

## WEATHER BUREAU ISSUES SPECIAL FORECAST PREDICTING BIG STORM

Publishers' Press.  
Washington, Oct. 27.—The weather bureau has issued a special forecast predicting a storm near the end of the week. The disturbance is to be accompanied by rain, which will reach the Pacific coast Thursday and extend over the plateau and Rocky mountains Friday. By Monday it will have reached the East.

## BISHOP WARD'S FUNERAL TODAY

BODY WILL BE INTERRED IN GLENWOOD CEMETERY.

## DIED IN TOKIO, JAPAN

Bishop Chandler of Atlanta, Ga., is to Conduct the Exercises From St. Paul's Church.

Special to The Press-News.  
Houston, Oct. 27.—Funeral services over the body of Bishop Ward, who died recently in Tokio, Japan, will be held at 9 o'clock tomorrow morning from St. Paul's Methodist church. Bishop Chandler of Atlanta, will conduct services and interment will be in Glenwood cemetery. Bishop Ward's body arrived here today and it will be in state in the family residence until the funeral.

### MARKETS.

#### Cotton.

Publishers' Press.  
New York, Oct. 27.—Cotton opened steady and six points lower to five higher. Liverpool did not respond fully to the advances here yesterday. New Orleans reported that a big spot firm there suspended today, owing to the nervousness of the market. Only sellers here seemed to be realizing. During the last hour the market was irregular.

Receipts of cotton at ports for the day were 72,000 bales.  
Spot, 14.65. Liverpool 7.58 d.

#### Stocks.

Publishers' Press.  
New York, Oct. 27.—An improvement was noted in the stock market today. Many stocks ended the day with gains of one and two points. The largest advances were in Union Pacific, amalgamated copper and Reading, easier money conditions being responsible for the improvement. Pennsylvania was strong all day, passing 148. Hawley securities were strong but not active.

A heavy tone prevailed this afternoon and the market closed active and strong.  
Governments unchanged, others strong. Call, four.

### FANCY SHOT.

W. P. Lane of Fort Worth, Candidate for State Office, Fires at Man.

Special to The Press-News.  
Fort Worth, Oct. 27.—W. P. Lane, candidate for state comptroller, and a prohibition leader both in the state and county, shot at a stranger in front of his store, on Houston and Fourteenth streets, at 2 o'clock Wednesday afternoon.

It is claimed that Mr. Lane shot at the man following an altercation between the stranger and Mr. Lane's younger brother, Riley. The man was not hit.  
Mr. Lane surrendered to the officers and gave bond for his appearance in court.

### Flood.

Publishers' Press.  
Mexico City, Oct. 27.—A half million dollars worth of lumber was swept away today as a result of the floods. The Campeche and Tabasco rivers are on a big rise, and it is feared that there will be a heavy loss of lives.

## NO MORE BLUFFING SCRAP IS CERTAIN

Jeffries in Fine Condition—Operation On Nose Proves Successful—He is Ready for the Ring.

### KILLED.

Engineer R. E. Smith Loses Life in Freight Wreck.

Special to The Press-News.  
Amarillo, Oct. 27.—R. E. Smith, a Santa Fe engineer, was killed in a wreck today near Winoka, Okla. He is survived by his wife and two children, living here. The freight train ran into a defective switch.

## RUBBER CO. WILL BUILD

COST OF ESTABLISHMENT WILL BE APPROXIMATELY \$250,000.

## USE TEXAS PRODUCTS

Otto Kohler, Brewer of San Antonio, Back of Movement—Marathon the Location.

Special to The Press-News.  
San Antonio, Oct. 27.—Otto Kohler, a local brewery magnate, announced today that the Texas Rubber Co., of which he is president, will establish a plant at Marathon, Texas, costing \$250,000.

Rubber goods will be manufactured and Texas products will be used as far as possible.

### To Adjourn.

Publishers' Press.  
London, Oct. 27.—It was announced today that parliament would adjourn from November 5 to 25.

### Negroes Lynched.

Publishers' Press.  
Vicksburg, Miss., Oct. 27.—Enraged by awful deed committed by negroes, a mob at Floyd, La., stormed the jail and took Joe Gifford and Lex Hill and lynched them.

The two negroes were arrested a few days ago for murder.

## This Woman Makes Flight an Aeroplane

Publishers' Press.  
College Park, Md., Oct. 27.—In a four-minute flight here today, Wilbur Wright had as a passenger Mrs. R. H. Vandeman, wife of Captain Vandeman. She is the first woman to ride in an aeroplane in America.

### Gales.

Publishers' Press.  
New York, Oct. 27.—Arriving ships are reporting very heavy gales raging on the Atlantic ocean. The course taken by them is seemingly towards the southern part of the United States.

## NEGRO JOHNSON ON HIS WAY TO MEET JEFFRIES

FINAL DETAILS FOR FIGHT ARE SCHEDULED TO BE ARRANGED IN NEW YORK TODAY.

## NO MORE BLUFFING SCRAP IS CERTAIN

Jeffries in Fine Condition—Operation On Nose Proves Successful—He is Ready for the Ring.

### Publishers' Press.

New York, Oct. 27.—Bluffing has about run its limit, and it now seems certain that the long talked of Johnson-Jeffries bout is to be a reality, and that the right will take place within a very short while.

Johnson is due to reach New York at 9 o'clock Thursday morning for the purpose of meeting Jeffries and making final arrangements for the exhibition. The operation on Jeff's nose was successful, and he is in trim for the ring.

### TRAGEDY.

Mr. and Mrs. Park Latimer Killed at Prescott, Ariz.

Special to The Press-News.  
Terrell, Oct. 27.—Word was received here tonight from Prescott, Ariz., announcing a double tragedy resulting in the death of Park Latimer and his wife. No details were obtained.

Latimer was reared here. He was in the Philippine war at one time and served this precinct as constable. His wife formerly lived in Cincinnati.

### SERIOUS.

W. C. Parker Falls and Receives a Painful Wound.

Wednesday afternoon W. C. Parker, while fixing his buggy harness on the Beaugard bridge, fell, striking the mack of his head against the sharp edge of a plank, receiving serious injuries.

A physician was summoned and Mr. Parker was taken to his home.

### No. 2 for Taft.

Publishers' Press.  
Baltimore, Oct. 27.—While nothing has been said about President Taft serving a second term, still there have been several prominent men who have been thinking that for some time, and today Arthur Vorys, Ohio manager for Taft's campaign, predicted that he would serve a second term, and has good reasons for saying so.

## YOKUM ADVOCATES NEW RELATIONS BETWEEN THE RAILROADS AND FARMERS

Dallas, Oct. 27.—B. F. Yokum, head of the Rock Island-Frisco system of railroads, made a proposition to Texas farmers today in a statement. He asks for a practical co-operation between the Farmers' Unions and the railroads to facilitate in the marketing of crops. An outline of his plan is to establish warehouses at numerous points where farmers can store their cotton and grain. Banks will be asked to make cash advances to the

## PRESIDENT TAFT FOLLOWING IN TEDDY'S STEPS

ANNOUNCES THAT UPON RETURN TO WASHINGTON HE WILL ENTERTAIN ALL GOVERNORS.

## PRaises Y. M. C. A. IN MEMPHIS ADDRESS

An Institution That Every City Should Encourage—Leaves in Afternoon for Helena, Ark.

### Publishers' Press.

Memphis, Tenn., Oct. 27.—President Taft is to follow Roosevelt's example by having the governors of all states as his guests at the White House upon his return to Washington. This feature was announced today, following the arrival of the president at 10 o'clock.

After a motor ride over the city, the president visiting all of the main places of interest, he dedicated the new Y. M. C. A. building and made a speech in the auditorium. Taft declared that the Y. M. C. A. is one of the greatest organizations of the kind in the world and is something that every city, no matter how small, should have.

Early in the afternoon President Taft continued his voyage down the Mississippi, sailing for Helena, Ark.

### NO CURTAILMENT.

Cotton Mills Will Keep On Unless Outsiders Take the Initiative.

Fall River, Oct. 27.—Although the Arkwright Club has recommended that the cotton goods manufacturers curtail heavily, the Fall River manufacturers will not sign any binding agreement. The agents here say that if other mills should curtail first and show that they really intended to make a determined effort to force the price of cotton down, the mills here might after April 1 shut down for a longer or shorter period.

This really means nothing except that the manufacturers in Fall River do not care to come out openly and state their feelings, and perhaps be accused of preventing a theoretically wise measure of relief.

All the trading that is taking place in this market at present is based on the continuous running of the plants. The product itself is being sold ahead very rapidly. Those mills which had little cotton are buying to cover contracts running months ahead, while those which had a partial supply are buying beyond April.

## ROOSEVELT ENTERS THE JUNGLES IN QUEST OF THE FAMOUS BINGO

Publishers' Press.  
London, British East Africa, Oct. 27.—Teddy Roosevelt, the strenuous, has departed into the jungles of Eldama ravine, where he will be lost to the civilized world for several days.  
This time he is in quest of the bongo, a rare species of the antelope, to be found only in Africa. Just before leaving, Roosevelt announced that he expects to remain on this expedition at least a month.

## Weather.

Publishers' Press.  
Washington, Oct. 27.—Weather forecast for Eastern Texas, partly cloudy, Western Texas generally fair, and warmer except in southeast.

### Dying.

Publishers' Press.  
Washington, Oct. 27.—General John Coppinger, U. S. A., retired, and son-in-law of the late James G. Blaine, is dying.

### Sails for America.

Publishers' Press.  
Southampton, Oct. 27.—Orville Wright, who has been in Europe for several months, making aeroplane flights, sailed for America today.

## TWO KILLINGS DALLAS RECORD

F. W. MESHAW SHOT BY A. T. STEWART, TELEGRAPH MAN.

## NO REASON ASSIGNED

Flagman at Fair Grounds Slabs Divorced Wife and Then Cut Own Throat With Razor.

### Special to The Press-News.

Dallas, Oct. 27.—F. W. Meshaw, son of J. T. Meshaw, state penitentiary agent, was shot and killed here this afternoon by A. T. Stewart, a telegraph operator.  
Both men lived at Carleton. Stewart is under arrest, but refused to talk, and his reason for killing Meshaw was not explained tonight.

### Kills Divorced Wife.

Special to The Press-News.  
Dallas, Oct. 27.—W. M. Hickery, a flagman at the state fair grounds, stabbed and seriously wounded his divorced wife late this afternoon in Cochrane street, and then committed suicide by cutting his throat. The woman will recover.  
The stabbing followed a meeting and a quarrel.

