VOL. XLII. NUMBER 36.

PECOS, TEXAS, FRIDAY, APRIL 21, 1922.

\$2.00 PER YEAR, \$1.25 FOR SIX MONTHS.

## THIS SHOWS HOW THE COUNTIES PUT MONEY IN AND TAKE IT OUT

Were state taxes levied uniformly in all counties of Texas, the present unjust distribution of the burden of government could not occur. Unjust treatment of West Texas will continue until there is such uniformity of taxation as compels East Texas to pay its proper share for the maintenance of the state government.

A white light is thrown on the situation by the report of the state tax commissioner for 1920 that 50 counties, after paying into the state treasury all taxes due under the state ad valorem rate for all purposes received back in school apportionments alone all the taxes so paid, and \$1,530,000 besides.

The whole trouble is that these counties assess their property too low. They pay as little as possible into the state treasury, and take back as much as they can.

They are among the most populous and richest of the farming counties.

West Texas counties, with property valuations placed much higher, contribute heavily to the state treasury, receive little in return, and help support the schools of East Texas counties.

Records of the controller's department and of the department of education, furnished by state tax commissioner John G. Willacy, showing percentages of assessment in 1920, taxes paid to the state treasury, and amounts returned in school apportionment in 1921, are very informative.

Here are some of the most glaring examples of underassessment and heavy withdrawals from state funds by East Texas counties:

Harrison county drew out of the state treasury twice as much as it paid in. County land was assessed at 15 percent of value, city and town lots at 30 percent, and banks at 60 percent. The county paid into the state treasury \$96,608 and withdrew under the school apportionment, \$190,242, plus \$4520 for rural aid.

Anderson county land was assessed at 15 percent, city and town property at 33 percent and banks at 75 percent. The county paid into the state treasury \$94,320. It received in school apportionment \$127,881, and for rural aid \$14,710.

Hopkins county received three times as much state tax money as it paid. Its land was assessed at 15 percent, city and town lots 35 percent, and banks 60 percent. It paid into the treasury \$65,441, received from the school apportionment \$173,316, and from rural aid \$22,505.

Callahan county paid \$49,072 into the treasury and received \$55,732.

Brown county paid in \$79,428 and received \$92,851. Hill county paid in \$188,900 and received \$199,000. Hunt county paid in \$161,000 and received \$224,000. Fannin paid in \$145,687, and received \$210,663. Kaufman county paid in \$134,296 and received \$163,405.

See how payments were reversed in West Texas, where assessment rates were higher:

El Paso county paid \$453,344 into the state treasury and received from the school apportionment \$329,563, with nothing from the rural aid fund.

Brewster county paid \$53,906, and received \$15,665, with no rural aid.

Jeff Davis county paid \$25,784, and received \$6253, with no rural aid.

Culberson county paid \$24,800 and received \$2197, with no rural aid. Culberson county paid ten times as much state tax as it received. Hopkins county in East Texas received three times as much as it paid. A striking contrast.

Presidio county paid \$50,474, and received \$40,261. Terrell county paid \$36,008 and received approximately one-seventh as much, \$4693.

Reeves county paid \$41,905, and received \$18,938. Ward county paid \$24,837, and received \$8984. Hudspeth county paid \$36,343 and received \$5136.

Practically all counties in the state where large cities are located, paid in more taxes to the state treasury than they received. For instance, Tarrant county paid \$815,815 and received from the school apportionment \$475,410, plus \$21,680 for rural aid.

Dallas county paid \$1,220,000 and received from the school apportionment \$606,762, plus \$15,532 for rural aid.

In all these counties in east and west Texas the state tax rate was the same, 62 cents on \$1000 of property valuation. It was the valuation rate that differed, the East Texas counties putting theirs as low as they could.

The records show plainly the great need for a uniform basis of valuation for state tax purposes.

## GIRLS TAKE UP STUDY OF RADIO IN COLLEGE CLASSES

The introduction of the telephone a half century ago offered an open field to man. Not so limited is the newer radiophony of today. Women and girls have taken to the study of wireless in an energetic way, resulting in many colleges for women installing the course. This picture shows a girl class in the radio room at Radcliffe College, Boston.

## STATE GEOLOGIST VISITS PECOS FIELD

Possibility of a state geological survey of the Pecos Valley territory looks as a result of the visit here early in the week of J. A. Beede, geologist of the Bureau of Economic Geology and Technology of the University of Texas at Austin. Mr. Beede, who was the guest of Ira J. Bell while here, spent four days in the field, accompanied by Mr. Bell and by Drue D. Christner, formerly field representative of the U. S. Geological Survey.

Mr. Beede secured logs of a number of wells drilled in this territory and appeared greatly interested and highly impressed with the possibilities for oil in this territory and stated on his departure that he would endeavor to make arrangements to return here and make a complete survey and report on the valley.

Mr. Beede was particularly impressed with the possibilities of both the Toyah Bell and the Bell wells, and although he did not like to be quoted there appeared to be no doubt that he thought that the only problem before the owners of the Toyah Bell was that of putting the hole in condition. In other words, he seemed to believe that the Toyah Bell would easily prove a commercial producer if the hole was in shape to permit the well to act efficiently. The strong gas pressure in the Bell No. 1 proved of great interest to Mr. Beede.

Mr. Beede is regarded as an authority on the Delaware Mountain formations, he having made a careful survey of that territory but had never made a trip over the valley. In short, Mr. Beede's opinion seemed to be that the only thing necessary was to penetrate the proper spots to the necessary depth to get big oil, and it is hoped they keep on drilling until they are found.

Former service men who are entitled to disabled or vocational allowances from the government will be able to discuss the matter and make out the necessary application papers when Ralph Landrum of the U. S. Veterans Bureau visit Pecos next Friday and Saturday.

Mr. Landrum, who formerly resided in Pecos and Barstow, is now employed by the El Paso office of the Bureau, and will be in Pecos on April 28 and 29th for the purpose of discussing the subjects with former service men of this territory.

All service men who have suffered disabilities graded above ten percent of their normal efficiency through their governmental service are entitled to disability allowances.

## Shipping Cattle To Green Range

Due to the continued drought a great many cattle are now being shipped to other parts of the state where the rains have made grass plentiful, and all the railroads are carrying a large number of stock cars.

The heavy run-of business has caused delays on the Santa Fe railroad and on both Wednesday and Thursday of this week passengers for El Paso were forced to spend the nights here because of missing connections.

One thought to bear in mind is this:

If the state appropriates for rural schools, El Paso county contributes about \$75,000 without receiving a cent.—El Paso Herald.

## Start Survey of Ward County Soils

Miles Beck and Robert Deveraux of the Federal Bureau of Soils are now engaged in making a survey of Ward county as part of the survey of twenty-four West Texas counties which is to be made by the Federal Bureau in collaboration with the State Bureau.

Mr. Beck has been in Pecos for the past year making a survey of the Reeves county soils and has completed his report on this county and forwarded it to Washington. It is not anticipated that this report will be ready for publication for a period of years, as it is understood that the government printing office will not be able to handle the matter until that time. The report is also to be checked carefully by government experts before publication.

Mr. Deveraux has leased the Oram Green home on West Fourth street.

## Offer Markets to Pecos by Radio

The radio bug has bitten hard into the hide of Texas, and the entire State is excited over the new fad which promises to develop into a big commercial aid.

Already the local receiving stations are enabled to receive evening concerts from Denver and Fort Worth, intercept radio conversations which take place over the commercial line between Catalina Island and Los Angeles, while Dr. Truett's Sunday evening sermons and the entire services at the First Baptist church at Dallas are now broadcasted and can be picked up by any instrument large enough to receive them.

Efforts are now being made by the State Bureau of Marketing to have every Chamber of Commerce over the state install one of the machines for the purpose of receiving the daily market reports. In this way the state bureau claims considerable expense in telegraph bills will be saved, and the knowledge of the day's markets will enable numerous savings to be made, and also enable the merchant to buy and sell with more complete information regarding the value of the products.

The baseball scores are also broadcasted as fast as the games are played, and there is practically no limit to the amount of desirable information that may be picked out of the air by one of these machines.

Walter N. Sutherland, secretary of the Chamber of Commerce has investigated the cost of machines of sufficient size to allow Fort Worth, Austin, and Denver stations to be heard, and an expenditure of between \$350 and \$400 would be necessary. No action has been taken on the matter by the Chamber of Commerce, and probably will not be taken during the summer months as Ralph E. Williams who has the largest station in Pecos reports that the heat causes a great deal of interference with the clearness of the reports received here, unless an exceptionally large station would be installed. It is doubted if such an expenditure would be wise at the present time.

The great interest taken by local Baptists in the career of Dr. Truett of Dallas has led to some talk of the local church installing an apparatus and amplifier in order that the Sunday evening services in Dallas might be enjoyed from time to time here, but no definite action has been taken.

Sets capable of receiving messages sent within the small radius of fifteen and twenty miles may be constructed or purchased at from \$2 to \$15, but the sending apparatus costs a great deal more, and as yet no apparatus capable of carrying the voice has been installed in Pecos as far as we know. Many of the youngsters have small sets by means of which they communicate with each other by means of the international Morse code, which is used as wireless signals.

## ICE PLANT MAKES "ZERO" SOFT WATER

"Zero" water, that is water with all ingredients, giving its hardness, removed, has been produced from the Pecos water after numerous experiments with many chemical methods, and the Pecos Power and Ice Company now has the softest of soft water.

This water is to be used by the company in the manufacture of ice this season, and also eventually used in laundry to be established by the company.

