was quite in an unidentified lime at 6,014 feet.

Location was 660 feet from east and 1,980 feet from south lines of section 5-118-27e.

Midland Schools To Observe Oil Progress Week

Emphasis will be on oil in Midland's schools this week with students in every grade learning more about the oil industry.

A display board with oil as its theme will be in the lobby of Midland High School and a color booklet, "Oil Serves You," will be given to each high school student. From English compositions to experiments in chemistry and physics, the main topic for the week will be oil.

Students in all the schools will see the picture, "Man on the Land." The picture presents the full dramatic story of how man has obtained his high standard of living from nature and the land.

The story goes back to where history begins—then man works his way up from discovery of the power of stone-headed axe, to the power in the fuel pump within such easy reach of his modern farm home.

It was produced by United Productions of America.

The film is being shown in the schools through the courtesy of Midland's Oil Committee.

Oil Industry Needs Billions If Expansion Program Continued

By WELDON HILL
Oil Editor of the Houston Post

HOUSTON—(AP)—Some \$17,000,000,000 to \$18,000,000,000 will have to be pumped into the oil industry if it is to achieve its domestic production goal.

Oil men say the industry is investing \$3,000,000,000 annually in an expansion program. They say more will be required as new projects go into operation.

On this, the first day of Oil Progress Week, the industry is producing better than 6,300,000 barrels daily. The stepped-up goal set by government officials calls for an increase of some 250,000 barrels daily.

Oil men are confident of the industry's progress. But they cite some obstacles. "The biggest obstacles," they say, "is a steel shortage and bureaucratic control."

Humble President Quoted
Hines H. Baker of Houston, president of Humble Oil & Refining Company, said:

"In my opinion, the United States will continue to have adequate fuel supplies for the foreseeable future when the necessary supplies of natural petroleum if there is no interference with economic incentives and tax provisions which stimulate search for new reserves.

"Given reasonable incentives, the petroleum industry can be expected to make the huge investments of capital necessary to provide increasing supplies of oil and gas and gas for our many requirements."

Dr. Robert E. Wilson, chairman of Standard Oil Ind., says the freedom is the one thing the oil industry must have if the progress of the people through petroleum is to continue.

"Freedom to explore where we will, freedom to conduct our research, freedom to seek and build plants and facilities, freedom to learn profits with which to finance expansion and maintain our credit," he explained.

Service Would Wither
"Without freedom from bureaucratic control, oil's service would surely wither," he added.

P. C. Spender, president of Sinclair, said "an unsatisfactory political and economic climate is the greatest hazard of all to the future of the oil industry."

L. F. Collum, president of Continental, says petrochemists will plan an important role in future oil progress.

"Scientists are now able to synthesize more than 50,000 compounds from petroleum, he said, "and as use for the compounds are found, the industry will accelerate its expansion."

L. S. Wescoat, president of the Pure Oil Company, says he has no doubt but that the oil industry will continue to provide adequate supplies of oil.

"Every gloomy prophecy concerning the industry's ability to produce has been proved false," he declared.

Sun Moves Brown To Job In Canada

PHILADELPHIA — Appointment of Marvin L. Brown as superintendent of production for the Canadian division of Sun Oil Company has been announced by Jno. O. Few, vice president in charge of production. He will have headquarters in Calgary, Alberta. Brown, formerly regional superintendent of production for Sun Oil's Southwest division at Dallas, succeeds George E. Bentley who resigned to accept an administrative post with a newly-organized drilling company. O. E. Dunlap continues as manager of the Canadian division.

SHIVERS SALUTES OIL INDUSTRY—Official recognition came to the Texas oil industry in the form of a proclamation issued by Gov. Allan Shivers designating October 14-20 "Oil Progress Week" in the Lone Star state. In this picture, Shivers signs the proclamation as Roy M. Stephens, Texas chairman of the Oil Industry Information Committee, looks on.

STANOLIND OIL PURCHASING OFFICES IN NEW LOCATION

Offices of Stanolind Oil Purchasing Company in Midland are now in suite 209 in the new West Building at the corner of West Ohio and North Colorado Streets.

The concern had previously been in the Stanolind Oil & Gas Company Building—but the expansion of the work of that company called for all space in the building.

Personnel in the office include Glenn Shoemaker and W. S. (Bill) Maxwell, crude oil buyers; H. E. Wilson, office manager; and Miss Imogene Rindick, office secretary.

Texaco Has Shifted Four ID Officials To New Positions

Three promotions, and the creation of a new job in the industrial relations section of the producing department, The Texas Company, have been announced by E. R. Filley, general manager, producing department.

Smith started to work for The Texas Company at Breckenridge, in 1934 and, after holding various positions, was advanced to supervisor of industrial relations, West Texas division, on February 1, 1944.

E. E. Callaway, assistant supervisor of industrial relations, South Texas division, will succeed Smith as supervisor of industrial relations, West Texas division, effective October 15.

He was employed by the company at Wichita Falls in 1930. After various jobs he was made a safety engineer and assigned to the east coast and later to the Texas and New Mexico zone. On October 16, 1947, he was appointed to his present position.

M. C. Pitts, Texaco safety engineer with headquarters in Atlanta, Ga., has been named to replace Callaway as assistant supervisor of industrial relations, South Texas division, effective November 1.

E. L. McIntyre, safety engineer with headquarters at Fort Worth, will be transferred to the newly-created job of assistant supervisor of industrial relations in Callaway's office at Fort Worth on November 1.

FOOD FOURS INTO INDIA
NEW DELHI—(AP)—Almost 1,000,000 tons of the United States food loan will have reached India before 1951 ends—and the remaining 900,000 tons will arrive by March next year, Deputy Food Minister M. Tirumal Rao told questioners in Parliament here.

WILDLIFE SANCTUARY
HELSINKI—(AP)—Finland is taking steps to preserve its big game. Peter Krott, an Austrian forester, is planning a national park at Padasjoki where elk and other animals will be protected.

Six New Producers—

(Continued From Page One)
quarter of section 47, block 38, T-4-S, T&P survey.

Lawson Drilling Company has spotted three 7,500-foot tests in the Pembroke field. They will be in section 19, block N, H&W survey, Pembroke Land.

No. 1 Ralph Pembroke will be 600 feet from north and west lines of the southwest quarter of the section. No. 2 Pembroke will be dug 1,800 feet from north and west lines of the section and No. 3 Pembroke will be drilled 600 feet from north and west lines of the same section.

Cities Service Oil Company No. 1-AH University, opener of the Flat Rock Ellenburger field, has been plugged back and completed from the Spraberry for a daily flowing potential of 241 barrels of 38-gravity oil. Gas-oil ratio was 822-1. Production was through a 2 1/2-inch tubing choke and from perforations at 7,120-7,152 feet. Location is 800 feet from south and 1,980 feet from east lines of section 29, block 3, University survey.

Plymouth Oil Company No. 3 B. R. Greathouse has been completed as a one-location south extension to the Pembroke field. Operator reported a daily flowing potential of 135 barrels of 37.5-gravity oil through a 5/16-inch tubing choke.

Production was from perforations at total depth of 6,995 feet. Operator used 2,350 gallons of Hydracrac. Gas-oil ratio was 1,595-1.

Location is 1,980 feet from north and west lines of section 3, block A, C&S&R&NGO survey, Superior.

A slated 7,500-foot test will be drilled in the Pembroke field of The Superior Oil Company. It is No. 1 Krielow Estate, 600 feet from north and east lines of section 3, block O, E&A&R&B survey.

Kamp Drilling Company No. 1 Hunt, wildcat in Reagan County, is to be plugged and abandoned at total depth of 6,955 feet in the Spraberry. It tested all porous zones in the Spraberry without finding oil.

Location is 660 feet from north and west lines of section 11, block L, TC survey and one mile south and slightly west of Stiles.

FOREST ADDS FOUR NEW MEN TO GEOLOGICAL STAFF
Addition of four new men to the geological staff of the exploration department of Forest Oil Corporation's division headquarters in Midland was announced by Robert I. Dickey, exploration manager of the concern.

W. G. Moxey is the new assistant division geologist. He came to Midland recently from Amarillo where he had been doing consulting work. Formerly in Midland.

At one time he was on the staff of Stanolind Oil & Gas Company's West Texas geological department in this city.

In his new job Moxey will work directly with Dickey, who in addition to being regional exploration manager is also division geologist. To work Sub-Surface.

The three other new men are sub-surface geologists. They are W. R. (Ross) Moore who came to Midland from the Forest office in San Antonio; W. H. (Bill) Cobb, formerly with Seaboard Oil Company of Delaware and; Norman Walker, who had been employed by Shell Oil Company.

Both Cobb and Walker already were residents of Midland when they went to work for Forest.

B. O. Smith, supervisor of industrial relations, West Texas division, producing department, has been promoted to the office of L. J. Whetsell, assistant to manager of industrial relations in the producing department, and transferred from Fort Worth to Houston, effective October 8.

He succeeds Joe A. Hale, who has been assigned to handling land matters for the manager's office.

Started At Breckenridge
Smith started to work for The Texas Company at Breckenridge, in 1934 and, after holding various positions, was advanced to supervisor of industrial relations, West Texas division, on February 1, 1944.

E. E. Callaway, assistant supervisor of industrial relations, South Texas division, will succeed Smith as supervisor of industrial relations, West Texas division, effective October 15.

He was employed by the company at Wichita Falls in 1930. After various jobs he was made a safety engineer and assigned to the east coast and later to the Texas and New Mexico zone. On October 16, 1947, he was appointed to his present position.

M. C. Pitts, Texaco safety engineer with headquarters in Atlanta, Ga., has been named to replace Callaway as assistant supervisor of industrial relations, South Texas division, effective November 1.

E. L. McIntyre, safety engineer with headquarters at Fort Worth, will be transferred to the newly-created job of assistant supervisor of industrial relations in Callaway's office at Fort Worth on November 1.

Large Attendance Due For Symposium—

(Continued From Page One)

posium will be held in the auditorium of the Midland Senior High School. It was originally planned to hold these meetings in the Cowden Junior High School auditorium, but the large showing of interest in the symposium indicated that more space would be needed than would be provided at the Junior High School and the Senior High School auditorium was secured.

Pleanty Of Room
That building seats more than 1,800 persons and members of the steering committee think it will take care of the crowd which is expected to attend the study periods.

The Friday morning session will open at 9 a.m. R. C. Senning of El Capitlan Oil Company will preside. Friday Morning

Papers to be presented and the persons who will give them are: "History and Development of the Spraberry"—W. M. Osborn, El Capitlan, Midland.

"Stratigraphy and Structure of the Spraberry Sand"—J. H. (Jerry) Bartley, consulting geologist, Midland.

"The Relation of Fractures to the Accumulation of Oil in the Spraberry Formation"—George R. Gibson, Leeper and Cole, Midland.

"Drilling and Casing Problems in the Spraberry"—John Cox, Texas Crude Company, Midland.

"Mud Programs for Spraberry Trend Drilling"—W. S. Howe, Permian Mud Service, Inc., Midland. Friday Afternoon

L. F. Peterson of Keller and Peterson, Midland, will preside at the Friday afternoon meeting which is to start at 1:30 p.m.

Papers to be presented and the persons who will give them are: "Core Data Discussions"—Vic Ogden, Core Laboratories, Inc., and Jack Locke of Rotary Engineering Laboratories, both of Midland.

"Radio-Activity Logs Define Lithology in the Spraberry Formation"—Jack F. Myers, Lane Wells Company, Midland, and E. S. Mardock, Well Surveys, Inc., Tulsa.

"Reservoir Fluid Properties" —Ray Brack, The Ohio Oil Company, Midland.

"Unique Reservoir Characteristics—A Discussion"—Raup O. Fitting, Fitting and Jones, Midland; Lincoln F. Elkins, Sohio Petroleum Company, Oklahoma City; E. Charles Patton, Magnolia Petroleum Company, Dallas; and W. O. Keller and Peterson, Midland.

Saturday Morning
Joe B. Kennedy, Sinclair Oil & Gas Company, Midland, is to preside at the Saturday morning session.

Papers to be presented and the persons who will give them are: "Introduction to Spraberry Sand Completion Methods"—Harry E. Legendre, consulting engineer, Midland.

"Hydracrac Operations in the Company, Dallas; and W. O. Keller, Keller and Peterson, Midland.

"Acid Flushing of Fractures in the Spraberry Sand"—Bronce Bristol, Jr., The Western Company, Midland.

"Air Drilling of the Spraberry Sands"—(tentative)—O. H. Berry, Jr., and Bill Queenbury, both with the Walshire Oil Company, Inc., Midland.

A SALUTE to a GREAT INDUSTRY from Standard Oil Company of Texas

(Continued From Page One)

While the course is primarily being presented for members of the Permian Basin Personnel Association, other persons who are interested in such work may take the lessons.

A fee of \$15.00 per person is made to cover a part of the cost of the course. The lessons are presented through the Petroleum Industry Training Department of the extension division of the University of Texas.

Works On Personnel Matters
The Permian Basin Personnel Association is an organization of persons in the oil industry in this territory which concerns itself with petroleum personnel activities.

Edwards is a graduate of the University of Minnesota. He has held executive positions with several large industrial companies. He has taught a number of successful classes in the "Effective Speaking" course for other petroleum industry groups.

Short Course In Public Speaking Is To Be Presented
A five-day course on "Effective Speaking" will be conducted in Midland Monday through Friday under the sponsorship of the Permian Basin Personnel Association.

The meeting will be held in the Shell Oil Company conference room in the Petroleum Building.

OTHERS MAY ATTEND
While the course is primarily being presented for members of the Permian Basin Personnel Association, other persons who are interested in such work may take the lessons.

A fee of \$15.00 per person is made to cover a part of the cost of the course. The lessons are presented through the Petroleum Industry Training Department of the extension division of the University of Texas.

CONGRATULATIONS, all men of the oil industry!

Radio—Perfect Tool For A Fast-Moving Industry

"Better latch things down, fellows. There's a pretty fair-sized blow coming up."

Working feverishly against time, a small crew of men prepared themselves and their equipment for a storm in the Gulf of Mexico. They were working on a drilling platform 10 miles from shore, carrying on just one phase of the oil industry's constant search for new oil pools and oil reserves.

The storm warning was flashed to them by radio. Without it, lives and costly equipment might have been lost. With it, they latched things down, sought shelter themselves and when the storm was over, they resumed operations with little damage and little difficulty.

The brief radio message in this episode dramatizes the use to which the oil industry has been putting this invaluable means of communication. On offshore drilling operations in the Gulf of Mexico, weather forecasts play a vital role. They are sent to the rigs far out in the gulf twice daily as a normal rule, and as frequently as every two or

three hours during the hurricane season.

Industry Alertness

The way in which the oil industry has picked up and exploited this communications tool is symptomatic of its progressiveness and alertness. Because of the intense competition all along the line, oil men have been quick to utilize every means that will speed their operations and reduce costs—benefits which are transmitted to the American people in quality products at reasonable prices.

Exploration for oil often takes crews into wild and uninhabited areas, where there are no roads, telephones, or telegraph facilities. Crews deep in the swamps of Louisiana, for example, or the roadless badlands of Wyoming, keep in constant touch with the field office by radio, saving valuable hours in the reporting of data, coordination of results, and reallocation of crews.

New information and instructions can be transmitted quickly, and should an injury occur, helicopters or other assistance can be sent im-

mediately to bring the victim to the hospital.

Mobile Stations

Mobile radio stations used in the field are located in trucks, offshore drilling barges, or other vehicles operated by exploration, drilling, refining, or transportation crews. Equipment consists usually of a transmitter, receiver, antenna, and familiar units such as loudspeakers, microphones, and earphones.

FM, or frequency modulation, is the usual type of radio broadcasting employed. The older method of transmittal, AM or amplitude modulation, has far fewer available transmitting channels, and all of them are already heavily in demand by commercial stations. In 1949, the Federal Communications Commission established the Petroleum Radio Service, to coordinate and allocate radio activities of the oil industry.

Technical Tool

In addition to communications, radio also is used as a technical tool in exploration. One of the important ways of studying geological structures beneath the surface of the earth is to set off small explosions at the surface, and to measure the time it takes for the shock waves to be reflected back to the surface from the underlying structures. Radio is used in this operation to signal from the shot point to the recording equipment the exact moment the charge is set off.

In offshore mapping of underground formations, such as in the waters off Louisiana and Texas, radio provides speedy, accurate communications between ship and shore. The same fingertip contact is maintained with drilling rigs.

Boon For Pipeliners

In pipe line operations, too, radio has been a boon. Field maintenance crews keep in constant touch with the office, and are directed to new locations on the line without the necessity of returning to the office, or of having a messenger sent out. Leaks can be reported to the field office promptly, and repair crews dispatched within minutes of the discovery of the break.

In large refineries, too, covering as they do many acres of ground, radio is an important feature of preparation for fire and other emergencies. The oil industry has one of the best safety records of any major manufacturing industry, and a part of that good work can be credited

Surprise - Gasoline Easier To Buy Than Stamps Or Drugs

It's easier to buy a gallon of gasoline in this country than it is to get a postage stamp . . . or a prescription filled . . . or, as far as that goes, an ice cream cone!

Dotting the landscape from coast to coast are thousands upon thousands of service stations taking care of the needs of America's motorists. There are more of these service stations in the United States than there are post offices, drug stores and—believe it or not—places which dispense ice cream cones.

The vast majority of these service stations—95 per cent in fact—

are owned or operated by independent, small businessmen—and not by the oil companies, as many people may believe.

Emphasizing this fact is a survey by the U.S. Department of Commerce which covered the year 1948 and was released only recently. The survey showed there were 188,253 service stations in operation at that time, and of these, 179,917 were "single units . . . operated by a firm which operated only one store."

The independents dominated all key service station statistics in the federal survey. They accounted for 88 per cent (\$5,700,680,000) of the totals sales; 78.7 per cent (\$384,202,000) of the payroll, and employed 85.2 per cent (243,506) of the people working in the service station field.

Because of the extreme competition in the service station field, they ranked high on public service and courtesy. A public opinion poll some time ago showed that 60 per cent of the people chose service stations over grocery and drug stores as giving the best customer service.

Balmorhea Deputy To Get Assistant

PECOS—Reeves county commissioners last week appointed Bert Martin to assist Deputy Sheriff Casey Farrington at Balmorhea during the busy Fall season. His job will terminate December 31.

The commissioners decided also that Reeves County will donate to the salary of a secretary for District Attorney John Demmon. The secretary has not been hired.

Other counties expected to help pay her salary are Ward, Grant, Loving, Andrews, and Winkler.

We put the "Service" into "Service Station"

• With 50 million motor vehicles now on the nation's roads, service stations like ours are tackling the biggest job we've ever faced. Keeping you supplied with gasoline and oil is only part of this job. We pride ourselves on top service, not just during Oil Progress Week but every week of the year. This is our promise that in the days ahead we'll continue to be on the job for you—doing everything we can to keep your gas tank filled, your car serviced and rolling smoothly.

Congressman Beckworth Top Authority On Matters Concerning Oil And Pulp

By TEX EASLEY

WASHINGTON —(AP)—Congressman Lindley Beckworth of Gladewater, Texas, grew up among the forests of pines and oil derricks of East Texas, so it's befitting he has become a top figure here on matters concerning these two resources.

At 38 he is next to the chairmanship of the House Interstate and Foreign Commerce Committee, which is headed by 77-year-old Rep. Robert Crosser (D) of Ohio.

Taking his seat in the House Jan. 3, 1939, at 23, the minimum age for admission—the youngest to be sworn in in more than a century, Beckworth went on the Commerce Committee nine years ago. He is head of a subcommittee on newsprint and one of the committee's best authorities on petroleum problems.

The Beckworth Newsprint subcommittee, which recently met with newspaper publishers in New York and then looked over the big mills in Canada, has just issued a report which concludes that paper production will be adequate for the immediate future.

The long-range outlook, however, is much less certain and the committee says it will have to keep a close eye on the situation. It is considering plans for increasing newsprint production in the United States, as well as seeing what can be done to hike output of Canadian mills.

Observation Made
That the newsprint problem, which affects every newspaper and magazine in the nation, is more

worth plans to take his subcommittee and look further into the possibility of new mills being erected in this country. The group also may go to Mexico to check timber resources there.

The House resolution under which the Beckworth Newsprint subcommittee is operating instructs the group to study and determine whether any government agency is formulating plans for putting into effect:

1. Restrictions relating to the production or consumption of newsprint for book papers; 2. requirements respecting the grade labeling of commodities; or, 3. requirements intended to bring about simplification and standardization of production, marketing and distribution of commodities.

Should his committee go to Mexico, Beckworth says, it also will make a thorough study of the petroleum industry below the border. Shipments of oil from Mexico to the United States, which averaged 10,000,000 barrels annually in the last five years, leaped to 18,000,000 barrels in 1950.

CHURCH SUPPORT

BUDAPEST —(AP)—Catholic Bishop Lajos Shvoy of Szekesfeharvar has asked the priests of his diocese "to endeavor sincerely" to support the government-sponsored cooperative movement because "co-operatives are the future form of agriculture production." Last year Bishop Shvoy had been repeatedly attacked by the Communist press.

Competition In Oil Keeps Prices Low And Quality High

Were it not for progress made during the last 10 years in the science of finding, refining, transporting, storing and marketing petroleum, the next ten gallons of gasoline you put in your car would hardly leave enough change out of \$10 to stake the parking meter. That is exactly the situation in many countries where competition which spurs progress has been paralyzed by the imposition of government-owned monopolies and where, as a direct consequence, gasoline sells for as much as 90c a gallon.

If the price of American gasoline had increased at the same pace as that of other necessities used by Americans, you would be paying a lot more per gallon than you actually are. For example, retail prices of food in the first half of 1951 rose to 123.7 per cent above the average for the 1923-1929 period. If gasoline had gone up at the same rate, its average price, including taxes, would have been 43.50c a gallon instead of the 27.00c (national average) you actually paid for it.

Or let us measure the price of gasoline against the average for all

items in this country. According to the official Consumers' Price Index compiled by the United States government, all items have risen an average of 84.3 per cent above the 1923-1929 base period during the first six months of 1951. Despite the fact that oil companies had to pay those inflated prices for steel and other items, intense competition and technological progress held the rise in the price of gasoline to only 40.1 per cent or just a little more than half the increase on all other goods. If gasoline had gone up at the average rate, its mid-1951

NO COOPERATION

BUDAPEST —(AP)—Migration of manpower and lack of "work discipline" is called a "real shock" by Social Survey, monthly magazine of the Hungarian Communists. The number who leave their jobs has been increasing despite severe reprisals. The magazine complains that the workers are only doing six and a half hours work daily instead of the required eight. Absenteeism caused the loss of 40,000 tons of coal in July.

price would have been 35.8c a gallon, 8.5c above the actual price to the consumer.

DRILLING COSTS ZOOM

When Colonel Drake drilled the first oil well in 1859 to a depth of 21 1/2 feet, his hand-made tools represented an investment of \$74.50. In 1951, the cost of a rig for a 7,000-foot well in the Mid-Continent area was more than \$12,000. In Drake's day, this would have bought equipment to sink 1,464 wells.

The word lien signifies the right of a person in possession of property belonging to another to detain such property until some debt or demand in connection with the property detained is satisfied.

OIL PROGRESS WEEK

OCTOBER 14-20

Oil Progress means more to Texans!

This week the United States will focus its attention on the oil industry's contributions to the high American standard of living, to the nation's industrial progress, and to the national defense. *This is Oil Progress Week.*

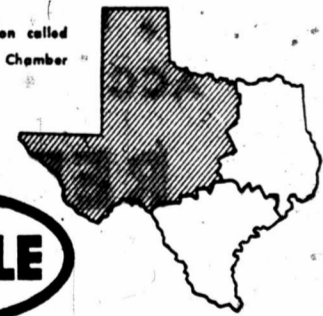

Texans know the story well: as home folks in the oil country, they share the oil industry's pride in supplying the resource that powers a major share of the country's industries, all its airplanes and automobiles, most of its ships and trains.

Texans realize, moreover, that oil's progress means even more to them than it does to many other Americans. For example, the value of the crude oil produced in West Texas* in 1950 was approximately a billion dollars. This is not "boom money." West Texas uses it to pay taxes, salaries and wages; it buys homes, groceries, light and heat; doctors collect a portion of it; landowners receive

royalty and lease payments; a sizable portion of it is reinvested in the further development of the region's oil resources.

In a word, the progressive development of the petroleum resources of West Texas has enormously stimulated its thriving industrial, commercial and agricultural development, and this is the *more*, the plus, that oil's progress means to West Texans. Modern, efficient production practices will conserve the oil and gas resources of the region, and oil's progress will continue to mean more to West Texas for many years ahead.

*The shaded area is the region called West Texas by the West Texas Chamber of Commerce.

Industry, Homes And Farms Benefited By Vast Growth Of Petrochemical Industry

Colonel Harvey Has Variety Of Interests

In less than a quarter of a century, petrochemistry has mushroomed from literally nothing to a billion-dollar-plus industry.

Spurred by the traditional competition of the oil industry to supply customer demand, it has been growing by leaps and bounds, particularly over the last 15 years. In 1950, the petrochemistry industry accounted for 14,500,000,000 pounds of chemicals.

The term petrochemistry is a contraction of petroleum chemistry. Its field is the great number of important organic chemicals that are being manufactured from oil and natural gas.

