

## Fall Care of Orchards

Spray Dormant Trees for Scale Insects—Other Operations, Too, Are Effective in Bringing Disease and Pests Under Control—Fall Is Time to Destroy Leaf-Hopper.

Valuable work in the control of orchard pests may be accomplished during the fall, winter, and early spring. Certain destructive insects are held in check only by spraying during the dormant period of trees, when stronger washes may be used than when trees are in foliage. Many insects of the orchard spend the winter on the trees in the egg, larval, or pupal stage, and their destruction in the course of pruning or other orchard work is practicable and is of much importance in keeping them reduced.

### Spray Dormant Trees for Scale Insects and Plant Lice.

Orchard scale insects as a class are best treated after the foliage has dropped from the trees. This work may be done in late fall, during the winter when the temperature is above freezing, or in the spring before the buds swell to any extent. Spraying of apple, peach, pear, and other trees for the San Jose scale with strong lime-sulphur or other suitable wash is now very generally practiced by orchardists, and many persons owning but a small number of fruit trees in the yard also regularly spray the trees for the control of this serious insect pest. Lime-sulphur concentrate is used in spraying for the San Jose scale, and may be purchased of manufacturers or made at home. The commercial article usually has a density of 32 to 34 degrees as registered on a Baume hydrometer, and in preparing the concentrate at home effort should be made to secure a wash of about this density. Such a concentrate is used at the rate of 1 part to 8 or 9 parts of water. Only one treatment each winter is necessary to hold this pest in subjection, but the application must be very thorough, coating all parts of the twigs, limbs, and branches. This work requires a spray pump and these may now be obtained for work on almost any scale, and range in size from the so-called bucket pump, suitable for work on a few trees in the yard, to the large gasoline-power outfit employed in extensive orchards. More specific information on the San Jose scale and the preparation at home of lime-sulphur concentrate will be found in Farmers' Bulletin 650.

Certain other scale-insect pests which may be present on the trees, as the cherry scale, oyster-shell scale, etc., are also pretty well held in check by this annual treatment with lime-sulphur wash. The treatment is also effective against the pear-leaf blister mite, which is universally present on pears and in some localities is a very serious apple pest. Certain destructive apple plant lice winter in the egg stage on the apple, especially on the newer growth, and thorough lime-sulphur spraying for the San Jose scale undoubtedly results in the destruction of many of these eggs, though the treatment is not always sufficient to obviate spraying after the insects have hatched and the foliage is putting out. In the Middle and Southern States,

where the winters are not too rigorous, the woolly apple aphid often maintains itself in colonies here and there on apple trees, occurring more especially around wounds where the thinner bark is exposed. The spraying for the San Jose scale aid in destroying these colonies. Spring spraying of peach as the buds are swelling, in addition to its destructive action on the scale insects mentioned, is also a very effective check to the so-called peach twig-borer, or peach worm, which is very destructive in California and numerous arid valleys in the West. This spring application of lime-sulphur to peach is practically a specific for the serious fungous disease known as peach-leaf curl. In some sections of the country the pear Psylla is a very serious pest to pears. The adults hibernate in crevices and cracks on the trees, resuming activity with the first warm days in the spring. Spring spraying of pears for the San Jose scale has in addition a very marked value in checking the pear Psylla.

The so-called terrapin scale of peach, as well as Lecanium scales in general, are not satisfactorily controlled by the lime-sulphur spray, but should be treated with strong kerosene emulsion, or with a miscible (mixable) oil. This latter is a general term applied to several commercial preparations which are used at the rate of 1 part to 18 or 20 parts of water. Destroy Wintering Stages of Codling Moth and Leaf-Feeding Caterpillars. In addition to routine dormant-tree spraying, much good work may be done in the control of orchard insects by operations during the leafless period. The codling moth, the cause of wormy apples, passes the winter in silken cocoons under the scales of

the trunks and larger limbs of the apple. Old trees especially should be thoroughly scraped with a dull hoe or similar instrument to destroy the hibernating codling-moth larvae.

The apple-tree tent caterpillar winters in the egg stage on various orchard trees, as the apple and peach, and especially on wild cherries growing along fences or on waste land. The eggs are placed in rather conspicuous dark-colored belts or bands around the smaller twigs. These are readily observed and may be collected and destroyed without much trouble during the work of pruning or at other times. Very effective work in the collection of egg masses has already been accomplished in regions where this insect has been excessively abundant. In some instances it will be possible to enlist the interest of school children, as was done in Michigan during the winter of 1913-14. Prizes were offered for the greatest number of egg masses obtained, and the total collected in this work amounted to several million.