The results were obtained by the Permutit method after considerable research work by E. A. Wagner, a special representative of the Permutit Company, and the results are obtained at an operating expense estimated at a little more than thirty cents per thousand gallons.

The water is first run through a heavy filter of salt-solution. This solution removes the magnesia and gypsum from the water. After passing through several other filters the water comes from the tank prepared for use in steam boilers without injury to the boilers.

The natural artesian water of Pecos has been a problem to engineers for years. Containing a large amount of magnesia and gypsum it has, when used in boilers, caused a heavy deposit of these materials and made the life of the boilers short. Under the new process the water can be used in boilers without leaving any deposit whatever on the pipes.

Because of this condition of the water, the fluid needed for steam boiler purposes on locomotives and at oil well operations has been shipped into Pecos.

The perfection of this process permits the manufacture of distilled water ice in Pecos, and a boiler is to be installed during the coming week in which the water will be distilled and the manufacture of crystal ice made possible.

In addition to the manufacture of ice and the laundry the officials of the company are arranging for the opening of an ice cream plant at the factory within the next few weeks, and the plant calls for the eventual expansion of this side of the business into a creamery.

## START RED BLUFF DRILL RIG MAY FIRST

The core drillers who are to explore the geological formations of the Red Bluff reservoir site have completed their work at the Alamogordo reservoir site near Fort Sumner and are now engaged in drilling at what is known as the third site above Carlsbad. Two hole were drilled at Fort Sumner and three holes are to be drilled at the Carlsbad reservoir site.

This work was received by Walter N. Sutherland, secretary of the Pecos Chamber of Commerce, and the information also stated that the work on the Red Bluff site will probably be started by May the first.

The Smith reclamation bill, under which it is hoped to construct the Red Bluff reservoir, has not yet passed Congress, although Mr. Sutherland is assured by both Senators Sheppard and Culberson and by Congressman Hudspeth that there is but little doubt but that the bill will get a majority vote when it is finally brought before the two houses of Congress.

ing the voice has been installed in Pecos as far as we know. Many of the youngsters have small sets by means of which they communicate with each other by means of the international Morse code, which is used as wireless signals.

## NO ABATEMENT OF INTEREST IN THE TRANS-PECOS OIL FIELD

### BELL NO. 1 WELL

An average of more than fifty feet drilling per day, has been made this week in the work of reaming out the hole of the Bell No. 1, in order to permit the getting of casing to the top of the white Eme formation under which was struck the biggest flow of wet gas that has been found west of Ranger and south of Amarillo in Texas.

Although loath to give out estimates of the time required to complete this work, driller W. H. Gallagher appears to be of the opinion that the hole will be in shape within ten more days to permit the drill to be sent into the black lime formation that is believed to lay just under the white lime, and which is believed to have produced the big gas flow.

The reaming tool had passed the 2200 foot mark late Thursday leaving but 500 feet to be reamed before the casing is set so that the well may be completed. The casing is to be set at about 2710 feet.

Ira J. Bell, trustee of the Dixieland Syndicate, the owners of the Bell well, left this week for a trip through the producing districts of Central Texas for the purpose of interesting other oil operators in this field.

### THE RIVER WELL

The rapid space set by the River well during the past two weeks was continued this week. Starting actual drilling operations Tuesday noon at 3740 feet the drill is knocking out about twenty-five feet of hole daily and late this week has passed under a two weeks' agreement between land owners and the works at the well. When the financial arrangements for the completion of this well run out late last week the prospects were so good that the drillers and landowners secured permission to continue the work two weeks, and drilling operations are now being continued under that arrangement. C. A. Owens, president of the Arthur-Pitts Oil Company, the owners of the well, is also a party to the agreement.

The drill has been in a very thick stratum of hard gray lime this week, and the well is under close observation by government and other geologists who have predicted that the white and black lime overlying the Delaware sands may be expected to be found at any moment by the drill.

### TOYAH BELL NO. 2

It is understood that the latest plan to be tried out at the Toyah Bell well of the Ramsey Oil Company is to be the insertion of a string of 6 5-8 inch pipe over the string of 5 1-16 inch pipe which is broken 575 feet from the top of the hole. It is also understood that a calf wheel is to be built into the derrick before this new string of pipe is inserted. A calf wheel is the wheel usually used to handle casing in a standard derrick. The derrick was erected when it was anticipated that no difficulty would be had with the casing, and a calf wheel was not included in the equipment. The wheel used in the Pecos county well of the Pinal Dome Corporation is to be used.

Numerous strong flows of oil and gas occurred over the last week-end from this well, and small flows have occurred during the week. The company is now making an effort to save this oil for fuel purposes and has a small supply stored ahead.

William J. McCarthy, president of the Trans-Pecos Oil Company, who has been heavily interested in the Toyah Bell well, has been in the field for the past ten days. He left for a business trip to the east on Tuesday.

### HERSHEY NO. 1 SPURRED IN

Hershey well No. 1, spudded in April 20, 1922, on section 13, block 51, township 10, T. & P. R. R. survey Reeves county, Texas. Armstrong Special No. 25 is being used for the first 500 to 1000 feet. Standard rig to be used thereafter to 4000 feet, if necessary. Sam Breen, a local citizen, has subcontract for first 100 feet.

Robert R. Landrum, of San Antonio, and Mrs. Landrum are in Pecos, Mr. Landrum having charge of operations for his brother-in-law, Harry G. Hershenson of Chicago. Mr. Landrum will make his headquarters in Pecos, having his office with Mr. B. T. Biggs.

### WESSNER & ANTHONY WELL

J. D. Wessner returned to the Pecos territory on Thursday and announced that he was ready to resume operations on the Wessner & Anthony well on the Mac Sayles ranch in Culberson county. This well has been drilled to a short distance below 2,000 feet, where

casing was set, but has been shut-down for the past two months. Mr. Wessner stated that he was prepared to rush operations to an early completion.

### PECOS-ANGELES

The Pecos-Angeles Oil Company is underreaming at below 1200 feet. Ten inch casing is being carried from 900 to 1300 feet to shut off a flow of water at that depth.

### THE LOS-PECOS

The Los-Pecos Syndicate is now drilling day and night on the location a half mile north of the Bell well, and making good progress.

## PINAL DOME AIDS IN GEOLOGICAL STUDY

Although the fifty barrels of oil taken from the Pinal Dome Oil Corporation's well in Loving county was not considered sufficient to justify the company in an attempt to handle the water which came into the hole, afterward the well has proven very valuable in determining the geology of the Pecos territory, and its log has been of great interest to all geologists who have visited the field.

The fifty barrels were bailed from the top of a column of water which rose in the well after the black lime-cap rock had been penetrated at 5023 feet, and does not represent the full capacity of the well, according to those who were informed of the situation. However, the drill was sent deeper and encountered water which it was not believed possible to shut off in the well without a great deal of difficulty. It is understood that the officials of the company now consider the well as having been drilled down to the side of the structure and at a point where water might be encountered.

Similar conditions exist in many oil fields. The oil usually lays on top of the water, and when the hole is drilled down to the side of the structure and to the side of the collection on the shallow edges of the oil is found and the main production is water.

While no official announcement has been made by Guy Goodwin regarding the company's plans it is understood that the company has no intention of leaving the Pecos territory. All machinery and the derrick is to be left intact, according to instructions received by the men in charge, and it is believed that in the future a well will be drilled at another point in the field. Offers for the purchase of parts of the machinery have been refused. Several points are known to be in the minds of the company's officials, but no definite decision has yet been made. It is probable that the company will drill on some acreage in California near the proven fields in an effort to replenish the treasury for further explorations in the Pecos area.

Geologists who have investigated the situation state that a white lime and a black lime rock of a very similar character have been entered in the Pinal Dome, the Toyah Bell and the Bell wells, and they believe that the same general geological formation has been encountered in these three wells.

The Bell drill, finding these formations at the shallowest point, 2710 feet, is believed generally to be very near the center of the structure. The Toyah Bell, finding the formation at 4300 feet is believed to be further down the slope of a structure, while the Pinal Dome is generally believed to be still further down the slope as the formations there were encountered at 5,010 feet. The surface at the Pinal Dome well is generally believed to be about 300 feet higher than the Toyah Bell or the Bell wells.

The deep sands found in both the Toyah Bell and the Pinal Dome are heralded to indicate the widespread area covered by these sands, which are known locally as the Delaware sands and it is almost positive that when the proper structural conditions are entered that an exceptionally big production will result. These sands as exposed in the Delaware Mountains to the west of here indicate that formations from 200 to 1500 feet in thickness may be encountered below the white and black lime cap rocks and that these sands are petroliferous.

Mrs. Tom Hart and Mrs. B. F. Powell of Toyah, were in Pecos two days this week soliciting advertisements for a cook book. They reported splendid success. E. G. Doty was assisting them and it is supposed that he is to get one of these books as rumor has it that he has already engaged a cook.

**THE PECOS OIL FIELD HAS THE SAME REASONS FOR A GREAT COLLECTION THAT THE TAMPICO HAS**

The above cut and the following article shows very plainly the views taken by the writer as to the why and wherefores of the Pecos oil field and just why it should be one of the biggest producers of oil in the world. The article is furnished The Enterprise, as well as the illustration, through the courtesy of Mr. Ira J. Bell, who knows the field and who appears to have the solution of the Pecos oil field solved in a logical and sensible manner which appeals to the editor as being the proper view to take of the matter. The article as furnished by Mr. Bell follows:

It is understood by the oil fraternity that the Tampico field in Mexico is a different sort of a collection from any of the other great oil fields in the United States or Mexico. It is recognized as a slope collection—a body of oil collected along an igneous dike at the base of the Sierra Madre Mountains—a collection greater than could be explained by any theory other than this; that the oil originally laid down in the stratified rocks covering a very large area, has been collected in a small territory which, when penetrated by wells, furnished the greatest production ever found in the world.

