Citizens Vote Monday for Acceptance or Rejection Waterworks

COTTON AND ROW CROP SEASON OPENS IN PARMER COUNTY, WITH HEAVY SHIPMENTS COMING IN

Heavy truck and wagon loads of both cotton and grain heads have been continually coming into the Friona market this week.

The cotton thus far brought in is said to be the best that has been grown in this locality, and its appearance justifies such a statement, as the warm dry weather of the past few weeks since the cotton began to open has been most favorable for a high grade staple.

The price paid on the local market is said to be the best or highest paid anywhere on the plains this season, which is a great incentive to the farmers to bring their product to Friona.

Maize, kafir and begari heads also appear to be of excellent quality and the piles of these heads are already assuming large proportions.

TO VISIT CALIFORNIA

Grant Musick, head mechanic of the Friona Motor Company, has taken a leave of absence from his duties in the company's garage for a visit in California.

Mr. Musick accompanied a shipment of hogs sent out by J. J. Horton and will take advantage of the occasion to visit in and near Los Angeles for a week or ten days before returning to Friona.

HARRY-JONES

The many friends of Everett Harry and Miss Vera Jones were mildly surprised when the information was received Monday that these two fine young people had driven quietly over to Clovis last Sunday and were as quietly married.

The groom in this wedding is the son of Mrs. Bertha Harry of this place, and is the popular carrier of Friona's one rural mail route, which position he has held since the route was established.

The bride is the beautiful daughter of Mr. and Mrs. C. M. Jones whose farm home is some five miles southeast of Friona and has a host of friends among the young people of the locality. All of whom and all others of their acquaintance join in wishing them a long and happy life.

P-T. A. MEETING.

The second regular monthly meeting of the Friona Parent-Teacher Association of the term was held in the school auditorium Monday night. A goodly number of members were present and the business affairs of the association were attended to, this being followed by a good program of readings and music.

During the business meeting Mr. Mims was chosen as parliamentarian and proved his ability to attend to the duties of this office by his splendid report at the close of the program.

Following the program the teachers were hosts to other members of the association at an informal banquet.

The work of the Parent-Teacher Association is unique in itself and the successful accomplishment of its desired ends should be of vital import toward the ultimate success of the school, and it is a matter of deep regret that so few of the parents have expressed enough interest in this valuable work to even so much as attend its meetings.

MAKING MORE ROOM.

M. S. Weir, proprietor of Scottie's Bargain Counter, has purchased the room formerly occupied as a real estate and insurance office and has made of it an addition to his store room.

Such an expansion evidently means an increase of business and a demand for a larger stock and assortment of goods.

SERIOUS OPERATION

Mr. and Mrs. George C. Messenger and small son, Stephen, drove to Hereford last Friday where they were joined by Mr. Messenger's mother, Mrs. J. N. Messenger, who accompanied them to Amarillo.

Although the ladies did some shopping while in the city the main purpose of the trip was to take Stephen for a re-examination of the condition resulting from a serious and delicate surgical operation which had been performed two weeks previously by a specialist in Amarillo.

The operation was primarily for the removal of a sinus trouble in which the sinus bones of the face were forced apart in order to remove a pus pocket that had formed. These sinus troubles are not only painful but dangerous and the operation for their removal is also fraught with danger to the patient and the work of the most skillful surgeons is necessary for this recovery.

Little Stephen's operation also included the removal of his tonsils and removal of a nasal polyp. The doctor pronounced the patient as doing well, but requested that he be returned soon for radium treatment. The parents are administering treatments at home twice daily with a nasal spray.

The Messenger family is one of the original settlers of the Friona territory and the members have a host of friends among these older settlers who entertain the sincerest hopes for Stephen's early and permanent recovery.

ELEVEN MILE NEWS

Mr. and Mrs. R. L. Smith of Pampa arrived here Tuesday to visit the home of her parents, Mr. and Mrs. L. M. Williams.

Ben Bates and Misses Eunice and Estell Williams spent Friday attending the Curry county fair at Clovis.

J. W. Puckett of Amarillo spent first of the week at his ranch here.

Earl Foster, Lellie Wilcox, Ben Bates, Mack Dunn and O. G. Hill worked cattle here last Thursday.

Ben Bates visited in the W. A. Whitson home Sunday.

John Annen and John Linnen were here the latter part of last week.

L. W. Hutchinson was shopping in Hereford Monday.

O. G. Hill of Hereford visited his ranch here Thursday.

Wiley Barnes visited Jack Dunn Sunday.

Mack Dunn spent Tuesday night with Ben Bates.

Mrs. Neva Mackie visited her mother, Mrs. Wells, Wednesday.

Altus, Quince and Hobby Williams have been absent from our school this week helping gather row crops.

L. W. Hutchinson and L. M. Williams were business visitors in Friona Monday.

John Annen who has been in Dimmitt under medical care for two weeks, returned home one day last week.

R. L. Smith and wife and her mother, Mrs. L. M. Williams, visited in the Wheatland community in New Mexico Tuesday.

GUESS WHO.

J. C. Wilkinson, agent for the Magnolia Petroleum Company, has had his men employed a part of the time recently at hauling dirt and filling in depressions at his oil depot.

WILEY-TAYLOR

Pearl W. Taylor and Miss Anna Wiley drove over to Clovis September 30 and were quietly married shortly after noon.

The bride is the charming and accomplished daughter of Mr. and Mrs. R. G. Wiley of the Lake View community and is well known here, having graduated from the Friona high school last term, and has a host of friends in and near Friona.

The groom came here about two years ago from Electra. He is a splendid young man of sterling qualities, winning friends among his acquaintances through social and business relations.

They expect to make their home for the present at least in Friona. We are glad to have them and wish for them many happy years with the very best of success.

SALES DAY COMMITTEE PLANS

Members of the recently appointed sales day committee of the Chamber of Commerce are busy puzzling their wits trying to devise some plan for a sales day program that will be mutually beneficial and interesting to the merchants and their customers.

Just what plan will be devised is not yet known, even to the members of the committee, but it is a safe guess that what ever may be the plan it will be both interesting and helpful.

DR. McELROY ON VACATION

Dr. A. P. McElroy, Friona's physician, departed Monday for Fort Worth for a week's visit with his son, Dr. A. L. McElroy and family. This is the first vacation the doctor has taken for several years and he has earned it. He expected to return in about a week.

"THE GREAT HERSY"

That is the sermon subject at the Congregational church Sunday morning. The Sunday school will meet at 10 o'clock, with classes and able teachers for all. Whosoever will may come. A report of the finances of the church is called for at the close of the morning service. J. L. Beattie, Pastor.

COUNTY SEAT MEN HERE ON MONDAY

Judge J. C. Temple, County Attorney J. D. Thomas, Sheriff Jim Martin and ex-county Judge, E. F. Lokey, all of Farwell, were business visitors here Monday afternoon.

Judge Temple left at the Star office a large number of packages of ash tree seeds which are being handed out gratis to any citizen who cares for them. These seeds when planted and properly cared for will produce beautiful shade trees. Get a package while they last.

Judge Thomas was here as plaintiff's attorney in a law suit that was tried before Justice of the Peace, O. G. Turner.

Judge Lokey was here looking after the interests of his abstract office and rendering assistance to the City Fathers in getting their records ready for a vote on the water system proposition.

Sheriff Martin spent a part of his time assisting in the M System store in which he has an interest.

CALL FOR ELECTION

The mayor and council of our fair city in regular meeting on October 17, 1929, opened the bids for construction of a waterworks system for Friona. Five bids were received, the lowest being that of the Sherman Machinery & Iron Works of Oklahoma City, Oklahoma, for the sum of \$38,130.80, and the highest being that of Western Construction for \$41,691.30.

All that is necessary now to start on this work of improvement is a vote of the people. Work will start within 20 days after the legality is established, and will be completed approximately 90 days thereafter. The voting place will be at the office of the Friona Star on Monday, October 21, 1929. J. W. WHITE, Mayor.

JANITOR RESIGNS

J. M. Sanderfer, who has been serving as janitor at the school building since the beginning of the school term, handed in his resignation as such last week and has taken a position at the Friona gin. Mr. Sanderfer's reason for the change was better salary. The janitor work has been taken up by W. J. Thompson.

MOVIE SEATS ARRIVE

The seats for the new moving picture theatre soon to be opened on Main street, arrived and are being installed as rapidly as possible.

H. P. Eberling, proprietor, has been looking for and daily expecting these seats for the past several weeks, and their failure to come has caused the postponement of his theatre opening date indefinitely, as he had at first hoped to be able to give his first show on or near the first of September.

Mr. Eberling has a force of men under supervision of A. D. Carter at work installing the seats, with the hope of getting the work done this week and the first show will probably be not later than the latter part of next week, possible sooner.

VISITED STATE FAIR

Mr. and Mrs. W. H. Foster and son, Jack, returned the middle of this week from a visit to Brownwood where their sons, Earl and Joe Foster live. From Brownwood they went to Dallas where they formerly lived for more than thirty years and spent a few days visiting relatives and old friends and attended the Dallas State Fair.

Mr. and Mrs. Foster, like most of our citizens, like the Plains country and especially Friona, and are glad to be at home again.

G. C. MESSENGER IN TOWN

George C. Messenger was in from his farm 11 miles northwest Monday afternoon looking after business matters, and says he has over 200 acres of wheat sowed and is planning to plant more land now in row crops soon as the crops are removed. He states that they had received no rain of consequence in his locality lately and that a good rain now would be welcome and beneficial.

FIRST CHURCH OF CHRIST

Bible study each Lord's day morning at 10:30 in school auditorium. Communion service at 11:45. Young people's weekly meetings at 7:15 p. m.

IF BONDS ARE VOTED, ACTUAL CONSTRUCTION WOULD BEGIN IN NEXT TWENTY DAYS, IT IS SAID

HAS GOOD FRUIT

One of the best orchards in Parmer county is found on the farm of Joseph Paul, about twenty miles southeast of Friona near the Lazbuddie school and one which has produced a fair crop of fruit this season.

The writer had the pleasure of a visit to Mr. Paul's farm recently and in conversation with him learned that his orchard had produced a good crop of fine peaches this season and that there were lots of apples on the trees. Mr. Paul stated however that the apples are not nearly so large as they usually are but there is a good yield in quantity. He said the trees did not have sufficient moisture during the growing season is the reason they are smaller in size.

Mr. Paul's row crops are looking fine and promise a handsome yield.

GIN MANAGEMENT.

It was stated in last week's issue of the Star that A. E. Wilson of Duncan, Oklahoma, would move here to take complete charge of the Friona gin. This was an error, as circumstances have arisen that make it impractical for Mr. Wilson to come to Friona. The gin will therefore be under the management of C. S. Waddell and J. R. Lange. Mr. Waddell will have charge of the mechanical and industrial part of the business and Mr. Lange will have charge of the office work. Both of these gentlemen are well and favorably known in Friona and the people of the town and those of the community surrounding who know them, have the utmost confidence in their ability and integrity and a feeling of assurance prevails as to the success of the gin's operations and its honorable and intelligent management.

WHAT OF THE HOG INDUSTRY?

Is the business of hog raising being neglected in the Friona section, or is it still growing to the extent that there is not enough breeding stock to supply the demand?

Only a few years ago there were a number of herds of registered hogs in the near vicinity of Friona, and very few farmers who did not have enough for their own needs, but now one hears only the inquiry, "Where can I get some shoats or pigs, or a good brood sow?"

Evidently the hog business will pay the farmers if the proper attention is given it, as may be gleaned from the following extracts from various farm and agricultural and college bulletins:

Prof. Frank R. Phillips of the W. T. S. T. C., says:

At the Master Dairy Farmers' banquet held in Amarillo recently the statement was made that hogs were essential to the dairy business. At the Canyon college dairy over \$100 worth of hogs are sold monthly. More money is cleared on hogs than from the dairy proper. Cows require more labor than hogs. It is the plan to put more land under hog fence and double the number of hogs. It is expected to do this without buying additional feed unless it is tankage.

Recently Walter Barlow, manager of the Great West mill and elevator said: "The thing I do not understand is why farmers do not raise more hogs in the Panhandle. Is there not money in hogs, with all the grain sorghum we have? The answer was that the College farm at Canyon showed greater net profit from hogs than it did from dairy enterprises. Attention was called to the value of hogs in West Texas, when Col. C. T. Herring of Amarillo remarked that the reason we have no greater packing

The Friona City Council, sitting in regular session Thursday, October 17, opened bids for the construction of the proposed waterworks system, and awarded the contract, subject to the approval of the voters, to the lowest bidder, the Sherman Machinery and Iron Works of Oklahoma City, for \$38,130.80. Of the four other bids submitted the highest was \$41,691.30.

Friona is now ready to vote on whether or not the city will have its waterworks system under the present plan. An election was called by the mayor to hold an election next Monday, October 21, for the citizens to vote for or against the proposition. The balloting place will be the Friona Star office, and every citizen is urged to use the ballot to show his sentiments. Talking about the waterworks is not going to do any good about deciding the question. It will be determined by the number of votes cast for and against the question, and it is up to every voter to express his sentiments on the ballot next Monday.

SENIOR B. Y. P. U. PROGRAM

Group Captain No. 1, Lawrence Dumont.

industry located here is that the packers claim they cannot get enough hogs, that cattle alone do not make a packing plant profitable.

