

THE ENTERPRISE

AND PECOS TIMES

VOLUME XLI. NUMBER 5.

PECOS, TEXAS, FRIDAY, SEPTEMBER 16, 1921.

\$2.00 PER YEAR, \$1.25 FOR SIX MONTHS.

HUNTING SEASON-- PREPARING FOR IT

The dove season opened September 1st, and the bang of the hunter's gun is again to be heard and tables with the hunter's conquest are laden.

The duck, snipe, geese and brant season opens October 16. The deer and wild turkey season opens November 1st, and quail and Mexican pheasant season opens December 1.

In preparation for the opening of the hunting season, a supply of hunting licenses has been sent out to county clerks over the state by the game, fish and oyster commission.

The law specifies that a person may hunt in the county of his residence without a license but in order to hunt in any county other than that of his residence a license must be secured. The fee for these resident licenses is \$2.00. The non-resident licenses, which is required of persons who desire to hunt out of the state of their residence cost \$15.00.

Following is the bag limit set forth by W. W. Boyd, game, fish and oyster commissioner of Texas:

"Three buck deer during the season from November 1, to December 31, inclusive each year.

"Three wild turkey gobblers during any one year from November 1 to December 31, inclusive in the following counties: Dimmitt, Uvalde, Medina, Kendall, Kerr, Real, Mason, Edwards, Menard, Sutton, Crockett, Coma, Hays, Friol, Maverick, Kinney, Val Verde, Terrell, Brewster, Presidio, Crockett, Schleicher, Tom Green, Sterling, Irion and Bandera.

"Fifteen doves in one day from September 1 to December 15, inclusive.

"Fifteen quail and Mexican pheasants (known as Chacalaca) in one day, December 1 to January 31.

"Twenty-five ducks in one day from October 16 to January 31.

"Twenty-five snipe in one day from October 16 to December 31.

"Eight geese in one day from October 16 to January 31.

"Eight brant in one day from October 16 to January 31.

"You are not allowed to kill more than the aggregate of twenty-five in one day of duck, geese, brant, plover, snipe or shore birds.

"You are not allowed to kill at any one time in the year any antelope, mountain sheep, prairie chickens, pheasants (except Chacalaca), woodcock, or woodchuck.

"You may kill rabbits, hawks, crows, buzzards, owls, English sparrows, rice birds and black-birds in any number and in all seasons.

"You must not buy, sell or barter any wild game or game birds.

"You must not catch, kill or have in your possession nor ship at any time more than the aggregate of seventy-five ducks, geese, brant and birds.

"You must not kill a turkey hen at any time.

"You must not kill any doe or spotted fawn at any time.

"You must not catch, kill or have in your possession at any time any wild song birds. You must not hunt any wild game or wild birds at night with any kind of light or lantern."

PECOS BOYS WIN OVER TEACHERS

Twenty-five to twenty was the big score of the indoor baseball game played on the Methodist electric lighted court Monday night between the visitors at the teachers' institute and Pecos. The game was witnessed by a crowd of about 200. The visitors were unable to marshal enough players to fill their line-up, and local men were substituted.

The problems of lighting the grounds has not been solved to the full satisfaction of the players, but efforts to improve the lighting effect are being made.

The line-up of the two teams follows:

Teacher's--Norman, pitcher; Moran, Jr., catcher; Rutledge, first base; Watson, second base; Humphries, third base; Moran, Sr., short stop; Kessler, Jr., left field; Smith, center field; Eisey, right field.

Pecos--Palmer, catcher; Wadley, pitcher; Bert Ross, first base; Pruett, second base; Woods, third base; Ruhlen, short stop; Kessler, Sr., left field; Beck, center field; Norwood, right field.

T. & P. BREAKMAN KILLED NEAR PYOTE

W. V. Campbell, Texas & Pacific breakman was killed near Pyote Tuesday. He left Pecos on the tender of the engine, say those who last saw him here and was not missed until he was supposed to throw a switch near Pyote when a search was made for him and he could not be found. The East bound T. & P. passenger train which followed the freight upon which he was running picked up the body near Pyote. The body of Campbell had been cut completely in two. No one appears to know more of how he came to his death than the facts given above. Campbell was well known to all the railroad men and many of our citizens here.

PECOS BOY IS HIGHLY PRAISED

The following from Fort Worth came too late for last week but will be relished by our young men this week:

Football training camp opened with a rush this week at Texas Christian University. Training preparations are being rushed for a game in Amarillo, Texas, September 24th with Canyon State Normal College.

All of the old letter men have reported and are working hard for many new faces are seen on the squad and competition will be keen this season. Among the old men who have returned and are showing well is a Pecos high school product, Hillard Camp. Camp, although a freshman, made the squad last season and did some excellent work for the Christians who won the T. I. A. championship. With the past season's seasoning, and the training received, Camp is expected to do some great things this season. He is fast, handles the ball well, hits the line hard, and should be hard to stop. West Texas fans will have two opportunities to see him in action, as the "Frogs" also play a game at the West Texas Fair, in Abilene, Texas with Simmons College on October 1st.

OFFERS PLAN FOR COTTON MILLS

Pecos, Texas, Aug. 29, 1921. The Enterprise, Pecos, Texas.

In the issue of May 6, 1921, you have an article by D. E. Lyday, Commissioner of Markets and Warehouses headed "Texas must Build Mills to manufacture her Cotton." When the community votes you a subsidy as per an article I wrote for you some weeks ago, I am ready to demonstrate a plan by which Texas can have as many cotton mills as the most ardent advocate can desire.

I lived and worked for years in the manufacturing belt of North as well as South Carolina and had a large interest in a mill that finally branched into one of the most important systems in the South.

Yours truly,
THO. H. BOMAR.

PECOS BOYS WIN TENNIS TOURNAY

The last of the series of games in the tennis tourney which consisted of the best players in West Texas and Eastern New Mexico was played at Carlsbad a week ago last Sunday. Walter and Woodie Browning taking the trophies. The Carlsbad Argus has the following to say with reference to the last games played:

In the tennis tournament last Sunday, the games deciding the winners of the Godby cup and the prize tennis racquets offered by the Chamber of Commerce, the Browning brothers of Pecos carried home both prizes, the winner of the cup to be decided on the Pecos court, the brothers tying for that trophy. The games were hotly contested and a big crowd witnessed the play.

PECOS FIRST BALES BRING GOOD PRICES

The first bales of cotton of the 1921 crop sold in Pecos this year brought 20, 21, and 22 cents respectively. The low price went to Mr. Youngblood for a bale of short staple that graded good middling, and came from one of the prettiest fields of cotton in the Pecos valley. The second came from the McKnight farm north of Pecos, being of the Lone Star variety and grading middling. The third was of the durango variety and also graded middling. It was raised on the Sullivan lands north of Pecos. Being of the fine picking the staple contents were not out of the class to demand the larger premium that is expected for staple cotton, although the fields give promise of a crop that will bring a substantial premium.

T. & P. HAS WRECK NEAR VAN HORN

When the last three coaches on the Texas & Pacific passenger train split a switch and were derailed Monday a few miles west of Van Horn two men lost their lives. It is not known just what caused the wreck. Those killed, with several others, it appears, were riding on top of the coaches when the wreck occurred. The wreckage was cleared away, track repaired and trains were running regularly with only a short delay.

THE GAME IS ON !!

COURT HOUSE AND JAIL INSURANCED INCREASED

Additional fire insurance to the amount of \$25,000.00 was taken out on the county Court House and the county Jail and contents on the order of the Commissioner of Court when the attention of the court was called by W. W. Dean to the fact that only \$17,000 insurance was carried on these two county buildings, and that no insurance was carried on the contents.

Mr. Dean stated that the insurance was far below the replacement value of the buildings and that a hardship would be worked on the county in case of fire. After the decision to insure, other agents of the town were called before the court and the additional amount proportioned equally among them.

The court house building is valued at about \$25,000 and has insurance to the amount of \$18,000. The jail is valued at about the same amount and has \$16,500 worth of insurance on the building itself.

Mr. Dean has been checking up the insurance figures on other public buildings and states that the records show that fire insurance to the amount of \$20,000 is carried on the school building. The school building and contents has a replacement value of about \$75,000 according to present building costs.

SUL ROSS NORMAL AMPLY PROVIDED

September 13, 1921. The people of Pecos will be glad to know that the Legislature has, during the session, provided an ample biennial for the Sul Ross Normal College. Approximately \$90,000 has been provided for the coming year's expenses and \$80,000 for the next year, 1922-23.

This generous assessment will insure sufficient funds for standard college equipment in all of the departments, and will allow salaries large enough to hold here the excellent faculty which the college now possesses, and to which is being gradually added other men and women of exceptional training and long years of experience.

Among the new faculty members who recently arrived in Alpine are Mr. W. A. Stigler, Professor of Education and Director of the Training School, who holds the Degree of Master of Arts from the University of Texas, and who has been for the last few years Superintendent of the Canadian City schools, and Miss Grace Bedell, who comes after several years of college teaching from Trinity University, Waukegan, Ill.

Mr. R. L. Marquis, President of Sul Ross College, is a week attendant on the Pecos County Institute. Mr. Marquis has been addressing the institutes in this section of the State ever since the closing of the summer school. He addressed the City and County Institutes at El Paso during the first week of the month, and last week he attended the County Institute at Uvalde, where he addressed an enthusiastic group of teachers and citizens upon the new educational opportunities which are coming through co-operation to the people of this part of Texas in the immediate future.

The long session of the Normal College will open September 27th, and it is the belief of those who have the interest of the college at heart that this will be a good year both in attendance and in the accomplishment of its earnest student-body.