The Pecos oil field has the same reasons for a great collection that the Tampico has. The mountain uplift which, in the Pecos field, evidently came in Permian times, lifted up a body of the earth's crust so that the central portion of the uplifted crust was lifted above 1200 feet higher than the lower and parallel portion of the same area. As the earth's crust is composed, for the most part, of hard, brittle, stratified rock that will not bend except by fracturing, the same thing occurred to this great earth's crust uplift as would happen to a stone or cement wall 500 feet long, a foot wide and 19 feet thick, if a force below the center of it should lift that wall one foot higher. A great V-shaped crack would come down from the top and reach almost, if not quite, to the bottom. Cracks about half the size of the upper crack would appear from the bottom up at the end of the uplifted part of the wall.

In the case of the Delaware Mountain uplift at the East base of which is the Bell pool and many drilling wells along the Pecos river, this fracture undoubtedly has opened up just as it did in the Tampico field and as the earth's crust is underlaid with a molten mass of igneous rock, this igneous rock has undoubtedly forced itself up as far as this fracture at the bottom of the slope of the Delaware Mountains would permit.

It is usual in mountain uplifts for the big fracture at the top to reach down to the molten interior and for the molten matter to be forced up through that crack so that the crack itself is filled with igneous matter to the top. That igneous matter then spreads out as melted iron or lead would spread out over the sides of the uplift after the crack has been filled. It is by this operation that, what we know as igneous mountains are built up. The igneous matter, being forced from below remaining molten at the orifice from which it comes but cooling off as it spreads out laterally so that successive flows pile up and spread out, making high mountains. In the Delaware Mountains the upper fracture evidently did not reach to the molten interior of the earth as is usual. The force exerted by the gas and heat within the earth which usually is relieved by a flow through the top fracture had the result of lifting the lower part of the uplifted strata so as to fault the earth's crust at the point marked 'A' on the above cut. As a result of this faulting and of the fact that the point 'A' was used as a fulcrum in the uplifting of this great mountain body, the sedimentary rock lying along the faulting were crushed and fractured and show more structural conditions than are found in most fields except along the base of

slopes of this character. Before the mountain uplift the oil bearing strata in what is now, the East slope of the Delaware Mountains, were hermetically sealed up and the oil gathered in the small anticlinal structures crossing the country, was held by vacuum pressure in the apex of these structures, and could not be drawn away from these structural apex until the vacuums, which loss of oil would have caused, were opened to the air.

When the uplift came and the V-shaped crack in the top of the mountains was opened up, all the vacuums throughout the area lying between the top and bottom of the uplifted portion of the earth's crust, were opened. The seal was broken. Atmospheric pressure began to operate and gravity carried the oil in the structures running practically at right angles to this fracture, down the bottom of the slope until it reached the igneous dike, thrust up through the fracture at the base of the slope, and it is at this point—the base of the slope, in the Delaware sands—that we expect to find in the field along the Pecos river the Tampico production equalled or exceeded.

In the upper parts of the mountain slope lying about the Tampico field, well when drilled to the oil-bearing strata, get not liquid oil as is caught at the base of the slope and along the igneous dike in the Tampico field, but what is known as "Oil Tar." Oil so thick that it will not run and cannot be pumped. This very thick, tarry condition is due to the fact that the oil is of asphalt base. When the more liquid part of the oil has gravitated to the base of the slope, the thick sticky parts that do not run are left in the upper parts of the slope and do not retain sufficient liquid oil to make them flow. The liquid oil being collected at the base of the slope, along the igneous dike.

In the Pecos field we find that the wells drilled to oil-bearing sands in the upper part of the slope also find thick oil but not as thick as in the Tampico field. Thinner for the reason that the oil is of paraffine base. The gravitation of the lighter, most liquid parts of the paraffine oil in the slope of the Delaware Mountains has left the thick more viscous sticky part of the oil attached to the sands and furnishes the lubricating oil of the Toyah field, and just as in Tampico the thin oil is at the base of the slope. We found in the Bell well at the base of the slope the thinnest and highest gravity oil ever found in Texas in large quantities.

Since anticlinal structures almost universally run Northeast to Southwest or Northwest to Southeast and since the anticlinal structure running from Northeast to Southwest crossing the area uplifted in the making of the Delaware Mountains run at right angles to the fracture in the top of the mountains and to the igneous dike, at the bottom of the mountains, the crossing of each of these anticlines with the igneous dike at the base of the slope will undoubtedly be the center of a very great oil collection. An oil collection that will come down the slope as though carried in an inverted trough which will back up and overflow the sides of the trough when it reaches the igneous dike. It is on these facts, the collection of oil in the ordinary anticlinal structure created by the steady contraction of the earth's crust from the time the crust was first made to the present time, combined with the collection caused at the base of the slope by relatively sudden uplifting of the Delaware Mountains, that this great compound collection has been accumulated. In other words, we have a combination of anticlinal and slope collection along this part of the Pecos river and it is only necessary that drills go to the proper depth in these localities to bring into existence the future great oil field of this country.

**BULLETIN ON TANNING**

In response to many requests from farmers for explicit and dependable directions for tanning sole, harness or belting leather, the Bureau of Chemistry of the United States Department of Agriculture has prepared a leaflet containing information for the treatment of a single cow, steer or bull hide from animal until it is finished ready for one of these purposes. The equipment and methods have been modified from those that are in use where large numbers of hides are handled, but when the work is done with care as to materials and time for the various stages, a good quality of leather may be produced from good sound hides.

The method for which directions are given is for making what is known as oak-tanned leather, though either ground oak or hemlock bark can be used. The process involves thorough washing, softening and scraping of the hide, liming to take off the hair, deliming, tanning with the dark infusion, and finishing. Directions are also given for blackening the leather before it is finished and for treating sole to make it water resistant.

This leaflet on making leather on a small scale may be obtained free by addressing the Bureau of Chemistry, United States Department of Agriculture, Washington, D. C.

**You Can Depend On The Man Who ADVERTISES**

Nine times out of ten you will find that the man who advertises is the man who most willingly returns your money if you are not satisfied.

He has too much at stake to risk losing your trade or your confidence. You can depend on him.

He is not in business for today or tomorrow only—but for next year and the years to come. He knows the value of good will.

You get better service at a fairer price than he could ever hope to sell if he did not have the larger volume of business that comes from legitimate advertising and a product that bears out the promise of the printed word.

Don't miss the advertisements in The Enterprise. The live firms of the city are represented in its pages. It is the man who is broad minded in his advertising policy who will be broad minded with you.

**Don't Fail to Read the Advertisements**

# Uncle John's Poem

## MARY'S DRESS

Mary had a low-neck dress which fitted to perfection, and wore it everywhere I guess, against her Ma's objection. She also had an auto-car, which likely made her dizzy—she couldn't seem to go nowhar, without the doggone Lizzy. She motored through the chill night air, without regard to season. She didn't have no brains to spare, and never stopped to reason. At last she got a sneeze an' cough, which driv her to a frenzy. The doctor which they called right off, pronounced it influenzy!

They put her in her little bed, while pangs of anguish filled her. The blasted germs flew to her head, and mighty nearly killed her. But still the doctor lingered near, until he got 'em busted, and Mary's low-neck dress, I hear, has made him plumb disgusted. And now, when Mary's out at night, her collar-bone is hidden, and little Mary doth delight to do as she is bidden.

## HIGHWAY ADVOCATES FORM ORGANIZATION

The organization of the Texas Highway Association at Austin is a big step forward. If it can succeed in co-ordinating all elements directly or indirectly interested in the building and maintenance of good roads in Texas a great thing will be accomplished.

There is much need of a unification of all road work in Texas, and a standardization of roads, both in the matter of construction and maintenance. There is need of a real highway program, which will have as a definite goal an intelligently conceived system of highways traversing the whole State.

An account of the organization as set out from Austin to the daily press follows:

Austin, Texas, April 17.—For the purpose of promoting the construction of a complete connecting system of highways in Texas and the co-ordination of all interests and efforts that are directly or indirectly interested in the improvement and maintenance of good roads, the Texas Highway Association was organized here today at a meeting held in the Senate Chamber and attended by approximately 200 good roads advocates from every section of the State.

W. V. Crawford of Waco was elected president and for the first year headquarters of the association are to be in Waco.

Vice presidents were elected as follows: Judge Hugh L. Small, Fort Worth; George Holmgren, San Antonio; Luther Stark, Orange; T. B. Noble, Wichita Falls; Judge J. M. DeArmond, Midland; C. B. Jones, Spur; C. M. Walker, Dalhart; R. B. Humphreys, Mexia; Judge W. H. Strength, Marshall; E. M. Over-shiner, Abilene; Howard Bland, Taylor; Roy Miller, Corpus Christi, and Judge Henry Sackett, Coleman.

The first board of directors consists of Henry S. Gooch of Amarillo, Jake Block of Fort Worth, R. V. Glenn of Fort Worth, L. W. Kemp of Houston, Pat Thompson of Dallas, F. E. Rightor of Austin, R. J. Potts of Waco, C. V. Clark of Dallas, Dick Kleberg of Kingsville, W. T. Wheeler of Stamford.

The election of a secretary, which is to be made by the board of directors was deferred until May 13, when the board will meet in Waco.

County Judge Hugh L. Small of Tarrant county, who called the meeting to order, said that Texas had for a long time needed such an organization, and he urged that politics and professional interests be eliminated. He asserted that the organization should be for the interests of the State of Texas.

