

MILLIONS TO BACK POTASH DEVELOPMENT

GRADE AND LONG LIFE OF PECOS OIL PROMISING

The high price of the Pecos oil and the promising fact of lasting production from the famous Pennsylvania sand which composes the stratum furnishing the flow are the most interesting developments in the oil field of the Pecos valley this week.

H. B. Ramsey, manager of the Toyah Bell well, has returned from El Paso and reports the sale of the oil from his well at \$3.90 per barrel. The Rio Grande Refinery is the purchaser of the oil. This high price proves the value of the product from the Toyah Bell well. Much is heard about the famous Mexia field. But Toyah Bell oil is selling for twice that received for the Mexia oil.

Geologists and old oil men who have examined the producing sand of the Toyah Bell declare that it is identical with the famous Pennsylvania sand and is found in only two other fields in America, in Pennsylvania and Kansas. And production from this sand in those fields is of very long duration, some of them having been producers twenty-five years. This fact shows that the Pecos field is attractive for the reason that wells can be drilled here at great depth and be lasting producers of big

money. The gushers which were brought in in the Ranger field and became world famous, while they lasted, got their production from a black lime, which has been called by some to be the Pennsylvania sand but which was in reality a lime of a compact nature, and the wells had to be shot for the production to be realized and they have been of only a few months duration. The same is true in a similar manner in the Mexia field. But the sand in course in the Pecos field and promises production for a dozen years or maybe a quarter of a century. So wells drilled even at a great depth and at considerable expense are big paying investments when it is considered that for a number of years steady production may be had and that of a high priced oil.

The workmen at the Toyah Bell are drilling but are having to go carefully and slowly because with every move of the cable in the well the oil gushes up in the way, making rapid work precarious and dangerous. One flow of the well the past week almost drowned one of the workmen. The production is increasing day by day. The flow is expected to be steady within a few days.

EXTRA!

Just after The Enterprise went to press Friday evening the Toyah-Bell well produced what is conservatively estimated to be 300 barrels of oil in one flow. It flowed steadily for one hour's time.

This is the largest flow the well has made at a single head and it flowed four or five times as long this time.

The drillers had been drilling carefully and slowly all day and then started to swabbing the hole when the big flow came.

Great excitement prevails in Pecos over the news. When The Enterprise called up H. B. Ramsey at the well he verified the above report and said that the results following Friday's work were very satisfactory. The management is expecting the well to get better each day. Work has to progress slowly because at every move of the tools the oil would gush over the top of the casing and get in the way of the work.

FIFTY THOUSAND ACRES IN PECOS VALLEY SECURED

Developments in the interest of Potash mining in the Pecos Valley have come rapidly during the past few days.

Leases for Potash, covering 23,000 acres of land were filed in the County Clerk's office of Reeves county yesterday and there are millions of dollars back of the development contemplated.

A new company, fostered by Ira J. Bell, of Pecos has been organized and leases covering 50,000 acres have been secured. He has organized The Pecos Company, a holding company for the purpose of securing acreage, making tests and initiating development for Potash. This holding company is a part of a corporation being organized in New York this week with a capital of \$5,000,000. Telegrams received by The Enterprise, from Mr. Bell in New York, state that he has been successful in his efforts there to launch the big Potash developing corporation.

Actual work in developing the lease is to be started at the earliest possible date. Ten core tests are to be made, one on each of the ten thousand acres already leased. The most of the acreage is known to lie along the Pecos river, with the river as the line on the west.

It is understood that much of the land under lease by the new concern has been put into the company in exchange for stock in the corporation and owners of the land are to receive five percent royalty of the production.

It is not speculation as to whether Potash exists in the area to be developed, for oil well drilling has proven up several areas of the field already. The core tests are to ascertain more definitely the area of the field, the depths of the strata of potash salt and ascertain where mines for production can be established for the greatest results from the expense involved. Mining for potash entails much equipment, enormous expense and the employment of hundreds of men. During the past four or five years the price of potash has ranged from \$20 to \$300 per ton and at the present time, when practically all America's supply of the fertilizer has to be imported, there are more than a million tons used annually.

It is said to be the purpose of the new company to invest as much in establishing a new and additional market for the product as well as developing the vast area of the mineral which is known to exist in the Pecos territory.

All tests made in this section of the

NEW LOCATIONS MADE FOR DRILLING IN PECOS FIELD

New locations have been made for three wells in the Pecos oil field the past week.

One of these locations is about three miles West of Oria and is in section 16, block 57, township 2, T. & P. railroad survey, Reeves county. And the drilling is to be done by The Indiana Oil Company, a strong corporation organized of Indianapolis business men. Willis Wright, President of the New Mexico Oil Corporation and manager for the Indiana company was in Pecos the past week

and said that a derrick is to be built on the above mentioned site within a few days.

This same company has also made a location North of the Toyah Bell near the New Mexico line, the exact data of which could not be obtained.

The Mutual Operating Company of Los Angeles, California, has made a location north of the Toyah Bell well, just over the New Mexico line. A derrick is to be erected within a few days, according to Mr. Wright, who is also an officer in this company.

After some delays at the Pinal Dome Corporation's well in Loving county, drilling operations have been started with the eight inch bit below 3300 feet. This company has drilled to 3475 feet in Pecos county.

The Trans-Pecos Oil Company has drilled to 1460 feet in their Ward county location, but are now temporarily shut down to secure a new drilling cable. The operations were stopped in red shale formations

WIRELESS MACHINE IN PECOS RECEIVES NEWS FROM DISTANT CITIES

That it may not be very many months until Pecos will have wireless telephone communication with the rest of the world for use of the general public is highly probable, according to those who have been making experiments along this line.

There is an instrument in Pecos now, owned by Ralph Williams, which receives messages from cities thousands of miles away, and this wireless outfit has been installed at the comparatively small expense of approximately \$150.00. Messages are received clearly and distinctively on this instrument every day.

Mr. Williams has heard messages from Hawaii Islands in the Pacific ocean and frequently hears conversations being transmitted by wireless telephone between Catalina and Los Angeles, California,—this being heard nearly every morning. He has heard the time soundings from many cities. One day he received at twelve o'clock Pecos time a dispatch from the great Arlington wireless station at Washington, sounding ten o'clock time there. Then at 11 o'clock he heard Balboa, Panama, sound the time. Then at 1 p. m. he heard the time sounded at San Diego, California. At five in the afternoon he heard the same time sounded by the Government station at Pearl Harbor, Hawaii. At eight o'clock that evening Annapolis was heard to sound the time.

