

THE ENTERPRISE

AND PECOS TIMES

VOLUME XL. NUMBER 41.

PECOS, TEXAS, FRIDAY, MAY 27, 1921.

\$2.00 PER YEAR, \$1.25 FOR SIX MONTHS.

GOOD, COPIOUS RAINS MAKE HAPPY PEOPLE

The rain Tuesday night was one of the best and most general to fall over this section in several months, yet there is much territory on which rain did not fall at this time. However, a good portion of the territory not covered by the rain Tuesday night was made comfortably wet by rains falling within the past week and many of the stockmen are happy and feeling better, thank you. It is reported that heavy rains fell all along the way from Roswell this way and for a short distance south of Pecos. It is understood that the rain did not reach much beyond Toyah, but that a good rain did fall there. The Balmorhea country had good rains also.

Many of the ranchers were sorely complaining of the drouth, short grass and poor cattle and the situation was becoming alarmingly serious but today they are all happy and feel that it will only be a question of from thirty to sixty days until the cattle will be fat enough to begin to put on the market and that then they will be able to relieve some of the stringency of the money market which is just now sorely bothering a lot of them if not all of them.

As is the case in West Texas all the time since the country was first discovered the rain came and just in the nick of time to save our people, not from bankruptcy, but from the bother and worry of trying in a vain effort to raise enough money to keep the wolf from the door. It is not only the complaint of the stockmen but of every one you meet in this country that collections are harder at this time than at any time in the history of the country, and many who have more than enough to pay their debts and put them on easy street long past due them are compelled to stand off their grocery accounts with the promise from the grocermen that unless these accounts be paid their credit and therefore their rations will be cut off. With the splendid rains everything in this neck of the woods is looking much brighter and our citizens have taken a new grasp on the hope that everything will come out all right in the end.

PECOS HIGH SCHOOL GRADUATING EXERCISES

The graduating exercises of the Pecos High School were held at the Baptist church last Friday night. If the seating capacity of the church was ever taxed it certainly was repeated on this occasion. The unusual choruses offered on occasions of this nature were well received, the young ladies, all dressed in white, were a marvel of beauty and there was nothing to mar the occasion nor the program. Miss Eleanor Roberson, twin daughter of Mr. and Mrs. Hugh Roberson was valedictorian and delivered her address in a masterly manner. Miss Mildred Carson delivered a salutatorian essay with pleasing effect. Julia Magee was awarded the prize of a beautiful percolator offered by the Pecos Light and Power Company for the best essay on the uses of electricity in Pecos.

Prof. Rutledge delivered the address to the class in his usual inimitable characteristic of expression and Clem Calhoun made the presentation address on delivery of the prize to Miss Magee for the best essay on the uses of electricity. A profusion of flowers were tendered to the young graduates, who outnumbered the young men in about the ratio of three to one. The following are the graduates who are credited to their teachers, their parents, and the Pecos High School: Eleanor Roberson, valedictorian. Mildred Carson salutatorian, Elise Roberson, Julia Magee, Ruby Mae Beauchamp, Myrtle Helen, Hazel Biggs, Rela Kizer, Cornelia Lawson Goodrich, Beatrice Bowie, Rena Boles, Evly Black, Alice Morrison, Rena Johnson, Jessye Heard, Zorene Todd, Ross, and Woody Cowan.

The following was the program rendered: Invocation, Rev. Homer L. Magee. Hymn—"Birth of Spring," Class. Salutatory, Mildred Carson. Address—"Tales of Hoffman," Barcarolle. Address to Class, Supt. P. J. Rutledge. Class Song—"Pecos Hi," Class. Valedictory, Eleanor Roberson. Presentation of Diplomas, Dr. Jim Camp. Awarding Certificates of Attainment.

THE SAND LAKE RESERVOIR

Letters explaining the Sand Lake Reservoir proposition are being sent to all owners in the proposed district by the Pecos Chamber of Commerce, and an assessment of ten cents per acre is asked in order to defray the original surveys and the expense of the project. It is possible to reach the land with a road from the reservoir the com-

BACK TO THE OLD 'SWIMMIN' HOLE

METHODISTS' REVIVAL MEETING DRAWS LARGE CROWDS DAILY

Rev. O. F. Zimmerman began his revival at the Methodist church Sunday morning with a splendid audience to welcome him. His sermon was a forceful one and very much complimented and appreciated by many who waited to shake hands, get acquainted and thank him for the splendid message which was helpful to all who were fortunate enough to hear it. The singer, Rev. George Avery, Jr., is very good and highly appreciated. He has a strong voice, full of melody and pep, and his solos are full of the love of God.

The meetings are being held every morning and evening and very good audiences are greeting him at each of these meetings, yet it is hoped more of our people will take advantage of his soul-stirring sermons which are rarely equalled in the Pecos pulpits.

Rev. Zimmerman is called the "Tithing Evangelist" and the cognomen is befitting as each of his sermons so far heard by the editor has been along the line of tithing and his arguments are most convincing. To listen to his arguments in favor of tithing and weigh them in a just scale is to become a believer, and if not a signer of the pledge you will have to be one unable to compute your income or a hard-boiled, tightwad, money grabbing fellow who cannot see any use in spending the money after it is earned—and these are the kind who get the least out of life for the reason that they are the ones who give out the least.

SHORT SESSION OF THE DISTRICT COURT

District Court held a short session this week, Judge Gibbs presiding. The following non jury cases were disposed of:

Martha V. Ezell vs. H. H. Tucker, debt, judgment for plaintiff with interest and attorney's fees.

Porterville Irrigation Company vs. Pecos Valley Land & Oil Company, decree granted.

Jim Camp vs. E. C. Lamb, foreclosure, judgment for plaintiff.

T. F. Slack, et al vs. C. B. McCormack, suit for possession of mineral rights and damages. Judgment for plaintiff for minerals.

Pecos Valley State Bank vs. H. Robbins, suit on note, judgment for plaintiff.

I. J. Sims vs. W. R. Black, foreclosure of chattel mortgage, case continued.

The disabilities of a minor were decreed removed, as prayed for, in the case of Ora Pruett.

Jury trials as follows:

David S. Brooks vs. W. Earl Bell, foreclosure of vendor's lien note, judgment for plaintiff.

D. S. Brooks vs. Ira J. Bell, foreclosure of vendor's lien note, judgment for plaintiff. Execution stayed until execution issues in above cause against W. E. Bell.

LIBRARY ASSOCIATION CALLS IMPORTANT MEET

The Carnegie library association will hold a business meeting at the library building Thursday afternoon at four o'clock, June 2nd, for the purpose of hearing the annual reports and electing officers for the ensuing year. Let all who are interested in the success of the library be present.

