### TV Pay And Opportunity Lure Young Talent From Hollywood

By ERSKINE JOHNSON NEA Staff Correspondent HOLLYWOOD — Behind The creen: Hollywood's chorus girls are getting a better shake for the shake they're giving on TV.

Peggy Gordon, a shapely, chest-nut-haired high-kicker, who's been dancing on NBC's "Comedy Hour" and "All Star Revue." told me: "You're important on TV. You're

right behind Jimmy Durante or Donald O'Connor, and people see you. In pictures, you're a flash or a silhouette, part of an overall effect.

"I had been thinking of getting out of show business until TV came along. I was tired of being insignificant.

Even the pay is as good or better Peggy told me. For a week's work in movies like "Tea For Two,"
"Little Egypt," and "Singing in
The Rain" at the studies, Peggy's check would come to \$111.15. Her pay as a chorine in the last Donald O'Conner 'TV show was \$150.

Esther Williams' fans won't seeing her in a theater tank act, not even during the last five years of her MGM contract that gives her the right to travel around with a portable swimming pool, Instead she will produce a large-scale water show, as lavish as "The Ice Follies."

The Jane Wyman-Travis Kleefeld romance has swung over to the very serious side and Jane has canceled her European vacation. Spanish Police Worried

Paulette Goddard has the police men in Spain chewing their fingernails. She parades around wearing her \$100,000 collection of jewels . . The Danziger Brothers, for whom John Boles is toiling in Spain in "Babes in Bagdad," will finance John's TV film series about a retired opera singer and his family.

Zsa Zsa Gabor won't be wearing the dresses designed for her at the movie studios on her TV program Fox bigwigs screamed when she appeared on television in a gown designed by Elois Jenesen for her role in "We're Not Married."

There's a buzz that the wild game room in the Stewart Granger-Jean Simmons mansion cos Granger \$15,000, It's decorated with the heads of lions, elephants and rhinos bagged by the actor.

### Welcome, WTCC Visitors

"Midland is proud to be the host city Wednesday night to a three-district meeting of the West Texas Chamber of Commerce, and residents of this headquarters city of the Permian Basin Empire join in welcoming the visitors who are here from a score of West Texas communities to attend the conference

The West Texas Chamber of Commerce is doing a marvelous job for this great and prosperous territory, through its overall program of work, and West Texans generally should become more familiar with the major objectives of the regional organization.

Frank H. Kelley of Colorado City, WTCC president, says the prime purpose of the area meeting here is to better acquaint members and other interested persons with the projects and activities of their West Texas Chamber of Commerce. The corresponding budget requirements also will be discussed, and district vice presidents will be elected. Kelley has invited all interested persons to attend the dinner-meeting scheduled in Hotel Scharbauer.

It will be an excellent time for citizens to learn first hand just what the WTCC is doing for them through its varied work program. Many doubtless will be surprised Seat," where Sir Francis Drake is turn. at the far-reaching objectives of the regional chamber.

It is hoped the Midland meeting will be well-attended and highly successful from every standpoint. Welcome, WTCC visitors!

... says MORRIS SAPIR Dependable Furniture Company, Oakland, California

"After using Dodge 'Job-Rated' trucks for eight years exclusively, I want to report that your new models are keeping me sold on Dodge. "No vehicle we have ever seen

can give our drivers more fre city traffic than our Dodge 1-ton truck. With our new Dodge, the pay-load is high; the cost per mile low. And Hene's why you can carry more payload with Dodge "Job-Rated" trucks. First, they have better weight

distribution. This means bigger payload capacity is engineered into a Dodge "Job-Rated" truck. Many trucks carry too much weight on the rear axle, not enough on the front. But in a Dodge the right proportion is carried on each axle.

Besides better weight distribution, a shorter wheelbase provides easier turning and parking. Come in and try one of these easier-handling trucks. Get all the facts about hauling bigger payloads.

Carry more! In Dodge "Job-Rated" trucks, the engine is placed forward and the front axle back—for better distribution of the load. That's why you can carry bigger payloads— without overloading.

Offhand, we'd say it doesn't require a quis-kid math expert to figure out the fact only four of the eight Longhorn League teams can finish in the first division.

If it did, we probably wouldn't know it.

At that, several of the managers in the loop don't seem to understand this simple fact, at least six of the eight saying they'll be in the first division "with any luck." A couple of others say they'll field "fighting, hustling ball clubs."
This may be interpreted as follows in baseball circles: "We probably won't be worth a darn, have very few players, but after all everybody can't finish at the top."

The latter part at least, is true, and in a lot of instances the ent interpretation may be too, too true.

But Midland is one of those teams which expects to finish in the first division. We've already gone over the Midland player personnel several times this season, so there's no reason to do so again. We will, nowever, stop right here to apologize to one Emil Ogden, Midland pit who was unintentionally omitted a couple of days back when we filled part of our column with a run-down on the Indians,

We didn't omit Emil because he failed to send us a Christmas card or because we felt he didn't deserve such mention. It simply was an error on our part, and days come when we make as many such boots as rookie shortstop for the Eighth Street Alley-Kats

But back to our original subject about player personnel: At least one ortant addition will be made to the Midland club about mid-season. Raiph Blair, tall right-hander who toiled overtime for the Indians back then Harold Webb was donning the war-paint, is to return here.