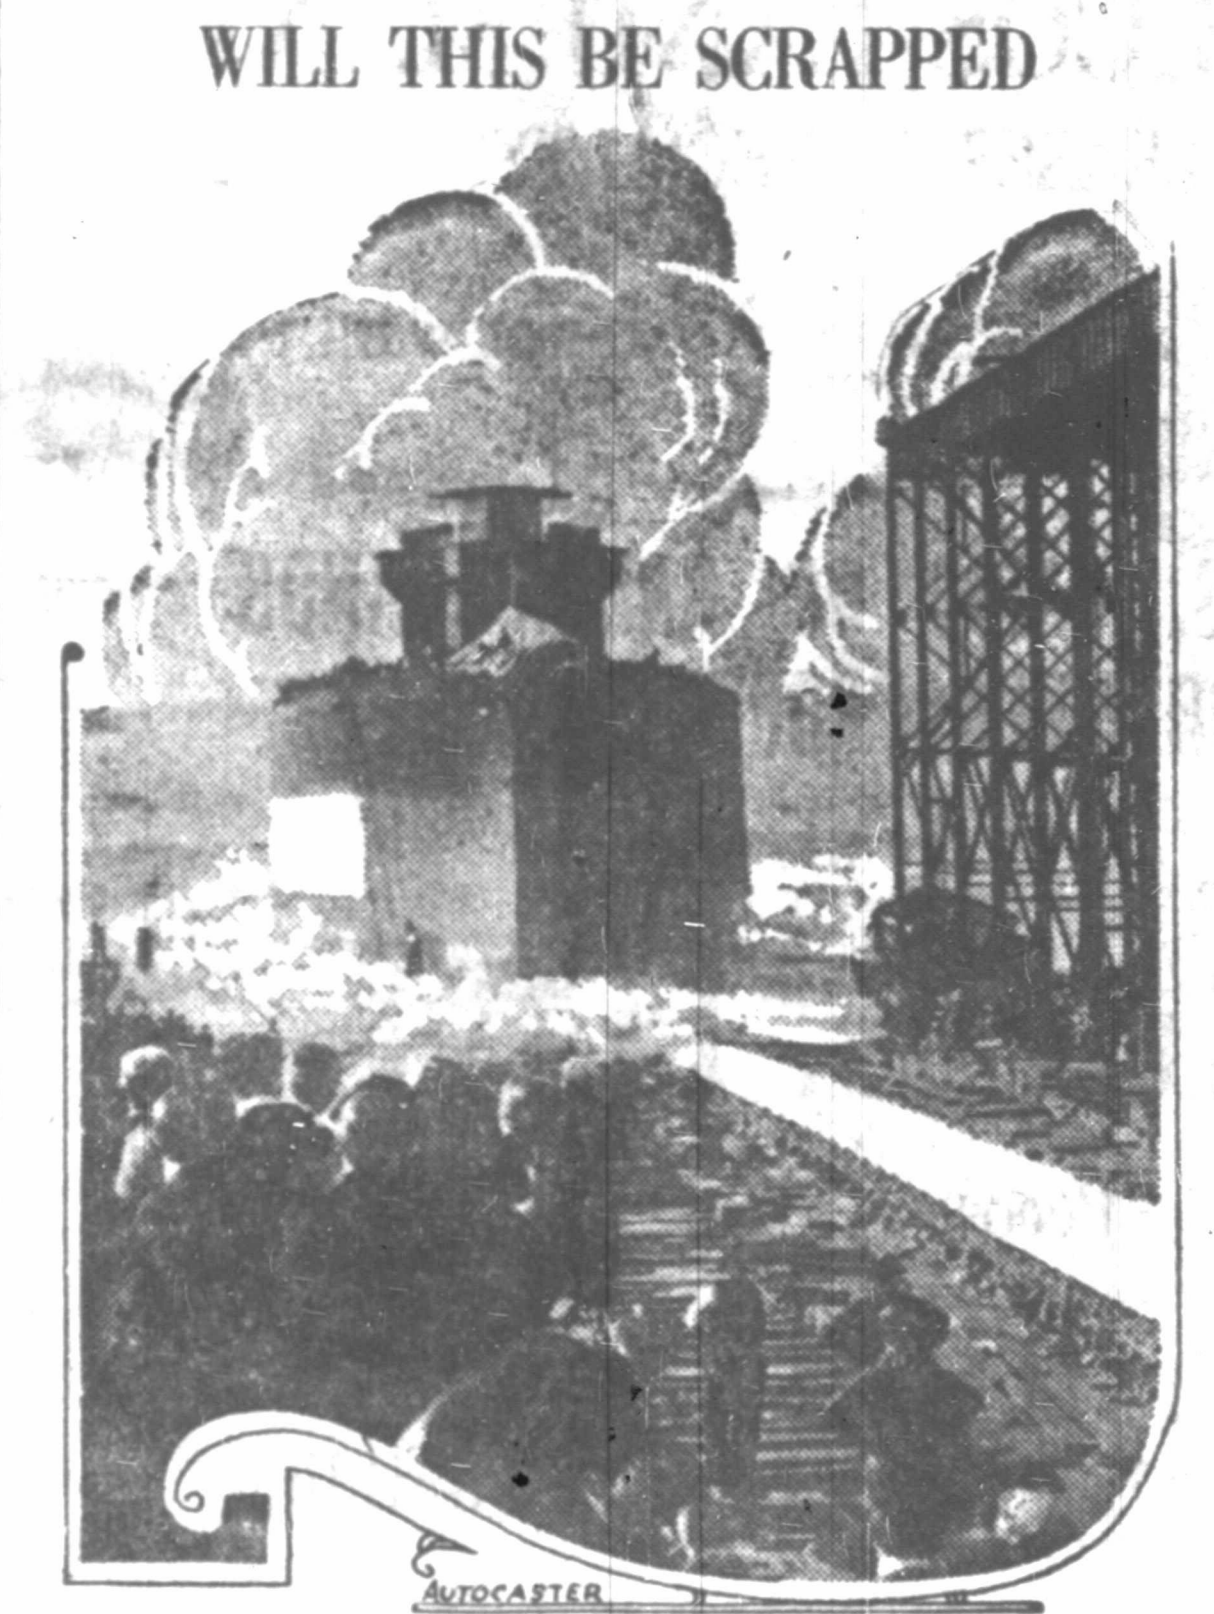

Last Tuesday night Mr. Williams

heard a message from Denver, which was being relayed from New York telling of the awful Theater accident in Brooklyn in which a number of people lost their lives. Upon arrival at his office Wednesday morning he told the news to the other men in the office and his story was verified almost word for word by the El Paso Times when the paper was brought from the train later in the day. He also heard this week some beautiful music, a popular march being played by a great band, possibly the President's Marine Band in Washington.

Mr. Williams is now installing a sending apparatus for his wireless outfit. This part of the equipment is very expensive and when completed he will be able to communicate with other wireless stations thousands of miles away.

It is said that the altitude of Pecos and the atmospheric conditions of this section enables a wireless to do extraordinary work.

Because of the long stretch of territory in this western country over which wires must be strung and the long distance between towns Pecos has no telephone connection with El Paso and other cities two and three hundred miles away. It is believed that the wireless may soon be developed to the point that it will be feasible for public service stations to be operated between Pecos and all towns of this Southwest.

Here is the scene at Newport News when America's latest and most powerful dreadnaught, the West Virginia, was launched the other day. In the picture, the ship is just entering the water. If completely the West Virginia will cost over forty million dollars, but if the Hughes' plan is adopted by the nation, it will be scrapped.

GOOD TIME BEING MADE ON WELL OF C. H. WILLOUGHBY

The drill is now making good progress in the Willoughby Well No. 1 in Section 2, Block C-13, Reeves County.

In this territory Northwest of Pecos there is said to exist some of the most promising structure to be found in the whole Pecos field and much work is progressing in that territory now, too. Geologists declare that great production may be expected at a shallow depth in this area. Mr. Willoughby's well is now down below the 100 foot mark. Hard limestone was drilled through the first 60 feet and since then the drilling has been working in a blue shale.

GALLAGER IS NOW DIRECTING WORK AT THE BELL WELL

It is expected that actual drilling will be started Wednesday on Bell No. 1, located in Southwest quarter of section 20, block 2, H. & G. N. twenty-two miles Northeast of Pecos. The hole is now 2220 feet deep and since the derrick burned some time ago preparations have been under way to resume drilling.

W. B. Gallager, known well to the oil fraternity, is now in charge of the work at the Bell No. 1 and is said to be making good headway in preparations. Work is being done this week on the boiler and engine.

VILLAGE IS ALMOST DESTROYED BY FIRE

A report from Lubbock says that the village of Southland, eight miles south of Slaton, was almost wholly destroyed by fire Friday night. The blaze started in a Hardware store. Very little insurance was carried. The Slaton fire department responded to the call but there was no water supply except a small reservoir located in the street for stock water.

BIG LAND DEAL IS MADE BY PECOS MEN

The Reeves County Oil Land Lease Exchange has just closed one of the largest deals that has been made in Pecos for sometime. It represented an exchange of 600 acres of land in Michigan owned by L. B. Minor, of Amarillo, Texas, for some irrigated land in Ward county and vendor lien notes to the value of \$45,000.

TOYAH SHALLOW OIL FIELD ATTRACTING MUCH INTEREST NOW

Developments in the Toyah shallow field West of Pecos are attracting much attention this week.

Since the Pico Company started work on putting down shafts for the mining of the oil in the shallow pool near Toyah many oil men representing big drilling and refining interests are turning eyes toward the field.

S. Warrington, backed by a company with a capital stock of quarter of a million dollars, is in the field this week, and the work that he is planning calls for no small outlay of money and will mean much to the oil industry in the Pecos field. He would not talk much for publication this week but big things are expected to be announced within the next few days.

The Pico Company is pushing the work on the initial shaft preparatory to mining the shallow oil in large quantities. They have in charge of

the work some experienced engineers from California and already have the shaft down to a depth of sixty feet. It will be carried to a depth of 90 or a hundred feet. A well near the shaft found the oil stratum at 90 feet and the several wells from which oil is being sold hit the producing strata at from 90 to 200 feet. There are now twenty producing wells in Toyah shallow field.

This oil is of a good grade and some of it is being used for lubricating purposes in Pecos every day. Part of the Enterprise printing machinery is lubricated with it and it is used in the crude state without the touch of refining processes.

It is understood that the showing in the Toyah Bell has caused a decision on the part of the Pico Company to abandon the pumping well, which they believe exists at 1950 feet and go to the 4,500 foot level in search of oil similar to that found in the Toyah Bell.

TRADE GROWING IN MANY SECTIONS NOW

That trade is rapidly increasing all over the country is the report of banks to the Federal Reserve system. The Reserve Board reports that during last week there was an increase of \$787,000,000 or about ten per cent over the preceding week. This represented the reports from 151 clearing house centers.

Indifference is the thief of many

BALMORHEA SHIPS LOTS OF CATTLE AND ALFALFA HAY

Balmorhea was very busy this week as a shipping point, according to I. L. Barlow, the station agent at Balmorhea for the Pecos Valley Southern Railroad.

There were eleven cars of cattle and eighteen cars of alfalfa hay shipped from that point up to Wednesday night and there are still other

THE MILKING SHORTHORN

Of interest to all dairymen, and encouraging to milking shorthorn breeders, is the fact that the "best cow of any breed or cross" at the 1921 London Dairy Show was a milking Shorthorn, with a record of 9,000 pounds. Interest in this breed not only in California, but all over America, is increasing. Certain advocates of the beef type maintain that no animal can reach its highest development when bred for a dual purpose. Many dairy breeders, also, see no justification for combining beef with milk production. But these arguments are answered by the dual purpose boosters with the assertion that the ideal general purpose farm cow is the one that makes both meat and milk. For, they point out, the steers can be raised and fed with profit, while as much milk can be secured as from average cows of dairy breeds, not to mention the possibilities of attractive profits from breeding stock. The milking Shorthorn breeders have many points in their favor, and are making the most of them.—Exchange.

No Worms in a Healthy Child

All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a General Strengthening Tonic to the whole system. Nature will then throw off or digest the worms, and the child will be in perfect health. Price 50c per bottle.

Prohibition Commissioner Hayes in Washington has announced that prohibition enforcement organization in Texas and along the Mexican border will be greatly increased and tightened to prevent a mugging across the border.

OVER 1,000,000 PERSONS WITHOUT HOMES IN GERMANY

Berlin, Nov. 25.—More than 1,000,000 dwellings, apartments or rooms are needed in Germany to relieve the housing shortage which has been steadily increasing for the last six months, especially in the eastern cities, which are crowded with Russian refugees, says an official statement of the housing office.

In Prussia alone 585,000 rooms are in demand, an increase of 50,000 in three months, and reports from every large city in the republic declare the housing situation is growing serious, with the advance of winter. The need in sixty-two of the largest cities is described as urgent.

The government had indicated its intention of abandoning the "rationing" of rooms within a short time, but the fact that building operations, abandoned during the war, have not caught up with the demands has necessitated a continuance of control of dwelling space. Families, as well as individuals, are permitted to occupy only such rooms as are absolutely essential.

A CITY WITH PLENTY OF WATER

The Enterprise congratulates Big Spring on its recently developed water supply. The town there now has a new well which produces to the capacity of 5,800 gallons per hour.

The work of increasing the capacity of the reservoir from 600,000 to 1,500,000 gallons will be completed in a short time.

Nothing is so valuable to a city as a good supply of good water and it is something that few cities can boast

TEXAS LEADS

Texas leads all states in value of cattle, sheep, goats, and mules, according to census reports. The total value of cattle on January 1, 1920, was \$300,837,223; sheep, \$31,591,662; goats, 9,735,723.

RED CROSS HELPS SOLDIERS

From a life drab and dull, without entertainment or recreation, to one in which golf, tennis, baseball, music, the theater and other forms of amusement help lighten their inevitable burden of care is the experience of the 1,800 patients of United States Public Health Service Hospital No. 25, located at Camp Logan, Houston, Texas. Recreation for the disabled man is one of the most vital factors in assisting his recovery, medical authorities agree, and providing this recreation is the responsibility of the American Red Cross at this hospital. How the Red Cross puts this essential factor into the life of the disabled veteran in such institutions is shown in a statement outlining this important phase of Red Cross service to veterans of the World War.

Before the Red Cross workers entered the hospital at Camp Logan, there had been possible no organized effort to provide recreation for the patients. Not even an automobile to take them through the beautiful country around the hospital was available. Only a small proportion of the patients were in such condition that a trip to Houston, six miles distant, was possible.

Elections held during the past ten days in four States show large gains for the Democrats. The States were Kentucky, New York, Maryland and Virginia.

WHAT WILL 1922 BRING TO YOU?

You can make it bring you a good salary as stenographer, bookkeeper or for other office work along about next fall, if you enroll for one of these practical, intensive and through business courses at the Texas Business College of Weatherford in January. The new term opens just after the Christmas holidays and the ensuing six or nine months can be made most profitable to you if you enroll at that time. Write President T. H. Gatlin, for illustrated catalog and complete information. The school is located in the First National Bank Building, Weatherford, Texas, and all the Weatherford banks, the Chamber of Commerce and merchants generally of that city recommend this school.

 No. 35, In Bankruptcy.
 In the United States District Court for the Western District of Texas. In the Matter of Jim Payne, Bankrupt.
 The creditors of said Jim Payne are hereby notified that he has filed a petition for a certificate of discharge in bankruptcy, and that the same, under an order of said Court will be heard before Ben Randals, Referee, at his office in Pecos, Texas, at 10 o'clock in the forenoon, on the 28th day of December, A. D. 1921, at which time and place the creditors of said bankrupt may appear and show cause, if any they have, why the prayer of said petition should not be granted.