Governor Neff, responding to an invitation to address the meeting declared himself strongly in favor of good roads and good schools in Texas. He further declared that he is in favor of amending and hopes to see the laws so amended as to enable the State of Texas to meet the provisions of the amended Federal highway act in order that Texas might secure every dollar possible from the Federal Government. He said that in his opinion the amendment now pending before Congress, which seeks to repeal the amendatory provisions of the Federal highway act relative to the matching of Federal aid, would be detrimental to the road-building program in this State.

**Studies Highway Work.**  
"I have given a great deal of time to the study of highway development in Texas," Governor Neff said, "and this summer I intend to do all in my power to promote the development of good roads in Texas."

"I want to see this organization work out on a big road building program for this State; not a little sickly, puny one, but one in keeping with the past experiences, present achievements and future possibilities of this great State—one that will enable us to move forward and keep pace with any other State in the Union. If this is done, I will devote much of my time in carrying your program before the people of

cannot be changed. Then comes disgrace, sorrow and the time of paying the penalty. That is the way with crime waves—Higgins News.

## DIRECTOR OF MINT FROM TEXAS

A third of the world's gold supply is now in the possession of Uncle Sam, and this man, F. E. Scobey of San Antonio, Tex., is the new custodian. He is the new Director of the Mint, and has just taken office, succeeding Raymond T. Baker.

SAN JACINTO DAY

This is San Jacinto Day, April 21. As it comes around each year the patriotism of every true Texan is stirred.

At three o'clock, April 21, 1836, General Sam Houston with seven hundred brave men marched against General Antonio Lopez de Santa Anna's one thousand six hundred Veteran soldiers.

All honor to the memory of the brave Texans.

HOW THE TOYAH ORCHESTRA IS MANAGED

The 1800 people who listened to the selections of the Toyah Orchestra, were very agreeably surprised at the precision and ease with which these young people rendered their numbers at the entertainment held last Friday evening at the Baptist church.

The instruments are all of high grade professional make and these are the most expensive items. The remuneration of the director, except for a small monthly payment by the pupils, is the respect, consideration and appreciation the members have for him.

It is the consensus of opinion of experienced orchestra directors and instructors that the most progress is made when the director is not hampered by outside jurisdiction, and where even associative suggestion is inoperative.

WAITING FOR THE WHITES OF THEIR EYES.

It is evident that Woodrow Wilson, by simply denying an interview, can cause a greater furor in Washington than Warren G. Harding can stir up with a regular message to Congress.

sing, interpreting, surmising and predicting. Some are sure that the S street denial means the repudiation of Tumulty. Mr. Tumulty has put himself in the light of assuming airs of officiousness.

The chances are that it never entered the mind of Mr. Wilson to repudiate Tumulty or embarrass Tumulty or do anything else to Tumulty except deny that he had authorized Tumulty to speak for him.

It seems that Mr. Wilson is still of a mind to stay with the policy of waiting until he can see the whites of his eyes before he lets drive with his ammunition. It is a good policy.

But the sublime faith of the broken and defeated leader in the ultimate victory of his cause, though it be lost on the opportunists who defeated him for the sake of the potage of politics, is not lost on the rank and file of his old following.

A MODERN PARABLE

An Oklahoma paper publishes the following: And it came to pass that on the 4th day of March, 1921, Woodrow Wilson ceased to be president of the United States.

the plank which reads: "By our fruits ye shall know us." And it was so.

CARD OF APPRECIATION

Anent the entertainment provided by our people for those attending the school meet held here last week, one teacher who signs his name "Teacher" hands in the following appropriate card of thanks and appreciation to The Enterprise for publication.

The sentiments expressed come from the heart of the writer and are literally true and The Enterprise is delighted to give it space. The communication follows:

To a town that has been so hospitable; to a people who have been so generous and kind as Pecos and its citizens there should be some expression of thanks and appreciation. The success of the entertainment is largely due to the organization and capable leadership of Superintendent Rutledge, Mr. W. N. Sutherland and their well selected committees.

Courage is a fine thing to look at, and no doubt a fine thing for one to feel coursing his veins, but courage leads hurriedly to the grave. It's fine to see a fellow telling a bunch of highwaymen to go to hades, or opening wide the throttle of his auto, but such lack of fear is usually followed by a brilliant funeral.

The Chicago Journal of Commerce has this to say of the newspaper which might be called, for lack of a more emphatic definition, a public mischief-maker, of which there are too many:

"We have in the press of our America free expression of opinions on every decent subject of human interest. This is as it should be in a land devoted to liberty under a Government which puts no shackles on conscience and tolerates many abuses of intellectual freedom rather than risk restraint upon the minds of its citizens.

"This wide liberty carries with it the obligation to combat false principles and vicious theories; unwholesome suggestions and wicked policies which, from time to time, appear in the press, and which has grown to be the universal utility for clearing public and private thought.

"All this is obviously mischievous. Planting hatred in the hearts of a people, utilizing different dislikes in different sections to promote hatreds, is a despicable business which has destroyed many governments in the history of the peoples of the world.

OFFICERS ELECTED

The following were elected officers of the Womens Missionary Society of the New Mexico Conference in session at Roswell last week: President, Mrs. K. C. Childress of Clovis; vice president and corresponding secretary, Mrs. J. H. Derrick of Alpine; recording secretary and editor of Tidings, Mrs. J. H. Walker, of Deming; treasurer,

Mrs. Ben Randals of Pecos; superintendent of young people work, Mrs. Bowers of Tucumcari, superintendent of children's work, Mrs. Claud Jones of Fortales; superintendent of Mission study and publicity, Mrs. Geo. Hodgson of Gallup; superintendent of supplies and social service, Mrs. Hubert M. Smith of Alpine; District secretaries, Roswell, Mrs. J. C. Jones; El Paso, Mrs. L. B. Westerman; Albuquerque, Mrs. W. H. Bradford; Clayton, Mrs. M. P. Hines.

The next Conference will be held at Albuquerque.

Sure-Bearing Fruit Trees and Hardy Shrubs and Evergreens

We have been collecting them for forty-seven years. We think we have the best for each section, for both small and large orchards. The cold and rains make planting safe till middle of April. Extremely few trees have been planted for market for many years. Prices of fruit will stay up. Good times are coming. Get big prices instead of paying them. We will exchange trees for market orchards for land. A bargain could be good enough for us to plant and guarantee. Fine trees; best varieties. Catalog. We pay express.

THE AUSTIN NURSERY F. T. RAMSEY & SON, Austin, Texas.

**Pecos Entertains the Schools of the District**

Friday and Saturday the Pecos High School was host to the various schools throughout the district, in a competitive meet to decide which school would send their representatives to Austin. Representatives began to arrive Thursday afternoon, about fifty arrived on the noon train. These visitors were met at the train by a committee of Welcome from the junior class and were transported in cars to the school house where they were assigned to their respective homes. Each visitor was supplied with a program of the activities and a card with the information as to where a car could be obtained to take them to the contests.

Bright and early Friday morning began the tennis elimination the results will be found elsewhere in this paper. At nine o'clock the debating teams drew for places and held their elimination contests. Townley and McDonald of Barstow were victorious over Kerr and Sims of Pecos, while Bradford and Klappworth of Midland defeated the Odessa representatives. At eleven

the crowds assembled at the Baptist church where Judge J. F. Ross gave the address of welcome which was answered by Prof. W. W. Lackey of Midland. Following this the junior declamation contest was held with Odessa as winner of the junior girls and Midland as winner of the junior boys contest. At the close of this program the crowds dispersed to gather at the athletic field at three.

**Track Meet Huge Success.** Shortly after three o'clock the athletic contests were staged. The first event was the 120 yard high hurdles followed in turn by other contests. The results were as follows: (Class A).

**120 Yard High Hurdles—**  
First—Kerr, P. H. S.  
Second—Cowan, P. H. S.  
Third—Ingram, M. H. S.  
Fourth—Thurston P. H. S.  
Time—18 2-5 second.

**100 Yard Dash—**  
First—Ross, P. H. S.  
Second—Caroline, P. H. S.  
Third—Moran, P. H. S.  
Fourth—Ward, M. H. S.  
Time—11 seconds.

**220 Yard Dash—**  
First—Ross, P. H. S.  
Second—Caroline, P. H. S.  
Third—Moran, P. H. S.

Time—24 seconds.

**440 Yard Dash—**  
First—Wheat, P. H. S.  
Second—Ward, M. H. S.  
Time—58 seconds.

**220 Yard Hurdles—**  
First—Kerr, P. H. S.  
Second—Cowan, P. H. S.  
Third—Thurston, P. H. S.  
Fourth—Ingram, M. H. S.  
Time—30 seconds.

**Mile Run—**  
Forfeited to Pecos High—Wilson.

**1/2 Mile Run—**  
First—Wilson, P. H. S.  
Second—Gage, M. H. S.  
Time—2:20 1/2.

**Relay Race—**  
Won by Pecos on forfeiture.

**Class A. Field Events.**

**Broad Jump—**  
First—Caroline, P. H. S.  
Second—Moran, P. H. S.  
Third—Ward, M. H. S.  
Distance—18 feet.

**Discus—**  
First—Prnett, P. H. S.  
Second—Kerr, P. H. S.  
Third—Kessler P. H. S.  
Distance—88 feet.

**High Jump—**  
First—Kerr, P. H. S.  
Second—M. H. S.  
Third—Thurston, P. H. S.  
Fourth—Gage, M. H. S.  
Height—5 feet 1 inch.

