HE MIDLAND REPORTER-TELEGRAM, WEDNESDAY, FEB. 20, 1952-7

THE BENELUX union gets its name from the front letters of its three member countries-Belgium, Luxembourg and The Netherlands. The Benelux is a customs union, regulating trade and tariffs among the three nations. Its eventual aim is to drop all barriers and form a strong economic union of 19,000,000 people. The Benelux pattern was first worked out in 1944 by governments of the three nations exiled in London by Nazi conquest. The initial agreement went into effect Jan. 1. 1948. It was the first post-war experiment in Western European integration, and as such it doesn't inspire too much confidence for an eventual United States of Europe. Economic experts of the Benelux countries have now drafted a 50-year treaty that would put the customs union on a firmer footing, but the Dutch government reportedly is balking at signing. Dutch objection is that the treaty doesn't go far enough toward economic unity, but rather freezes progress toward that goal at a point where Belgium gains the wider market she seeks, with Dutch hopes remaining unfulfilled. Root of the difficulty is that the war-ravaged Netherlands is still fighting an uphill battle for recovery, while Belgium has become the prosperous "senior partner." Belgium now ships one-fourth of all her exports to The Netherlands. Top-level officials of the three nations soon will review the proposed 50-year treaty in an effort to smooth out rough spots and speed the Benelux plan on to its goal of unity.

## Reds Beaten At Own Game

For all practical purposes, the original Italian peace treaty signed by the Western powers and Russia is a dead

. December 21 was a significant date in the treaty's history. By that time Italy had received approval from 10 signatories for treaty revisions releasing the country from severe arms limitations.

Yet one obstacle still lay in Italy's path. The Soviet Union and its satellites refused to agree to revision. Technically, therefore, the pact had to be viewed as continuing in legal force.

The Russians like to put these legal niceties to work

for them as they throw up barriers to objectives desired by the West.

So there can't help but be a marked show of satisfaction on this side of the Iron Curtain when Italy is observed turning a technicality to its own advantage, A little while back Russia, acting in the UN Security

Council, vetoed Italy's admission to the United Nations for the fifth time. And on this occasion the Italians did more than just subject of government spending railroads pay taxes on their property their anger on the Kremlin. They converted Soviet came up. I though I had said some ty.

The Hoosier senator said Congress always had been ahead of the President on price controls. He accused the President of having done nothing about controls from September, 1950, to Jan. 26, 1951. But since only three per cent.

Referring to President Truman's half-dozen examples of price increases under the Capehart amendment, the senator said the President could have suspended those increases if they were "unreasonable and excessive."

Notice is hereby given that City Ordinance provides that no garbage container be larger than 32 gallons in capacity and requires that all garbage containers have a tight fitting lid. Beginning March 1, 1952 nonregulation garbage cans remaining in use will be hauled away. Anyone wishing to retain non-regulation cans are requested to remove them from the point of collection, and discontinue their use as garbage containers.

Each household should provide a sufficient number of containers to take care of the garbage on a basis of two (2) collections weekly. It is suggested that garbage can lids be fastened to a stake or rack in order to prevent their loss.

These requirements and suggestions are one method of combatting the sanitary problem in Midland and your full cooperation is earnestly requested.