## Women of Utah Want Polygmy

Publishers' Press.  
Frisco, Oct. 27.—"Women of Utah want polygamy, and so long as they have suffrage, no laws in that state will be passed preventing polygamy," stated Bishop Spaulding of Utah, addressing an Episcopal convocation here.

### Fire at Eola.

Eola, Tex., Oct. 27.—Tuesday night fire broke out in the building occupied by the Chas. Stevens dry goods and grocery store, in the main part of the town. The entire store and stock of goods were burned. The amount of the loss is estimated at about \$4500, with \$2500 insurance.

## NEW OWNERS OF SUNFLOWER LINE

COL. DAVIS OF MILES, SAYS SURPRISE WILL BE SPRUNG.

## PEOPLE ALL GUESSING

He is of Opinion That Entirely New System in This Part of State is In on the Deal.

During the last week or two there has been much speculation relative to the new owners of the Sunflower route. The secrecy of this purchase is closely kept and any information about it is very hard to get. Many prominent men are giving some opinions on the subject. A statement about the purchase of that road was given Wednesday by Col. Sam Davis, president of the Runnels County National Bank, of Miles, and also a man who, as well as can be learned, is connected with a committee that had something to do with the sale.

"I know nothing definite about the matter and cannot give you any positive answer about it," he said, "but my opinions differ from many other people's. I do not believe the Santa Fe, Texas & Pacific, Frisco or Moran Jones has bought that road, but instead I believe another road that no one suspects has purchased it, and are Eastern men, as before stated.  
"Mr. oye, who is connected with the road, told me that the news of the purchase will be given out in ample time and the purchase will greatly benefit Miles."  
Col. Davis was very modest in his talk and seemed to be very careful about what he was saying. He also stated that it will not likely be so very long till the news will be given out.

"This problem has attracted more attention than any other railroad business in the state and there are all kinds of means being used to learn who has purchased the road," he continued. "I believe the new owners are going to make a big change in the plans and greatly benefit Miles, as well as the rest of the country."  
Opinions after opinions are being given on this subject, but still nothing definite can be learned. Many people are prone to believe the Frisco has purchased it. There are others who think the T. & P. has got hold of it.

Col. Davis is not only a man who talks on railroads, but he likes to talk about Miles and its future.

"We are going to have a fine waterworks system if we can possibly get one," he said. "There is to be an election on November 15 to issue \$20,000 worth of bonds in order to have the waterworks. That is something that Miles is greatly in need of and I believe we will get it, as many of the people are very much in favor of the idea. Miles is a coming town and is rapidly growing each day, and all we need is a waterworks system."  
"Today when I left, at least 1000 bales of cotton were on the streets. It came from Robert Lee and many other surrounding towns. We are in the position to have a great cotton market and I firmly believe we are going to have it. The land that surrounds Miles is the most fertile soil that can be found in Texas, and it yields a great amount of cotton."

Entered at the postoffice at San Angelo as second class mailmatter.

THURSDAY MORNING, OCT. 28, 1909

W. B. PHILLIPS.

Now the Hon. William B. Phillips has manifested an interest in the West Texas Development Congress that meets in this city on December 6th.

Do the people of San Angelo, can the people of San Angelo, know what this means?

William B. Phillips is the greatest metallurgist in the South. He is a man with a soul so great that not a taint of cravenness is to be found in it. He is a man with a mind so lofty that his thoughts are as pure as the flowers that bloom where snow held eternal carnival.

It was William B. Phillips who discovered the vast cinnabar deposits of Texas and who has laid the foundations of what in time will unquestionably prove one of Texas' greatest assets. It was William B. Phillips whose matchless brain delved into the possibilities of the iron fields of Texas and whose report caused the attention of Charles M. Schwab, the steel genius, to invest his millions in this state.

Let The Press-News assure the people of West Texas that William B. Phillips is cast in no ordinary mould. He lends his name to no ordinary undertaking. He appreciates the vast possibilities of this important movement concentrated in the West Texas Development Congress and his interest is a warrant and an earnest of the potential possibilities that lie within our keeping.

If feasting, rise; if sleeping, wake and go forth and preach the gospel of the West Texas Congress to those who are now living in darkness and who are hungering for the truth to guide their footsteps. No movement pregnant with a vaster degree of greatness for the upbuilding of the material resources of West Texas was ever born. It can be crowned with a success worthy of the motives and in keeping with the inspiration if we but work shoulder to shoulder, heart to heart and hand in hand.

OUR GUARANTEE.

Knowing the good judgment of the directory of the Business Club, The Press-News has no hesitancy in endorsing in advance the plan the gentlemen composing the directory agree upon to raise needed funds to sustain and maintain the Business Club.

Both these propositions are of the greatest importance. A poor plan means indifferent success. A good plan without the necessary support means failure.

In the bright lexicon of San Angelo there is no such word as fail. There is not even such a word as faltering. The people of this city ever look upward and look outward. The greatness of San Angelo lies not in her natural advantages, even though the Lord was most generous in this regard, but in the splendor of her achievements, the magnificence of her ambitions and the loftiness of her hopes.

When the appointed time comes to

pledge in a substantial manner the support of the Business Club, The Press-News urges upon the people of San Angelo not to be mealy-mouthed in their subscriptions, but rather let the amounts they subscribe reflect their ambitions and their aims.

Let's show the world that San Angelo is a city of lifters, not a city of those who lean. We are certain of this in our own mind. But the world is yet to be convinced, for the world is ever doubtful. The best way to show this truth is by our works.

Onward is our battle cry. Upward is our shibboleth. When the Business Club sends forth the details of its needs, a united front, a liberal support, a demonstration of our faith by our works, will be in keeping with our slogans.

Just remember the W. T. D. C. and that these magic letters stand for the West Texas Development congress.

Anyway there can be no doubt that the doctrine of free raw material makes the producers feel salted on the raw spots.

Up to the last news hot from the wires the soul soothing chapel at Fort Sam Houston and the replica of the Alamo presented by the News to the Dallas fair, are neck and neck as drawing cards.

The state of Tobacco in Mexico has suffered a loss of millions of dollars. As strange as it may seem this loss was the result of water and not of fire. What's in a name, anyhow?

It isn't so much what we do as it is why we do a thing. Keep your record straight. Always remember the shots that count are the shots that hit. Watch us grow.

The Terrell election law is to be tested in the United States court. Judge C. K. Bell is the lawyer who is fighting this law. Wonder if it is pique or prize money that is inducing him to make this scrap?

Doubtless President Taft has enjoyed his trip up the mighty Mississippi more than Col. Bryan, the pampered pride of the Chautauqua circle and the most persistent promoter of professional paramount issues the world has ever known, enjoyed his trips up Salt river.

Plant hogs and your crop will be prospering. Were there a million hogs in West Texas we would today have packing houses with pay rolls a mile long in San Angelo. The hog is the thing that makes the mystic letters "PHP" get on railroad waybills. Pork is a standard article of diet, even though it has spilt hoofs. Plant hogs.

While you reflect over the empire builders, please pause long enough to give a native Texan his dues. B. F. Yorkum, who spoke at Dallas Wednesday, is as much a hero as Napoleon. He has conquered empires, not by shedding the blood of his fellow men, but by making it possible for his fellow men to realize on their efforts.

Do you realize what the coming of the Orient means to San Angelo? We are now linked with hoops of steel weighing 70 pounds to the yard with the very heart of the world of commerce. We have cut down the distance between San Angelo and the Eastern markets by the hours. It is up to us to pay the game according to the rule of the game.

Quannah Parker made a speech in Dallas. Quannah Parker is an Indian chief with several wives. His mother was a pale face; his father was an Indian brave. Quannah is the link that binds the today with the yesterday. He is the Hugh Nugent Fitzgerald of the redmen. He is pungent and he never knows when he is whipped. The redman is up against the real, real thing when the wheel of fate keeps stopping on the white.

Twenty-five years ago one could drive between San Angelo and Abilene without seeing during the course of the journey as many houses as are today to be found on the shortest residence street in this city. Twenty-five years from now there will be more smokestacks in San Angelo than there are today houses in this city. Buck the line hard. It's the fellow who produces, not the fellow who plays the parasite who counts in the great game of life.

The esteemed Fort Worth Record suggests that a spirit of magnanimity ought to induce President Taft to appoint a democrat to succeed Justice Peckham on the supreme court bench. Has it never occurred to the Record that the best way for the Democrats to succeed in filling the supreme court with democrats would be for the party to quit worshipping at the shrine of false gods and cease paying its homage to saints in the party who smell

of fresh paint. Unto the victors belong the spoils. Until the democrats can win with democracy, let her rip, so far as we are concerned.

When the reporter goes to work on the Atchison Globe he receives from E. W. Howe a list of instructions on English. The following are extracts: There is no such word as burglarize. Do not use difficulty for fight of quarrel. In accounts of death and funeral, refer to the body, not to the remains or the corpse. Every person is supposed to be mourned by a host of friends and a large circle of relatives, and to have been good and prominent, so it is unnecessary to say so. Say a person died or was married. Do not say he passed away, or that he was joined in the holy bonds of matrimony. There is nothing immodest in calling a marriage a marriage. Prominent is so overused that it would be a good rule to eliminate it. An annuity of \$100, not an annuity of \$100 per year. Neither a funeral nor a wedding occurs; it takes place. Woman is better than lady; the latter has been overworked. Do not say widow woman; when you say widow, the woman is implied. It looks like an attempt to make a weak story strong by saying it is one of the most horrible crimes in years, or that the party was one of the most enjoyable of the winter season. Use as few adjectives as possible. Too many lose force. Study the following expressions where unnecessary words are used, and look out for others: All round for around; in the city of Chicago for Chicago; first began for began; nobody else for nobody; entirely through for through; struck by an approaching car for struck by a car; next Friday for Friday; totally destroyed for destroyed, etc.

Pave Chadbourne street.