D. H. HART, Clerk.
 By J. F. CAROLINE, Deputy.
 Dated November 17, 1921.

FAMILY OF SEVEN
 That a family of seven can make a good living from nineteen acres of land has been demonstrated by Mr. and Mrs. R. M. Dobbins who live in Denton county, Texas.
 This couple started their home on nineteen acres of land ten years ago, closely cultivating every inch of it. With the exception of sugar, corn and pepper, they raise everything they eat on this farm; and most of the clothes of the family are made in the home by the wife and mother. There are four children, three girls and one boy and there is also one of the children's grand-mother's who makes her home with this family. The past season, Dobbins raised ten varieties of hay, twenty-nine varieties of garden seed, ten varieties of grain, twelve varieties of vegetables and three varieties of meats which were canned. Besides that, all the poultry, butter, eggs and milk seven healthy appetites can consume enormous quantities of fruits are dried and canned and the family eat what it can and cans what it can't. There are two cows, three heifers, a span of mules, and a car on the place. This family exhibit at the Denton County fair this fall carried off the first prize of \$100 in cash.

IN THE BREWSTER COUNTY FIELD
 Wilson No. 2, Western Petroleum Company—Last setting of casing failed to shut off the water. They are now pulling all the six inch casing and preparing to set eight inch all the way to the bottom, 3200 feet. The eight inch casing is on the ground. Last Friday another boiler blew up but they were under steam with another in less than a day. Work is going nicely and they expect to be able to resume drilling shortly.

Doddridge No. 1, Fortland Oil & Gas Company—Drilling goes on at 1400 plus feet. They have encountered some very encouraging signs, some oil and a new sand. Mr. Doddridge expects to hit pay under 500 feet more.

Nine Point Oil Company—Drilling continues, now in very hard rock. They have found the formations just as they expected, and have picked up an oil showing.

Brewster Oil Co.—Drilling on the W. H. Kokernot ranch is said to be making good progress.

The Supreme Court of the United States refused this week to hear the case brought by Texas Cherokee Indians involving title to more than a million acres of land in Texas.

The difference between law violation and law enforcement is indifference.—Geneva Times.

HOUSEWORK IS A BURDEN

Women's lot is a weary one at best. But with backache and other distressing kidney ills life indeed becomes a burden. Doan's Kidney Pills have made life brighter for thousands of women. Read what Mrs. J. H. Shepherd, Baird St., Midland, Tex., says: "Quite a few years ago I had occasion to use Doan's Kidney Pills. I had a great deal of trouble with my kidneys and back. At times my back would feel so sore and lame, the least work would be a drudgery. I would have headaches and on stooping over, I would get so dizzy, everything would turn black in front of me. I was caused a lot of inconvenience to the too frequent action of my kidneys, and I was all played out, with no ambition to do anything. I started taking Doan's Kidney Pills and they cured me entirely. I haven't been troubled since."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Shepherd had. Frost-Milburn Co., Mfrs., Buffalo, N. Y.

The Quinine That Does Not Affect the Head
 Because of its tonic and laxative effect, LAKATIVE BRONCO QUININE is better than ordinary Quinine and does not cause nervousness nor ringing in head. Remember the full name and look for the signature of E. W. GROVE.

Irrigation is the order of the day in the west. The more we talk it, the more we study it and the more we realize the need of it the sooner it'll reap great returns for us.

Many acres are remaining in arid waste because the abundance of water near at hand is not put upon the soil and luxuriant fruitage produced.

When a man can buy a whole Christmas turkey without mortgaging his home it's fairly convincing evidence that this country is in a prosperous condition.

Chicago, Dec. 2.—The newest thing in the farm bureau movement is a woman's department which shall, just as nearly as possible, represent the great and important congregation of farm women in the country.

President Howard of the American Farm Bureau Federation, has appointed a committee of four women to work out the details of the women's farm bureau department and they will no doubt present an outline of a plan shortly.

The committee consists of Mrs. Vera Busick Schuttler, Missouri; Mrs. John C. Ketcham, Michigan; Mrs. Ezetta Brown, West Virginia, and Mrs. A. E. Bridgen, New York.

The personnel of the committee was chosen by President Howard from a long list of names of women already well identified with farm bureau or farm organization work. Mrs. Bridgen is known throughout New York for her active labor in developing the home bureau and president of the state federation of home bureaus.

Mrs. Vera B. Schuttler, chairman of the committee, has played an important part in the organization and development of the farm bureau in Missouri. She has served as a member of the executive committee of the St. Francois County Farm Bureau, a member of the executive committee of the Missouri Farm Bureau Federation, voting director in the American Farm Bureau Federation, member of the committee on relations to the College of Agriculture and Secretary of the Farm Bureau Roads Convention.

Mrs. Ezetta Brown is the owner and manager of a dairy of pure bred Holsteins and Jerseys in West Virginia. In addition to her dairy she operates two general farms. Mrs. Brown has had an active part in national affairs.

Mrs. John C. Ketcham also brings to the committee a wealth of experience. She was for years closely associated with her husband in his work as Master of the Michigan State Grange. For the first two years she was a member of the executive committee of Michigan Farm Bureau Federation. At present Mrs. Ketcham holds a number of important offices.

A woman with the title of Assistant Secretary will head a new department. The committee will also develop a program of work for women members of the farm bureau. This program of work will probably be largely concerned with the improvement of the social side of farm life. It will have to do with the establishment of community centers; the rural church, boys' and girls' clubs, consolidated schools, etc.

THE ENTERPRISE

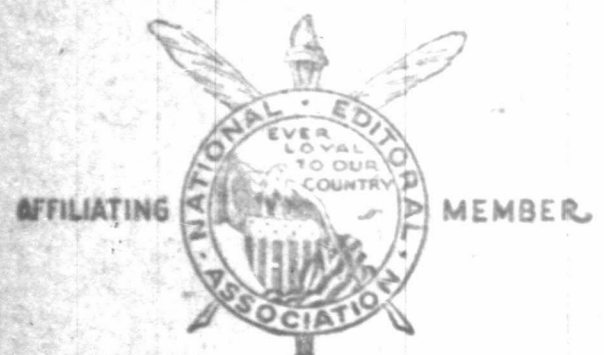

Pecos Valley News, established 1887; Pecos Weekly Times established 1897; Reeves County Record, established 1910; consolidated Nov. 23, 1912. The Enterprise absorbed Pecos Times June 1, 1917.

PUBLISHED EVERY FRIDAY JOHN HIBDON EDITOR, OWNER AND PUBLISHER ADVERTISING RATES Display, per inch, flat 20c

Subscription Rates One Year, \$2; Six Months, \$1.25. Positively in Advance

Entered as second class matter October 22, 1915, at the postoffice at Pecos, Texas, under the Act of March 3, 1879.

Foreign Advertising Representatives THE AMERICAN PRESS ASSOCIATION

A successful man nearly always looks his part. So does a tramp.

The fellow who really knows doesn't often announce it from the housetop.

Pecos needs are many, but they are not more than any other town. Ours will be met with due perseverance and active interest.

It has become the custom to search the hotel registers in Mexico, when a man disappears. It is easy to get across the border and is as wet after one gets over there—so "they say."

Officers of the law and social workers tell us that the opium fiend becomes a habitual liar. We know there was something wrong with lots of folks we know. There must be more opium used than we know about.

Why not establish a market for cream? If we can feed some of that stored alfalfa to the cows, turn it into cream, many dollars will come back into the home and community. It looks like Pecos ought to maintain a good paying creamery. At least it should have an agency for dairy products.

MORE OR LESS

It is hard to tell, just at this stage of the conflag at Washington, whether the conference on disarmament will mean more armament or less armament. All the bets that are being waged on the outcome are not of the optimistic character—rather on the side of a prospective increase in guns, armies and navies for the great powers.

LIVING AT HOME

A lengthy write-up is given in the daily papers concerning Mr. and Mrs. R. M. Dobbins of Denton County, Texas, because they produce all their living with the exception of salt, pepper and a little sugar, on their little nineteen-acre "ranch."

IN THE "PROMISED LAND"

Our contemporary, the Alpine Avalanche, carries this brief editorial: "Brewster county is greater in area than that of the land of Israel, within which happened nearly all the events that are recorded in the Old Testament."

The people of Pecos have this week enjoyed real clean entertainment from first class people and turned out an immense to each performance of the Hila Morgan tent theater, all of which goes to prove that a little advertising combined with a clean show and a reasonable price will win in Pecos.

The Farm and Ranch published at Dallas, ran in its last issue an editorial which was published in the same paper in 1890. This editorial we think is just as applicable today and will probably be thirty years hence as much so as thirty-one years ago.

The editorial mentioned follows: "Farming always was, is, and always will be the best business under the sun, when the right man under favorable circumstances embarks in it. It is not a business in which one can become 'suddenly and violently stricken' with superabundant wealth, but it is one in which liberty in its fullest sense, and plenty in its amplitude may be realized and enjoyed."

OUR TEACHERS

It was a notable meeting of teachers held in Dallas last week, when more than seven thousand of the fourteen thousand teachers in Texas gathered for their annual convention. Many things make this session worthy of commanding the attention of every man and woman in Texas.

It certainly would not be unanimous when seven thousand of them from all parts of the country vote on it. Certainly our teachers feel the responsibility as 'custodians' of the mental development of our boys and girls—also their morals to a very large degree, since this responsibility has been pushed upon them.

Then also their plea for better pay should be heeded. We can not afford to have any but the best quality of manhood, womanhood and talent to teach the youth of our land. To have the best we must pay for it, else they'll be forced into other occupations.

Blanton runs for senate. It is a poor democracy that will allow a state to be represented in its national law making body by a man who will behave himself in a way that he has to bow in apologies to the other members of the body then go back to his constituents and declare that he will do the same thing again.

Of course it is easy to pick a bad egg once in a while but it is bad judgment if the same egg is picked again. Any fool can allow nearly any fool to fool him once but he is indeed some fool if he allows the same fool to fool him twice.

Blanton was brought before the House of representatives and almost expelled for conduct for which that body deemed fit to demand from him an apology. He made the public apology then hastened back to Texas and is asking the voters of Texas "if they'll let him run for the Senate."

Texas is beginning to gain respect and admiration throughout the United States, due to the progressiveness and the industry of the people. She has emerged from the primitive and taken her rightful position among the more advanced States of the Union.

