So extra delicious With fresh fruits

No other food has such an appeal on a hot day as Kellogg's Corn Flakes! They win fickle appetites, they satisfy hungry folks! As an extra-summer taste thrill, eat Kellogg's with the luscious fresh fruit now in season. Such a diet is not only ideal from a health standpoint, but it is refreshing!

You can eat Kellogg's Corn Flakes liberally at any meal because they digest easily. Let the children have all they want.

Insist upon Kellogg's Corn Flakes in the RED and GREEN package that bears the signature of W. K. Kellogg, originator of Corn Flakes. None are genuine without it!

The Wonderful Red Star Oil Burner

Red Star Burners have no wicks or wick substitutes. Fuel is vaporized into gas, giving a clear, blue flame.

Heat condenser is an inverted cone-shaped casting which holds the heat and forces it to strike utensil squarely.

Burners are made from solid grey iron castings annealed to withstand heating and cooling; last a life-

This is an illustration of the Red Star

Burner. It is made entirely of grey iron

castings, there being no wicks or wick

substitutes. The fuel flows directly in-

to a double ringed channel or vaporizer and the slotted burner parts rest direct-

ly upon it. As soon as the fuel strikes the vaporizer it is immediately mixed

with air, forming a gas which produces a

very hot, steady flame, the same as a

city gas range and may be regulated at

The fuel in this stove is piped directly

into each burner through heavy iron

pipes, therefore there is no possible

chance of fuel leaking anywhere in the

stove. The burners, being made of solid

grey annealed iron, simply rest in place,

Double ring flame of intense heat directly under cooking. Burns all the fuel without smoke or smell.

Castings fit in place without fastenings. Easily taken apart for cleaning. Seldom needs any attention.

Fuel flows directly into the double vaporized rings and is mixed with the air to give perfect blue flame.

and should they become dirty by spilling anything into them, they can be readily lifted off and cleaned.

THE HEAT CONDENSER

Is a shallow cone-shaped casting that rests on the burner-see illustration. You can readily see how it holds and forces the heat to strike the cooking utensil squarely, allowing none to escape without doing full service. This method of intensifying the heat gives a much hotter and steadier fire with a great saving of fuel. It also tends to prevent anything boiling over into the burner.

What CERTO is and What it Does

CERTO is a standardized concentrate of that substance found in some fruits that makes jelly. It's "Mother Nature's Jell Maker" and conains no gelatine or preservative.

By old methods, jells and jams could only be successfully made from those fruits rich in this substance; and as ripe fruit contains less of it, housewives were obliged to use under-ripe, under-flavored fruit. More .. over, they had to boil it from 1/2 to 3/4 of an hour, thus destroying both color and flavor. Failures were frequent and the cost high.

By the CERTO Process, jells, jams and marmalades can be made from any fresh fruit as well as from canned or bottled fruit juices, canned fruits and dried fruits. Only one minute's boiling is required, thus saving color, flavor and time. Every batch is a success, thus saving needless worry and loss. Moreover, you get 50 per cent more jam or jelly from the same amount of fruit because you save the juice formerly boled away, thus saving money.

Jams, Jellies, and Marmalades are healthful, appetizing and strengthening foods; and when made by the simple easy CERTO Process are inexpensive.

Get a bottle of CERTO and book of CERTO Process Recipes today; also some grape juice, canned pineapple, some oranges, grapefruit or strawberries today, and get the economical habit of serving CERTO Process jams, jellies and marmalades with every meal.