Just 25 years ago such priceless basic hydrocarbon raw materials as ethylene and propylene were being burned as commercially unusable by-products of the oil industry. But inevitably, as refiners perfected their techniques, they worked out ways of recovering these valuable substances, and even using them as bases for further chemical transformation.

Results so far have been little short of amazing, and the field is still developing. New petrochemicals are continually being introduced, as well as better ways of making old ones. Competition is keen. Old plants are being constantly expanded, and new plants are going up every day. The American people are reaping the benefits of this industry through more and better products at reasonable prices.

From an overall point of view, the two most important effects of the emergence of the petrochemicals industry, with its abundant reserves, have been the assurance of adequate supplies, and the stabilization of prices at a dependable level. Before the advent of petrochemistry, when organic chemicals were derived almost exclusively from such sources as coal, wood, and agricultural products, supplies were uncertain and unpredictable. Long-range planning was virtually impossible.

As late as 1933, for example, 86 per cent of all industrial alcohol was being made from the fermentation of molasses. Industrial alcohol is

essential in making lacquers, synthetic rubber, plastics, antifreezes, drugs, perfumes, soaps, inks, polishes and flavorings. Manufacturers of these products, however, could never foretell when the flow of Cuban molasses would slow to a trickle, sending costs of alcohol sky-high, and maybe even putting them out of business. Today most industrial alcohol is made from petroleum, and supply or cost seldom wavers.

Stabilizes Acetone Prices
Acetone, one of the most essential and versatile of industrial solvents, is another case in point. In the days when distillation of wood was the chief source of supply, cost and availability of acetone were unpredictable. Today hundreds of millions of pounds are manufactured, most of it from petroleum and the price is about \$1.2 cents per pound. During the last 15 years, its price has not varied by more than a penny or two from the \$1.2-cent level, due to the stabilizing influence of petroleum as a source of supply!

more than a stable and dependable source for existing materials; they are a source for materials which otherwise would not exist at all in commercial quantities.

For example, 30 per cent of the fibres used in the country are today being made from chemicals, most of them derived from petrochemicals. Typical of these new synthetic fibres are Orion, Dynel, Fibre V, and Chemstrand. They are useful in offsetting the wool shortages that continue to plague the textile industry.

Helps Agriculture
Agriculture is another field that has benefited from petrochemicals. Plant ravagers are today being held in check by petrochemical insecticides. New and more effective bug killers are being developed every year. Without such potent insecticides as aldrin, dieldrin, DDT, BHC, and D-D—each one of which relies on petrochemicals for some phase of its manufacture or use—American agriculture would not be so efficient and productive as it now is.

Plastics, synthetic rubber and detergents would be almost nonexistent without petrochemicals as a source of raw materials. These

products have become indispensable in the home and throughout industry, so that there is hardly a person in the nation who does not have daily contact with them in some form.

In 1950, the volume of chemicals made from petroleum and natural gas amounted to about 14,500,000,000 pounds—a phenomenal volume so far as chemical raw materials are concerned.

In 1926 petrochemical volume did not exceed 6,000,000 pounds. Demand for petrochemicals of all kinds is increasing rapidly, but the petroleum industry is confident that competition, constant process improvement, and unlimited raw material resources will enable it to meet these growing demands effectively.

DENVER—COLO.—Arthur Harvey, wealthy oil man of Midland, Texas, and Denver, has purchased the Keim's Frozen Food Lockers and processing plant at 4320 Morrison Road here and will spend \$50,000 on an expansion program. Also, Harvey announced plans for expansion of operations at the Tex-Harvey Farm near here. Twelve men now are employed at this farm.

Chicken broiler output will be increased from 6,000 to 80,000 and 1,000 steers will be fed at a time. Also included is the breeding of special milk and corn finished broilers. Tex-Harvey enterprises throughout the nation include oil company, drilling company, farms, water company, pipe line interests and gasoline plant.

We're breaking all records—to serve you

Petroleum means progress for you, for our community and for America. Today, demand for oil products on the home front continues to break all records. Supplying America's 50 million cars, trucks and buses is one of the biggest challenges the oil industry has ever faced. This is our pledge that we'll continue to be on the job for you — doing everything we can to keep your gas tank filled, your car serviced and rolling smoothly.

ALL FIGURES IN MILLIONS

COLLEGE ROLLS DOWN
The Newschart above shows gradual drop of enrollment in American colleges and universities as the new academic year opened. During 1947-48 enrollment reached its peak with 2,612,282 students, dropping to an estimated 2,250,000 for the 1951-52 session. Educators say the decline is caused by the draft, gradual elimination of the G.I. Bill of Rights, and financial worries on the part of many eligible collegiate freshmen.

Because nobles of the Middle Ages had no banks in which to deposit their wealth the Encyclopedia Americana says they had their gold and silver fashioned into ornate cups and vases.

It Hasn't Been Just...

that has made Midland County one of the nation's largest producers of oil!

CATCHES SHARK

ST. JOHN'S — (AP) — A seven-foot shark weighing 500 pounds was caught by John Lambert, fisherman of Cuchales Cove. He found the monster entangled in a mackerel net and said it was the biggest that had been caught in that way in his district.

Heavy Demand For Petroleum Brings Back Old Problems:

By EDD ROUTH
Associated Press Staff

The oil industry in the Southwest still fights problems that beset it when Spindletop was a youngster.

Conservation, transportation, refining—these and other problems have plagued oil men from Col. Ed. Drake's first well in Pennsylvania in 1859 to present-day holes that drop thousands of feet into the earth.

Oil men, generally, believe they are over the hump. But heavier demand for petroleum products, created by government stockpiling and normal industrial expansion, cause problems to recur.

When Texas' famed Spindletop blew in Jan. 10, 1901, oil operators didn't know how to cap a gusher. Previous wells had flowed gently. The new salt dome field in East Texas gushed crude oil at the rate of 3,000 barrels per hour for nine days while engineers worked feverishly devising a method to halt the flow.

This problem, and others of a rudimentary nature, were solved relatively fast. But the problems of wastage, moving and getting more from the oil persists.

Texas' crude oil allowable production has been set at another all-time high for October (3,115,512 barrels per day). This was an increase of 5,541. An extra producing day statewide, giving operators 25 days to flow oil during the 31-day month, accounts for the added production. The big East Texas field remains on a 19-day schedule.

More oil means more wells, men and equipment. Steel and experienced workers are becoming scarce, and oil men are bracing for the pinch.

Several hundred oil men met in Fort Worth recently to discuss problems connected with the giant West Texas Sprberry Trend. They discussed the idea of 80-acre spacing between wells rather than the conventional 40-acre plan. Thousands of tons of steel could be saved, they said. A committee was appointed to study the plan.

Goes West Rapidly
From Col. Drake's first well in Titusville, Pa., oil went west rapidly. In 1866 oil was discovered in California. Production spread from Pennsylvania, though Ohio, West Virginia, and briefly, into Illinois and Indiana. In 1890 southeastern Oklahoma entered the oil picture. Ten years later Spindletop definitely fixed the oil production center of the world in the southwest.

By 1910-11 the cracking process had been discovered; the model-T was driving Dobbin off the road. The motor age was just wheeling in. Oil fast was becoming the blood of the nation and the world.

Petroleum had been known and used since earliest times. The Indians in New York and Pennsylvania collected seepage oil for several years before the white man came. They called it "antonotons," which means, "oh, how much there is of it!" Early settlers in Pennsylvania collected and used seepage oil. George Washington listed in his will lands in Pennsylvania which contained a "burning spring."

Gasoline was not sought in the early days. It was called "volatile spirit" or naphtha and was considered the curse of the industry until the late 90's.

Products of the refineries of the 60's, 70's and 80's were kerosene and lubricants. Gasoline was a dangerous nuisance which contaminated kerosene, and occasionally

made lamps and lanterns explode. It is difficult to realize now that there were only four automobiles in the U. S. in 1894, and that in the same year the airplanes was simply an idea kicking around in the minds of the Wright brothers.

Mile From Field
The first oil refinery following the Drake well was constructed in 1860 about a mile from the field. There were scores of refineries built in the years after, but in 1901 when Spindletop came in there were only two refineries operating in the Southwest.

One was the (Strickland Refining Company (later the Magnolia Petroleum Company). The other was the Neodesha, Kan., refinery of Standard Oil.

By the time Spindletop came in near Beaumont many of the industry's basic problems had been solved. Ocean steamers had been specially built to carry oil, pipe lines already were in use and railroads were using the forerunner of today's horizontal cylindrical tank cars.

There still existed the problems of wastage, fire hazards and transportation.

The Interstate Oil Compact Commission was unheard of and the rule of capture was the only law oil people knew.

Wooden derricks were the vogue during that period, and it was then that Southwestern oil men experi-

enced one of their worst fires. On March 3, 1901, a spark from a passing locomotive ignited the oil stored in a 100 acre earthen reservoir around Spindletop. Col. Anthony Lucas, one of several men responsible for the discovery of

Spindletop, estimated that 370,000 barrels of oil were destroyed in the fire. No damage was done to the well, however, as the well head had been covered with sand as protection against such an emergency.

Service Pipe Line Starts Construction On 25-Mile Carrier

Service Pipe Line Company has begun construction on approximately 25 miles of 10-inch pipe line to connect the Denton pool in Lea County, N. M., with that concern's Wasson station in Yoakum County.

J. L. Burke, president of Service Pipe Line, said, "Rapidly increasing production in the Denton pool necessitates the construction of this new line. Under present plans, construction will be completed by November 1. The line will have an initial capacity of 50,000 barrels daily. Construction costs are estimated at \$550,000."

Denton pool operators anticipate considerable development in the next few months. The company laid a four-inch line to the pool in October, 1950.

Service Pipe Line Company delivers almost half a million barrels of crude oil, much of it from Texas, to refineries and connecting carriers daily.

Crosley and Hardy are the contractors.

The ocean contains enormous quantities of plankton made up of microscopic plants and animals and the nutritive value of the animal components is said to be equal to that of the best meat.

Petroleum Refining Progress Marked By Comparing Old Methods With New

HOUSTON—To see the importance of progress in petroleum refining, it is necessary only to compare the early refining days, when kerosene was the major product, with the present era in which petroleum supplies the raw materials for plastics, detergents, synthetic fibers, synthetic rubber, and refrigerants, as well as the fuels and lubricants which are more commonly known.

At Humble Oil & Refining Company's Baytown Refinery, a new research center, pipe still, and mechanical shop building have all been added in recent months. By November, two new plants for processing sulphuric acid will be in operation.

The new Baytown Research Center is perhaps the most significant addition. Besides the modern building itself, an ultra modern three-story plant, the research center also includes pilot units and service facilities nearby.

A pilot unit is a working miniature of an actual plant-sized structure designed to give the same "an-

swers" to experiments. Thus, the time and money spent on construction of large units can be saved until a process is proved.

In the new research center, chemists, physicists, and engineers experiment with such processes as fractionation, or the separation of various parts of a liquid mixture. Another vital subject for research is alkylation, the production of the high-octane liquid which is a major constituent of aviation gasoline.

Ringling Brothers has nothing on Humble when it comes to getting dozens of shops under one roof, for the new shop building in the refinery does just that—and it's air-conditioned and fireproof, too.

New Ideas Working
The shops building was designed to promote efficiency by putting all the mechanical craftsmen—pipefitters, machinists, welders, insulators, carpenters, instrument men, electricians, bricklayers, painters, blacksmiths, and tinsmen—under one roof. The building is divided into sections for each shop, and

amazing to an outsider, confusion is negligible. Overhead cranes travel the full length of the building, which covers two and a quarter acres. Fixed cranes handle local lifting and moving jobs. The increased efficiency comes in with the extra space available and the time saved when a repair job must pass through several shops. Each shop is as nearly soundproof as possible.

The newest large installation at the refinery is Pipe Still No. 5, one of the units in which crude oil is distilled. It replaces two old, less efficient units, and is especially planned to make better use of crude by producing more premium products and less of those of lower value. A complex, expensive structure, it required a year to be built.

Pipe Still No. 5 has a capacity of about 70,000 barrels of crude a day. Total pipe still capacity at the refinery, including the three other working units, is more than 220,000 barrels a day.

The two new acid plants now under construction will be headquarters for the processing of sulphuric acid to be re-used in the refinery. Instead of cooling acid in open coolers like those at the two old plants, the new plant will cool it in closed heat exchangers. Working conditions will be greatly improved. Both plants will have low maintenance cost because of the modern equipment and structural design.

Baytown Refinery has an ever-changing face, for new ideas are quickly transferred to working form in the plant. The refining process gets better with each innovation, however, and it sets the pace for progress in many other fields.

U. S. Oil Industry Outstrips USSR By Eight To One

If Russia's oil production is no higher in 1951 than last year, American oil men can produce as much crude oil in a month and a half as the Soviets did in the full 12 months of 1950.

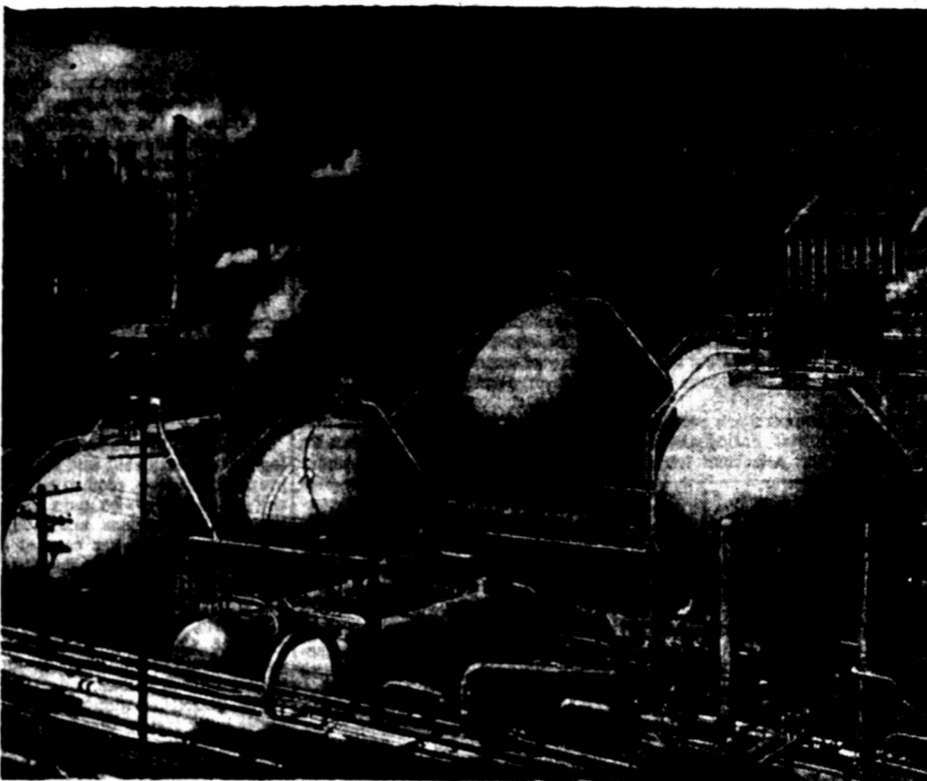

This fact was brought into sharp focus this past Summer when Russian newspapers announced that oil production for 1950 amounted to 37.8 million metric tons.

This is equal to 275 million barrels of 42 gallons each—the U.S. standard.

American production of crude oil in 1950 amounted to 1.9 billion barrels—a striking example of what free men in a free country can produce in comparison to slave labor and state control.

U.S. production for 51 days in 1950 equalled the Russian production for the whole year. At current rates of production, which have been increasing steadily as the oil industry provides more and more petroleum for the American people, the U.S. can equal Russia's 1950 production in 45 days or less.

Tropical snakes wound around tropical trees and turned to stone have been found in Northern Manitoba, Canada.

BIG REFINERY—A panorama of of Humble Oil & Refining Company's Baytown refinery includes hortonospheres, the silver tanks in the foreground, which are used to store light gases under pressure. The tall structure at center is a catalytic cracker where high quality gasoline components are produced. At left background is the naphtha fractionating unit which separates crude naphtha into parts, and at right background is the former Baytown Ordnance Works which, during World War II, made toluene for explosives. The ordnance works now produces gasoline and solvents.

Davis Visits Pecos On WTCC Business

PECOS—DeWayne Davis, agriculture and livestock manager for the West Texas Chamber of Commerce, was in Pecos Wednesday in the interest of that organization's program.

Davis, who gave up his newspaper work with the Tulla Herald, Swisher County weekly, to work for the

WTCC, said a tentative program calls for a bracero labor conference and possibly a mechanized farming conference in Pecos next year.

J. C. Wilson, prominent Pecos agriculture leader, was signed up as a new member of WTCC, Davis said.

The Oil Industry Is Breaking All Records To Serve You!

As the need for oil grows more acute day by day, the Oil Industry is sparing no effort to keep pace with this ever growing demand for both civil and military needs.

We of the Western Company are doing everything in our power to aid in every way possible. Our entire personnel is going all out to facilitate in any manner possible the production of Oil by the Industry as a whole. New acidizing and perforating stations are being established as they are needed and our highly trained specialists are giving unstintingly of their time and efforts.

Our organization is pledged to continue our endeavors to facilitate Oil Progress in every manner possible.

Progress

FOR A NATION ON THE MOVE

Whether you think in terms of horsepower for civilian needs or firepower for America's military men, you'll find Magnolia men and women on the job with other leaders of the industry, to meet record demands. For example, the oil industry is working hard to satisfy the growing appetites of 50 million motor vehicles which consume 40 billion gallons of gasoline annually. Despite this record use, the industry has known underground supplies of

30 billion barrels of oil. By constantly testing and improving our products, two gallons of gasoline today do the work three did in 1925 . . . even though they cost about the same and taxes are higher. With civilian use of oil reaching new peaks each month and military requirements increasing steadily, every week is oil progress week throughout Magnolia land. We are breaking all records to serve you and the Nation.

MAGNOLIA PETROLEUM COMPANY

One of the Flying Red Horse Companies

Your Progress and Oil Progress Go Hand in Hand!

Oil Men Nowadays Don't Want Gusher

The last thing any Texas oil man wants these days is a gusher.

Some people may think that spouting black crude is the symbol of the oil industry, but modern Texas oil men see it as something to be avoided because a gusher is wasteful—not only is oil lost, but so is valuable natural gas.

Gas can be used to produce oil cheaper than by pumping, and it can be utilized as a fuel and for the liquid fuels and raw materials it contains. Texas has led the world in conservation and the control of gas used in producing oil.

The role of gas in oil production is similar to the action of gas in a bottle of fizzy water. Release the pressure and the water is driven from the bottle by gas. When all the gas has escaped, the water is "flat" and won't bubble out.

When an oil well gushes, the same principle is involved. Crude oil is heavily charged and held under pressure by traps below the earth's surface. When a drill taps the producing sand, the gas pushes oil up the well, and it would spout over the derrick if drillers didn't use a lot of skill to prevent it.

If the new well is allowed to flow slowly under pressure from the gas, a lot more oil will be produced. It may take longer, but more oil ultimately will be recovered, and the gas can be taken from the oil at the wellhead and put to some of its valuable uses.

Oil is not produced from what is commonly considered a "pool," but is taken from a rock formation composed of porous rock, such as sandstone. This porous rock is soaked with oil, and can roughly be compared with a water-soaked sponge. This porous layer of rock is sandwiched between layers of harder, non-porous rock, which the oil and gas cannot penetrate.

The oil-bearing rock formations are slanted and their upper ends are plugged by a layer of harder rock or by a hump in the oil-bearing layer itself. Downhill from the "slug" of oil, and within the same formation, is a body of salt water, which has been subjected to tremendous pressure because of its depth. This water pushes the dissolved gas and oil tightly to the top of the rock trap.

When the drill taps the oil sand, or rock, the gas and water will push the oil up the well bore. If allowed to flow slowly, the gas and encroaching water will wash the sands free of oil. If it flows too fast, a lot of oil will be by-passed.

When oil has gas dissolved in it, it is lighter and flows easier. With no gas it is heavier and tends to cling to the sides of the rock pores so water cannot float it off. This is another reason why fields are produced slowly and the gas often is injected back into the oil sands and kept under control.

Today's oil man watches his gas-

ratio, water-oil ratio, and bottom hole pressure and maintains a carefully engineered balance between the rise of the water from beneath the oil and the release of gas from above it. The old gusher is out.

Conservation laws in Texas governing production and other aspects of the industry are administered by the Texas Railroad Commission. These laws include the regulation of the amount of oil taken from each field, so that owners of land above the same trap will receive a fair share of production, and yet, the reservoir of oil will be produced efficiently.

Oil men have learned, too, that these forces of nature which greatly aid production of oil could be supplemented. Extra gas and water is now pumped into the trap. This is called secondary recovery, because until recently such methods were not used until the wells had produced all they could by natural means.

Texas Railroad Commission engineers recently tallied 105 projects in important Gulf Coast fields where water or gas was being injected to maintain pressure and increase oil output.

In the mammoth East Texas field, engineers estimate that the ultimate recovery of the field will be increased by more than 600 million barrels as a direct result of the injection of salt water under the oil producing area. In addition to this recovery method, strict allowables and careful attention to the pressures in that reservoir will mean, possibly, billions of barrels of oil that would have never been recovered without such procedures.

Nowadays many new fields—Scurry County is a recent example—are seeing injection and pressure maintenance programs before their primary production period is over. The gas is now often made to do double duty.

At the wellhead, natural gas is separated from the oil, stripped of its valuable oil liquids, and pumped back into another well and forced through the rock pores again, bringing out still more oil. This is called repressuring, or pressure maintenance.

The plants at which the gas is stripped of by-products are called natural gasolene plants. Texas alone has 178 of the nation's 480 natural gasolene plants. The plants have a total liquid products capacity of 13,863,400 gallons daily and include such liquids as natural gasolene, and butane and propane, often referred to as LPG, or liquefied petroleum gas.

These natural gasolene plants are not to be confused with cycling plants, which operate primarily in a gas field, stripping wet gas of its liquids and then either selling it, or putting it back into the reservoir to store it or to maintain pressure

Production Taxes Bolster Treasury By \$126,000,000

Texas oil and gas operators poured a record 126 million dollars in production taxes into the State Treasury during the 1961 fiscal year, indicating the producers' tax share will be the highest percentage load on record, compared with other taxing groups.

Final comparative figures are not available, but preliminary calculations by the Texas Mid-Continent Oil & Gas Association indicate that, based on previous records, the Texas oil and gas producer carried a major share of the state's tax income during the fiscal year ended Aug. 31, 1961.

The state comptroller's recent report showed that during the 1961 fiscal year the petroleum industry

paid \$112 million in crude oil production levies and \$14 million on natural gas. The industry's ad valorem taxes, which usually make up about one-third of the state's property tax yield, possibly were more than 11 million dollars.

The significance of the role of oil and gas producers in financing state government is shown in 1960 figures, which reveal that 93 million dollars paid by oil and gas operators amounted to 54.1 per cent of the state's total tax revenue, exclusive of consumer taxes, such as those on gasoline, cigarettes, cosmetics, etc.

Production taxes on Texas oil and gas operations are levied through an occupation tax, as it is called under

the law. The present rate of taxation on crude oil is 4.6 per cent of the value of the oil produced. On natural gas the rate is 5.72 per cent. For administrative purposes the state also levies a tax on three-sixths of one cent on each barrel of crude oil. The occupation tax is a percentage levy on the gross sales of the producer. It allows no deductions of any kind.

The additional natural gas gathering tax of 0.45 cents per thousand cubic feet, which went into effect Sept. 1, 1961, is expected to raise 12 million dollars to keep the state's treasury out of the red for the next two years.

In addition to its share in financing state government and education programs through production taxes, the oil industry also pays ad valorem and franchise taxes. About one-third, or 34.5 per cent of the total ad valorem taxes paid into the treasury in 1960, came from oil and gas producers. The state ad valorem taxes paid by the industry were about 10 1/2 million dollars while franchise taxes amounted to more than 3 million dollars.

The petroleum industry operates under a tax system that is different from most other businesses in that the oil and gas operator is taxed under a set rate and the amount paid by him cannot be passed along to consumer.

There also is a heavy tax on gasoline, the industry's principal product, but this is not included in the following analyses because the gasoline tax is paid directly by the consumer.

During 1960 Texas oil and gas operators continued to absorb a major share of the cost of state programs. A study of the funds used for state educational purchases shows that the petroleum industry paid 33.3 per cent of the \$60 per scholar received by the public schools from the Available School Fund.

During the 1960 fiscal year, 69 million dollars was made available to the Foundation School Fund. Of this, 34 1/2 million dollars came from the oil and gas industry, or 50 per cent of the total. Of the funds appropriated during 1960 for the University of Texas, almost one-half were derived from oil and gas taxes. Appropriations to other state colleges carried a similar share of oil and gas tax money.

Almost half of all the appropriated money for educational institutions, correctional institutions, and state hospitals, as well as many administrative agencies, came from the Texas oil and gas industry.

Not included in the analyses of these funds, which are based only on direct taxes on the industry, is \$18,926,260 that went to the Permanent School Fund and to the Permanent University Fund from lease rentals, bonuses, and oil and gas royalties.

The petroleum industry also continued to play a major role in financing state welfare. State contributions to assistance to the aged were \$1 million dollars during 1960. The industry's share in this was 16.3 million dollars or 62 per cent. The industry paid 54 per cent of the 10.4 million dollars that went into the Teachers Retirement System during the year.