CLASSIFIED

- FOR SALE—Eighty acres leased oil lands, fully paid and recorded, situated in Ward County, Texas. Make offer. A. O. Norreen, Agent, Pecos, Calif. 15-6t
- FOR SALE—6-room house. Will sell cheap to settle estate. Phone 137, Pecos, Texas, or Mrs. S. J. Wilson. 8-1t
- FOR SALE—Drilling tools, Standard rig, casing, all big hole stuff good for new, complete two full outfits for sale cheap for cash. Casing all sizes write or wire, W. P. Dunham, Copperas Cove, Texas. 8-1t
- FOR SALE—Texas Pacific Leases, rentals paid to Dec, 1921, in Block 54, Township 4; Block 53, Township 4; Block 55, Township 5; Block 54, Township 5; Block 58, Township 6; Reeves County, write for prices and description—J. E. Bowen, 1101 Montana, El Paso, Texas. 8-1t
- PAINTING AND PAPERHANGING A. L. Oliver—Painter & Paperhanger. Paint any color, \$3.50 per gallon. Wall paper at lowest prices—Phone 381. 35-1t
- LOST AND FOUND LOST—Winchester pump shot gun on Grandfalls road, \$5.00 reward, return to E. E. Dodson, Béuna Vista, Texas. 13-4*
- LOST—Pair eye glasses, gold frame with celluloid rim, double lens. In an S. T. Muck case. Return to J. G. Murray at Pecos Mercantile Co., and receive liberal reward. 3t
- ROOMS AND BOARD ROOMS FOR RENT—Mrs. Ed Vickers, phone 167. 2t
- FOR RENT. FOR RENT—Pasture nine miles of Pecos that will carry 500 head cattle.

"THE PROBLEMS OF WOMAN CITIZENSHIP"

Denton, Texas, Dec. 2.—"The Problems of Woman Citizenship," is the title of a bulletin issued by the College of Industrial Arts just now off the press and ready for distribution. Dr. Theodore G. Gronert, Director of the Department of History and Social Science, is the author of the bulletin. It has been prepared in response to the numerous requests that have come to the College from the woman's clubs and other organizations of women throughout the State who are eagerly interested in studying the problems which confront them as citizens, and it is believed that the bulletin will prove a real service to them.

ELEVEN PLAYS SOME PART WITH THIS BOY

A newspaper story out of Artesia, New Mexico, tells of the eleventh hour arrival of Master Jesse J. Whitted, son of Mr. and Mrs. Paul Whitted. He made his appearance at the home of his parents at the eleventh hour of the eleventh day of the eleventh month and weighed eleven pounds and the message was received at the newspaper office in Artesia at 11 a. m., the next day.

JANITOR AND DIPLOMAT

Germany's new representative to the Washington German Embassy looks different from the old "von" type that inhabited the big brick German headquarters in the national capital in the pre-war days. He looks a little sheepish, although he tries to look like a sport. They tell us he is having to act the part of janitor as well as diplomat. It doesn't hurt a fellow in the long run to reduce him to humble tasks sometimes.

FOR RENT—Furnished housekeeping rooms for couple—Chas. F. Manahan. 16-1t

NOTICE OF PARTNERSHIP

We, the undersigned subscribers, have this day entered into a limited partnership, agreeably to the provisions of the Revised Statutes, Title 102 relating to a limited partnership and do hereby certify that the name of the firm under which said partnership is to be conducted is A. S. Justice; that the general nature of the business to be transacted is the buying and selling as agents for others, all kinds of real and personal property, including oil and gas leases and assignments and the buying and selling, by said partnership, of all kinds of real and personal property including oil and gas leases and assignments. And the same will be transacted in the City of Pecos, County of Reeves and State of Texas, and that the name of the general partner of said firm is A. S. Justice of Brewster County, Texas, now temporarily at Pecos, Texas, and the special partners are John Perkins and I. L. Martin, Jr., both of the County of Brewster and State of Texas, that the capital contributed by said special partners is the sum of \$75.00 each, in cash, that the period that said partnership is to commence is the 10th day of November, 1921, and that it will terminate on the 10th day of November, A. D. 1922.

A. S. JUSTICE, General Partner. JOHN PERKINS, Special Partner. I. L. MARTIN, JR., Special Partner. 14-6t

SULPHUR REFINING STARTS AT PLANT LOCATED NORTH OF PECOS

Much work has been accomplished during the past few days in the development of the Sulphur mines which have been started Northwest of Pecos. Actual operations were started at the mines of the Toyah Valley Sulphur Company this week. New retorts have been installed at the plant. An imperfection in the first set installed caused a delay of several months in refining operations, although a considerable amount of the sulphur ore has been ground up and prepared as fertilizer, during the time of waiting for the refining apparatus to be perfected.

Courtney Dekalb, Chief Engineer of the company and W. E. Burch, an engineer of Fort Wayne, Indiana, visited the mines this week. This company's acreage has an enormous area covered with sulphur bearing rock of an unknown thickness.

SEVEN THOUSAND TEACHERS ATTEND STATE GATHERING

It is estimated that there were seven thousand teachers in attendance at the State Teachers Association annual meeting at Dallas last week. At this session plans were considered for a complete overhauling of the school to rural schools. Much of the convention's time was devoted to consideration of rural education. One of the resolutions adopted unanimously by the association asked that the State Legislature enact a law to prohibit the sale of cigarettes and cigarette papers. The association has a membership of 14,000 teachers and half of them attended the meeting. Another resolution would make it impossible, after September 1, 1924, for any teacher to be employed unless qualified with a first grade certificate. Another resolution called for many changes in salary schedules. M. H. Moore of Fort Worth succeeds Miss Lee Williams of Dallas president of the convention.

70 SECTIONS LAND SWEEP BY FLAMES

Hereford, Texas, Dec 1.—Seventy sections of land, or a swath 20 miles long and 5 miles wide was swept clean of grass by a fire which started at a point 20 miles southwest of here Wednesday. The flames caught from a camper's fire on the Ozark Trail between Dimmitt and Texico, men who fought it believe. More than 200 men fought the flames. Fifty cars of fire fighters from Hereford and Dimmitt fought the raging blaze with backfire and finally extinguished it shortly before it reached the Johnson ranch, an enormous tract. Another prairie fire was reported near Bovina.

F. D. Wesner passed through Pecos Wednesday with a truck load of fishing tools, which he took to Wesner-Anthony well in Culberson county. This hole has been drilled to 1100 feet when halted by a fishing job late last week.

H. & G. N. RY. LANDS FOR SALE IN REEVES COUNTY Survey Nos. 45, 47, 53, 55, E. half of 61, and 62, in Block 6; and Nos. 46; 47 and W. half of 48 in Block 5. The surveys in these blocks are situated from 5 to 8 miles from Pecos City, in the arroyo belt of the Pecos River country and will be sold only in whole sections. Also, surveys No. 49 in block 6 and Nos. 9, 13 and 15 in block 7. Also, surveys Nos. 1, 3, and 5, trouting on the Pecos River, in Reeves county, and Nos. 29 (in area survey) Pecos county. Also 12 surveys in block 11 and 3 surveys in block 12. None of these are river lands. All are in Pecos county. All these lands are under lease for oil, gas and mineral purposes and any sale of same will be subject to conditions. J. G. LOVE of Pecos is agent for the sale of all these lands situated in Reeves County and application should be made to him for the purchase of same. There is no local agent for the sale of the lands in Pecos County, and parties desiring to purchase any of same should apply to the undersigned. EUGENE CARTLEDGE, Agent and Attorney in Fact. ARRESTED TEXAS

TELEGRAMS FROM MANY STATES ASK FOR PECOS NEWS

Mail and telegrams received daily at The Enterprise office indicate an increasing interest in the Pecos oil field and also an increasing appreciation for the part The Enterprise is playing in informing the public as to the development and possibilities of this territory. This information is not published in an egotistical spirit but to show that men of many sections of the United States are vitally interested in this field. Messages have been received this week from many different states, including far away New York, Illinois, California, Mississippi. Last week messages were received from as far away as Central America.

Our business, like that of a grocery merchant, is conducted for personal and financial reasons. But first and above these reasons is the desire to serve the community in a large way—to be of service in moulding sentiment for good and in giving publicity to the world as to the wonderful resources of the Pecos county and information concerning development of these resources. Of course words of appreciation are received gratefully by us the same as by any other business man.

One of the many pleasing messages received this week was from our fellowtownsman, Ira J. Bell, who is now in New York in interest of a greater Pecos. His telegram follows:

"Please accept congratulations on the write-up of the oil field and cut in last week's Enterprise. Send ten copies to me at six hundred twenty-three Mills Building, New York City, and charge to our account. Am making good progress here."
IRA J. BELL.

BALSER HEFNER ACCIDENT.

TALLY SHOT WHILE HUNTING
Friday afternoon Balsar Hefner and Haskell Murray were out hunting when the gun of Haskell accidentally discharged and shot his companion. These shots entered into Balsar but it is understood that although painful they are not serious and he will be back with us again in a few days. Balsar was shot while hunting near the experimental station and Haskell carried him over three barbed-wire fences to the railroad track where he stopped a passing freight train and brought him to town.

HE COMES TO US FOR GERMANY

Snapshot of Baron Edmund von Therman, the German charge de affaires, who has just arrived in this country to reopen the German embassy in Washington.

HEAVY DEMAND FOR OIL

The export trade plays quite an important part in the price of crude. At the end of the war Europe naturally had quite a quantity of oil on hand. This has now about been used up, and with the increase in manufacturing and other industries in the foreign countries, United States refineries are receiving from foreign buyers rush orders, and many are using the cable.

This taken in connection with the revival in the automobile industry has created an immense demand for crude, as the refineries must have it to take care of the orders in hand, as well as for future calls. It is known that Michigan automobile factories will soon add on several thousand additional workers.

This makes the outlook for the oil industry bright indeed, and further and regular price advances in crude are expected.—The Oil World

MIRACLE PICTURE OF 1921—HARDING SENT BY WIRELESS!

Twenty minutes after this moment during President Harding's speech at Annapolis, the accompanying picture was ready for publication in Paris, over 3,000 miles away!

It is not a perfect picture, but IT IS THE FIRST SENT BY WIRELESS and after the first has been sent, as an experiment, there is nothing left to do but to perfect the process.

Incidentally, this is the first time that the picture here shown has been printed in an American newspaper. Popular Science Monthly obtained it from Paris, and this newspaper prints it herewith simultaneously with that magazine, by special arrangement.

The pioneer in photography by wireless is M. Edouard Belin, a Frenchman, and it was his radio apparatus that sent the accompanying picture from Annapolis, Maryland, to Paris, France, a few weeks ago.

He has been experimenting for years with machines for sending photographs by telegraph, and he has sent numbers of them over the wire and by cable. Finally, this year, he invented an apparatus to send them by wireless. He brought his machine to America, and when he learned that President Harding was to make a speech to the naval cadets at Annapolis, he connected it with the big wireless station there.

The result was that a paper in Paris had a photograph of the President speaking BEFORE he had concluded his address 3000 miles away.

WILL Consider option on 160 acres for a drilling contract. North one-half of section 34; block 29; Loving county. Abstract and titles brought down to date. J. T. Carley, 412 La Leaz St., El Paso, Texas. 16-4t (Advertisement)

WANTED—Five or six room house, furnished or unfurnished. P. O. Box 572, Pecos. (Advertisement)

The Pecos Angeles Oil Company has been putting ten inch casing in the hole to 920 during the past few days, and it was expected that this casing would be set and work resumed today. Due to cave-ins in the hole it was necessary to put in this string of casing, and it will be carried down the hole is drilled. Arrangements are being made to put on an additional crew at this well.