Ed C. Gaines, member of the legislature from Comanche county, has been found guilty by a jury of his peers and his punishment fixed at confinement in the penitentiary for three years, as a result of the unfortunate and deplorable killing of J. W. Resse in Comanche county some eighteen months ago. Gaines is a rare mixture. He combines the moods of the Indian with the culture of the Caucasian. Personally a man of strong feeling, he is also a man of strong personality. His friends love him, and one need but know him a brief while before the cause of this affection can be fully understood. Like all men of fixed convictions, Gaines has his enemies. The Press-News has often differed with Mr. Gaines in his politics and has often doubted the wisdom of his actions. But the Press-News loves a man who can come up to the lick log square. The Press-News loves a man who lets his position on all subjects be known. The Press-News defers to no one in its loyalty to the issue that Gaines fought with such bitterness as to mark his life with a tragedy that no one regrets more than does Gaines. But for every fault the game, square fighting little man from Comanche has, he also has a virtue just as big. When we judge a man we must strike a balance. Gaines can afford to have a balance struck any time. The tragedy in which he was involved was deplorable. May God in His infinite mercy temper the winds that decide the fate of Gaines. We can truly say that with all his faults we love him still. With all the clouds that have surrounded him, he still has ever kept the glow of the sunshine about him.

METEORITE.

Fiery Ball of Something Hits a House and Wakes Up Storrs, Conn.

Storrs, Conn., Oct. 27.—What is believed to have been a meteorite awakened every one in this village at 1 o'clock. There was a terrific crash. Windows were smashed and clocks stopped in several buildings.

The telephone pole in front of the home of F. M. Chadwick was splintered in fine pieces and a large hole was made in the ground. A piece of the meteorite struck a large elm, splintering the bark of the tree. The home of F. M. Chadwick was struck, boards were torn off the outside, windows were broken and holes made through the ceilings and floors inside.

Mr. Chadwick said that when the report came he and his family were stunned. The house seemed to rock and they were thrown on the floor. As soon as they recovered they got up, but found no evidence of fire. H. V. Beebe, who lives opposite, said that the shock was terrific.

Chief Clerk F. C. Gunther and Frank McLean, the football coach of Storrs College, saw the meteorite. Mr. Gunther heard a rushing sound and the rooms were lit up with a red light. There was a heavy rain, but no lightning or thunder. The ball of fire came from the northeast.

McLean, who rooms in one of the college buildings, had arisen to close

THIEF.

Jeweler Locks the Door on a Dishonest Clerk and Calls the Police.

Philadelphia, Oct. 27.—Caught in the act of selling jewelry which he had stolen, Morton J. Levy, 25 years old, of 2518 North Thirty-first street, was enticed today into a large safe which stood in the rear of the store where he worked, and there imprisoned until a policeman arrived.

Levy was a stock clerk for the jewelry firm of Ritter, Kahn & Co., at

1014 Arch street. For some time jewelry has been missed. Another employee saw Levy selling jewelry to boys.

When Levy came upstairs Max Kahn, one of the members of the firm, directed him to do certain things about the store. He asked the young man in a matter of fact way to enter a large safe in the back where goods are stored. As the request was not unusual, Levy walked in and Mr. Kahn shut the door.

Levy admitted stealing jewelry for the last six months, saying that his salary was insufficient.

## Kodol For Dyspepsia

Will Relieve You Almost Instantly.

Kodol supplies the same digestive juices that are found in a healthy stomach. Being a liquid, it starts digestion at once.

Kodol not only digests your food, but helps you enjoy every mouthful you eat.

You need a sufficient amount of good, wholesome food to maintain strength and health.

But, this food must be digested thoroughly, otherwise the pains of indigestion and dyspepsia are the result.

When your stomach cannot do its work properly, take something to help your stomach. Kodol is the only thing that will give the stomach complete rest.

Why? Because Kodol does the same work as a strong stomach, and does it in a natural way.

So, don't neglect your stomach. Don't become a chronic dyspeptic. Keep your stomach healthy and strong by taking a little Kodol. You don't have to take Kodol all the time. You only take it when you need it.

Kodol is perfectly harmless.

### Our Guarantee

Go to your druggist today and get a dollar bottle. Then after you have used the entire contents of the bottle if you can honestly say that it has not done you any good, return the bottle to the druggist and he will refund your money without question or delay. We will then pay the druggist. Don't hesitate, all druggists know that our guarantee is good. This offer applies to the large bottle only and to but one in a family. The large bottle contains 4 times as much as the fifty cent bottle.

Kodol is prepared at the laboratories of E. C. DeWitt & Co., Chicago.

### PROSPEROUS.

Col. Suggs Says People of Concho Country Are Well Off.

Col. J. D. Suggs, the well known cattle king, has returned from a trip to the Osage section of Oklahoma, where he went on business.

"Until one gets away from the Concho country he cannot realize how well off the people here are," says Col. Suggs. "Up in Oklahoma conditions are so tense that they cannot be compared to conditions here. In fact, a just and fair comparison would show that prosperity is rampant here and that want and woe are staring the people of Oklahoma in the face. No doubt about it, the people up yonder, generally speaking, are in a hard fix, and San Angelo has nothing to be lost by inviting comparison with any other section at this time."

### Real Estate Transfers.

Paul Abstract & Title Company's report of real estate transfers recorded October 27:

M. C. Ragsdale to C. A. Robinson, \$700. Conveys lots 1, 2 and 3, in block 181, Angelo Heights.

Clarence R. Webb to W. C. Urbach, \$450. Conveys lot 13 and E. 1-2 of lot 14 in block 18, Park Heights addition.

R. E. Ewing et ux to Harry Jones, \$250. Conveys lots 11 and 12, in block 127, Angelo Heights.

Henry James to D. E. Cochran, \$1000. Conveys lots 1, 5, 6, 7, 8, 9, 10, 11 and 12, in block 65, Angelo Heights.

Earl D. Herberman to Jim Castleberry, \$650. Conveys lot 1 in block 77, Miles addition.

L. C. Coquat et al to S. B. Ratliff, \$300. Conveys lot 6 of Neeley's subdivision of block 48, Ft. Concho addition.

Walter S. Macdonald to R. W. Hopkins, \$2000. Conveys 15 41-100 acres out of survey 326, Geo. Gagelstein.

### SWIFT ENOUGH.

Our Blrrest Battleship Easily Exceeds 21 Knots, Her Contract Rate.

Rockland, Me., Oct. 27.—The battleship Delaware, the largest American fighting craft ever constructed, easily exceeded her contract requirement of 21 knots an hour in her final standardization tests off Owl's Head today. Her engines pushed the mass of steel along at an average speed of 21.44 knots an hour for five runs over the measured course. Once she covered a mile at the rate of 21.98 knots, but this speed is subject to tidal corrections.

The engines developed in excess of 30,000 horse-power. There were three runs at the rate of 19 knots, three at 20.50 knots and five at maximum speed, during which the big boat established a world's record for her class.

As soon as the standardization runs were completed the battleship put to sea for her four hour endurance run. Following this she will have a series of fuel and water tests, during which oil will be burned under the boilers a portion of the time. She will have two twenty-four hour runs, the first at a speed of 19 knots an hour and the second at 12 knots speed.

### SAME DAY.

Middletown, N. Y., Oct. 27.—There is a strange coincidence in the deaths of Frank Scherer and George M. Casey, of Central Valley. They were each 30 years of age and intimate friends. The two were talking together on Tuesday and Scherer said that he wasn't feeling well and was afraid he was going to die. To cheer him up Mr. Casey made light of his illness and told him that he would live after he (Casey) was dead.

The next day Mr. Casey was taken ill and sent word to his friend that he was very sick and would probably never see him again. Mr. Scherer had already taken to his bed when he received the message. Both men died within a few hours of each other. Scherer died of pulmonary trouble and Casey of paralysis.

### TURNED.

Italy Has Lost More People This Year Than She Regained in 1908.

Rome, Oct. 27.—During the first nine months of 1908 some 90,000 Italians emigrated to America and 220,000 returned thence. During the first nine months of this year the emigrants numbered 250,000 and the repatriations were 84,000.

The emigration bureau concludes from these figures that the laws of the United States to check immigration are useless and that the crisis in America is over, as the emigrants are finding work.

## COTTON INJURED BY COOL NIGHTS

TOP CROP WILL AMOUNT TO PRACTICALLY NOTHING.

## AVERAGE IS ONLY FAIR

But at That West Texas Will Have Much Better Yield Than Other Sections of State

"The cool nights have just about put a kibosh on the top crop of cotton in this section and the top yield will amount to almost nil," says Col. W. C. Penn, the veteran cotton buyer, in commenting on conditions.

"While the yield out this way hasn't broken any records for bigness, at the same time, even without any top cotton crop I believe that the Concho country will average much above the general yield in Texas this year."

### COMBINING.

These Near Mount Holly Now Plan to Eliminate the Middlemen.

Mount Holly, N. J., Oct. 27.—The farmers of this section of the state have taken preliminary steps toward the formation of a combination against the middlemen with the ultimate object of removing them from the field. A farmers' exchange will be formed which will exercise the functions heretofore performed by the commission men, thus getting the products of the farms to the market at a much reduced cost to the original producer.

The exchange will also purchase seeds and dispose of them at cost to the farmers belonging to the combination. The success of similar movements at Freehold, in this state, and in Virginia, has appealed to the Mount Holly men, who are subscribing enthusiastically to the stock.

## Five-Year Men

The Southwest needs more people. More people will make better home markets, better and more substantial land values and help to provide all the conveniences of life for town and country.

Have you lived five years in the Southwest?

If so, do you care enough about promoting its prosperity to write five letters describing your success—telling of the battles you have fought and won? Address four to your friends in the North and East and one to JOHN SEBASTIAN, Passenger Traffic Manager, Rock Island-Frisco Lines, La Salle Station, Chicago, or Frisco Building, St. Louis. Do it to-day. Do it now.

The Rock Island-Frisco Lines pay cash for printing this communication to you.

The Rock Island-Frisco Lines expend thousands of dollars every year to acquaint thrifty producers in the congested sections of the United States with the advantages of the great Southwest.

You can help in this work. You can share in its benefits.

Your letter will be read by thousands. The story of your progress and success is of vital human interest. It will inform and convince.

Write briefly—

Why you located Southwest and where.

What the climate is like, the crops you raise and the present prices of land.

Tell what you have gained in comfort and security.

Tell what it has done for your children.

Tell what your neighbors are like.

Describe the character of schools, churches and roads.

Three hundred words is enough. Write the letters to-day.

## HERE'S A BOOST FOR NEW TOWN

L. L. FARR HAS GREAT AND ABID-  
ING FAITH IN MERTZON.

Song of the Hammer and Saw Makes  
Sweet Music to the Accompani-  
ment of General Hustle.