BRITISH PAY DISPUTE
SINGAPORE —(P)—Thirty thousand civilian employees who work for the British armed services in Singapore, are drafting their own "ultimatum." The Singapore Federation of Services Unions announced it is cabling to the heads of the three services ministries in the United Kingdom, demanding settlement of their wage and other disputes. The workers concerned are employed by the army, admiralty and air ministry local staffs.

HOT DRESSER
NEW WESTMINSTER, B. C. —(P)—An easily-chilled tenant who smuggled an electric heater into his basement is looking for new lodgings. He hid the heater in the bottom drawer of a dresser and forgot to turn it off. Firemen were called to put out the blaze.

The United States produces about 80 million pounds of oyster meat a year.

Crude Oil Is Talented

What's a barrel of crude oil? What can it do for you—the consumer of an average of 680 gallons of oil per year?

A standard barrel of crude oil contains 42 gallons. With public demand and market requirements setting the pace, the average barrel of crude oil emerged from the refinery in 1960 in this manner:

Gasoline:	18 1/2 gallons
Kerosene:	2 3/4 gallons
Distillates and gas oil:	80 gallons
Residual fuel oil:	8 1/2 gallons
Lubricants:	1 1/2 gallons
Residue:	40 gallons

Translating these products into everyday benefits for the householder, the motorist, and other consumers of petroleum, here's what a single barrel of crude oil will provide:

Enough gasoline to operate a popular make automobile for at least 270, and often as high as 350 miles.

Enough motor oil to fill a crankcase, good for a minimum of 1,000 miles.

Enough light fuel oil to supply an average home with heat and hot water for at least two days;

Enough residual fuel oil which, if converted to electricity, will furnish an average home with electrical power for more than two weeks.

Enough kerosene to do the cooking, roasting and baking for the average family for five days—in round figures, 60 to 80 meals.

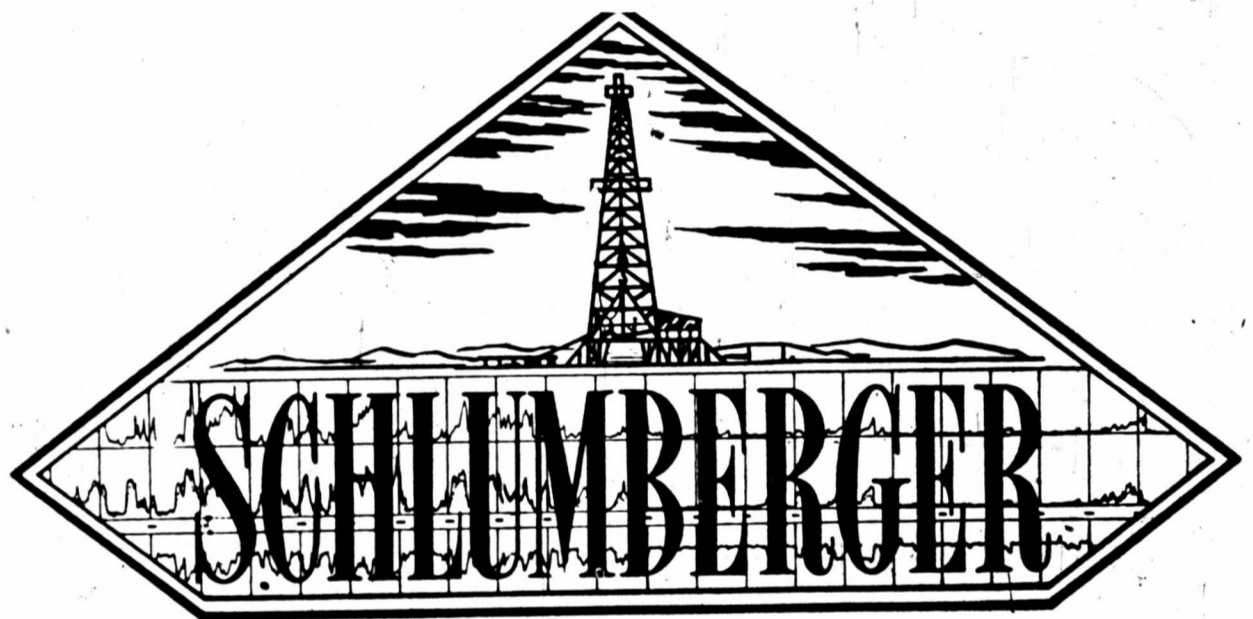

That, in itself, is an amazing flow of good things from a single barrel of crude oil, but still left over are four gallons of residue which can be converted into asphalt for streets and highways, or petroleum coke, or other selected products.

Currently the oil industry is producing more than six million barrels of crude oil per day. Spurred by the intense competition which is traditional within the industry, the nation's oil men are setting new highs continuously in their operations to provide the American people with all of the petroleum products they want, where they want them and when they want them.

'COPTER CARRIER IS NOT QUITE A FLAT-TOP—Anchor a few helicopters on the 327-foot-long deck of an LST (Landing Ship, Tank) and you get a new naval vessel—an aircraft carrier for 'copters. It's not quite a flat-top, but the versatile landing craft does yeoman service as a floating air base. Here a veteran 'copter named "Old Dad" revs up its tail rotor preparing to take off. (U. S. Navy photo from NEA-Acme.)

Texas' Biggest Oil Hunt Taking Place

The biggest hunt in Texas' history is taking place. All over the state shooting parties are hunting for traps—traps that are full of oil. But these traps are a mile or two below the ground and the hunters have to shoot from the surface.

Oil in Texas once was found by accident, or because it seeped to the surface of springs or leaked into water wells. But the days of finding oil by accident are gone. Men now hunt for oil using every branch of science and a program of drilling thousands of wells a year. According to the Texas Mid-Continent Oil & Gas Association, Texas operators drilled about 14,500 wells last year as part of this search and about 21 per cent of those were wildcat wells in unexplored areas.

Oil traps are peculiar combinations of rock formations that occur thousands of feet underground. The word "pool" is a holdover from the days when men thought oil existed as underground lakes or rivers. Now

ing its formations into different types of land surfaces, the mud layers were squeezed into many different types of rocks.

Absorbed Like Sponge
The tremendous pressure squeezed the oil into nearby layers of porous sandstone or limestone, which absorbed it like a sponge. There was salt water all through these layers of rock and it pushed the oil upward when the formation was on a slant.

This process probably took millions of years. The porous layers became twisted on a slant as the earth's surface buckled into mountains, valleys, domes, and basins. As more mud settled, the ocean floor filled up and finally emerged above the surface.

An oil trap may be in the top of a wrinkle in porous rock, which has directly above it a layer of non-porous rock. Or, it may be in what is called a "stratigraphic" trap, where the upper-end of a layer of

oil-bearing rock thins out into non-porous rock.

Locating these oil traps has become an expensive and challenging science. At mid-year, about 153 seismograph crews and 19 gravity meter crews were operating in Texas. Monthly operating costs for these geophysical exploration crews are about \$20,000 for seismograph and \$4,000 for gravity meter.

To shoot for a trap, the crew drill small holes in the ground and set off dynamite charges at the bottom. This causes shock waves to travel through the various rock layers, which in turn are recorded on the delicate seismograph. Waves travel at various speeds through the different rock layers, so by timing the waves and measuring their strength, the crews can measure the depth and thickness of the porous and non-porous rock layers.

Measure Dips, Convulsions
In this way they can measure the dips and convulsions of the old ocean bottom. Their shooting and mapping is completed when a study of the layers indicates a combination of conditions likely to form an oil trap. Then, that is the place to drill a wildcat well.

But there is a catch. All traps do not have oil in them, and there is no device to determine the presence of oil except the costly method of drilling. The hunters have to locate the trap. Only the drill is proof of what is there, as evidenced by the fact that of the 3,443 Texas wildcat wells drilled in 1930, a total of 2,738 were dry holes.

The risk involved in drilling is why the oil business still is so financially hazardous. A conservative estimate of \$10 a foot is a lot of money to put into a well that may find nothing but salt water after drilling 4,000 feet or so. Texas operators lost an estimated one-quarter billion dollars in 1930 as a result of dry holes, which had a total footage of 22,554,980.

But shooting for traps still is the basic way of hunting for oil and the current high demand for petroleum from civilian and military sources has put a record number of oil-trap shooters to work all over Texas this year.

Radios Becoming Smaller And Smaller

NEW YORK —(P)—Radio sets are getting smaller and smaller.

One of the latest designs, fitting the palm of the hand, weighs but eight ounces. Its case measures only two and one-half by five and three-fourths by three-fourths inches. The "loudspeaker" is a small earpiece, while the antenna, 18 inches long, collapses into the set and at the same time turns it off. Batteries are of the small hearing-aid type. Two tubes and a crystal detector are used.

The set is declared to have a broadcast range of around 50 miles.

Plankton in an ocean space about the size of a football field and five feet deep would be needed to meet the nutritive requirements of one person for one day.

West Texas 'Bigness' Reputation Lived Up To In Petroleum Activity

West Texas has a reputation for wide open spaces, broad-hatted cattlemen, and mushrooming oil towns, and manages to live up to its name, at least where oil is concerned.

Leading the state in 1930 in oil production, the number of producing wells completed, and total footage drilled, the West Texas area shows signs of becoming even more important in the oil picture during the next few years.

A big reason for this prediction is the significant Spraberry Trend, which promises heavy production in Upton, Midland Reagan and Glasscock Counties. Estimates on possible productive acreage range from 800,000 to 2,000,000.

The story of Scurry County has been told again and again. Another relatively new production area is Fort Chadbourne field, estimated to be the beginning of some 10,000 potentially productive acres. Fort Chadbourne is in Runnels and Coke Counties.

The following is a report of the number of barrels of crude oil produced daily in West Texas counties during 1930:

Andrews, 95,817; Borden, 8,831; Cochran, 31,281; Coke, 8,130; Concho, 1; Crane, 46,254; Crockett, 19,985; Dawson, 5,770; Ector, 135,628; Gaines, 27,234; Garza, 9,425; Glasscock, 3,552; Hale, 6,254; Hockley, 47,870.

Howard, 19,145; Irion, 47; Kent, 4,108; Kimble, 15; King, 2,385; Lamb, 870; Loving, 1,499; Lubbock, 200; Lynn, 62; Martin, 253; Midland, 3,241; Mitchell, 2,150; Pecos, 48,204; Reagan, 6,512.

Reeves, 2,411; Runnels, 5,689; Schisler, 972; Scurry, 106,321; Sterling, 349; Sutton, 1; Terry, 2,138; Tom Green, 3,269; Upton, 21,506; Ward, 13,599; Winkler, 48,929; Yoakum, 44,437.

West Texas first appeared in the petroleum picture when several large fields were discovered in the Permian Basin: Big Lake, McCamey, Yates, and McElroy. It became the largest producing area in Texas in 1924, but its percentage of the

state's output was reduced in the 1920's by East Texas and large coastal fields.

Increasing demands brought about a great expansion in West Texas during and after World War II. It is primarily a producing area, with only a few refineries. Most crude from the area is moved north to mid-continent refining centers or to the Gulf Coast for processing

or shipment to the East Coast and foreign countries.

As of Jan. 1, 1931, West Texas had 30,007 producing wells, about a fourth of the state's total of 124,081. Crude oil and condensate production in 1930 was 767,403 barrels daily, as compared with the state's average daily production of 2,276,450 barrels. These figures grow most important in light of the fact that

Texas oil wells supply about half the United States' total production.

In wells completed last year, West Texas had 3,254, more than four-fifths of which were producers. This is a much smaller portion of dry holes than the state's average of a total of 27,015,051 feet was drilled in wells at an average depth of 5,135, slightly higher than the average for Texas wells.

Serving The Petroleum and Construction Industries

with the finest in complete Sheet Metal Work

We take pleasure in congratulating the Oil Industries of the great Permian Basin—and are proud to be of service in their outstanding accomplishments. On the occasion of Oil Progress Week, we wish to pledge our continued support of the Oil and Building Industries with the finest products and workmanship to help build an even greater Midland and West Texas.

New Methods Tried Under Actual Oil Field Conditions

HOUSTON—The word "research" conjures up a picture of white-coated technicians bending over microscopes and instruments, and this, indeed, is one of the outward manifestations.

In the oil industry, however, the problems don't stay in the laboratories long. New methods and techniques are tried out under actual working conditions, for results often can mean millions of dollars to a company.

Automatic drilling equipment is one result of research which already is paying off for Humble Oil & Refining Company and shows signs of being advanced even further.

On an automatic rig, switches and control boards substitute for much of the manual labor of earlier days. For example, when drill pipe is being pulled out of the hole or screwed up to go back in, the derrickman need no longer steady it by leaning far off his monkey board, the little perch 90 feet above the rig floor. Instead, he can stack and unstack drill pipe merely by operating a hand lever.

A new automatic drilling control, installed at the surface, keeps the bit digging at its fastest by placing uniform pressure on it through all formations. The driller is thus relieved of manually attempting to keep the weight constant, a task he could never hope to do perfectly.

The automatic driller becomes even more valuable as drilling goes deeper, for then the drill pipe becomes longer, heavier, and harder to manipulate. Drilling in general is getting deeper every year, so the automatic driller is proving profit-

able. Research on bits, another factor in drilling, has come forward with such devices to save time and money as the jet bit. When drilling mud is forced through its nozzle at extremely high velocity, the bit is able to drill faster and last longer. (It gets its name from the "jet" of mud.) The mud flow is directed at the chip of shale or sand which curls up in front of the bit blade when drilling, so that resistance to the bit is lightened.

Rock bits and diamond core bits also have come into common use in recent years. Both are particularly important in drilling extra hard formations such as the chert, limestone and dolomite of West Texas. Diamond bits, as their name suggests, are set with several hundred black industrial diamonds apiece, and cost thousands of dollars. They earn their keep, however, in increased drilling speed.

Another Humble development, this one a boon in barge drilling, is a new type portable rig. Formerly, when a rig was used for drilling from a barge, it was attached more or less permanently, and could not practically be removed and used on land. Now a rig has been developed which can be used equally well on barge or land. One is already in operation in Southwest Texas, off the coast of Rockport.

Old time, sea-saw walking beam pumps on producing oil wells may be replaced with some new scenery soon, for a hydraulic long-stroke pumping unit has been invented to do the work of the walking beam. The new pump is a tall cylinder

atop the well, operating by water pressure. It is designed to give longer life to equipment by pumping in deeper strokes, thus cutting down the number of reverses in stress which wear out equipment. It is expected to be especially useful on deep wells.

Engineering techniques are the subject of constant research, too, as witness the building of a drilling rig and road at a well location in Southwest Texas—but transportation to the location was all by platoon ferry.

Construction of a bridge to the well site, located on a peninsula in San Patricio County, was ruled out for reasons of time, and marine transportation would have necessitated dredging and costly dock facilities. The ferry proved to be the ideal solution.

Across the Nueces River, on the ferry, were transported road-building equipment and materials, the derrick (in sections), and all the rig equipment necessary. Average round-trip time was seven minutes.

Another unusual engineering operation which proved successful for Humble was the use of photogrammetric surveying methods that enabled the Louisiana Division to map two coastal marsh areas of about 80 square miles for less than a tenth of the cost of conventional ground surveying methods.

Small lakes and shallow channels and bayous divide the areas into numerous inaccessible little marsh islands.

Photos Correlated
Aerial photos from the United States Corps of Engineers were cor-

related with ground locations which could be plotted accurately on the maps. With the corresponding points located both on the maps and photographs, the topographic detail from the photographs was transferred to the maps.

Refining research is in a class alone, concerned with what happens to crude oil after it is taken out of the ground. At Humble's Baytown Research Center, opened early this year, technicians study fractionation (separation of components in a liquid mixture) catalysis, and many other processes. To develop an idea, they may use a "pilot plant," a small-scale unit built exactly like a full-sized one but used for testing.

Research and progress in the oil industry have more than one incentive—besides the urge to stay ahead of competition, oil men keep on with research because the field is unlimited.

Pastor Begins 13th Year Sunday

PECOS—The Rev. W. M. Turner Sunday will begin his thirteenth year as pastor of the First Baptist Church here. He served the Pecos church from 1935 to 1941, and has completed his second six-year period of service, having returned to Pecos in 1945.

Sunday School enrollment when Mr. Turner took over in 1945 was 285. Today it is 846. During the last six years, 259 persons have joined the church by baptism. 621 by letter, making a total of 880 additions, or an average of more than two a week.

John Hogan Named Pecos City Secretary

PECOS—John A. Hogan, division storekeeper for Community Public Service, last week was named to replace City Secretary Dub Martin, who announced his resignation September 17.

Employed by CPS for the past two years, Hogan will give his company a two-week's notice of his departure, and then will go on the city payroll as assistant city secretary until Martin leaves, probably on November 15. Martin was asked to remain on the job to acquaint Hogan with duties of the office. The outgoing secretary plans to accept a selling position.

Hogan, 28, is married and has two children. He is a 1949 graduate of Baylor University, and a Marine Corp veteran.

COP IN A CAB

OMAHA—A rookie police patrolman decided to resign from the Omaha force rather than face charges of "unbecoming" conduct after Police Chief Henry Boesen caught him covering his beat in a taxicab. The rookie's explanation was that he was delayed and took a cab to reach his phone by check-in time.

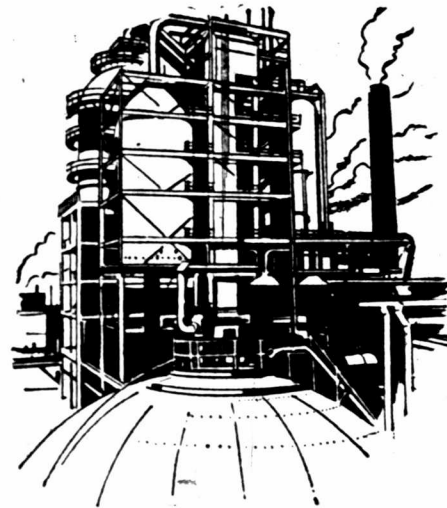

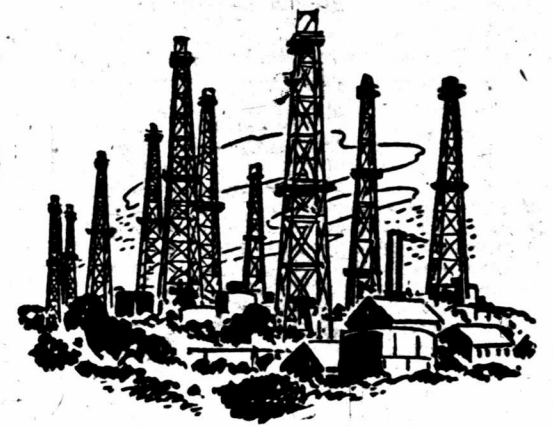

Because of differences in elevation, New Mexico has climates comparable to the lower Hudson Bay area and that of New Orleans.

Many buoys used to mark obstructions at sea have had to be redesigned to make them more visible on radar screens.

It is estimated that about 1,000 U. S. children lose the sight of an eye each year because of play with dangerous toys.

In a coal mine it is common for four tons of air to be blown into the mine for every ton of coal removed.

BARREL AFTER BARREL

... after barrel of oil—the vital fluid that flows through the veins of industry . . . fundamental source of power for the myriad of machines that mean better living for all Americans and a stronger defense against our enemies. We salute the oil industry, and we're proud of the part that we play in helping to build the industry and to keep its all-important wheels of progress rolling.

New Acid-Kerosene Gel Is Spraberry Production Aid

A new type acid-kerosene gel, developed by Dowell, Inc., and used as a process called Strata Frac, is stimulating production in the fabulous Spraberry Trend.

For want of an official name for the new process, Dowell adopted Strata Frac for the gel treatment which especially was invented for treating of the famous Spraberry Sand.

Good results have been obtained in all treatments.

It may be a forerunner of several gels and processes for getting greater productivity from the Spraberry, Dowell engineers believe.

It has been tested on six wells in four fields and proved successful each time. It was used in one well each in the Bendum and Midriff fields and two wells each of the Driver and Tex-Harvey fields.

Thus it was proved that the treatment is good throughout a spacing of the long Spraberry Trend. Test wells were purposely spaced to prove this.

Born in Laboratories

Strata Frac was born in the laboratories of Dowell. It is young, being less than a month old.

Quantities of the gel used have varied from 1,500 to 4,000 gallons per job with from one-half to one pound of sand per gallon being mixed into the gel.

The new gel has excellent sand carrying properties and is a good solvent for the petroleum residues and works against the calcareous material present in Spraberry formations.

In addition, it does not require any breaker fluid and a well can be put on production or operating immediately after treatment. This is especially interesting to operators as it cuts down expensive "rig time."

The best well where Strata Frac was tested, increased flow from one barrel of oil per hour to 35 barrels per hour after treatment.

Engineers say the process will greatly aid to recover "oil in place" in the Spraberry. Use of Strata Frac will be tested and used in other formations and fields other than the Spraberry.

In Various Fields

Its contents are flexible for use in various fields.

Strata Frac, the process, involves mechanical and chemical action. The mechanical action is abrasive and attacks the fractures of the sand and the cropping agents. The chemical contents are strong solvents and get at the calcite lining of the fractures and also they are a solvent against petroleum residues and calcareous materials.

Unique to Strata Frac is the mud acid of the gel. The mud acid attacks the mud and cement residues. Sand will stay suspended in the gel indefinitely.

The gel is pressure pumped into a well. As stated, it does not require a gel breaker as it will liquify itself by chemical action.

The gel is a gelatinous creamy looking liquid. Its development and success in testing has revived Dowell's treating station at Midland and six men will be moved here to operate the treating station.

Dowell maintained a treating station here many years for other procedures. The bringing out of Strata Frac gel means more activity at the Midland station. Also there will be stations at other points in the Permian Basin.

Equipment for getting Strata Frac to the well includes a 2,000 gallon tank trailer, a mixer truck and other semi-trailer moving units.

What's Wrong With Being An Oil Firm?

By ERNESTINE ADAMS
Managing Editor

The Petroleum Engineer

I'm getting tired of hearing about those "rich oil companies." I'm getting tired of hearing former Secretaries of the Interior Harold Ickes talks about rich oil companies growing "merrily wealthier out of oil belonging to the whole people," and tired of columnist Drew Pearson shuddering piously every time he mentions an oil company or an oil man. I'm getting tired of the implication that for an oil company to exist is an affront, and for one to be rich is sinful.

Will someone tell me what is wrong with being an oil company or with an oil company's being rich? How long do you think an oil company would last if it didn't handle a lot of money? It takes barrels of the stuff just to keep a company going.

What's Do It?

And who is going to find and produce and process oil if not the oil companies? The Socialist answer is—the government, but no government yet has been able to build a successful oil industry although lots of them have tried. The Soviet government, for instance, has the greatest potential oil resources in the world, and it runs its own industry as you have probably heard. Do you know how much gasoline you would get for your car if all our cars were in Russia and you got a full share of all that was made? You would get less than 5 gallons a year! That's a year—not a week or a month. Now how would you like that? Actually you wouldn't get a gallon because it is all reserved for government and the war machine. In the U. S. you buy on the average nearly 700 gallons of gas a year for your car and there is no shortage to stop you.

Where do the oil companies get their money? Out of the earth? Oh, no. That's where a lot of people make a mistake. Oil brings wealth only as it is transformed into useful goods. The oil companies get their money right out of your pockets. They coax it out of you with the biggest bargains on the face of the earth. You can have all the gasoline you want and at the world's lowest prices. You can have varnish and insect spray, synthetic rubber and machine oil, nail polish and floor wax. You can have gas in your house and your factory, and if the pipe line doesn't connect, you can have liquid gas in tins to hook on your stove or refrigerator.

In Nylon Ties

You get some products you didn't even know had petroleum in them. It is in your soap and detergents (Oh, wonderful oil companies that thought up detergents!) It is in your nylons to prevent runs, in your lipstick to keep moist, in covers of your books to prevent cracking, in your raincoat, your shoes, your medicine, your paper lamp shade, your roof—on and on and on you can go.

In fact, let's face it—you pay the oil companies billions of dollars a year—about seven billion last year—for all kinds of things that make it easier to live.

And what do those bloated capitalists do with those buckets of green backs, you'd like to know. First they have almost 2,000,000 employees who get the biggest dip into the kitty. Employees get paid better than most which is as it should be because a lot of them have to have a technical or scientific education and years of specialized training. There aren't many strikes, you'll notice, and the rare ones they have are in the refining industry. In the drilling end things are free and easy. If you go broke drilling dry holes, you may be working for your driller next year. Plenty of roughnecks or roustabouts think they'll have a rig of their own one day and a good many in the industry who look as though they never saw a shovel have dug many a slush pit in their day.

Get Big Pay?

These big wheels get big pay—about on the level with other industries, except that there are more of them. There aren't many automobile companies, for instance, but there are a bunch of big oil companies and thousands of little ones. The Oil Information Committee says there are 38,000 companies in the industry.

Well, to get on with it, they've got some billions left after paying the

help, so they give Uncle Sam his—which means a few billions. The oil industry pays the biggest tax bill of any industry. In fact, some three and one-half billion a year goes for federal, state, and local taxes levied on the oil industry and its products. This is about 7 per cent of all taxes paid.

Yet President Truman calls this "gross undertaxation" and all the "gimmie" boys chime in. What do they want? A crippled industry that has to be propped up by government subsidies?

If a profit is made—it isn't always—the stockholders get theirs. Since you customers are so steady now, the dividends over the years average up about like preferred bonds. This takes care of several million more people who have their hands—or money, that is—in the oil business.