**Shot Put—**  
First—Nance, M. H. S.  
Second—Ward, M. H. S.  
Third—Wesler, P. H. S.  
Distance—36 feet.

**Class B. Track.**

**120 Yards High Hurdles—**  
First—Wilkinson, P. H. S.  
Time—19.4.

**100 Yard Dash—**  
First—Burchard, T. H. S.  
Second—Amorger, O. H. S.  
Third—Huston S. H. S.  
Fourth—Coates, O. H. S.  
Time—11 1-5.

**50 Yard Dash—**  
First—Burchard, T. H. S.  
Second—Black, Barstow.  
Time—5.3.

**220 Yard Dash—**  
First—Burchard, T. H. S.

**440 Yard Dash—**  
First—Odell, B. H. S.  
Second—Black, B. H. S.

**1/2 Mile—**  
First—Woodward, S. H. S.  
Time—2 minutes 44 seconds.

**Mile—**  
Stanton won from Odessa in the mile relay—Time 4.04.

**Class B. Field Events.**

**Broad Jump—**  
First—Odell, Balmorhea.  
Second—Armstrong, Barstow.  
Distance—17 feet 5 inches.

**Discus—**  
First—Armstrong, Barstow.  
Second—McLean, Stanton.  
Distance—100 feet 6 inches.

**High Jump—**  
First—Odell, Balmorhea.  
Second—Patrick and Armstrong.  
Height—5 feet.

**Shot Put—**  
First—Armstrong, B. H. S.  
Second—Hunter, S. H. S.  
Third—Odell, B. H. S.  
Fourth—Kountz, B. H. S.  
Distance—38 feet 6 inches.

**Total Points Scored—**  
Class A, Pecos—85; Midland, 20.  
Class B, Barstow, 28; Stanton 28,  
Toyah 15.

High Point man class B, Odell Balmorhea 17 points.  
Continue on Galley 5

**Barstow Wins Final Debate.**

At eight o'clock promptly the Toyah High School Orchestra gave a musical concert that was certainly a treat. This group of musicians did themselves and their school credit. Following these musical selections the senior girls' declaimers took the platform. Odessa was winner. In the senior boys' declamation Odessa was also declared winner. Following this contest the finals in boys' debate was held between Barstow and Midland, Barstow defending the negative and Midland advancing the affirmative side of the question, "Resolved, That Congress should pass a bill prohibiting foreigners' entrance into our midst for a period of two years." Barstow won the decision. These Barstow debaters are very young, but they sure are good. The opinion was in favor of Midland until the last speaker for Barstow appeared for the negatives rebuttal and then the fur sure did fly. Barstow received the decision which was very popular.

Saturday morning the tennis finals were played and on that morning the meet was brought to a close when the rural school declaimers met with Monahans and Saragosa carrying off honors. The finals were held in the girls debate with Pecos and Midland as contestants. Midland chose the affirmative side and the Pecos girls defended the negative on the immigration question. Midland received the vote and won the debate thus bringing to a close a most successful meet.

**Toyah Orchestra A Big Success**

The oratorical and debating contests were interspersed with Orchestral selections by the Toyah School Orchestra, an organization which commenced active practice about four months ago. Some of the more advanced players were absent but a very creditable program was rendered by the twenty-seven members present. The precision, rhythm and correct playing of these young people were a surprise to the audience, ninety per cent of which did not know such a well

trained organization of school children existed in Reeves county. There were only five besides the directors, Mr. and Mrs. E. L. Harp, who do not attend school and the consensus of opinion is that the Toyah orchestra surpasses any organization of its kind ever heard in Pecos.

There was no time to make any preparation for the event as the director was only notified two days ahead that his services and that of his class would be highly appreciated and gratefully received. The spontaneous and prolonged applause after each number from the largest audience ever congregated in the Baptist church fully demonstrated the receptive mood of the large assemblage.

The numbers were all perfectly and effectively rendered and the thanks of the managers are due to Mr. and Mrs. Harp for the presence of the Toyah pupils and for the contribution of such efficient and organized help in making the program a success.—Whirlwind.

**Club Sandwiches of Spanish Green Olives**

Just the thing for an afternoon tea, or a picnic party. Olive club sandwiches are easy to prepare, pleasing to the eye, tasty, and very nutritious. The ingredients are usually on hand and the sandwiches may be made up in a few minutes.

Toast two slices of bread and remove crusts. Butter lightly and cool, then spread with heavy mayonnaise. On one slice of bread place hearts of lettuce leaves, then spread with stuffed green olives cut in rings. On the other portion of bread, arrange slices of broiled bacon. Garnish with water cress.

**To Stop a Cough Quick**  
take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues.

A box of GROVES' O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup.

The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Groves' O-Pen-Trate Salve through the pores of the skin soon stops a cough.

Both remedies are packed in one carton and the cost of the combined treatment is 50c.

Just ask your druggist for HAYES' HEALING HONEY.

**ANTS WILL SOON GET BUSY**

Most house ants are of tropical origin, being imported in merchandise and finally established in this country. Their origin, however, does not concern the housewife who is unfortunate enough to have a colony or two established in the walls of her house, or so conveniently located as to make raids into the house a matter of every day occurrence.

The house ant has become such a pest and so destructive of both food and fabric in some parts of the country that the Department of Agriculture, through division experts, has made a study of their habits in an effort to find some means of control or extermination. They have been successful in a measure only, but have progressed far enough to prescribe remedies, which if followed persistently and patiently, will give much relief.

The remedy more often suggested, but one which must be used with utmost care, is the use of a sirup poisoned with arsenate of soda.

**A Poison Remedy.**  
The idea being that the ants will collect this poison sirup and convey it to their nests, so that not only the ants which collect the sirup are ultimately killed, but the inmates of nests feeding on it also succumb. The formula for the preparation of this sirup is as follows: One pound of sugar dissolved in a quart of water, to which should be added 125 grains of arsenate of soda. The mixture should be boiled and strained, and on cooling used with sponges, as already described. The addition of a small amount of honey is said to add to the attractiveness to ants of this mixture. Naturally the greatest precautions should be taken in preparing this sirup and in safeguarding it afterwards to prevent its being the cause of poisoning to human beings or domestic animals.

This method of control has been tested for three years by an expert of the Bureau of Entomology of this department and has given very satisfactory results. Similar success with it has been reported by others, including persons engaged professionally in insect extermination. A related formula experimentally worked out for the Argentine ant is given in a special bulletin on this insect. This formula is as follows:

Granulated sugar ..... 15 pounds.  
Water ..... 7 1/2 pints.  
Tartaric acid (crystallized) 1/4 ounce.  
Boil these ingredients together slowly for thirty minutes and allow them to cool. Then slowly dissolve three-fourths ounce sodium arsenite in one-half pint of hot water. Allow this to cool, then add it to the sirup, stirring thoroughly. Add one and one-half pounds of pure honey to the sirup and the mixture is ready for use.

The Mental and Physical Comfort of Your Family Depends Upon Its Eyes.

This is not only often the case with adults, but very frequently the children suffer, not knowing that the source of the entire trouble comes from some defect in vision which may readily be relieved through proper examination and the providing of proper glasses.

But care should be taken that the examination IS properly made and PROPER glasses provided. Much more is involved in the proper fitting of glasses than the simple act of getting lenses that seem to correct the errors of vision.

Experience and Scientific research have been our educators in this line and we are well equipped to render best of service.

THE EYE—the most delicate organ of the body, will, if it is not normal, give rise to baffling mental unrest which sometimes approaches and even superinduces acute physical disorder.

**The Easter Bonnet For Mrs. Harding**

An Easter bonnet, with a sash measuring nine feet in length, was designed by a New York milliner for Mrs. Harding. It was made of ecru colored French dentelle and joined with fisher. The flowers were blanch marguerites. Madame Sunshine, designer of the hat, delivered it in person to the wife of the President. Pictures show hat and sash and (left) how it is worn.

**Automobile Economy**

demands

**Gargoyle Mobiloil Oils**

"Price-pride" and cost blindness

That is not the real way to save money

When looking for economical lubricating oil motorists watch price per gallon so hard that the long-run cost is entirely forgotten.

Why does the car manufacturing policy include the use of high grade steels? Why do so many experienced car owners refuse any lubricating oil other than Gargoyle Mobiloil oils? The reason is the same in both cases. Like high-grade steels Gargoyle Mobiloil Oil last longer, "wears" better and costs less in the long run. The body and character of Gargoyle Mobiloil Oil assure

- More miles per gallon of gasoline
- More miles per gallon of oil
- Easier cranking and starting
- Full compression
- Almost no carbon
- Less fouling of spark plugs
- Full engine protection at all times and under any extremes of temperature.

When you say "Give me a quart of oil" you cannot be sure of a single ounce of these economies. When you ask for Gargoyle Mobiloil Oil you are certain to get them all.

Begin now to share in the genuine long-run economy enjoyed by automobile owners everywhere.

## GUILTY PREACHERS

The Christian pulpit is the highest place on earth. It is the only untrammelled, unpurchasable throne in the world. The preacher, if he be a real preacher, is God-called, God-filled, divinely fitted, and supernaturally commissioned. His authority and message are of supernatural origin. Therefore, he is decreed to be a leader. If he meets these divine requirements he is an expert in his exalted position. When ever a minister of the Gospel of Jesus Christ and His vicarious death steps out of this exalted place and fails to perform his duty as a courageous leader and fearless defender of the faith delivered once for all to the saints, he becomes guilty and must be held responsible for all the ills that result from his failure.

There are ministers who have, no doubt, stepped from this high responsible place and they are therefore guilty of all the evils of the country that have come as a direct result of their actions. Such ministers are chargeable with the following defects:

First: Laziness. They do not work, not even half time. Their sermons show it. Their fences are down. Their churches are unorganized. They do not take any part in the civic life of their communities.