Last week a Randall county farmer stated that there is more money in selling grain sorghum at \$20 per ton than in feeding it to hogs. The reply to such statements is that experiments in Kansas and Texas stations contradicted his figures. Perhaps one reason why few hogs are produced in West Texas is that farmers have not kept up with the modern hog feeding experiments but accept the belief of their fathers that corn is required to produce profitable pork. Danish dairy farmers owe much of the progress made in their farm enterprises to hogs. The Panhandle farmer has now reached a point where he needs to give more attention to marketing of his products in a finished condition. Grain sorghum fed to hogs offers a simple plan whereby this marketing step may be taken.—Frank Phillips, Agriculture department of W. T. S. T. C.

With the abundant yield of these grain sorghums in the Friona territory this season it appears that the feeding of hogs for the market must be a paying proposition for the owners of these grain producers and there is no apparent reason why the Friona farmer should not receive as much for his hogs on the local market as can be secured at any other market within reach.

The following paragraph from Tulsa is quoted from a state bulletin: "Skim milk brought four cents a gallon and grain sorghum \$79.50 a ton fed to an eight pig litter by W. A. Wood, Swisher county farmer, who has completed the local ton litter contest. The pigs weighed 1080 pounds at the end of 150 days. The ration as given by the county agent consisted of skim milk, grain sorghum, barley and a commercial protein supplement."

BUSINESS SEEMS TO BE GOOD

H. A. T. E. BY ARTHUR D. HOWDEN SMITH

CHAPTER VI—Continued

Fellowes reflected uneasily that, at least, she'd probably fight more handily than his prolix attorney.

The men were armed as nondescriptly as the squad that had attended Eaches—half of them carried old Brown Bess firelocks, with bayonets; the remainder sported hunting rifles, tradeguns and fowling pieces.

He quieted the demonstration with difficulty. "The British will hear you, friends. Our one hope is to surprise them.

"Muster the men, sergeant. Column of fours." "And douse those torches," added Fellowes.

"I never see such clumsy oafs," she snapped. "For land's sake, git agoin'.

"The ancient's reiterated refrain died away in the chatter of the tree-tombs.

"What dat?" he whispered. Simultaneously, came a hail from the shadows in front.

"The crashing detonation of thirty stand of arms dismayed the sailors notwithstanding the militiamen's but lets flew in every direction save the enemy's.

The pursuit receded from the road, traversing a belt of trees which hid the antagonists from each other.

lads! Slice the lights out o' 'em! They're only milshy!" The sailors responded gallantly, coming forward in a compact group.

"Surrender, Bob!" Fellowes urged again. "Not if I knows it," retorted the bosun, dodging a blow with a clubbed rifle.

"Surrender, Bob!" Fellowes urged again. "Not if I knows it," retorted the bosun, dodging a blow with a clubbed rifle.

The sailors recovered rapidly from their panic, and made for the creek bank, halting at intervals to fire their pistols and gain a breathing spell.

"We must finish this while we have the darkness for cover. One more charge! Fire a volley, and drive them into the creek."

"Peirt," he shouted. "Sergeant! Can't you hold your men? Sopher! Nimrod!"

"Where's Cuffee?" The negro towered erect at mention of his name.

There are not many parts of the world where the ordinary domestic sheep is used as a beast of burden.

From slave to emperor might well be the title of a biography of Christophe, ruler of Hayti during the days of the "Black Republic."

BLACK-AND-WHITE NOW FEATURED; EVENING GOWNS ARE LENGTHENED

ATTRACTIVE BLACK-AND-WHITE COSTUME

The satin mode as now is, presents many phases not the least interesting of which is the fact that there are more than one kind of satin featured in smart fabric showings.

For early autumn wear the satin afternoon and the main street frock, also short jacket suit are making an excellent showing among new fashions.

If black-and-white does not tune to your individuality, then choose for your "first" suit to wear on sunny fall days, heavy brown satin, tailored to a nicety, for brown is the very quintessence of color chic this season.

GRACEFUL EVENING GOWN

under the arc-light. So, also, are light blues. Green is especially enjoying many triumphs, notably such esthetic shades as sage and other subtle tones, particularly a new "frosted green," which is among the loveliest of pale evening tints—also, if you please, bright emerald green.

Well, like it or not, we are in for long skirts, so we may as well be game and accept fashion's verdict gracefully. It is the long limited goddess which fashion enthrones this season.

Community Building

Easily Possible to Cut Enormous Fire Losses

How are we to stop the depredations of the fire demon? There are three ways in which we can aid. First we should be careful to prevent fire.

Even so, there will at times be accidental fires and we need to tear a leaf from the book of our European neighbors.

Proper Planning for Growth of Community

The era in which American cities "just grew," pushing outward their boundaries and piling up their buildings tier on tier, has given way to an era of orderly planning and development.

The modern city is not a mere agglomeration of buildings but an organism which functions badly or well as it develops improperly or properly.

City to Be Colorful

The world's most beautiful, colorful and restful city is the ambition of Oslo, Norway, in its new scheme of civic decoration. The city is to be divided into districts, each painted in a different color.

Costly Road Building

A good road, smooth as a billiard table, with neatly graveled shoulders and white-painted fences alongside, may be one of the ugliest things in a verdant countryside.

Ownership Versus Divorce

There is a dignity in ownership that far outweighs any lack of conveniences. There is something fine in maintaining a home under one's own roof-tree.

Roads Beautified

A program of highway beautification has been undertaken by the Connecticut state highway department.

Three Forms Created

Architectural town planning has created three esthetic forms, the plaza, the monumental street and the inadequately named "patte d'oie."

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent.

PHILLIPS Milk of Magnesia

WINTERSMITH'S CHILL TONIC

For over 50 years it has been the household remedy for all forms of Malaria, Chills and Fever, Dengue.

A man who can put a baby to sleep when no one else can says it's personal magnetism; he may be right.

Kill Rats Without Poison

A New Extirminator that won't kill livestock, poultry, dogs, cats, or even baby chicks.

K-R-O KILLS-RATS-ONLY

Normans Should Speak Up Normans with William the Conqueror and his comrades at the battle of Hastings have many descendants.

Men keep track of their kin if the kin become rich and famous; women keep track of them, anyway.

Refuse substitutes. Demand Red Cross bling. Large bottle 10c. All grocers.—Adv.

All things seem easy to the man who never tries to do anything.

COULD NOT SLEEP NIGHTS

Helped By Lydia E. Pinkham's Vegetable Compound

Fairhaven, Mass.—"I am taking Lydia E. Pinkham's Vegetable Compound during the Change of Life and I think it is a wonderful tonic.

It is as the directions say, they would find it a great benefit. My worst symptoms were nervousness and tired feelings.

FINNEY OF THE FORCE

THE FEATHERHEADS

Daddy's Evening Fairy Tale

By MARY GRAHAM BONNER

BIRDS' THOUGHTS

"We dress so much alike," said Mr. Vesper Sparrow, "and I think it is so nice that we do.

"We both like the same sort of a suit or costume. We both like brown and gray and white in our feathers, and we are both very fond of having our outer tail feathers white.

"They can be seen when we fly and I think they look very smart and stylish."

"I think so, too," said Mrs. Vesper Sparrow. "You know we're sometimes called Grass Birds and Grassfinches, and we belong to the big Finch family."

"Those would all do as names for us," said Mr. Vesper Sparrow. "We do love the grass.

"We have our nests of them which are always laid in the high meadow grass.

"We don't care about digging worms out of the ground but we love the insects of the meadows.

"We are smaller than the well-known English sparrow, and our name is indeed well chosen, though then again it isn't.

"I mean the name we are almost always called by--the Vesper Sparrow."

"Why is our name well chosen and

"Named the Vesper Sparrows."

then why isn't it?" asked Mrs. Vesper Sparrow.

"That is rather confusing to me."

"We are named the Vesper Sparrows because we sing more often in the late afternoon when evening is approaching than at any other time.

"And our voices are at their best then, too.

"Vesper, you see, means late afternoon or early evening."

"Yes," said Mrs. Vesper Sparrow, "now I see why we are well named.

"But you also said we were not well named. Will you tell me about that?"

"I will," chirped Mr. Vesper Sparrow. "When the other birds sing they choose the morning for their big concert.

"Now we like to sing in the early morning, too!

"We always join in with the early morning singers.

"But we sing later in the afternoon than the others, except the rosebreasted grosbeak family, and they love to sing in the early evening as we do."

"I'd say," Mrs. Vesper Sparrow remarked, "that we were both--morning and evening singers."

"Just what we are," said Mr. Vesper Sparrow. "We're a little bit like the meadowlarks too, though."

"How are we like them?" asked Mrs. Vesper Sparrow.

"Sometimes we sing when flying," Mr. Vesper Sparrow said. "And they do that.

"Then too, the meadowlarks are very careful about hiding their nests and keeping their birdlings safe in the grassy nest, with grass covering over and around the nest.

"We fly away, and so do they, when we think danger is near--not because we want to desert our young--oh, never, never."

"Never, never," said Mrs. Vesper Sparrow.

"But simply to keep people from knowing where our nests are. There are some creatures," continued Mr. Vesper Sparrow, his little voice shanking as he thought of such creatures, "who will rob nests of eggs before the birdlings have come out.

"They think they are making collections! What do they want of eggs?"

"Do they want little shells which don't really mean anything to them at the expense of breaking the hearts of the mothers and the daddies?"

"Would such creatures like to have their brothers and their sisters stolen away from them--out of their cradles? I should say not!

"Would they like to have collections made of their sisters and brothers? Not for a minute.

"There are enough things to collect. Stamps and pictures and stories and real pets to be cared for--but not the eggs of birdlings.

"But I have heard that people are getting over their cruel ways."

And Mrs. Vesper Sparrow felt very much better about it, very much better.

Henry Usually Good

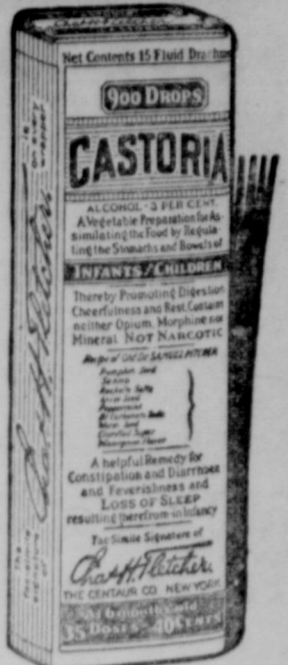

Teacher--Did I see you copying this problem from Henry's paper?"

Stupid--Yes.

Teacher--Don't you know that's terribly wrong?"

Stupid--I didn't know. Henry's usually pretty good at arithmetic.-- Boy's Life.

When Babies CRY

Babies will cry, often for no apparent reason. You may not know what's wrong, but you can always give Castoria. This soon has your little one comforted; if not, you should call a doctor. Don't experiment with medicines intended for the stronger systems of adults! Most of those little upsets are soon soothed away by a little of this pleasant-tasting, gentle-acting children's remedy that children like.

It may be the stomach, or may be the little bowels. Or in the case of older children, a sluggish, constipated condition. Castoria is still

the thing to give. It is almost certain to clear up any minor ailment, and could by no possibility do the youngest child the slightest harm. So it's the first thing to think of when a child has a coated tongue; won't play, can't sleep, is fretful or out of sorts. Get the genuine; it always has Chas. H. Fletcher's signature on the package.

No Brains
Jack--Was that girl you were out with last night dumb?
Jim--Dumb hardly expresses it! She thought the arms limitation conference was a meeting of reformers who were planning to put the kibosh on petting parties.

Various Names for Pest
The cotton bollworm goes by different names in different localities, according to the crops that it most seriously destroys, some of its nicknames being the tomato fruit worm, the corn-eat worm, and the false budworm of tobacco.

School-day scuffs vanish with a touch

At the touch of the dauber scuffs disappear, color is restored uniformly to faded shoes. More than 50 long-life shines--50 cents. Colors for black, brown, tan and white shoes--a neutral polish for others.

BARTON'S DYANSHINE SHOE POLISH

Hypnotizing Chickens
To weigh a chicken without tying its feet, tuck its head under its wing, swing it around a few times and it will lie still on the scales.--Farm and Fireside.

More Camouflage
Mother--Willie, I told you to wash your neck clean.
Willie--Well, mother, ain't I going to wear a collar?
The order of the Golden Horseshoe was the first order established in the United States. It was organized in Virginia in 1724.

To Identify Genuine Aspirin

THE increasing use of Bayer Aspirin every year is proof that it has no ill effects. It is the accepted antidote for pain. It always helps; it never harms. Quick relief when you've a headache, or cold; or are suffering from neuralgia or neuritis. Rheumatic pains yield, too, if you'll only give these tablets a chance. But you want genuine Aspirin, so look for the Bayer Cross on every tablet. The box always bears the name Bayer and the word "genuine" printed in red. Proven directions inside.

Aspirin is the trade mark of Bayer Manufacture of Salicylic acid

Here's one granddaughter who takes advice from elders

Schoolgirl learns simple health measure

WITH all the talk there is nowadays about the independence of the sub-deb generation, your reporter got a great kick out of hearing a grandmother describe how her granddaughter was following a good old tried and true method of improving her general health.

"My granddaughter, Margaret," says Mrs. Zell of 6231 Catherine Street, Philadelphia, "read about Nujol, was interested in it, so sent for a sample." It seems she has been taking a tablespoon of Nujol once a day since and expects to continue this treatment. Already she has found an improvement in her general health, her system functioning normally where other remedies had failed.

That's one of the best things about Nujol. It is just as harmless for young girls, or babies even, as it is for adults. For Nujol contains no medicines or drugs. It can't upset

Starting right

you because it works so easily and regularly, in a normal fashion.