YOUNGEST NOTARY PUBLIC IN REEVES COUNTY

Miss Ora Pruett has the distinction of being the youngest Notary Public in Reeves county. Her age was advanced by the District Court in order that she may legally act in that capacity. Of course this age business does not apply except in a legal situation and when applicable to other situations it is the color of another horse.

METHODIST SPREAD BIG FEAST SUNDAY

On Sunday last after the opening sermon of the revival now going on at the Methodist church. Tables had been prepared upon which to place the viands and plates and spoons were furnished. Great tubs of ice cold lemonade was there for all and the hot day made that commodity very much in demand. The dinner was prepared by the good ladies of the church and was sufficient to satisfy all there and then some. To say just what these good ladies had prepared is beyond the capacity of this editor. Yellow legged chickens, rabbits, ham, sandwiches and probably other meats, salad, dressing, pickles, pies, cakes—well its no use trying to name half the good things they had. Fresh tomatoes were also in evidence and there was a good and plenty of everything mentioned and many other things the editor cannot at this time mention because of lack of memory. There was a good and plenty of everything and many baskets were left to take home for supper Sunday.

It was a happy though and a jolly good, get-together sociable time was had.

SARAGOSA NEWS

Mr. and Mrs. Bowser visited friends in Pecos Saturday.

Messrs. Taylor and E. B. Couger were Pecos visitors Friday.

Mr. Willie Hoefs went to Pecos on business Monday.

Miss Lela McNeil is the guest of Mrs. J. B. Wolfolk this week.

Mrs. Anna Davis, Mr. and Mrs. Henry Jones of Balmorhea spent Sunday with Mrs. Fred Strode.

Miss Inez Weight left Monday for her home at Odessa after teaching here the past term.

Prof. Norman and family left Monday for Merkel, Texas, where they will spend the summer. They will return to Pecos next September where he has accepted a position as teacher in the High School.

Miss Deliah Tucker entertained her friends Tuesday evening with a surprise party for her brother, Everett. All report a very pleasant time.

WHERE THE TEACHERS WILL SPEND SUMMER

The teachers in the Pecos public schools—those living in other parts of the state—have gone from us and several of them will probably not return, not having made applications for positions for another year. They have all, so far as the Enterprise knows, been faithful to their duties and were splendid instructors. Following is a list of those who have left Pecos the past week and their destination.

Principal J. M. Davenport to Dallas.

Misses Luda and Emma Clyde Stewart to Hearne.

Miss Clara Rutledge to Weatherford.

Miss Esther Crawford to Menard.

Miss Forrester to Lacaster.

Miss Cobb to Seminole.

Miss Blanchard to San Antonio.

Miss Blackmon to Brownsville.

GRADUATE COMING HOME

Miss Irene Prewitt will return home next week from Carr-Burdette College, Sherman, where she graduated last week with highest honors, being valedictorian of her class. The many friends of this bright and popular young lady will rejoice at the well merited honor conferred upon her and will be glad to welcome her home. She is visiting friends this week at Paris and will visit in Dallas before returning

FAVORABLE CONDITIONS REPORTED ON SEVERAL WELLS IN PECOS FIELD

Drilling activities are again well under way in the Pecos territory after a number of delays due to accidents in the field, and several of the wells are in a condition to be called "favorable."

The greatest interest during the past week has been centered in the River No. 2, of the Arthur-Pitts Oil Company, in Ward county. This drill has been working in about 400 feet of salt rock formation of a red and white color, and the tools when pulled to the top show considerable oil. The drill is now working at a greater depth than the River No. 1, which was stopped at 1550 feet by a fishing job. According to the geological surveys of the territory an oil bearing formation should be picked up at about 2100 feet, and the oil showings and the gas now had indicates that this should be found at a somewhat shallower depth. The River well has penetrated about 500 feet of red rock at the top of the ground, very similar to that found by the Pinal Dome Oil Company in eastern Loving county. The latter well is drilling below 800 feet in a lime and gypsum formation after a delay of several days due to an accident to their Clark gasoline drilling engine.

This latter company's operation in the Pecos county field near Fort Stockton is down more than 1600 feet in lime and gypsum after passing the red beds at 1400 feet.

Casing is being pulled in the Bell gas well this week, preparatory to setting a new string to replace one which collapsed in the water sand just above the gas, and when this new casing is put in the well the hole will be underreamed through the 100 feet of rock and the new casing set at the bottom of the hole. This plan it is expected will give the necessary water shut off, and allow the drill to prospect the bottom of the gas formation with safety.

The Helen S. of the Texas Drilling & Development Company is drilling at just above 1,000 feet with a ten inch hole in a gypsum formation. Due to the soluble nature of this formation no water shut off has been effected. The company is drilling under a 1,000 foot contract, but it is understood that operations will be carried to a greater depth, especially since the gas flow has been struck in the Bell.

The Pecos-Angeles three miles south of the Bell has also resumed operations and is underreaming out their hole down to 700 feet to set larger casing before drilling on.

Derriek timber for the new derrick of the burned Laura well were being hauled to the location late this week, considerable delay being occasioned due to the bad condition of the Toyah creek bridge, the timbers in use having been located east of the bridge and the condition of the bridge being such after the recent heavy rains to not permit heavy hauling. Considerable work has been done on location since fire destroyed the derrick in placing the machinery saved in condition to be used.

The Trans-Pecos Oil Company in Ward county has passed through about 100 feet of a dark sandy shale carrying oil showings at about 800 feet. The drill is being worked steadily.

C. R. Troxel of the Troxel Oil Company is in Dallas this week making arrangements to clear up all legal obstacles to the transfer of the property on which the well is located to the three interests which now hold it. Interests in the well have been held by two other parties in its history, and inadequate transfers are said to have clouded the present title.

Considerable activity is manifest in the shallow producing district around the Troxel well. Engineers have visited the field during the past week investigating the refining possibilities and it is understood that the financing of an adequate refinery will be accomplished as a result of their report. The small refinery at Toyah has not been large enough to handle the output of the wells.

C. L. Buras, et al. drilled in the latest well this week on section 8, just north of the producing area. The oil was found at 200 feet and the well is being allowed to fill for several days before trying it out on the pump.

The Los-Pecos Syndicate has finished underreaming at 885 feet, just as the underreaming was finished the lugs were lost in the well which has necessitated another fishing job which is hoped will be finished in a short time. C. E. Anderson of this syndicate is here from his home in Los Angeles looking over the field and watching the work at the Los-Pecos and is more enthused than ever over the prospects of the early completion of a real oil well.

and one-half to the south of the Troxel, and is down below 250 feet seeking the stratum found by L. R. Cox at 303 feet in his well a mile to the north. Mr. Cox has produced about three barrels of the high grade lubricating from his first well on a pumping test, and has revived an old Toyah plan by starting work on a six foot, steel lined shaft down to 200 feet, by means of which he expects to get a heavier production from the heavy shales in which the oil is found.