Drill Anywhere

With the billions that are left the oil company does as fast a job of getting ahead as you're likely to find. The companies drill holes any place that looks as if it might have oil. They drill as deep as four miles, they drill in the desert, in the jungle, in the ocean; the derrick may be standing in sticky waves of heat or may be covered with thick ice. They drill where savage tribes have wrecked the rig, and where a plane has to bring in the machinery. They got no sense at all. Oil is where you find it, they say. They spend buckets of money. They spend a million and a half sometimes for one hole and get no oil, either. They spend millions just to find out where to put the drill down. They pay some more millions to a million or so other people for the privilege of using their land to drill on. If the drill hits an oil sand, they give the owner of the land a proportionate share of the oil they find.

And what if the oil is next door to the end of the world with no customers in sight? They build a pipeline to the sea or to a refinery which they also have to build, then build a harbor so the tankers they build or buy can take the oil to you customers. They have to put up a lot of cash before you drive into a filling station and say "Fill 'er up." It may be a year or two before the money begins coming back. It may be 10 years. It may be never.

Separate Molecules

Of course, you have no use for that black crude oil, and so the refining comes in. This process takes tons of crude oil and separates the molecules, then pieces them together to give them a new look. There are plants that do one thing—like separate gasoline from gas, and plants that do dozens of other things. There are plants that make powdered sulfur out of gas and plants that only process materials for other plants that make dyes, plastics, explosives, or drugs.

A refinery is always expanding, renovating, adding, experimenting, and revising. It has to keep ahead of you customers—it has to provide more gasoline in the Summer and more fuel in Winter from the same spot and with the same grade oil. The inventions in this line come so fast and furious that you stay in there pitching or go broke. So the oil companies part with a few more billions because they have to keep up.

The companies also hire some of the top scientists to study how methods in the industry can be improved and how better products can be made. They have to have big laboratories and smart technical staffs. They have laboratories that work only on agricultural uses of petroleum and laboratories that test a hundred uses of petroleum in everything from paints to pavements. They spend about one-fourth what all U. S. industry spends on research.

Since the war, the oil industry has spent \$12 billion making improvements and expanding facilities. In the U. S., the oil industry now has an investment of \$32 billion, or \$200 for each man, woman, and child in the nation.

Do they expect to make this lowering investment pay? In time, yes. And then what will they do with the buckets of dough they will make, these rich oil companies?

What they've been doing all along. Drill more wells and find more oil so we won't run short in peace or war.

Build bigger and longer pipe lines from fields to refineries and from refineries to customers so the supply is always available.

Construct better refineries to make fancier products that will fill more needs in your life.

So you see why I'm tired of hearing about rich oil companies. The people are getting the people's oil and gas resources—more people are getting more than under any other plan ever devised. Several millions of persons are getting benefits from oil and gas operations in wages and salaries, dividends and royalties, pensions and contracts, profits on sales and commissions.

Everyone Benefits

Everyone in the U. S. benefits from the use of low cost petroleum products—a use that has launched and shaped our modern life.

The whole world benefits from the fact that oil resources grow in the hands of free enterprise and stagnate under the thumb of government monopoly. The whole huge Communist world has about nine per cent of the world's production of oil—the free world has 91 per cent, all developed by individual capitalist oil companies, which spend to good effect the riches we pay them for their goods.

So let's give the oil companies their due and admit they provide us the best service ever given on developing oil and gas reserves and transforming them into useful and vital products.

Water Plays Vital Role In Oil Well Drilling Operations

No water—no oil field. Ask any oil man the importance water plays in drilling operations of the industry.

As much as it deals with oil, the Tex-Harvey Company also is in the water business.

The Tex-Harvey Water Company serves the Tex-Harvey Field in the rich Spraberry Trend area. Its product simply is—water.

The water is obtained from a source five miles southeast of Midland and is pumped by pipe line to the oil field, 14 miles away. There it is sold to operators.

The Tex-Harvey Company, one of the first to drill in the Spraberry in this area, found out that water was going to be necessary and set about to get that water.

Tex-Harvey found water in abundance on a 160-acre farm near Midland. Wells were dug and an eight and 5/8 inch pipe line for water was laid to the oil field.

Abundant Supply

There proved to be plenty of water for Tex-Harvey's open drilling operations and plenty to sell. So customers were invited.

One of the interesting features of the water pipe line is that anchors along the line can tap it to get stock water. It is given to them in exchange for right-of-way.

There are five wells on the Tex-Harvey Farm, the water source. Two of these are adequate for present needs. The wells hit water pay at 100 feet—and its good water. Pumps send the water gushing to the oil field strong enough for 100 pounds pressure at the tap.

Tank At Source

An important part in this pressure is a 30,000 barrel tank at the source, built by Tex-Harvey.

Water can be pumped into the pipeline at 1,000 gallons a minute. And there are three good wells for reserve.

Tex-Harvey has leased for water rights on an adjoining section of land to the water farm.

Another Tex-Harvey enterprise, a gasoline plant now under construction in the field, is a prospective "water customer" and a large one.

WHAT NOW?

WELLINGTON, N. S. —(AP)—Fatey Brittain figures Lady Luck deserted him. He fell off a load of grain and injured his shoulder. Next day he discovered a fox had killed 45 of his best pullets. The third day his pet dog was killed by an automobile.

Railroad Axle Is Adjustable

WASHINGTON —(AP)—A new type railroad-car axle adjustable to variations in track width has been put into use on the French-Spanish frontier.

This French invention makes possible the transfer of cars from French tracks of standard gauge (4 feet, 8 1/2 inches) to the broad-gauge Spanish tracks (5 feet, 6 inches), the National Geographic Society reports.

ELECTRICAL POWER HEADQUARTERS FOR THE PERMIAN BASIN SALUTES THE OIL INDUSTRY DURING NATIONAL OIL PROGRESS WEEK, OCTOBER 14-20

THE NAME

ELECTRIC SERVICE and SUPPLY

The name "Electric Service and Supply" has become synonymous with industrial electrical equipment and power equipment throughout the Permian Basin. We have constantly endeavored to offer our customers the utmost in courteous and efficient service and we would like to take this opportunity to thank our many friends and customers whom we have been privileged to serve over the years.

\$77,845

DAYS TO DRILL AND COMPLETE 39.8

DEPTH 5,840 FEET

These requirements are for a typical well drilled by a major company whose operations represent a wide cross section of the oil search in Texas. Many shallow wells are less expensive, many others cost several times as much as this example.

From Texas Mid-Continent Oil & Gas Association

Four Gauges Show Growth Of Midland

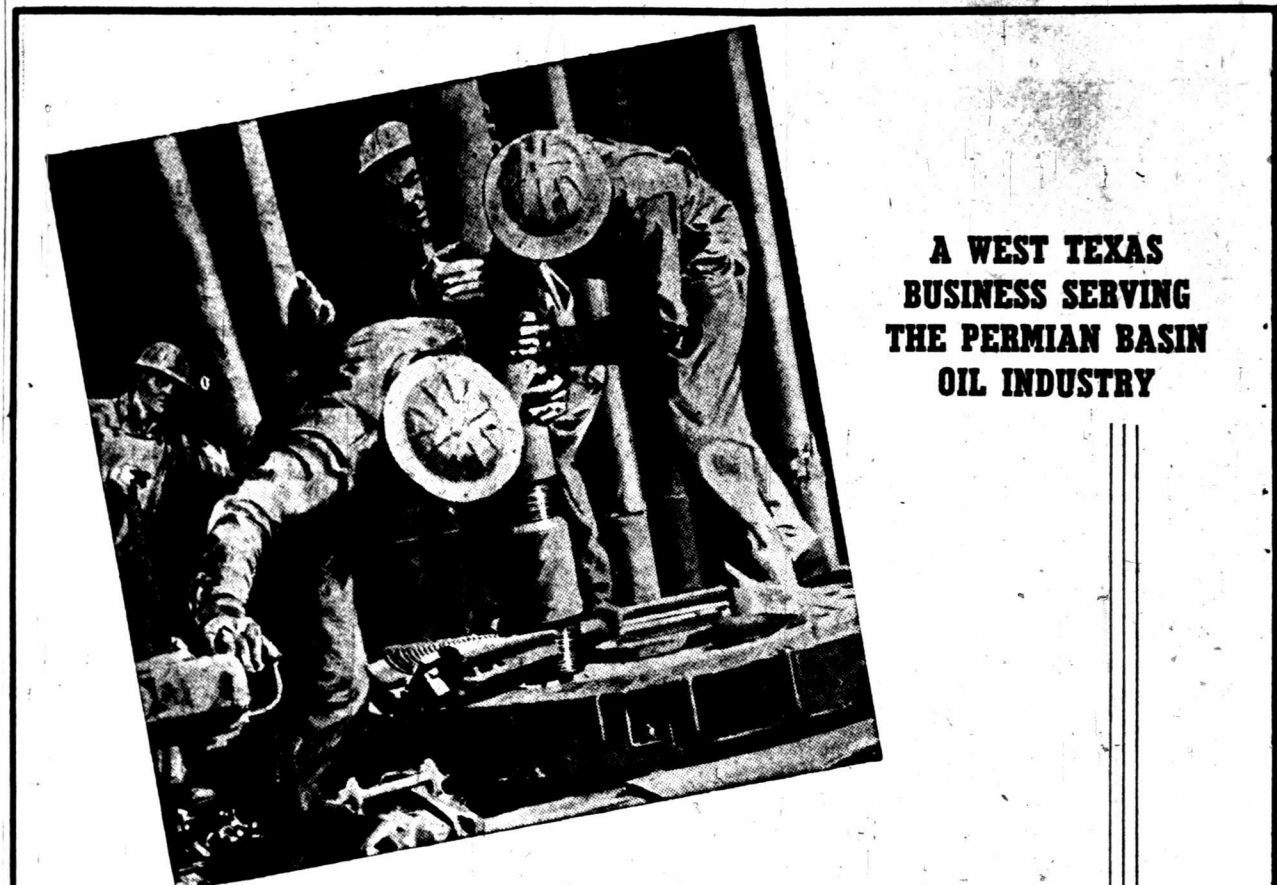

By four reliable gauges, Midland is enjoying its greatest growth in history in 1961. During the first nine months of this year, records have been broken in construction, bank deposits and school enrollment. And the Midland Post Office is well on the way to a new record in postal receipts. Building permits in Midland for 1961 totaled \$11,366,893 on October 1,

compared with \$9,512,551 for the same period last year. Since October 1, construction has soared to well above \$12,000,000. Previous record year was 1960, with \$11,735,351. Bank deposits, as of last July, were \$52,972,294, compared with \$48,373,121 on Dec. 31, 1960. School enrollment this year already has set a record, with more than 6,200 students. Previous high was in 1960 when there were approximately 5,400 students. Postal receipts for the first nine months of 1961 totaled \$266,918 and the big year-end months are yet to come. The record in receipts was in 1960, when the total was \$310,896 for 12 months. That mark is sure to be broken this year, postal officials believe.

HINT TO MOTORISTS

For cars that have been in long service, preparations for Winter should include changing to a lighter oil, adjustment of the carburetor to assure a richer mixture of fuel, adjustments to the ignition system, checking of the battery, brakes and tires, and cleaning of the cooling system before putting in anti-freeze.

Leading furniture producing state in the Union is North Carolina.

A WEST TEXAS BUSINESS SERVING THE PERMIAN BASIN OIL INDUSTRY

We're breaking all records— to serve you and the nation

- With civilian use of oil mounting to new peaks every month and military requirements increasing steadily, oil production companies like ours are breaking all records to serve you and the nation.

We're proud of the job we're doing. And this is our pledge that we will continue to serve you and the nation well.

Attempt To Reopen First Oil Field In Texas Is Scheduled

PALESTINE — (AP) — Historians and petroleum hunters will have a mutual interest this Fall when an attempt is made to reopen Texas' first oil field. A small drilling firm specializing in water wells plans to sink a shallow well in the old Nacogdoches field five miles southeast of Woden, deep in the piney woods of Nacogdoches County.

Although scheduled for only 500 feet in depth, the venture will test sands which have been producing oil for white men for more than 150 years. Historians say early Spanish traders were the first to make use of the oil. Wagons which later rolled over the Old Spanish Trail had their wheels greased with it.

The field was not developed until just after the Civil War, but by 1890 is contained 90 producing wells, most of them dug by shovels. The first bit-drilled well flowed to the surface from a little over 100 feet, but soon played out, leaving the driller bankrupt.

Line To Railroad

Leaders in the Nacogdoches area thought enough of the field before the turn of the century to lay a pipe line more than 10 miles to the nearest railroad. A small refinery which strained grit out of the oil with a cloth, then heated it to evaporate the water went into operation near Chiles in the 1870's.

The field, despite its promise, had its ups and downs, and finally was closed about six years ago. The new exploration, Rutherford Water Service Company's No. 1 W. A. Neal in the J. A. Chirene survey, has aroused new hope among Nacogdoches County citizens who have had oil fever more than once in the past. They will keep a close eye on progress at the well.

The oil field is still clogged with pits and hand-dug wells left by prospectors of 50 to 75 years ago, says M. P. Edmondson, Railroad Commission district supervisor in

Hanson Offers Top Bid For U. S. Leases In North Lea Region

WASHINGTON — Ernest A. Hanson, Roswell, N.M., has offered the high bids for oil and gas leases on three parcels of government-owned lands in the North Lea pool of New Mexico.

Hanson offered \$12.50 an acre for a 320-acre tract, \$7.50 an acre on a 240-acre tract, and \$4 an acre on a 360-acre tract.

On a fourth tract of 280 acres in the North Lea area, The Texas Company offered a high bid of \$7.20 an acre. Hanson bid \$5 an acre on this offering, as did the Texas Pacific Coal & Oil Company. Fort Worth.

Sinclair Completes Flowing Discovery In Colorado County

HOUSTON — Sinclair Oil and Gas Company has named the discovery sand of its new well in the Frelsburg field of Colorado County after H. R. Cullen, Houston philanthropist.

Sinclair's No. 1 H. R. Cullen, Casper Simon survey, A-502, flowed 366 barrels of 43.2 gravity oil through a 10 64 inch choke in 24 hours from perforations at 9,672-80 feet. Gas-oil ratio is 950 to 1.

The new sand discovery has a flowing pressure of 1,500 pounds on the casing and 1,000 pounds on the tubing. The company has petitioned the Texas Railroad Commission for a discovery allowable hearing.

Japanese Plan Super Highway

TOKYO — The construction ministry announced today plans are under consideration for a super highway linking Tokyo and the city of Osaka.

Prime Minister Shigeru Yoshida—who recently served in San Francisco as the chief Japanese delegate to the peace treaty conference—said that he would like to see such a project started in commemoration of the signing of the treaty.

The projected super highway would cost roughly \$160,000 to \$190,000.

Trespasser Stays Put In Berry Patch

LIBERTY, N. Y. — Mrs. Fred White, of Cochenet Center, a nearby Sullivan County hamlet, was picking blueberries on her property which she has posted against trespassers when she was disturbed by sounds she thought were made by another picker behind the berry bushes. Indignantly, Mrs. White exclaimed: "Can't you read? Get away from those bushes and off my property!"

To make her order more effective, she moved around to face the violator. She found a good-sized bear standing on its hind legs eating berries. Mrs. White hastily retreated, leaving even her own pail of berries for the illiterate trespasser.

We're breaking all records— to serve you and the nation

- With civilian use of oil mounting to new peaks every month and military requirements increasing steadily, oil production companies like ours are breaking all records to serve you and the nation by developing domestic production.

Flower Show

The Midland Council of Garden Clubs will present the "Midland Home and Garden Show" October 25 in the Recreational Building of the Church of Christ, San Angelo and Tennessee Streets. The show will be open to the public from 2 until 9:30 p.m.

The council presents a flower show each year and the garden clubs belonging to the council participate. They are the Midland, Yucca, Tejas, Welcome Wagon and Pyracantha Garden Clubs.

The show will be divided into two parts. The home part will feature mantel arrangements and arrangements for various holidays. The garden part will include flower beds and various ways to beautify the yard, garden and alley.

Mrs. C. F. Henderson is general chairman for the show this year. Other committee chairmen are Mrs. Harry J. Russell, Jr., staging; Mrs. M. S. Dickerson, schedule; Mrs. R. L. Spencer, entry; Mrs. E. V. Mitchell, property; Mrs. S. M. Sisley, classification; Mrs. R. E. Gillespie, hospitality; Mrs. A. P. Shirey, judges; Mrs. B. R. Mathews, publicity; Mrs. Butler Hurley, education, and Mrs. Carl Reeves, scrapbook.

In the picture at left Mrs. B. R. Mathews, left, and Mrs. R. L. Spencer discuss plans for the flower show. Mrs. Spencer is president of the Tejas Garden Club.

Mrs. M. S. Dickerson, pictured at right, shows the geraniums she will exhibit in the forthcoming flower show to Mrs. Butler Hurley, educational exhibit chairman of the flower show.

PLANNING THE SHOW—The staging and properties committee for the annual Flower Show, to be held October 25, spread the blueprints on the floor and go over the last minute details. Pictured, left to right, are Mrs. Harry Russell, staging committee chairman; Mrs. Harry Krist, runners chairman, and Mrs. E. V. Mitchell, properties committee chairman.

COMMITTEE MEETING—Chairmen of the various committees compare notes on their plans for the flower show. Pictured, left to right, are Mrs. Harry Russell, Mrs. B. R. Mathews, Mrs. C. F. Henderson, Mrs. E. V. Mitchell, Mrs. R. L. Spencer, Mrs. A. P. Shirey, Mrs. Butler Hurley, Mrs. Harry Krist and Mrs. M. S. Dickerson. The show will be held October 25.

NATIONAL JUDGES—Four national flower show judges of Midland discuss a rose from Mrs. M. S. Dickerson's garden. Judges, left to right, are Mrs. A. P. Shirey, Mrs. J. A. Koegler, Mrs. C. F. Henderson and Mrs. M. S. Dickerson.

YOUNG GARDENER—Three-year-old Donna Lee Dickerson is learning all about flowers and flower shows at an early age. Her teacher is her mother, Mrs. M. S. Dickerson. Mrs. Dickerson is schedule chairman for the flower show.

Alathean Sunday School Class Has Luncheon, Installs Officers

The Alathean Sunday School Class of the First Baptist Church installed its officers Friday at a luncheon meeting in the home of Mrs. J. E. Hill.

Mr. J. Q. Woodard, general Sunday School superintendent, was the installing officer.

Those installed were Mrs. W. D. Preston, president; Mrs. Fred W. Coff, secretary-treasurer; Mrs. G. O. Hazel, membership chairman; Mrs. Hill, fellowship chairman; Grace Wallace, class ministries chairman; Mrs. Fred Gunter, stewardship chairman; Mrs. R. E. Johnson, teacher, and Clara Taylor, Mrs. T. P. Drew, Mrs. Ralph Barton, Mrs. O. C. Rhodes, Mrs. C. A. Barton and Mrs. J. J. Kirby, group captains.

The theme of the installation service was based on the hymn, "I Would Be True." Mr. Woodard closed his talk with a prayer of dedication.

Gifts were presented to Mrs. Johnson, Mrs. Preston and Mrs. Linton Brunson who served as last year's teacher, president and secretary, respectively.

It was decided that each member would bring a doll to the next meeting to be sent to the Buckner's Orphans' Home in Fort Worth. The luncheon was served by the new officers.

Others attending were Mrs. Brooks Pemberton, Mrs. Fred J. Middleton, Mrs. John Dunagan, Mrs. George Phillips, Annie Pitts, Mrs. J. Q. Woodard, Mrs. Zeb Wilkins, Mrs. C. M. Dunagan, Mrs. Leonard Proctor, Josephine K. Ligon, Mrs. Harry Watson.

Mrs. C. M. Gysdamith, Mrs. Tom Bobo, Mrs. James O. Vance, Mrs. J. R. Harrison, Mrs. M. C. Ulmer, Mrs. J. O. Nobles, Mrs. Ruth E. Stumbo, Mrs. C. C. Smith, Eleanor O'Hara, Quincy Belle Snow and Mrs. E. A. Nettleton of San Angelo.

Girl Scouts Plan Finance Drive

McCAMEY — McCamey Girl Scouts will sponsor a finance drive early in November, with Mrs. Walter Campbell serving as chairman.

Plans were made at a meeting recently for the annual Girl Scout Day to be held December 8. Mrs. J. J. Havens and Mrs. Cahal Clinton will be co-chairmen.

A training course for leaders will be held in February, according to Eleanor Voigt, president.

Thin mayonnaise with leftover juice from sweet pickles and serve with a salad of tuna fish or salmon.

Mrs. Robert D. Bissell

Courtney, Bissell Wed In Houston

In a double-ring ceremony Friday, Norma Loyce Courtney became the bride of Robert Dale Bissell. The wedding took place in the Garden Oaks Baptist Church in Houston with the Rev. James W. Parker officiating.

The bride is the daughter of Mr. and Mrs. J. N. Courtney of Houston. Bissell is the son of Col. and Mrs. C. E. Bissell of Midland.

The church was decorated with urns of large chrysanthemums and white pom-pom mums and candelabra. Wallace Brown, organist, played traditional wedding music and accompanied Edward Bing who sang "I Love Thee," "Because," and "The Lord's Prayer."

Attendants Listed

Betty Anne Howell was the maid of honor and the matron of honor was Mrs. R. H. Montgomery, Jr. Bridesmaids were Jeanette Lloyd and Mary Anne Trussell. William M. Bissell was the best man and ushers were W. O. Boswell and W. J. Courtney. Sherrill Lynn Courtney was the flower girl and the ring bearer was Tommy Kelly Gilruth. III. Groomsmen were Charles Kruszewski, R. H. Montgomery, Jr. and H. L. Griffin.

The bride, given in marriage by her father, chose an ivory satin gown fashioned with French chintilly lace bodice and sleeves and decorated with sequins and seed pearls. Her full skirt extended into a cathedral length train. Her full length veil of silk illusion was attached to a crown of pearls. She carried a crescent bouquet of feathered carnations centered with a white orchid and stephanotis.

The attendants wore gowns of shrimp colored satin and tulle with matching Juliet caps trimmed with tiny seed pearls. They carried crescent-shaped bouquets of chrysanthemums.

Sherrill Lynn Courtney was the flower girl. She wore a shrimp satin gown with a four-tiered skirt. She wore a tiara of chrysanthemums and carried a basket of white petals.

For her daughter's wedding, Mrs. Courtney chose an aqua dress with matching hat, white accessories and a corsage of orchids. Mrs. Bissell wore a navy blue dress with matching accessories and a corsage of orchids.

A reception was held in the home of the bride's parents.

Crystal candelabra with white tapers and clusters of gardenias decorated the bride's table.

Those in the house party were Mrs. J. F. Hensarling, Mrs. Paul Panchar, Marvina Shoemaker and Mrs. W. O. Boswell.

Baptist Brotherhood Sponsors Revival

The Brotherhood of the Calvary Baptist Church is sponsoring a weekend revival. The Rev. A. L. Teaff, pastor, will be the speaker in the morning and evening services Sunday.

Services also were held Friday and Saturday. This is the second in a series of weekend revivals at the church.

For the wedding trip to California, the bride wore a green wool dress with brown accessories and a white orchid corsage.

The couple will be at home at 5322 Longmeadow Lane in Houston after returning from the wedding trip.

The bride is a graduate of Reagan High School in Houston and she attended the University of Houston. Bissell received his BA and MA degrees from Middlebury College in Vermont.

Out-of-city guests at the wedding were Mr. and Mrs. C. E. Bissell, Mr. and Mrs. Paul Anderson and Mr. and Mrs. Warren Anderson of Midland; Mr. and Mrs. W. H. Maines of Fair Lawn, N. J.; Pfc. William M. Bissell of Fort Sill, Okla., and Mr. and Mrs. G. H. Trussell and daughter, Mary Ann, of Corpus Christi.

In A Class by Itself

KIDDIES' TOGGERY

109 N. Marinfeld - Dial 3-3992

Rev. Towery Is Guest Speaker

The Rev. Alton Towery, pastor of the West Side Baptist Church, is the speaker for a series of services which began Friday in the Cotton-flat Baptist Church.

A service also was held Saturday and he is scheduled to speak in the morning worship Sunday. The pastor of the church, the Rev. Joe White, will speak in the morning service Sunday at the West Side Baptist. Mr. Towery's subject for the Sunday evening service at the West Side Church will be "Will a Man Rob God?"

MIDLANDERS LEAVE ON HUNTING TRIP

Mr. and Mrs. Bill Trammell and Mr. and Mrs. Clarence Givens, Jr., left Saturday for Pagosa Springs, Colo., where they will hunt elk and bear.

Mah Jong has been played in China as a card game for about eight centuries.

Rankin Church Class Installs Officers

RANKIN—Members of the Ruth Sunday School Class of the First Baptist Church met recently for a covered dish supper in the Park Building.

Mrs. Ralph Daugherty was installing officer when class officials were inducted for the coming year. Mrs. Daugherty used the service entitled "Ye Are The Body of Christ." Mrs. D. B. Williams represented the "Voice of the Body," the vice president, the feet, the secretary, the eyes, and the teacher, the heart.

Officers installed were Mrs. J. T. Bushong, membership vice president; Mrs. Alvin Bushong, fellowship vice president; Mrs. Charles Denton, ministerial vice president; Mrs. Steve Presslar, stewardship vice president; Mrs. W. A. Sharp, secretary, and Mrs. W. A. Hudson, teacher.