Nujol was perfected by the Nujol Laboratories, 2 Park Avenue, New York City. It can be bought anywhere for about the price of a ticket to a good movie. Get a bottle of Nujol today and try it, won't you in sealed packages.

CHAPTER VI—Continued

Fellowes reflected uneasily that, at least, she'd probably fight more handily than his prolix attorney. But a clamor of voices distracted his attention. "Hi, whar's the squire?" "Down with the Bloodybacks!" "Come on, Nimrod, we want to fight!" "Three cheers for the Fencibles!" "We'll show them Englishmen a few tricks!" "Hey, Sopher! Hear yer bloodhounds barkin'?"

Not so well disciplined, the Fencibles, who, after all, were only every day farmers and fishermen. Thank God for the misty darkness!

The men were armed as nondescriptly as the squad that had attended Eeches—half of them carried old Brown Bess firelocks, with bayonets; the remainder sported hunting rifles, tradeguns and fowling pieces.

Lads barely in their teens shambled beside grandfathers wearing their white hair long in the fashion of the last century. But all, regardless of age or equipment, were hysterically aggressive, and they broke ranks with a whoop to receive Fellowes.

He quieted the demonstration with difficulty.

"The British will hear you, friends. Our one hope is to surprise them. Fall them in, Nimrod."

Sopher drew his saber with a clang. "Fall in, men! Fall in! Sergeant Peirt! Where's Sergeant Peirt?"

One of the ancients of the company stepped clear of the confusion and saluted with shaky smartness.

"Muster the men, sergeant. Column of fours."

"And douse those torches," added Fellowes.

Prompt abedience plunged the group in darkness, and the confusion increased until the Widow Rhodes appeared with a lighted stable-lantern in either hand.

"I never see such clumsy oafs," she snapped. "For land's sake, git agoin', Abner Peirt. I've heard yer tell 'bout Saratogy for thirty years. S'pose y'show us a bit o' sojerin' for a change?"

"We will, M'randy, we will," quavered Peirt. "The Fencibles ain't 'Con-tinentals, but they know thar drill. Fall in, men! Slope arms! Right dress!" His old voice took on a ghostly ring of virility. "By fours—column right—for'ard!"

Feet thumped in the dust, and Fellowes found himself, with Cuffee and Tom and Nimrod Sopher, leading the Fencibles west on the South Country road. From the rear of the little column echoed the monotonous incantation of Sergeant Peirt: "Hayfoot, strawfoot! Hayfoot, strawfoot! Hayfoot—"

The ancient's reiterated refrain died away in the chatter of the tree-tops. There was only the "shuffle-shuffle, slap-slap" of feet in the dust, the rustling of equipment, the tense breathing of men laboring under excitement held in leash. It must be very late. Fellowes reflected, well along toward dawn; but the mist, low-lying over the swampy lands bordering the bay, thickened the darkness. Colishaw should be on the point of departure—the Englishman was no fool; in any case, would wish to keep his landing secret.

They tramped around a curve in the road, and Cuffee, at Fellowes' elbow, stiffened with a jerk.

"Wha dat?" he whispered. Simultaneously, came a hail from the shadows in front: "Aho, there! Lay to!" And a bosun's whistle trilled, sharp and clear.

"Back yer oars, Clinch," roared Tom Grogan. Pistols exploded among the trees; the whistle trilled again, sharper, more piercing.

"Out cutlasses," bellowed Clinch. "Stand by to receive boarders." Behind them Fellowes heard Peirt, quaveringly authoritative: "Form column—by fours—left into line—for'ard! Shift—firelocks! Present—firelocks! Aim—fire!"

The crashing detonation of thirty stand of arms dismayed the sailors notwithstanding the militiamen's bullets flew in every direction save the enemy's. Fellowes detected their flight by the crackling of tree branches and Clinch's fervid oaths, and summoned the Fencibles to pursue.

"After them, boys! Give 'em the cold steel!" Tom was off already. Mrs. Rhodes, as brandished at the length of his peluke arm, howling challenges to Clinch. Cuffee leaped into the woods, screaming a weird slogan learned in the jungles of Ceylon. Sopher continued to emit twittering calls that ran the gamut from falsetto to bass, trotting next to Fellowes. The Fencibles followed stouly.

The pursuit receded from the road, traversing a belt of trees which hid the antagonists from each other, bewildering both sides, and presently spilled out of the grove on to a range of cultivated fields. The light was growing. Fellowes perceived, in the distance, Chater's house was a white blur against a windbreak of tufted elms. Clinch launched a vigorous charge as soon as the increased visibility revealed the scanty numbers and character of the attackers.

"Come on, buglers," the bosun engaged his men. "Carry it to em!

Inds! Slice the lights out o' 'em! They're only milshy!"

The sailors responded gallantly, coming forward in a compact group, sure-footed and agile; and the militiamen, caught off balance, out of breath, most of them with their guns empty, were disposed to run, despite Sergeant Peirt's angry appeals. Sopher, vocal at last, stood stockstill, wheeling his saber and crying shrilly: "Follow your captain, men! Follow your captain!" It was Fellowes, with Tom and Cuffee, supported by Peirt, who checked the impact of the sailors, and gave the Fencibles an opportunity to rally. He flung his empty pistol into the charging group, snatched a clubbed rifle from one of the faltering militiamen, and attacked Clinch, himself—who recognized the Long Islander with a yell of incredulity.

"Sink me, lad! 'Ow'd ye git ere?" "Surrender, Bob! You're cornered." "Not me! Bob Clinch don't strike 'is colors—"

But in the midst of his defiance the knot of sailors disintegrated, as Cuffee smashed the head of one and Tom heaved a second from shoulder to waist. The Fencibles, who had been on the verge of flight, were intoxicated with ferocity by their first sight of blood, and eagerly resumed the pursuit.

"Surrender, Bob," Fellowes urged again.

"Not if I knows it," retorted the bosun, dodging a blow with a clubbed rifle. He parried another swing, then stooped and grabbed a fold of Fellowes' shirt, jerking it over the Long Islander's head. Blinded and hampered, Fellowes stumbled to his knees, and by the time he had ripped off the tattered garment and scrambled up, half-naked, Clinch was safely out of reach.

The sailors recovered rapidly from their panic, and made for the creek bank, halting at intervals to fire their pistols and gain a breathing spell. Daylight, Fellowes realized, would increase the timidity of his raw men, and he called anxiously to Sopher:

"We must finish this while we have the darkness for cover. One more charge! Fire a volley, and drive them into the creek."

Peirt cried valiantly: "That's the way we took 'em at Saratogy! Keep a-chargin'! The British'll run fast as any fellers if they see bay'nets to thar gazards. Hearts up, now, boys! With powder 'n' ball—load! Present—firelocks! Aim—fire!"

The greasy powder smoke billowed across the field, and the Fencibles trotted with it, making no pretense at order, unable for the moment to see what the enemy was doing, and therefore persuaded they were beaten. Fellowes, in advance of the line and not yet blanketed by the smoke, saw the sailors fall prostrate as the American's muzzles letted flame. Then Clinch's whistle piped distinct in the racket of musketry and haphazard cheering, a cannon boomed on the creek, and a host of sinister voices whined through the dank air. Grape-shot! Fellowes knew what that meant: the long-boat's three-pounder had been brought to bear on them. And he knew, too, by their frightened yells, that the Fencibles were in headlong retreat.

"Peirt," he shouted. "Sergeant! Can't you hold your men? Sopher! Nimrod!"

But his only answer came from Tom Grogan, who bobbed up out of the smoke beside him.

"The old feller took a whif o' grape 'twixt wind-and-water, messmate," Tom reported. "And thar air milshy cap'n's off on 't'other tack under full sail, along o' the rest o' his squadron."

"Where's Cuffee?" "The negro towered erect at mention of his name."

"Cuffee wid yo', mars'r," he answered simply.

"Three of us left," groaned Fellowes. "But we can't fall like this. We must take Colishaw."

(TO BE CONTINUED)

Sheep Work for Living

There are not many parts of the world where the ordinary domestic sheep is used as a beast of burden, but in Tibet they are. The animals, loaded with packs of wool, are used between Tibet and the Rampur Fair in India. The journey takes more than a month and several high passes are traversed that are inaccessible to other pack animals.

Once the wool has reached its destination the sheep remain on the plains for the winter, for the frontier passes then are impassable. They return later with loads of corn for border districts where grain is scarce.—*Wide World Magazine.*

Illiterate Monarch

From slave to emperor might well be the title of a biography of Christophe, ruler of Hayti during the days of the "Black Republic." Because he came from such humble origin Christophe was poorly educated despite his collection of fine books and rare art pieces in his palace, Sans Souci. The story is told that when he was made emperor, Christophe chose to call himself "Henry I" rather than Christophe, because he could spell the former and was unable to write his real name.—*Detroit News.*

BLACK-AND-WHITE NOW FEATURED; EVENING GOWNS ARE LENGTHENED

ATTRACTIVE BLACK-AND-WHITE COSTUME

SATIN for afternoon, satin for evening, receives the enthusiastic endorsement of the mode. One would have thought that after repeating its triumphs for so many seasons, satin would have by this time have outlived its voguishness, at least for the time being. On the contrary satin is holding its own with more certainty than ever.

The satin mode as now is, presents many phases not the least interesting of which is the fact that there are more than one kind of satin featured in smart fabric showings, and the color range extends from the most delicate evening tints to all the rich dark afternoon hues now in vogue. Speaking of the various satin types, there's everything from the ever popular soft crepe-back satin to the very new and much exploited highly lustrous panne satin which is really of the rayon family. Frocks of the new panne satin both in black or colors number among outstanding successes of the evening mode.

For early autumn wear the satin afternoon and the satin street frock, also short jacket suit are making an excellent showing among new fashions. The smartest of these daytime modes are carried out in black and white as is the one-piece dress in the picture above. One sees any number of jaunty black satin suits the skirts of which flare fashionably sometimes via the circular-cut method, and just as often through use of plaits and godets. With these a white or egg-shell satin blouse is inevitable. Of course there must be a handsome fur neckpiece about the neck.

If black-and-white does not tune to your individuality, then choose for your "first" suit to wear on sunny fall days, heavy brown satin, tailored

the sides. But now! behold the frankly long-all-around hemline.

The light green moire evening gown in picture below shows the new length. Two huge bows make this gown distinctive. There never was such a season for bows as this.

Just what we are coming to in matter of hemlines, who can tell? In fact the entire silhouette is undergoing a revolution. Especially is this true of daytime modes, the longer hemlines, the fitted bodices, the higher waistlines, the sash tie-backs which timidly hint at the bustle types of 1830 influence, these and other details of fussy shirrings and puffings and "dressmaker touches" in general, are causing nothing less than a sensation in fashion circles.

But why talk of such impending events as hidden knees and curves at the waistline for daytime frocks, when such fascinating themes await discussion as the new colorings which are enhancing the formal evening picture with their glamorous variety.

If you like turquoise blue wear it, for 't is one of the favored shades for

GRACEFUL EVENING GOWN

to a nicety, for brown is the very quintessence of color chic this season. Satin plique is another smart fabric item making its recent debut, and printed satins, too, are receiving considerable attention. Many of the newest satins emphasize the smart dahlia and blackberry shades.

Well, like it or not, we are in for long skirts, so we may as well be game and accept fashion's verdict gracefully. It is the long limbed goddess which fashion enthrones this season.

Of course such radiant changes in dress as pertain to descending hemlines and ascending waistlines has not happened all of a sudden. At least in matter of evening frocks the change from short to long has been a gradual process—perhaps a hemline swooping to the back but retaining brevity at the front, or that which is just as chic, the hemline which lengthens at

under the arc-light. So, also, are light blues. Green is especially enjoying many triumphs, notably such esthetic shades as sage and other subtle tones, particularly a new "frosted green," which is among the loveliest of pale evening tints—also, if you please, bright emerald green. Egg shell and pink tones are in profusion and how flattering and sweetly feminine are these delicate shades. Conspecto on the scene, Spanish red, which recalls that much of fashion this season reflects old Spain influence.

And there's black! The enthusiasm for color in no way dims the importance of black. Much of fashionable Paris is trending blackward, and if not all-black, then black-and-white—frothy black and white evening frock perhaps, or a white beaded black velvet.

Community Building

Easily Possible to Cut Enormous Fire Losses

How are we to stop the depredations of the fire demon? There are three ways in which we can aid. First we should be careful to prevent fire. In our homes we can refrain from doing the little things that, seemingly unimportant, oftentimes result disastrously. We should clean out the chimneys annually and keep the smokepipes in repair; refrain from putting hot ashes in wooden containers; use only standard electrical equipment and installations; be careful with the use of inflammable liquids; and provide an incombustible roof. Similarly, we should use reasonable care in our place of business.

Even so, there will at times be accidental fires and we need to tear a leaf from the book of our European neighbors. We should so construct buildings that a fire, once started, will be confined near the place of origin until the fire apparatus arrives. Building codes, such as issued by the National Board of Fire Underwriters, are a pattern after which communities may draw up their own codes for fire-safe structures.

Proper Planning for Growth of Community

The era in which American cities "just grew," pushing outward their boundaries and piling up their buildings tier on tier, has given way to an era of orderly planning and development, making of them better places in which to live and work, says the Week's Work published by the United States Chamber of Commerce.

Streets are not merely open spaces between houses and factories but channels through which traffic circulates, not only within the city but into which it pours from the outlying country. Parks are not merely municipal ornamentation but breathing spaces essential to wholesome city existence.

The modern city is not a mere agglomeration of buildings but an organism which functions badly or well as it develops improperly or properly. One part cannot be severed from another without disastrous results. Neither can it be blocked off from the region of which it is the vital nerve center without stagnation and decay.