Second: They are cowards. They are afraid to speak plainly, pointedly, and persistently against the sins of their members. They are far from being like John the Baptist. They do not demand respect and attention from men because they do not meet men and challenge them in their evil doings. They do not stand like brave men should stand—face to face with a guilty brother and accuse him.

Third: Busy idleness. They are engaged in attending pink teas, and foolish female functions, whereas they should be in the marts of trade,

on the floor of assemblies and lodges, business and political meetings, and social gatherings where men live and where they could stand on the floor of such meetings, expose evil, defend virtue, and advocate righteousness.

Fourth: Infidelity. They have yielded to the Goddess of Heresy, and made a direct attack upon the infallible Word of God and the blood atonement of Jesus Christ. Such men are undermining the faith of the young and unsophisticated saints and are sending thousands adrift into skepticism and sin. Such men are parasites. They are drawing salaries fraudulently because they contracted to preach the infallible Word of God and the vicarious atonement of Jesus Christ. They are preaching something else. Therefore, such conduct is dishonest. Such men are largely responsible for the rise of the infamous cults and the spread of irreverence, frivolity, impropriety, domestic infidelity, religious infidelity, apostasy, and general social criminality.

If the preachers were preaching faithfully, fearlessly, courageously, the whole Gospel of Jesus Christ, and were exposing crime, demanding confession, and bringing men face to face with the judgment of their deeds, the crime wave of this country would subside at once, and a great revival of religion would begin.

The pettifogging, heretical, spineless, rationalistic, infidelic preachers of the country are responsible for the social conditions of this land.

## STILL HAS FAITH IN PECOS OIL FIELD

The following letter from Mr. Garvin to Mr. Leon Bell is encouraging to those who are drilling in the Pecos oil field as well as those who have invested therein. Mr. Garvin is well known in Pecos and his opinion is counted on by our people as being worth something—they believe in him. The letter follows:

2863 East Weston St.,  
Lanita, California.  
April 1, 1922.

Mr. Leon E. Bell,  
Pecos, Texas.  
Friend Leon—

I put in most of the week in Los Angeles, met many oil men, and some old timers. They mostly stop or hang out at Hotel Hayward, 6th and Spring. Many of them have investments in Pecos territory and expect big things to happen in Pecos in the next 30 days.

I met a Mr. Burns of Barstow, California, who has large acreage there, who asked many questions about the Pecos territory and I told him about how I came to go there through Mr. Edwin F. Smith and Ira J. Bell, who I met in Los Angeles, and took a contract to drill a well for the Dixieland Syndicate. When I arrived in Pecos Mr. Brawley Oates and Mr. Bell took me out to look over the well site etc., and that night I met Mr. Bell in his office and he asked me what I thought of the location, and I told him that if I had seen the formation as it shows in the Dixie canal below the location twenty-five years ago, before oil companies had locations made by geologists, I should have wanted to have drilled a well where he was located. I also told him that drillers were not over supplied with money but to put me down for as much interest as one thousand dollars would purchase. I still have the interest and the same faith in the location as I did at first and mean to stick and play the game out.

I am of the same belief I have had since first going there to drill, that wells East and West of Dixieland Anticline will have to go deeper for the oil and gas if they find any.

Outside of the Pecos-Angeles and the structure it is located on, I would not trade 10 acres of Dixieland structure for any section I know of in the field.

I believe the well on section 9, called I believe, the Hawkeye and the one on section 6, both drilled to shallow depths, are splendid locations.

I also believe the Dixieland anticline goes through and can be seen on section 10, block 70, West of Toyah, the top is gone for about a mile starting on the E 1/2 of section 11, where it pitches West and about one mile East toward Toyah it pitches East and lays about 22 miles S. W. of Bell No. 1, going North through section 6, near R. R. it does not show until you strike the river where you see it again. I do not know if it comes to surface in Loving county, but I believe a well drilled on top of structure will miss the salt beds, or start under them, and get the gas and oil at from 2200 to 2800 feet shallower than on the syncline.

We are having a little Pecos weather, the wind is driving dust from the Pacific 4 miles West so I couldn't whittle a salt cedar if I had one.

Hoping to hear from you in the near future and that Pecos is prosperous, I will close.  
(Signed) MILO M. GARVIN.

mation about where and how to get them, and can enlist the aid of others where financial assistance is needed. A number of such cases have already been brought to the attention of the department, and Mr. Rockey states that he will be glad to have any such cases brought to his attention.

## AND HER CUSTUME WAS ONLY A HAT

And now we get from C. F. Bertelli news from Paris that a noted snake charmer has appeared at the fashionable Longchamps race track clad only in a hat—and peculiar as it may appear, and as showing the folly of taking snap judgment, the custume is described even by the French Anthony Comstock as modest. More modest than the custume of the British and American flapper, seems to be the verdict. It appears that, falling from the hat, a wide brimmed creation, fell yard after yard of rich black lace, completely concealing the noted figure of the snake charmer and reaching to the ankles. Only one shoulder was visible and on this was glued a single red rose to harmonize with a rose on the hat.

"The lesson," said the snake charmer, "is one of simplicity. I step from my bath, put on my hat and I am completely and comfortably dressed." Seemingly, the war with all its suffering, has not left France without her imagination and her daring, to say nothing of her passion to lead the world down the widest avenues of dress construction. Longchamp has vied with Ostend for years in the matter of daring in female attire, but the suggestion that a custume confined solely to a hat would meet the approval of professional reformers was beyond the widest stretch of imagination even among the French a year ago. The world does move.

## THE DAWN OF CHRISTIANITY

The wireless telephone will soon sound the death knell of religious intolerance, and will bring more good to the world than any force wrested from nature since time began, and the ministers are not slow to recognize the fact. Those of the clergy who really think and are in intelligent contact with the men and women of the world, have suddenly come to see that it is not so much the churches, as the things the churches stand for and the manner of their interpretation, that is going to count. When sermons are broadcasted from coast to coast, the people will soon come to sense the true from the false in religious leadership and to know where may best be found actual christianity. No longer may the narrow minded parson stand as the law and the prophets, infusing misleading doctrine into simple minds under the shadow of the cloth. Too many creeds have suffered because of their misinterpretation by little men dealing with the biggest of subjects. Today the ministers' congregation is the country, and soon it will be the world. When this happens the dawn of a real Christianity will have broken and a harmony between man and his Maker develop to the glory of God and the blessing of His Creatures.

The above clipping shows the trend of thought of the press regarding the wireless telephone.

## YOUNG FOLKS DID IT EVER OCCUR TO YOU THAT:

There is a scarcity in the business office of high-priced men and women today; many are worth a thousand dollars a year, but only a few are worth ten thousand. The late Prof. James of Harvard declared that the average man uses only ten per cent of his brain power. Suppose you are twice as capable as the average man,—you are using only twenty per cent of your maximum power, only one-fifth of your greatest possibilities.

Eighty-five per cent of the men in this country are earning only twenty-five dollars or less per week. Ninety-two per cent of those in business fall between the ages of forty and fifty. Ninety-five per cent have no money at the age of sixty. Our business is to take you out of the eighty-five, the ninety-two and the ninety-five per cent class. If you can't come to us we will come to you through our large and most successful Home Study Department.

We have been very successful in producing high-salaried men and women, as shown by the letters in our catalogue from our former students, their parents, their employers, and from prominent men and visitors to our big school. Largest business training institution in America. An average of over 3600 enrollments for the last five years. Most thorough, practical and complete course of business training to be had, in half the time and at half the cost of other courses in the ordinary business college. All modern office equipment more than thirty specialized teachers.

Let us train you for business success. Fill in and mail coupon for large free catalogue.

## ARTIFICIAL HANDS THAT PERFORM LIKE THOSE NATURE MADE.

The man who loses hand or a foot in an industrial accident need no longer go through life maimed and burdened with a useless limb. Artificial limb manufacture has reached a stage at which cunning mechanical substitutes may now be provided that do the work of the missing member almost as well as the one provided by nature.

D. W. Rockey, state supervisor of industrial rehabilitation, received at the department of education this week a set of photographs showing some of the modern marvels of mechanical substitution for a missing member. They show men with both arms missing who are doing normal, every-day work at their former occupations and making good as usual. The pictures will be used in the work of the industrial rehabilitation department in showing maimed and discouraged men that they need not despair and give up. While the department cannot provide funds for artificial limbs it can give the man who needs their aid infor-

# WHY

## HOME TRADE FALLS OFF

### It Always Slumps When Business Is Unbusinesslike

Most business men have this failing—they are swept off their feet when business booms.

We hit prosperity. Then starts the trouble. Everybody buys everything in sight and the merchants are caught in their own trap. They start advertising to beat the band. A riot of selling follows, the merchants OVER ADVERTISE and OVERSELL THE MARKET.

Demand for goods keeps up and then comes the trip to the bank to borrow—for expansion. Then What? shortage and rising prices—a riot of buying before prices tilt to the top and a wild spree of advertising to keep the game going.

Suddenly there comes a halt. Buying slows up, and timid unbusinesslike merchants curtail advertising and the buying halt continues. Then advertising is stopped and business becomes stagnant.

When trade needs no stimulus the merchants buy space like drunken sailors, but when trade needs a strong push, they contract.

If business spent one-third the money in advertising when trade is booming and three times the money when trade is poor, business would find stability.

## Now is the Time to Advertise Extensively

Don't throw chips on a blazing fire. The wood is needed when the fire is low. Advertising now means a real service to the buying public. The people want to know where and what they can buy economically.