Mr. and Mrs. Sid Kyle, Mrs. W. L. Ross, daughter, Callie, and sons, Bill and George, have returned from a visit to the Hot Wells in New Mex-

PECOS TO SERVE COMMITTEE WITH HOME PRODUCTS

A fish fry with fish from the Pecos river, cantaloupes from Pecos Valley farms and apples from the Davis Mountains will greet the committees from the State Senate and Legislature when they reach Pecos next week on the first lap of their inspection trip to the proposed State Park area in the Davis Mountains.

The party will be headed by Lieutenant Governor Lynch Davidson, and Speaker Charles Thomas, of the House of Representatives, and will consist of five members of the House and five members of the Senate and Land Commissioner J. T. Robinson. In addition to the members of the committee proper James Z. George, vice president and General Manager of the Texas Chamber of Commerce, Porter A. Whaley occupying the same position with the West Texas Chamber of Commerce, and representatives of numerous Rotary and Kiwanis and other civic clubs are expected.

Several West Texas members of the legislature have expressed their desire to make the trip and it is possible that some of them will be in Pecos for the start.

Representatives of the Texas & Pacific, the Santa Fe, and the Southern Pacific are expected for the trip. Mayor Ben Palmer, members of the City Council and the officers and directors of the Chamber of Commerce have been asked to serve as an official reception committee, while all Pecos citizens are invited and urged to come out and meet the visitors.

The party will either arrive on the morning or the noon train and in either case will be taken to the Mitchell place north of town where the fish will be served. They will then be brought back to Pecos and after a short visit be taken over the Pecos Valley Southern to Saragosa. At that point they will be met by automobiles and taken through the Toyah Valley irrigated district, and to the Reservoir and taken as far toward the mountains as it will be possible to get them before dusk.

If the party arrives in the morning the first night will probably be spent at the mouth of the Madera Canyon near the Kingston ranch home. Pecos people will be asked to accompany the party on the early stage of the trip and furnish automobiles. As plenty of horses will be provided for the rough places, no effort will be made to take the automobiles off the beaten roads, and no great damage should result to the cars as a result of the trip.

Uncertainty still exists as to the exact time of the arrival of the party, due to it has been learned, to the efforts of Senator R. M. Dudley and El Paso interests to have the legislators visit that city before coming to Pecos. They have asked that the party go direct from Amarillo to El Paso by way of Tucumcari, making a long trip through New Mexico instead of visiting a number of Texas towns en route as had been planned. Should the Dudley plan prevail the party will not reach Pecos before probably next Friday morning.

The party gathers in Fort Worth on Sunday, and at that time will decide on their itinerary. They will visit the Palo Duro Canyon probably on Tuesday, visiting Amarillo on Monday, and be prepared to leave that section of the state Tuesday night. Without stopping en route, they could reach Pecos by Wednesday noon, but as Lubbock and Sweetwater are asking that the party stop over the party is not really expected in Pecos until Thursday morning.

The main purpose of the trip is for the committee to visit the Davis Mountains, and for that reason the executive committee in charge of affairs is asking that the El Paso visit be postponed until after the party reaches Pecos.

GOOD OIL SHOWINGS AT WELLS CAUSE PECOS PEOPLE TO LIVEN UP

TEACHERS' INSTITUTE VERY INTERESTING

The teachers of this section of the country have this week been attending one of the most profitable institutes ever held here. Beginning Monday morning, the devotional exercises were conducted by Rev. Garner of the Baptist church, who gave the teachers many helpful suggestions urging them to become discoverers, to help the child discover that the members of this institute made a total of one billion sixty-nine people whom he welcomed to Pecos. Mr. Sutherland, Secretary of the Chamber of Commerce, then made a short talk about Pecos, welcoming the teachers on behalf of the town and community, and urged them to become real citizens of the town or community in which they teach. As no one had been put on the program to respond to the addresses of welcome, the ever-ready Mr. Smith of Toyah was called upon, and did so in his usual happy manner. At this point the visitors, Dean E. D. Jennings of Texas Woman's College, Professor H. M. Morelock of the Canyon Normal and Mrs. Hanscomb of the same place were introduced. The institute was then organized with Superintendent Rutledge of Pecos conductor, Superintendent Tarleton of Barstow assistant conductor, and Mr. Watson of Odessa secretary.

The program of the institute has been different from that of other years in that more of the work has been done by specialists than by regular members. Dean Jennings has delivered a series of six lectures on "Child Psychology" upon which subject he is a recognized authority. His good humor and ready wit and his illustrations, many of which were funny, but to the point, made his lectures interesting as well as profitable. Professor Morelock has had charge of the high school section in departmental work and has spent most of the time discussing various phases of the teaching of English, because he believes that a thorough knowledge of English is the best foundation for other subjects. His lecture on the subject of "Literature and the Child" was particularly good, and was attended by many visitors besides the members of the institute. Mrs. Hanscomb has had charge of the primary section and has made her work very worthwhile. A feature of this work that has been of particular interest is a demonstration class in third grade work.

On Wednesday morning President Marquis of the Sul Ross Normal at Alpine came and spent Wednesday and part of Thursday with us. He spoke at different times on educational subjects, presenting particularly the interest of the normal school as the State's greatest institutions for the training of teachers.

On Friday the institute as well as the town itself was particularly pleased to have a visit from Miss Annie Webb Blanton, State Superintendent of Education. During the morning she delivered an address of especial interest to the teachers of the State, and held a round table discussion at which different points of school law and administration were made clear and the plans for the betterment of the schools of Texas were discussed.

The institute closed at the noon hour in order that the teachers might leave on the afternoon trains. Various factors contributed to make this institute a success. The ministers of the town have visited from time to time, and besides Rev. Garner who has already been mentioned, Revs. Magee and Faust have conducted devotional exercises which were very inspiring.

On Thursday Dr. Black of Barstow gave a helpful talk on health topics which was followed by some remarks on the same subject by Mr. Marquis. The teachers themselves have taken an interest in all the work, and have brought up the parts assigned to them.

An event which this section has to look forward to this year is the Inter-Scholastic League Meet which is to be held in this part of the district for the first time. Pecos, in particular, and Reeves and the surrounding counties must begin to plan now to make this the greatest meet in the history of the district.

It is probable that L. W. Anderson will go to Fort Worth to meet the committee and accompany them on the trip as the representative of Pecos. Representative W. W. Stewart, father of the resolution asking that the inspection be made, will not go to Fort Worth unless it is necessary due to his position as chairman of the local committee. He requested that he be permitted to accompany the committee.

Installation of a new boiler at the Toyah Bell No. 2 to permit operations to be carried to 5,000 feet or beyond if necessary, and the discovery of a stronger gas that made a flame several feet in length when piped from the derrick in a two inch pipe were the features of the week in the drilling field.

The gas was found at about 4280 feet after the drill has gone through about 800 feet of lime formation that was bituminous and showed considerable oil under chemical test, and was found shortly after work had been resumed following the installation of a new boiler at Toyah Bell No. 2.

The well is located in Southern Loving county, five miles east of the Bell No. 1, which came in for a shallow well at 657 feet last year and which was drilled deeper when the original supply was lost in water. The Bell is now drilling at 2075 feet having a good showing of gas in lime rocks. Alternate layers of white and black lime are being found in the Bell with some gypsum.

Footage made in the field has been cut short recently by several fishing jobs on other wells in the field. The Laura has had several jobs that required the loss of several hours of time, but the crew has been successful in handling each job without great delay. The hole is now down a short distance below 2,000 feet with 3 1/2 inch casing set to 2060 feet.

The Pinal Dome Corporation's Pecos county well has been drilled to beyond 2800 feet in dark lime formation. The Loving county well has been halted for the past three weeks with a bad fishing job, but experts are now at the well and making progress in removing the two tools stuck in the hole. The latter well is distinguished for having located what is believed to be the largest deposit of potash known in the world. This mineral was found in salt rock formation at between 825 and 1900 feet, and its size has interested a large number of big interests including some large fertilizer companies.

The Trans-Pecos Oil Company in Ward county is planning to underream their well and reset casing sixty feet nearer the bottom. The drill has been working in a dark shale formation with some showings of oil.

The Toyah Shallow Oil Company has suffered a great deal of mechanical trouble during the past month and has made but little progress on their well near Saragosa. A new engine is being installed which it is believed will do away with a great deal of the difficulty experienced in the past.

SUNSHINE OIL CO. TO OPERATE OTHER WELLS

Henry Deutsch, attorney for the Federal Service & Development Co., was in town this week and completed arrangements with President Alfred Tinnally of the Sunshine Oil Corporation for refinancing that organization. This was only accomplished at a great personal sacrifice of Mr. Tinnally who has always done all in his power, not only with the assets of the organization but with his personal effects to keep things at the well moving in an effort to get production. He has sacrificed from the outset and will continue to do so if necessary to get the wells of the Sunshine Oil Corporation down to pay sand, which he believes is there now as strongly as ever.

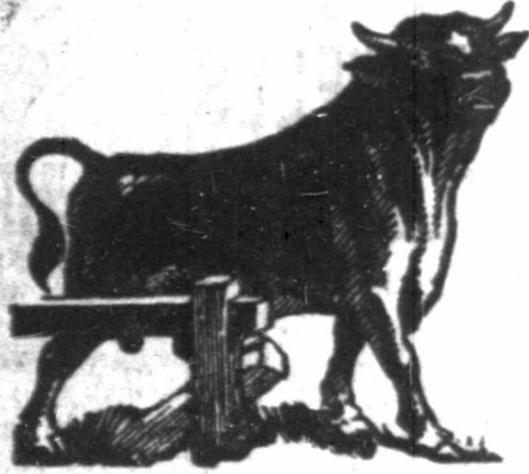

Mr. Tinnally informed The Enterprise that not only will the Laura well be pushed to completion as rapidly as possible, but a resumption of work on the other wells of the Sunshine Oil Corporation will be commenced.

The Sunshine Oil Corporation is the Pioneer oil concern of the Pecos Valley and have spent a mint of money in the field and at that have probably had more handicaps than any other concern in the Pecos field.