City to Be Colorful

The world's most beautiful, colorful and restful city is the ambition of Oslo, Norway, in its new scheme of civic decoration. The city is to be divided into districts, each painted in a different color, including pale blue, green, rose, white and other soothing tints. Various tests were made last year, and a five-story pale green building in the center of the business district is said to be very striking. Experts argue that green absorbs more light, and is, consequently, more restful to the eye than any other shade. They also point out that a particular tint of blue eyes steal more protection from the sun's heat than any other color. By these methods of choosing colors, Oslo is expected to be a city of utility as well as beauty.

Costly Road Building

A good road, smooth as a billiard table, with neatly graveled shoulders and white-painted fences alongside, may be one of the ugliest things in a verdant countryside. Where it cuts a rocky hillside the blasting makes skeletons of living trees; where it grades a sandbank construction rips up the natural growth of roadside flowers and leaves a jagged scar; where it plunges into a forest the improved road seems by some unerring chance to demand the right of way from the finest old oak and maple trees. When the work is done the road is merely a road leading somewhere—the lingering invitation of the old countryside is gone.

Ownership Versus Divorce

There is a dignity in ownership that far outweighs any lack of conveniences. There is something fine in maintaining a home under one's own roof-tree. Every improvement has a value far beyond its intrinsic cost because of the romance of beautifying one's own home. Once young married people center their thoughts on ownership of a home, work together, save together to achieve that home, the heresy of divorce will "fold up its tent like the Arab and silently steal away."

Roads Beautified

A program of highway beautification has been undertaken by the Connecticut state highway department. Thousands of trees and shrubs, grown in nurseries maintained by the department or transplanted from other places, are being placed along the highways where there is no natural growth.

Natural growths are being preserved wherever they do not interfere with the safety of motorists or become a detriment to the highways.

Three Forms Created

Architectural town planning has created three esthetic forms, the plaza, the monumental street and the inequally named "patis d'ole." A synthesis of all three makes the Plaza del Popolo the glory of civic art, says Town Planning Review.

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. AN gas is expelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take. Any drug store has the genuine, prescriptive product.

PHILLIPS Milk of Magnesia

WINTERSMITH'S CHILL TONIC

For over 50 years it has been the household remedy for all forms of Malaria Chills and Fever Dengue. It is a Reliable, General Invigorating Tonic.

A man who can put a baby to sleep when no one else can says it's permanent magnetism; he may be right.

Kill Rats Without Poison

A New Extremator that Won't Kill Livestock, Poultry, Dogs, Cats, or even Baby Clinks. K-R-O can be used about the home, barn or poultry yard with absolute safety. It contains no deadly poison. K-R-O is made of Squill, as recommended by U. S. Dept. of Agriculture, under the Comstock process which insures maximum strength. Two cans killed 378 rats at Arkansas State Farm. Hundreds of other testimonials. Sold on a Money-Back Guarantee. Insist upon K-R-O, the original Squill extermiator. All druggists, 75c. Large size (four times as much) \$2.00. Direct if dealer cannot supply you. K-R-O Co., Springfield, O.

K-R-O KILLS-RATS-ONLY

Normans Should Speak Up

Normans with William the Conqueror and his comrades at the battle of Hastings have many descendants and two French professors have been commissioned to trace them so that their names may be placed on a tablet which soon is to be erected in the castle of Falaise, where the duke of Normandy was born.

Men keep track of their kin if the kin become rich and famous; women keep track of them, anyway.

Refuse substitutes. Demand Red Cross brand. Large bottle 10c. All grocers.—Adv.

All things seem easy to the man who never tries to do anything.

COULD NOT SLEEP NIGHTS

Helped By Lydia E. Pinkham's Vegetable Compound

Fairhaven, Mass.—"I am taking Lydia E. Pinkham's Vegetable Compound during the Change of Life and I think it is a wonderful tonic. When I feel nervous and run-down my husband gets me a bottle right away. It is a great help to me and I think that if other people would only take it when they feel all run-down and take it as the directions say, they would find it a great benefit. My worst symptoms were nervousness and tired feelings. I could not sleep nights and I did not care about my work. I was so nervous I would cry if anyone looked at me."—Mrs. Ada Bessie, 195 Washington Street, Fairhaven, Mass.

W. N. U., Oklahoma City, No. 41-1929.

Daddy's Evening Fairy Tale

By MARY GRAHAM BONNER

BIRDS' THOUGHTS

"We dress so much alike," said Mr. Vesper Sparrow, "and I think it is so nice that we do."

"We both like the same sort of a suit or costume. We both like brown and gray and white in our feathers, and we are both very fond of having our outer tail feathers of white."

"They can be seen when we fly and I think they look very smart and stylish."

"I think so, too," said Mrs. Vesper Sparrow. "You know we're sometimes called Grass Birds and Grassfinches, and we belong to the big Finch family."

"Those would all do as names for us," said Mr. Vesper Sparrow. "We do love the grass."

"We have our nests of them which are always laid in the high meadow grass."

"We don't care about digging worms out of the ground but we love the insects of the meadows."

"We are smaller than the well-known English sparrow, and our name is indeed well chosen, though then again it isn't."

"I mean the name we are almost always called by—the Vesper Sparrow."

"Why is our name well chosen and

"Named the Vesper Sparrows."

then why isn't it?" asked Mrs. Vesper Sparrow.

"That is rather confusing to me."

"We are named the Vesper Sparrows because we sing more often in the late afternoon when evening is approaching than at any other time."

"And our voices are at their best then, too."

"Vesper, you see, means late afternoon or early evening."

"Yes," said Mrs. Vesper Sparrow, "now I see why we are well named."

"But you also said we were not well named. Will you tell me about that?"

"I will," chirped Mr. Vesper Sparrow. "When the other birds sing they choose the morning for their big concert."

"Now we like to sing in the early morning, too!"

"We always join in with the early morning singers."

"But we sing later in the afternoon than the others, except the rosebreasted grosbeak family, and they love to sing in the early evening as we do."

"I'd say," Mrs. Vesper Sparrow remarked, "that we were both—morning and evening singers."

"Just what we are," said Mr. Vesper Sparrow. "We're a little bit like the meadowlarks too, though."

"How are we like them?" asked Mrs. Vesper Sparrow.

"Sometimes we sing when flying," Mr. Vesper Sparrow said. "And they do that."

"Then too, the meadowlarks are very careful about hiding their nests and keeping their birdlings safe in the grassy nest, with grass covering over and around the nest."

"We fly away, and so do they, when we think danger is near—not because we want to desert our young—oh, never, never."

"Never, never," said Mrs. Vesper Sparrow.

"But simply to keep people from knowing where our nests are. There are some creatures," continued Mr. Vesper Sparrow, his little voice shaking as he thought of such creatures, "who will rob nests of eggs before the birdlings have come out."

"They think they are making collections! What do they want of eggs?"

"Do they want little shells which don't really mean anything to them at the expense of breaking the hearts of the mothers and the daddies?"

"Would such creatures like to have their brothers and their sisters stolen away from them—out of their cradles? I should say not!"

"Would they like to have collections made of their sisters and brothers? Not for a minute."

"There are enough things to collect. Stamps and pictures and stories and real pets to be cared for—but not the eggs of birdlings."

"But I have heard that people are getting over their cruel ways."

"And Mrs. Vesper Sparrow felt very much better about it, very much better."

Henry Usually Good

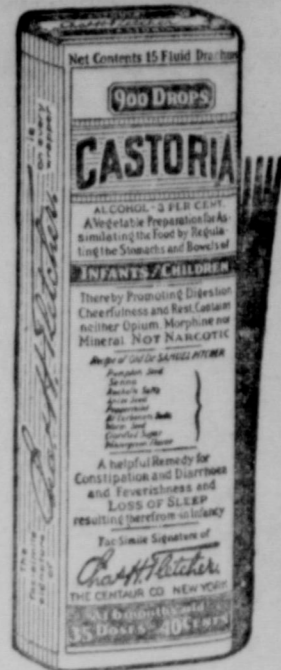

Teacher—Did I see you copying this problem from Henry's paper?

Stupid—Yes.

Teacher—Don't you know that's terribly wrong?

Stupid—I didn't know. Henry's usually pretty good at arithmetic.—Boy's Life.

When Babies CRY

Babies will cry, often for no apparent reason. You may not know what's wrong, but you can always give Castoria. This soon has your little one comforted; if not, you should call a doctor. Don't experiment with medicines intended for the stronger systems of adults! Most of those little upsets are soon soothed away by a little of this pleasant-tasting, gentle-acting children's remedy that children like.

It may be the stomach, or may be the little bowels. Or in the case of older children, a sluggish, constipated condition. Castoria is still

the thing to give. It is almost certain to clear up any minor ailment, and could by no possibility do the youngest child the slightest harm. So it's the first thing to think of when a child has a coated tongue; won't play, can't sleep, is fretful or out of sorts. Get the genuine; it always has Chas. H. Fletcher's signature on the package.

No Brains

Jack—Was that girl you were out with last night dumb?

Jim—Dumb hardly expresses it! She thought the arms limitation conference was a meeting of reformers who were planning to put the kibosh on petting parties.

Various Names for Pest

The cotton bollworm goes by different names in different localities, according to the crops that it most seriously destroys, some of its nicknames being the tomato fruit worm, the corn-eat worm, and the false budworm of tobacco.

School-day scuffs vanish with a touch—

At the touch of the dauber scuffs disappear, color is restored uniformly to faded shoes. More than 50 long-life shines—50 cents. Colors for black, brown, tan and white shoes—a neutral polish for others.

BARTON'S DYANSHINE
SHOE POLISH

Hypnotizing Chickens

To weigh a chicken without tying its feet, tuck its head under its wing, swing it around a few times and it will lie still on the scales.—Farm and Fireside.

More Camouflage

Mother—Willie, I told you to wash your neck clean.

Willie—Well, mother, ain't I going to wear a collar?

Whether you get delight out of spending your money or not, spending it determines your character.

The order of the Golden Horseshoe was the first order established in the United States. It was organized in Virginia in 1724.

To Identify Genuine Aspirin

THE increasing use of Bayer Aspirin every year is proof that it has no ill effects. It is the accepted antidote for pain. It always helps; it never harms. Quick relief when you've a headache, or cold; or are suffering from neuralgia or neuritis. Rheumatic pains yield, too, if you'll only give these tablets a chance. But you want genuine Aspirin, so look for the Bayer Cross on every tablet. The box always bears the name Bayer and the word "genuine" printed in red. Proven directions inside.

Aspirin is the trade mark Monoaceticacidester

of Bayer Manufacture of of Salicylicacid

Here's one granddaughter who takes advice from elders

Schoolgirl learns simple health measure

WITH all the talk there is nowadays about the independence of the sub-deb generation, your reporter got a great kick out of hearing a grandmother describe how her granddaughter was following a good old tried and true method of improving her general health.

"My granddaughter, Margaret," says Mrs. Zell of 6231 Catherine Street, Philadelphia, "read about Nujol, was interested in it, so sent for a sample." It seems she has been taking a tablespoon of Nujol once a day since and expects to continue this treatment. Already she has found an improvement in her general health, her system functioning normally where other remedies had failed.

That's one of the best things about Nujol. It is just as harmless for young girls, or babies even, as it is for adults. For Nujol contains no medicines or drugs. It can't upset

Starting right

you because it works so easily and regularly, in a normal fashion. Nujol was perfected by the Nujol Laboratories, 2 Park Avenue, New York City. It can be bought anywhere for about the price of a ticket to a good movie. Get a bottle of Nujol today and try it, won't you! In sealed packages.

COGITATIONS and APHORISMS of JODOK

It just seems to me that this is a day of mergers and organizations.

There are dry goods and bank mergers, drug mergers, law firm mergers, military mergers and national navy mergers, and it seems like every kind of merger that can be thought of except a church merger, which in reality is about the only kind of merger that is really essential.

But I do not suppose there will ever be a church merger. The churches are too shrewd for anything like that to happen. Each church will see to it that no other church will ever share in any of its glory or enjoy any of the good it has done. That is not what a church is for—at least that appears to be the idea of the average churchman.

The minister asked me the other day if I ever noticed how vexed and impatient and almost angry one gets when he gets after a certain thing and has it almost with in his grasp, but cannot just quite reach it. He says a church is that way too, as a body.

He said it was like a bob-tailed dog when a flea gets right on the end of his tail. The dog's mouth gets after his tail, trying to annihilate that flea, but the tail is a little too short and he is unable to make both ends meet, but the harder he runs after his tail the more vexed he becomes, until he finally becomes so frantic he just gives up and sits down.

Yes, I have seen such things happen and after he sits down the tail stops running and he just reaches down and gets Mr. Flea and punishes him to his heart's content.

Individuals and organizations might learn a lesson from the dog to the extent that if they would sit down on what they are chasing and hold it till they could catch up with it they could then easily catch it.

And speaking of the bob-tailed dog reminds me of the fact that a great many people are just like him—they appear to be never able to make both ends meet. And I can stand still and spit on one of that stripe, too.

Well, I started out thinking of mergers and organizations and got off on mergers of various kinds and on to the church and finally to the bob-tailed dog and got clear away from the organizations.

There is a multitude of organizations almost to the point of getting one's mind completely addled when he contemplates their multitudinosity.

Over at the shop where I work the high-muckety-muck gets a circular letter and handful of literature almost every day from some new fangled organization of some kind, organized for some distinct purpose.

I will not be surprised to get information from some organization organized for the purpose of pro-

moting the egg industry and advocating a cross between a cat fish and an ostrich, using the fish for numbers and the ostrich for size.