Mrs. J. B. Senter, retiring class president, read the scripture and the prayer of dedication was given by the teacher.

Those attending were Dale Williamson, Faye Denton, Norma Senter, Mae Price, Joyce Rubash, Mary Elna Holloway, Merle Sharp, Bill Bushong, Lurline Bushong, Louise Hudson, Dorothy Hurst, Nan Daugherty and Nexa Rae Taylor.

Midland Couple Plans Wedding

The engagement of Yvonne Shuffield, daughter of Mr. and Mrs. O. L. Hensley of Fort Worth and formerly of Stephenville, to Gene Hays, son of Mr. and Mrs. B. M. Hays of Midland, was announced recently by the bride-elect's parents.

The wedding will be held November 24 in the First Presbyterian Church in Midland.

Cards, Stationery Will Be Sold By Rankin Brownies

RANKIN—At the Brownie Troop meeting recently it was decided to sell Christmas cards and stationery to raise funds.

The girls played ping-pong. Those attending were Dorothy Abernathy, Sammie Steele, Nova Mayes, Cynthia Russel, Virginia Harrall, Carolyn Langford, Barbara Bushong, Judy James, Joyce Long, Malinda Elwood, Ann Chandler, Joella Massey, Zella Anderson and visitors Linda Bushong, Mrs. Alvin Bushong, Mrs. A. E. Chandler and Mrs. Ed Anderson. Mrs. J. Q. Russell is leader.

Quick rice dessert: Mix cold cooked rice with diced fruit and honey; fold in sweetened whipped cream and chill.

Young Midland Artist To Give First Exhibit

James Johnson, Jr., 16-year-old Midland High School artist, will present his first exhibit from 3 to 6 p.m. Sunday in the home of his parents, Mr. and Mrs. James J. Johnson, 2601 Brunson Street.

Johnson, who is majoring in art, won first prize at the Midland County Fair two years ago for a self portrait which was entered in

James Johnson, Jr.

adult competition. Three times he has won prizes or honorable mention for pictures submitted in state high school contests and last Spring he received first prize in the high school division of the art contest sponsored by the Palette Club Art Center.

One of his pictures was hung in Carnegie Institute. Johnson's favorite medium is water colors, although he also has worked with pastels and oils.

The exhibit is open to the public.

CHRISTMAS SHOPPING—Mayor Perry Pickett begins his Christmas shopping early by buying a fruit cake from members of the Progressive Study Club. Proceeds from the sales will go to the Woman's Club Building Fund. Pictured, left to right, are Mrs. H. C. Jones, Mrs. J. H. Beatty, Mrs. Sol Bunnell, Mrs. Lindley Latham, Mayor Pickett, Mrs. W. B. Yarborough and Mrs. W. H. Thams.

TFWC Schedules Fifty-Fourth Annual Convention In Denton

The fifty-fourth annual convention of the Texas Federation of Women's Clubs has been scheduled for November 12-15 on the campus of Texas State College for Women in Denton.

The announcement was made by Mrs. J. Howard Hodge of Midland, president of the Texas Federation of Women's Clubs.

Workshops on program planning, youth conservation, press and publicity and parliamentary procedure

will be features of the convention. Speakers will discuss public affairs, national defense and the role women's organizations may play in these connections.

The convention will open with a fine arts program. Mrs. Hodge and Mrs. H. B. Gillette of Houston, state program chairman, recently met with the local committees in Denton to complete plans for the convention.

Mrs. Hodge, along with other Texas members of the General Federation Board of Directors, will leave for Washington, D. C., Monday to attend the directors' meeting.

In addition to the workshop sessions on federation affairs, the group will be entertained with receptions at Blair House and the French Embassy. Ceremonies will include placing a wreath on the tomb of the Unknown Soldier in Arlington National Cemetery.

Before returning to Texas, the women will attend the New York Herald Tribune Forum in New York City.

Use fresh plums in salads and fruit cups. Or lay them atop quick coffee-cake dough and sprinkle with cinnamon and sugar for a delicious dessert.

Holiday Season Begins With Sale Of Fruit Cakes

Members of the Progressive Study Club are starting the Christmas season early this year with the sale of fruit cakes. The fruit cakes may be used for Thanksgiving or Christmas giving.

Sale will be made to individuals and companies with orders ranging from a single cake to as many as 400.

These cakes have been the specialty of a Texas bakery for 50 years. The cakes are packed in holiday tins.

Proceeds from the sales will go to the Woman's Club Building Fund.

Members of the finance committee are Mrs. Lindley Latham, Mrs. W. B. Yarborough, Mrs. H. C. Jones, Mrs. W. H. Thams and Mrs. John H. Beatty, III.

Rankin Club Meets In Park Building

RANKIN—The Rankin Study Club met recently in Park Building. Hostesses were Mrs. Ralph Daugherty, Mrs. Clint Shaw and Mrs. Ted Hogan.

Mrs. R. H. Johnson made a special request for leaders to help in the youth program.

Mrs. Daugherty, program leader, gave the story, "Pearl S. Buck of America," and Mrs. Sam Holmes discussed the "Establishment of the Nobel Prize."

Two committees were appointed by Mrs. Jack Smith, president. Serving on the budget committee are Mrs. Sam Holmes, Mrs. Hogan and Mrs. Carl Keys. On the CARE packages for Korea, Committee are Mrs. Daugherty, Mrs. Tom Mitchell and Neva Rae Taylor.

Those attending were Mrs. Daugherty, Mrs. F. H. Goodwin, Mrs. Hogan, Mrs. Holmes, Mrs. E. C. Higday, Mrs. W. A. Hudson, Mrs. Leola Hurn, Mrs. Johnson, Mrs. J. W. Kennedy, Mrs. Keyes, Mrs. Dunn Lowery, Mrs. Tom Mitchell, Mrs. Zack Monroe, Mrs. Dan Runyan, Mrs. Clint Shaw, Mrs. Jack Smith, Mrs. C. G. Taylor, Mrs. R. O. White and Maggie Taylor.

VISITS SISTER HERE
Paul Galloway of West Plains, Mo., is spending several days in Midland with his sister, Beulah Lyons.

Keep a small first-aid kit and sewing kit in the glove compartment of your car when you start on a vacation motor trip. A supply of cleansing tissues and a thermos for cold drinks also will be useful.

The comfort and solace of beautiful music at time of bereavement is widely recognized. That's one reason why we have installed our beautiful organ. Well known for its tonal beauty and its soul-stirring notes, we consider it essential to a complete service.

John Koenig To Teach Art Classes

John W. Koenig will teach art classes at the Palette Club Studio at 7:30 p.m. each Tuesday and Thursday. Anyone interested in drawing or painting is urged to attend.

Koenig studied at the Advanced Studio in Drawing and Painting at Columbia University in New York. He received his B. A. degree there and his M. A. degree from Kansas University.

While in Kansas he was a scientific illustrator for the Kansas State Geological Survey. He now is a geologist for the Phillips Petroleum Company.

RETURNS FROM VACATION

Heleen Hobbs has returned from a two-week vacation in Ruidoso, N. M.

Church Meeting Will Be Held In Big Spring

District Four of the First Christian Church, will meet at 9:30 a.m. Wednesday in Big Spring. Midland is included in the district.

Mrs. Dean Cheneweth of San Angelo, state children's worker, will conduct a workshop for children's workers. Other features of the meeting will be a Christian Women's Fellowship program on women's work and a laymen's banquet to be held at night. This year for the first time women will be invited to attend the banquet as guests.

All members of the Midland First Christian Church are asked to attend the district meeting.

Catholic Teen-Agers Slate Wiener Roast

The Catholic Teen-Agers met Wednesday in the St. Ann's School to make plans for a hay ride and wiener roast in November.

The entertainment featured ping pong. Hostesses were Mrs. Doyle Patton, Mrs. Fred Burleson and Mrs. T. J. Glennan.

Members attending were Sadie Nugent, Marion Sevier, Julie Owen, Nancy Ann Shoup, Madelon Schabarum, Garry Kelly, Jimmy Manning, Joe Brodigan, Mike Patton, Marian Eddleman, Wendy Woolcock, Jonlee Fletcher, Mike Kelly, Tom Collins, Sharon Pink, Cheryl Grimm, Graham Nugent and Gerry Geisler.

School Principals Attend Conference

Don L. Mitchell and C. D. Johnson, principals of the Midland Senior and Junior High Schools, attended a meeting of the Texas Association of Secondary School Principals in Mineral Wells.

Central theme of the meeting was that boys and girls must be educated for the responsibilities of citizenship, and that the schools' curriculum must be made to will the needs of each student as an individual.

The group heard addresses by Leonard G. Nystrom, president of the Texas Registrars Association, and Dr. Mortimer Brown, president of the Texas State Teachers Association.

White and Mrs. H. B. Tandy. The home was decorated with arrangements of Fall flowers. Guests were met by Mrs. Chapman, Mrs. Tandy, Mrs. White, Mrs. Olifton Tennyson and Mrs. George Massingill.

Miss Hubbard was honored with a breakfast kitchen shower Saturday in the home of Mrs. Ted M. White. Floral arrangements of daisies were used. Those attending were Mrs. C. B. Hubbard, Mrs. C. O. Spencer, Mrs. Arthur Kyle, Mrs. Tom Mitchell, Mrs. Armond Hoyer, Jr., Mrs. Gene Yeager, Mrs. Jesse Young, Mrs. Jack Brewer, Mrs. Chris Perner, Janis Sue Spencer, Ruth Sparks, Jo Lou Brewer, Jeannene Thompson, Jane Adams, Kay Kirby and Sue Meinecke.

Boys' Ranch Names Pickett To Post

Mayor Perry D. Pickett of Midland has been named to the directorate of Boys Ranch of West Texas, Carl A. Cahen, executive director, announced Saturday. Boys' Ranch, of which Marvin C. Ulmer, Midland banker, is first vice president, is located at Tankersley, Texas, and draws its citizens from a 34-county area in West Texas from Fort Davis to San Saba. In accepting the post, Pickett said, "I am happy to have the chance of working on one of the finest projects in West Texas."

Amelia Anthony Former Model, Football Player Are Newcomers To Midland

Amelia Anthony, founder and director of Girlstown, U.S.A., at Whiteface, Texas, and international honorary member of Beta Sigma Phi, will be the guest speaker at 3 p.m. Saturday when Beta Sigma Phi entertains the Midland Woman's Club, Inc. The meeting will be held in the home of Mrs. W. Ernest Nance, 1600 West Michigan Street. Offi-

Amelia Anthony

cers of the sorority are Mrs. A. R. Aytes, president; Mrs. R. L. Maddox, Jr., vice president; Estelle Cummings, secretary, and Mrs. Sam King, treasurer.

Mrs. O. H. Higdon, newly-elected vice president and program chairman of the Midland Woman's Club, Inc., will be in charge of the program. Mrs. W. Harry Rhodes is the Woman's Club president. The meeting was changed to Saturday from Thursday for the convenience of those who work.

Mr. and Mrs. O. B. Horton

Mr. and Mrs. O. B. Horton, 1708 Keith Street, moved to Midland less than a month ago from Houston. Horton is a former professional football player and Mrs. Horton is a former Harry Gonover model.

Both are native Texans. Mrs. Horton formerly resided in Corpus Christi and Horton in Sherman. When Mrs. Horton's father was transferred to New York City she was attending Del Mar College in Corpus Christi. After being in New York a short time she decided to apply for a job as a model.

Her story as a model ends with a year and eight months work with the Conover Agency. During 1949-50 she was one of the six most televised girls. In 1950, she also appeared in the International Beauty Show. She has done fashion shows and magazine covers and has appeared in two movies—one a short for RKO and the other, "Iron Ponies."

Mrs. Horton is five feet five and one-half inches tall and has short blonde hair. "Being a model is much harder than most women's professions because of the long hours and strain." Must Carry Extras "At all times you are required to carry a hat box, extra shoes and a number of particular pictures. The only way to get anywhere in New York is to walk because of the crowds. That is hard on you when you have just finished one job and have another across town," smiled the pretty housewife. Both Mr. and Mrs. Horton are only children. Horton, who is employed by the Sohio Oil Company, is known to most persons as "Red." He is a graduate of the University of Texas. His professional career in football ended in 1949 due to injuries he received while playing. A Marine during World War II, he started playing professional football for the Baltimore Colts in 1947. In 1948, he signed to play with the Green Bay Packers. The Chicago Bears held his contract in 1949. The six foot, one inch Texan thought New York was too big. Though his wife liked New York, they both are "crazy about Midland."

Parcel Post Rates Due For Increase

KUALA LUMPUR, MALAYA—Parcel post rates to the United Kingdom are going up. The charges will be \$55, \$90, \$115 and \$200 for parcels not exceeding three pounds, seven pounds, 11 pounds and 22 pounds, respectively. The postmaster-general of Malaya said the increase are entirely due to higher handling and delivery charges to be paid in Great Britain.

RUTH MILLETT

Teen-Agers—Here's A Test To See How Grown-Up You Are

By RUTH MILLETT, NEA Staff Writer

Take a test, teen-agers: If your parents have protested that you monopolize the family telephone, have you tried to limit your conversation to a reasonable time? If you can't always have the family car when you want it, do you accept the fact good-naturedly, instead of sulking and fuming? Do you show appreciation for all the things your family gives you and does for you, instead of making them feel that you regard yourself as underprivileged? Do you accept without rebellion the fact that your parents have a right to want to know where you are going and with whom you start out in the evening? Do you do all the things for yourself that you are fully capable of doing instead of expecting your mother to be a sort of lady's maid or valet to you? Do you take pride in having your friends meet your parents, taking the attitude that it is as important for your parents to like your friends as for your friends to think your parents are okay? Do you do what you are asked to do about the house without acting put out or having to be reminded over and over? Try To See Parents' View Do you ever try to see your parents' point of view, instead of expecting them always to see yours? Do you treat your parents' friends with courteous respect? Do you give your parents credit for knowing a little more than you do? Do you try to give your parents some pleasure in your company, instead of acting bored if you have to spend an evening in their company? Test yourselves, Teen-Agers. It will give you a good idea of how grown-up you really are. (All rights reserved, NEA Service, Inc.) Next time you're putting some fish fillets into the oven bake some onion rings with them. Just peel and slice the onion into thin rounds, separate into rings, and arrange over the seasoned fillets. Bake the fish and the onion with a little butter or margarine during the baking.

The Brownie troop of St. Ann's School met Friday for a story session. Games were played and songs were sung.

Those attending were Mrs. George Byrne, leader; Mrs. Jack Petosky, assistant leader; Mary Anderson, Teresa Byrne, Anne Canon, Eliza-

ROSE FESTIVAL DUCHESS—Barbara York of Midland, duchess in the fourteenth annual Texas Rose Festival, rode atop one of the floats in a three-mile long parade seen by 200,000 persons Saturday in Tyler. Her gown was fashioned in the colors of the violet, the flower she depicted in the pageant. Dedicated to the United Nations, the float on which she rode was designed to symbolize the world's hope for peace. Miss York was one of the honor guests at the Queen's Tea held in the LeGrand Home and at the Queen's Ball, the formal social event of the festival.

TUESDAY
The Beta Delta Chapter of the Beta Sigma Phi will meet at 8 p.m. in the home of Mrs. Rudolph Rubin, 1410 North Whitaker Street.

RANKIN — Mr. and Mrs. Dunn Lowery have gone to Dallas to attend the Texas-Oklahoma football game.

Mr. and Mrs. Walton Harral witnessed the recent Texas A&M-Oklahoma game at College Station. The Girl Scout executive com-

Parents Honor Son With Birthday Party

McCAMEY—Ronald Baron was honored recently with a birthday party given by his parents, Mr. and Mrs. Victor Baron.

The table was decorated in the McCamey football colors, orange and black, and centered with a large white cake.

Football players attending were Frederick Matejowski, Eddie Halamek, Billy Trapp, Howard Wolf, Daniel Stacy, Joe Bobbins, Jerry Lambeth, Johnny Boggs, Billy Stokes and Mack Patterson.

mittee will meet in the Park Building at 4 p.m. Tuesday.

"Literature and Dramatics" was the study subject for the Girl Scout Troop No. 1 at its meeting last week. Attending were Troop Leaders Mrs. D. O. McEwen and Dorothy Ingram and Beverly Reed, Rachel Broyles, Jo Ann Sall, Rona Lanford, and Pat Dishman.

Mrs. J. B. Ratiff, Jr., is in the Fort Stockton hospital as the result of injuries received in a fall at Fort Stockton Park recently.

Mr. and Mrs. Lewis M. Smith and family and Mr. and Mrs. Johnnie Rankin and family, all of Spokane, Wash., arrived here last week for a visit with relatives.

MIDLAND GIRL NOMINATED FOR TSCW OFFICE

Joyce Howell, daughter of Mr. and Mrs. Benton Howell, is among the eight nominees for officers of the freshman class at Texas State College for Women.

Mrs. Goldsmith Is Chairman

Mrs. C. M. Goldsmith of Midland recently was appointed general chairman of the safety program to be sponsored by the National Federation of Women's Clubs November 1 in the Midland High School.

The program will be held from 9:30 a.m. to 12:30 p.m. Featured speakers will include Mrs. Jud Collier, state safety chairman for the federation; Mrs. Agnes Beaton of Washington, D. C., director of the woman's division of the automotive safety foundation, and J. C. Musick of Austin, general manager of the Texas Safety Association.

It will be an open meeting.

SPECIAL LECTURE BY THANE SET SUNDAY NIGHT

A special lecture by Thane, noted author and lecturer, on "How to Think and Grow Rich" will be presented at 8 p.m. Sunday in the lobby of the Scott Building, 1300 West Wall Street.

The lecturer has spoken here on several previous occasions. Sponsors said a large enrollment is expected for the special lecture.

Home Demonstration Clubs Have Achievement Tour

The annual Home Demonstration Club Achievement Tour was held Thursday.

The first stop of the tour was at the home of Mrs. Joe Heidelberg, home improvement demonstrator of the Valley View Home Demonstration Club. Improvements on her home were illustrated. The tour continued to the home of Mrs. A. C. Teinert where other home improvements were illustrated.

The next stop was at the home of Mrs. O. B. Jackson, home improvement leader for the West Side Home Demonstration Club. She illustrated how she had redecorated her home. A copper toolled horse head picture, a knitted sweater, an aluminum tray, crocheted aprons and monogrammed towels and sheets were on exhibit by members of the club.

The tour continued to the home of Mrs. L. H. Moncrief. On exhibit here was bedspreads, curtains and some re-upholstering, a coat, crocheted sweater, jelly and other things made by members of the club.

The tour ended at the home of Mrs. T. A. McCarty, where a display of ceramics was on exhibit. Members of the Garden Addition Home Demonstration club also exhibited items they had made.

Those making the tour were Vida Holt of Fort Stockton, Mrs. R. E. L. Taylor, Mrs. E. J. Murphy, Mrs. H. A. Palmer, Mrs. T. O. Midkiff, Mrs. J. C. Hudman, Mrs. J. D. Bartlett, Mrs. John Ficke, Mrs. S. C. Dougherty, Mrs. C. G. Murray, Mrs. J. E. Cassidy, Mrs. L. H. Moncrief, Mrs. Jimmie W. Dunn, Mrs. H. B. Spears, Mrs. O. R. Phillips, Mrs. A. C. Teinert, Mrs. I. J. Howard, Mrs. Jack W. Anderson, Pauline McWilliams, Mrs. Joe Heidelberg, Mrs. Jim E. Roberts, Mrs. B. W. Hughes, Mrs. T. A. McCarty, Mrs. C. H. Pearson, Mrs. E. O. Measor-Smith, Mrs. H. L. Davenport and Mrs. B. L. Mason.

For a delicious luncheon dish spread toast with deviled ham and top with creamed eggs. Serve with a crunchy carrot and green pepper slaw for good texture and color contrast.

Mrs. Ulmer To Be Garden Club Hostess

Mrs. M. C. Ulmer will be hostess to the Midland Garden Club at 10 a. m. Thursday in her home, 111 North C Street.

Mrs. S. M. Sisley will be in charge of the program. She will explain the Flower Show schedule. Mrs. C. E. Bissell will bring the flower arrangement.

Square Dance Club Has First Meeting

McCAMEY—The McCamey Promoters Square Dance Club held its monthly dance recently at the McCamey Park Building.

Music was by Lyles Band from Crane.

It was the first dance of the Fall season.

Natives of Africa speak more than 275 languages.

EAT PLENTY AND TAKE OFF UGLY FAT

Many people have reported amazing results with this home recipe. It's easy—no trouble at all and costs little. Just go to your drugist and ask for 4 ounces of liquid Barcenate. Pour this into a pint bottle and add enough grapefruit juice to fill bottle. Then take two tablespoonful twice a day. That's all there is to it. If the very first bottle doesn't show the simple, easy way to lose bulky fat and help regain slender, more graceful curves; if reducible pounds and inches of excess fat don't just seem to disappear almost like magic, from neck, chin, arms, bust, abdomen, hips, calves and ankles, just return the empty bottle for your money back.

Lost 39 Pounds

"I was really happy and surprised with the results obtained taking Barcenate," says Mrs. Lillian Flowers, 214 Burnett St., San Antonio, Texas. "I have lost 39 pounds and feel so much better and look 10 years younger."

Lost 15 Pounds

Mrs. D. C. Baker, Box 31, Brown, Texas, writes us as follows: "I weighed 216 pounds when I commenced to take Barcenate. After one month I have lost 15 pounds and am going to continue taking it until I am down to 180 pounds. I have several of my friends taking Barcenate and they are losing weight also."

Councilmen Adopt Tax Rate Proposal

PECOS—The lowest tax rate in Pecos since 1944 was endorsed officially by city councilmen last week, when they adopted a resolution okaying the proposed \$1.60 rate per \$100 assessed valuation, making a cut of 20 cents from last year's \$1.80 rate.

Set up on the basis of 90 per cent collection average, the new rate will meet the estimated budget requirements of over \$171,000, an increase of more than \$27,000 over last year.

Property valuation this year shows an increase of about \$1,400,000. Also, building permit receipts indicate that almost \$1,000,000 has been spent for private building, all of which means added revenue.

Under the new tax rate, 91 cents will go into the general fund, while the remaining 69 cents will help pay off bonded indebtedness, Mayor Cecil Cothurn explained.

Total city assets as of June 30, 1951, were \$2,448,737, according to an annual audit report prepared by Chas. M. Travis, certified public accountant. Total liabilities were \$1,238,825.

In a forward to the report, Travis criticized the city's method of handling parking meter receipts "from an audit standpoint." He remarked that it is not properly the duty of the police department, but that of the city secretary.

Newsman To Address Episcopal Men's Meet

Wick Fowler, managing editor of The Reporter-Telegram, will be the guest speaker Monday night at the regular meeting of the Episcopal Men's Club. The dinner-meeting is scheduled at 6:45 p.m. in the Parish House of the Trinity Episcopal Church.

The program will be presented by Milward Miller, program chairman. A barbecued chicken dinner will be served, club officials said.

They urged a large attendance of Episcopal men at the gathering.

The Washington Merry-Go-Round

By Drew Pearson
(Copyright, 1951, By The Bell Syndicate, Inc.)
Drew Pearson says: Taft says Guy Gabrielson must go; Ohio senator emphasizes GOP must work to win; Baseball, boxing sit on Justice Department gridlock.

WASHINGTON — Senator Taft let his hair down the other evening at an off-the-record dinner for Republican newcomers to Congress. Under a barrage of questions, he talked like a presidential candidate but couldn't be coaxed into admitting he was one.

"Senator," blurted Illinois' Congressman Jim Sherman, "when we go to a football game on Saturday afternoon and we see the players running up and down the sidelines, we assume they are about ready to get in the game. You have been running up and down all over the country. Are you or are you not a candidate?"

"Not at the moment," grinned Taft.

"Would he be interested in a Taft-MacArthur ticket?" fired Congressman Albert Morago of Connecticut.

"No, I wouldn't," but MacArthur might be interested in a MacArthur-Taft ticket," shot back Mr. Republican.

However, the hottest party question was brought up by California's Congressman Pat Hillings, who asked: "In view of the present investigation of the national chairmen of both political parties, do you think Guy Gabrielson, the GOP chairman should resign?"

"He should be given a full opportunity to present his side of the case. Perhaps it will be proved that he didn't do anything illegal," Taft began cautiously, then added bluntly: "But, nevertheless, he will eventually have to go."

Republicans Can't Leaf
The Ohio senator puffed into the private dining room at Washington Hotel 2400 an hour late, looking tired, after a long Senate session. He was taken in hand by Ohio's Congressman Bill Ayres, the host, who herded the GOP freshmen into

a line to have their pictures taken individually with Taft. Somehow, a waitress also wandered into the line and had her picture taken with the senator.

The congressman then devoured \$340 worth of fruit cup, roast beef, baked potato, string beans and strawberry sundae before Taft was called upon. He spoke 20 minutes from notes on the back of an envelope, reviewing his Ohio election campaign and comparing its issues with the 1952 campaign.

He stressed the need for hard campaigning if the Republicans are going to win the White House and Congress next year.

"The reason I got as many votes as I did in Ohio," Taft declared, "was because I asked so many people to vote for me."

He warned it would be a mistake for the GOP to try to win merely by exposing Democratic corruption. Although he favored continuing these exposures, he urged steady GOP hammering at other issues, such as Communism in government, the trend toward socialism and too much government spending.