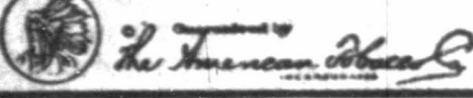

George Livinston, the last driller on the job, and the present one, who has the reputation of making holes as fast as any driller in the country, found the Laura well as crooked as a snake but has succeeded in getting it straight again and now has the 8 1/2 inch casing set at below 2100 feet and by Monday at the farthest hopes to be making record time in making hole. The Laura well is now in fine shape with new derrick and machinery and with a splendid driller in charge there should be no further delays and in a very short time the drill should tell the tale of what lies beneath.

Miss Annie Webb Blanton, State Superintendent of Public Instruction, arrived in Pecos this morning and is visiting her uncle, Lee Ligon and family. She will address the teachers

Do you know you can roll 50 good cigarettes for 10cts from one bag of

GENUINE BULL DURHAM TOBACCO

REGULATIONS FOR PLUGGING TEXAS OIL AND GAS WELLS

By L. G. Graves, Deputy State Oil and Gas Inspector.

The Railroad Commission is experiencing some difficulties in the supervision of the plugging of wells, for the reason that operators are not always ready to plug their wells on the date set out in their notices of intention to plug.

It often happens that an operator will give to the Commission its notice of intention to plug on a certain date, and the deputy supervisor will drive several miles over oil field roads, only to find that no one is at the well, and no preparation is made to do the plugging.

be necessary. The Commission urges all operators to file their notices of intention to plug in ample time for the deputy in their district to be notified of the date, and then be ready to plug their wells on the day set out in their notice, so as to save the deputy supervisor this unnecessary travel and useless waste of time.

Every deputy supervisor has a large territory to cover and many wells to look after, and in order that he may properly perform the work that has been assigned to him, it is of prime importance that the operators make their preparation and be ready to plug their wells on the date stated in their notice to the Commission, and that notice of intention to plug be filed on every well far enough ahead for the deputy to arrange to be present and witness the plugging of the well.

In plugging a well the law requires that all oil and water be confined to the strata in which it occurs. This may be done by several methods. The one that is the cheapest, with the material at hand, is the proper one to use, if it will do the work.

In plugging a well there are several things to be careful about. If water is found below the oil or gas stratum, it is necessary to have this successfully plugging off before proceeding further. The most successful method can only be determined by trying. All these ways have proved successful: Lead and wood plugs, rubber and hemp packers, lead wool, iron shavings, soft ropes, rock, mud and cement.

A great deal of difficulty is experienced in shutting off high pressure gas and flowing water. There are numerous instances in this territory where this has not been done. Just how much damage these wells are doing can not be determined. The Commission is endeavoring to clean up as many of these cases as possible. Care should be taken that there will be no new cases.

Another very important thing is to plug directly below the surface water, that it may not be polluted by the salt or alkali waters below. There are a good many fresh water wells going bad all over the country. It is possible that some are being affected by some abandoned oil well.

In plugging, plugs and cement may be used in connection with mud. When cement is used it should be mixed with good water or the derrick floor and dumped in the hole with the baler. It should then be allowed to stand at least twenty-four hours,

to see if it will set, before filling on top with mud.

Before placing the cement, all gas should be shut off, as gas will keep the cement from setting, or will form channels through the cement when it sets. When only mud is used, the hole should be filled solid to the top. There are cases where mud is used where it is necessary to circulate the mud with a pump and mud under pressure, in order to kill the gas and water, and hold it down. Where plugs and cement are used it may not be necessary to use so much mud. The law states that every plug shall have at least 200 feet of mortar or mud on top.

It has become necessary for several companies to return to old wells clean out to bottom and replug. This is a needless expense and should be avoided.

The law requires that before plugging a well notice shall be given to adjoining lease or property owners, that they may be on hand to see the work done. The landowner should be on hand, for in case the operating company becomes involved, the landowner becomes responsible for the wells on his land.

AN IRISHMAN NEVER WORKS

Paddy, after working eight years for one firm asked for an increase in salary.

"You don't really work for us at all," said the manager, and then proceeded to prove it by the following subtraction:

"There are 365 days in the year," he contended. "You sleep 8 hours per day, making 122 days, which subtracted from 365 days, leaves 243 days. You also have 8 hours recreation every day, also making

122 day, leaving a balance of 121 days.

"There are 52 Sundays that you do not work at all, which deducted leaves sixty days. Our store is closed every Saturday afternoon, thus 52 half holidays, or 25 days more that you do not work, now leaving a balance of 43 days. We allow one hour for lunch each noon, which tallied makes 16 days and leaves a balance of 27 days. We give you two weeks' vacation during the year, which leaves only 13 days. There are twelve legal holidays during the year that the store is closed. This leaves only one day in the year, and that is St. Patrick's Day, and of course you are off."—Exchange.

SOFT WATER

A fine supply of pure, soft, palatable and healthy drinking water can be found within ten miles of Pecos. Why not pipe it to town?

Of course you readily realize the immense value that soft water will be to the community, from a hygienic point of view, not only to the present population, but as an attraction to secure other people. In many industrial arts, such as textile factories, paper making and

others, soft water is a sine quo non, and I can think of no investment that will be so conducive to the health and prosperity of the community as one that furnishes an abundant supply of pure soft water.

To own a plant that will deliver a constant supply of such water, will be better than owning a gold mine.

As a municipal betterment it seems that waterworks bonds ought to be away and ahead of anything excepting U. S. bonds.

To Stop a Cough Quick

take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues.

A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and CROUP is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup.

The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trate Salve through the pores of the skin soon stops a cough.

Both remedies are packed in one carton and the cost of the combined treatment is 35c. Just ask your druggist for HAYES' HEALING HONEY.

**CAPT. D. H. SNYDER
EARLY DAY COWMAN**

Fort Worth, Texas, Sept. 13.— Sons and daughters of Capt. Dudley H. Snyder, Nestor of Texas cowmen who died yesterday at his home in Georgetown, gathered here today from their West Texas homes to make the pilgrimage to their father's funeral. The party includes Mrs. C. C. Kirkpatrick of San Angelo and Mrs. C. M. Armstrong of Lubbock. Fred Snyder of Lubbock, D. H. Snyder, Jr., and Marcus Snyder of Colorado City. All the sons are prominent cattle men. D. H. Snyder, Jr., is a member of the executive committee of the Texas and Southwestern Cattle Raisers' Association.

Captain Snyder was born in Mississippi Sept. 5, 1833. Early in 1854 Captain Snyder came to Texas by way of Ozark, Ark., and Mansfield, La., and made his first stop at Round Rock in Williamson county, where he visited with his grandfather, Dr. Thomas Hae. Following his farming experience he engaged in cedar hauling from Bastrop county to Williamson and Travis counties.

Early Trading Days.
In 1855 and 1856 he made several trips to Missouri, where he purchased wagons and loaded them with apples and other delicacies, which he brought to Texas and sold.

After making a few trips to Missouri Captain Snyder walked to San Antonio, where he invested his earnings in a small herd of Spanish ponies. These he drove to Missouri, where he traded them for draft horses which he brought back to Texas.

His reputation as a safe man gained him a proposition from Terrell Jackson for the delivery of beef during 1865 and 1866 he drove thousands of cattle across the Southern States for provisioning Confederate soldiers.

Cattle Stolen by Indians.
One of the interesting experiences of Captain Snyder in cattle driving was in 1869 with a herd of 140 head en route to Abilene, Kan., which was captured by the Indians. The loss eventually was paid by the Government. During the panic of 1873 a herd of his cattle were wintered in Cheyenne, Wyo., where he obtained money at 36 per cent per annum.

Captain Snyder was a Methodist and one of the staunch supporters Georgetown.

On Sept. 20, 1895, Captain Snyder lost his sight and since that time has resided quietly at his home.

**PLAN CAMP ON
PAISANO PASS**

All the people of West Texas and especially all the old settlers are interested in the permanent campmeeting grounds being fostered by the Baptists. An article appearing in the press of the State and bearing an Alpine date line says:

It is estimated that \$200,000 will be spent by the Baptists of West Texas, during the next two or three years, in the conversion of two sections of recently acquired land, at the summit of Paisano Pass, into one of the most complete camp meeting grounds in Texas.

The money, it is understood, will not be contributed by the Baptist Church, as an organization, but rather by wealthy members of that church, living in West Texas.

It is said in Alpine that one wealthy ranchman living in the Davis mountains, has said that if necessary to carry out the plans for the conversion of the Paisano Pass grounds into the camp meeting site which the beauty and accessibility of the location deserves, he will contribute \$50,000 to the fund. Other large contributions are in sight.

FINANCIAL REVIEW

Prepared For The Enterprise By
The First National Bank in
St. Louis.

Figures for exports and imports for the month of July show a continued decline. The total exports for the month of July were \$320,768,000, as compared with \$336,958,000 in June 1921, and with \$651,136,000 in July 1920. Exports to Europe, only, showed an increase for the month of July as compared with June. The largest percentage of decline in exports was reflected in our trade with South America.

A TONIC

Grove's Tasteless chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.

Grove's Tasteless chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect. 60c.

(Advertisement)

The same situation is reflected in the comparative figures of imports. In July, 1921, total imports were \$178,636,000, while in June they were \$185,679,000, and in July 1920 they were \$537,118,000. The largest decline in imports was reflected in our trade with North America.

The July value of our exports to Europe as compared with that of July 1920 still shows a decline of 48 per cent; to South America, 65 per cent; to North America, 49 per cent; and to Asia, 59 per cent. Our imports were still more reduced, from Europe, 52 per cent; from South America, 73 per cent; from North America, 76 per cent; and from Asia, 65 per cent.

In the face of these declines, exports to Germany showed a gain of 24 per cent for July 1921 as compared with July 1920. During the first seven months of the current year, the value of American goods consigned to Germany was \$223,000,000 which is \$22,000,000 in excess of total shipments to South America. It certainly looks as if Germany will remain the bright spot on our trade ledger for some time, provided that we can continue to furnish satisfactory terms of credit.