The loss of a second string of tools in the Owens No. 1 in eastern Culberson county has not deterred Tom Owens and his associates in their determination to sink a hole on that location, and after giving up one hole at 750 feet, and a second at 575 feet, both because of fishing jobs, they have now ordered the rig skidded over for the second time and a new hole started. The location is on section 2, block 91, school lands Culberson county. A favorable showing of oil with considerable gas was had in the first well drilled at the point where the fishing job occurred.

The Owens No. 2, is now down 1400 feet after having passed through about 500 feet of black and gray lime. This location is about ten miles west of the No. 1, on section 16, block 92. George Ames is the driller.

It is reported that the Weoh Oil Company has casing enroute to begin operations on their well now down 560 feet at the intersection of Reeves, Culberson and Jeff Davis counties.

An excellent showing at between 800 and 885 feet is reported from the Pope Prospecting Company's well in Pecos county. This location is just a mile south of the famous Grant wells which came in as producers at from fifty to ninety-five feet last winter. Water troubles have prevented a definite production from them, although the production is reported to be sufficient to justify pumping. Efforts are now being made to handle the water and oil and pumping operations are expected to be again started in a very short time.

The Bowers, Hale & Lamb combination are engaged in two wells in the Pecos territory. One is about eight miles south of the Grant and this well is reported to be down about 1,000 feet. The Atchinson Oil Company has moved a star rig to a location ten miles south of Fort Stockton to begin drilling operations.

TOYAH VALLEY TO HAVE CELEBRATION

The people of the Toyah Valley will have a three day celebration of the Fourth of July, this year. There will be barbecues, patriotic addresses by speakers of note, baseball games, horse races, broncho busting, goat and cattle roping, athletic games of all kinds—in short a regular old fashioned Independence Day celebration will be staged and three days will be required in which to carry out the program outlined.

At a mass meeting, held in Balmorhea Wednesday night, a general celebration committee was named together with all necessary subcommittees, each of which will have charge of some special feature of the proposed affair.

It was decided to send special invitations to the Chamber of Commerce and the people as well, of Pecos, Toyah, Barstow, Fort Stockton and other nearby towns to attend the Toyah Valley celebration en masse.

An ample fund with which to meet the expense of the celebration is being raised this week and the members of the finance committee having the collection in charge say that from the manner in which the subscriptions are coming in the conclusion would be reached that "hard times" have not struck the Toyah Valley yet.

The celebration will be held under the auspices of the Balmorhea Post American Legion and if any money is made from the carnival which will be part of the celebration, under direct supervision of Legion men, it will be devoted to the fund with which the proposed Legion Hall will be financed.

CERTIFICATE OF STANDARD TRAINING CLASS—6 AWARDED

On Sunday the closing day of the meeting the certificates won by those taking the Standard Training course which has been conducted at the Methodist church will be awarded. The classes this winter and spring have issued about sixty certificates. In the training school held in El Paso last June there were fifty-five certificates awarded. The Standard Training course will be held in Pecos and it is more enthusiastic than ever over the prospects of the early completion of a real oil well.

DIAMONDS FOUND IN LAVA LEFT BY TEXAS VOLCANO

Austin, Texas, May 15.—Pilot Knob, near Onion creek, which is only a few miles from Austin, is a spot of unusual interest to students of geology of the University of Texas. It is said to be the cone, or neck, of an old volcano, which had its life in the early history of the continent, when the land around here was several thousand feet higher than it is today.

Evidence of a volcanic eruption was a volcanic tuff, or hardened lava, of several miles in length along the sides of Onion creek. It is supposed also that the large deposits of Fuller's earth in and around San Antonio are a part of the volcanic dust, blown by the wind at the time of the eruption. Particles of volcanic dust have been found in Norway after an eruption in Iceland, which proves the theory of the wind-blown particles.

Land Beneath Sea. This, however, is only the beginning of the history of Pilot Knob. At

the time of the eruption there was a submergence or lowering of the land beneath the sea. As this process of submergence continued there was another eruption of the volcano, it is supposed, at the bottom of the sea, which did not reach the surface. When the land was raised again to the level of the sea the cone of the volcano came to the surface.

After thousands of years of wearing away of the land, which process is known as erosion, Pilot Knob, as it is today, came into existence. That erosion has taken place is shown by the hardened portions of the lava rock, known as limburgyte to the geological world, left at the center of the cone. The sides of the cone have been eroded faster, because the outer part of the loccolite, or hardened lava, has been decayed, and hence readily carried away. The depth of Pilot Knob is said to be 600 or more feet.

Large masses of the lava are found around Pilot Knob. There are also portions of lava extending from Mason county to Kinney county. It forms the rock known as trap, quarried at Knipp, and is used in street paving. To the geologists it is known as limburgyte.

Some geologists say that there was formerly a pool of oil in this vicinity.

in that part of Pilot Knob which has worn away, similar to that found at the Thrall oil fields. As no cover was left for the oil after the erosion took place, as there was at Thrall, the oil has gone away.

In parts of the volcanic stuff, said to have been deposited at the time of the second eruption, under the sea, which extends northward into Arkansas, some diamonds have been found. These diamond bearing rocks are similar to those found in Africa.

BATTLE AGAINST TUBERCULOSIS SUCCEEDING

The battle against tuberculosis seems to be succeeding to a degree not dreamed of by the advocates of the work 10 years ago, states D. E. Breed, executive secretary of the Texas Public Health Association.

From the Public Health Reports it is shown that the death rate from tuberculosis has declined over 40 percent since 1911. This statement is made after the study of a group of 13,000,000 policy holders in a certain life insurance company. The decline in the tuberculosis death rate can no doubt be traced to some extent to the educational work of the several public health organizations.

These reductions in the death rate are greatest where the tuberculosis death rate is highest, where it creates the most damage in broken and dependent families and removal of the wage earner from industrial life when his productive efforts count most.

The tuberculosis death rate for white males between 25 and 40 years of age in 1911 in the group referred to was 224.6 per 100,000, as compared to 135 per 100,000 in 1920.

Using these extremely low figures in connection with the population of Texas, it means that tuberculosis caused at least 6,299 deaths in Texas during 1920.

"You love my daughter?" said the old man.

"Love her!" he exclaimed passionately, "why, I would die for her! For one soft glance from those sweet eyes I would—"

"Hold on, my boy, hold on," said the old man as he shook his head. "I'm something of a liar myself, and I think one is enough for a small family like mine."

SILLY IDEAS

Everybody clings to a lot of clap-trap.

One foolishness common to townsmen the world over is the idea that the farmer is a hick. That somehow he isn't quite as bright, or as clever as a business man, or as well read as the townsman.