"There's magic in the name and the  
essence to greatness is to be found in  
the nomenclature, for verily I say unto  
you that Mertzon is destined to bloss-  
som like the rose of poetry and to  
grow strong and more sturdy with each  
passing year like the mighty oak," and  
thus does, or doth, L. L. Farr enter  
on the sweetly solemn thoughts of an  
ever increasing multitude.

"Of course I am for San Angelo, for  
San Angelo first and last and all the  
time, but in my love of this great city  
with its immense destiny I am not for-  
getful of the fact that it and about  
San Angelo will in time be found  
hustling centers of enterprise from  
which will radiate like spokes in the  
wagon wheel a trade that will not only  
sustain each of us, but will also  
cause them to wax rich and profit  
greatly.

"Two years ago Mertzon was an idle  
dream of a great mind. Today it is a  
reality of the palpating variety, and  
it has a future as rosy as the cheeks  
of the fairest of our fair women and as  
bright as the noonday sun of an au-  
tumn day in the Concho country.

"Mertzon is not taking on that  
growth which is concomitant with the  
mushroom, but it is smacking strides  
like the giant who wore boots that en-  
abled him to measure seven leagues  
with each step. The sound of the ham-  
mer is ever to be heard in Mertzon.  
The buzz of the saw plays the accom-  
paniment to the song of the greatness  
of that place. The hum of industry,  
the purring sounds of sweet content  
and the soothing music of man's mas-  
tery over the earth are all to be found  
in and about Mertzon.

"And it should be remembered that  
Mertzon is hard by the place of La-  
fayette Tankersley, on which is to be  
found the wonderful well of unlimited  
capacity, the waters of which are suf-  
ficient to irrigate almost numberless  
acres. Mertzon, too, is hard by the  
bubbling message of promise to the  
people of San Angelo at the head of  
Spring creek. With a wide-awake,  
hustling people, with a climate as sa-  
lubrious as can be found anywhere on  
earth, with perfect drainage, the pure-  
st and best of water in the largest  
quantities and with no pats to bother  
about and a future so bright as to in-  
spire it—well, why shouldn't Mertzon  
grow and wax strong and people with  
great rapidity."

### NECROLOGICAL.

Mrs. E. S. Cook.

Mrs. E. S. Cook, aged 38 years, died  
Wednesday morning at 6:30 o'clock.  
The body will be shipped over the  
Santa Fe Thursday afternoon for Dal-  
las, where funeral services will be  
held Saturday. Mrs. Cook came to  
West Texas about a year ago for her  
health. She had resided in Dallas for  
seven years and was a great church  
worker, having organized the primary  
class in the First Baptist church of  
Oak Cliff. She is survived by her  
husband and one child.

### ELIGIBLE.

John F. Grant, Unmarried, Here for  
Few Days.

John F. Grant of Galveston, who  
belongs to the wealthy class and who  
made a big part of his money here  
in San Angelo, arrived in this city  
Wednesday from his home, on the Pi-  
rate Isle, for the purpose of cleaning  
up some details incidental with the  
sale of his stock here to the other  
lumber companies.

"San Angelo is the fastest growing  
city in Texas," declares Mr. Grant,  
"and one ought to live here to see  
what is going on all the time. Now if  
San Angelo had the beach, the sea-  
wall boulevard, the Garden Verien  
and—well, other things besides, I  
think I should be tempted to move  
out here for keeps."

Mr. Grant is a bachelor, intensely  
eligible, and this statement may fur-  
nish the inkling for what he meant  
by the "other things besides." How-  
ever, Mr. Grant has been an eligible  
bachelor for about thirty years.

Mrs. W. F. Bowling.

Mrs. Willie P. Bowling died Wed-  
nesday at the age of 58 years. She is  
survived by her husband and two  
daughters, Misses Flake and Willie  
Bowling. The body will be shipped  
to Oxford, Ala., for burial by the An-  
gelo Furniture & Undertaking Co.

You are Carrying

### Kick.

Tom Savell, who probably travels  
the roads of West Texas more than  
any other man in San Angelo, says  
the roads are in a very bad condition  
and need to be worked on.

"In some places in Coke county it  
is almost impossible to run an auto,  
and there are some places in Tom  
Green county equally as bad," he  
states. "While it is to my interest to  
have good roads to travel over, still I  
think the county should have good  
roads anyway. The automobile is the  
fastest means of transportation that  
we have in many parts of West Texas,  
and I say the roads should be kept in  
proper shape so as to not ruin a ma-  
chine to run over them and make the  
time that is required."

### Handout.

During the next few days Kilgore,  
Haydon & Hollifield will serve hot  
biscuits and coffee that will be cooked  
on a Majestic range. The firm invites

# Let's Go Fishing!

The weather is just right and the water is fine. Fishing for fine Black Bass, Channel Cat and Crappie is fine fun.

We are going to have a nice crowd accompany us

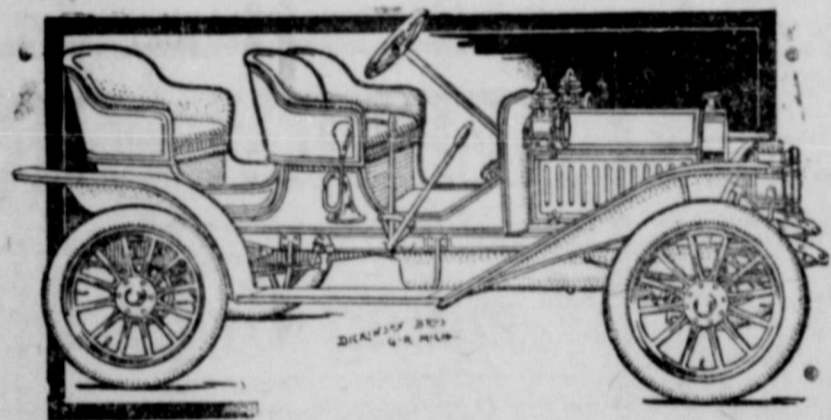

## To Mertzon

leaving San Angelo about 3 p. m. on Thursday, the 28th of October, and return by noon on the 29th. It takes about two hours for the run.

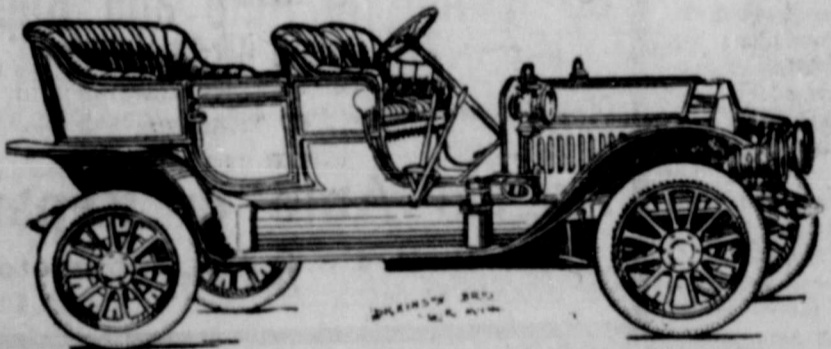

Spring Creek, on which Mertzon is located, is the finest water in Texas, and there are more fish in it than "Carter had oats." We will fish in the evening and early morning, which is the best time.

Get your fishing tackle ready and go with us. Hotel accommodations are ample for as many as twenty, so get your name in early, or we can not take you. We must know how many are going so as to provide auto and hotel accommodations. We must know how many are going not later than noon on Thursday the 28th.

We are going for two purposes—one to have some pleasure, and the other to sell Mertzon property. Property there is now being resold by those who bought from the Townsite Company, and in every instance as much as 50 per cent to 200 per cent profit is being made.

We will sell it to you and for you at a profit, as we have inquiries every day. Mertzon is the prettiest place in Western Texas. Don't fail to see it while you have a chance.

The Tankersley well, which flows nearly 6,000,000 gallons of water a day, is well worth a trip to see. We are preparing for several ladies to go; some have already put in their names.

## PECULIAR TANGLE IN SCHOOL LANDS

CASE INVOLVES MATTER OF INTEREST TO MANY COUNTIES.

FOR SUBMISSION NOV. 17

Yoakum County Brings Suit Against Coke to Determine Construction of Act of Legislature.

Judge J. W. Hill returned Wednesday from a trip to Austin, where he went in connection with a suit in the outcome of which thirty-six counties have a vital interest. Briefly stated, this suit, which is one wherein Yoakum county is suing Coke county, involves the construction of the law governing the act of the legislature in apportioning three leagues of land for the benefit of the various county school funds.

Coke county, after being formed, had its school land apportioned from what is now Yoakum county. Yoakum county at that time was not organized. Now Yoakum county sets up the allegation that Coke county was cut from Tom Green county after the passage of the law setting aside these three leagues of land. Inasmuch as Tom Green county had already received its three league grant, Coke county it alleges, being at the time Tom Green county, received its grant a part and parcel of Tom Green county, and is not entitled to a share in the distribution for the reason that it had already, territorially at least, participated in a partition.

Judge Hill represents Coke county in the litigation and the case has been set for submission before the supreme court on November 17. It involves several intricate law points and doubtless will be exceedingly strongly contested. Judge Hill will return to Austin on the date named to argue the case before the supreme court, unless, of course, the hearing is reset for some later day.

### Land Deal.

G. S. Mason, of the Mason-Hughes company, returned Wednesday from a trip to Dallas. While away he sold through a Dallas broker section 58 in Glasscock county, the same being situated about ten miles from Garden City, for \$8.25 per acre cash. The Mason-Hughes company purchased this land about three years ago at a figure considerably below what was received for it at this last sale, and this firm is indeed well satisfied with the transaction.

### Cattle Shipments.

Wednesday four cars of cows were shipped to Fort Worth by Bruce Drake. Homer Smith will ship seven cars Thursday to the same place.

## TOWN PUNTERS READY FOR FIRST PRACTICE

HINDE WILL TAKE HIS MEN OUT FOR A ROUND THURSDAY.

Game for Saturday With College Has Been Postponed—Howard Payne for Thanksgiving.

H. K. Hinde, who is organizing a town football team under the name of the Fort Concho Punters, says he is getting along fine and has enough men to start practice.

"With a fine coach and several good players, we will start practice Thursday afternoon at the baseball park," he states. "We have about enough men but I would like to get more, as some of the men we have are not as good players as I desire, but they will do if no better arrangements can be made."

"All are very anxious to start work and I am confident that we will have one of the best teams in West Texas. It was our intention to play the college Saturday, but owing to the fact that we can not get in shape by then we will have to postpone the game, but we will give it a round next week."