HILA MORGAN SHOWS DELIGHT PECOS CROWDS

Citizens of Pecos and Reeves county have this week been enjoying the Hila Morgan Shows, held in their own large tent theater near the courthouse.

It has been so long since the people of Pecos have had an opportunity to see a play other than motion pictures until one little girl asked her mother if they "were card board people."

Each and every member on the program so far this week received high praise by our people and the tent was filled almost to capacity each night. It is a company of artists which play at the Hila Morgan tent theater as well as ladies and gentlemen, and their return engagement will be looked forward to by our people with keen pleasure.

The Hila Morgan theater is different, it is clean, entertaining, helpful. Besides this the company have the good sense to show the press courtesies not accorded by the motion picture shows. The passes, which were generously bestowed, placed the recipients out of the beggar class and admitted them to reserved seats as well as to the peanut gallery. The Enterprise is glad to recommend the Hila Morgan people to all who like to see real people act in theatrical performances.

DRILLING FIELD NOTES

Work of cleaning out the Sunshine Oil Corporation's Laura well continues, and it was thought that today would see the completion of the cleaning out work, and that fishing operations under the cave-ins could be started late today. The well is down 2670 feet.

BASKETBALL TEAM ORGANIZES

Monday afternoon the boys basketball team met and elected the following Captain and Manager. This year under the coaching of Mr. Norman this team should rival the "Red Streaks" and should go undefeated through the season.

GUARANTY WELL IS DRILLING IN HARD LIMESTONE STRATUM

What geologist declare to be one of the most promising wells in this section is that which the Guaranty Oil Company is drilling in Section 11, Block 70, Reeves County, Northwest of Pecos. Shallow oil is predicted here. The well has just been started and has been able to make a very good footage showing because of the extremely hard lime rock which the drill has been working in since it left the grass roots. Fifty feet of this hard formation has been gone through. Everything is reported in good shape and the drillers expect to make more rapid progress as soon as the lime rock is passed through. C. A. Covey is the manager of this well and is enthusiastic over what the oil dopsters and geologists have predicted on this location. It is predicted that a good production should be secured here at a comparatively shallow depth.

"The Sophomores saw something green. They thought it was the Freshmen class; But when it plainly could be seen, They found it was a looking glass."

ADVANCE IN LIVE STOCK MARKET IS HELPING RANCHERS

Because of a late advance in the live stock market many ears of cattle are beginning to move from shipping points in this section of Texas.

Twelve or fifteen cars of cattle left Balmorhea and Toyahvale this week meaning a nice bunch of money for the ranchmen of that section.

H. F. Anthony sold 600 two and three year old steers this week to Emory Haynes of Midland. The steers were from the Hollibeke ranch and are to be delivered at Riverton December 10th.

Mr. Anthony also announces the sale of 250 calves to be delivered at Pyote December 6.

Ed Benson of Fort Worth bought 50 calves from W. L. Kingston to be shipped to Fort Worth from Toyahvale Saturday. This sale was also made through H. F. Anthony of Pecos.

MIDLAND COLLEGE BOYS AND GIRLS ENTERTAINED

Thursday evening at the home of Mrs. Lou Danean the girls basketball and boys football teams were entertained by a dance until train time when it was necessary for them to return to their homes.

EFFICIENCY

The word efficiency is yet in its infancy. Only within the last few years has it been used to any extent. It was first applied when it was discovered that a particular workman could do a job, not only better than the average man, but could do it in less time with a greater degree of accuracy.

Skill, speed and accuracy are responsible for the coining of this word efficiency, and they are made possible through the employment of the latest types of machinery.

TWO WAYS OF DOING A THING

THE NEW WAY

A \$6,000 Linotype machine that casts new type for every job and advertisement.

Does the work of four men.

Equipped with 32 different faces of type that can be changed on a minute's notice.

Also casts ornamental printing material, rule, border, etc.

Metal saw that cuts machine products into any design and measure.

LATEST MODEL MACHINE MADE

THE OLD WAY

When printing was done by hand it required six times as much time as by machinery.

Type was laid in cases, became worn, the printing surface scratched; rules were bent, nicked and battered and in a few months the office could not possibly do first-class work. Neither could they afford to buy new.

The Linotype has done away with this method.

REASONS FOR QUALITY PRINTING

THE two Linotype machines in THE ENTERPRISE office are capable of handling any work that falls to them in the shortest possible time—with no exceptions. The now Model 14 is one of the best equipped machines in the State—this is fact.

Without the machines we would have to employ four times as much labor, our floor space increased and additional rent; we could not give you new material with every job; our methods of production much slower, but everyone knows the difference between machine and hand work—it is a short story: Either the hand work costs you much more or the job is done in a hazardous way to meet the low price of the machine work.

THE ENTERPRISE has the only machines in the county and the best skilled workmen on the market.

WHILL YOU GET KILLED BY? WHY BY TH ENEMY THATS WHO!

WELL THEN GUESS ILL BE TH ENEMY!

To Acreage Owners and Buyers:

The PECOS VALLEY OIL FIELD is coming to the front.

The PECOS VALLEY will be a big oil field shortly.

Many fortunes are made or lost in a new oil field, and the man that has first hand, reliable information, makes the money.

Real EXPERT information is necessary and worth a lot of money at the proper time.

If you own acreage here and your residence is elsewhere, you need expert advice from now on.

If you figure to buy oil properties here, you need expert advice also.

For the last two years I have been at the services of one of the oil corporations here, the first corporation to make extensive geological surveys of his field and open and prosecute drilling operations in Reeves, Loving and Ward Counties.

I have obtained day by day, by personal experience, work, study and association with some of the best Geologists that have made various surveys of this field, informations and data of immense value.

A special Geological report and survey on a certain tract of acreage, would cost hundreds of dollars, and not all oil investors or oil property owners can afford to employ and pay big prices to technical experts to secure special reports on what they want when they want to buy or sell, unless it involves a large amount of money. They generally rely upon public information, friends advice, hearsay, luck or promoters' literature, etc, and most of the time buy valueless properties or sell valuable acreage at the wrong time.

On account of my work in this field, the experience and knowledge I have of it, my past experience in other fields, and my constant study and observation of all development work now going on, am prepared to give CONFIDENTIAL INFORMATIONS on any piece of prospective oil property, or any well in this field, by mail or wire, at any time, for \$5.00, and such informations, if taken as they are, can be worth a lot to you, or save you from loss at the present or in the future.

If you are an oil man you need my advice and wires more than anyone else as they will be worth hundreds of dollars to you in railroad fares and time

When you come to the conclusion that you need disinterested expert advice, and you must have it in a hurry, write me what you want to know enclosing money order or check for \$5.00, state if you want an answer by mail or wire, and I will give you the information and advice you ask, based on my own knowledge of actual facts and conditions as they are.

Reports and surveys of any tract at prices to be agreed upon.

HUNDREDS WILL HUNT FOR FOX

Jefferson, Texas, Nov. 24.—Extensive preparations are being made here for the third annual meet of the Texas Fox and Wolf Hunters' Association, which convenes December 12 to 18. Rev. B. B. Crimm, president of the association, and E. T. Rosebraugh, secretary of the hunters were here Saturday in conference with Chamber of Conference officials preparatory to the meet, which this year is expected to run as high as 500 in attendance.

In discussing the event, President Crimm said, "We held the meet in Jefferson last year, and because of the abundance of fox both red and grey, together with the exceptional entertainment by the local business men and farmers we voted unanimously to return to Jefferson

Nothing equals **SAPOLIO** for scouring and polishing cutlery. Makes all metalware look like new.

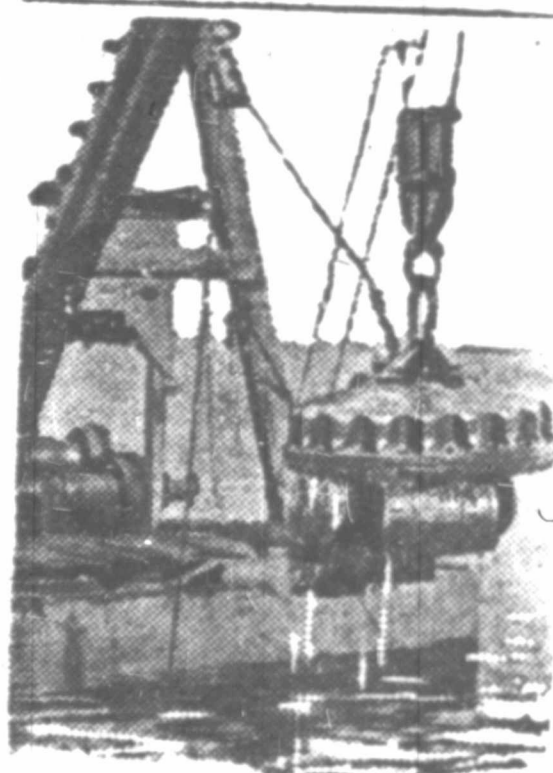

EFFICIENCY. It ain't a senseless boardin' Nor stintin' of our need, But efficiency in spendin' That should become our creed.

It ain't some money set aside On impulse once awhile, But steady savin' day by day That builds the steady pile.

—S. V. Perlman.

PICKS NAILS OUT OF OCEAN

A German submarine torpedoed a ship near the English shore in 1917, tearing out its bottom and scattering its cargo of millions of steel nails over the ocean bed. Now England's salvage department is rescuing the nails with a giant magnet as shown in the above picture from Popular Science Monthly.

PUBLIC LAND OPENING

A township of public land was opened to entry September 25, in Chaves County, for exservice men of the late war, but the lands will be open to entry for the general public December 13. Applications may be filed in the United States Land Office at Roswell, New Mexico. The lands are located about forty miles west of Lakewood, on the Santa Fe Railroad.

NEW MEXICO POPULATION

The population of New Mexico, according to the Census Bureau, is 84.8 per cent native white, and only 8.1 per cent foreign born white. About four-fifths of the whites are native Americans, born of native parents. The total population of New Mexico is 360,247, including 19,512 Indians, 5,733 Negroes, 251 Japanese, 171 Chinese.

FINDING A JOB FOR ALL YOUR DOLLARS

The greatest asset of a nation is the moral of its people, and the greatest influence in keeping its moral is financial independence. Until one has removed his financial shackles and has a little money to the good, he can not rise to the full advantages of a citizen. He lacks confidence to accept responsibility. He lacks courage to plan for the future. He lacks means to take advantage of opportunity. A little money saved from honest work and invested successfully is one of the essentials of complete citizenship.

Getting ahead is not a matter of chance of good luck with most of us, but a matter of industry and good management. Standards of living will differ with different people. Comforts and pleasures of life and the cultivation of talents will vary with different individuals. The amount that can be saved for the future will depend principally upon the opportunity and the inclination to earn, but one fact is universal, that no man will get ahead unless he spends less than he earns, and uses the margin intelligently. It has been rightly said that to make \$10 and to spend \$9 means success; to make \$10 and spend \$11 means ruin. Which way are you headed?