The farming class in this country have always averaged higher in native wit and ability than the town folks. Of late years the American farmer has been read, better educated, and a far better business man than many of his town brethren and sisters. Anyone doubting this is invited to read any farm paper of national circulation and note the contents thereof, and then to read a typical "smart" magazine that appeals to the strictly urban intelligence, and note what sort of clap-trap it contains.

The American farmer has more time to read, more isolated opportunity to think, fewer unnecessary things to do, and he gets on the job earlier in the morning to do 'em.

And while every other business has nearly broken its back scrambling through this post-war deflation, the farmer has taken the biggest liquidation of any business, has continued to buy in a dear market and sell in a cheap one, and has generally weathered the storm without Federal aid or public sympathy.

Another thing: Maybe you have noticed that when the farmer boy comes to town to get a job he gets it and he seldom visits the bread line; whereas, the average town man who emigrates to the country to show 'em how to farm at a profit frequently goes broke; the farmer in town can play the town game and win, but the city man can rarely make a living in the country.

Seeing that our bread, our meat, our butter, our eggs, our blankets, and our sheets, everything we eat or wear comes from the country, and that the cities are never more than one week ahead of starvation, unless the regular flow of rural foodstuffs keeps coming in, it behooves us to realize the fact that these unseen workers who keep us fed are fellow men of high intelligence, of as efficient ability.

Consider this: When did a reform, an uplift, ever start in town?

The farmers of the nation have inaugurated every forward movement the nation has seen, and the farmers of every country are always the last to be swept away by passion, revolution or mob hysteria. A farmer is self-sufficient if he makes a living,

DRILLING REPORT

Corrected to May 25, 1921.

The following drilling report was compiled and furnished The Enterprise by W. A. Bennett and is accurate, according to best information, and will be of much interest to the public.

Table with columns: Company, Well, County, Sec., Township, Block, Depth, Remarks. Lists various drilling operations across different counties and townships.

The above list does not include many shallow wells in the Toyah field, and only those in actual operation in the Pecos field. I know of no oil field that at the same stage of development (20 months) that had so many active operations, and that migratory or seepage oil has shown to a remarkable amount proves beyond question that the big pools are surely here. It is certain that some of these operations will go into them when they get deep enough, which may be anywhere from 2500 to 3000 feet.

usually his own magistrate and grand jury. Consider how few civil and criminal cases come from the country; the countryside needs few laws and few officers, for every man dwells in his own kingdom, and as he gives justice to his neighbor so it is meted to him again as a matter of course.

RIGHT KIND OF STUFF

The following editorial from the Cisco Round-Up rings the bell of common sense every time and will be read with hearty approbation by every reader of The Enterprise:

Senator Willis of Ohio, should have a place upon the "Honor List" of American statesmen. He had the good sense, during the debate over the immigration bill, to make a speech that should be printed in red letters in the Congressional Record.

Mr. Willis said: "Mr. President, I desire to say only a word or two in reply to the Senator from California (Hiram Johnson). I think, senators, that we have come to the time when we should be gin to legislate for the people of this country. When measures are proposed for legislative sanction immediately the suggestion that is presented is: What will some foreign nation or alien think about it. We have organizations of the friends of the various foreign countries; let us have an organization of the friends of our own country for a while and see how that will work."

Mr. Willis thinks it best to legislate in the interest of the United States for a while. His statement touches the hearts of the American people. It thrills them with a hope that congress will yet see the light and devote its time and attention to legislation for the benefit of the more than one hundred millions of people who have

sent their representatives to Washington to make laws for the United States of America, and frequently blush with shame at the acts of certain legislators, who seemingly have forgotten that they are Americans.

HAPPINESS

I had a little shanty and I was happy there with life and niece and aunty, and grandma in her chair. I did not owe a shilling on the small abode, no creditor came drilling to dun me up the road. And I was always saving against the day of rain, and all the time behaving like some one safe and sane. My aunt, whose name was Alice, was dippy as could be; she said a costly palace was none too good for me. And grandma in her sweater, backed aunt, and said, "Tut, tut!—you should have something better—why live in this punk hut?" My niece endorsed their kicking and nagged all day and back, for she was tired of sticking in such a twady shack. With women thus embattled what could a poor man do? At last they got me rattled and all my coin I drew; I mortgaged and I borrowed and built a costly home, and ever since I have sorrowed, the care has creased my dome. I owe the village plumber, who plied his art with skill; and at my house each comer is someone with a bill. I owe the gifted painter, whose language freely flows and smokier and quaint-er their language daily grows. I owe the paperhanger, the joiner for his beams, and I can hear their clangor at midnight in my dreams; they all are rude and ranty, and I dissolve in tears when thinking of the shanty that knew my younger years.—Walt Mason.

JUST A BOY

Yes, they may be a little harder to manage than girls and that they play rougher, but a boy is a lovable kind of creature all the same. He's red-blooded; he likes excitement and as the Englishman would say, "he's deucedly interesting."

We were out with a thoroughbred specimen of the sex the other day, one of those little fellows as full of life as a frog pond is of croaks. He had his swim in the river, he climbed up a tall tree to where it was dangerous to be, he chunked out a couple of wasp-nests that were gracefully hanging under a rock cliff, and then, as all boys do when the mischief is over, grew sentimental: "I must gather a bouquet of wild flowers for

Auntie," he said. The blue-bonnets and the pinks and the hollyhaws were growing profusely and with childish glee he eyed them. But just at that time a green lizard ran by; as quick as lightning he let fly a missile at the lizard and killed it. Then he declared, "I must hurry now and get my Auntie the flowers, she loves them so." For a moment he studied,

however, and after scratching his head he picked up a long stick and run it underneath the lizard: "I guess I'll take her this instead of the flowers, though."

The glee came back to his eyes; he knew that it meant excitement for Auntie would be so interested in a dead lizard, and he hurried to her with it. She gave the usual scream

and appeared to be frightened. He saw in an instant that his efforts were not appreciated, so in a rather disgusted tone he said, "Well, I'll have to take the blame thing away and mash it to pieces."

You have to know boys to understand why they are always more enthused over a bug, a horned-frog or a snake, than all the lovely flowers

that grew in a garden. But when they are boys they are certainly that way. At the end of the day, however, when their little tired feet are washed and they are tucked in bed, they can look up at you with eyes as sweet as sweet can be, and they can make you love them by the way they say goodnight.—Walt News-Tribune.

To Stop a Cough Quick
take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues. A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup. The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trate Salve through the pores of the skin soon stops a cough. Both remedies are packed in one carton and the cost of the combined treatment is 35c. Just ask your druggist for HAYES' HEALING HONEY.