After Taft's preliminary remarks, Congressman Ayres put Taft on the firing line and opened the off-the-record meeting to questions. He offered to screen the questions, however, by having them addressed to him first.

Taft Ducks McCarthyism
"That's all right, Bill," Taft interrupted. "I'll answer any questions they ask."

The first to jump up was Michigan's Congressman George Meader, former ace Senate investigator, whose one question took several minutes to ask.

"That's a good speech," Ayres finally blurted, cutting him off.

Thereafter the questions were short and snappy, highlighted by the political posters from Sheehan and Hillings. One significant question was whether Taft approved Senator McCarthy's smear tactics. Congressmen especially were interested in this one, since many GOP leaders and newspapers, including Life magazine, have suggested it was time for Senator Taft to divorce himself from McCarthyism. Taft's reply was neither yes nor no.

"Nobody should make charges he cannot prove behind the cloak of congressional immunity," Taft said.

"At the same time Senator McCarthy has done some good in alerting the country to the subversive influences in government."

For an hour, Taft swung at these questions, chiefly on campaign issues, how to win votes and the need for party organization.

For example, Congressman Charles Brownson of Indiana wanted to know whether the Taft-Hartley law "will be an issue in next year's campaign and do you think the law needs some amendments?"

Taft reported that, if it becomes an issue, "it will be one for us." He claimed the Republican Party can show that it helped the workingman by passing the law. This was the issue, he reminded, behind his fight for reelection in Ohio.

"The smear campaign put on against me by the (CIO) Political Action Committee only made votes for me," he declared.

Taft added that he favored amending a provision to end the union-shop election procedure.

At 10 p.m., Ayres cut off the questions and adjourned the off-the-record meeting. The rental time had expired on the banquet hall. A grinning, hand-shaking Taft departed, looking less tired than when he had arrived.

Baseball Monopoly
Football isn't the only sport to get a going-over by the Justice Department's Antitrust Division. Others on the griddle for restricting radio and television will be boxing and baseball. This may curtail the television of fights in selected theaters.

Justice Department attorneys have been eyeing the baseball-broadcast situation for some time, and once were on the verge of an agreement

with the ball clubs. Both the big leagues had indicated they would give all radio and TV networks an even break, but the Justice Department, unsatisfied, now has the case on Assistant Attorney General Morrison's desk.

THE BULLDOG

Written By The Journalism Class Of Midland High School

It's Up To Everyone

(An Editorial)

The Midland Bulldogs play Lamesa October 26 in Memorial Stadium in their first conference game of the season. They have two weeks to get ready for the game and will be seeking revenge from the 13-12 upset suffered at the hands of the Tornados last year. Midlanders especially were disappointed at the upset because it meant the loss of a possible district championship for the Bulldogs.

This year Midland High School has the best opportunity in its history to win a district championship. Whether the Bulldogs succeed in doing this depends upon the coaches, the players and the students. If we want to win the district bad enough, if our desire is great enough, and we are willing to go to the extra effort it takes on the part of everyone to win a championship, we can win it. The decision is in our hands.

The Editor Speaks

By GAIL BAKER

The speech department of Midland High never could receive enough praise for all they have done toward helping Midland High School to be a happy and wonderful school.

Whenever they are called upon to present a program for assembly, a luncheon or for any other occasion, they are always ready to help, and they have never failed to provide real entertainment.

Verna Harris is the high school speech director.

Do not forget to bring a dime to school on Wednesday, October 31! Don't ask why!

BULLDOG REQUESTS

"Beer Drinkin' Blues" to Buck's boys.

"Cold, Cold Heart" to Miss Gordon and Miss Klapproth from Phil Slough.

"I Married The Thing" from Gerre (Gentry) Cappadona to Mickey Cappadona.

"Too Young"—??—to Lee Wood and "Toodles" MacEntire.

"Be My Love" to Barbara MacMillan from Loren Roberts.

"Hot Rod Races" to Mark McKinsey.

"Cigarettes, Whiskey, and Wild, Wild Women" to Jim Ervin from Jackie Brady.

Question Box

What do you like or dislike about the Bulldog?

Lella Norwood—"The questionnaires are great."

Jean Waddill—"I don't dislike anything in particular."

Camilla Ochoa—"I like the questionnaires."

James Weathered—"More articles about the students."

Vera Beasley—"I think the questionnaires are the best part of the Bulldog."

Fredy Bilbo—"It doesn't have any funny papers."

Evelyn Adams—"I like the features."

Ann Arick—"It's okay, but it ought to be longer."

Dianne Anderson—"Needs more humor."

George James—"More human interest stories."

Jimmy McClatchy—"It doesn't have Grace Boles' picture in it."

Al Cole—"It doesn't tell about Grace and Jimmy's love life."

Dan Black—"Cover more humorous details about certain happenings around MHS."

Betty Campbell—"I like the write-ups about different classes and clubs."

Peggy Read—"I would like to see better detailed stories than a lot of uninteresting articles."

Emily Hamilton—"More school news, featured stories, and less gossip columns."

Maxine Hill—"The questionnaires are not very interesting."

Leon Measures—"It's good enough, but it should have names, addresses and phone numbers of all new girls."

James Dozier—"I don't think it's worth a hoot—doesn't tell enough about students of MHS."

Fred Metzner—"I think it's pretty good."

Fat Boles—"The 'Rambling Rows' needs a new editor."

Nancy Roberts—"I've just had algebra again and I'm speechless."

James Johnson—"Bigger editorials."

Teachers Attend Association Meet

Five teachers enjoyed a brief respite from the hum-drum of classes to attend a Texas State Teachers' Association district meeting in Lamesa. Those attending were Mr. John Bixilo, Mrs. Holly Woolcock, Miss Hazel Lyles, Mrs. W. L. Mashburn and Wanda Myrick.

Some of the topics discussed were public relations, improved reading, legislation in behalf of public schools and teachers' salaries and retirement.

It's Never Too Soon To Discard Hazards Which Start Blazes

There once was a man who said, "Tomorrow I'll clear away the oily rags and paint cans from the garage." But tomorrow never came. The garage burned down that night because he dropped a lit cigarette on the pile of rags.

Now this man had a wife, and in haste she left the electric iron heating on the ironing board and went to the grocery store. When she returned the fire trucks were at her house extinguishing a blaze.

When every student brings an inspection sheet home, the parent is urged to complete it with the parents helping in the tour of the home.

Constitute Danger

A worn electric cord, a cord under a rug, accumulations of combustible materials and unguarded open stoves are among the many hazards that constitute definite danger of fire.

Cautions are necessary at all times to prevent fires. Careless burning of waste paper can cause great property damage. A burning cigarette tossed from a car is a great hazard to the Midland area because of the arid conditions. Prairie fires and grass fires caused by cigarettes have denuded the grazing land of many ranches. Think before you leave a cigarette. Be sure it is extinguished.

Safeguards in the home prevent fires that cause loss of life and property. In Midland there was a property loss of \$35,794.72 in 1950.

You can help protect your home and family from fire hazards.

Alan Harris, drum major, certainly is proud of his new uniform which he wore for the first time at the Brownwood-Midland game. The uniform is West Point style made of white whipcord with gold braid, buttons and belt. A purple shield with a gold design and MIDLAND across the top and epaulets on the shoulders give added decoration to the uniform. Everything possible is being done to have the band put forth its best appearance.

On its first out-of-town field of the school year the Midland High School band gave a performance at Fort Worth of which Midland High School can be proud. Representing the major industries of Midland and West Texas the band performed first an out well with a rumping air, and played "Old Black Magic." This was followed by the formation of a bow-legged cowboy twirling a rope to which the band played "I'm An Old Cowhand."

High School Band Marches In Parade Before College Tilt

The Midland High School Band took part in the parade preceding the Abilene Christian College-Texas Western football game here. This was the first parade this year in which the band wore its new uniforms. The band also preceded the city's fire engines in another uniformed parade to publicize Fire Prevention Week.

On its first out-of-town field of the school year the Midland High School band gave a performance at Fort Worth of which Midland High School can be proud. Representing the major industries of Midland and West Texas the band performed first an out well with a rumping air, and played "Old Black Magic." This was followed by the formation of a bow-legged cowboy twirling a rope to which the band played "I'm An Old Cowhand."

Freshman Collects 500 Autographs

One of the busiest boys in Midland High School during Howdy Week was Bobby Wilson. This active freshman obtained more than 500 autographs which helped him win a 1952 Catalo. Bobby really is a Midlander as he was born here in 1936. His school schedule consists of science, history, physical education, general math and English. His favorite subject is science but he refrained from divulging his favorite teacher. His favorite colors are red and green and as for food, he likes everything.

Bobby's hobby is handtooling leather goods. He enjoys this work and almost all his spare time is devoted to it. There are several examples of his work around MHS which show that Bobby is quite an expert in this.

This is his first year in high school and he says he likes it. As for Howdy Week, he said, "I liked it very much because I met a lot of people."

38 Vocational Agriculture Nine Seniors Students Go To State Fair In National Honor Group

Thirty-eight boys, enrolled in vocational agriculture, left October 5 for Dallas to visit the State Fair of Texas. The first night was spent at a little community, Cedar Hill. The boys went to see Cedar Hill's football game that night and were invited to a party in the community. Some of the remarks heard later: "I had a better time at Cedar Hill than I did at Dallas. The girls really were friendly to us, hope we go back there next year."

They arrived in Dallas at 6 a.m. the next day and entered the gate at 8 a.m. The midway was the first

place invaded. Then came the exhibits, museums, livestock yards and auto races. It was a record crowd. The boys saw some of the best show cattle in the nation, and some of the best sheep and swine to be found anywhere. According to James E. Mears, assistant agriculture teacher, the boys had a very interesting and educational tour.

The group went back to Cedar Hill Saturday night, then left the next morning for Midland, arriving at 6 p.m.

Jack Merritt also accompanied the group.

The Bulldog B squad had an open date October 6 and was scheduled to play the Lamesa B squad in Lamesa on the night of October 13. The team has a one-win-one-loss record going into the game. They have beaten Snyder and lost to Big Lake.

The Midland C team lost to Bowie of Odessa again October 7 at Memorial Stadium. The score, 13 to 6, showed that the freshmen had improved after the same team had beat them 18 to 6 a week before. William Brooks again was the standout for the C team.

The Boys' Physical Education classes are running a football tournament. The teams will play for about two weeks and then decide a winner. Also, there will be a change in the health students for the second six weeks. On the darker side of the question we find some very bad things have been happening while the boys are outside. In one of the P.E. periods last week a couple of their clothes while outside playing. One boy lost \$6. We think it is really sad that a few people are low enough to do such a thing. It not only is a crime, but it just sets back that much farther the chances of our school having an honor system and if it continues, we may even lose some of the privileges we have gained. It will ruin our school's reputation in the eyes of our townspeople and students of other schools.

It's up to you, fellows, as to whether or not we want a good school reputation. Why don't you think it over?

Pictures Are Taken For MHS Yearbook

The dressing rooms in the auditorium were bustling with excitement and confusion on Wednesday, Thursday, and Friday of last week as class pictures were made for the Midland High School yearbook, the Catalo.

Wednesday, pictures were made during first, third, and fifth period English classes; pictures of students in second, fourth, and sixth period English classes were made on Thursday and Friday, pictures were taken of those students who had been missed on the two days previous.

Roberts' Studio of Lubbock, took the class pictures this year. Two poses were made of each student.

Cafeteria Menu

Monday—Barbecued franks, field peas, cabbage slaw, cornbread, rolls, cake squares, milk.

Tuesday—Beef stew with potatoes, carrots, onions, combination salad, hot rolls, pumepapple pudding, milk.

Wednesday—Roast with gravy, sweet potatoes, English peas, carrot strips, hot rolls, peaches, milk.

Thursday—Creamed chicken on mashed potatoes, green beans, combination salad, hot rolls, cinnamon rolls, milk.

Friday—Sliced cheese, spaghetti with tomato sauce, pinto beans, lettuce salad, hot rolls, cherry cobbler, milk.

Bits From Here, There And Yonder

From exchange papers and various places we gathered these observations:

The ability to speak several languages is a timely asset, but to hold your tongue in one language is priceless.

The Texas Outlook

Today comes before tomorrow. Why try to reverse the process?

The Western World Lubbock High School

Do something every day, if for no other reason than because you don't want to do it.

NEA Journal

The Pessimist says: "It can't be done."

The Optimist says: "It can be done."

The Pessimist says: "I just did it."

The mind is like the stomach. It is not how much you put into it that counts, but how much it digests.

Don't wait for something to turn up. Get a spade and dig for it.

A man wrapped up in himself makes a small parcel.

Too many of us conduct our lives on the cafeteria plan—self-service only.

Jimmie Linebarger 'Bulldog Of Week'

It happened on July 6, 1934, that James Linebarger made his first appearance into the world. For older brother Charles, it just meant that he was no longer a baby. When he was two, he moved from Abilene to Midland where he has lived ever since. As the senior class president and junior class president last year, and his being so friendly and likeable, it is no wonder that he is known and well-liked by both teachers and students.

He stands about six feet, one inch, and has brown hair and blue eyes. Almost every time you see him except on the football field he is wearing a broad smile.

His favorite food is steak and his favorite color is blue. Football and a certain cheerleader rate first with him while his pet peeve is "nothing in particular and everything in general." When asked where he would like to attend school he said, "Just any place that will have me. This is his third year on the football team and he is a member of the National Honor Society and M Club.

Bulldog Editors Pleased To Know Paper Is 'Perfect'

The editors of the Bulldog are proud to know that our paper is perfect. The Bulldog is without a flaw and cannot be improved.

As you all know, the above statements are not true, but that is what you have told us in your letters. Our mail box has been vacant since the day it was placed in the principal's office.

Please, for the sake of the school and yourself, write us a letter and let us know how you really feel about the "Bulldog."

Thank you.

Baptist Minister Addresses Students

"May we so play the game of life that our Heavenly Father may say 'Well done,'" was the closing thought left with the students of Midland High School by the Rev. Vernon Yearby, pastor of the First Baptist Church, in a speech made in assembly October 10.

The theme was the comparison of our life with a ball game and the qualities required for success.

Following Mr. Yearby's speech, John Braun spoke on fire prevention. Braun stressed the importance of clean homes in order to guard against fire.

Speech Students Give Pantomimes

If anyone who has not taken first year speech or is not taking it now had walked into the room where a speech class was in session the last few days, he would have seen some startling things.

On display for a while was one of the most unique cars in the world. It was made of two stools, two chairs, and four tires that looked strangely like four boys on their hands and knees.

If you had walked in at just the right time you could have seen an orchestra playing old familiar tunes, even though you wouldn't be able to hear them. Because, for some strange reason, they had no instruments.

Does all of this sound mysterious? Does it sound rather peculiar? It was only Miss Harris having her students do pantomimes, which means that they use no properties except a table and chair and use no dialogue.

Each student gave a pantomime of his own origin followed by a few of Miss Harris' ideas concerning groups rather than individuals.

Speech Class Has Panel Discussion

The advanced speech class of Midland High School, under the direction of Verna Harris, gave a panel discussion of this year's debate question, "Resolved, that all American citizens should be subject to conscription for essential service in time of total war." Taking part were Loren Roberts, Harry Harrison, Tom Vannaman and John Murphy for the affirmative, and Evelyn Hejl, Patsy Yeager, Joe Turner, Shirley Brown and Robert Stubbeman for the negative. Royce Measures was the moderator.

Remember When!

One year ago: Yates Brown was the featured student of the week. Tommy Vannaman and Emily Hamilton got the leads in the junior play. Toya Chapple was elected student body president.

The National Honor Society took in nine new members.

The 1951 Catalos went on sale. Midland Bulldogs were preparing for the Brownwood game. MHS was observing Fire Prevention Week.

Two years ago: MHS Cafeteria opened for the first time. The MHS Gold Jackets were performing at halftime during the game.

Clubs elected officers.

While looking through the files we found that "Growing Pains" was the junior play for 1938. As far as we know, it is the only play given as a class play twice at MHS.

Parades Preceding Games Colorful

With purple and gold streamers flying, horns honking, band playing, and a lot of yelling, Midland High School has a colorful parade preceding each home game. These parades have a startling effect on the student body, as well as the general public downtown, as they arouse real football spirit. Three parades have been held, and two more are coming up.

Leading the parade is the Midland High School Band, clad casually in blue jeans; following them come the Half-timers, dressed in purple and white. Following the Half-timers are the cheerleaders in Jane Beakey's convertible. After this comes a great number of gaily decorated cars, and in almost every parade can be seen James Dozier's loud car which has a number of names painted on it with a variety of colors.

Rambling Rows

By Marion Sevier

After each period this week you could hear the familiar phrases of "Gosh! I failed that one," or "That's the hardest test I've ever taken," echoing down the halls. It was only the dreaded six weeks test they were referring to. I think it must have taken the teachers all Summer to prepare some of those dillies!

The most hated person around Midland High School last week was the recreant who broke into the candy machine and completely cleaned it. Somebody sure likes candy! Please keep your candy and gum papers off the floor. If this isn't stopped, I think everybody knows the consequences.

Each week an outstanding boy in different activities is chosen as "The Junior Lion of the Week" to attend the Lions Club luncheon on Wednesday. Tom Dyer went the week of the Brownwood-Midland game, wholeheartedly supporting the football team by wearing a lick the lions bangle. I think he was a little embarrassed when he was asked to explain himself. Larry Mayfield was chosen as Junior Lion last week.

In case anyone didn't know there is a big "P" before each home football game on Friday afternoon. The cheerleaders lead the parade riding in Jane Beakey's Ford convertible followed by the band, "Half-Timers" and usually about 15 decorated cars. Last week Jim Ervin had air horns rigged up on his car and attracted quite a bit of attention.

The art department has been busy making Howdy Week posters, Junior Play posters and posters for the Catalo cone candidates. In fact, the school resembles an art gallery more than a high school at the present.

The crew who journeyed home week before last were Lynn Griffith, Isleta Terry, Ben Gray, Shirley Winter, Charles Crabtree, George Glass, Duane Bush, Jack Burris, W. H. Black, Jo Ann Nelson, Joe Barnett, Tom Sloan, Asa Bland, Bob Burke, Jerry Culp, Mary Jo Hejl, Charles Jones and Allan Olson.

Dennis Midday broke his arm in a C Squad practice. He tells me Carol Nail hits pretty hard.

This week was fire-prevention week. The Midland High School band led the fire-prevention parade Monday. They had several fire drills. The instructions were read in all classes concerning which stairs to use.

Something new has been added, a special machine located in Coach Mashburn's office. They can be bought for five cents apiece.

Maxine Hill was the maid of honor and Mary Ann Hill was a bridesmaid in their older sister's wedding October 6.

Carnival Planned

The P-TA is planning the "best-ever" Halloween carnival for October 31. Be sure to attend.

Peggy Read, Jane Beakey, Betty Pitzer, George Stump and Jackie Eward had a picnic, and they tell me they played football. It's too bad they won't let girls play on the football team. Let's start a crusade for women's rights!

If you see Pat Boles carrying a little tin can around begging for money, you will know that it was a gift from some of the freshmen girls and drop a penny in for "poor Pat" really it is a worthy cause. (I won't say what cause.)

Miss Gordon's senior English class is tending MacBeth and she makes it more interesting by playing her set records.

Joel Sims and Roy Douglas who are in the Navy are home on a furlough. They have to report back on October 17.

The cheerleaders put the freshmen to work before the Brownwood game. Pat Curran, Toodles McEntire, Shirley Henderson, and Peggy O'Neal helped them decorate the goal posts. Thanks, fish!

The question of the week is "What is October 31?" on the blackboards for? You'll have to wait to find out but, it won't be long.

Coming Events

October 17: Assembly — Junior Play skits.
 October 22: Junior Play.
 October 23: Junior Play.
 October 24: Assembly — to be filled.
 October 26: Pep rally for game with Lamesa; home game with Lamesa.
 October 31: Assembly A Cappella Choir—Annual Halloween Carnival in the gym beginning at 6:30.

Pioneer Settlers' Feats Duplicated

VICTORIA, BRITISH COLUMBIA (AP)—Two Victoria girls duplicated the feats of British Columbia's pioneer settlers recently and rode two horses across the Rockies.

Ann Wilson and Phyllis Elwood of Victoria explain their trip this way: "We had the horses in Alberta and we were in Victoria, and so we decided to go to Red Deer, and bring our animals out." The trip took nine weeks.

FILMS FOR LIBRARY

There are 34 films in the library, and they are for the use of the school. Most of the new books have arrived; they are on the shelves in the library and in circulation. More books are expected to arrive shortly.

MAKING PASSES—University of Miami footballers manage to keep their eyes on the ball as they toss piggskins into a net held by Sandra Pendry, left, and Doris Medlin, local beauties, in a pre-season workout on the beach at Miami. Will they do as well when their targets are mere men later in the season? (NEA)

91 FIRES DAILY
 Cause—Carelessness
 Cure—Vigilance and good plant housekeeping

OBEY SAFETY RULES
 NO SMOKING
 Be sure it's out when it out. Don't take chances with defective equipment. Beware of static electricity.

AVOID SPONTANEOUS IGNITION
 Keep oily rags in cans
 Use care with flammable liquids
 Provide ventilation

ENCLOSE VERTICAL SHAFTS
 Don't pile stock against doors. Keep fire doors closed. Mark and keep exits clear.

MAINTAIN SPRINKLERS
 Keep water valves open. Too high stock piles cut off water spray. Keep extinguishers ready.

TRAIN PLANT FIRE BRIGADE
 Inspect hose and fire equipment monthly. Cooperate with local Fire Department.

Lynette Howell Wins Howdy Week Contest

If you saw a cute, brown-haired, blue-eyed girl running all through the halls shouting, "Please sign my Howdy Book," it was Lynette Howell. And she won! Lynette secured 80 names.

Lynette is a freshman this year, and she says she still is a little confused by high school. She likes all her classes, but home economics seems to be her favorite. The color blue seems to fit her best, and she dislikes horned toads, lizards and other small animals. We found out by under-handed means that her nickname is "Pinky."

High School Band And Half-Timers Make First Trip

The Midland High School Band and Half-Timers made their first trip of the year to Fort Worth this weekend. They got off to an early start Saturday morning, and arrived in Fort Worth late in the afternoon, traveling on school buses.

After supper, they went to Farrington Field, where they changed into their uniforms and took their places. After the game time was taken for a meal, and then they started back on the long trip, arriving in Midland in the wee hours of the morning. Everyone was tired, but admitted that they had had a lot of fun on the trip.

BRITISH ELECTION CAMPAIGN TAKES SHAPE—Britons must decide on October 25 whether to continue a six-year experiment in socialism or return to a modified version of free enterprise. But the campaign now underway includes other issues, as indicated by the above caricature sketches of the two major standard-bearers and their followers. Attlee's Labor Party hopes to sell itself as a peace party, with the opposition labeled "warmonger" Churchill's Conservatives, on the other hand, hope to sell voters on a shift toward free enterprise, with less government meddling. The Conservatives charge Attlee's government with responsibility for British set-backs in Iran, Egypt and elsewhere on the foreign policy front.

PET-TY LARCENY — With pennies getting scarce, organizers of the Tony Campanaro's monkey trial, a solution in helping himself to the contents of a youngster's pocket while making his rounds in Philadelphia. It was all part of the fun at the Chestnut Hill Main Street Fair.

Dirt, Squirt and Quirt

— FARM, DAIRY AND RANCH NEWS —

The market on most classes of cattle at the Midland Livestock Auction Company sale Thursday was steady to strong and active. Receipts were 1,168 head. Shipments to out-of-state buyers were restricted by an acute car shortage.

Fat calves and yearlings sold for \$29 to \$34, medium \$24 to \$29, commons and culls \$18 to \$24. Fat cows drew \$21 to \$27, mediums \$19 to \$21, canners and cutters \$15 to \$19. Bulls brought \$24 to \$28 and good young bulls were higher.

Stocker steer calves were bid from \$35 to \$39, heifer calves \$33 to \$38, steer yearlings \$25 to \$28, heifer yearlings \$27 to \$31, stocker cows \$19 to \$22.

Chickasaw Mike, owned by Buster Welch of Midland, topped top honors in the Cutting Horse Contest October 5 in the New Mexico State Fair Rodeo at Albuquerque, according to an Associated Press dispatch.

Services Are Held For Alonzo Houston

STANTON—Funeral services were held here Saturday afternoon for Alonzo Raymond Houston, 59, who died Friday morning of a heart ailment.

Houston was a native of Stanton and owned extensive ranching interests.

He is survived by two sons, four daughters, three brothers, a sister and two grandchildren.

The services were conducted by the Rev. J. B. Stewart of Spearman in the First Methodist Church, under the direction of the Arrington Funeral Home. Interment was in Evergreen Cemetery.

New Asphalt Gives Trees More Water

CHICAGO—City trees may become more plentiful once the root of the problem is reached generally.

The answer, according to the American Public Works Association, may be the new porous asphalt being tried out in Providence, R.I. This asphalt allows 80 per cent of the rainfall to percolate into the ground to the tree roots.

MIDLAND MARKSMAN

NORMAN, OKLA.—Louis A. Griffith, son of Mr. and Mrs. A. N. Griffith, 1805 West Illinois Street, Midland, is a member of the air force rifle team at the University of Oklahoma this fall. The team has 43 members and is headed by Cadet Maj. John A. Wupperfeld, team manager.