The first step toward financial success is a job. The next step is to save something from the job, and to find a job for what you save. There is a job for every dollar. How successful a dollar may be at its job depends upon how good a job is selected for it.

It is with the object of developing and maintaining the practice of universal saving of money and of putting the people's dollars to work at a successful job that the United States Government through the Post Office Department is offering the people Postal Savings for the deposit of their money and United States Treasury Savings Securities for investment.—Orin C. Lester.

A continued increase is noticeable in the iron and steel industry. In October, production was 42 per cent of capacity, with the United States Steel Corporation operating on an average of about 50 per cent. New orders are not developing in the volume that had been hoped for, but the one big favorable turn in the situation is the fact that railroad buying is becoming more of a factor than for some time past. There is no doubt that there is a tremendous amount of latent purchasing power with the railroads which will ultimately manifest itself.

Production for October amounted to 1,240,162 tons, an average of 40,000 tons a day. These figures are very encouraging being the largest amount produced for any month since March. In September, production totaled 985,529 tons or 32,850 tons a day. As compared with the low production point of the year, October output of pig iron was an increase of 43 percent and the advance over September's figures was about 22 percent.

The price situation is still unstable. There is some increase in demand for structural material but probably the purchasing of such steel will await a more definite price position before becoming a factor of real consequence in the market.

There is no doubt, however, that the iron and steel industry has made the turn and that from now on betterment may be expected in all quarters.

AMERICA IS KING IN OILDOM

The statistics of the Bureau of Mines, covering the world, furnishes some food for thought. In 1920 the United States produced 445,502,000 barrels of crude petroleum out of a total of 694,854,000 barrels, stated as the world's production. The United States, therefore, produced 63.8 per cent of all the crude. Mexico's record was 163,540,000 barrels, being 23.5 per cent. The rest of the world's portion was but little, being a total of 87,912,000 barrels, or only 12.7 per cent of the entire total.

As is known, the United States imported 78 per cent of all the Mexican crude produced in 1920, which shows conclusively the gigantic position this country occupies in the oil world.

In the last 63 years this country has produced 5,429,693,000 barrels of crude, which is 62.1 per cent of the world's production, the nearest competitor being Russia, as it produced 1,904,021,000 barrels, or 21.8 per cent of the total. Mexico comes third, having produced 536,524,000 barrels or 6.1 per cent.

Owing to chaotic conditions in Russia that country in 1920 produced but 3.6 per cent of the year's total production of crude.—Exchange.

AS BRISBANE SEES IT

"All that men want is here, enough for tens of millions of them," writes Arthur Brisbane in a recent article on New Mexico. "And all that is needed is the magician, water, so easily brought under control, always ready.

"If, instead of fighting each other, men would fight drouth and ignorance, if they would send here an army of geologists, mining and irrigation engineers and capital for farmers they would wage a war worth while, a war against nature's mistakes and man's selfishness.

"To live, to know that the spirit is more important than the body; come to this country, New Mexico."

You can say the same of West Texas, Mr. Brisbane.

NOTES FROM THE STATE SCHOOL NURSE

Habit formation, good habits, should be established in infancy. Mothers would not fall back on the excuse, "Yes, I know that but I don't have time."

If mothers only knew that it takes less time to form good habits than it does to brake up bad ones, and to nurse the results of bad habits they would take time.

Beginning early in right habits of food, exercise, fresh air and personal cleanliness these habits soon become automatic with children and they do not have to be constantly nagged and reminded.

The use of the tooth brush would become as automatic as the washing of one's face, were it begun at a very early age. We are told that teeth decay for two reasons only, either because they are dirty or the body has not been reinforced with bone-building food. The teeth should be washed at least twice daily.

Sleep, the period for organic reconstruction, is another fundamental and school children should sleep from eight to ten hours in the twenty-four, they should retire early at some regularly fixed hour, sleep each in a separate bed and in loose night clothes and with windows open, winter and summer alike.

Periodicities for bladder and bowel evacuation should be fixed in early age. We are told that teeth of modern life," is due mainly to carelessness and is responsible for many ills.

Food habits should be established at the birth of the child, beginning with its milk and water diet in proper quantities and intervals and in addition, after a few months, the fruit juices, orange or tomato juice strained and given in certain quantities each 24 hours. Poor food habits constitute a great factor in producing retarded and defective children. Underweight should be regarded as a danger signal as it comes

either from some physical cause or from poor food habits as a rule. Ten per cent of seven per cent underweight should cause concern on the part of the parent. That children do not like this or that is no excuse for improper diet. When the child first begins solid food the proper food materials should gradually enlarge his dietary and he would not have the choice of bad ones. Food habits become automatic, personal cleanliness becomes automatic, and so on, if we teach these habits early in life.

Personal cleanliness should be stressed also. It gives self respect, encourages good morals and is conducive to good health.

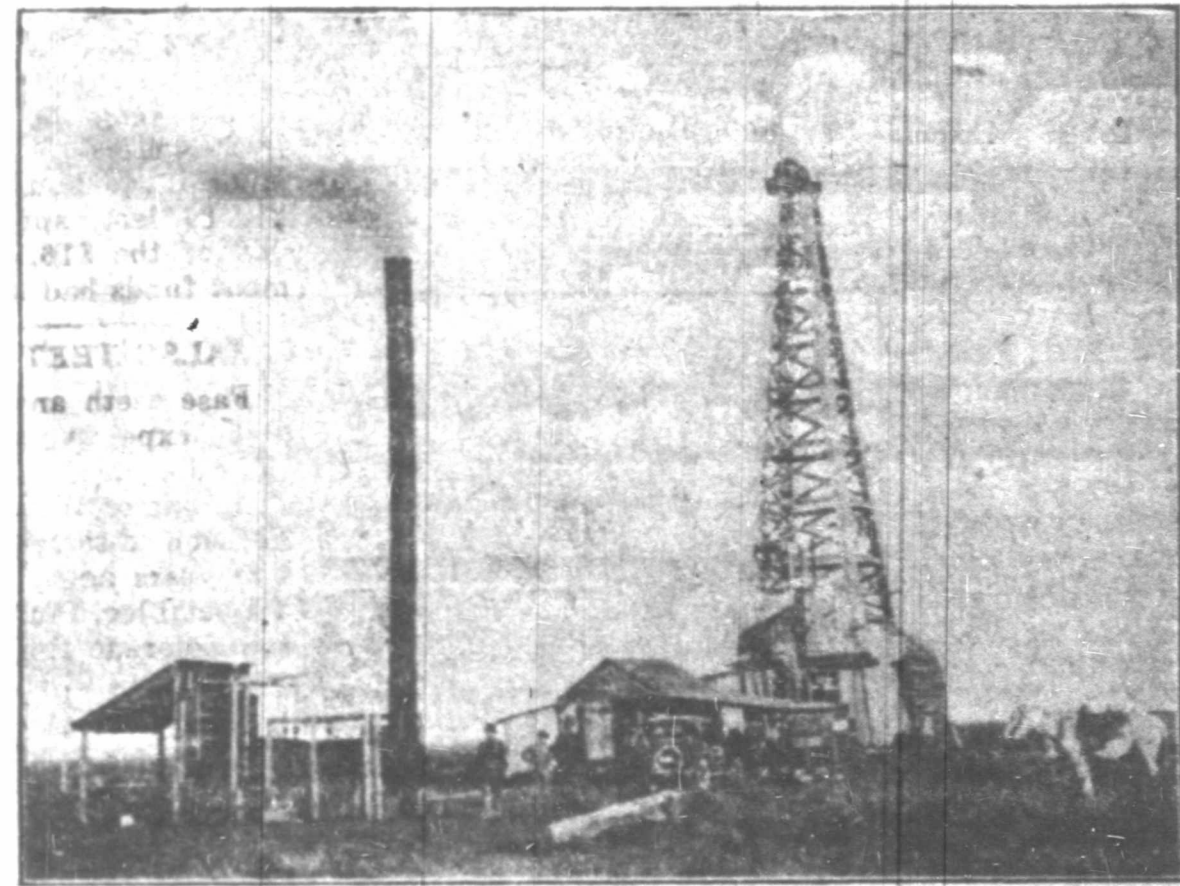

Insist on regular habits, especially those of bathing, exercise, rest, food, play. Make health a habit. "Habits must be controlled or they will control." The future of the child depends largely on correct habits. His real character is based on good habits established early in life.—Marion

LAST CHANCE!

This Offer Expires December 15th

Two Weeks Ago I Advertised For \$10,000 With Which

To finish drilling this well to production. Location by R. M. Holden of New York City, as eminent an authority as ever visited and geologized the lands of West Texas and whose findings have been enthusiastically approved by many geologists who have visited the property. Every prediction made by Dr. Holden has so far proven true including the accurate foretelling of the outcome of the Grant Wonder and Miracle Wells of Pecos County.

Located on Section 25, Block B-19, Ward County, unquestionably the heaviest standard rig in the field with all machinery new

and of the latest and best manufacture on a Mammoth Oil Structure running through Loving and Ward Counties, and at a point on that structure where it is joined by a second oil stream coming from the Northeast. Dr. Holden said we would open up THE GREATEST SHALLOW OIL FIELD IN TEXAS. Other geologists have said that ALL WE NEEDED TO DO TO SECURE BIG PRODUCTION WAS TO DRILL THE WELL. C. H. Willoughby, the Oil Wizard of the Now Famous Toyah-Bell No. 2, spent two days on the property with me last summer and stated that I WAS DRILLING OVER THE BIGGEST POOL IN THE ENTIRE FIELD. He was in my office this week and voluntarily offered to put that statement in writing, if I so desired.

I have been selling leases in the vicinity of this well at \$25.00 to \$50.00 per acre and consider them the best investment in the field at that price. They would be splendid investments at \$10.00 per acre if my well was never drilled, both on account of the geological situation and other development going on in the vicinity. I HAVE SET ASIDE ONE THOUSAND ACRES THAT I WILL SELL AT \$10.00 PER ACRE, not only that but lister.

I have just returned from California where I am acquiring ONE THOUSAND ACRES OF VALUABLE OIL LEASE North of Santa Maria, the home city of the Pinal Dome Oil Company, the strongest developing company in the Pecos Field. This land has production on three sides at no great distance with main line of the Southern Pacific Railway across the lease and a 2000 foot switch on the property; it fronts the ocean and there are pipe lines close by. Several wells drilling on adjoining leases, one of them by one of the great and successful Huntington Beach developers. My geologist said we would secure big production at 1500 to 2500 feet. Ample California capital is available for drilling California wells and I anticipate no trouble in financing that proposition.

In order to better handle my business I have organized the Two States Oil Company. The Ward County Well has already been turned over to the new company; the California and all other properties will be turned to it as soon as acquired.

NOW LISTEN: For a short time I will give \$10.00 worth of stock in the new company with every acre of lease taken at \$10.00 per acre, LESS THAN ONE-HALF OF THE PRESENT SELLING PRICE OF THE LEASE ALONE. This stock will entitle you to participate in the production of the Ward County Well and all other properties secured by the company. UNQUESTIONABLY THE GREATEST VALUE AND THE GREATEST POSSIBILITIES OF ANY OIL INVESTMENT OF THE YEAR.