DECORATION DAY

The passing of another year Brings our proud memorial day, When we strew the graves of heroes dear With fairest garlands of the May. To them we owe a boundless debt, That we can never hope to pay. So scatter flowers lest we forget Our nation's dead today.

Our country's welfare was their aim. Unswerving they answered her call, Seeking neither gold nor fame, With her to triumph or to fall. Whether mid suffering cold and want, Or victory's glory it mattered not. Neither could triumph elate or defeat daunt, For 'twas a nation's liberty they sought.

Tho' the year's have come and gone While o'er their graves the green grass grows, The freedom they won still reigns on, And Columbia with prosperity glows. Their deeds are a grand inspiration To American manhood today, Their loyal service to their nation, Has erected a monument to stand for aye.

Some sleep today in spots unknown Where none their graves may find, Unmarked by either sign or stone No garlands for them may be twined. But nature decks their graves each year, With her own grass and blossoms sweet. And tho' no martial music comes near The birds warble a symphony complete.

These heroes unknown are just as dear As those that in the church yard sleep, And a memory grateful and clear For them our nation will ever keep. Then may each soldier's grave today No matter where they may be Be held in tender reverence for aye A nation's tribute to their memory.

—Mrs. W. A. Fullbright.

KRUTTSCHNITT'S FIVE POINTS.

Public sentiment is more sympathetic toward the railways than it was, but not to the extent of thinking that the railway question is the only question or that the railway's solution of railway troubles is to be accepted without examination as the only solution. If the railway question stood alone, the five "points" set forth by Mr. Kruttschnitt might be conceded more easily. They would certainly give the railways more income, but also they would tend to relax the necessity of their earning their living by efficiency in the public service. To the country the efficiency of the railways rank at least with the solvency of the railways, for their solvency is only a means to their service. Not so long ago shippers thought it safe to attack the credit of the railways as a means of cheapening their service. Events has proved that was not in the public interest.

During the war the government was even more reckless of railway credit, and ran up a bill of over a billion for the tax payers to pay to repair the damage done to the service of the railways by wear and tear on the plant and disorganization of their personnel. This is the most pressing and present phase of the railway question, and it would be well to treat it by itself and not mingle it with the labor or rate questions. Either of them is large enough to tax the best energies of the regulators, and they have their points of contact, but one thing at a time is a good rule. All that Mr. Kruttschnitt says which is germane to the question before the Labor Board may be conceded. Railway labor is overpaid for the service it renders. Either the wages should be reduced or the service for the same pay should be increased. It ought not to take the Labor Board a month, as was intimated yesterday, to decide a question so amply proved by the railways that the workers did not even try to give evidence in opposition.

In his five points Mr. Kruttschnitt proposes to check competition in service of the public by other common carriers by road or water, by canal or ocean routes. That is a large order, with much to be said on both sides. In dollars the automobile interest ranks with the railways themselves. The country needs both and is not willing to sacrifice either to the other. The suggestion that all common carriers should be regulated alike certainly requires a different sort of regulation from any yet given if it is to be universal. The Panama Canal was built when it was thought desirable to reduce railway rates by regulation. The competition thus provided seems destructive in the present state of railway finances, for it disturbs rates to the heart of the continent. On the other hand, the country spent \$322,939,563, and has a correspondingly heavy interest on the canal debt to pay for a generation yet. But the canal last year cost \$425,385 above what it earned, besides the interest bill, and all for the sake of providing uneconomic competition for the railways.

There is a similar condition respecting

the three-billion-dollar government marine. It is eating its head off in idleness, and yet its existence demoralized all ocean rates, which defy domestic regulation by any country. The world's freight is carried mostly by tramps, the liners taking only luxury freight and passengers. The tramps worry the liners as the motor trucks worry the railways, and the problem of regulating either is baffling. The railways would like to see the Panama tolls raised. Admiral Benson cultivates friendly relations with the "conferences," the cooperation for the checking of cut-throat competition, which but a few years ago our government prosecuted as conspiracies in restraint of trade. Here are great questions as much as domestic questions, which are rather put than solved after a generation of regulation. Should the government regulate economics? Or should the Government leave economic questions to economic solution, merely taking care that the conduct of the private regulators is consistent with good merchant law?—New York Times.

VIOLATION WEIGHTS AND MEASURE LAW ON DECREASE

Violations of the Weights and Measure Law, according to Pat Daniel, Chief Inspector of this Division of the Markets and Warehouse Department, are on the decrease. Although hundreds of examinations of weighing and measuring devices have been made recently by the inspectors of this division, they report only minor variations in most of the devices examined which were easily corrected. Wilful violations have practically been eliminated.

"The condition is so much better than when the Division first went into operation that it is most encouraging," said Mr. Daniel, in speaking of the above. "In the first few months of our operation we confiscated over two carloads of weighing and measuring devices that were unredemably incorrect. One of these, which is on display in the department at the present time, is a computing scale, so arranged that a dealer can sell his products at cost and yet make 20 percent profit on all sales made on its weights. Hundreds of incorrect measures, gasoline cans and the like were condemned as incorrect and confiscated by the Department at that time. Now conditions are so improved that it is only occasionally that it is necessary to confiscate these devices though quite a few are condemned for repairs and until later inspection by this department proves them repaired and correct.

"The standardization by the Commissioner of this department of the weight of bread at 16 ounces to the loaf and butter at 16 ounces net to the pound has proved highly satisfactory to dealers and has resulted to a saving to the people of the state of thousands of dollars annually."

THE DEPENDABLE MAN

There is a type of man who is built for success. He may have genius or just ordinary talent—no matter. The point is that he always "arrives." While others plod a weary way, he gets ahead.

Those who take note of his progress often cannot account for it. So they say he is "lucky." Or they whisper it about that he has a "pull with the boss."

But the secret is deeper than that. He is a man who is absolutely dependable.

Make yourself dependable, and you come as near being indispensable as any of us can hope to be. You will be the last one your employer will wish to part with, and the first one that he will want to promote to greater responsibilities.

But do not be deceived. Dependableness is a rare accomplishment—so rare that every executive is on the lookout for it wherever it may be found. It cannot be acquired by wishing for it. It is the prize that comes from self-mastery.

What is a dependable man? You can tell him by these ear-marks:

First, he is one that you can rely upon to do his own thinking. Business requires thinking, and someone must do it. The dependable man never sidesteps his share nor tries to pass it along to someone else. You always find him in the alert. His brains do not flit away on vacations, leaving his job without a guardian.

Next, he is one whose judgment you can trust. He doesn't do foolish things. He knows his own abilities, and, not being conceited, he is equally aware of his own weaknesses. He has the happy faculty of understanding other people's viewpoints and of seeking their advice when he ought. Also he knows when to act on his own initiative.