**Merchants Get Busy.  
Make Your Drive Now**

**FINANCIAL REVIEW**

Prepared For The Enterprise By  
The First National Bank In  
St. Louis.

During the year ended December 31, 1921, 41,892 motor cars were exported from the United States. Of this number, Latin American countries took 33 per cent, British North America 15 per cent, Asiatic countries 14 per cent, Europe 13 per cent, Oceania 11 per cent, non-contiguous territory of the United States 9 per cent, Africa 4 per cent.

Of the 13,729 cars exported to Latin America 10,207 or 74.5 per cent went to Mexico and Cuba, 1454, or 10.5 per cent to Central America and the West Indies exclusive of Cuba and Porto Rico, and 2,068, or 15 per cent to South American countries.

Japan, the Dutch East Indies, British India, and China took 4,627, or 76.9 per cent of all shipments to Asia. The United Kingdom, Belgium, Sweden and Holland received 3,549 cars or 85 per cent of all exports to Europe, Australia and New Zealand together took 4588 cars. Eighty-five cars went to Alaska. Of 5,526 cars shipped to Africa, 42.8 per cent, or 654 cars, were taken by the South African Union.

Eighty-three per cent of all the motor car exports were brought by 18 countries, the relative positions of each of the 18 changing continually during the year. The Philippines, for example, first on the list in January were last in December, while Australia, which was second in January and tenth in June, was first in December.

**"WET" BUT FIRMS**

"Yes, sir, he says Henry were making \$200 ev'ry week, and he didn't pay but \$40 protection."

"Lads Monday a Federal prohibition officer came and say: 'You has got to move out, 'cause I gwine ter raid you on Wednesday, and I don't want to find no ev-i-dence here.'"

"Henry say, 'I pay \$40 a week

for protection, and protection I'e gwine to get and don't you touch nothin' in dis here house.'"  
"And Henry say didn't nobody raid him!"—From the report of a liquor case in a Richmond (Va.) paper.

**SAYING IT WITH FLOWERS**

"Have you offered Tom any encouragement?"  
Edith—"Oh, yes. When he asked me what my favorite flower was, I said: 'Brown's for pastry and Smith's for bread.'"—Boston Transcript.

**FOR SALE**—Perfectly good heating stove at a very reasonable price. Apply at this office.

**LIFT CORNS OR CALLUSES OFF**

Doesn't hurt! Lift any corn or callus off with fingers

Don't suffer! A tiny bottle of Freezone costs but a few cents at any drug store. Apply a few drops on the corns, calluses and "hard skin" on bottom of feet, then lift them off.

When Freezone removes corns from the toes or calluses from the bottom of feet the skin beneath is left pink and healthy and never sore, tender or irritated.

**CITATION BY PUBLICATION.**

The State of Texas,  
To the Sheriff or any Constable of  
Reeves County,—Greeting:

You are hereby commanded to summon H. S. Dunn, Christian Dubach, Laura E. Dubach, Pierre P. Freyman, Paul C. Krank, George A. Rathburn, Reinhold Meierhoffer, Alfred Tinally, Henry Deutsch, Henry H. Murphy, Jesse D. Murphy, Unknown Heirs of Emma C. Meierhoffer, deceased, Federal Service & Development Systems, Inc., Ben Williams, M. P. Carlock, A. P. Foster, J. O. Childers, W. C. Best, R. E. Alston, Abner Davis, Trustee; and the Federal Service Systems (not Inc.), a common law trust and its trustees, A. W. Beisang, W. C. Heller, F. M. Rutten, H. B. Baillie and Henry Deutsch, by making publication of this Citation once in each week for four successive weeks previous to the return day hereof, to appear at the next regular term of the District Court of Reeves County, Texas, to be holden at the Court House thereof, in Pecos, Texas, on the 24th day of April, A. D. 1922, then and there to answer a petition filed in said Court on the 23rd day of February, A. D. 1922, in suit No. 2231, wherein L. H. Lamkin is Plaintiff, and H. S. Dunn, Christian Dubach, Laura E. Dubach, Unknown Heirs of Emma C. Meierhoffer, Reinhold Meierhoffer, Charles K. McKnight, Laura A. McKnight, Henry H. Murphy, Jesse D. Murphy, B. T. Biggs, Alfred Tinally, Jno. B. Howard, Sunshine Oil Corporation, Pierre P. Freyman, Federal Service & Development Systems, Inc., and its trustees, Henry Deutsch, A. W. Beisang, W. C. Heller, F. M. Rutten and H. B. Baillie, Antonio De Pasquale, A. V. De Pasquale, Henry Deutsch, Abner Davis, Trustee, W. A. Hudson, M. P. Carlock, El Paso Printing Company, Krakauer-Zork Company, Ben Williams, Tom Simmons, Pecos Land Company, A. P. Foster, J. O. Childers,

George A. Rathburn, Paul C. Krank, W. C. Best and R. E. Alston, are Defendants, and said petition alleging that on or about March 28, 1914, Defendant, H. S. Dunn, executed and delivered to L. H. Lamkin, his five certain promissory notes, dated March 28, 1914, being numbered, due and in amounts as follows: Note No. 1, due March 1, 1916, for \$1000.00; Note No. 2, due March 1, 1917, for \$1000.00; Note No. 3, due March 1, 1918, for \$1000.00; Note No. 4, due March 1, 1919, for \$2,000.00; and Note No. 5, due March 1, 1920, for \$4,500.00; payable to L. H. Lamkin, with interest at 6 percent per annum, and providing for 10 percent attorney's fee in case of suit thereon. Whereby defendant H. S. Dunn became bound said sums specified. That Notes Nos. 3, 4 and 5, totaling the sum of \$7,500.00, interest and Attorney's fee, are now due and unpaid.

That said notes were given for a part of the purchase money upon Section Thirty-five, Block Four, H. & G. N. R. R. Sur., Reeves County, Texas, save and except right of ways for the Pecos Valley Railroad, and for the Pioneer Canal, leaving 625.50 acres; and that in said deed executed upon said March 28, 1914, by L. H. Lamkin to H. S. Dunn, a vendor's lien upon said tract of land was retained to secure the payment of said notes. That said notes Nos. 3, 4, and 5 are still due and unpaid to plaintiff's damage in the sum of \$7,500.00, interest and attorney's fee.

That by a series of mesne conveyances from H. S. Dunn, the defendants, Christian Dubach, Laura E. Dubach, Unknown Heirs of Emma C. Meierhoffer, Reinhold Meierhoffer, Charles K. McKnight, Laura A. McKnight, Jesse D. Murphy, and Henry H. Murphy assumed and became bound to pay said vendor's lien notes, and are claiming some title to said tract of land.

That defendants Charles K. McKnight and Laura A. McKnight leased by an oil and gas lease to B. T. Biggs, Alfred Tinally, and Jno. B. Howard, said tract of land above described on June 17, 1918. That said Defendants assigned said lease to the Sunshine Oil Corporation, which corporation in turn assigned portions of said lease to defendants, Federal Service & Development Systems, Inc., Federal Service Systems (not inc.), Antonio De Pasquale, Henry Deutsch and other parties.

That since the execution of said deed and notes the defendants, W. A. Hudson, M. P. Carlock, El Paso Printing Company, Krakauer-Zork Company, Ben Williams, Tom Simmons, Pecos Land Company, A. P. Foster, J. O. Childers, George A. Rathburn, Paul C. Krank, W. C. Best and R. E. Alston hold judgments against Sunshine Oil Corporation and Federal Service Systems (not inc.), duly abstracted and recorded, but that said judgment liens are inferior to plaintiff's vendor's lien which is a valid and subsisting first lien upon said tract of land, above described.

That the right, title and interest of all of said defendants named herein emanates from the equity of defendant, H. S. Dunn, in said land, under said deed from L. H. Lamkin to H. S. Dunn, and are all subordinate and inferior to plaintiff's vendor's lien. And plaintiff prays for judgment for his debt, interest, attorney's fee and costs; foreclosure of his lien upon the above described premises; and for removal of cloud upon his title, etc.

Herein fail not but have before said Court, at its aforesaid regular term, this writ with your return thereon, showing how you have executed the same.

Given under my hand and the seal of said Court, at office in Pecos, Texas, this 24th day of March, A. D. 1922.

(SEAL) S. C. VAUGHAN, Clerk  
District Court, Reeves County, Texas.  
By H. P. KERR, Deputy.

No. 2231, in the District Court of Reeves County, Texas, L. H. Lamkin vs. H. S. Dunn, et al, Citation by Publication. Issued this 24th day of March, A. D., 1922.

S. C. VAUGHAN, District Clerk.  
By H. P. KERR, Deputy.

Mrs. J. L. Moore of Brogsdo, was a business visitor in Pecos Monday.

Mack Camp of El Paso, was in town today on a business trip.

Dr. and Mrs. Black of Barstow, were in Pecos shopping Thursday.

The U ranch shipped thirteen hundred head of steers to the White Deer ranch for grass Wednesday.

Mr. and Mrs. Wm. Meyers and children are in El Paso where Mrs. Meyers will remain for some time under treatment of specialists.

A. G. Van Horn and Mr. Harp of Toyah, were Pecos visitors Wednesday of this week and called on the Enterprise.

Sam Means is assisting Woodie Browning in rounding up his pasture making ready for a shipment of stock on the 24th.

Stump Robbins, the sage of Saragoso, was in town Thursday and Friday shaking hands with friends and wearing the same old smile.

The friends of Mrs. Fred B. Faust will be grieved to learn that she was called to Alabama recently on account of the death of her father.

Mrs. Carrie R. Rice left last week for her home in Bloomington, Indiana, after a visit of several months to her daughter, Mrs. S. C. Muck.