Lands will be assigned closest to the derrick to the first people who send in their money, the last to order who will receive the tract furthest away. None will be over four miles from the derrick and all leases will cover lands on the Main Oil Structure, and PRESUMABLY OF EQUAL VALUE AS OIL PRODUCERS.

The balance of this 1000 acres at the heretofore unheard of price of \$10.00 per acre may not last till December 15, SO ACT QUICKLY. Orders by telegraph advised; remittances can follow by mail.

E. L. STRATTON, Oil Investments

PECOS, TEXAS

FEEDING RUNTY LIVESTOCK BRINGS LITTLE IN RETURN

Practical farmers and breeders estimate that 7 per cent, or 14,000,000 of the 200,000,000 head of live stock in the United States consist of stunted and runty specimens which, because of a great variety of reasons, have never attained complete and mature development. This large annual sacrifice of size, stature and stamina—represented by the waste of millions of dollars worth of potential meat products—in our domestic live stock business is so vital that representatives of the United States Department of Agriculture recently have queried more than 1,000 prominent stockmen and farmers in order to ascertain the causes and remedies—if there are any—of runts.

To show the difference in size, weight and quality which may occur where proper systems of breeding and feeding are not pursued, the case of two bulls raised in different sections of the country under widely varying conditions is interesting. One of these animals came of plutocratic parentage, a veritable blublood of the live stock world. The animal was fed and cared for according to scientific and practical ideas and when less than two years old weighed 2,150 pounds and showed prominent evidence of the finish, type, condition and quality that enable animals of his excellence to capture premier honors in the show ring.

The other bull was a nondescript of questionable breeding—one of those derelicts of stockdom—an animal with a ravenous appetite, but lacking in ability to pad his carcass with fat. He never was able to attain anything larger than Tom Thumb dimensions, and at the age of 3 years he weighed only 300 pounds. The younger bull weighed seven times as much as the older one. The conclusions gained from the runt survey completed by Uncle Sam are explanatory of the wide discrepancies between these two animals.

Runtiness, of course, is a general term involving various degrees and may signify either a greatly or moderately stunted growth. It usually results from a combination of several causes, seldom one alone. The term "runt" as used in this connection signifies an animal considerably undersized or lacking in development as compared with normal animals. Replies from the stockmen interrogated indicates that 10.1 per cent of our animal hog crop consists of stunted animals while 7 per cent of the annual sheep production, 6.5 of our poultry and 3.9 per cent of our cattle are afflicted with similar stunting.—Southland Farmer.

NEXT DOSE CALOMEL MAY SALIVATE YOU

IT IS MERCURY, QUICKSILVER SHOCKS LIVER AND ATTACKS YOUR BONES.

Calomel salivation is horrible. It swells the tongue, loosens the teeth and starts rheumatism. There's no reason why a person should take sickening, salivating calomel when a few cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel. It is a pleasant vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not salivate.

Calomel is a dangerous drug, besides it may make you feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tone instead and you will wake up feeling great. No salts necessary. Your druggist says if you don't find Dodson's Liver Tone acts better than treacherous calomel your money is waiting for you.

Soon after Thanksgiving Henry Ford, with Thomas A. Edison, whom he has invited to go with him, will inspect Mussel Shoals on the Mississippi river, with a view to Ford's purchase of the nitrate and power plant from the government. In agreeing to go with Mr. Ford Mr. Edison replied, "It's the greatest thing in the world. There's great power there. You can make anything—nitrate, steel, aluminum—anything at all. The trip will be made in Ford's private railway car and Ford and Ed-

BIG RODEO TO BE GIVEN AT TOYAH AFTER CHRISTMAS

Plans are well under way for what promises to be one of the biggest gatherings ever held at Toyah when the big Christmas Holidays Rodeo is to be held there December 27th and 28th.

The event is being advertised widely and the invitation is to every one who will attend. A good time is promised all.

Many different contests are to be given the chief of which will be roping cows, calves and goats, and in horse racing and cow pony relay races.

A fee of fifteen dollars is to be charged each one entering the roping contests and seventy per cent of the large purse to be derived from this fund is to be divided equally in first, second, third and fourth prizes to be given the winners. Willie Duncan, manager for the event.

THE PRESIDENT URGES PRACTICE OF SAVING

In a recent letter to Earl R. Obern, of Chicago, President Harding goes on record as an enthusiastic advocate of the practice of saving money. He declares that saving is the only means to reestablish the world's stores of working capital, and expresses the hope that the public may take this lesson to heart. The President's letter follows:

"You ask me for an expression regarding the subject of saving money.

"I have for many years been pretty well convinced that saving money is largely a matter of habit, and people who make a good beginning at it presently discover that it is by no means impossible, and it is altogether a good thing to do. Just at this juncture in the world's and our country's affairs it is certainly one of the most useful contributions that people could possibly make to putting the world right. I do not believe there is any other way to straighten out the tangle of financial and economic concerns into which the world has been precipitated by the war, except to produce a good deal more than we consume, which means to save, and by our saving to reestablish the world's stores of working capital.

"I have no more earnest hope than that the public may take this lesson to heart and learn to save as, in view of our great national good fortune, they could be able to do."

SANITORIUM IDEA SPREADS

Austin, Texas.—The Texas Public Health Association states that in the 36 years since Dr. Edward Livingston Trudeau started his Sanatorium in the Adirondacks for the treatment of tuberculosis, the idea has spread until today there are 689 sanatoria throughout the United States.

The important fact has been established that sanatorium treatment for tuberculosis is effective in any climate and in almost any altitude, exploding the old idea that a patient had to go to certain sections of the country. The Texas Public Health Association with its affiliated organizations is constantly working to present the idea to the public that the average person who has tuberculosis can best be treated in a sanatorium near his home.

Education as to the prevention of tuberculosis and the best means of treating it is disseminated by the Texas Public Health Association and its affiliated organizations with the result that the number of sanatoria is increasing yearly.

THE DREAMER

It is stated that Colonel Humphreys arrived in Mexia a little over a year ago, with but a very small amount of money at his disposal. Today, he is offered somewhere between fifty and seventy-five million dollars for his holdings.

There you have one story of the oil business in a nutshell. No matter what may be said about the business, it must be admitted that any industry in which such profits are possible is a good business.

To make such stupendous sums in a short time is possible in no other industry under the sun except oil.

He was called a dreamer because he was striving for the attainment of an ideal. He was called a fool because he was spending his money and that of his friends by "sinking a hole in the ground."

They called him a dreamer since the days of his youth when he told them of experience that he would sell them great tracts of timber land for three dollars an acre. They laughed at him for at that time timber was not in demand and when he attempted to buy it they called him a fool.

Again when he talked of his dream playground in dusty Mexia, they laughed and again called him a dreamer; but with the courage of a Spartan he fought until his dreams came true and out of the dust there arose a beautiful park and playground.

In the past few months he has sunk dozens of such "holes" and from them there has always issued forth thousands of barrels of the valuable liquid—oil.

He came to Texas with very little money a trifle over a year ago.

APPROPRIATION FOR GOOD ROADS TO EMPLOY MANY

What promises to be a means of giving work to more than 5,000 men in Texas within the next few months is the recent big appropriation of the government for road work in Texas. The State Highway Commission met this week to consider applications for help from this fund.

Four and a half million dollars of the \$76,400,000 recently appropriated by Congress for the purpose is available immediately for highway construction in Texas, according to a statement issued Monday from the United States Bureau of Public Roads in Ft. Worth.

The Congressional appropriation, intended to furnish work for unemployed throughout the United States, will provide work for approximately 5,000 more men in Texas, according to estimates of government engineers.

While \$4,500,000 is Texas' share of the Federal government appropriation, the total amount available for road building under the "work-for-unemployed" program really will be in the neighborhood of \$9,000,000. This total amount will become available through the fact that the State must appropriate and spend as much as the Federal government in the highway building projects.

That the new appropriation, together with the \$16,000,000 allotted Texas in the 1917 program of government highway construction, will give this State one of the best highway systems in the country is the prediction of George Fuller, senior highway engineer for the government in the States of Texas, Arkansas, Oklahoma and Louisiana. Up to October 31 last, approximately \$6,000,000 of the \$16,000,000 of government funds had been expended.

FALSE TEETH ARE HIGHER

Fase teeth and wooden legs are more expensive now than formerly, according to a Red Cross relief worker in one of the recent Southwestern Division disasters. One man who two years ago paid \$75.00 for his artificial leg, found when he lost it in the Colorado flood last June that he would have to pay \$90.00 to replace it. False teeth also are more than fifty percent more expensive than before the war, the same relief worker said, and the man in San Antonio whose glass eye was lost during the flood of September in that town had to pay thirty percent more for a new optic than the one he lost cost.

The Red Cross disaster relief organization tries to replace all such necessary human equipment if the loss has occurred as a result of the disaster on which the Red Cross is working, according to Red Cross disaster relief officials, and all sorts of ridiculous requests are made. Many times women ask to have their lost false hair replaced, and one woman even went so far as to ask to be provided with a "make-up" outfit.

One old lady asked for a Bible, which was given her. Jewelry, pictures, bric-a-brac, and certain types of hair combs, eye glasses, and even a shaving mug and a pencil sharpener are on the list of requests of disaster victims.

Dr. Frank Crane says that Thrift simply means the application of thought to money.

Arthur Brisbane says that we should not practice thrift so that we will not go to the poorhouse, but to increase our earning power by making our saved-up money work for us.

A chorus girl doesn't need to have stage fright to be one.—Muskegon Chronicle.

LIFT OFF CORNS!

Apply few drops then lift sore, touchy corns off with fingers

Doesn't hurt a bit! Drop a little Frezzone on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic!

A tiny bottle of Frezzone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Frezzone is the sensational discovery of a Cincinnati genius. It is wonderful.

A check for one dollar issued in Paris, Texas, the other day paid fifty-

BIRTHDAY PARTY

A pretty birthday was given by Mrs. C. H. Hamilton Saturday afternoon for her daughter Miss Elsie Lou who celebrated her eleventh birthday.

Many games and delicious refreshments delighted the guests, whose names are as follows:

Tom King, Broulie M. King, James Garner, Walter Garner, J. H. Stephens, Ralph Hofe, R. D. Hofe, Howard Wilkie, Adison Owens, Jackie Olsie, Floy Thurston, Helen Thurston, Opal Palmer, Vivian Palmer, Lucil Stephens, Florence Johnson, Gale Brownlee, Burnett Brownlee, Nemo Brack, Dora Biggs, Daris Haygood, Ruth Dick, Bill Mont, Letha Prewitt, Will May Moorhead, Hettie Lois Randel, Ruth Newel, Lotty Furr, Vista Day Velma Day, Virginia Stewart, Gladys Stephenson, Lucile Brooks, Laron Joplin, Mrs. Frank Joplin, Mrs. Brooks, Rev. Garner, Mrs. W. D. Cowan, Mrs. Stephenson.