Finally, he is a man you can listen to, taking stock in whatever he says. You are sure that he speaks only after due reflection. He does not talk to the galleries or for the purpose of "grinding his own ax." He makes his suggestions and pleads his cause solely in the interest of the business.

Such a man is safe. Important duties may be entrusted to him and he will handle them with diligence, good sense, and earnestness.

If you are looking for the quickest route to opportunity, learn to be this type of man.

Be dependable—a burden lifter. By lightening the anxieties of those who must give account for your doings, you will make yourself their favorite. And they will help you achieve your ambitions.

—J. Ogden Armour.

THE REAL ARISTOCRACY

A. Daniel come to judgment! In this age of divorce courts working overtime, hear this from Judge Simpkins of the faculty of the law school of the State University: "The happiest homes," he says, "are those in which one finds the best housekeepers. This has taught me that calories, wisely administered, is the best insurance against divorces. My advice to young men is to find graduates of the department of home economics before they take any marriage vows. To young ladies, I say, 'learn domestic economy and it will be a simple matter to find the husband upon whom to practice what you have learned.' And if that doesn't boost the enrollment at C. I. A. at Denton, what would? Digestion, first aid to Cupid—who would have thought it!"—Terrell Tribune.

A young woman who learns nothing about housekeeping before she marries and refuses to learn after marriage is headed for the divorce court. The time has passed when any man's wife can say that she is too good or too smart or too precious to give her attention to the humdrum rites of housewifery, or even to devote her hands and feet to the transactions involved in cookery and sweepery. Some housework is good for a woman. To be merely a pet while young and supple, or to be merely a drone when middle-aged and wealthy, is not only opposed to a woman's best physical interest, but contrary to the obligations of wifehood. It is the man's duty to provide and the woman's duty to make the best use of the provision, whether they be millionaires or wage earners. Capability is as much the mark of a superior woman as it is of a superior man. There are many causes for divorce other than the failure of the house to become a home. But undoubtedly Judge Simpkins is correct in ascribing to bad housekeeping and bad cookery a state of mind that often leads to the separation of husband and wife. The capable are the aristocratic.—State Press in Dallas News.

A man named Dodgin was recently appointed foreman at the gas works, but his name was not known to all the employees. One day while on his rounds he came across two men sitting in a corner, smoking, and stopped near them.

"Who are you?" said one of the men.

"I'm Dodgin, the new foreman," he replied.

"So are we," replied the other workers, "sit down and have a smoke."

Dealers everywhere are selling Goodrich Silver-town Cords, Goodrich Fabric Tires and Goodrich Red or Gray Tubes—all one quality—at the 20% reduction in prices which Goodrich made effective May 2nd, 1921.

Goodrich 30x3½ anti-skid safety tread fabric tire now available at the 20% Price Reduction which went into effect May 2nd

REQUESTED TO APPEAR IN WASHINGTON MAY 26.

Special To The Enterprise.
Birmingham, Ala., May 21, 1921.—
Mr. J. A. Rountree, Director General of the United States Good Roads Association, and also Director General of the Bankhead National Highway Association, has been requested by United States Senator, Charles E. Townsend, Chairman of Committee on Postoffice and Post Roads, to appear at Washington on May 26, for the purpose of giving his views, and also the views of the two organizations he represents, to the Committee on Postoffice and Post Roads, which has charge of the Townsend bill and other road legislations, now pending in the United States Congress.

Director General Rountree will be joined in Washington by President Cameron and members of the Executive Council of the Bankhead National Highway Association, and will remain at the Capitol for the next ten days or two weeks, arranging details in regard to the official map and recommendation of the Bankhead Trans-Continental Convoy, and other details of interest to the Bankhead Highway.

At the annual meeting of the United States Good Roads Association and the Bankhead National Highway Association in Greensboro, N. C., on April 18 to 23, a committee of twenty-five prominent citizens, from all parts of the United States, was appointed to go to Washington, present resolutions that were adopted by the association, as well as to urge that continuation of Federal Aid. Director General Rountree has notified this committee and requested them to meet him in Washington, at the Raleigh Hotel, on May 26, when a conference will be held, plans mapped out, and selections made from the committee to give testimony advocating Federal Aid, before the Postoffice and Post Roads Committee, which meets on May 26.

J. A. ROUNTREE,
Director General.

EDUCATION.

Advertising is education. It is the text book of buying. Wise expenditure is the basis of prosperity of the average family. Your banker will tell you that whatever your earnings may be, your individual problem is not solely the increasing of that earning power. Wise investment of what you have is fully as important.

Who pays for advertising?
You pay—your neighbor pays—we all pay. Why not? Do we not pay millions as citizens of the United States for the primary, grammar and high school education which fits us to go out in the world and earn a living? Advertising is merely the textbook of wise spending. It teaches us to spend wisely what we earn.

Through all the ages, education has been the hard-won vantage of the masses. The right of the world's sum of information has been won by the average human being only at huge cost in time, in privation and in actual money. And yet the millions which we, as a nation, spend for all our free (?) public schools, plus the millions privately spent for college and university education, accomplish no more for your good than the pennies you spend for newspapers which purchase the investment education offered you by modern advertising.

The man or woman who is a consistent, careful reader of newspaper advertising has access to the most valuable education ever offered at any price anywhere. It is the teaching of common sense; of better standards of living; of higher standards of health; of wiser expenditure of money. All the knowledge of the world is valueless without common sense. And if you learn the lesson taught by modern advertising, you will learn common sense in the investment of whatever sums of money you earn.

Read the advertisements!
There is the finest school in the world and the cheapest. The subject taught is the most vital to your happiness. The vitality of their message is proven in the fact that advertising has made this the cleanest nation on earth as well as the best clad and the best fed.

As teachers the advertisements play no favorites and indulge no personal prejudices. Each advertiser—national or retail—sets before you his commodity, his service, and his price. It is your privilege to compare carefully and without other means of persuasion than the action of your own judgment. No element of personality enters, as in the case of personal selling. Your mind and the clear cut statement of the advertiser-teacher react against each other until judgement and action, either for or against the offer result—Cisco Round-Up.

DODSON WARNS CALOMEL USERS

Calomel is quicksilver. It attacks the bones and paralyzes the liver. Your dealer sells each bottle of pleasant, harmless "Dodson's Liver Tone" under an ironclad, money-back guarantee that it will regulate the liver, stomach and bowels better than calomel, without sickening or salivating you—15 million bottles sold.

REQUISITES TO WEST TEXAS CITIZENSHIP

The foundation stock of West Texas was from the cleanest, hardest set of men and women America has ever produced. These first newcomers braved many hardships to lay the foundation for the civilization, we are now enjoying. They were inherently optimistic and loyal to the greatest, fairest government on earth, and it was that indomitable spirit of individual hope and national loyalty that first gave to West Texas the name of being one of the most progressive sections of the Empire state.