"Several other games are on foot and will be played sometime in November. The biggest game I am figuring on is for Thanksgiving day, when we expect to play Howard Payne in San Angelo."

"In some places in Coke county it is almost impossible to run an auto, and there are some places in Tom Green county equally as bad," he states. "While it is to my interest to have good roads to travel over, still I think the county should have good roads anyway. The automobile is the fastest means of transportation that we have in many parts of West Texas, and I say the roads should be kept in proper shape so as to not ruin a machine to run over them and make the time that is required."

### Handout.

During the next few days Kilgore, Haydon & Hollfield will serve hot biscuits and coffee that will be cooked on a Majestic range. The firm invites everybody to come around and help themselves and learn what nice biscuits and coffee can be cooked with a Majestic.

# Let's Go Fishing!

The weather is just right and the water is fine. Fishing for fine Black Bass, Channel Cat and Crappie is fine fun.

We are going to have a nice crowd accompany us

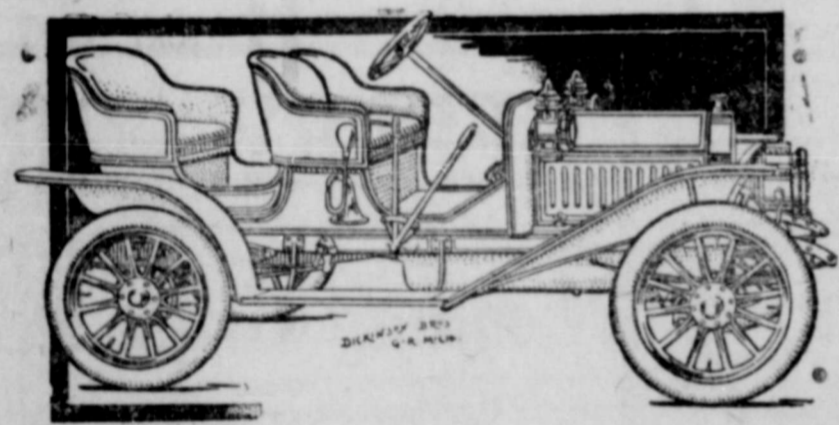

## To Mertzon

leaving San Angelo about 3 p. m. on Thursday, the 28th of October, and return by noon on the 29th. It takes about two hours for the run.

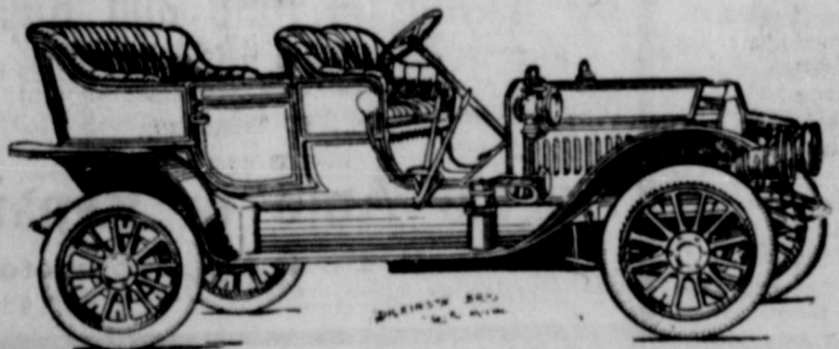

Spring Creek, on which Mertzon is located, is the finest water in Texas, and there are more fish in it than "Carter had oats." We will fish in the evening and early morning, which is the best time.

Get your fishing tackle ready and go with us. Hotel accommodations are ample for as many as twenty, so get your name in early, or we can not take you. We must know how many are going so as to provide auto and hotel accommodations. We must know how many are going not later than noon on Thursday the 28th.

We are going for two purposes—one to have some pleasure, and the other to sell Mertzon property. Property there is now being resold by those who bought from the Townsite Company, and in every instance as much as 50 per cent to 200 per cent profit is being made.

We will sell it to you and for you at a profit, as we have inquiries every day. Mertzon is the prettiest place in Western Texas. Don't fail to see it while you have a chance.

The Tankersley well, which flows nearly 6,000,000 gallons of water a day, is well worth a trip to see. We are preparing for several ladies to go; some have already put in their names.

## PECULIAR TANGLE IN SCHOOL LANDS

CASE INVOLVES MATTER OF INTEREST TO MANY COUNTIES.

FOR SUBMISSION NOV. 17

Yoakum County Brings Suit Against Coke to Determine Construction of Act of Legislature.

Judge J. W. Hill returned Wednesday from a trip to Austin, where he went in connection with a suit in the outcome of which thirty-six counties have a vital interest. Briefly stated, this suit, which is one wherein Yoakum county is suing Coke county, involves the construction of the law governing the act of the legislature in apportioning three leagues of land for the benefit of the various county school funds.

Coke county, after being formed, had its school land apportioned from what is now Yoakum county. Yoakum county at that time was not organized. Now Yoakum county sets up the allegation that Coke county was cut from Tom Green county after the passage of the law setting aside these three leagues of land. Inasmuch as Tom Green county had already received its three league grant, Coke county, it alleges, being at the time Tom Green county, received its grant a part and parcel of Tom Green county, and is not entitled to a share in the distribution for the reason that it had already, territorially at least, participated in a partition.

Judge Hill represents Coke county in the litigation and the case has been set for submission before the supreme court on November 17. It involves several intricate law points and doubtless will be exceedingly strongly contested. Judge Hill will return to Austin on the date named to argue the case before the supreme court, unless, of course, the hearing is reset for some later day.

### Land Deal.

G. S. Mason, of the Mason-Hughes company, returned Wednesday from a trip to Dallas. While away he sold through a Dallas broker section 58 in Glasscock county, the same being situated about ten miles from Garden City, for \$8.25 per acre cash. The Mason-Hughes company purchased this land about three years ago at a figure considerably below what was received for it at this last sale, and this firm is indeed well satisfied with the transaction.

### Cattle Shipments.

Wednesday four cars of cows were shipped to Fort Worth by Bruce Drake.

Homer Smith will ship seven cars Thursday to the same place.

## TOWN PUNTERS READY FOR FIRST PRACTICE

HINDE WILL TAKE HIS MEN OUT FOR A ROUND THURSDAY.

Game for Saturday With College Has Been Postponed—Howard Payne for Thanksgiving.

H. K. Hinde, who is organizing a town football team under the name of the Fort Concho Punters, says he is getting along fine and has enough men to start practice.

"With a fine coach and several good players, we will start practice Thursday afternoon at the baseball park," he states. "We have about enough men but I would like to get more, as some of the men we have are not as good players as I desire, but they will do if no better arrangements can be made."

"All are very anxious to start work and I am confident that we will have one of the best teams in West Texas."

"It was our intention to play the college Saturday, but owing to the fact that we can not get in shape by then we will have to postpone the game, but we will give it a round next week."

"Several other games are on foot and will be played sometime in November. The biggest game I am figuring on is for Thanksgiving day, when we expect to play Howard Payne in San Angelo."

Publishers Press. Brussels, Oct. 24.—The full and official report of the Congo State which the Belgian Colonial Minister is preparing will soon be ready. In the meantime he has outlined a scheme of reforms which may be regarded as fairly satisfactory. He proposes to change the customs dues and taxes, to establish a proper system of currency to create schools for the instruction of natives, to build roads and railways, and to promote a policy of the "open door" in the matter of trade. It is to be noticed, however, that in regard to "atrocities," M. Renkin professes his ignorance of the existence of such misdeeds, and insists that the Belgian Congo is no worse than any other part of Africa.

## DRY FARMERS SUCCESSFUL AT DEL RIO

Del Rio, Oct. 27.—This drouthy season has been a most auspicious test for the dry farming possibilities of the section about Del Rio. In spite of the lack of rain and in the face of the farmers knowing but little about the crops they planted, the results are very favorable and will tend to stimulate the activity in planting and dry farming more acreage next year.

In the neighborhood known as the Waterloo settlement, it is estimated that some 115 acres of milo maize will bring to the growers over \$3000, or more than \$26 per acre. This maize will be shredded and baled and sold in that manner. This from brand new land that has never had a plow share in it until this year.

C. A. Laufenburg, an Iowa farmer, who has about 75 acres in maize, has sold his crop as it stands in the field for \$19 per acre, and he has scarcely touched it since it was planted.

T. A. Gross, who came here from the Panhandle, says he will net about \$15 per acre from his milo.

Bernard Brown will shred and bale his crop and will net considerable more than many others on account of the better price for the finished feed.

Most of this milo maize was planted from the 5th to the 20th of July and has not been cultivated as it should have been. L. A. Williams, who planted his crop in March, got 800 bundles of milo from one-half acre and the price per bundle is 5 cents, thus bringing him \$40 for his crop, or at the rate of \$80 per acre. There was scarcely any labor on this field outside of the planting and gathering. Another Iowa farmer, Mr. Maure, has 80 acres in milo that will produce about the same results as the rest of the fields about here.

T. W. Freasier has roasting ears in his field now raised without irrigation. This corn was planted July 15 and has had one rain of 1 1-2 inches, and was planted on new land.

J. A. Wallace has some fine watermelons, raised without irrigation and without cultivation. He also has 8 acres of cotton, that will go one-third of a bale to the acre that had no water.

Several farmers who have experimented with Emmer of Egyptian wheat have pronounced it first class as a feed and hay, and especially suited for poultry. That which has been raised this season did well and more of it will be planted next year.

Bernard Brown was the first to try milo maize out in this section and but a few bags of seed were brought into Del Rio last year. It produced so well that this season the seed was brought in by the carload. Now that it has been thoroughly demonstrated that it will thrive here and produce feed so desirable this section will undoubtedly feature it as a crop as so many other West Texas communities are doing. It will eventually solve the feed problem for this section.

When you use McAlester coal you get the greatest amount of heat with the least ashes. Why not burn McAlester? It costs no more. San Angelo Ice and Power Company.

## FORTUNE IN RAISING OF BROOMCORN

Stratford, Tex., Oct. 27.—Ocular proof of J. L. Lundgren's earnest advice to Panhandle farmers to put at least part of their land to broomcorn each year was furnished this week. Mr. Murdock of this county bringing in the broomcorn he raised on his eighteen acres. Mr. Murdock had 25 acres in broomcorn, but only harvested 18 acres, off of which he realized three and one-fourth tons. He hauled two loads through to Texhoma and received \$185 a ton for it, at the same time contracting to sell the remainder at the same rate.