The doctor told me about the man who tried to cross the fish with the hen. He said he did not expect much in the way of size but just look at the number he might get. Now the ostrich would add size to number and just see what he would have.

The mayor tells me he gets lots of this organization literature also. He says there is one called the League of Texas Municipalities, which is working for law enforcement and sanitary conditions in the cities and municipalities in its membership. This organization advocates a system of sanitary pit toilets for cities that are too small or too poor to install sewer systems, and for towns that are growing too fast for the sewer systems to keep up with them.

He says Friona comes within each of these classes and is going to try to induce the City Commission to adopt the system for our town. He spoke to the doctor about it and the doctor says it is

I FEEL JUST FINE IN THE MORNING NOW

Amarillo Railroad Man Says His Troubles Are Disappearing After Taking Orgatone, and He Gains Daily.

"I get up in the mornings now feeling like a 2-year-old, and I've gained in weight and strength since I started taking Orgatone," said L. D. Priest, when he was talking to the Orgatone representative. Mr. Priest, who lives at 2109 Roberts St., is in the railroad store department, for the Santa Fe Railroad, which position he has held for the past ten years.

"I suffered terribly for more than five years," he continued, "and got in an awfully run-down condition. I got so I didn't want anything to eat and what little I did force down would cause me trouble from the gas that would form on my stomach. I would have smothering spells and a choking sensation in my chest, and I want to tell you this is real suffering. My kidneys bothered me very much and I would feel very restless at night and would get up in the morning feeling so tired and worn out I actually hated the thought of going to work when I did get out to the shops I would feel bad all day. I took everything I could find, trying to find some relief, but I just got worse and worse and there's no telling what would have become of me if it hadn't been for Orgatone."

"I heard a lot about what this medicine was doing and read so much in the papers where people all over Amarillo were being helped by it that I decided it might do me some good, and I tell you it was the best day's work I've done in a long time when I started taking Orgatone, for I'm a well man now and my nerves are as steady as a steam engine. I can eat anything I want without a bit of suffering and I enjoy every mouthful. I noticed before I had finished my first bottle my appetite was improving and now after taking four bottles of it, it seems like I can't get enough to eat. It sure is a fine feeling to sit down to a good dinner, like I do now, and know you can eat everything on the table and not have any trouble afterwards. And sleep, why I never wake up until time to get up and go to work and when I start out I feel as fine and full of life as a boy going hunting with a gun."

"Yes, sir, this Orgatone has got me feeling like my old self again and I know it's the right medicine for me. Everybody I know asked me what's making me look so much better and I don't lose any time telling 'em 'Orgatone,' and I'm glad to tell you about it, so you can publish it and let other suffering people know what Orgatone has done for me."

Genuine Orgatone is manufactured by one of the world's largest laboratories and is not a so-called secret or patent remedy but a new scientific bile treatment and is sold in Friona by the City Drug Store.—Adv.

The General Store

The general store had everything that folks are apt to need; Jump women's high-flown thungum a bob to soap and garden seed; But though the shelves were over-stuffed They knew just where to look No matter what the call might be— A veil or fishing hook.

On Saturdays the old store buzzed When folks came in to trade For gingham, silk and overalls, Hair nets and silver braids. It was a sort of clearing house, Where views could be compared On church bugs, politics and war And gossip freely aired.

They say a big department store Is standing on the spot, And people have to pay the cash For things that they have bought. But still abides a memory That will not die or fade. The memory of the Old Home Store Where folks could talk and trade.

the most sanitary arrangement he has ever heard of short of a sewer system and its installation will not cost the city a cent, since these toilets will automatically pay for themselves.

Then there is another the mayor told about, which is known as the Sessler plan, originated by a man named Sessler who has devised a plan for civic beauty and improvement by clearing away old style or run-down buildings that have become eye sores and replacing them with handsome up-to-date structures.

And that is not all the organizations that have come under my direct observation or to which my attention has been called.

Mildred and I were invited to attend a meeting at the school, on Monday night and we accepted. On reaching the room we found that, although we were treated with the utmost kindness and courtesy, we had evidently gotten into the wrong pew since all others present were of two distinct classes of people, those who are raising or supporting children, viz the parents, and those engaged in training or instructing these same children, viz the teachers, and it was called a Parent-Teacher Association.

Owing to this fact that our children are now men and women and that we cannot claim identification with the teaching profession, we naturally felt much out of place there and therefore, lest we might put the wrong foot forward, we sat still and said nothing not even designing to laugh or cheer even when the others laughed or cheered.

We learned that the members who were present were sincerely struggling with the question of

ANNOUNCING PLAIN FACTS Uncle Joe Spivins dropped in the other day and was telling us that when he was a baby they used to keep him amused all day by putting molasses on his finger tips and giving him a feather to play with. "Yet, I was a cute baby at that," he said. Here are a few plain facts also: Magnolia gas and oil warrant your consideration for the sterling quality and purity they place at your disposal at so reasonable a price. You will like the response which Magnolia gas gives. The instantaneous speed, the rapid acceleration is always characteristic of this product. Wholesale and retail.

Magnolia Petroleum Co. J. C. WILKISON, Agent FRIONA TEXAS

After a mixed program of music, readings and talks those present were entertained by the teachers at a luncheon in the building. Not feeling ourselves to be an integral part of the organization we declined the invitation to remain, but buttons against jack-knives. I would bet right in that little luncheon was found the greatest possibilities of securing that acquaintance and sympathy and understanding between the parents and teachers that they are so earnestly seeking.

STATEMENT Statement of ownership, management, etc., required by Act of Congress of August 24, 1912, of The Friona Star, published weekly at Friona, Texas, for October, 1929.

STATE OF TEXAS, County of Parmer. Before me, a notary public, in and for the state and county aforesaid, personally appeared John W. White, who, having been sworn according to law, deposes and says that he is the editor of the Friona Star, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, etc., of the aforesaid publication for date shown above, to-wit:

Names and addresses of publisher, editor, etc., are: Publisher, Nunn-Warren Publishing Co., Friona, Texas; Editor, John W. White, Friona, Texas; Managing editor, business manager, John W. White, Friona, Texas.

That the owner is: Nunn-Warren Publishing Co., Friona, Texas; J. E. and J. L. Nunn, Amarillo, Texas; David M. Warren, Pampa, Texas; J. C. Phillips, Pampa, Texas; R. S. Brashears, Borger, Texas; J. D. Merriman, Jr., Panhandle, Texas.

That the known bondholders, etc., holding 1 per cent of more of total amount of securities are: None.

JOHN W. WHITE, Editor. Sworn and subscribed before me this 11th day of October, 1929. (SEAL) M. A. CRUM, Notary Public. (My Commission expires June 1, 1931.)

Better see those stoves at BLACKWELL'S. They're dandies.

THE FRIONA GIN COMPANY

Appreciated the patronage given it last year by the cotton growers of Parmer county and other sections outside of the county, and is doing everything it can to merit their patronage again this season by furnishing the very best of gin facilities than any gin anywhere can give, by interested and courteous treatment of all gin employees, by providing a market second to none on the Plains, as our buyer has instructions to pay just a little less than the market at all times, assuring the cotton grower of as good a price for his cotton as the market will justify. He will make just one bid on a bale of cotton each day. If the bid does not take the cotton, it will be withdrawn and a new bid will be placed on it each day until sold, if the grower desires to sell the bale.

We have an excellent crew of men to do your ginning. They are working harmoniously and with best of co-operation in every way. It is their desire to give the farmers and the gin owner just that kind of service which makes for good business relations and fair understandings between the cotton grower and the ginner. Let us hope that this fine spirit

among the employees will continue throughout the season, resulting in a closer friendship between the cotton growers and those operating the gin.

With one of the best gins to be found anywhere, with a crew of employees co-operating to the fullest extent to the end that the gin may do the best of work at all times, with the assurance that you will find as good market at Friona as anywhere on the Plains, we enter the best season the gin has ever had with a desire to faithfully serve the cotton growers and the Friona community sincerely and well.

FRIONA GIN COMPANY, Inc. Ben F. Ridge, Sole Owner.

NOTICE TO FEEDERS

Social Hour.
Mrs. Obe Roberson was an Amarillo shopper last Friday.

Personal

Robert and L. D. Chiles have been visiting Vernon, Brownwood and Dallas and attending the State Fair at Dallas and County Zoo at Oak Cliff.
Judge E. F. Lokey of Farwell was a Friona visitor Monday afternoon.
Mrs. Heard of Wiltshire will not be in their dental office on October 31. Dr. Heard will be in Ft. Worth on October 28-29-30 attending the Annual Texas S. W. Study Club. 13-1tc
Mrs. O. F. Lange left last week for Chicago for a few weeks visit with her mother, daughter and a sister.
T. W. Turner who has been on the sick list for the past two weeks is slowly improving.

Summerfield

The Home Makers Club met with Mrs. L. B. Lookingbill last Thursday. The program was led by Mrs. Ott Behrends. Roll call was to name so prominent Texas woman, which was responded to by about 35 members and visitors. Those in the program and the subjects were as follows:
Mother of the Panhandle, Mary Ann Goodnight; Mrs. Ota Roberson.
First Texas Woman Senator, Margie Neal; Mrs. R. D. Lance.
First Woman Governor, Miriam Ferguson; Mrs. L. Johnson.
Texas Farm Women, Eva Blackmore.
Women as National Leaders, Mrs. L. J. Cannon.
First Woman Club Organizer, Phoebe K. Warner.
Miss Eva Blackmore was elected secretary.
During social hour the hostess served most delicious refreshments and at this time Mrs. Malcolm Cassell, nee Jewel Owens, was surprised by a lovely bridal shower.
Mrs. L. M. Campbell visited the past week with her husband who is building a new house for the Blakemores. They are from Crowell, Texas.
Mr. and Mrs. R. A. Baker of Amarillo and Mr. and Mrs. Robinson of Claude were Sunday visitors at the Leo Curry home.
Mrs. Guy Easley of Chowell visited the past week with her parents, Mr. and Mrs. A. J. Blakemore.
Mrs. Gerald Morgan visited her sister at Inez, N. M., the past week.
Mr. and Mrs. Lewis Jay have moved to the Sparks farm one mile north of here.
Mrs. Huntley went to Amarillo last Friday to shop and visit with her mother.
Lee Curry, L. H. Lookingbill, M. M. Ellis and Mack Nolagd have new cars, and they are beauties.
Mrs. L. Johnson and Mrs. J. H. Murdoch were in Amarillo Saturday.
Mrs. E. C. Dodson of Amarillo is visiting her daughter, Mrs. Walter Huntley.
Mr. and Mrs. Job of Hart and Mr. and Mrs. Vestel of Friona were Sunday visitors of Mr. and Mrs. A. J. Blakemore.

Eight New Roads Ordered Opened by Commissioners

The County Commissioners in regular session Monday of this week disposed of work that will do much to make history for Deaf Smith county. County Judge Earl W. Wilson presided, with all commissioners present, C. J. Paddock, Precinct No. 1; H. G. Conkwrigh, Precinct No. 2; J. T. Guinn Precinct No. 3, and W. T. Womble, of Precinct No. 4.
In Monday's session the commissioners established eight new county roads for a total of sixty-seven miles. Five of these roads are in the northwestern part of the county and lead from the Oldham county line to already established roads in Deaf Smith county that run in to Hereford. The petitions for these five roads were headed respectively by H. V. Van Bibble, H. A. Girard, George M. McLean, A. A. Ellward and Ole T. Larson.
A sixth road was established west of Hereford to run from Summerfield to the Harrison Highway. This petition was headed by Alton Frazier.
A seventh road, whose petition was headed by T. E. Baker, begins one mile east of Progressive school house to run three miles north and one mile west and come out in Progressive Avenue.
The eighth road whose petition was headed by George Guinn, leads from the Parmer county line north to the Harrison Highway, which it enters at the Syndicate school house.
The exact locations with surveyor's field notes of these roads will be posted on these routes and also in the court house at Hereford, according to announcement of Judge Wilson Tuesday. He also pointed out that a new ruling will prevail in connection with the establishment of the new county roads. Whereas in times before, land owners were given 9 months' time to get their fences moved back from new county roads right of ways, the commissioners court ruled that five months was considered a sufficient length of time to allow for this work. That does not mean the fences cannot be moved before the five months' time—they may be moved any time before that, but that legal measures may be resorted to to enforce their removal at the end of five months.
Petitions for two other Deaf Smith county roads were presented to the county commissioners on Monday, and they were granted and the juries of view appointed. The first petition was headed by C. T. Kibbe and asks that a county road be opened to lead from the north and south road 2½ miles west of Hereford to come into 25-Mile Avenue just north of the city.
The other petition was headed by D. Haney and asks that an east and west road be established to connect what was formerly known as the Askren community with Hereford and Dawn—Hereford Brand.