**LIFT CORNS OR
CALLUSES OFF**

Doesn't hurt! Lift any corn or callus off with fingers

Don't suffer! A tiny bottle of Freezone costs but a few cents at any drug store. Apply a few drops on the corns, calluses and "hard skin" on bottom of feet, then lift them off.

When Freezone removes corns from the toes or calluses from the bottom of feet, the skin beneath is left pink and healthy and never sore, tender or irritated.

STOCK PROMOTION AND POTASH IN WEST TEXAS

To protect the public from misrepresentation, and fraud by unscrupulous promoters and sellers of stock based on potash deposits in western Texas, the United States Geological Survey, Department of the Interior, states that the potash deposits there, instead of being 1,100 or even 300 feet thick, as represented by the promoters, have not yet been proved to be of workable thickness or of commercial value. Rich potash salts, comprising the mineral polyhalite, which were deposited in association with great thicknesses of rock salt and gypsum in "red beds," as in Germany, and, in fact, at the same time as the German deposits, have been discovered by representatives of the United States Geological Survey and the Texas University Bureau of Geology and Technology in a cooperative search, but though this discovery, which was made public early in June, is encouraging and interesting, the practical question whether the deposits are thick enough to mine—that is, whether they are worth anything—is yet to be answered.

The signs of potash which constituted the recent discovery came from drill cuttings from three wells in Midland, Dawson, and Ward counties, that have been drilled for oil near the Staked Plains region, which the geologists, on scientific grounds, have considered the most promising region for the occurrence of potash salts in connection with the great thickness of common rock salt covering the "red beds" region of western Texas, eastern New Mexico, western Oklahoma and southern Kansas. The results of the test of the boring from these three wells, of which those that are farthest apart are distant from each other about 125 miles, are certainly encouraging, but the United States Geological Survey warns the public that the conditions of drilling and sampling at all three points are so unsatisfactory that it still remains to be seen whether the beds that are rich in potash are thick enough to justify their commercial exploitation. For the accurate test of such deposits necessary for a sound commercial conclusion, drill cores are needed instead of the unsatisfactory samples brought up by the bailer or, worse yet, washed up by the rotary rig without means of determining accurately either the thickness of the layer of potash or its depth from the surface. Thorough tests with the core drill are justified by the tremendous importance to the whole United States of the discovery of commercial deposits of potash in this region—a discovery of far greater value than that of an oil pool.

THE JINERS.

Mabank Banner: The Dallas News, in all its career of usefulness, has never done a greater service than that which it is performing now by its exposure of the inner workings of the Ku Klux Klan.

Dallas News: Some years ago a Cincinnati genius hit upon a scheme for extracting money from the pockets of country youths. He advertised a so-called detective school and after a matriculation fee and a few simple lessons by mail, sold the students a tin badge and an ornate certificate, bidding the graduates to go forth and capture criminals. A lot of the boys thought they were really commissioned to apprehend the guilty, and they made some arrests. Their tin stars fascinated them and it was quite a while before they were made to understand that the Cincinnati gent had no authority to make peace officers of them. Of course, the originator of the scheme got the money. The postoffice department put him out of business as soon as it got around to it. Schemes for getting the money are never ending. To obtain it from "Jiners" was long ago discovered to be perhaps the easiest of all. To collect an initiation fee and then sell the initiate an "oufit" is excellent business, from the financial standpoint. If he can also be impressed by ponderous rigmorale and flattered into the belief that he is an exceptional, perhaps a notable person, so much the better. That gives him

something like value for his money. This can better be done by conferring dignity through a greater dignitary. A "wizard" doubtless is something important, especially when in his regalia, although in olden times a wizard was only the masculine of a witch. But to be ennobled by an emperor, one who dates his letters from a palace and refers to himself as an imperial potentate with an empire back of him—that indeed is grandeur. But it costs a good deal, first and last.

THE TRAIL

There's a trail that winds to the Garden of Dreams
Thro' glory of morning, and evening's soft glow,
Where ever and aye the forget-me-not gleams,
And the four-leafed clovers grow.

O, the trail may be short to the Garden of Dreams
Or the trail may be long and slow,
But by glaring sunlight or starry gleams,
Upward I needs must go.

Alone I climb, yet the world at my side,
For ever since time began,
Since ambition pulsed thro' the human tide,
The trail has shouted to man.

Crying "up and up to the crests of light,
To the good, the better, the best!
Shall gods, content, view the eagle's flight
And lo! in a stupor of rest?"

And now in the glooms where men stumble and grope,
Up, up to the sun-crowned goal,
And now thro' the rain born mists of hope,
Struggles the great world-soul.

But he that first on the ember blew
Each turn in the trail must know,
And steps how many or steps how few
That the toiling world must go.

So o'er parching sands or by cooling streams
I press, for I surely know
I shall come at last to the Garden of Dreams
Where the four-leafed clovers grow.

—MRS. W. A. FULBRIGHT.

ARBUCKLE CHARGED BY CORONER'S JURY

San Francisco, Cal., Sept. 14.—Roscoe Arbuckle, film star, stood charged with having caused the death of Miss Virginia Rappe, young movie actress, from three official sources Wednesday night.

The coroner's jury, following a three-day inquest, brought in a verdict charging him with her death and holding him on a charge of manslaughter.

The verdict of the jury follows: "We, the jurors, find that Virginia Rappe came to her death from peritonitis caused by rupture of the bladder due to the application of force and the jury further believes after reviewing the evidence that the force which caused Miss Rappe's death was blamable to one Roscoe Arbuckle.

"We therefore charge Arbuckle with the crime of manslaughter.

"We, the jurors, recommend to the District Attorney at San Francisco, to the grand jury and to the Federal prohibition officers that they take steps to prevent the recurrence of affairs similar to the one in which this young woman lost her life, so that San Francisco shall not be made the rendezvous of debauches and gangsters."

Two Other Charges.

A charge of first degree murder, filed in a sworn complaint by Mrs. Bambina Maud Delmont, and an indictment charging manslaughter, returned by the grand jury, also face the comedian.

Arbuckle seemed stunned when the verdict was read. The jury had debated more than three hours, an unprecedented occurrence for a coroner's jury here. The defense was hopeful that an open verdict would be returned.

The fat actor was the picture of dejection. He sat motionless when the verdict had been finished, then reached for a handkerchief and mopped his brow several times and looked from one attorney to the other as if to find some sign of encouragement there.

"This verdict was the only thing the jury could do after hearing the evidence and it convinces us that Arbuckle will undoubtedly be convicted when he comes to trial in the Superior Court," said District Attorney Matthew Brady, who has conducted the case against the comedian.

One Juror Does Not Concur.

The verdict was signed by eight of the nine jurors.

One juror, Ben Boas, did not concur and returned a minority verdict which read:

"I, the undersigned, believe that Virginia Rappe came to her death from peritonitis due to the bladder being ruptured by some force, but from evidence I am unable to determine who was responsible for application of the said force."

The delay in rendering the verdict is said to have been due to a desire on the part of a number of the jurors to make it plain in the verdict that they wish to accuse Arbuckle of manslaughter and not of murder.

Arbuckle was taken back to his cell in the city jail immediately fol-

lowing the reading of the verdict.

Immediately following the rendering of the verdict the actor's attorneys refusing to comment on the verdict drove away in Arbuckle's big cream-colored car which had been parked outside the coroner's office throughout the day.

At the concluding session of the inquest the State did not call Miss Alice Blake and Miss Zey Puyron, other members of the Arbuckle party. Testimony centered in the examination of Dr. Shelby Strange, autopsy surgeon of the coroner's office and Dr. William Ophuls.

"I made a close examination of the body and am certain that at least two of the bruises on it were made by gripping fingers," he testified.

Dr. Ophuls testified that he had found no evidences of infection of Miss Rappe's body. He said that violence was the most logical explanation of the rupture that caused her death.

MOTHER WONDERS AT SON'S

BLUNDER IN BURYING VICTIM
Chicago, Sept. 15—Harvey W. Church, confessed slayer of Bernard Daugherty and Carl Ausmus, automobile salesman, early today was brought face to face with his mother for the first time since his arrest and, with her present in the State's attorney's office, he repeated the details of the two crimes.

Church reverted largely to the first of his many confessions and indicated, officials declared, that he planned and executed the murder without assistance.

Neither Clarence Wilder nor Milton Walker, named by Church as accomplices, officials said they were convinced, had any part whatever in the crimes and they also expressed doubt whether Leon Parks assisted Church, despite a detailed confession by Parks.

Officials pointed out that Parks stoutly maintained his innocence until confronted by Church, who then supplied most of the answers to questions put to Parks by the investigators.

Mrs. Church, who collapsed several days ago when informed of her son's confession, sat apparently unmoved today throughout his recital of the murder details. At the close of his story she shook her head when asked if she had anything to say. Later she remarked:

"I cannot understand why Harvey buried the man (Carl Ausmus) in the garage. There is a vacant lot next door where all the dead cats and dogs in the neighbor-

hood are buried. Why didn't he bury him there? Then they never would have found him."

Church, in his first confession, said he alone lured Daugherty and Ausmus to his home, killed them and disposed of the bodies to obtain possession of an automobile. Later he said he had an accomplice, and still later asserted he had two accomplices.

Habitual Constipation Cured in 14 to 21 Days
"LAX-FOS WITH PEPSIN" is a specially-prepared Syrup Tonic-Laxative for Habitual Constipation. It relieves promptly but should be taken regularly for 14 to 21 days to induce regular action. It Stimulates and Regulates. Very Pleasant to Take. 60c per bottle.

BABY-FACES.