For the two loads he took with him he received a check for \$439.20.

Evidences such as this are enough to make us all wish we were farmers.

Murdock contends that broomcorn is the most profitable crop that can be raised, and that farming in the panhandle is a sure method of making money.

His success with 18 acres of broomcorn ought surely to induce many others to immediately begin the cultivation of broomcorn.

### NEW ROAD.

From North Tarrytown to Briarcliff and Just the Thing for Autos.

Tarrytown, Oct. 27.—William Rockefeller is dissatisfied with the condition of Broadway from the North Tarrytown village line to the south line of Briarcliff and he is going to spend \$50,000, in rebuilding it.

The road in front of Mr. Rockefeller's estate has been in a deplorable condition all summer, and as the town authorities showed no sign of repairing it he took the matter in hand. Mr. Rockefeller rides to and from his office in New York every day in his automobile. He applied to the town board for permission to do the work at his own expense, and the request was granted.

The piece of roadway to be repaired is one and a third miles long. Mr. Rockefeller realizes that a macadam road will not withstand the heavy automobile traffic that passes over the Albany post road and he has devised a road that should prove a good one. It is proposed to build a roadway thirty-three feet wide between gutters, the central part to the width of twenty feet to be laid with Hastings pavement blocks. This plan will be carried out from the North Tarrytown village line to the aqueduct arch. On each hill a special hill climbing block will be used. The rest of the road from the top of the hill to the Briarcliff line will be of Hastings block.

Mr. Rockefeller believes that this road will be a winner and will establish a precedent that will be followed by others who are looking for a road to stand up under the automobile traffic. He was the first man in the county to apply oil to roads and he is the first to try this kind of an automobile road here.

### Duke of Orleans.

Publishers Press. Brussels, Oct. 27.—As a result of his three months' cruise in Arctic seas the Duke of Orleans seems to be in a playful humor. A correspondent who interviewed him here found him at any rate full of jocularity at the expense of Dr. Cook and Commander Peary. The Duke expresses no opinion as to the dispute which has arisen between the two rival explorers, but even supposing that both did reach the North Pole, the achievement in his opinion merely deserves to be classed as a good "sporting event," not in the least equal in value to the expedition on which the Norwegian Amundsen is about to start for the purpose of taking magnetic observations and soundings useful to science. As for planting the Stars and Stripes at the North Pole, the bare idea of it has aroused the Duke of Orleans to Homeric laughter. "What would you think," he asked, "of a French explorer if you saw him with his brow covered with perspiration, telegraphing to the president of the Republic that he had the

### MANY CHILDREN.

The Kaiser Will Be Godfather to No. 8 to Boom Population of Germany.

Berlin, Oct. 27.—Germany's birth rate, which for the last ten years was considerably greater than that of other countries of Western Europe, has begun lately to show signs of declining. With a view to checking this and as an inducement to parents to bring up large families, the Kaiser has undertaken to stand as godfather for the eighth child in any German family, rich or poor.

The government will empower local authorities to pay to needy parents 80 marks (\$20) upon the birth of their eighth child. It is understood that the scheme owes its initiation to the Kaiser, who recognizes that German's high birth rate has been one of the great factors in creating her dominant position in Europe.

He regards any tendency toward smaller families as a national evil.

### Wool Consignments.

In a few days one of the largest amounts of wool ever received in San Angelo will get in and be stored with the West Texas Storage company. The consignment consists of 300 bags, which will make about 60,000 pounds.

Order deep shaft McAlester coal and see how much further it goes than the cheap kind. San Angelo Ice and Power Company.

## BURR PECK'S DREAM OF LOVE AT END

Alleges That His Young Wife is Cruel and is Handy With the Rolling Pin.

New Haven, Oct. 27.—The love dream of Burr Peck is at an end. He brought a suit for divorce against his young bride today. He names intolerable cruelty as the ground for separation and, while the specifications are not named in the writ, which was turned into court this noon, his friends have heard talk about a rolling pin being used as a bat and the old gentleman's head as the ball.

Burr eloped to New York City a year ago last August and married Mollie in the city hall. She had been a waitress for Mrs. A. F. Johnson, her aunt, who keeps a student's boarding house next door to Burr Peck's home, on High street, across the street from Berkeley Hall, one of the Yale dormitories.

Burr Peck's first wife died in April a year ago, and Mrs. Johnson helped him in his household affairs during that trying period. Mrs. Johnson later introduced her niece, Mollie, to him, and in August went to New York City with the couple for their elopement. Peck is 76 years old, and his waitress bride was 21 when she took the old gentleman for her husband.

Soon after the Pecks went to house-keeping on High street Mollie began to talk to her friends about "too much mother-in-law." As Burr's mother is 98 years old, the mother-in-law's attacks were not regarded as aggressive nor violent, and there was evidence that Burr was trying to make the pathway of the former waitress as comfortable as lay in his power. Peck owns several large New Haven houses and one business block, and a good sized slice of property was transferred to his wife's name a few weeks after the elopement in New York City. This was done, some of his bride's friends explained, because it was feared that a niece of his first wife, who had taken a great deal of interest in the elderly bridegroom, might bring a breach of promise suit.

This spring Peck bought an automobile and insisted on running it himself on the score of economy. This gave his young wife a nervous shock and she suggested a professional chauffeur, explaining that she thought the risk of running the car excessive for a man as old and one prized as she regarded her husband.

The first sign of discord appeared six weeks ago when a notice in New Haven newspapers over Peck's name, warned merchants from trusting his wife and stated that he would pay no more bills contracted by her. The waitress wife was then living at home with her husband, and to inquiries Peck explained that everything was all right, but that he had taken a notion to have the advertisement inserted. The divorce suit has brought the case to a crisis, and it was stated today that the property which had been transferred to young Mrs. Peck had been retransferred to her aged husband's name.

The case will be tried at the November term of the superior court.

## MORMON WIFE.

Mrs. Brigham Young, Jr., Has Seized Daughter Who Eloped With Gentle.

Santa Fe, N. M., Oct. 27.—John Allen, a gentle, who eloped with and married a daughter of Brigham Young, Jr., on September 9, and whose wife was kidnaped by her mother the next day, has appealed to the federal court to restore his wife to him. Mrs. Young, backed by a large Mormon community at Farmington, where she lives, declares she will fight the case to the end.

Her daughter left home for the county fair, met Allen and they ran away and were married. As soon as Mrs. Young learned of it she went to Allen's home, found he was absent and forced her daughter to go home with her.

When Allen called at her house for his wife her mother ordered him away and threatened to shoot him. He swore out a peace warrant and Mrs. Young was in jail several days because she would not give a peace bond. The federal court here has granted a writ of habeas corpus on Allen's petition, commanding Mrs. Young to produce her daughter in court November 9.

## ARTILLERY PUNCH.

Savannah Will Try to Put President Against Famous Beverage.

Savannah, Ga., Oct. 27.—Chatham artillery punch, a famous brew, is to be tried on President Taft when he visits Savannah on November 4, unless he refuses. The committee in charge of entertaining Mr. Taft has already prepared to brew punch, for it can not be built in a day. Like so many other good things, it requires at least seven days in the making.

Presidents, statesmen and naval officers have attacked artillery punch and all have been worsted.

The most distinguished victim of artillery punch was a former president of the United States. He was entertained royally in Savannah and liked the artillery concoction. He drank one or two and probably a third. All after that was extra ballast and the result was the president of the United States "lay sick with fever" on board a warship in the port of Savannah for three days.

A Georgia governor died shortly after a bout with this punch.

The most recent distinguished victim of the punch was Admiral Dewey. He took some salad and chased it with punch. The admiral laid his troubles to the salad.

The artillery punch is a Savannah invention. It was first brewed for the Chatham Artillery by a local saloon keeper. It proved such a good bit of ammunition that it has been kept in the family and its formula has been cherished as a valuable token from one generation to another.

There is always in the Chatham Artillery a man with the secret of the brew wrapped up in his breast.

The present keeper of this great secret of the Chathams is Lieutenant Mariana Papy.

Mr. Taft will be urged to go up against the punch.

Constipation is the rock that wreckk many lives; it poisons the ery life blood. Regularity can be established through the use of Prickly Ash Bitters. It is mildly cathartic and strengthens the stomach, liver and kidneys.

# In The Great Physical Effort

required in the attempt to make out a case for the State Banks, some glaring misstatements have been published, especially so in the introduction of the names of several old established banks, the inference conveyed being that they were all State Banks. The names of four Banks and one Trust Company were furnished to the public, and of this number three of these banks have been operating under National charters for varying periods of time, from nine to forty years.

These are the banks named:

Bank of North America, Philadelphia. This bank has been doing business for over forty years under National Bank charter No. 602.

Bank of New York, National Banking Association, has been doing business for over forty years under National Bank charter No. 1393.

Bank of Pittsburg, National Association, holds National charter No. 5225.

The Bank of the Manhattan Company, formerly supplied the City of New York with water, and is operating under a "special privilege" charter from the State of New York. The New York Clearing House statement of October 16, 1909, shows the bank to have deposits of \$35,800,000, and not deposits of \$84,000,000, as has been stated in the advertisement. The New York Clearing House statement of October 16, 1909, shows that there are six National Banks in the New York Clearing House whose deposits run from 72 millions to 167 millions. There is no wind in the New York Clearing House weekly statement.

The Girard Trust Company of Philadelphia [not Pittsburg], while a large concern, does very little commercial business, confining its operations to the handling of the various trusts in its care.

According to the statements of the banks, the Fourth National Bank, the Philadelphia National Bank, the Girard National Bank, all in Philadelphia, each carry larger deposits than does the Girard Trust Company.

The various bankers whose names have been so freely used are very largely identified with National Banks; in fact, the banker who wishes permanent financial prominence either for his bank or for himself, must be identified with the National Bank system, and frequent changes to the National system by State Bankers are noted.

The National Banks are pleased to have the public know of the laws regulating their operation, and want

"THE TRUTH, THE WHOLE TRUTH AND NOTHING BUT THE TRUTH."

published about them. The National Banks are now more carefully supervised than ever before in their history. They have the capital and resources with which to conduct their business, and your patronage is solicited by one of them.

## DRY FARMERS SUCCESSFUL AT DEL RIO

Del Rio, Oct. 27.—This drouthy season has been a most auspicious test for the dry farming possibilities of the section about Del Rio. In spite of the lack of rain and in the face of the farmers knowing but little about the crops they planted, the results are very favorable and will tend to stimulate the activity in planting and dry farming more acreage next year.