BRIDGE CLUB

Mrs. Chas. Kendall was the charming hostess of the Monday Bridge Club and a number of guests at her home last week.

The decorations and tokens were in keeping with the Thanksgiving season. At the conclusion of five games a delicious luncheon course was served by the hostess, assisted by Mesdames H. B. Prickett and Donald Bell. Miss Fisher made high score and Mrs. W. W. Dean second.

Club members present were: Mesdame Tudor, Wolf, Kendall, Baker, Walter Browning, Williams, Prickett, Beck and Calhoun.

Those bidden to this delightful affair were: Mesdames Ira J. and Donald Bell, Charske, Dean, Bryan, Beauchamp, Heard, Hudson, Starley, Southerland, Sparks and Misses Sparks and Fisher.

MARRIED

Albert Pask and Miss Gladys Sudbrock went up to Van Horn Monday of last week and were married at 6:30 that evening, Judge T. R. Owen performing the ceremony. Albert is well and favorably known in these parts having resided here for some time. He is interested in the development of the Southern Sulphur Co., mines and also has interests in the oil fields.

Mrs. Pask is a daughter of Mr. and Mrs. J. H. Sudbrock of the Santa Fe Hotel and who came to Pecos some time ago from St. Louis. Mr. and Mrs. Pask proceeded to El Paso from Van Horn for a few days sojourn. They returned Monday of this week and went out to the Sulphur Mines where they will make their home for the present. The Enterprise wishes for them prosperity and happiness.

CHILDREN PARTY

A most delightful childrens party was given Friday afternoon of last week by Mrs. Arthur Hayes for her charming little daughter, Lucile.

The unique arrangement of the decorations in the colors and symbols of the season with streamers from the chandelier to the corners of the prettily laid table in the Thanksgiving emblems was a marvel of loveliness to behold.

The inviting of the guests, the plans for entertainment and the arranging of the decorations were all done during Lucile's absence at a neighbors, she returning after the guests had arrived and the developments during the whole of the occasion were a most happy surprise to her. After a number of interesting games most delicious refreshments of fruits, candies, sandwiches and chocolate were served. The guest favors were pretty little decorated baskets of candy.

The following children attended: Janice and Helen McKellar, Jewell and Nora Belle Hollebeck, Elizabeth Lilly, Josephene Bryan, Christine Browning, Annie Evelyn Roberson, Gladys Lawson, Alice Ezell, Lucile and Nora Slack.

A. J. CURTIS JOINS ANTHONY & NORWOOD REAL ESTATE CO.

A. J. Curtis, who operates a service car, has joined Anthony & Norwood Company. He will help in handling real estate and oil leases. A number of good deals have been made by the company recently and they claim to have several more in the making.

DINNER PARTY

Mrs. John Hibdon entertained at her home Friday evening of the 23rd with a dinner party, followed by the ever popular game of "42." Covers were laid for the following guests:

Mrs. P. B. Smith, Mrs. John Camp, Mrs. Lucile Mitchel, Mrs. J. W. Parker, Miss Marie Smith, Miss Ligon and John Hibdon, Jr., who assisted his mother in entertaining.

BIRTHDAY PARTY

Annie Evelyn Roberson, the lovely little daughter of Mr. and Mrs. Hugh Roberson, celebrated her ninth birthday Saturday afternoon from two to five o'clock at the home of Mr. and Mrs. J. B. Sullivan by giving a party at which all manner of delightful games were played and delicious refreshments of ice cream and cake were served. She was the recipient of many beautiful and pleasing gifts.

INDIANS NAME FOCH "CHARGING THUNDER"

When Marshall Ferdinand Foch, on his tour of America, reached Bismark, North Dakota, the Sioux Indians greeted him in an unusual manner. They gave him the name Wakiya Warapke, meaning in Indian "Charging Thunder." They pinned this name on the great General's coat and then smoked the pipe of peace with him, and he liked it. Red Tomahawk, a Sioux Chief, 90 years old, handed Foch the pipe. He got a close-up view of the Indians or "original Americans" in the native state.

POSITIONS STILL PLENTIFUL

Hard times need not worry you. Our free Employment Department takes all the risk by insuring positions or refunding tuition. Recent telephones, letters and telegrams offer \$100 to \$150 positions to Draughton-trained graduates. Positions unfilled every week. Special rates now. Catalog free. Draughton's Business College, Box 38K, Abilene, Texas. 14-2*

LIST Your Real Estate and oil leases with A. S. Justice, Colings Bldg., Pecos, Texas. 11*

LANDS

Along the Pecos Valley Southern R. R. offer opportunities unsurpassed to the man of ordinary means. Farming is done by irrigation. A large portion of the land is under-laid with an inexhaustible supply of water, which is found at a depth of 110 to 200 feet and when drilled rises to within 12 to 35 feet of the surface where pump is set, and continuous pumping will not lower.

In the Balmorhea district water for irrigation is furnished by mammoth springs and reservoir. Never a shortage of water. The soil is exceptionally productive. Alfalfa, cotton, cantaloupes and fruits return good profits. Farmers in 1921 made money.

Climatic conditions are very favorable to the growing of crops. A delightful place to live.

Improved and unimproved lands for sale on easy terms.

A. A. KINNEY
General Immigration Agent
P. V. S. R. R.

Personal

Mrs. Ollie King returned last week from Magdalena, New Mexico, where she has been for some time with her husband who is wintering his cattle up there. Mr. King will be down for Christmas.

Mrs. J. O. Toliver left Saturday for Stephenville, where she will spend the winter with her sister-in-law, Mrs. E. G. Toliver.

Mr. and Mrs. Bob Sanders of Ochoa, New Mexico, are the happy parents of a ten pound daughter, born to them Wednesday, November 30, at the home of Mrs. G. B. Gunn.

Mr. and Mrs. William Knapp, Mr. and Mrs. R. F. Knapp of Balmorhea were the guests of Mr. and Mrs. E. Wilson Sunday.

Mrs. H. K. Roberts and little daughter, Luella, from Magnolia, Miss., are visiting Miss Amanda Bean.

Mrs. Will F. Evans who has been visiting Mrs. M. L. Vickers left Thursday afternoon for Graham where she will spend the holidays.

Mrs. V. Marston left Thursday for Midland where she will spend several days visiting.

Mrs. John R. Daniel of Orla is visiting Mrs. M. L. Vickers this week.

Mr. and Mrs. W. L. Kingston were in Pecos this week in attendance upon their son, Joe, who was operated on last week for appendicitis. The Enterprise is glad to report that Joe is improving rapidly and will be up again in a few days should he continue to improve.

Mrs. J. L. Moore and son, W. L., were Pecos visitors Thursday from their home at Brogado.

Mr. and Mrs. E. P. Luckler of Brogado, were here this week to enjoy the Hila Morgan plays at the tent theatre.

Albert Moore and wife were Pecos visitors this week and saw the plays at the tent theatre.

Jim Grayson of Toyah, was over to see the Hila Morgan show Thursday night.

Mr. and Mrs. George Duncan were in from the ranch Thursday to attend the tent theatre.

Mr. and Mrs. Tatum Moore are the happy parents of a ten pound son, born to them on Wednesday, November 30th. This is the third heir born into this family, the first two being daughters, and the happy parents are especially happy to have the son. The Enterprise extends congratulations.

Mrs. Donald S. Bell has been ill for several days, suffering from an attack of tonsillitis.

J. S. Long of Clovis, N. M., was a welcome visitor in Pecos Friday. Mr. Long was formerly in the newspaper business in Pecos and was also Superintendent of the schools here at one time. He is now in the Drug business at Clovis.

C. L. Burns, who formerly resided in Pecos has returned, to enter business here. His wife, who is visiting in Oklahoma will return soon.

Mr. and Mrs. A. M. Hamblen and little daughter, Valrie, are spending their vacation in Pecos and are incidentally watching the oil development.

The Rev. J. M. Garner and Mrs. Garner together with Mrs. Clem C. Calhoun are attending the Baptist State Convention at Dallas this week, as representatives of the First Baptist church of Pecos.

FOR SALE—Fine 7 passenger Cadillac car. Has California top; plush seat covers, etc. Might accept small car part payment. See A. D. Cochran, at A. T. Windows residence, Pecos, or Phone 344. 11*

Word from the Los Angeles office of the Los-Pecos Syndicate is to the effect that satisfactory progress is being made in financing the company to put a standard rig on their location, near the Bell well and five miles west of the Toyah Bell and carry the hole down from its present depth of 920 feet.

WANTED—Oldest and largest loan and investment company in North America, wants live manager for Pecos and surrounding counties. Address 610 Two Republics Life Bldg., El Paso, Texas. 11*

MANY EX-SOLDIERS TO GET PENSIONS

A letter from Washington to Sheriff Kiser says that the Government is now ready to consider applications for pensions which may be given all ex-soldiers who served in the War with Spain at home or abroad, or those who saw service in the Philippine Insurrection or the China relief expedition and their widows. The late Congress passed laws of the utmost interest to soldier and if they will send name and address to Walter S. Buchanan, National Aide-Camp, Army and Navy Union, Route 2, Louisa, Va., he will be glad to advise them fully as to their rights under the new law. Prompt action will mean the possible saving of money, as the pension commences from the filing of the claim. Mr. Buchanan wishes to assist his comrades in every possible manner. Write him and enclose stamps for reply.

Several good lots and houses for sale at O. J. Green, Mrs. Co.

HIGH SCHOOL TEAM IS HONORED WITH BANQUET FOR ALL

A banquet tonight (Friday) given by business men of Pecos honoring the splendid football team of the Pecos High School is the culminating feature of the football season.

The team has done some remarkable work this season and is due the appreciation of the people of Pecos for the good playing they have done in behalf of their school.

Coach R. B. Norman has stood by the team coaching and leading them through many contests. Captain Wm. Kerr and Manager Ross have also conducted their parts with remarkable success. The Pecos High Team has played twelve games and won the majority of them. They played two with Ft. Stockton, two with Midland High, one with Big Spring High, two with Midland College, two with Odessa High, two with Barstow town team, one with Pecos town team.

The players' and their line-up for the past season were: Hershel Rhodes, Left End; HaskeH. Murray, Left Tackle; Francis Warn, Left Guard; Ramond Norwood, Center; Dick Hefner, Right Guard; Geo. Ross, Right Tackle; Pat Moran, Jr., Right End; Keih Camp, Quarter-back; Wyckliff Hefner, Left Half-back; Cecil Wheat, Right Half-back; Wm. Kerr, Full-back; Oscar Thurston, Sub Guard; W. D. Cowan, Jr., Linesman; Edwin Caroline, Sub Half; Adam Ross, Linesman.

A Better Tire at a Lower Price

Formerly Kellys sold for more and they were worth more. Now they are better than ever but they cost no more than other tires that have always sold for less. Isn't this a pretty good time to change to Kellys?

30x3 Reduced from \$19.20 to \$12.90
30x 3 1/2 Reduced from \$21.00 to \$14.90