I love the baby-faces
That I see most every day,
As I trudge along, half-hearted
In my narrow, stubborn way;
When the world seems cold and selfish,
With a cloud in every place,—
O, it turns my soul to sunshine
When I meet a baby face.
When I spy the little go-cart
And the darling that it bears,
The glimpse I catch in passing
Softens down the sternest cares;
Yes, that ugly frown relaxes,
And a smile will take its place,
At the magic intervention
Of a happy baby's face.

I love each little wanderer
More than he can ever know,
For he recalls a baby-face
That cheered me, long ago
I recall the childish prattle
As he perched upon my knee,—
But shucks! he's over thirty now,
An' thinks he's bigger'n me!!

Yr. ever loving Uncle John.

NO MORE "FATTY" IN MOVIES, HE THINKS

Los Angeles, Sept. 15.—"I do not think 'Fatty' Arbuckle will appear again in motion pictures and I believe it right that such be the case. He didn't know when to stop eating and drinking, and like a pig, gorged himself."

In the foregoing remark, made public before the public welfare committee of the city council, which was discussing film censorship matters, Frank E. Woods, president of the Screen Writers' Guide and active in film affairs, uttered an expression, which, because of Woods' prominence was taken to reflect a sentiment of the great Hollywood colony.

"Poor 'Fatty' has been his worst enemy," said Woods. "We who know him do not believe him guilty of an intentional assault, but he has been convicted by public opinion of being a bad influence. So exhibitors voluntarily have withdrawn films featuring him."

The Quinine that Does not Affect the Head because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness nor tingling in head. Remember the full name and look for the signature of E. W. GROVE. 30c.

SOCIAL EVENTS

BIRTHDAY PARTY

Ruby and Stanley Poer ages twelve and eleven respectively celebrated their birthdays Wednesday afternoon of last week by giving a lawn party to their friends. Their birthdays do not come on the same day, but are close enough to consistently hold a joint celebration.

Many interesting and joyous games were played and each was presented with many pleasing gifts. At the conclusion of the delightful occasion refreshment of ice cream and cake and water melons were served to the following guests:

Beatrice Sims, Wylie Sue Cole, Della Mae Hudson, Helen Ezel, Ruth Hicks, Virginia Kesler, Opal Palmer, Imo Durdin, Joe Edna Hudgens, Gilbert Murry, Sinston Schellengbeger, Howell Johnson, Dorothy and Harry Hall, Virgie and Myrtle Cowan, Charlotte Enola and Jerome McKorkell, Nell and Cecil Turner, Janice and Helen McKellar, Johnson Charske.

BIRTHDAY PARTY

Little Virginia Stewart celebrated her eighth birthday Monday from four to six in the afternoon.

The dining room was decorated in festoons of crepe paper in pastel shades, and beautiful asters in same shades, sent from her grandmother's home in New Mexico.

Refreshments of ice cream and little frosted cakes in pastel shades and a beautiful pink birthday cake were enjoyed by the little girls.

Games and music made the time pass too quickly. Favors of crepe paper caps and flowers were given each little guest.

BIRTHDAY PARTY

Sue Hines was the charming young hostess at a party Tuesday, September 13, in honor of her eleventh birthday. Many delightful games were played, and an interesting diversion was in extinguishing the eleven lighted candles on the pretty birthday cake. The candles were named and only one remained burning after the efforts to extinguish had ceased, and that one was Lionell Gilpin which means for him long life. In cutting the cake the button went to Wylie Sue Cole who will be the old maid, the ring to Gladys Lawson who will be the first to marry. The hostess got the last piece of cake and to her went the dime which means she will be married rich. The favors were large sticks of candy which were found by following strings in their windings to the ends.

At the conclusion of the jolly occasion refreshments of ices in cones and cake were served to the following guests:

Auline Stephens, Wylie Sue Cole, Ruby Poer, Harrison Baker, Junior Boatright, Midred Browning, Janice McKellar, Myrtle Cowan, Benny Biggs, James and Duchy Garner, Obara and Gady Lawson, Ethel and Bertha Hairston, Mrs. Winslet and Mrs. Gannt. Mrs. Hines was assisted in serving by Misses Annie Wright, Fern and Opal Biggs.

BIRTHDAY PARTY

Lena Belle Warren, the charming little daughter of Mr. and Mrs. Oscar Warren, celebrated her sixth birthday Saturday, September 10 with a party to many of her little friends.

The children gathered at her home and many interesting games were enjoyed from 4 o'clock until six, after which the birthday cake with six lighted candles was cut and served with delicious ice cream.

The table was decorated with beautiful flowers, and the room was lighted with candles. The little hostess received many pretty and useful gifts from the following:

Beverley Vaughan, Nell Turner, Henry and Ona Kerr, Florence Blake, Evelyn Bowie, Nancy Camp, Gladys Lewis, Dolly Wolf, Mary Kathrine Couch, Clara and Pauline Roberson, Zena and Myrtle Brocat, Georgia Johnson, Iryl Alexander, Junior Allison, Albert, Harry and Ira Lee Burleson, Mildred and Aileen Porter, Paul Warren and Lela May Porter.

FARE AND ONE-HALF ROUND TRIP TO DALLAS FAIR

Citizens of West Texas will have an opportunity to visit the State Fair which holds at Dallas October 8th to 23rd on a basis of fare and a half for the round trip says the heads of the Texas & Pacific. This rate is announced for all points in Texas and Louisiana. Tickets will be sold daily October 7th to 23rd inclusive from this part of the State final, return limit to be October 24th.

MRS. OSCAR CLAPP DEAD

Mrs. Oscar Clapp died at her home in Kermit Wednesday and the body laid to rest in Fairview cemetery in Pecos Thursday afternoon. She was about forty-six years of age and had been a sufferer from cancer.

Deceased had been a resident of Kermit for a number of years and was a christian and splendid neighbor.

EUGENE JOHNSON KILLED IN WRECK

The wreck on the Texas & Pacific just the other side of Van Horn Monday, supposedly caused by the splitting a switch, killed one man outright and so mangled the body that it was buried at Van Horn, while Eugene Johnson was so badly injured that he died on the way to Van Horn. His body was brought on to Pecos and embalmed by J. G. Murray of the Pecos Mercantile Co., and shipped to his home in Alto.

PECOS DRY GOODS STORE BURGLARIZED

Burglars broke into the Pecos Dry Goods Co. last night and stole clothing, shoes, ties and shirts and other stuff to the value of nearly \$300. They entered by a rear window and left their old clothing in the store after fitting themselves out. It is supposed to have been done by tramps since the clothing left in the store showed signs of coal tar dust.

THE CHURCHES

CHURCH OF CHRIST.

Preaching morning and evening, and other services as usual. The annual election of officers in both the Bible school and church will be held. Every member is urged to be present.

Remember the revival meeting begins Sept. 25. I. H. Tell will do the preaching and Ezra Jacks will lead the singing. Everybody cordially invited.

HOMER L. MAGEE.

CATHOLIC CHURCH

Mass celebrated every second and fourth Sundays as follows: 8:00 a. m. for Spanish speaking population and ten a. m. for English speaking people of Pecos.

D. J. O'DONOVAN.

EPISCOPAL CHURCH

Hereafter every two weeks on Thursday night at 8:30 and the same afternoon at 5 p. m., there will be a study class at the St. Marks Episcopal church. An invitation is extended to all. Next service will be held July 21st.

CHRISTIAN ENDEAVOR

Program for Young People Society of Christian Endeavor at Presbyterian Church September 18.

Opening Song.
Prayer.
Lesson Reading—Subject: Sins of the Tongue—Jas. 5: 1-12.

Discussion—When is frankness in speech helpful? Is it ever hurtful?—Mary Ellen Coon.

Bible references and Discussion.
Song
How will our C. E. Society aid us in the matter of speech?—Iliff Sims.
Quotations for Comment—Society, Sentence Prayer.

SECRETARY OF CHRISTIAN ENDEAVOR TO TALK

Mr. E. F. Hupertz, State secretary of the Christian Endeavor Union will give an address at the Christian church in Pecos, next Thursday night, September 22.

Everybody is invited, and all young people and those interested in young people work are urged to be present.

KINDERGARTEN SCHOOL OPENS

The Kindergarten school of Mrs. H. H. Johnson will open Monday at her residence. Every thing is in perfect readiness for the opening and the children are on tip toe in anticipation of the good things in store for them. Mrs. Johnson has spent months in preparation for this work and that with her love for children will insure her success.

VIOLENT DEATH WAVE AT HOUSTON

Houston, Sept. 15.—A wave of violent deaths and accidents swept over Houston during the past twenty-four hours.

J. D. Gott of Batson died at a local hospital from gunshot wounds received last night while resisting arrest. He is survived by eight children.

Malcolm Hooper, 8 years old, of Beaumont, fell from the third story window of a local hotel this morning in the presence of his father and mother and was instantly killed.

J. W. Jones, 54 years old, who was run over by an automobile Wednesday, died at a local hospital today as a result of his injuries.

Quincy Fowler, 23, another automobile accident victim, is not expected to live as a result of his injuries. His mother, grandmother and brother were also severely cut by flying glass.

E. R. Knight was struck by a Texas & Pacific passenger train at a crossing in the outskirts of the city and sustained injuries from which he is expected to die.

MUSIC CLASSES OPEN

The music class of Mrs. Lillian Butler will open Monday, September 19th, at the J. B. Davis residence near the school building into which she has recently moved. She will be glad to see all old pupils and any new ones who wish thorough instructions in music by an expert teacher. Call at the residence or telephone 246 for a place in her class.

Mrs. C. B. Jordan will also open her class Monday, the 19th, and will be glad to see her pupils at her residence. Her terms for tuition per month are five (\$5.00) dollars. 4-2t

Piles Cured in 6 to 14 Days
Druggists refund money if PAGO OINTMENT fails to cure itching, blind, bleeding or protruding Piles. Instantly relieves itching Piles, and you can get restful sleep after the first application. Price 50c. (Advertisement)

EFFICIENCY

The word efficiency is yet in its infancy. Only within the last few years has it been used to any extent. It was first applied when it was discovered that a particular workman could do a job, not only better than the average man, but could do it in less time with a greater degree of accuracy.