In the neighborhood known as the Waterloo settlement, it is estimated that some 115 acres of milo maize will bring to the growers over \$3000, or more than \$26 per acre. This maize will be shredded and baled and sold in that manner. This from brand new land that has never had a plow share in it until this year.

C. A. Laufenburg, an Iowa farmer, who has about 75 acres in maize, has sold his crop as it stands in the field for \$10 per acre, and he has scarcely touched it since it was planted.

T. A. Gross, who came here from the Panhandle, says he will net about \$15 per acre from his milo.

Bernard Brown will shred and bale his crop and will net considerable more than many others on account of the better price for the finished feed.

Most of this milo maize was planted from the 6th to the 20th of July and has not been cultivated as it should have been. L. A. Williams, who planted his crop in March, got 800 bundles of milo from one-half acre and the price per bundle is 5 cents, thus bringing him \$40 for his crop, or at the rate of \$80 per acre. There was scarcely any labor on this field outside of the planting and gathering. Another Iowa farmer, Mr. Maure, has 80 acres in milo that will produce about the same results as the rest of the fields about here.

T. W. Freasier has roasting ears in his field now raised without irrigation. This corn was planted July 15 and has had one rain of 1 1-2 inches, and was planted on new land.

J. A. Wallace has some fine watermelons, raised without irrigation and without cultivation. He also has 8 acres of cotton, that will go one-third of a bale to the acre that had no water. Several farmers who have experimented with Emmer of Egyptian wheat have pronounced it first class as a feed and hay, and especially suited for poultry. That which has been raised this season did well and more of it will be planted next year.

Bernard Brown was the first to try milo maize out in this section and but a few bags of seed were brought into Del Rio last year. It produced so well that this season the seed was brought in by the carload. Now that it has been thoroughly demonstrated that it will thrive here and produce feed so desirable this section will undoubtedly feature it as a crop as so many other West Texas communities are doing. It will eventually solve the feed problem for this section.

## FORTUNE IN RAISING OF BROOMCORN

Stratford, Tex., Oct. 27.—Ocular proof of J. L. Lundgren's earnest advice to Panhandle farmers to put at least part of their land to broomcorn each year was furnished this week. Mr. Murdock of this county bringing in the broomcorn he raised on his eighteen acres. Mr. Murdock had 25 acres in broomcorn, but only harvested 18 acres, off of which he realized three and one-fourth tons. He hauled two loads through to Texhoma and received \$185 a ton for it, at the same time contracting to sell the remainder at the same rate.

For the two loads he took with him he received a check for \$439.20.

Evidences such as this are enough to make us all wish we were farmers.

Murdock contends that broomcorn is the most profitable crop that can be raised, and that farming in the panhandle is a sure method of making money.

His success with 18 acres of broomcorn ought surely to induce many others to immediately begin the cultivation of broomcorn.

### NEW ROAD.

From North Tarrytown to Briarcliff and Just the Thing for Autos.

Tarrytown, Oct. 27.—William Rockefeller is dissatisfied with the condition of Broadway from the North Tarrytown village line to the south line of Briarcliff and he is going to spend \$50,000, in rebuilding it.

The road in front of Mr. Rockefeller's estate has been in a deplorable condition all summer, and as the town authorities showed no sign of repairing it he took the matter in hand. Mr. Rockefeller rides to and from his office in New York every day in his automobile. He applied to the town board for permission to do the work at his own expense, and the request was granted.

The piece of roadway to be repaired is one and a third miles long. Mr. Rockefeller realizes that a macadam road will not withstand the heavy automobile traffic that passes over the Albany post road and he has devised a road that should prove a good one. It is proposed to build a roadway thirty-three feet wide between gutters, the central part to the width of twenty feet to be laid with Hastings pavement blocks. This plan will be carried out from the North Tarrytown village line to the aqueduct arch. On each hill a special hill climbing block will be used. The rest of the road from the top of the hill to the Briarcliff line will be of Hastings block.

Mr. Rockefeller believe that this road will be a winner and will establish a precedent that will be followed by others who are looking for a road to stand up under the automobile traffic. He was the first man in the county to apply oil to roads and he is the first to try this kind of an automobile road here.

### Duke of Orleans.

Publishers Press.

Brussels, Oct. 27.—As a result of his three months' cruise in Arctic seas the Duke of Orleans seems to be in a playful humor. A correspondent who interviewed him here found him at any rate full of jocularity at the expense of Dr. Cook and Commander Peary. The Duke expresses no opinion as to the dispute which has arisen between the two rival explorers, but even supposing that both did reach the North Pole, the achievement in his opinion merely deserves to be classed as a good "sporting event," not in the least equal in value to the expedition on which the Norwegian Amundsen is about to start for the purpose of taking magnetic observations and soundings useful to science. As for planting the Stars and Stripes at the North Pole, the bare idea of it has aroused the Duke of Orleans to Homeric laughter. "What would you think," he asked, "of a French explorer if you saw him with his brow covered with perspiration, telegraphing to the president of the Republic that he had the

### MANY CHILDREN.

The Kaiser Will Be Godfather to No. 8 to Boom Population of Germany.

Berlin, Oct. 27.—Germany's birth rate, which for the last ten years was considerably greater than that of other countries of Western Europe, has begun lately to show signs of declining. With a view to checking this and as an inducement to parents to bring up large families, the Kaiser has undertaken to stand as godfather for the eighth child in any German family, rich or poor.

The government will empower local authorities to pay to needy parents 80 marks (\$20) upon the birth of their eighth child. It is understood that the scheme owes its initiation to the Kaiser, who recognizes that German's high birth rate has been one of the great factors in creating her dominant position in Europe.

He regards any tendency toward smaller families as a national evil.

### Wool Consignments.

In a few days one of the largest amounts of wool ever received in San Angelo will get in and be stored with the West Texas Storage company. The consignment consists of 300 bags, which will make about 60,000 pounds.

## BURR PECK'S DREAM OF LOVE AT END

Alleges That His Young Wife Is Cruel  
and is Handy With the Rolling  
Pin.

New Haven, Oct. 27.—The love dream of Burr Peck is at an end. He brought a suit for divorce against his young bride today. He names intolerable cruelty as the ground for separation and, while the specifications are not named in the writ, which was turned into court this noon, his friends have heard talk about a rolling pin being used as a bat and the old gentleman's head as the ball.

Burr eloped to New York City a year ago last August and married Mollie in the city hall. She had been a waitress for Mrs. A. F. Johnson, her aunt, who keeps a student's boarding house next door to Burr Peck's home, on High street, across the street from Berkeley Hall, one of the Yale dormitories.

Burr Peck's first wife died in April a year ago, and Mrs. Johnson helped him in his household affairs during that trying period. Mrs. Johnson later introduced her niece, Mollie, to him, and in August went to New York City with the couple for their elopement. Peck is 76 years old, and his waitress bride was 21 when she took the old gentleman for her husband.

Soon after the Pecks went to house-keeping on High street Mollie began to talk to her friends about "too much mother-in-law." As Burr's mother is 98 years old, the mother-in-law's attacks were not regarded as aggressive nor violent, and there was evidence that Burr was trying to make the pathway of the former waitress as comfortable as lay in his power. Peck owns several large New Haven houses and one business block, and a good sized slice of property was transferred to his wife's name a few weeks after the elopement in New York City. This was done, some of his bride's friends explained, because it was feared that a niece of his first wife, who had taken a great deal of interest in the elderly bridegroom, might bring a breach of promise suit.

This spring Peck bought an automobile and insisted on running it himself on the score of economy. This gave his young wife a nervous shock and she suggested a professional chauffeur, explaining that she thought the risk of running the car excessive for a man as old and one prized as she regarded her husband.

The first sign of discord appeared six weeks ago when a notice in New Haven newspapers over Peck's name, warned merchants from trusting his wife and stated that he would pay no more bills contracted by her. The waitress wife was then living at home with her husband, and to inquiries Peck explained that everything was all right, but that he had taken a notion to have the advertisement inserted. The divorce suit has brought the case to a crisis, and it was stated today that the property which had been transferred to young Mrs. Peck had been retransferred to her aged husband's name.

The case will be tried at the November term of the superior court.

### MORMON WIFE.

Mrs. Brigham Young, Jr., Has Seized  
Daughter Who Eloped With Gentle.

Santa Fe, N. M., Oct. 27.—John Allen, a gentle, who eloped with and married a daughter of Brigham Young, Jr., on September 9, and whose wife was kidnaped by her mother the next day, has appealed to the federal court to restore his wife to him. Mrs. Young, backed by a large Mormon community at Farmington, where she lives, declares she will fight the case to the end.

Her daughter left home for the county fair, met Allen and they ran away and were married. As soon as Mrs. Young learned of it she went to Allen's home, found he was absent and forced her daughter to go home with her.

When Allen called at her house for his wife her mother ordered him away and threatened to shoot him. He swore out a peace warrant and Mrs. Young was in jail several days because she would not give a peace bond. The federal court here has granted a writ of habeas corpus on Allen's petition, commanding Mrs. Young to produce her daughter in court November 9.

### ARTILLERY PUNCH.

Savannah Will Try to Put President  
Against Famous Beverage.

Savannah, Ga., Oct. 27.—Chatham artillery punch, a famous brew, is to be tried on President Taft when he visits Savannah on November 4, unless he refuses. The committee in charge of entertaining Mr. Taft has already prepared to brew punch, for it can not be built in a day. Like so many other good things, it requires at least seven days in the making.

Presidents, statesmen and naval officers have attacked artillery punch and all have been worsted.

The most distinguished victim of artillery punch was a former president of the United States. He was entertained royally in Savannah and liked the artillery concoction. He drank one or two and probably a third. All after that was extra ballast and the result was the president of the United States "lay sick with fever" on board a warship in the port of Savannah for three days.

A Georgia governor died shortly after a bout with this punch.

The most recent distinguished victim of the punch was Admiral Dewey. He took some salad and chased it with punch. The admiral laid his troubles to the salad.

The artillery punch is a Savannah invention. It was first brewed for the Chatham Artillery by a local saloon keeper. It proved such a good bit of ammunition that it has been kept in the family and its formula has been cherished as a valuable token from one generation to another.

There is always in the Chatham Artillery a man with the secret of the brew wrapped up in his breast.