During the past two years people from every quarter of the United States have come into West Texas. They are, for the most part, good American citizens, who have something of the pioneer spirit of our forefathers. Many of them are today numbered as our best citizens. There are men right here in Cisco, in fact, who are just as loyal to the government at Washington, and just as conscientious and consistent in their labors for this city and section as the pioneers themselves—yet these men have been here only a short while, some less than two years. Naturally they have been reeled with open arms, because all cities and all sections need the constant infusion of new blood if they are to continue progressive and constructive. All that Cisco and West Texas desires to know is that those who come among us for permanent residence are real Americans, and are willing to work and help make and keep this one of the most desirable spots in which to live.

This, however, is a necessary requisite to permanent residence in Cisco and West Texas!

The local police and the department of justice officials have just uncovered a den of anarchy and revolution in Cisco—a place that was a link in the chain of the Communist organization in the United States. From this place damnable propaganda has been filtering out which urged the overthrow of the United States government and the bringing about of conditions now existing in suffering Russia.

The seditious literature taken by the officers in their raid included newspapers published in English in cities of the United States which contained open attacks on the government and urged the workers to provide themselves with firearms that they might successfully combat the police, the militia and the federal soldiers.

We do not feel any uneasiness about the local situation being handed in a manner best conducive to future law and order and good citizenship, and in a way that will spread the news throughout the hateful underground channels of anarchy that

Cisco, Texas, is the most unhealthy place on the face of the earth for anarchists and political trouble-makers.

Cisco must be made 100 per cent American. Nothing else will satisfy.—Cisco Round-Up.

FINANCIAL REVIEW

Prepared For The Enterprise By The First National Bank In St. Louis.

The public debt of the United States on April 30, 1921, amounted to 23,996 million, an increase of almost 15.5 millions over the total of the previous month. This increase was primarily due to the issuance of certificates of indebtedness and to expenditures in meeting the interest on the public debt. This surplus expenditure for the month of April is largely the result of smaller receipts because in April excess profit and income tax receipts are quite moderate. The revised figures covering the receipts from the income and excess profits tax during the month of March show a decline of almost 140 million dollars or 20 per cent compared with the same month of last year. Receipts from these two sources for the ten months of the present fiscal year aggregated 2,589 millions as compared with 3,124 million in 1919-20. The month of April of this year showed a deficit of 198 million, receipts amounting to but 296 millions against expenditures amounting to 494 millions. For the year to date, however, an excess of receipts over expenditures is reported amounting to 373 millions as compared with a deficit of 402 millions of the same period of the preceding year.

The continued heavy expenditures of the government are causing considerable concern since they still are close to 5 billions a year, 3½ billions of which are for war purposes. Estimated expenditures for the coming fiscal year run at the rate of about 4 billion dollars annually.

The Secretary of the Treasury, in a recent letter to the Chairman of the House Ways and Means Committee stated that expenditures should not be permitted to continue at the present rate. He pointed out that the county is now staggering under the existing burden of taxation and that relief from taxation should be afforded. In the latest revisions appropriations have reduced considerably but they still continue at a very high figure.

SHERIFF'S SALE

The State of Texas
County of Reeves.
By virtue of a certain Execution issued out of the Honorable County Court of Reeves County, on the 4th day of May, 1921, by S. C. Vaughan, Clerk of said Court, against Jose Bargas for the sum of Two Hundred Ninety-Three and 85/100 (\$293.85) Dollars and costs of suit, in case No. 665 in said Court, styled O. J. Green Mercantile Company versus Jose Bargas and placed in my hands for service, I, E. B. Kiser, as Sheriff of Reeves County, Texas, did, on the 4th day of May, 1921 levy on certain real estate, situated in Reeves County, Texas, described as follows, to-wit:
Part of Section 8, in Block No. 5, H & G. N. Ry.

Co. Survey; beginning at iron pipe set in ground for S. W. corner of tract of land sold by W. D. Johnson to Juan Arrizola, thence N 33 1-4 W. 100 feet to N.W. corner of Arrizola tract; thence S. 56-45 W. 100 feet; thence S. 33 1-4 E. 100 feet; thence N. 56 45, E. 100 feet; to beginning; all in Reeves County, Texas, and levied upon as the property of said Jose Bargas. And on Tuesday, the 7th day of June, 1921, at the Court House door of Reeves County, in the town of Pecos, Texas, between the hours of ten A. M. and four P. M. I will sell said premises at public vendue, for cash, to the highest bidder, as the property of said Jose Bargas by virtue of said levy and said execution.

And in compliance with law, I give this notice by publication in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in the Pecos Times and Enterprise, a newspaper published in Reeves County.
Witness my hand, this 4th day of May, 1921.
E. B. KISER,
Sheriff Reeves County, Texas.

WHY THAT LAME BACK?

That morning lameness—those sharp pains when bending or lifting, make work a burden and rest impossible. Don't be handicapped by a bad back—look to your kidneys. You will make no mistake by following this Pecos resident's example. Ask your neighbor.

Mrs. R. E. Miller says: "Several years ago my back was weak and lame and ached constantly. My kidneys acted too often and that annoyed me very much. It didn't take many boxes of Doan's Kidney Pills to cure me."

Mrs. Miller gave the above statement October 27, 1913, and OVER THREE YEARS LATER on April 7, 1919, she added: "I still recommend Doan's Kidney Pills highly. They are fine. I use a few of Doan's occasionally and they keep my kidneys in good condition."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Miller had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

LIFT CORNS OR CALLUSES OFF

Doesn't hurt! Lift any corn or callus off with fingers.

Don't suffer! A tiny bottle of Freezone costs but a few cents at any drug store. Apply a few drops on the corn, calluses and "hard skin" on bottom of feet, then lift them off.

When Freezone removes corns from the toes or calluses from the bottom of feet, the skin beneath is left pink and healthy and never sore, tender or irritated.

I'd walk a mile for a Camel

The pleasure is worth it. There's no substitute for Camel quality and that mild, fragrant Camel blend.

The fellow who smokes Camels, wants Camels. That's because Camels have a smoothness, a fragrance and a mildness you can't get in another cigarette.

Don't let anyone tell you that any other cigarette at any price is so good as Camels.

Let your own taste be the judge. Try Camels for yourself. A few smooth, refreshing puffs and you'd walk a mile for a Camel, too.

John Bush, from Saragosa, was in town Tuesday.

N. R. Bozeman and wife, from Balmorhea, were in town Tuesday.

County Commissioner A. W. Hosie was over from Toyah on business Saturday.

John Odell and brother, Raymond, of Balmorhea, were in Pecos, Tuesday, transacting business.