Ford Doings

The regular Club social will be held at Ford October 25. Instead of the ladies entertaining the men as usual, the men are going to treat the ladies to an oyster fry. Mrs. Bennett and Miss Brunley, teachers at Ford, are working on an interesting program to help out with the entertainment.
The Community Welfare Club met October 16 with Mrs. G. G. Temple as hostess. After an interesting business session, delicious refreshments were served. All present reported a nice time.
Mr. and Mrs. John Rempie's relatives returned to Oklahoma last week.
Mr. and Mrs. D. B. Mann spent last week end in Levelland visiting relatives.
Sunday dinner guests at the Hardy Benson home were Mr. and Mrs. J. E. Hill, Hereford; Waldo Kliever, Majorie Bell, Charlie Simpson, Edith Mann and Joe Garrett.
Ivan Smith of Gotebo, Oklahoma, is here visiting his brother, Oscar, who got hurt by a tractor two weeks ago.
Visitors at the O. D. Frazier home Saturday night were Mr. and Mrs. John Rempie, Clyde, LaVerne, and Euna Mann and Cecil Rayzor. Lucky Leavell left Monday for Hobart, Oklahoma, to visit his parents.
Mr. and Mrs. Albert Buller were Sunday visitors at the home of Mr. and Mrs. Herman Koch.
Bhul Shumley visited Joe Garrett Sunday.
Miss Marjorie Bell visited at the Hardy Benson and J. S. Garrett homes Wednesday.
Mr. and Mrs. Barney McCas-

CONTROLLED VOLATILITY...

What have tank cars to do with motor cars? Just this. Every day, tank cars filled with Phillips 66 are shipped North, South, East and West. The volatility of the gasoline in each of these tank cars is scientifically controlled to fit the climatic conditions of the locality in which it is sold. The result? Instant starting, quick warm-up, rapid acceleration, remarkable power and mileage—regardless of weather—at no extra cost! For best results try a full tank of Phillips 66... or 66 Ethyl.

Phil-up with **Phillips 66**

WHEN THE THERMOMETER GOES DOWN THE VOLATILITY GOES UP
Gasoline must vaporize before it can be fired in the cylinders of your motor. Volatility refers to the ability of gasoline to vaporize. With volatility controlled, Phillips 66 vaporizes as quickly in cold as in warm weather.

Nebraska's Diamond Jubilee

WHITE EAGLE OF THE OMAHAS

By ELMO SCOTT WATSON

THE Jay is March 16, 1854; the scene is Washington, D. C. A little group of Indian chiefs, arrayed in all their tribal finery, is holding a council with the frock-coated representatives of the "Great White Father." The business at hand is a treaty and a cession of lands owned by the people whom these chiefs represent—the Omaha Indians who live beyond the Missouri river in that vast empire known vaguely as the "Great West." And when the last formalities have been completed and the chiefs have made their marks under the signatures on the parchment, the Omahas have ceded "all their lands west of the Missouri and south of a line running due west from the point where the Iowa river leaves the bluffs, retaining their lands north of this line for a reservation." And that marked one of the steps whereby the great state of Nebraska came into being.

Now, 75 years later, the citizens of Nebraska are preparing to celebrate with parade and pageant, with air circus and military maneuvers and with many another contrast between the old and the new, the "diamond jubilee" of the Cornhusker state. On November 5, 6 and 7 Nebraskans, as well as residents of every state in the Union, will gather in Omaha for the celebration, which is being held there, because Omaha was the first territorial capital, and which is sponsored by Omaha civic interests, who have contributed more than \$100,000 for Nebraska's "seventy-fifth birthday" party. It will be held in conjunction with the Ak-Sar-Ben Live Stock and Horse show, November 1 to 8, which is considered one of the finest of its kind in the Mid-West and which is attended by stockmen from all parts of the United States.

But the treaty with the Omaha Indians, that handed over to the white men the land which was to become this fertile commonwealth, is not the only event that makes this seventy-fifth anniversary celebration a particularly fitting one. Acquired by the United States as a part of the Louisiana Purchase from France in 1803, what is now Nebraska for half a century was a part of the great "Unorganized Territory" which lay between the Missouri river on the east, the Red river on the south, the Rocky mountains on the west and the Canadian boundary on the north, and over which had roamed for centuries the Indian and the buffalo.

Then on January 4, 1854 Senator Stephen A. Douglas introduced a bill for the organization of Nebraska territory. This bill aroused the bitterest opposition and resulted in the Kansas-Nebraska bill which divided the new territory into two territories, Kansas and Nebraska. Franklin Pierce, who was then President, chose Francis Burt of South Carolina for the first territorial governor of Nebraska. But on October 18, 1854, two days after the new governor reached Bellevue he died and Thomas B. Cummings of Michigan became governor. Cummings faced the task of bringing political order out of chaos and one of the first problems to be settled was that of selecting a territorial capital. Bellevue, Plattsmouth, Nebraska City and Brownsville were all candidates for that honor but Cummings, who was a man of decisive character, took the initiative and selected Omaha. Then he set about

PHILLIP R. LANDON, "PARSON BOB"

DR. RICHARD TANNER "DIAMOND DICK"

to have his choice ratified and after a bitter fight in which there were many charges and counter-charges of bribery and corruption, Omaha was made the capital and a capitol building was erected on the hill where the Central high school now stands. It remained the capital until Nebraska became a state on March 4, 1867, when it lost out to Lincoln, then a "bare spot on an alkali flat," as it was described by an opponent.

It is not only these stirring and vital political events but many another thrilling incident of her history that will be commemorated at the diamond jubilee celebration in Omaha in November. Included in that history are stories of the Pony express, the Overland stage, the battles between the Sioux and Pawnees, the fights between the Indians and settlers and between the savages and government troops, stories of massacres, of burning emigrant trains, of turbulent life on a frontier, and of almost unbelievable hardships and dangers overcome by the brave men and women who built the state.

Like all states of the Western frontier, Nebraska has had her quota of picturesque figures and some of them are still living and have been asked to take part in the jubilee. Outstanding among them all, perhaps, is Capt. Luther H. North of Columbus, Captain North and his brother, Maj. Frank North, were the organizers of the famous Pawnee Scouts, a group of Indian auxiliaries who performed such valorous service for government troops in the wars on the plains while the railroad was being built west. Captain North has been characterized by authoritative historians as "the greatest of the old-time scouts of America."

Then there's "Diamond Dick," famous as an unequalled rifle shot, who settled down to a quiet life of retirement at Norfolk, where he has been living for a number of years. Several years ago he told the surprised home folks that the quiet, well-mannered man they had known for many years as Dr. Richard Tanner was the celebrated "Diamond Dick." And he had the records of his prowess to back up his claims.

"Diamond Dick" is a personal friend of Jim Dahlman, Omaha's cowboy mayor, who holds the record for successive terms of office. And when "Diamond Dick" Tanner heard

that Omaha was to hold a big celebration in observance of Nebraska's seventy-fifth birthday, he immediately sent a check to Mayor Dahlman to be added to the jubilee fund. Another frontiersman who will come to Omaha for the celebration is "Parson Bob" or Phillip R. Landon. He was stationed at Old Fort Kearney in western Nebraska, near the present city of Kearney, during several Indian uprisings.

Old Chief Yellow Smoke, the oldest chief of the Omaha Indian tribe, will come to Omaha for the celebration, as a representative of the original inhabitants of Nebraska. Yellow Smoke's father, then chief of the Omahas, was one of the signers of the treaty, whereby the Indians in 1854 relinquished title to the lands now within the borders of Nebraska. White Eagle, another Omaha Indian, and descendant of one of the signers of the government treaty, will also come to Omaha for the diamond jubilee celebration.

A number of contests with entrants from every section of Nebraska will be one of the features of the jubilee and one of the most unique of these is a Young Citizens' contest in which one boy and one girl from 93 Nebraska counties, between the ages of sixteen and twenty-one years, will be brought to Omaha, during the jubilee, with all expenses paid, to be entered in the Nebraska Young Citizens' contest. All state contestants will be winners of their respective county contests and will be judged on the basis of health, personality and intelligence. Chancellor E. A. Burnett of the University of Nebraska is chairman of this contest.

A spectacular pageant, said to be the most elaborate ever to be planned in the Mid-West, will be presented during the jubilee. This pageant, entitled "The Making of Nebraska," has been written by Hartley Burr Alexander, native Nebraskan, who is now a professor at Scripps college, Claremont, Calif. The pageant will be produced under the direction of John T. Hall, of the John B. Rogers company of Fostoria, Ohio.

This pageant will embody the chief historical points in the growth of Nebraska from the time it became a territory, until today, when it has become one of the leading agricultural states of the nation. Professor Alexander is an authority on Nebraska history and has written a number of pageants, none as comprehensive as the work in which he is now engaged.

The Water Way

Three-quarters of the body's weight is water. That is why it is essential to drink water and renew the waste. Water provides a "cushion" for the tissues which otherwise would rub and induce irritation—mental and physical.

Largest High School

DeWitt Clinton high school in New York city occupies several city blocks. Nine thousand pupils can be accommodated.

which, following the admirable example of America, has instituted the traveling libraries. Book circulation is now very active and the work is done with the co-operation of the circulating libraries already established. In Italy are to be found the so-called Biblioteche Popolari, or libraries for the people, which are supported by the municipalities, citizens' associations and religious bodies.

Radium salt worth \$600,000 would not fill a teaspoon.

Apply Limestone Year in Advance

Has Better Chance to Be Available for Plant Use of Many Crops.

To "get the most for our money" spent for limestone for clover fields, growers should apply it at least a year in advance of seeding the clover or alfalfa.

To do this, many farmers are applying lime this winter to land that will be used for corn next spring, then, in a year, they plan to seed their alfalfa or clover, reports C. J. Chapman, soils specialist at the Wisconsin College of Agriculture.

Mixes Lime With Soil.
Chapman finds this a good practice, for the cultivation of the corn during the growing season tends to mix the lime thoroughly with the soil and puts the land in excellent condition for seeding the following spring.

Some Wisconsin farmers are also applying ground limestone or other forms of agricultural lime as a top dressing to hay lands or pasture, Chapman says, but its effectiveness when used this way is negligible until the soil has been worked up the second time.

"Ground limestone becomes available only through reactions with soil acids. It is not soluble in water and in order to act with acids it must come in contact with soil particles," he says.

When lime is applied on pasture or hay lands, it does not become mixed to any extent with surface soil. It is plowed under when the land is fitted for corn or small grain, and it is not until the land is again plowed that the lime is turned back to the surface and worked into the soil.

Other Effective Agents.
Air slaked lime, finely pulverized marl, wood ashes, paper mill sludge, and finely ground limestone are effective the first year when they are applied in sufficient amounts and thoroughly worked into the soil by disking and dragging.

The finer the limestone is ground and the more thoroughly it is worked into the soil within the surface six or eight inches, the faster it will react with soil acids and the more effective it will be in supplying lime to growing crops and correcting the acidity.

Plant Oats on Top of Silo to Exclude Air

A farmer who has had wide experience finds that spoiling of silage during the winter can be lessened by treating the inner walls of the silo with a solution which keeps out air. The mixture consists of one pound salt, two tablespoonfuls of alum, one teaspoonful of lye and four gallons of water, plus enough cement to make it the consistency of paste.

In some cases, the inside of the silo doors are lined with paper or the cracks filled with clay to keep out air.

Another scheme is to sow oats or cane at the top of the silo. These grains sprout quickly in the warm silage and the matted growth serves as an insulator excluding the air.

Plan to Remove Supers and Keep Bees in Hive

When the time comes to remove the supers they will contain many bees, sometimes lots of them. The frames and combs can be taken out one by one and the bees brushed off, but the simplest way is to insert the inner cover between the brood body and the supers with a bee escape in the oval hole. The bees will pass down through the bee escape and in 10 or 12 hours there will be no bees in the super; they can pass through the bee escape, but they can't get back—it's a one-way road. These bee escapes cost but a few cents and they save quite a lot of fussing.

Agricultural Squibs

Pigs full-fed corn on pasture need only one-half gallon of skimmed milk per day.

Larkspur is poison to cattle, and dangerous on ranges until it has passed the flowering stage and is in seed.

Exhausted and overworked horses and mules are liable to have indigestion, colic or diarrhoea or become foundered.

If pasture is short or if the pigs are being fattened in the dry lot they should be given a gallon of skimmed milk per pig per day.

Pigs and sheep often get sunburn, sunscald or rape poisoning by coming in contact with rape or alsike clover while the pastures are wet.

Authorities on crops and soils tell us that about three-fourths of the fertility value of the cornstalks is returned as manure when the silage is fed to live stock.

Many people have observed cattle chewing bones, an indication of a condition that may develop into what is known as loin disease. This disease is often called creeps, which is caused largely by a lack of the non-assimilation of phosphorus.

Open Air Salesroom for Airplanes

View of the open air salesroom for airplanes, which is at one of the busiest corners in Los Angeles, Calif., where nearly a quarter of a million persons pass daily.

AIRPORT DESIGNED LIKE THE BEEHIVE

Novel Terminals Proposed by New Yorkers.

New York.—In a few years the air traveler may look down and regard a beehive on the earth with the same joyful anticipation that an ocean traveler sights land.

For the beehive, one of the oldest forms of architecture, inspired the newest plan for the nation's newest need, the airport, and one has been designed by Frances Keally and E. P. Goodrich, New York architect and city planner.

Goodrich is in China, having been commissioned by the Chinese government as consulting engineer in the development of a modern seaport at Canton and the laying out of a modern capital city at Nanking. His plans call for aviation development and he will use the beehive airport as a basis for this phase.

This new aviation terminal strives to become an architectural asset rather than a liability. And it looks ahead to the time when air travel will be much more common than today, Keally said.

Come and Go System.
"It is designed so that one-way traffic becomes an automatic feature," explained Keally. "Twenty-two airplanes and a dirigible can land while 22 airplanes can take off—all at the same moment."

"The average train leaving Grand Central station carries between 600 and 700 passengers; thus the airport can handle about the same amount of traffic.

"The design is made so as to focus and clear from one point all the high speed traffic of the city. Thus, vehicular tunnels and subways can come right into the airport and discharge their passengers, who then hop off in planes.