Crane News

CHANE—Mrs. P. O. Vines was the honoree recently at a surprise birthday party given for her by her husband in the Vines home in the Gulf Camp. Those attending were Mr. and Mrs. S. S. Bangeman, Mr. and Mrs. Bob Hester, Mr. and Mrs. C. P. Brunette, Mr. and Mrs. N. A. Layfield and Mr. and Mrs. Jack Newland.

The Fireman's Auxiliary made plans for a Halloween party at a meeting recently in the home of Mrs. C. C. Swift. Mrs. Lloyd Wimberly presided. Others attending were Mrs. Jess Miller, Mrs. D. W. Perkins, Mrs. D. P. Smart, Mrs. Lewis Earley, Mrs. Bud Porter, Mrs. A. T. Carroll, Mrs. Norman Truitt, Mrs. Pete Maddox, Mrs. Jim Turman and Mrs. Bill Edmiston.

The Gulf employees of the production and pipe line division held meetings in the Gulf Recreation Hall last week to discuss safety measures. In an effort to boost safety by slowing down traffic in the area, the men have posted speed limits of 18 miles an hour for cars and 15 miles an hour for trucks. Five men are to be appointed to help enforce the rules.

Mrs. George McCorkle was appointed general chairman of the annual oyster supper to be given by the Order of the Eastern Star November 17 in the Masonic Hall. The appointment was made at a recent OES meeting. It was announced Mrs. Opal Barnard and several other members were to leave Sunday to attend the annual session of the Grand Chapter of Texas to be held in San Antonio. Mrs. Freida Hagall and Mrs. Helen Seals were hostesses.

Mr. and Mrs. Bob Floyd have as their guest, Floyd's mother, Mrs. C. P. Brunette, of Victoria.

Following recovery from a long illness, Mrs. M. E. Livingston is back in the Blue Bonnet Beauty Shop on Thursday, Friday and Saturday of each week.

Mrs. Jim Plumlee was hostess to the Young Matrons' Bridge Club recently at a meeting in her home. Mrs. C. O. Walling took high score and Mrs. Jim Bevins and Mrs. Coffield won the other prizes. Others present were Mrs. Jeff Robbins, Mrs. Wilburn Pettit, Mrs. Roy Moore, Mrs. Bill Hogsett and Mrs. L. S. Adcock.

Mr. and Mrs. E. F. McGlothlin left recently for a two-weeks trip to Breckenridge, Fort Worth and Dallas.

The Student Council made plans for a Masquerade Halloween party to be held October 27. The plans were discussed at the council's regular meeting Tuesday. The group also discussed parliamentary drill, the sale of programs at the football games and "The Student Life," a magazine of news from other schools.

First mention of Robin Hood was made in a poem in 1377, according to the Encyclopedia Britannica.

Permits For Year Total \$12,602,445

After two consecutive weeks of million-dollar building permits, construction in Midland dropped to \$93,550 last week.

However, each week's total until the end of the year will add to a record-breaking mark for 1951, which now is \$12,602,445.

Midland Home Owners firm was issued permits for 11 frame residences costing \$2,500 each in the 1100 blocks of South Johnston and South Pratt Streets. The permits totaled \$27,500.

R. W. Allen received a permit for a \$25,500 brick veneer residence at 1710 Princeton Street.

Midland Mercantile Company was granted a permit to add to a brick and retail store building at 918-920 South Main Street at a cost of \$10,000.

Other Permits Listed

Other permits of the week included: A. E. Hutchinson, for J. B. Duffett, \$3700, frame residence at 1118 Maple Street; D. H. Laughlin, \$4000, repair frame residence at 1703 Seaboard Street; E. C. Trice for H. F. Kelly, \$3,000, move frame residence to 401 Wadley Street; J. L. Davis for L. L. Hanks, \$2,500, move frame structure to 2411 West Kentucky Street; J. S. Kirkpatrick for Dewey Compton, \$2,000, move frame residence to 3500 Truck Route, add \$2,000 by Kirkpatrick to move frame residence to 1410 South McKenzie Street; E. C. Trice, \$2,000, for Frank Whitley, move frame residence to 1700 West Rhode Island Street.

J. L. Davis for L. L. Hanks, \$1,500 to move frame structure to 2411 West Kentucky Street and \$1,500 for frame servant quarters at 2409 West Kentucky Street; J. W. Williams for B. L. Crites, \$1,500, add to frame structure at 507 West Florida Street; W. H. Hester, \$1,500, add to frame structure at 1202 West Kentucky Street; John L. Stone for S. L. Parham, \$1,400, add to brick veneer structure at 1409 West Storey Street; G. C. Connell for P. A. Nelson, \$900, move frame servant quarters to 709 North Colorado Street; Trigg Vines, \$800, frame structure at 709 South Weatherford Street; J. E. Robinson, \$500, frame structure at 302 North Carver Street; H. B. Mills, \$450, frame carport at residence on Andrews Highway.

Indiana Legislature Has Honorary Page

INDIANAPOLIS — A Kokomo High School senior from the Western zone of Germany served as an honorary page at a recent session of the Indiana legislature.

Erich Mueller, 17-year-old son of a German dentist, was brought to the U.S. last month on a scholarship awarded by the American Field Service, a volunteer organization.

Mueller was introduced on the House floor by Rep. Earl M. Uterback of Kokomo.

Trailer House Residents Boost Midland Population Figure By Several Thousands

By TANNER LAINE
The other day a woman from Corsicana got off a train in Midland and started out to find her sister, whom she was to visit.

The only address the visitor had was "a trailer court" in Midland. An interesting little search was begun and before it was over, the Chamber of Commerce of Midland had been solicited to help find the sister.

The search ended happily. And then, Delbert Downing, chamber manager, did a little reflecting on the extensive search. He had counted more than 19 multiple-unit trailer courts in Midland. He had seen dozens and dozens of individual trailers.

There now are hundreds of trailer homes in Midland and the trailer house population represents a good segment of Midland's estimated 28,000 citizens.

Midland has quietly but quickly absorbed these hundreds of homes on wheels.

If you want to see how—take a tour of your own. Go out, any highway leading from Midland and look right and left—you will see them. One Midlander says he has counted more than 600 trailers, and admits missing some.

There is no official count of the number of trailers, but figuring three occupants to the trailer house, Midland has about 3,000 persons living in them. Of course that's an estimate, but the trailer population is growing daily.

The Skyhaven Trailer Courts on East Highway 80 has more than 80 trailer houses. The Modern Trailer Courts on North Big Spring Street, just off to the right on the Lamesa Highway, has 31.

Along Florida Street
There are a series of trailer courts along East Florida Street. The Southside Courts, a large concentration, are located on the Rankin highway. Then, out on the Andrews highway are the R&M Courts and a good-sized court is on West Highway 80.

And more are springing up on the Garden City highway.

You can find trailers in Midland ranging in value from \$500 to \$6,000. Look at some of the recent classified ads appearing in The Reporter-Telegram.

"Trailer space for adults and infants, dial—"

"Trailer bargain."

"Trailers built for gracious living." "Will sell my equity in 32-foot trailer house, complete with flush toilet."

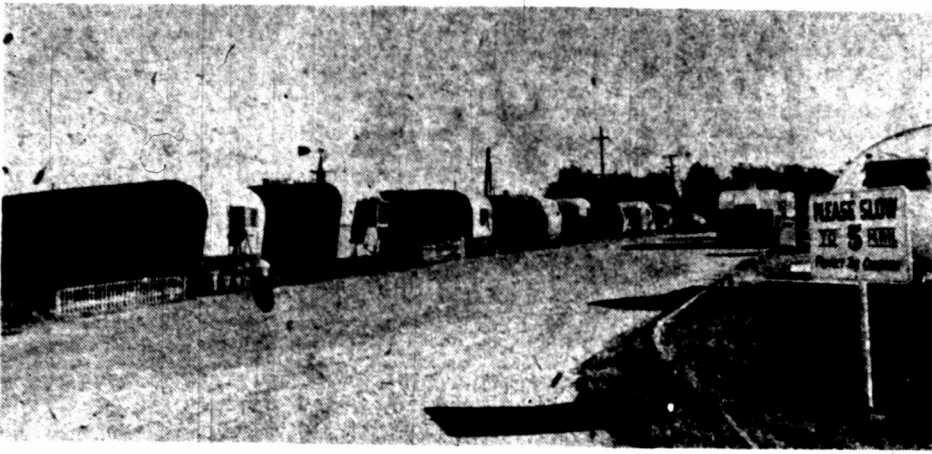

"Bargain: 27-foot deluxe trailer coach, new paint, carpets on floor, hot water heater, four-burner stove, dual tank, tandem wheels."

At several of the trailer courts are two-story trailer homes, some with two bedrooms, some with complete bath rooms.

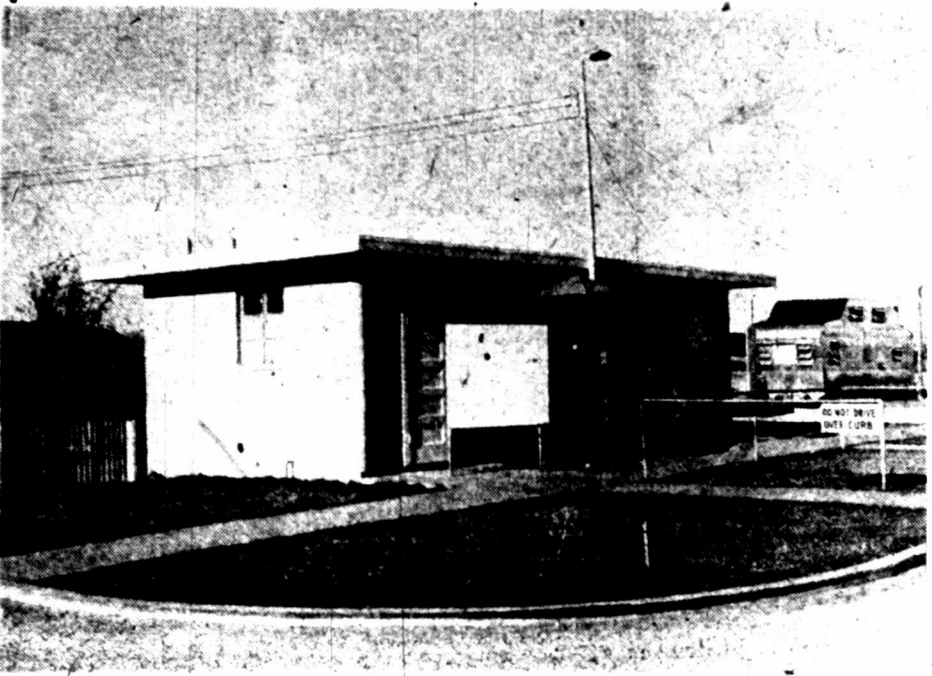

Relatively New Thing
Trailer houses are relatively new in Midland. A few years ago there just weren't any. Development of the Spraberry Trend near the city has brought many persons here in trailer homes.

But not all the residents of trailers are in the oil business. Take, for example, the Smalls at Modern Trailer Courts on North Big Spring Street. Mrs. Grace Small is employed at Western Clinic-Hospital. Her husband is a mechanic for Curlew-Petroleum Company. They came from Tennessee.

However, approximately one trailer home out of three is occupied by

This is one of Midland's many trailer home groups.

Trailer courts have central wash houses like this one.

people in the oil industry.

Many of the trailer occupants have children. The R. W. Cox family is an example of the many folks living in trailers who have youngsters. Their youngster is young Miss Debra, who hasn't been in the trailer long, in Midland long, or in the world long for that matter.

At the R&M Courts, there is a big sign at the entrance.

"Protect children." There are plenty of playpens beside the trailers on these warm afternoons.

Meals are cooked on a neat little stove, compactly located in a trailer home. Gas fuel is either natural or butane, depending on the location of the court. Many are air conditioned.

Many of the trailers in Midland have neat, closely-cropped lawns around them. Also, some of them have attractive fences—both for "backyard and front."

Most of the trailer courts have a centrally-located wash house and restroom and have public telephones and mail delivery. Some trailer "streets" are paved. Some even have a curb.

Children of trailer occupants, of course, go to Midland schools.

Ride School Buses
A court at South Elementary School last week showed that 142 students live in trailers. The school's total enrollment is about 900.

School buses go right by several

courts and are boarded by students.

There are community clotheslines at the trailer courts and there are individual clotheslines.

The average trailer is metal and streamlined. It is jacked up off the tires when located. It contains a small bedroom, kitchen and living room. Curtains usually are gay and colorful.

If you never have been in one, here is a first impression—there is more living space inside than one would think after just looking at the outside.

Most of the trailers have closets and storage space.

What about the rent? Trailer space at one Midland court, perhaps the best one seen in a tour, costs \$30 a month, including electricity, water and gas, or \$7.50 if taken by the week. Another large court charges \$20 a month or \$6 per week. This also includes utilities.

Several of the city's courts are well shaded by trees. The occupants are working people, friendly, just average folks. Many are not sure how long they will live here. Others expect to be here a long time and prefer the trailer home for several reasons.

"We can't afford high rent and so we live in our trailer," one occupant said.

Life goes along in the trailers much as it does in regular homes. The children play inside and out.

Play With Football

Who knows? Maybe a couple of future Midland High Bulldogs are growing up in trailer homes at the Southside Courts. There can be found Ricky Henderson and Larry Joe Brady, aged two and seven, respectively, playing with Tugboat's favorite—a football.

Ricky is the son of Mr. and Mrs. J. M. Henderson. The father is an oil field driller who came here from Snyder to work for Zephyr Drilling Company. Larry is the son of Mr. and Mrs. Leo Brady.

Red Propaganda Film Predicted

LINDEWERRA, GERMANY—(AP)—German Communists are faking propaganda movies to show that the East is a land of refuge from the terrorist west. Dock workers at this little border town in the U. S. Zone can tell you how it's done. The other day they noticed that a ferry which plies the Werra river between here and the Soviet Zone was chugging toward the dock ahead of schedule.

"Go back! Go back!" they yelled. "You're an hour early. We can't handle you now."

As they waved their arms angrily to motion the ferry back they saw a camera crew perched on the ferry filming their protestations. A few days later the dock workers saw the same camera crew set up across the stream in the Soviet Zone. Three men in civilian clothes waded out into the stream toward them, then turned and started swimming back to the Soviet Zone shore. The camera crew went into action. The dock workers predict the finished production will show how three men "escaped" their "pursuers" in the "terror-ridden" U. S. Zone and were received in the Soviet Zone with open arms.

BOMBER BATCH
ITHACA, N. Y.—(NEA)—Ithaca College, facing a seven-game football season, has 65 candidates exclusive of freshmen.

Transparent soap is made by dissolving ordinary soap in alcohol to precipitate impurities.

And trailer boys play cowboy, too. Dwayne and Tommy Casbeer are a couple of booted Hopalong found at a trailer court. They came here with mom and dad from Hamilton last February. Dwayne is five and Tommy is four. Their dad is a driller.

Perhaps Midland's first trailer court sprang up during the war.

Not all of the trailer homes are concentrated in parks or courts. Many are individual affairs and are widely scattered over the city.

The city receives inquiries daily from persons wanting to establish new trailer courts here.

Space is at a premium in the courts. Many families are just waiting to move in their "home on wheels." One family is at Rankin at this moment and will move to Midland the minute a space is available.

THE BEST INVESTMENT FOR YOUR ADVERTISING DOLLAR

First With The News

MIDLAND, TEXAS, SUNDAY, OCTOBER 14, 1951

SECTION FOUR

Children play in the "yards" of trailer homes.

There was a government trailer court near Indian Park. It provided housing for families of soldiers stationed at Midland Army Air Field. The trailers were olive drab and were uniform in size. Many were sold as surplus here after the war.

One of the first courts of the city was Skyhaven, now one of the larger units. Also, an early court was that belonging to a Mr. Olliff on East Florida Street, and it still is operating.

British Fighting Methods Observed

SINGAPORE—(AP)—A 12-man liaison mission from Burma got a firsthand look at how British air forces are fighting the Red terror-ists in Malaya.

Seven Burmese officers and five non-commissioned officers made an eight-day tour of the R.A.F. operational bases and flew with some of the squadrons in September.

The mission was led by Flying Officer Soo Hlang, commanding officer of one of Burma's transport squadrons.

BOOST SEEN FOR LATEX PRODUCTION
KUALA LUMPUR—(AP)—Hormone treatment may give a big boost to the production of latex in the Federation of Malaya.

Producers claim commercial production of a recently discovered stimulant would increase the yield of latex from rubber trees by 20 per cent annually.

The stimulant is said to be a combination of plant hormones in an oil base. Although new to the rubber industry, plant hormones now have numerous uses in other branches of agriculture, including the preservation of potatoes in storage, rooting of cuttings and the prevention of the early fall of fruit.

Now driving's a joy!

It's so easy! Just set the lever to "Drive," press the accelerator, and you're off—swiftly, smoothly, without effort.

Forget the clutch pedal—there isn't any. Forget shifting—Powerglide does away with it. You just "sail away" as Chevrolet's big 105-h.p. valve-in-head engine responds to a touch of your toe.

More than 500,000 satisfied owners—more than a billion owner-driven miles—prove the dependability of Chevrolet's

sensational Powerglide automatic transmission.

But, remember, only Chevrolet offers Powerglide—as well as such fine-car features as Body by Fisher, Unitized Knee-Action ride, and Valve-in-Head engine design.

Your "discovery drive" is waiting for you. There is nothing in the low-price field to compare with time-tested and time-proved Powerglide. Come try it... soon!

TIME-PROVED POWERglide CHEVROLET

AUTOMATIC TRANSMISSION

More people buy Chevrolets than any other car!

*Combination of Powerglide Automatic Transmission and 105-h.p. Valve-in-Head Engine optional on De Luxe models at extra cost.

Chevrolet alone offers this complete Power Team!

POWERglide Automatic Transmission*

Gives you simplest, smoothest, safest no-shift driving at lowest cost. No clutch pedal—no gearshifting—not even a hint of gear changes in forward driving!

Extra-Powerful 105-h.p. Valve-in-Head Engine

Powerglide is coupled with the most powerful engine in the low-price field—Chevrolet's extra-efficient, 105-h.p. Valve-in-Head Engine—the trend leader for the industry.

EconoMiser Rear Axle

Rear wheels travel farther at each engine revolution... fewer engine revolutions and less gas at highway speeds. Result: traditional Chevrolet economy in over-all driving.

Oil Does It All!

Oil replaces gears in the Powerglide Transmission. No direct mechanical connection between engine and rear axle. You have an infinite number of drive ratios.

Korean Sharpshooter: A B-29 Ride With MIG-Killing Gunner

Sgt. Billie G. Beach

By SGT. BILLIE G. BEACH, USAF
Written for Air Force Magazine

OKINAWA—(NEA)—I'm just a farm boy from East Tennessee. Before I got into this war business, the fastest thing I ever shot at was a squirrel scampering up a hickory tree in the Blue Ridge Mountains. Of course, a squirrel can't shoot back, but outside of that it's a lot like hunting for MIGs.

They're both greased lightning and you've got to be fast to get them. If you miss on the first shot you generally don't get a second chance.

You only have a split second to spot your target, draw your bead and fire. But you've got to be cool and deliberate. I never saw a jumpy, excited guy drop a squirrel. And I don't think I'm off base when I say that goes for jet airplanes, too.

Those first months of the war were just so much flying time for us gunners. We sat and watched—maybe ate an apple or read a book or a comic magazine—while the bombardiers and pilots did all the work.

Being In Jets
We came into our own early this year when the Reds brought in their jets. At first it was an off-hand pass here and there. The Commie pilots were skittish and wouldn't get close enough to get our range.

But they kept getting bolder and bolder. They started shooting up the Superforts. It got so you hadn't lived if you didn't come back with a few bullet holes in your plane. I decided I wanted to knock down one of those MIG's. We used to have a lot of arguments about whether a gunner with a 50 caliber machine gun on a propeller-driven bomber could bag a jet fighter flying at maybe twice the speed.

I said it could be done and I promised myself I'd prove it. I didn't realize at the time, though, how near carrying out that pledge would take me and the crew to our deaths.

On No. 19
It happened on my nineteenth mission (I now have 26)—my third flight out as the regular right gunner on the B-29, "No Sweat."

The briefing officer told us it would be one of the most dangerous missions of the war. Our targets were those bridges across the Yalu over which the Chinese were shipping all their men and supplies.

We were told the flak would be thick and accurate and that MIG's would be on our tails in large numbers. Our targets were in sight of the big Red airbase just across the Yalu River—in the deep end of "MIG Alley."

It was about noon when we got the alert that we were approaching the target area. Everybody got ready for the bomb run. We were less than five minutes away from the bridges.

Shouts Into Phone
Then the tail gunner shouted into the interphone:
"MIGs, about 30 of 'em, coming in at six o'clock."

They were MIG's all right. They were coming in fast at six o'clock and breaking away at four—right in line with my sights. They shot for the tail first and then swung to hit us amidships.

They were coming so close I could see the orange fire spit from the barrels of their 20 millimeter cannons.

I started firing as soon as I got one in range.

I caught my first MIG on the breakaway. I tracked him and kept firing short bursts. He got out about 900 yards before I saw he was out of control.

The last I saw of him he was spinning like crazy—straight down. One of the crewmen saw the plane crash.

Still they came. Three minutes and four passes later, I spied this other baby coming in at 1:30, low. I picked him up 1200 yards away. I chopped into him with short, steady bursts.

That MIG got out about 400 yards and keeled over on one side. I watched it go into a headlong dive and crash and explode on the mountain below.

That was the last shot I've had at a MIG. And I had about 100 rounds of ammo left in my belts.

The fighter escorts moved in and got the MIGs off us. But in the eight minutes they were on us they hurt the "No Sweat" plenty bad.

Engines Shot Up
Both the number two and four

We slid in on the belly and nose wheel.

The old "No Sweat" came to a halt with her nose over the road running alongside the airstrip.

But after 90 missions during the last war and I don't know how many in this one she had come through once more—she brought her crew home safely.

There were flak holes in the wings big enough to stick your head through. The sides looked like Swiss cheese.

I certainly don't want another day like April 12, but I want to stay in the Air Force and fly—even if it does mean more close scrapes.

Golf Course Aptly Named

RANGELY, COLO.—When the boys in northwestern Colorado talk of playing a game of golf, they're speaking in the most general terms imaginable.

True, they use golf balls and golf clubs. But the course at the Slush Pit Country Club certainly isn't play and there is some doubt that it's golf. But every Slush Pitter loves every impossible yard of the wind-lashed, sun-beaten layout.

The club's program refers to the course as "nine holes of hell" and warns it is "not responsible for tick bites."

R. H. (Gus) Angus, manager of the California company's gas extraction plant and the club "pro," insists nobody has ever broken par. This is 36 for the 3,486-yard, nine-hole spread.

But you haven't heard about the hazards.

"We've got 'em," Angus says. "There are, of course, the slush pits. We also have rod derricks, pumping units, wells and maintenance equipment on the course. The ninth hole fairway also serves as an airstrip."

"There aren't any greens. We couldn't even grow weeds here."

A mixture of sand and oil serves for putting. The "greens" must be smoothed with a heavy iron dagger before any attempt to putt the ball into the cup.

Angus says he wouldn't mind tackling Ben Hogan at the Slush Pit.

Spoilage In Grain Develops Rapidly

WASHINGTON—(AP)—Grain spoilage due to weevils can develop very rapidly, the U.S. Department of Agriculture says.

Five generations of rice weevils can develop in 120 days, the department says. If conditions were ideal, one pair of weevils might produce 151,875,000,000 weevils in that time. Department men say that ideal conditions are virtually impossible. But they point to the mathematical computation to show that farmers and grain storage men should watch closely for infestation.

They estimate that five to 10 per cent of all stored grain is destroyed by pests.

A skunk can quirt his defensive liquid as much as 15 feet.

Danbury Event Typical Of Great U. S. Fair Season—Except It's One-Man Show

DANBURY, CONN.—(NEA)—In the Gay 90's there was a highly popular event which went like this: I went to the Danbury Fair. The birds and beasts were there. And the old baboon.

By the light of the moon, was coming his morn hair.

This month the old baboon will come out of wraps again. Mounted on a pedestal which bears the words of the old ditty, it will be on hand to greet the customers at the 1951 Danbury Fair and stand as sort of a symbol of the country fair season, now reaching its annual peak all over the U. S.

The Danbury version, which has been going for a long time, is now one of the biggest in the East. It

is also typical of the great American fair except for one thing: It is probably the only one in the country that is completely a one-man operation, run without any state subsidy.

From Connecticut Impresario at Danbury is John Leahy, a self-styled Connecticut Yankee operating somewhat in the tradition of the fabulous P. T. Barnum, who also hailed from Connecticut.

In tattered work pants, scuffed saddle shoes and an old tennis hat, Leahy looks like just another workman around the sprawling fair grounds. In a way, he is. He bosses the whole show and also attends to some pretty small details, too, even

to replacing fuses or getting new casters for the office swivel chairs.

He is also a millionaire oil distributor whose full-time hobby happens to be running the fair as its landlord and sole owner.

"As a boy I had three ambitions," Leahy says, "to own a pair of white swans, a new car with white-walled tires, and to make money."

Purchases Leahy At 66, he has achieved all three, and is a country tycoon in the city where he grew up and want to work after the eighth grade for \$4.35 a week. At 18, he bought a lathe and went into business for himself.