The present keeper of this great secret of the Chathams is Lieutenant Mariana Papp.

Mr. Taft will be urged to go up against the punch.

Constipation is the rock that wrecks many lives; it poisons the ery life blood. Regularity can be established through the use of Prickly Ash Bitters. It is mildly cathartic and strengthens the stomach, liver and kidneys.

## In The Great Physical Effort

required in the attempt to make out a case for the State Banks, some glaring misstatements have been published, especially so in the introduction of the names of several old established banks, the inference conveyed being that they were all State Banks. The names of four Banks and one Trust Company were furnished to the public, and of this number three of these banks have been operating under National charters for varying periods of time, from nine to forty years.

These are the banks named:

Bank of North America, Philadelphia. This bank has been doing business for over forty years under National Bank charter No. 602.

Bank of New York, National Banking Association, has been doing business for over forty years under National Bank charter No. 1393.

Bank of Pittsburg, National Association, holds National charter No. 5225.

The Bank of the Manhattan Company, formerly supplied the City of New York with water, and is operating under a "special privilege" charter from the State of New York. The New York Clearing House statement of October 16, 1909, shows the bank to have deposits of \$35,800,000, and not deposits of \$84,000,000, as has been stated in the advertisement. The New York Clearing House statement of October 16, 1909, shows that there are six National Banks in the New York Clearing House whose deposits run from 72 millions to 167 millions. There is no wind in the New York Clearing House weekly statement.

The Girard Trust Company of Philadelphia [not Pittsburg], while a large concern, does very little commercial business, confining its operations to the handling of the various trusts in its care.

According to the statements of the banks, the Fourth National Bank, the Philadelphia National Bank, the Girard National Bank, all in Philadelphia, each carry larger deposits than does the Girard Trust Company.

The various bankers whose names have been so freely used are very largely identified with National Banks; in fact, the banker who wishes permanent financial prominence either for his bank or for himself, must be identified with the National Bank system, and frequent changes to the National system by State Bankers are noted.

The National Banks are pleased to have the public know of the laws regulating their operation, and want

**"THE TRUTH, THE WHOLE TRUTH AND NOTHING BUT THE TRUTH."**

published about them. The National Banks are now more carefully supervised than ever before in their history. They have the capital and resources with which to conduct their business, and your patronage is solicited by one of them.

With a view to checking this and as an inducement to parents to bring up large families, the Kaiser has undertaken to stand as godfather for the eighth child in any German family, rich or poor.

The government will empower local authorities to pay to needy parents \$6 marks (\$20) upon the birth of their eighth child. It is understood that the scheme owes its initiation to the Kaiser, who recognizes that Germany's high birth rate has been one of the great factors in creating her dominant position in Europe.

He regards any tendency toward smaller families as a national evil.

### Wool Consignments.

In a few days one of the largest amounts of wool ever received in San Angelo will get in and be stored with the West Texas Storage company. The consignment consists of 300 bags, which will make about 60,000 pounds.

Order deep shaft McAlester coal and see how much further it goes than the cheap kind. San Angelo Ice and Power Company.

Let the Press-News get it

**BURR PECK'S DREAM  
OF LOVE AT END**

**Alleges That His Young Wife is Cruel  
and is Handy With the Rolling  
Pin.**

New Haven, Oct. 27.—The love dream of Burr Peck is at an end. He brought a suit for divorce against his young bride today. He names intolerable cruelty as the ground for separation and, while the specifications are not named in the writ, which was turned into court this noon, his friends have heard talk about a rolling pin being used as a bat and the old gentleman's head as the ball.

Burr eloped to New York City a year ago last August and married Mollie in the city hall. She had been a waitress for Mrs. A. F. Johnson, her aunt, who keeps a student's boarding house next door to Burr Peck's home, on High street, across the street from Berkeley Hall, one of the Yale dormitories.

Burr Peck's first wife died in April a year ago, and Mrs. Johnson helped him in his household affairs during that trying period. Mrs. Johnson later introduced her niece, Mollie, to him, and in August went to New York City with the couple for their elopement. Peck is 76 years old, and his waitress bride was 21 when she took the old gentleman for her husband.

Soon after the Pecks went to house-keeping on High street Mollie began to talk to her friends about "too much mother-in-law." As Burr's mother is 98 years old, the mother-in-law's attacks were not regarded as aggressive nor violent, and there was evidence that Burr was trying to make the pathway of the former waitress as comfortable as lay in his power. Peck owns several large New Haven houses and one business block, and a good sized slice of property was transferred to his wife's name a few weeks after the elopement in New York City. This was done, some of his bride's friends explained, because it was feared that a niece of his first wife, who had taken a great deal of interest in the elderly bridegroom, might bring a breach of promise suit.

This spring Peck bought an automobile and insisted on running it himself on the score of economy. This gave his young wife a nervous shock and she suggested a professional chauffeur, explaining that she thought the risk of running the car excessive for a man as old and one prized as she regarded her husband.

The first sign of discord appeared six weeks ago when a notice in New Haven newspapers over Peck's name, warned merchants from trusting his wife and stated that he would pay no more bills contracted by her. The waitress wife was then living at home with her husband, and to inquiries Peck explained that everything was all right, but that he had taken a notion to have the advertisement inserted. The divorce suit has brought the case to a crisis, and it was stated today that the property which had been transferred to young Mrs. Peck had been retransferred to her aged husband's name.

The case will be tried at the November term of the superior court.

**MORMON WIFE.**

**Mrs. Brigham Young, Jr., Has Seized  
Daughter Who Eloped With Gentle.**

Santa Fe, N. M., Oct. 27.—John Allen, a gentle, who eloped with and married a daughter of Brigham Young, Jr., on September 9, and whose wife was kidnaped by her mother the next day, has appealed to the federal court to restore his wife to him. Mrs. Young, backed by a large Mormon community at Farmington, where she lives, declares she will fight the case to the end.

Her daughter left home for the county fair, met Allen and they ran away and were married. As soon as Mrs. Young learned of it she went to Allen's home, found he was absent and forced her daughter to go home with her.

When Allen called at her house for his wife her mother ordered him away and threatened to shoot him. He swore out a peace warrant and Mrs. Young was in jail several days because she would not give a peace bond. The federal court here has granted a writ of habeas corpus on Allen's petition, commanding Mrs. Young to produce her daughter in court November 9.

**ARTILLERY PUNCH.**

**Savannah Will Try to Put President  
Against Famous Beverage.**

Savannah, Ga., Oct. 27.—Chatham artillery punch, a famous brew, is to be tried on President Taft when he visits Savannah on November 4, unless he refuses. The committee in charge of entertaining Mr. Taft has already prepared to brew punch, for it can not be built in a day. Like so many other good things, it requires at least seven days in the making.

Presidents, statesmen and naval officers have attacked artillery punch and all have been worsted.

The most distinguished victim of artillery punch was a former president of the United States. He was entertained royally in Savannah and liked the artillery concoction. He drank one or two and probably a third. All after that was extra ballast and the result was the president of the United States "lay sick with fever" on board a warship in the port of Savannah for three days.

A Georgia governor died shortly after a bout with this punch.

The most recent distinguished victim of the punch was Admiral Dewey. He took some salad and chased it with punch. The admiral laid his troubles to the salad.

The artillery punch is a Savannah invention. It was first brewed for the Chatham Artillery by a local saloon keeper. It proved such a good bit of ammunition that it has been kept in the family and its formula has been cherished as a valuable token from one generation to another.

There is always in the Chatham Artillery a man with the secret of the brew wrapped up in his breast.

The present keeper of this great secret of the Chathams is Lieutenant Mariana Papp.

Mr. Taft will be urged to go up against the punch.

Constipation is the rock that wreck many lives; it poisons the ery life blood. Regularity can be established through the use of Prickly Ash Bitters. It is mildly cathartic and strengthens the stomach, liver and kidneys.

**In The Great Physical Effort**

required in the attempt to make out a case for the State Banks, some glaring misstatements have been published, especially so in the introduction of the names of several old established banks, the inference conveyed being that they were all State Banks. The names of four Banks and one Trust Company were furnished to the public, and of this number three of these banks have been operating under National charters for varying periods of time, from nine to forty years.

These are the banks named:

**Bank of North America, Philadelphia.** This bank has been doing business for over forty years under National Bank charter No. 602.

**Bank of New York, National Banking Association,** has been doing business for over forty years under National Bank charter No. 1393.

**Bank of Pittsburg, National Association,** holds National charter No. 5225.

The Bank of the Manhattan Company, formerly supplied the City of New York with water, and is operating under a "special privilege" charter from the State of New York. The New York Clearing House statement of October 16, 1909, shows the bank to have deposits of \$35,800,000, and not deposits of \$84,000,000, as has been stated in the advertisement. The New York Clearing House statement of October 16, 1909, shows that there are six National Banks in the New York Clearing House whose deposits run from 72 millions to 167 millions. There is no wind in the New York Clearing House weekly statement.

The Girard Trust Company of Philadelphia [not Pittsburg], while a large concern, does very little commercial business, confining its operations to the handling of the various trusts in its care.

According to the statements of the banks, the Fourth National Bank, the Philadelphia National Bank, the Girard National Bank, all in Philadelphia, each carry larger deposits than does the Girard Trust Company.

The various bankers whose names have been so freely used are very largely identified with National Banks; in fact, the banker who wishes permanent financial prominence either for his bank or for himself, must be identified with the National Bank system, and frequent changes to the National system by State Bankers are noted.

The National Banks are pleased to have the public know of the laws regulating their operation, and want

**"THE TRUTH, THE WHOLE TRUTH AND NOTHING BUT THE TRUTH."**

published about them. The National Banks are now more carefully supervised than ever before in their history. They have the capital and resources with which to conduct their business, and your patronage is solicited by one of them.

**The First National Bank**

*Henderson's*  
THE HOUSE THAT SAVES YOU MONEY.

attempt of the Princess Louise, daughter of King Leopold, to obtain a loan from a Hamburg bank on the security of an inheritance exceeding \$25,000,000, has caused astonishment. According to the Belgian law, King Leopold is unable to disinherit his children. Each is entitled to one-fourth of his fortune, but this right only obtains if the King makes a will. During his lifetime he can dispose of his property as he chooses, and the royal fortune is believed to be diminishing daily owing to gifts to favorites and their endowment. King Leopold is credited with the intention of leaving nothing to his daughters, but it is believed now that the contemplated sale of the royal picture collection will not occur.