Skill, speed and accuracy are responsible for the coining of this word efficiency, and they are made possible through the employment of the latest types of machinery.

TWO WAYS OF DOING A THING

THE NEW WAY

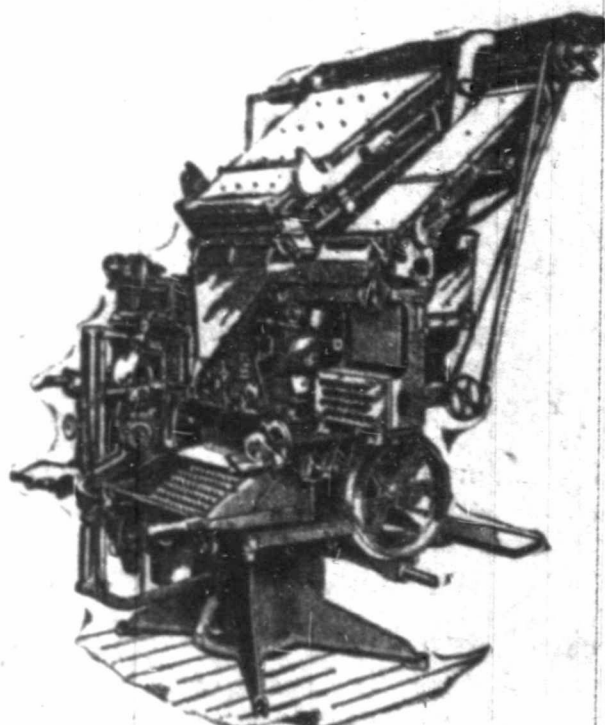

A \$6,000 Linotype machine that casts new type for every job and advertisement.

Does the work of four men.

Equipped with 32 different faces of type that can be changed on a minute's notice.

Also casts ornamental printing material, rule, border, etc.

Metal saw that cuts machine products into any design and measure.

LATEST MODEL MACHINE MADE

THE OLD WAY

When printing was done by hand it required six times as much time as by machinery.

Type was laid in cases, became worn, the printing surface scratched, rules were bent, nicked and battered and in a few months the office could not possibly do first-class work. Neither could they afford to buy new.

The Linotype has done away with this method.

REASONS FOR QUALITY PRINTING

THE two Linotype machines in THE ENTERPRISE office are capable of handling any work that falls to them in the shortest possible time—with no exceptions. The now Model 14 is one of the best equipped machines in the State—this is fact.

Without the machines we would have to employ four times as much labor, our floor space increased and additional rent; we could not give you new material with every job; our methods of production much slower, but everyone knows the difference between machine and hand work—it is a short story: Either the hand work costs you much more or the job is done in a haphazard way to meet the low price of the machine work.

THE ENTERPRISE has the only machines in the county and the best skilled workmen on the market.

CULLING FLOCK BY AMATEURS

By F. W. Kazmeire, Poultry Husbandman, Extension Service, A. and M. College, College Station, Texas.

Why Cull
With feed high in price and in many cases difficult to get, it is of the greatest importance to cull the poultry flock. Culling serves two purposes. First, it insures that the feed shall be consumed by the better producing hens, thereby increasing the profit. Second, it makes it possible to save those best suited for breeders, both on account of their better production, and on account of their superior strength and vitality, qualities so essential to layers if they are to stand up under the severe strain of heavy laying. Those hens which do not produce, must be killed for meat. Weeding out the poor hens give those left more room and a better chance. Where trap nesting is practiced, culling is a comparatively simple process.

"When To Cull."
Culling should be continuous throughout the year. This continuous culling should consist of weeding out, when discovered, any hen which is sick, which is very thin or emaciated, or which shows evidences of non-production, weakness or poor vitality.

The whole flock should also be given a careful and systematic culling at some one time. The hen should be handled individually and gone over carefully with the object of dividing them into two lots, one the better producers and the other the poorer producers. From the better producers it is also desirable to pick out as many of the best as will be needed for breeders. Band or otherwise mark these hens so that only eggs from them will be saved for hatching. Market those selected as the poor producers. Save for laying those selected as the better producers.

When a single systematic culling is made, the best time to do this is in August or September. At this time it is easier to form a fairly close estimate of the relative value of a hen as an egg producer and to weed out the non-producers. Hens which show indication of laying at this time are those which on the average have been the better producers for the year. It must be remembered too, that the better producers during the first laying year are those which will be the better producers in subsequent years. Hens showing indication of having been good producers throughout the year should be retained for the next year regardless of their age, but relatively few hens will prove to be profitable producers beyond their second laying year if of the heavier breeds such as the Plymouth Rock, Rhode Island Red, Wyandotte or Orpington, or beyond their third laying year if of the lighter breeds such as the Leghorn. Additional culling during July is also desirable in order to eliminate hens which started to molt and have stopped laying.

"How To Cull."
In going over the entire flock for the purpose of culling there are a number of points or characteristics which should be given attention in selecting the layers from the non-layers. Where the different characteristics or several of them in the case of any individual agree as indicating good production or poor production, selection is comparatively accurate. Where they do not agree, judgment must be used in deciding which is given the greatest weight. The following are the main points to consider.

Sickness and lack of vigor: These are usually indicated by listlessness, inactivity, tendency to stay on or under the roost during the day, poor appetite, dull eye, dark or bluish color of comb, long toe nails, snakey or crow head and the tendency to go to roost early in the evening and to be one of the last to leave the roost in the morning.

Molt: This is one of the most valuable and easily applied tests of production. Hens cease laying completely or almost completely during the molt. The better producers lay late in the fall and, therefore, molt late. Late molters also molt rapidly as a rule while early molters molt slowly. Therefore, save the hens which have not molted by August or are only just beginning to molt late in September or in October, and discard those which have finished molting or are well into the molt. The hens which molt last, provided they are otherwise desirable are the best hens to save for breeders. A hen which has not molted at this time is characterized by soiled and worn or broken plumage, which is especially evident in the tail plumage, while those molted or molting show clean, fresh plumage or growing feathers. Culling the early molters just as soon as they begin to molt is one of the easiest ways to weed out the poor layers.

Shank Color: In those breeds having yellow legs, the color fades out slowly as the laying season advances. The rapidity and degree to which the yellow color is lost depends to a considerable extent upon the heaviness of laying. During the molt this color is slowly regained to some extent. The yellow color goes out from the scales on the shanks first and finally from the scales on the rear. Taken from an outline on judging fowls for egg production prepared at a judging school held at Cornell University, July 1-5, 1918, and adopted by the American Association of Instructors

and Investigators in Poultry Husbandry. Hens on grass range do not lose the shank color as quickly, or as completely as those in bare yards. Some soils also tend to bleach the color of the legs. Hens showing strong or medium yellow shank color are almost certainly poor layers but occasionally poor layers may show pale or white shanks. In breeds such as the Rhode Island Red where the shanks may show horn color as well as yellow, the horn must not be confused with the yellow. The rear and sides of the shank show little of this horn color. A sick hen or one in very poor condition may also show pale or bleached shanks.

Beak Color: In breeds having yellow beaks; the same principle applies as in the case of the yellow shanks. However, the color is lost from the beak more quickly than from the shanks and is also regained more quickly. The lower beak bleaches faster than the upper but may be used where the upper is obscured by horn or black. Taken from an outline on judging fowls for egg production prepared at a judging school held at Cornell University, July 1-6, 1918, and adopted by the American Association of Instructors and Investigators in Poultry Husbandry.

Vent Color: In yellow skinned breeds the yellow color of the skin immediately about the vent is quickly lost with laying, and is quickly regained after laying ceases. White or pink vent color generally indicates that the hen is laying while a yellow vent means the bird is not laying.

Appearance of Vent: The vent of a hen laying heavily is large, expanded and moist, while that of a hen not laying is comparatively small, hard, puckered and dry.

Comb: When a hen is laying or about to lay her comb is large, waxy, full of blood and bright red in color. When not laying, the comb is small and shrunken, pale or dull in color, comparatively hard and covered with whitish scales. As a hen gets ready to lay again her comb increases in size. A dark or bluish color usually indicates sickness. The changes in the wattles and ear lobes are similar to those of the comb but not so marked. In judging from the condition of the comb whether or not a hen is laying, it is necessary to keep in mind the difference in the size of comb of the various breeds. It is easier to determine the laying condition from the comb in the case of those breeds with large combs such as the Leghorn, than in those breeds with smaller combs such as the Plymouth Rock.

Pelvic Bones: As a hen stops laying there is a tendency for her to take on fat. This is noticeable in examining the pelvic bones, the two bones which can be felt at points on either side of the vent. When the hen is laying these bones are comparatively thin and flexible. When she is not laying, they feel thicker and less flexible, due to the fat which has accumulated there. The spread or distance apart of these pelvic bones is also a valuable indication of whether or not the hen is laying. When laying they are wider apart than when not laying. This spread can be roughly measured for practical purposes by determining how many fingers can be laid between the bones. If the spread measures two fingers or less, the probabilities are that the hen is not laying, while if the spread is greater she is probably laying. In measuring this spread the size of the hens of different breeds, with the corresponding natural difference in the spread, must be kept in mind.

Distance From Pelvic Bones To Keel Bone: A hen laying well is a good eater. Her intestines are, therefore, fuller and more distended, and require more room than when she is not laying and not eating so much. When laying, the ovary and oviduct are of greater size and require more room. To provide this extra room, the distance from the rear end of the keel to the pelvic bones increases with a consequent increase in size of the abdomen. A spread of three or more fingers in the smaller breeds such as the Leghorn and four or more fingers in the larger breeds such as the Plymouth Rock indicates that the hen is in laying condition. A spread of less than three fingers in the smaller breeds and less than four fingers in the larger breeds indicate that she is not in laying condition.