The machine shop he started in those days is still running, but his oil distribution business is the big money maker, having gotten that way because Leahy would deliver fuel to customers in storms or at hours when other companies wouldn't.

While the oil brings in the money, for the last eight years The Great Danbury Fair has taken up most of his time and energy. He talks unceasingly about it to anyone within earshot—workmen, visitors, farmers, small children, and probably, if no one else is around, his two pet swans.

Leahy claims he doesn't know whether the fair makes money or not, but Danbury businessmen who know him are sure that if Leahy isn't making money on his hobby, he's not losing any, either.

His idea of a fair is first to present farm products to show agricultural progress, then to be educational, instructive and entertaining, in that order.

"Why, over in that shed," he points out, "we have the original wood-burning pioneer railroad engine—the Daniel Nason. It was running in 1858 when Lincoln was nominated. Took me two and a half years to buy that one. Just think of the history lessons that teaches!"

Another of Leahy's ideas is an aversion to free passes, a policy which is strange to the entertainment business and which nettles a number of people around Danbury. He thinks if his fair is worth coming to, it's worth paying for, and would gladly pay his own way into one of the exhibits of which he's proudest.

That's the P. T. Barnum shed, where a number of the famous stunts and animal attractions he made famous have been recreated.

In summertime, Danbury fair grandstand becomes a theater where old-time musical shows are revived. Here some of the cast relax in the sun on the edge of the fair's race track.

Achievement: One of Leahy's three ambitions was to own a pair of white swans. They're his pets at Danbury Fair grounds show.

Leahy, for whom Barnum is something of an idol, spent \$3,000 to build a life-sized electrically-operated model of Jumbo, the giant elephant.

Gives Him Shape Leahy got into the fair business because a woman gave him a share of stock to pay her bill. "The fair wasn't doing so well then, so he was able to buy up the stock, saved the grounds and buildings from being foreclosed, and took over control.

This Summer Leahy also became a producer, converting the steel and concrete grandstand into a theater where revivals of Rose Marie, Naughty Marietta, and other musical comedies and operettas were staged. He intends to keep it up.

"People love old music and old songs," he says. "It's a great thing to bring them to people."

He has another idea about bringing things to people, too.

"I'd like to dramatize the Great Danbury Fair on Broadway with real animals, special staging, a big production. Real big."

Leahy likes to do things in a big way, like country fairs.

Gas in electric light bulbs is below atmospheric pressure when the bulbs are cold, but when they heat up the gas expands and the pressure is about that of the atmosphere around the bulb.

THE LINE IS BUSY—Riding high above the rugged mountain peaks on the Central Front in Korea, a U. S. soldier of the 7th Division uses an aerial tramway that hauls supplies to UN front-line troops. The high-wire transport system, rigged by U. S. engineers, hauls men and supplies with equal ease. (NEA-Acme photo by Staff Photographer Jim Healy.)

Around Midland with Barbara

Start Christmas Shopping Now—Lay-Away

Spending money wisely is as prudent as saving it. When you buy quality merchandise at KRUGER'S on the lay-away plan and pay a little cash weekly or monthly, you are really saving money.

With Christmas not far off, Kruger's offers you this opportunity to lay-away any of the fine merchandise for as low as \$1 down. The store features the finest advertising, nationally advertised watches, luggage, beautiful costume jewelry, radios, and many other fine items you'll want to own.

Will Take Your Phone Calls—THE MIDLAND TELEPHONE ANSWERING SERVICE

will take care of your telephone calls during the day and night. Our men, doctors and other business people who need someone to take their calls will find the service most efficient. Mrs. B. G. Anderson operates the service. She will take your weekend calls from Saturday noon until 8 a.m. Monday morning, your night calls from 3 p.m. until 8 a.m. the following morning. Dial 2-4301 and arrange to have your office calls relayed to this number.

Harvest Moon Special—

Just see how your friends who dance seem to have the most "dates" and have the most friends. It costs so little to learn and enjoy the latest dance steps. We can say that two can dance as cheaply as one at TOWN AND COUNTRY DANCE STUDIO. 314 North Colorado. Dial 2-1142 and ask about the Harvest Moon Special which enables two people to take lessons for the price of one. Be in the swing at Christmas and New Year's dances.

Synchronize Your Business To Your Desk—

DuKane Flexifone Intercom Systems enable you to carry on a two-way conversation between offices and save valuable time. In a few minutes you can give your customer quick, courteous service with a DuKane Flexifone Intercom System. AVERY RADIO AND SPEEDOMETER SERVICE, 704 South Main, will install a Flexifone for you and you'll find it inexpensive to operate. From 8 to 9 p.m. the store is available. You can even have one installed in your home—in the nursery or at your front door.

The Water Machine—Rexair

Rexair washes air, humidifies, vaporizes, does all vacuum cleaning work, and even scrubs floors! Water is the secret of Rexair's dust-filtering action. Rexair and only Rexair passes the stream of dust-filled air completely through a churning bath of water, discharging clean, humidified air into the room. Fully guaranteed by a 69-year-old company and with over 1,000,000 satisfied users, Rexair offers you dependable service for life. Call Moss at 2-3285 for an enlightening demonstration.

You'll Be In Love—

You'll fall in love with Norge Appliances, featured at BAUGHAMP'S REFRIGERATION SERVICE. The Gas Range gives cooking results that are out of this world, and your defrosting problems are over when you have a Norge Refrigerator. When you see the latest, automatic washer you'll be delighted to know it does a whole wash in a few minutes and spins the clothes dry. It fills from the top, is the same height as your cabinet, needs no bolting down and can be installed anywhere.

Delicious Barbecued Meats—

At JOHNNY'S BARBECUE BAR, 303 North Big Spring, you'll find the most delicious, different-tasting barbecued meats in Midland. Yes, Johnny specializes in catering service for picnics and parties. You have a choice of chicken, spare ribs, ham or beef, all barbecued by Johnny's special method. Call 4-9302 next time you have a party or picnic scheduled.

Custom Made Cowboy Boots—

Make this a routine touting Christmas. Order your custom made boots now at TRUMAN FRIDAY BOOT SHOP, 121 South Main. You may have them in colors and fancy designs or plain. The shop specializes in custom made boots of finest quality for men, women and children. Only the finest leather is used and expert workmanship go into boots that are soft and supple with handsome inlaid leather trims.

Worth Admiring—

Dress up your car with the new auto enameling service at SPEED BODY SHOP, 300 West North Front. Rich smooth paints individually mixed, are applied with factory-method finish. All colors are fully guaranteed. Drive in any time for an estimate. It would take an expert to tell the difference between a moderately old car with a super paint job done at Speed Body Shop, and a brand new car. Prices are reasonable, too, and the work is the very best. Dial 4-8461 for further information.

Can I Afford To Remodel?—

We answer "Yes!" Because MID-WEST LUMBER COMPANY, 2010 West North Front Street, has helped many others to fix-up their homes as they wanted to. New porches, fences, interior decoration, new flooring, new roofing, all play a part in the modern appearance of your home. The company features a complete line of paints for interior and exterior painting. They are mixed properly to insure a smooth, even coat that will retain its lustre for a long time.

How Is Talent Discovered?—

Some one may possess certain qualities as a vocalist, but that person is unaware of his ability. Whether you're a bass or soprano, LILLIAN CHRISTOPHER'S VOCAL STUDIO assures careful training. Dial 4-7789 for an audition. Discover your vocal quality and develop your ability through special training. Miss Christopher brings to Midland the advantages of years of teaching and concert experience. She has studied with some of America's most outstanding artists, which enables her to offer her pupils advantages seldom available at home.

A Gift For Her—

Are you a man with a gift problem? Make OIBBS-BLATHERWICK (formerly Pauline's Style Shop), 317 North Main, your gift-shopping headquarters. Know your material from the finest quality to the store is familiar with their preferences in clothes and accessories, and is prepared to help you with your selection. You'll find a tremendous choice of gifts including beautiful robes for her leisure hours, glamorous costume jewelry, exquisite nylon lingerie and other clothes.

Collision Damages Vanish—

It's really astonishing how banged up, seemingly hopeless car fenders, doors and tops come back to shape and look brand new when experts at GENIE'S BODY SHOP, 807 East Florida, take over. If you are considering a new paint job for your car, we urge you to stop in at this modern shop before you decide. Finest paints and equipment in the hands of master craftsmen create miracles of beauty before your eyes. Dial 4-4241 for more information.

Office Machines Service—

Small repair job or large... when your office machines need service or repair, call WEST TEXAS OFFICE SUPPLY, telephone 4-6851. Expert factory trained mechanics are ready to put your office machines back in business in a jiffy. All work is guaranteed. All makes of machines are repaired by the service department, including adding machines, dictaphones, check writers, duplicators, mimeograph machines and typewriters.

In And Outdoor Essentials—

Assure lasting protection as well as good looks to your important indoor and outdoor paint-up and repair jobs... with paints and fix-up accessories selected from the quality assortment at STONKHOEKER LUMBER COMPANY, 405 North Balld. Select your material from the finest quality mowork, paint, roofing, builders' hardware. Even better prices are given on quantity lots. This 1 loans are made by the company. Dial 2-4031 for more information.

Those Endearing Young Chirms—

Memories live in pictures of your tots and teens, captured and held for years in portraits by FRANK MILLER STUDIO, 608 West Missouri. Keep a portrait record of those endearing young charms. Have photographs made regularly as they grow—a record you'll cherish through the years. The studio uses the most modern methods and expert photography. Dial 4-5371 for a sitting.

Kwik-Way Precision Motor Repair—

The loss of just two ounces of metal, in the wrong places, from a car motor can completely destroy that motor! Don't let this happen to your car. Regular checkups at CHERRY MOTOR MACHINES SHOP, 208 South Main, will keep your car or truck on the road for years. Expert technicians specialize in Kwik-Way Precision Motor Repair and Rebuilding. Any type motor for car or truck can be repaired or rebuilt at this well equipped shop, owned and operated by R. W. Cherry.

Drink To Your Health—

Vito Water is highly recommended because it contains the minerals necessary to health. It is bottled in Midland by SPRING VALLEY WATER COMPANY, 613 West Missouri. You can get a five-gallon bottle for 70¢. Good drinking water is essential to the health of your whole family and these large bottles will last a family for weeks. Dial 4-4351 for deliveries.

Starter And Generator Repair—

If your car is slow to start, let KERR AND CARR check the starter. Expert starter and generator repair service is a specialty with these trained men, who also specialize in electric motor repair and rewinding. Any type of electric motor can be repaired at Kerr and Carr, and the service is prompt and efficient. Dial 2-3841 for estimates and further information on service.

Complete Decorating Service—

Planning a new home or redecorating your present one? Let ELMO BLAMM, at the House of Carpets, 1802 Lamesa Road, help you select the furnishings and color schemes that suit your moods and your taste. This decorating service is complete from floor to ceiling and includes drapes, floor covering, wall finishing and furnishings. Furniture can be custom made if you prefer it. Elmo Blamm is a consultant specializing in the decoration of homes and offices. Dial 4-6862 for further information.

Everyone Needs A Change—

It's a new season—a welcome change. Bring it into your home by changing the dull drabness of your living room suite into a new looking and colorful one. It's easy and inexpensive. Reupholstering will do the trick and DAVIS UPHOLSTERING SHOP, 600 East Florida, will do the inside of your home a new personality with custom made draperies and slip covers from the beautiful new fabrics at the shop. Dial 2-4032 for more information.

It's A Comfortable Feeling—

The prescription department at HOSPITAL PHARMACY, 2208 West Illinois, is geared to render instantaneous service when emergencies arise but this speed in no way sacrifices the accuracy of the careful compounding of your prescription. It's a comfortable feeling to know that your prescription is being compounded by thoroughly experienced, careful graduate pharmacists. Comforting, too, to know that they use only the finest pharmaceuticals. Have your doctor call in your prescription for prompt delivery. Dial 4-8279.

Engraving Service—

In the publishing business, speed is important. You can depend on REYNOLDS ENGRAVING SERVICE, 211 East Wall, for one-day service on special color, half tones and full page engravings. Printers and publishers will find this company prepared to offer guaranteed work. Farset Reynolds and son, Hugh, owners and operators of the engraving service, have a background of experience in the business. Dial 4-8462 for more information.

Luck Is Not Enough—

Lady Luck is a wonderful passenger in case of traffic emergencies... but when she fails to ride with you, are you prepared to take the consequences? Auto accidents, whether your fault, or the fault of the other driver, may be long, drawn out, expensive affairs. The safest driver needs the protection of full coverage auto insurance. Find out about auto liability insurance from MIDLAND INSURANCE AGENCY, Tower Building, Dial 2-1609 for more information.

New Notes In Stationery—

Folks will enjoy receiving letters from you if you use personalized stationery from RAY GWYN OFFICE SUPPLY, 215 West Wall. You can purchase scented stationery, stationery with flowers, dogs, cats and other designs. There is also note paper with clever designs. If you want to be more formal, there is the basket weave background in colors or white. Make letter-writing more fun by using clever, personalized stationery and note paper.

When Timing Counts—

Sudden business trip or unexpected date... don't worry. Just dial 4-4192 and let LAVELLE CLEANERS, 403 South Marinfeld, pick up your clothes. Then return them in plenty of time for the trip or date. At business, or social affairs, the good looks of your clothes help create the impression you want to make. Let LaVelle Cleaners be your personal valet. Keep your clothes in clean, good condition for you always.

New And Used Trailers—

A good trailer is as necessary to the farmer or stockman as his tractor or other farming implements. Contact GRAY TRAILER COMPANY for good stock trailers. W. L. Clark at Minimax Feed and Supply Company, 403 East Florida, is the representative for Gray and other type trailers. There is a good choice of new and used trailers that will serve your needs well. For further information, dial 4-5341.

Signs That Tell—Sell!—

Brilliant neon signs, in your color choice, advertise for you night and day at low cost by displaying your name up and down the streets. PLYANT SIGN COMPANY, 508 West Indiana, will build any kind of neon sign, any size, and make the installation. These attractive signs sell for you without bringing down your name in lights. They are built by Plyant Sign Company to suit your shop. Dial 4-7281 for more information.

Curved Windshields In Stock—

Whether it's a door window or a curved windshield, you can depend on SERVICE GLASS COMPANY, 500 North Weatherford, for immediate service. The huge stock of windshields insures immediate servicing of your needs. Shatter-proof glass is ready measured for installations. Drive your car in and out again with this fast windshield replacement service. A complete stock of auto glass and associated parts are kept by the company in order to give you complete service. Dial 4-4781 for more information.

Complete Plumbing Service—

Enjoy plenty of hot water for every need... when you need it. Have a Pioneer Water Heater installed by PLUMBING REPAIR SERVICE, 925 North Edwards. The company is displaying the newest of modern, scientifically proven water heaters in a wide range of prices—all with a one-year guarantee. Architects, owners and builders are invited to visit the display rooms—offering a complete line of all that's new in modern, efficient plumbing fixtures... plus dependable, economical plumbing repair and service. Dial 4-8486.

A Dependable Water Supply—

Pacific-Berford submersible water pumps, supplied by UMBERSON PUMP COMPANY, 708 West Kansas, offer so many advantages as a source of water supply that they approach universal usage. The complete assembly is lowered into the well to any desired depth by the discharge pipe, while carefully graduated powers provide for capacities up to 250,000 gallons per hour. As it operates below water level, it is proof against surface hazards. Dial 4-6988 for more information.

For Unique Color Schemes—

To decorate any interior successfully, careful consideration should be given to color harmony. The floor is the natural starting point as it is the largest single color area. Armstrong's Inlaid Linoleum, featured at STOREY FLOOR COVERING COMPANY, 402 South Main, offers an exceptionally wide selection of color and design. Embossed designs include chipped stone effect, Old World tile, Greek spiral motif and wreath patterns. There are Jasper and Marbelite patterns, also. Installations are made by the company.

Cabinetry Especially For You—

Can't find a "ready made" cabinet to suit your needs? Let DAVIS CABINET SHOP build it, especially for you. It will cost less than you think and materials and craftsmanship are the finest. You can have a kitchen custom planned to the size and shape you desire. Mr. Davis has had long experience in creating distinctive home appointments. Let him submit an obligation-free estimate. Dial 4-8511 for more information.

Body Repair And Painting—

Don't let crumpled fenders, broken headlight and window glass remain on your car. Let expert body repair men at R & D BODY SHOP, 1910 West North Front Street, replace badly damaged parts and restore finish. Crash damage calls for skilled body repair work. These experienced men can do an expert face-lifting job on your car, quickly restore it to like-new appearance. Dial 2-4191 for an obligation-free estimate.

There's No Slack—No Slip!—

When experts at MILLER BROTHERS' TRIM SHOP, North West Front and K Street, fit your car with seat covers there's no slack—no slip. And there's no high cost either! If you have a new car, with new upholstery, you'll want to keep it that way. If your car is older, you may want to dress up the interior. Stain-resistant, easy-to-clean Saran seat covers are the answer. For all its exquisite luxury and beauty, Saran has a wear story and the heart of any car owner. Dial 4-8461 for estimates. a care story to cheer

It's So Easy To Own A Hoover!—

If you aren't using a Hoover Deluxe Triple-Action Model 62, you're way behind the times. It's so easy to own a Hoover, too. Just dial 3-3391 and let MIDLAND HARDWARE AND FURNITURE COMPANY sell you the Hoover. You can have it on a monthly basis. This model has new angle conversion for above-the-floor cleaning and Handicax divert bag for easier, neater dirt disposal. Get your model now before the excise tax becomes effective and save money on your purchase.

A Smooth Stitching Beauty—

In addition to ordinary sewing, Necci does all the novel tricks with no extra attachments. It makes buttonholes, embroiders, monograms, sews on buttons, does zig-zag stitching, blind stitching, sews backward and forward with instant control. It has drop feed adjustment for darning, flatter pressure foot, self-releasing bobbin winder and thread tensions are numerically calibrated. Dial 4-7915 for a demonstration. THE NECCHI SEWING MACHINE COMPANY is located at 203 South Main with Patrick Evans as manager.

Better For Mixing Concrete—

HELBERT AND HELBERT, 310 South Colorado, can supply you with fine SAND & GRAVEL. The best grade of washed sand and gravel can be delivered right to your building site. The company has its own fleet of gravel trucks. Dial 4-7221 for prompt deliveries. All types of concrete work are done by Helbert & Helbert, including foundations or other concrete construction.

Rug Cleaning—

Let HINES-WOOD UPHOLSTERING SHOP, 206 North Marinfeld, do all the dirty work! The company will clean your rugs; extract every ounce of dirt—leave them excitingly new again! Dial 4-8112 for free estimates and pick-up and delivery. The company also does carpet-binding and carpet laying. Every service for the inside of your home is available. Expert mechanics guarantee to lay your carpets to your complete satisfaction.

Bee-Line Authorized Service—

Wheels out of line can cut the life of your tires in half. They mean added strain on your car, and above all, they mean danger. Don't neglect them. Drive in at MIDLAND FRAME AND WHEEL SERVICE, 407 South Marinfeld, L. A. Dobberty is manager of the Bee-Line authorized service. The shop specializes in complete frame, wheel, axle, spring, alignment and brake service. Dial 3-2143 for estimates.

FUNNY BUSINESS

"He built himself a tandem pipe! When one bowl burns empty he lights the next one and eliminates constant filling!"

Daddy Ringtail By WESLEY DAVIS

Daddy Ringtail And Top Of The Mountain

The Snow Covered Mountain is far to the north of the Great Forest, but it can be seen from the window of Daddy Ringtail's monkey house, high in the top of the very tall tree.

Yes, and on the day I am talking about, Daddy Ringtail had climbed half-way to the top of the Snow Covered Mountain. Mugwump Monkey, the monkey boy, was with him.

and so was the Huffen Puffen, the friendly wolf.

Said the Huffen: "Can't we stop and rest awhile? The Huffen is tired, he is, and the Huffen is who I am."

Our friends sat down to rest, because on to the top of the mountain was straight up and up in the air, almost. The Huffen lay down on his stomach and peeped down over the edge of the cliff. "Look down there, said the Huffen, "at all those ants on the handkerchief made of green."

But Daddy Ringtail explained how the things who looked like ants were really sheep. They only looked as small as ants because they were so far down. And there wasn't any handkerchief made of green. It was a field of green grass growing. It only looked little because it was so far down.

"Ooooooh!" said the Huffen, when he knew how far he was looking

straight down. He was frightened, you know, and Daddy Ringtail (with Mugwump) to help had to pull the Huffen back by his feet from the edge of the cliff. He was too afraid to move back himself. Said the Huffen: "Haven't we gone up far enough? Do we have to go all the way to the top?" Daddy Ringtail explained that no one ever had climbed to the top, and so the Huffen would be the most important wolf there ever was, when once he had done it. The Huffen chuckled to hear these words. Said he: "I am going on to the top, I am, so I can be so very important."

And Mugwump said he was going to the top to see what was on the other side. Daddy Ringtail said he would climb to the top to do some thinking.

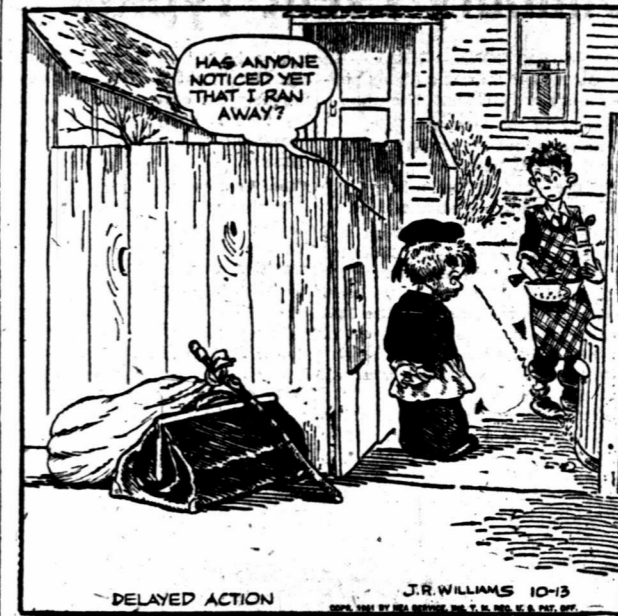

The Huffen chuckled again and said: "It doesn't matter, it doesn't, that we climb on for different reasons."

"No," said Daddy Ringtail, "all that matters is climbing together so each can help the other." And they did climb together, and so they did come at last to the top of the mountain. Happy day!

Iranian Oil Is Found In Never Land

ABADAN, IRAN.—(AP)—Here's your never-never land — Ahwaz, Khorramshahr and Abadan. Abadan means "perhaps" in Persian; and "never" in Arabic. And there are about as many Arabs here as Persians.

It's one of the world's greatest oilfields. Until the Iranian government nationalized it, the Anglo-Iranian Oil Company had been taking out 32,000,000 tons of oil a year and using 200 tankers a month to ship it to 180 ports throughout the world.

It's at the head of the Persian gulf here the Tigris and Euphrates, which perhaps hold the Garden of Eden and the cradle of mankind between their ancient valleys, join in the sluggish Shatt-el-Arab. The land is baked to ochre-colored powder. Temperatures rocket up into scorching 160s. Sandstorms sweep the arid Khuzestan coastal flatlands, blot out the stars and turn the sun to brazen red. But back of the flats the rows of oil well towers line up like Martian giants marching down the barren, brick-red foothills from the snow-capped Zagros mountains.

Two hundred and fifty miles east across the mountains the sun bleaches the ruins of Persepolis from India to Greece six centuries before Christ.

One hundred and fifty miles north along the Iraq border visitors at ancient Shush are shown the supposed site of the tomb of Daniel, who was thrown into the lions' den.

And across the whole wasteland fierce, nomadic tribes graze their camels and their sheep along the route where Alexander of Greece marched east to India—and Mongol and Tartar horsemen raided west to Europe.

Driver Studies Curb Crashes

EVANSTON, ILL.—The unmarked police car may catch you if you don't watch your driving. James S. Baker, director of research at the Traffic Institute Northwestern University, says the taxpayer would profit by the practice. Highway police in Indiana are testing the idea.

"If you sent a cat out with a bell on its neck it won't catch many mice," Baker said.

There were 33,000 persons killed in auto accidents in the U. S. last year. There are 50 million automobiles on U. S. highways today.

With congestion getting worse instead of better, Baker said, the institute is seeking ways to save lives at minimum cost. It is doing this by teaching traffic police to patrol with more work done for the taxpayer's dollar.

With three out of four fatal accidents due to driver failure, better driver licensing methods are under study. A course in examining drivers was recently conducted for examiners from 25 states. The tuition was sponsored by the Farmers Insurance Group Safety Foundation, Los Angeles, Calif.

Thief Is Offered Interest-Free Loan

ST. PETERSBURG, FLA.—(AP)—A 77-year-old man whose pocket was picked of \$70 is willing to make the thief an interest-free, 99-year loan to clear the thief's conscience.

In a letter published by the St. Petersburg Times, the unidentified victim dared the pickpocket to telephone him like a man and accept the money as a loan. The letter added:

"Should you be unable to refund the money by the end of 99 years I agree to cancel the debt in the hope to meet you in Heaven's happiness and peace."

'SHY' SNAKES

Captive snakes in zoos and circuses often go on hunger strikes and would die of starvation if they were not forcibly fed. Large snakes dislike to be seen eating.

MOST ACTIVE

The most active sweat glands in the body are located on the back of the hand and the back of the foot, according to the Encyclopedia.