Blair called Horace Busby, head man in the Indian front office, with the announcement he'll be getting out of the Army in the middle of the Summer. Blair, property of Midland, wants to return here and resume his baseball career. In all likelihood, he'll probably do so.

As for the other clubs around the circuit, we've talked to several anagers, sports writers and other such reliable (?) characters lately Phillips 66'ers and we think we've found some pretty interesting poop. Win Fourth Straight

# HOW ADVERTISING **AFFECTS YOUR JOB**

Raises, Cuts, Promotions, Layoffs Often Depend on How Much the Firm Sells

\*

neans more business, steadier jobs for my customers and bigger tips in my pocket. So I'm all for plenty of advertising.

> BOOKKEEPER-I know what a difference advertising made in my firm . . . made our volume four times as big in five years. Now instead of just being a clerk, I have seven people working for me

EXT time you hear or read adver-tising, just stop and analyze how it affects you.

Its purpose is to sell goods or services. More sales mean more work to be done. That means more jobs in the firm that advertises . . . and more jobs in the hundred and one firms with which it does business. It's a neverending chain.

Now when more jobs open up, that means more security for everyone. It means promotion to many, with wage increases. It means opportunity-particularly for friends and sons and daughters of present employees.

Whether or not you work for a firm that advertises, remember that this modern method of mass personal selling affects your company's business and its future. Hence it affects your job and your future.

Advertising, by selling goods, starts businesses humming, makes them bigger. That's how advertising affects your job. For tomorrow, it creates opportunity . . . for today, it makes your iob more secure.

Other Ways Advertising Helps You:

- 1. Brings you better goods for less money.
- 2. Makes shopping more pleasant and easier.
- 3. Has given us the world's highest standard of living.

Advertising... BY SELLING MORE GOODS TO MORE PEOPLE Makes your job more secure

alarmed—unless you are a gold smuggler.

The government's national physical laboratory, called in to help curb the illegal flow of gold into and out of India, came up with these suggestions.

1. A table which would whistle if baggage containing gold or other high conductivity meal is passed over it.

2. A comfortable chair in which visitors could be seated while filling out their entrance or exit forms. The chair would have a bullt-in squeak which sounds if its occupant is carrying a concealed shipment of gold.

Neither gold detector, officials said, has yet been perfected to the stage where it won't shistle or squeak at the gold fillings in a visitor's teeth.

THE DARDANELLES have been fought over by empire builders since the Trojan War. Persian conqueror Xerxes crossed from Asia into Europe over the straits in 480 B.C. and Alexander went the other way in 334 B.C. The Crimean War was fought to keep the straits from Russian control. In a more romantic vein, Leander is alleged to have swum the Dardanelles (then called the Hellespo nightly to visit his love, Hero. His swimming feat was matched once by the English poet Byron and also by the late adventurer Richard Halliburton. But, it is Soviet pressure on Turkey that brings the historic waterway into the news today. Russia is sensitive about the Dardanelles because they offer a sea gateway—the only one—from the Mediterranean to the Soviet Black Sea shores. As one of the losers in World War I. Turkey was forbidden by the Lausanne Treaty to fortify a strip along the Dardanelles and Bosphorus. The Montreux convention of 1936, noting the ominous rise of Hitler, permitted the Turks to refortify the area, and, if at war or threater by aggression, to close the straits. With Turkey likely to be admitted to the North Atlantic Treaty Organization, Russia is taking an even harder look at the Dardanelles. The Kremlin recently warned that Turkish entry into the Atlantic alliance would be viewed as "an act of aggression" against Russia.

### **Midland Concrete Company Adds New Trucks And Mixers**

The Midfand Concrete Company at 400 East South Front Street is a firm which has lived up to it's reputation of being willing to "pour concrete anywhere and everywhere there is a demand.'

Since it started operations here in April, 1951, the firm has given such satisfactory service that it has had to keep expanding in order to take care of its business.

When the firm opened, it started

out with four trucks and four mixers. Since that time, the large volume of business has made it necessary for the owners to add three new trucks and three mixers. And they're still growing.

Herbert McClure, who is co-owner of the business with Lonnie Sikes, is amazed at the way in which the firm has grown.

He said a new truck and new mixer were added to the firm's equipment only recently. Specializing in Ready-Mix -concrete, the firm also handles sand,

gravel, and mortor cement. Oil field hauling, particularly that pouring cement for pump units, the firm. "We do hauling in or out good news for its many customers, will be a stand which will be conof the city," McClure said.

heat, light and power.

Heating?... Already the British are heating houses from an atomic pile. Transportation? . . . We'll soon have atom-driven submarines - how about cars and planes? Housekeeping? . . . Will we get new foods, textiles, dishes and labor-saving devices in unheardof abundance?

When the first big story about peacetime atomic power breaks, you'll want to know how it all began and how it works . . . but most of all, who has it - and where can you get it?

You'll want the whole story . . . from your point of view, as only your local paper's news columns or ads can tell it to you every day. That's how it is with every important news or product story. You want all the story. You