Flexibility Of Abdomen: When the hen is laying the greater size of the abdomen together with the lessened tendency to accumulate fat at this point results in a soft flexible abdomen, suggesting, when handled the texture of the partly milked-out udder of a cow. When laying has ceased, the abdomen grows smaller, fat is deposited there, and it feels, when handled, harder and less flexible.

In culling the flock remember that it is safer to depend upon the agreement of a combination of several characteristics rather than to select by any one alone.

Cull These Hens: Sick, weak lacking vigor, inactive, poor eaters, molted or started to molt; with small puckered, hard, dry vents; with small, shriveled, hard, dull colored combs; with thick or coarse, stiff pelvic bones, pelvic bones close together, small spread between pelvic bones and rear end of keel bone and full, hard small abdomen. In breeds with yellow skin and shanks, the discarded hens should also show yellow or medium yellow shanks and yellow beaks and vents.

Save These Hens: Healthy, strong, vigorous, alert and active; good eaters; not molting or just beginning to

SCIENCE NOW TESTS BABE RUTH'S HOME RUN

Why and how does Babe Ruth, the great ball player, make so many home runs? With electrical and

other special apparatus, the scientists of Popular Science Monthly have been trying to find out. This copyrighted picture, which we print by special arrangement with Popular Science, shows the Babe swinging with the bat while the device is measuring the force and speed. The cross on his knee shows the height at which he hits the ball best. The test showed that Ruth's physical hitting efficiency is 90 per cent compared with the average man's 60. His eyes are 12 per cent faster than the average. His ears function 10 per cent faster. His bat swings at the rate of 110 feet a second. The scientists decided that the Babe would hit the ball even further if he didn't "hold his breath" quite so long—a fraction of a second shorter.

molt in September or October; with large moist vents; with large, bright red combs; thin, pliable pelvic bones well spread apart, wide spread between pelvic bones and rear end of keel and large, soft, pliable abdomen. In breeds with yellow skins and shanks, the hens saved should also show pale or white shanks, and pale or white beaks and vents.

Culling The Growing Pullets: A flock of growing pullets nearly always contains a considerable proportion of birds that are very much under size, or in other ways poorly developed. These should be culled out as soon as they are noticed as conspicuously backward. They will never make a profit and the sooner they are eaten, the less will be the loss on their account. Even when foraging is good it does not pay to keep them. It is much better to let the good thrifty pullets have the feed. Keep the early maturing pullets, because they will be found to make the best layers.

"NOT TODAY, HONEY."
He was a tenant farmer. Did his best last year but 12-cent cotton brought a tragedy to him and his family. The merchant who carried him last year failed to collect the greater part of the amount he had advanced the man and he made arrangements to furnish him again this year but on a greatly decreased basis. The merchant knew that he must restrict the purchases of his customers if he would keep his doors open.

This man who rented land and low price of cotton did not complain at the small amount the merchant told him he must run on. He realized that the merchant must protect himself. He knew that in some mysterious way the world had gone wrong and he and his wife and children were helping to pay the bill that would right things after awhile. It meant hard work, economy, few necessities and no luxuries. He knew that his wife would have to wear the same dress to church this year that she did last, he knew the boys' clothes must be patched and patched and that the girls—

There was where the heart strings pulled a little strong. The two girls were 14 and 12 and worked every day with him in the field. The boys were younger.

The summer picnics were coming on and the girls wanted—
That was what bothered him. The young boys could go with their patched breeches. Their mother would see that they were clean, but the girls—

And so the other day he took the two girls with him to the store of the merchant. It rained that day so they couldn't work in the fields. And the man took the merchant to the back of the store and was for some time in earnest conversation. The man did most of the talking.

In the meantime his little girls were looking longingly at some bright colored bolts of dress goods on the shelf. They were pointing at this and that piece of lawn or calico and their eyes sparkled and smiles played

around their little mouths.
As the interview between the man and the merchant ended the merchant was seen to shake his head.

Then the man came and took the girls by the hands and said as cheerfully as he could: "Well girls, let's be going home."

And one of them said: "Ain't we going to buy nothing daddy?"

And the man, speaking more cheerily, said: "Not today, honey; but there will be lots of purtier gingham for sale this fall than there is now. Real purty gingham."

And then the three left the store and went on down the road toward home, down by the fields in which they must work in torrid suns, down to the home where a man presided as the head of the house who is one of the men that makes us kin to God and who makes America great.

Just a tenant farmer!—Marshall Morning News.

NOTICE
The Board of Trustees of the Pecos Independent School District will meet for the purpose of awarding the depository for the following year on Saturday, October 1st, 1921. Sealed bids should be in the hands of the secretary of the board by five p. m. of the above mentioned date.

Usual rights reserved.
P. J. RUTLEDGE, Secretary.
4-4: Pecos, Texas.

NOTICE
Brown's little one was ailing and on his way to work Brown sent up the doctor. When he got home in the evening he asked her what the doctor had said.

"Nothing papa."
"Then what did he do, dear?"
"Oh, he just telephoned me all over" was the child's reply.—Boston Transcript.

PLENTY FOR A STARTER.
"Where's Jimmy?" asked the head of the house, coming home from work.

"He was very naughty," replied his wife. "I sent him to bed for swearing."
"Swearing?" roared the indignant father. "I'll teach him to swear!" and he rushed upstairs. For some minutes the indignant parental voice resounded through the house and then Jimmy's mother called:

"John, dear, I'm sure Jimmy has heard enough for the first lesson."—American Legion Weekly.

Habitual Constipation Cured in 14 to 21 Days
"LAX-FOS WITH PEPSIN" is a specially-prepared Syrup Tonic-Laxative for Habitual Constipation. It relieves promptly but should be taken regularly for 14 to 21 days to induce regular action. It Stimulates and Regulates. Very Pleasant to Take. 60c per bottle.

BE RID OF THAT ACHE
If you are a sufferer with lame back, backache, dizziness, nervousness and kidney disorders, why don't you try the remedy that your own neighbors recommend? Mrs. John DeRacy, Pecos, gave the following statement October 28, 1915: "I was troubled for a long time with my kidneys. My back was weak and lame and hurt me with a dull constant ache. I was tired and languid and had dizzy spells and headaches. Black spots often seemed to float before my eyes. I was also bothered with my kidneys acting irregularly. I heard a lot about Doan's Kidney Pills and decided to try them. I got some at the Pecos Drug Co., Inc., and it only took two boxes to cure me. I haven't been bothered since."

On April 7, 1919, Mrs. DeRacy said: "I haven't needed Doan's Kidney Pills since I recommended them in 1915 for the cure they gave me has lasted. I have been in fine health."
60c at all dealers. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

ITCH!

WANT TO LOCATE HOMES IN SOUTHWEST

Large numbers of home and health seekers in the north and east are beginning to write, wanting homes, farms, business in healthy locations in the Southwest. If you want to sell or exchange, register at once. Write full description, lowest net price, terms. Address Free Information Bureau, Texas St., El Paso, Texas. 3-3t

NOTICE OF SALE

Texas and Pacific Railway
Notice is hereby given that on the 30th day of September A. D. 1921, at Toyah, Texas, 10 o'clock a. m. there will be sold at Public Auction to the highest bidder for cash at front door T. & P. Freight Office in Toyah, Reeves County, Texas, the following articles shipped by G. T. Green, from Burkburnet, Texas, on 5, 16, 1921, consigned to Jess Green at Toyah, Texas, refused by consignee:
One car load auto well drilling outfit.
Owner may obtain shipment prior to time of sale by submitting proof of ownership and paying all accrued charges, including cost of this advertisement. Unclaimed.
GEO. W. HENDERSON, Agent.
3-4t.

SHERIFF'S SALE.

The State of Texas, County of Ward.
Notice is hereby given that by virtue of a certain execution issued out of the Honorable Justice Court of Precinct No. One, Ward County, the 25th day of August, 1921, by T. B. Anderson Justice of the Peace of said Precinct No. One, Ward County Texas, for the sum of Fifty-four and 30/100 Dollars and costs of suit, under a Judgment, in favor of John Hibdon in a certain cause in said Court, No. 421 and styled John Hibdon vs. W. N. Townley, placed in my hands for service, I, H. J. Wade as Sheriff of Ward County, Texas, did, on the 31st day of August, 1921, levy on certain Real Estate, situated in Ward County, Texas, described as follows, to-wit:

The undivided one-half interest of W. N. Townley in Lots five (5) and six (6) in block seventy-nine (79) in the town of Barstow, Texas, according to a map of the plat of the said town of Barstow, Texas, recorded in book 1 at page 549 of the Deed Records of Ward County, Texas, and levied upon as the property of W. N. Townley and that on the first Tuesday in October, 1921, the same being the 4th day of said month, at the Court House door, of Ward County, in the city of Barstow, Texas, between the hours of 10 a. m., and 4 p. m., by virtue of said levy and said execution I will sell said above described Real Estate at public vendue, for cash, to the highest bidder, as the property of said W. N. Townley.

And in compliance with law, I give this notice by publication in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in the Enterprise and Pecos Times, a newspaper published in Reeves County. Witness my hand, this 31st day of August, 1921.

H. J. WADE,
Sheriff, Ward County, Texas.
Jno. W. GREEN,
Deputy.

PERSONAL

Mrs. Harry Anderson returned Sunday from a month's visit to relatives in Oklahoma City.

Phil Pryor and Misses Jane Looby and Ora Pruett are week-end visitors to Mrs. J. L. Moore and son, Will, at their delightful home at Brogado.

Mrs. Louis Scott and baby, of El Paso are in Pecos this week visiting her sister-in-law, Mrs. Clinton Ezell.

Mrs. C. J. Magee left last week for Chicago, after spending the summer with her husband, the good doctor, where she will resume her duties in the school room again.