"All planes will start from and arrive at four terminals, which meet in a huge rotunda. Either the east-west or north-south terminals may be used to the advantage of the wind direction."

"The design calls for an airport 6,000 feet in diameter, the landing surface of which is covered with cinders, with enough space left for a runway 350 feet wide for each plane, the length of the runway being 2,500 feet.

"The landing surface has a 2 1/2 per cent grade so that airplanes arriving will be helped by gravity to stop and airplanes taking off will be helped by a down-hill run," Keally continued.

"A huge dome will cover the rotunda with storage space for several thousand airplanes supplied by two-story hangars. Above the dome will be a mooring mast for a dirigible and the top of the mast will be exactly 1,000 feet from the ground, the highest structure in the world.

A City Itself.
"The outer crust of the dome—think of it as the inner and outer layers of a thermos bottle—will be fashioned into a hotel containing several hundred rooms. Each fifty-story of this hotel will have a terrace so that guests can watch incoming and outgoing planes.

"Passengers who arrive by dirigible will descend to hotel or to rotunda by elevators. In the rotunda will be ticket offices and an outgoing and incoming waiting room, with public health, immigration and a room in which traffic men of the airport will get their instructions from men in the tower. In other words, the airport will be a city in itself."

Routes to Foreign Lands

The United States now has 9,000 miles of air routes connecting it with 16 foreign countries, while more than 5,000 miles and at least four other nations will be added to the system in the near future.

For Women's Records

Aviation records made by women are to be controlled in each country of the world by a woman representative of the Federation Aeronautique Internationale.

Planes Carry Hunters to a Far Wilderness

Duluth, Minn.—Airplanes have been called into use in transporting sportsmen to and from a wilderness which is said to be a veritable hunters' and fishermen's paradise, but which is inaccessible by all other means of transportation.

The wild region lies only about 100 miles north of Duluth, but, it is said, scarcely has ever heard the sound of a gun or the run of a reel. So plentiful is the region said to be in game that a company operating an air line to lakes of the region guarantee their patrons that at least one member of each party will catch fish and that all will see either deer, moose or bear on a flight of an hour or more.

Flights to the region are begun at the air line's base at Eveleth, Minn.

SUBCOOLED FOG IS GREATEST OF PERILS

Solidifies in Layers of Ice on Aircraft.

Cambridge, Mass.—The peril of ice forming on aircraft may come from three meteorological conditions, according to Dr. Alexander McAdie, of the Blue Hill Meteorological observatory, Harvard university.

These are sleet, glaze and subcooled fog. The last, he says, is the most dangerous.

Subcooling means that the tiny vapor particles are actually slightly colder than the freezing point, although still water. This condition occurs when the air virtually is free from dust and other particles, upon which the droplets might solidify.

Water expands when it freezes, and the minute particles of fog instead of freezing tend to spread more thinly through the air until they come in contact with some other surface. Immediately upon such contact, as the surfaces of aircraft, they solidify directly into a layer of ice. In this case the temperature of the droplets is decidedly lower than that of the surface upon which they freeze.

Doctor McAdie says the best way to escape from subcooled fog is to watch thermometers closely and seek levels, either lower or upper, at which temperatures are higher.

When fibers of sweaters and the hairs of fur coats become covered with hoar frost, it is a sure sign of subcooled water.

Glaze, which he says formerly erroneously was called sleet, occurs when rain drops near freezing temperatures fall upon a surface which is much colder.

Real sleet is due to raindrops falling through a layer of air below freezing, which turns them into frozen raindrops. An airplane moving through such a stratum when raindrops are coming from a warmer area above is in a dangerous zone, for the accumulating frozen drops stick to one another readily and so build up a perilous load.

Presumably, if a pilot recognizes accurately the sleet conditions, he can escape by climbing into the warmer level above.

Rocket Plane Being Built in Germany

Dusseldorf, Germany.—A motorless propellerless rocket airplane, with stream line "arrow" body for greater speed, is under construction here at the Eschenlab airplane factory.

It was designed by Max Valler, inventor of the rocket automobile.

Lifted into the air by another plane, the new plane is to take off for its first flight by merely setting off its rockets and dropping the tow-line.

A one-seater monoplane, with a 30 foot wing spread, it needs neither motor nor propeller, because of its rocket system of propulsion. About 225 pounds in total weight are thus saved.

Has Traveling Library

The Italy America society reports that, through big motor trucks, small traveling libraries have started to circulate in Italy, particularly in the rural districts of the country. They introduce the best Italian literature where it would not be so easily accessible, thus allowing the inhabitants of the smallest centers to share in the intellectual life of the country.

Italy is the first country in Europe.

Hard Schedule for Georgetown

Captain Jim Mooney of the Georgetown University football team, snapped during a workout of his team at Ocean City. The capital grid-iron men have a hard schedule this year.

Captain Mooney had a nail torn from his right thumb in a recent scrimmage and was forced to retire from hard practice until it mended.

Proper Type Spark Plug Most Important Factor

To maintain efficient engine performance in cars, buses or trucks, it is essential that the proper type spark plug be used.

The same type spark plug will not meet all driving conditions and all reputable manufacturers include in their lines many different types of spark plugs to meet different operating conditions. Attention to the matter of the proper selection of spark plugs for particular service go a long way toward insuring trouble-free performance.

An illustration of this point is cited in the case of a bus that had been operated with complete satisfaction on a level route, but when it was transferred to a different route where practically all of the highway was through hilly country, the engine developed preignition. The difficulty was immediately corrected with the installation of spark plugs of a cooler type especially designed to overcome preignition.

Check Meters of Speed Cops, Says Auto Club

The American Automobile association urges that police and court officials see that police speedometers are absolutely correct at all times and at all speeds in order that motor car owners may be assured of justice to which they are entitled in court on a speeding charge. It is declared that a host of motorists have been unfairly fined tens of thousands of dollars because "police and court officials do not realize that the speedometer is by no means the accurate instrument of measurement it is supposed to be."

Football, Basket Ball, Racing and Other Sports

The Eastern league barred the lively ball this season.

Penn line prospects are good this fall, and that is unusual.

A golf course is being planned in Moscow, the first of its kind in Soviet Russia.

Pitt's football teams, known as the Panthers, got their nickname from Panther Hollow, a ravine near the campus.

Navy will play two games on Franklin field, Philadelphia, this year—with Penn November 2 and with Dartmouth November 30.

Tire Holder Arranged on Any Running-Board

The illustration shows a convenient and simple running-board tire holder that can be made from a block of wood, some strap iron and five bolts.

A Wooden Block, Strap Iron, and Five Bolts Compose This Running-board Tire Holder.

As shown, the arrangement is for a rim fitted with four tugs, but it will work with other numbers of tugs, if necessary. Make sure that the tire is held rigidly in place.—Popular Science Monthly.

Poughkeepsie Course Planned for Wisconsin

Elaborate changes in the program of the Wisconsin varsity crew have been announced by Mike Murphy, new Badger crew coach.

Madison will become a second Poughkeepsie if the coach's plan for a boat-house and course and construction of observation cars by a local railroad materialize.

Chicago's Grid Leader

Pat Kelly, tanky end, will lead Coach Stagg's Chicago Maroons to battle this season and no doubt in fact some of that "fighting Irish" spirit into his teammates. Kelly is 6 feet tall and weighs 186 pounds, furnishing one ray of hope in an otherwise drab setting at the Midway.

Swearing No Cure for Auto Parking Trials

(By E. E. Duffy.)
Whether going or coming or not going at all, the automobile occupies a certain amount of space. Oddly, the motorist frequently experiences the greatest difficulty in finding this space when he wants to park. Somehow or other parking spaces always seem to be filled, or else two curbs words on a signboard compel him to move on.

Sedans are no longer buggies and the space once devoted to the "hitchin' rail" is inadequate. Parking in city and town today is no small problem, and unfortunately little has been done by municipalities to create open-air stopping places for cars. The parking problem is no joke—and one answer to it is found in a new facility, the establishment of paved parking areas.

Build Parking Space.
In Chicago, the Lincoln park board is making an effort to unscramble its traffic situation by constructing two concrete parking spaces. These will be 320 feet long by 150 feet wide, accommodating 300 cars. At Coney Island there is a concrete parking space 1,350 feet long by 705 feet wide, large enough to accommodate more than 5,000 cars.

A fair-sized city in Illinois realized that it was not getting its share of rural business. Farmers were going elsewhere to do their buying. City officials and business men conferred. Shortly a group of old buildings was torn down and a spacious parking

place was provided. Not content with this, the city built a new bridge across a stream which had always been a traffic barrier. Today, probably no city of its size is getting more rural trade than this progressive Illinois community.

The handling of the automobile is a city problem and many municipalities have decided that the provision of parking places is likewise something in which the city government has a deep interest. Vacant city property of low earning capacity might well be turned over to the convenience of the motoring family, which just about includes everyone. In some cases it may be practicable for the city to purchase land for the establishment of parking areas.

Full Utility of Car.
The full utility of the automobile will not have been attained until the motorist can stop within the near neighborhood of his destination. This is something that most motorists are denied at present. The creation of municipally or privately owned parking areas naturally entails some expense which, with the expense of operation and maintenance, justifies low parking fees.

One way of relieving traffic congestion, which harasses city governments more than any other one thing, is to get the cars off the streets. Paved parking areas will do that.

Current Wit and Humor

COWARDS BOTH

Mr. Meeker had crawled under the bed when he heard the burglar. He held his breath and waited. Then, after a long pause, he felt some one trying to crawl in beside him.

"Is that you, Henrietta, dear?" he whispered.

"No," was the answering whisper. "I've just had a look at her. I'm the burglar. Move up!"—Hamilton Spectator.

Pure Slanders

A Hollywood film hero had been extravagant in the way of wives, having acquired five and having been promptly divorced by each and all of them.

To the prospective sixth he made a tender declaration of his love.

"But say," said the girl, cautiously. "I hear your character isn't any better'n it ought to be, honey."

"Pooh!" said the hero; "don't you believe all the yarns you hear about me. They're mostly old wives' tales."

RED HOT

He—Mazie is a red-hot mamma. She—Well, she's nobody's fuel.

An Idealism

Some day we'll get the map all right. With neatly drawn designs. So clear that none will start a night. To change the boundary lines.

Go Easy

"Young man," said her father, "I don't want you to be too attentive to my daughter."

"Why—er—really," stammered the young man, "I had hoped to—er—"

"Exactly, and I'd like you to marry her, but if you're too attentive to her you won't have money enough to do it."

The Whole Barnyard

Mrs. Pester—I see the Heelwads had to give up their apartment. I wonder why.

Her Husband—Keeping domestic animals in it, I reckon. According to the neighbors he's a Jackass, his wife's a cat, his son's a puppy, and his daughter's a bird.

WAY TO SUCCEED

Friend—If you want something from your husband and don't succeed, try, try again.

Wife—I can beat that, my dear—cry, cry again is the way to succeed.

Things Missed

We cannot make bargain with blessing, Or catch them like fishes in nets; But sometimes the things that life misses, Help more than the things that it gets.

What's the Use

Traffic Cop—Hey, you can't make a turn to the right.

Lazy Motorist—Why not?

Traffic Cop—Well, a right turn is wrong here—the left turn is right. If you want to turn right turn left and then—aw, go ahead!

A Receipt Needed

Jean—Have you heard that Donald's lost his memory altogether?

Sandy—Well, well, how unfortunate! And to think I just gave him back the \$5 I borrowed from him last week.

How It Happened

After years away a New Yorker tried to locate an old friend and finally found him far out in the suburbs.

"How did you happen to move away out here?"

"Oh, it was gradual. I moved five blocks before I got away out here."

His Choice

Father—Which would you rather have, a little brother or a little sister?

Little Jakey—If it's all the same to you, papa, I'd rather have a white rabbit with red eyes.

ONE PRESCRIPTION MADE FAMILY DOCTOR FAMOUS

Seldom has any single act been of greater benefit to mankind than that of Dr. Caldwell in 1885, when he wrote the prescription which has carried his fame to the four corners of the earth.

Over and over, Dr. Caldwell wrote the prescription as he found men, women and children suffering from those common symptoms of constipation, such as coated tongue, bad breath, headaches, gas, nausea, biliousness, no energy, lack of appetite, and similar things.

Demand for this prescription grew so fast, because of the pleasant, quick way it relieved such symptoms of constipation, that by 1888 Dr. Caldwell was forced to have it put up ready for use. Today, Dr. Caldwell's Syrup Pepsin, as it is called, is always ready at any drugstore.

AS FIRST AID

Sponge-Rubber Flooring

Flooring made from sponge rubber is to be introduced in England soon. Products already shown there include sponge rubber upholstery and tires. For durability, comfort and hygiene, the new type of flooring is said to be far superior to any other now made from rubber or rubber substitutes.

Between Girls

"Why, you're in mourning, and still you want to go to the ball?"

"Well, one carries sorrow in the heart, not in the feet."

Millions use Red Cross bluing. Large bottle 10c. All good grocers sell it.—Adv.

The matter of installing sound pictures on navy ships is now under consideration.

Los Angeles Boy Needed Help

Ernest Young, 1116 Georgia St., Los Angeles, is a "regular fellow," active in sports, and at the top in his classes at school. To look at him now, you'd think he never had a day's sickness but his mother says: "When Leroy was just a little fellow, we found his stomach and bowels were weak. He kept suffering from constipation. Nothing he ate agreed with him. He was fretful, feverish and puny."

"When we started giving him California Fig Syrup his condition improved quickly. His constipation and biliousness stopped and he has had no more trouble of that kind. I have since used California Fig Syrup with him for colds and other spells. He likes it because it tastes so good and I like it because it helps him so wonderfully!"