Judge J. F. McKenzie, former resident and prominent attorney, but for several years a resident of El Paso, was looking after business matters in Pecos the forepart of the week.

Mrs. H. L. Eaton and daughter, Miss Mary Olive, left this week for their home in Greenville, S. C., after a visit of a few weeks to their cousins, Mrs. Wildie Rannel and Mrs. Jas. F. Ross.

The following Pecos ladies were in El Paso recently in attendance upon the Grand Opera: Mesdames L. W. Anderson, Geo. B. Finley, Lillian Butler, and Misses Maggie Glover and Rose Briscoe.

Mrs. J. A. Leeman returned Saturday from a visit to her sons in Duncan, Oklahoma, where she spent a few weeks and is considerably improved in health, which will be glad news to the many friends of the family.

8 Full weeks—The El Paso Herald—for only \$1.00. This offer is good for non-subscribers of the Herald just for a trial offer to get acquainted.

If you have not read the El Paso Herald recently you have missed a great deal. The tremendous circulation during the past few weeks indicates plainly that the people of the Southwest appreciate the excellent news and feature service of the El Paso Herald.

This unusual offer is good for new mail subscribers only. Send your subscription direct to the El Paso Herald. 36-1f.

If you have a car of any make and want to use the very best of oils you will appreciate the fact that the Pecos Auto Company have just unloaded a car of Mobiloils and are in position to fill your wants in that line. Their stock is complete and their different grades are as complete as in their lines of oils. They have anything you want in oils for any and every purpose and for any car. Note their ad in another place in this issue of The Enterprise and take advantage of their large stock of oils when you are in need of that commodity.

J. F. Caroline Transferred to San Antonio

J. F. Caroline for many years connected with the First National Bank, but at present deputy clerk of the U. S. Court at Pecos, has been appointed deputy clerk of the U. S. Court at San Antonio.

This is one of the most important divisions of the Western District of Texas and the position is a lucrative one. As Mr. Caroline is a republican many of his friends thought he would succeed to the postmastership of Pecos but he has not applied for the position as the San Antonio clerkship is more desirable. The appointment was made by D. H. Hart, clerk of the Western District.

The Enterprise regrets the loss of Mr. Caroline and family to Pecos, but wishes them God-speed in their new home. Mr. Caroline's position here will be filled by W. W. Dean who has had extensive experience with U. S. Court procedure. Appointments are effective May 15th.

Give nature a chance. Take Tanlac, nature's own medicine.—Sold by Pecos Drug Co. 1t.

AT THE BAPTIST CHURCH

All regular services will be held at the Baptist church Sunday. At the morning service we hope to take our spring offering for the cause included in the 75 million campaign. We expect to have a good crowd and a worthy offering. The common sense method will be used and no one will be embarrassed.

Our Sunday School is growing both in interest and attendance. Let everyone be on hand promptly at 10 o'clock and contribute his part of the Spizz to the Spizerinctum always prevalent in the ten o'clock hour.

The Men's Bible Class had thirty-seven present last Sunday. Let's beat that record, men. Every man is accorded an invitation to attend this class at the Rialto theatre. The Story Telling hour during the morning service is proving a great success. Come and bring the babies. Everybody is welcome at any of the services.

J. M. GARNER, Pastor.

If the people who have taken Tanlac were to form a line of march in single file, this grand army would reach clear across the American Continent from New York to San Francisco and extend over 3,000 miles into the Pacific Ocean. Tanlac is sold by Pecos Drug Co. 1t.

Eddie Kraus Murdered In Tampico, Mexico

Mrs. J. H. Derrick of Alpine, on her way to the annual convention of the Woman's Missionary Society of the New Mexico Conference, brought the sad news of the murder of Eddie Kraus in Tampico, Mexico, about a month ago.

The news came through her husband who is working with an oil company in Tampico, and the letter stated: "Get in touch with Joe Kraus at Pecos. His son Eddie and another young man were murdered here about three weeks ago."

Since receiving the sad message Joe Kraus has taken up the matter by wire with Congressman Hudspeth who states that no official knowledge of the tragedy has been received in Washington. He has also written to Mr. Derrick in Tampico relative to the matter but up to the time of going to press has had no word from him.

Mr. Kraus yet hopes that there is some mistake and that possibly his son yet lives. He cannot understand why some knowledge of the tragedy has not been received by some official or some one else.

District Court Will Convene Monday

Kesler, James Harlan, B. T. Biggs, E. Wadley, D. T. McKee, G. A. Easterbrook, T. T. Ownes, J. W. Jackson, Monroe Kerr.

WRIGHT-HAMILTON

Miss Annie Wright, an extremely popular young lady of Pecos, was married Easter Sunday at Fort Stockton to Mr. Wynn Hamilton of Saragosa. The anticipated wedding was known only to a few persons in Pecos and her marriage was an agreeable surprise to her many friends. Mrs. Hamilton is a graduate of the Pecos High School and has been connected with some of our largest business houses in Pecos as an accountant. She resigned as Assistant Manager of the Western Union Telegraph Co., a few days before Easter and Mrs. Wilson the manager expresses her profound regret at the loss of her efficient services.

Mr. Hamilton is well known in the valley and is a young man of sterling quality and exceptional business ability. He has the management of the extensive operations of Sol Mayer, a Denver, Col., capitalist. He also has charge of the Valley Alfalfa Association and has the confidence and respect of many large business concerns. The Enterprise joins in the best wishes for this young couple and hopes their permanent location will be in Reeves county.

They are expected to return to this city this week.

Two Take Examination For Postmaster

A petition containing more than 400 names of Pecos citizens, men and women, asking the retention of H. N. McKellar in the position of postmaster was forwarded to Washington this week by local business interests.

The examination date for the vacancy in the local office was Tuesday of this week, and it is understood that Elmer Johnson and Mr. McKellar filed papers asking for the office.

During his term of office Mr. McKellar has given Sunday service to the Pecos patrons of the office, and it is hoped that whoever may be the successful applicant that this service will be continued.

Tanlac strengthens the nerves and brings back the normal state of health through its effect on the appetite and nutrition of the body. Pecos Drug Co. (Advertisement)

BIRGE HOLT RE-TURNS WITH BRIDE

County Attorney Birge Holt sneaked off down to Corpus Christi a few days ago, where on Wednesday of last week he was happily married to Miss Addie Louise Stayton, the highly accomplished and attractive daughter of Mrs. Annie B. Stayton, of that city.

Following the ceremony Mr. and Mrs. Holt visited for a few days with Mr. Holt's parents at Sherman, and arrived in Barstow Wednesday afternoon. Mr. and Mrs. Holt have rooms with Mr. and Mrs. F. I. Dyer, and in behalf of the citizenship in general the News extends to Mrs. Holt a most cordial welcome to our midst and wishes for them a long, happy and prosperous married life. —Ward County News.

Miss Hazel Berry who is teaching in the El Paso schools came down yesterday for a week-end visit to her cousin, Mrs. M. W. Collie and other friends. Miss Hazel spent several months, up until Christmas, in Cuba with a relative.

J. P. SEAY CRITICALLY ILL

A message received today from Mrs. J. P. Seay by T. H. Beauchamp is to the effect that the attending physicians held no hope that Mr. Seay would pass through the night. Mr. Seay just a week or so ago joined his family at Long Beach, California. The many friends of the family will be grieved to hear this sad news.

WANT ROAD BUILT TO COST LESS

Thomas H. MacDonald, chief of the Bureau of Public Roads, wants to cut down the cost of road building throughout the United States. He called highway officials of many states to Washington, and asked for standardized specifications which would permit plants to furnish materials to all states at greatly reduced costs.

THREE WELLS ACTIVE IN PECOS COUNTY

Three wells are now actively drilling in Pecos county in the vicinity of Fort Stockton according to Carleton Ely of that city who was in Pecos early in the week.

These wells are those of the Grant Oil Corporation, the Troy interests and the Greer interests.

The Grant well, which was formerly known as the Oregon-Texas well is now battling with an artesian flow of sulphur water which has shot at times fifty feet high in the standard derrick. This water carries a flow of oil. The flow comes from about 1400 feet.

The Troy well is underreaming and drilling at about 1800 feet, and the Greer well has drilled to 160 feet and is to set casing at that depth. The latter well is located on section 592, about 17 miles north-east of Fort Stockton, and a short distance east of the Fort Stockton Syndicate well which had a good showing of oil at 1050 feet. Difficulty with the casing caused this Syndicate well to be abandoned. A shot was placed in the well with the casing full of fluid and the hole was junked as a result.

Mr. Ely, who was formerly connected with the Pecos Abstract Company, was called to his former home in Mobile, Ala., by the illness of his father.

**When Summer Comes**

and the hot winds blow—and, when we come to think of it, that time is not so far away—there will be little enough of comfort and rest to be found in the ordinary bed room.

Much ill health results from sleeping in stuffy, poor ventilated bed rooms during hot summer months. Growing children especially should sleep where they can breathe the pure air of the great out-of-doors. Otherwise they cannot secure the rest and sound sleep that mean so much to them so far as health is concerned.

**A Sleeping Porch**

will solve this important problem for you. There is no single feature that you could add to your home that will give more pure enjoyment to the entire family than a sleeping porch. It means the same vigor, the same refreshment that comes from sleeping in the open.

The hot nights are just around the corner! Be prepared. Build a sleeping porch and get a full night's sleep every night during the summer. We will be glad to help you plan this valuable improvement to your home. We can supply everything that is necessary for such an addition, either the less expensive screened porch or the more elaborate sun parlor effect with windows. Resolve now to enjoy warm weather. Come in and see us about plans, material and cost.