Miss Caroline Sullivan left recently for Sinton where she will teach the ensuing year.

G. G. Breen and family expect to leave Saturday for Roby to attend the trial of J. W. Forrester, charged with the killing, it is understood of the late Frank Posey and wife. They will visit relatives on the Plains for a week or more before returning home.

Miss Fannie E. Clayton who has spent almost ten years at Balmorhea in charge of the telephone office there left for her old home in Waynesburg, Pa., Wednesday. Miss Clayton has made many friends in Reeves county who will regret to learn that she has returned to Pennsylvania.

Mrs. S. E. Wilson left Thursday for Roby where she will attend the trial of Forrester, charged with killing her brother, Frank Posey.

The Hall family expect to leave this week for Roby to attend the trial of Forrester, who it is alleged, was implicated in the killing of their daughter, Mrs. Frank Posey.

Mrs. L. W. Anderson and children and sister, Miss Celia Prewit returned Saturday from a delightful three week's visit to California.

Phil Pryor is spending a part of his vacation with Will Moore at Brogado.

Mrs. J. F. Gannt and baby son, J. F. Jr., have returned to Balmorhea after a few days visit to her mother, Mrs. J. R. Hines. Mrs. Gannt has charge of the telephone switch board at Balmorhea.

Miss Celia Prewit left this week for her home in Dallas, after a visit of several weeks to her sister, Mrs. I. W. Anderson.

County Attorney Clem Calhoun was a business visitor in Fort Worth and Dallas the fore part of this week.

The adies of St. Marks' Guild will hold a cake sale at the Pecos Mercantile Saturday, beginning at 10 a. m.

The Pecos & Northwestern Telephone Company reports that they are now in position to install telephones in any part of the city. The condition that has existed for the past two years of not having cable space in some parts of the city, and thereby not being able to make any new connection, has been overcome by the putting into service of the new cable running up fourth street.

Mr. and Mrs. G. W. Stancliff came in Tuesday from a visit to their sons in Nebraska and Ohio and a daughter in Kansas City. Mr. Stancliff says they were on the train a few miles out of Kansas City Saturday which was held up by a lone robber and an effort made to rob the passengers. It was an exciting time, he says, but the bold bandit was finally subdued and bound hard and fast until the arrival of the Sheriff who took him in charge. The bandit never got to his car but nevertheless there was much activity in the way of hiding money and jewels. They had a most delightful trip and say their children are all doing well and making money.

METHODISTS WIN FIRST OF FINAL SERIES
Heavy hitting by the Methodists won the first of the final series of the Church League for them. Their opponents were the Baptists and the score was 12 to 0. The Christians and Baptists clash next Thursday evening, and the Methodists and Christians meet the following week. All three teams were tied before Thursday's game.

RESOLUTIONS BY INSTITUTE
Pecos, Texas, September 16, 1921.
Whereas, the members of the Consolidated Teachers' Institute held at Pecos have voted to have the following resolutions drawn up.
Therefore Be It Resolved, That:
1. The members of The Consolidated Institute wish to extend their heartfelt thanks to the Chamber of Commerce of Pecos, the Parent Teachers' Association, and to the people of Pecos in general.
2. Be It further Resolved: That the splendid efforts of these people will long be remembered by each of the members of this institute.
3. Furthermore Be It Resolved: That copies of these resolutions be sent to the Pecos Chamber of Commerce, the Parent Teachers' Association, and to the Pecos Enterprise and the Pecos Gusher.
E. WATSON,
Chairman Committee.

SIXTY BODIES FOUND NEAR THORNDALE
Thorndale, Milam Co., Texas, Sept. 14.—Flood waters from San Gabriel River and Brushy Creek have subsided. Sixty bodies have been recovered and searching parties are looking for twenty others reported missing. The greatest loss of life was at Lanesport, ten miles northwest of Thorndale, where twenty-three bodies were found. Seven bodies were found near San Gabriel five miles north of here.
The bodies of Mrs. M. L. Brown and son, Lee, were found at Kellville gin, on Alligator Creek, seven miles north of Thorndale. Bodies of two white children and three negroes were found on Brushy Creek, about eight miles southwest of the city.
Waters from Brushy Creek came to the edge of the city, but no loss of life or property in the city. Leaky roofs on stores caused damage to stock of goods. Many hundred head of live stock were lost near by in Brushy and San Gabriel bottoms. The rainfall was twenty-five inches. Practically no corn or cotton had been gathered from bottom lands and the loss to crops will be great. A force of 165 men working on the I. & G. N. Railway here is repairing the track and bridges, which will allow trains to pass here Thursday and Thorndale will receive its first mail since last Friday. Telephone and telegraph connections were made Tuesday.

TO STERILIZE COTTON SEED

Efforts to find out how much cotton seed would be sent to a sterilizer if one was installed in Pecos are being made by the Chamber of Commerce and the Pecos Power & Ice Company.

The latter concern is considering installing a sterilizer if a sufficient amount of cotton seed can be assured to justify the investment.

The exact figures are not yet available as the demonstration of the sterilizer perfected by the Federal Horticultural Board representatives was postponed until Thursday. After a thorough test of this machine the cost figures of operation can be compiled, and if by that time the amount of cotton seed that will be available is determined the local company will be able to set a price on the work and submit it to the farmers for approval.

Due to the general excellence of the Pecos valley cotton this year and the ravages of the boll weevil in Eastern Texas there is expected to be a very healthy demand for seed this winter, and good prices are expected to prevail. A number of inquiries regarding seed have already been received by local organizations.

Because of these conditions it is anticipated that it will be a paying proposition for the farmers of this vicinity to have their seed sterilized. Sterilizing the seed will permit it to be used for whatever purpose the farmer desires.

When sterilized the seed can be returned to the farm for feeding or for seeds, or may be sold on the open market. Under the federal regulations the seed can now only be sold to oil mills in a restricted area and this regulation confines the bidders to the one mill at El Paso.

THIRTY ACRES BRING \$1,250 PER ACRE
Mexia, Texas, Sept. 14—Blake Smith and others sold today thirty acres out of the J. Stuberance tract: one and a half miles northwest of the Desenberg well, for \$37,500, or at the rate of \$1,250 per acre. Forty acres off the south side of this same tract sold for \$1,500 an acre to Houston men.

The Kirby Oil Company's Nussbaum No. 1, after drilling into a second sand for more than forty feet is now being prepared for completion. Much excitement and interest is centered on this well and more than one million dollars has changed hands for leases in that vicinity.

To Cure a Cold in One Day
Take LAXATIVE BROMO QUININE (Tablets) It stops the Cough and Headache and works off the Cold. E. W. GROVE'S signature on each box. 30c.

EDMONSON'S MARKET
Highest Quality—Lowest Prices
Will give coupon tickets for Rogers Silverware with every 25c purchase beginning Saturday, September 10th.

NOTICE TO FORD OWNERS
Why You Should Use Only Genuine Ford Parts

CONNECTING RODS
Genuine Connecting Rods are made from Vanadium Steel forgings, with bearings of high pressure babbit containing not less than 85 percent tin. This high quality babbit together with special casting method imparts to the bearing a Brinnell hardness of 30 capable of withstanding heavy wear.
Imitation con rods are generally made from carbon steel forging which are inadequate to bear the constant side stresses imposed on a connecting rod. The result is a bent rod and a knock in the motor.
Genuine Ford con rods when worn may be exchanged by us for a charge of \$1.00. New con rods sell for \$1.75.

AXLE SHAFTS
The following analysis shows the relative value of the material used in both genuine and the average counterfeit Axle Shaft.

	Genuine Ford Axle Shaft	Counterfeit Axle Shaft
Composition	Chrome Vanadium Steel	Carbon Steel
Tensile strength	170,000 lbs. per sq. in.	45,000 lbs. per sq. in.
Elastic Limit	150,000 lbs. per sq. in.	40,000 lbs. per sq. in.
Reduction of area	55 percent.	50 percent.
Harness	320	100

Tests have proven that the average life of a Vanadium Shaft is three times that of a carbon steel shaft.
These comparisons apply in a relative degree to every Vanadium Steel part. Wherever strength is essential Vanadium Steel is used to insure it, the best of steel is vastly improved by that treatment. The Ford Motor Company have the most complete up-to-date heat treating equipment in the world where each piece of steel is scientifically heat treated to bring out the physical properties required for the work it is to perform.
To insure getting Genuine Ford Parts bring your car to us to be repaired.

COLLEGE OF INDUSTRIAL ARTS
(STATE COLLEGE FOR WOMEN)
DENTON, TEXAS
The College of Industrial Arts offers the following advantages to Texas girls: (1) a pleasant, healthful, and accessible location in the State of Texas, (2) an unimpeachable moral and religious environment, (3) freedom from distracting internal and external influences which tend to lower the morale of the student body and the value of the work of the College, (4) a standard of living that discourages extravagance, and promotes a democratic spirit in keeping with sound economy and with the best American traditions, (5) courses of study that combine sound culture and accomplishment with preparation for practical, useful living; that chiefly keep in view the needs of the present and the future; and that are flexible enough to allow, within safe limits, conformity with the aptitudes and inclinations of the individual student, (6) a faculty of college and university trained specialists—men and women of maturity, scholarship and demonstrated teaching ability, (7) an administrative system that develops initiative, resourcefulness, and self-control on the part of its students, and fosters the highest ideals of character and conduct.
It is a College of the first-class and gives literary, technical, and vocational training of the best quality, designed to develop mental discipline, social culture, spiritual vision, and efficiency. It confers the degrees of bachelor of arts, bachelor of science, bachelor of music, bachelor of business administration, and bachelor of literary interpretation; awards vocational diplomas and certificates, and issues teachers' State certificates.
The next session of the College opens Tuesday, September 20, 1921. For further information or for the latest catalogue, address
F. M. BRALLEY, LL. D.
President, College of Industrial Arts,
Denton, Texas.