California Fig Syrup has been the trusted standby of mothers for over 50 years. Leading physicians recommend it. It is purely vegetable and works with Nature to regulate, tone and strengthen the stomach and bowels of children so they get full nourishment from their food and waste is eliminated in a normal way. Four million bottles used a year shows how mothers depend on it. Always look for the word "California" on the carton to be sure of getting the genuine.

Green Socks Expensive to One New York Ball Player

George Whitted, Durham manager, tells one on John McGraw. McGraw was jumping on his players for shooting craps. He had fined about three the sum of \$100 and then turned to a fourth and asked him if he, too, wasn't shooting craps the night before.

"No, Mac," replied the player, "I wasn't shooting 'em last night, honestly, I wasn't."

Then McGraw, in a furious mood, let his eyes glance upon some green socks the player was wearing.

"Well," said Mac, "it's going to cost you just \$100 for wearing those green socks. The idea of one of my ball players trying to primp up like

Walker Loses Title

Mickey Walker's title as the world's middleweight boxing champion was declared vacated by the National Boxing association at its annual meeting at Chicago.

Robins' Pitcher Loses 11 Pounds in Winning

William Watson Clark, young scamp of the Brooklyn Robins, knows why pitchers weaken in the closing innings of a game, especially during hot weather.

Clark, pitched the Dodgers to a 9-to-6 victory over the St. Louis Cardinals the other day, but was lanky to last out the game. He explained it this way:

"Before the game I got on the scales and weighed 167 pounds. After the game I weighed 156 pounds, a loss of 11 pounds."

Clark, however, draws some satisfaction out of the fact that a big dinner, plenty of water, a good night's rest and a heavy breakfast brought him back to his original weight the following day.

Siam Linked to Berlin

Short wave radiophone communication soon will be established between Berlin and Bangkok, capital of Siam. On a plateau near the Siamese city stands the receiving station, with instruments made in Germany. Satisfactory tests have been made.

Aged Horseless Speeder Useful

Not many years ago horses ran in terror from this horseless carriage. William F. Wolfe, Island, Ind., the driver, went more than 250 miles in this speeder to attend the recent Ohio state fair. It was made in 1880, has six speeds forward and . . . in reverse goes 15 miles on one gallon of gas and has a top speed of 10 miles an hour.

LIVE STOCK

DIP TO DESTROY MANY PARASITES

Important That Task Be Finished Before Winter.

(Prepared by the United States Department of Agriculture.)
For September the Calendar of Live Stock Parasites, issued recently by the United States Department of Agriculture, makes suggestions as follows:

"Now is the time to dip your live stock for lice, sheep ticks, true ticks, and mange. Later it will be too cold to do more than apply relief measures. Do it now while the weather is still warm and save yourself trouble later, as these pests are more troublesome in cold weather. Consult Farmers' Bulletins Nos. 1330-F (sheep parasites), 1493-F (lice, mange, and ticks of horses), 1085-F (hog lice and hog mange), 1017-F (cattle scab), 980-F (ear ticks), 909-F (cattle lice), 798-F (sheep ticks), and 713-F (sheep scab). Clean up lice on poultry. See Farmers' Bulletins Nos. 1337-F and 801-F.

"In the fall farrowing of pigs plan to use the swine-sanitation system as modified for farrowing on pasture in the fall. Consult United States Department of Agriculture Leaflet No. 5-L.

"A mud wallow for pigs provides a breeding ground for worm eggs and helps to load pigs with roundworms and kidney worms. At one packing plant in the South it was found that kidney worms and thorn-headed worms cause an annual loss of \$80,000. The use of a concrete wallow is an aid in keeping down worm infestations, provided it is properly constructed and used. See Farmers' Bulletin No. 1085-F for directions for constructing and using concrete wallows.

"In regions where parasites interfere with sheep raising, breed ewes in time to lamb early, if you have the equipment, and market before the worms share your profits. Early lambs come before the parasites wake up from their winter sleep."

This calendar, compiled by Dr. Maurice C. Hall of the bureau of animal industry, contains similar reminders for each month in the year and a general summary of year-round precautions against parasites. The calendar, which is Miscellaneous Publication 25-M, or any of the departmental publications listed by Doctor Hall, may be obtained free by applying to the United States Department of Agriculture, Washington, D. C.

Red Clover Excellent

Pasture for the Hogs

Red clover makes an excellent pasture for hogs and ranks close to alfalfa as a forage. From the standpoint of the average farmer or hog feeder, it will probably be the most used forage crop particularly because it fits better into almost any system of crop rotation than does alfalfa. However, it will not usually support quite so many head per acre, nor will the forage season be quite so long, but if not pastured too closely and not allowed to go to seed, it will generally produce an abundance of good forage all summer. An acre of clover should furnish ample pasture for from 8 to 10 sows if properly handled. Clover is high in protein and will replace a large part of the tankage or similar feeds, necessary to get maximum growth.

Sheep Tick Infection

Cause of Loss of Lambs

Sheep ticks, *Mulophagus ovinus*, are, strictly speaking, not ticks, but highly modified fleas that have taken up a ticklike existence. The female retains the larvae in the abdomen until ready to pupate, when eight or ten are laid. These immediately attach themselves to hair and pupate. The pupal stage lasts from three to six weeks. While light infestation with sheep ticks produces no visible symptoms, heavy infestations cause loss of flesh and loss of wool. Since infestation of young lambs occurs by ticks that have left recently shorned wool, lambs should be kept a considerable distance from the stored wool. In severe infestation, dipping may be necessary.

Sod Pasture for Pigs

in Rainy Season Best

During the rainy season it would be well to have a sod pasture for the pigs. Here they may roam around on nice days, getting the exercise and sunshine so vital to their growth. They will consume only small amounts of green forage, but this is very helpful in balancing their ration and in supplying the necessary vitamins. How much easier it is to keep the quarters clean if a sod pasture is used during the wet season.

For this purpose bromegrass is perhaps one of the best grasses for forming a sod.

Gluten Feed Value

Recent experiments at the Kansas station indicate that gluten feed has a value per pound, in the steer ration, slightly greater than cottonseed meal. Linseed meal proved to be worth \$12 to \$15 a ton more than either cottonseed meal or gluten feed. However, linseed meal usually sells considerably higher than gluten feed, and so it would seem that more farmers should be feeding gluten feed than actually are to secure the greatest returns from their steers.

International Sunday School Lesson

OCTOBER 20, 1929.

USEFUL WORK A CHRISTIAN DUTY

Scripture Lesson: Gen. 2:15, Exo. 20:9, Neh. 6:3, John 5:17, 9:4, Acts 20:32-35, 2 Thes. 3:6-12, Eph. 4:28.

GOLDEN TEXT: If any will not work, neither let him eat.—Thess. 3:10.

Introduction.

The Bible emphasizes work as well as faith. Man in his biblical original state was assigned to work. This emphasis is not contrary to the nature of man. The Decalog sets apart six days of every week for work. The prophetic element of Old Testament does not ignore the duty and value of work. The apostles and disciples of the New Testament were men of work. Biology and sociology make work a necessity. The needs of man and the interests of man cannot be met without work.

Work and Creation.

"And Jehovah God took the man and put him into the Garden of Eden to dress it and keep it." Gen. 2:15. When man was created, his work was created. No man is born into the world without a task, a work. Hence there can be no substitute for work. The Bible teaches this truth from Genesis to Revelation. No place in the kingdom of God for the idle poor or the idle rich. Adam was given a task even before his fall. The fall did not bring the task. It brought difficulty in performing the task.

Adam was required to dress the ground, to keep the garden. Later he was told: "In the sweat of thy face shalt thou eat bread." What could God have meant other than that work is a law of life? Work is the foundation of contentment and happiness. Even Jesus was subject to this law. "My meat," that is my happiness, my contentment, my purpose and joy, "is to do the will of him that sent me." Work is also essential to all growth and progress. No action and no work means no growth, no progress. Work is the native habitat of man.

Six Days for Work.

"Six days shalt thou labor, and do all thy work." Ex. 20:9. It is often forgotten that the Fourth Commandment is an ordinance of labor as well as an ordinance of rest. Until there is labor there cannot be rest, in any true sense of the word. Six times as many days are assigned to work as to rest. The Decalog condemns the idle man as severely as the Sabbath-breaker.

"A reasonable obedience to the law of labor is necessary to our full enjoyment of this merciful law of rest which limits it. Idle people, with whom every day is a day of leisure and ennui the chief of enemies, cannot know what a Sabbath means. Before they can be in a position to observe the day of repose, they must learn to do a week's work."

"Six days shalt thou labor," but that the labor may not be degradingly and exhaustingly wearisome; that the man may not become a mere machine, "worn out by the dust of its own grinding." Therefore the seventh day is the Sabbath of the Lord thy God; in it thou shalt do no manner of work."—E. W. Farrar.

The Divine Examples of Work.
"But Jesus answered them, My Father worketh even until now, and I work." John 5:17. Jesus had just healed the sick man at the Pool of Bethesda in Jerusalem, and when the Jews persecuted him

because he had worked this blessed miracle on the Sabbath, our Lord made the reply given above, thus angering the Jews because he called God his Father, "making himself equal with God."
"God is not an inert and inactive Deity. He is a working God. He is everywhere present. He is ceaselessly active. He worketh 'in all and through all.' About the activity of the forces of evil there can be no mistake. Evidences of their deadly handiwork are all about us. We are surrounded by broken, ruined, shamed men and women. But the devil is not the only being at work. God is always also at work—and therein lies the world's hope."

"My Father worketh hitherto, and I work." But how? Not with much observation and blare of trumpets, but like the seed which swells beneath the soil, with an increase which no eye can measure when it is doing, but all must admire when it is done. "Why do we not all take this up and add, 'And I also work?' For that is the spirit which the Lord would see in men."

Paul's Example of Industry.
"Ye yourselves know that these hands ministered unto my necessities, and to them that were with me." The wise Jewish custom required that every Jewish lad should be taught a trade, and Paul's was the art, so useful then, of making tents, coarse cloth for the purpose being made in his native Tarsus. That was the business which enabled the apostle to be self supporting, and also, in large part, to support his assistants.

"In all things I gave you an example." Paul's example of industry was no small part in the glorious example he set. "That so laboring ye ought to help the weak." One object of all worthy toil is to be self-supporting and another is to aid those that are less able to work than we are. Toil that has no unselfish aim be- comes a burden rather than ennobles the worker. "And to remember the words of the Lord Jesus, that he himself said, It is more blessed to give than to receive." This priceless quotation is the only addition the New Testament gives to the words of Christ recorded in the four Gospels. Working for wages, the heaping up of money, has a hardening tendency which the Christian will take pains to counteract with generous giving.

As our wealth increases let our generosity grow, on our toil and its reward will be a curse to us. "These hands." "As Paul held them up, they saw a tongue of truth in every seam that marked them. Luke has made no mention

in Acts 19 of Paul's manual labor at Ephesus, but these words are confirmed by 1 Cor. 4:12; written from Ephesus: 'We toil, working with our own hands.'

Earning One's Way.

"Neither did we eat bread for nought at any man's hand." 2nd Thess. 3:8-10. "To eat bread"

is to be maintained, supported by another. Moffett's translation is very graphic: "We did not loaf in your midst, we did not take free meals from any of you." "But in labor and travail, working night and day, that we might not burden any of you." Tent making, using coarse and heavy cloth, was hard work, but it suited Paul's purpose because he could take it up at any time, and work on it at night and in the intervals of his preaching and evangelizing.

"Not because we have not the right." In section VI will be found a reference amplifying this statement that Christian workers have a right to support from those to whom they ministered. "But to make ourselves an example unto you, that ye should imitate us." Paul was charged with diverting to his own use a part, at least, of the funds he collected for the Jerusalem poor. His punctilious refusal of a salary was a sufficient reply to this slander.

"This we commanded you, if any will not work, neither let him eat." "The form of the Greek implies in this case a positive refusal to labor; the man won't work; then it is God's law that he shall starve. A stern, but necessary and merciful rule, the neglect of which makes charity demoralizing. But this law of St. Paul's touches the idle rich as well as the poor; it makes that a discredit which one hears spoken of as if it was a privilege and the mark of a gentleman,—to 'live upon one's means,' to live without service to the community."

The Object of Labor-Benevolence.

"Working with the hands, the thing that is good, that he may have wherewith to give to him that hath not." The ideal of Christianity is service. No man can be called Christian, no matter how much self-control and piety he possesses, if he lacks proper consideration for others. This consideration is not expressed in 'feeling to work' but in 'acting toward.' The life of service is a happy life; it

Two Gils Live On Hot Water and Rice

Due to stomach trouble, Miss A. H. and sister lived on hot water and rice. Now they eat anything and feel fine, they say, since taking Adlerika.

Even the FIRST spoonful of Adlerika relieves gas on the stomach and removes astonishing amounts of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowels, Adlerika will surprise you. CITY DRUG STORE. (Adv.)

is richer in potentialities and actualities of joy; it is sinner, less likely to be veered off on some morbid and disastrous indulgence; it earns the love, gratitude and approbation of others; it is more blessed. "Money making is good only when it is pursued in the love of God and man."

"Swing Into Line" Be a Worker.

"Swing into line with the eternal energy; be a force among forces, a toiler, a producer, a factor, and life will never lose its flavor and flavor, its head or glamour. There is no real taste to bread, nor bliss in sleep, for the idler."

"We are not here to play, to dream, to drift; We have hard work to do, and loads to lift; Shun not the struggle; face it! 'tis God's gift."