E. A. Humphries, a prominent alfalfa grower of Saragosa, together with his son, was trading in Pecos Tuesday.

Miss Evelyn Somes will leave the forepart of next week for Ranger where she will join her father, Mr. Somes, who has employment there.

Bob Morrison was in town last week from Loving, N. M., attending commencement and visiting home folk.

Wynn Hamilton, from Saragosa, was in Pecos Tuesday, transacting business for the Toyah Valley Marketing and Warehouse Association.

Hon. M. J. Epley of New Orleans, La., president and general manager of the Toyah Valley Sulphur Co. spent a few days at the plant last week.

John Howard and Elmer Reynolds went fishing Tuesday afternoon. They were caught in the downpour of rain and stood waist deep in water all night.

Mrs. Tatum Moore, and daughters, Mary Helen and Dorothy left for their home near Balmorhea Tuesday, after spending a week visiting with her sisters, Mrs. Hardin Ross and Miss Evelyn Somes.

Mr. and Mrs. W. L. Card were up from Odessa last week attending commencement exercises and visiting their son, Tom, and his family. They also visited at San Martine before returning home.

Mr. T. W. Webster of the firm of Perry & Webster the plant now being installed by the Toyah Valley Sulphur Co. has spent the past month at the plant giving the construction and test his personal attention and is more than pleased with the results.

Mrs. Rosa Barnes left Tuesday for her home in Paducah, Ky. Before leaving our little city, Mrs. Barnes was a pleasant visitor to this office and gave instructions for The Enterprise to follow her to that place. She said she did not want to miss a single copy.

John Quincy Adams, an all round good fellow and stockman, owner of Toyah property and one of the best barbecuers of Reeves county meats in the county, was a business visitor in Pecos Saturday. John is now acting as chief tool dresser at one of the Owens wells in Cuberson county.

The Orla postoffice has been established with Dr. J. A. Daniel as postmaster and the first bag of mail was delivered there Monday. This postoffice will serve quite a number of people and will be of great benefit to the citizens in that end of the county.

Mr. and Mrs. Hardin Ross were in from the ranch the forepart of the week cleaning up and otherwise brightening the Michigan which has just been vacated by the teachers who have occupied it as a teachers' home for the past year. They are now offering rooms and apartments for rent.

Mrs. P. B. Smith and daughter, Miss Marie, left after the closing of school for a visit with Mrs. Smith's daughter in El Paso. From there they will go to Taylor to spend the summer with another daughter. It is understood they will return to Pecos in the fall and Miss Marie will again open her school for the instruction of the piano. Miss Marie had a splendid class during the last term and is a very able and capable instructor and her pupils showed marked improvement and their renditions were the cause of many compliments for their personal work as well as the splendid work of their teacher.

Jno. C. Smith of Bucklin, Kans. and a brother, were looking over the oil field this week. They drove through in their Buick and are taking it easy. They own land near the Laura well and, Mr. Smith says the wheat crop in his country promises to be heavier than at any time in his knowledge of the country and is very fine all along the trip to Guymon, Oklahoma. From there on this way the wheat crops do not look so good. He states labor has taken a drop in his section and he believes three to four dollars per day will be the average price paid for harvest hands. Last year seven to ten dollars was paid for the same labor.

PECOS MERCANTILE CO.

PROCLAMATION

To All To Whom These Presents Shall Come: WHEREAS, there was, on the 9th day of May, A. D. 1921, presented to the Commissioners' Court of Reeves County, Texas, a petition signed by more than two hundred (200) qualified property tax-paying voters of Reeves County, Texas, petitioning said Court to order an election to be held to determine whether the Commissioners' Court of said Reeves County shall be authorized to annually levy and collect a special ad valorem tax on all the taxable property in said Reeves County of and at the rate of not to exceed fifteen cents (\$0.15) on the one hundred dollars (\$100.00) valuation of said property, such tax to be used for the support and maintenance of the public roads and bridges in said Reeves County;

NOW, THEREFORE, KNOW YE THAT I, JAS. F. ROSS, County Judge of Reeves County, Texas, by virtue of the authority vested in me by the Constitution and Laws of the State of Texas, do hereby order that a Special Election be held in said County of Reeves and State of Texas, on the second Saturday in June, A. D., 1921, same being the 11th day of June, A. D., 1921, for the following purposes:

To determine whether the Commissioners' Court of said Reeves County shall be authorized to annually levy and collect a special ad valorem tax on all the taxable property in said Reeves County of and at the rate of not to exceed fifteen cents (\$0.15) on the one hundred dollars (\$100.00) valuation of said taxable property, such tax to be used for the support and maintenance of the public roads and bridges in said Reeves County; such tax, if voted, to be levied and collected for the year A. D. 1921, and annually thereafter unless and until it be discontinued as provided by law.

The polling places for such election shall be the same as are provided by the Commissioners' Court for a General Election, and all persons may vote in such election who are qualified resident property tax-paying voters of said Reeves County.

IN WITNESS WHEREOF, I have hereto set my hand in my official capacity and caused the seal of the Commissioners' Court of said Reeves County to be hereon impressed, at the City of Pecos, Texas, on this 12th day of May, A. D., 1921.

(Seal) JAS. F. ROSS, County Judge, Reeves County, Texas

Col. and Mrs. John Z. Means of El Paso are in Pecos visiting their daughter, Mrs. W. H. Browning, Jr., and family this week.

Mrs. Will Miller of El Paso is visiting her husband's parents, Mr. and Mrs. R. E. Miller this week.

Judge and Mrs. J. A. Buck and sons left the early part of the week for a prospecting tour of California.

Mr. and Mrs. Ira J. Bell left on the Tuesday night train for Chicago. They will be absent for several weeks.

Mr. and Mrs. Carl Smith left this week for a prospecting trip in the east. Their first stop will be in Dallas and they will make a trip to Mississippi before locating.

Mrs. Ollie King and little sister, Fay Lewis Dearing and Joe Edna Hudgins left Tuesday for a three weeks visit to relatives at Stanton, Midland and Big Spring.

The genial and popular Mr. Fred Higgins applied for a marriage license Tuesday. Sully Vaughan refused owing to the tender age of the expectant bride to be. The application is filed for future reference. Mr. Higgins is a finished pianist, and very popular with the ladies.

Walter Slover has sold his garage and will move over in New Mexico and live up a preemption. In the meantime he will come back to Pecos where he will work enough to get money to purchase fr'joles while he and his wife are complying with the law as regards residence and improvements. Mr. Slover wishes The Enterprise to extend his heartfelt thanks to his patrons for their work and assistance.

We are on the grounds, know true conditions and do not misrepresent. Information free.—Southwestern Leasing Company, 216 Riegler Bldg., Little Rock, Ark.