The fall webworm winters in the pupal stage on apple and various other trees. The flimsy cocoon is easily recognized from the hairs of the caterpillar mixed in with the loose silk. The cocoons occur in all sorts of sheltered places, as in crevices, knot holes, under bark scales, etc. They should also be searched for in trash on the ground, under boards, in rail fences, and in similar situations.

Another insect of general feeding habits is the white-marked tussock moth, which winters on fruit trees in the egg stage. The eggs appear as a

frithy mass and are usually deposited beside the grayish silken cocoon from which the wingless parent moth escaped. It will be easy to collect and destroy these pupae and egg masses.

Throughout the Middle West, and to a less extent elsewhere, the winter nests of the leaf crumpler are conspicuous objects on fruit trees, especially quince, pear, and apple. The larvae winter in tough, horn-shaped cases, to which are usually attached several dead leaves. These nests should be removed and burned to destroy the caterpillars within.

### Cut Twigs Injured by Buffalo Tree-Hopper.

The work of the buffalo tree-hopper usually attracts the attention of the observant orchardist, especially during pruning. This insect punctures the young twigs in the course of its egg-

Cochrane's Ground Floor Studio

# Overland

Model 75—f. o. b. Toledo

# \$615

Roadster \$695

With Electric Starter and Electric Lights  
Four-Inch Tires

HERE is another Overland model. A brand-new car at a brand-new price. Many people prefer a car that is smaller, lighter and more economical to run, but with the advantages of the larger and higher priced cars.

Model 75 is a comfortable family car with virtually all the advantages of the very large cars at a price which is well within your reach.

The price is only \$615.

It has a powerful motor; electric starting and lighting system; high-tension magneto ignition; 104-inch wheelbase; cantilever springs; four-inch tires; demountable rims; streamline body design.

This season our factory capacity has been increased to 600 cars a day.

This, in itself, explains our ability to give so much car for so little money.

This newest Overland is a beauty. The body is the latest full streamline design with a one-piece cowl.

It is handsomely finished in solid black with bright nickel and polished aluminum fittings.

Five adults can ride comfortably.

While the car is roomy, it is light in weight, 2160 pounds.

It has demountable rims with one extra.

The tires are four-inch all around, because we believe in the advantage of large tires.

They insure greater mileage and comfort than can be obtained from the smaller size used on other cars of similar specifications.

The motor is four-cylinder, long-stroke en-bloc type, having a 3 1-8 inch bore and 5-inch stroke. Horsepower is 20-25. It is of the most modern design.

It has high-tension magneto ignition. This is the kind used on the most expensive cars.

The electric starting and lighting system is one of the most efficient on the market. It is of the two-unit type.

The large electric headlights have dimmers.

This car is very easy to handle. It responds quickly. Anyone in the family can drive it.

The electric switches are conveniently located on the steering column. This is the same arrangement used on the highest priced cars.

It has the easy working Overland clutch which any woman can operate. The pedals are adjustable for reach. The steering wheel is large and turns easily.

The brakes are large and powerful.

The rear springs are the famous cantilever type. These springs probably are the easiest riding and most shock-absorbing springs ever designed. With these springs riding comfort is insured.

The seats are roomy and comfortable, for the soft cushions are built over deep coiled springs.

It has a mohair one-man top.

In short, there is everything that makes this car up-to-date and comparable with many cars costing considerable more money.

You will be delighted when you see it. And when you ride in it you'll know instantly that this is your ideal of a modern automobile at your idea of a moderate price.

Other Overland models are—Model 83 five-passenger touring car \$750; the famous Overland Six seven-passenger touring car \$1145. All prices being f. o. b. Toledo.

**MAGAZINE RECOMMENDS USE OF INEXPENSIVE SEASONING.**

Among other inexpensive seasonings, Good Housekeeping gives these, and recommends that the directions be cut out and pasted on the spice boxes and bottles or on filing cards:

**Fine Herbs**—A combination of herbs, minced together, made up of a teaspoonful of parsley and a half teaspoonful each of marjoram, savory, chervil, and a little sage. Sprinkle over broiled or planked fish, place in the fold of an omelet, strew over shirred eggs, or serve with lettuce or romaine. Use in stuffing for baked cabbage, tomatoes, or game.

**Mint**—Use fresh in mint sauce, cabbage-and-mint salad, drinks as orange-mintade, orange-and-mint, salad, lemonade, fruit cocktails, and fresh or dry in a casserole of duck, apple jelly or gelatin, canned or dried pea soup, and with peas.

**Parsley**—Use sparingly fresh, or dried and refreshed, with omelets, shirred eggs, and chopped meat, broiled tomatoes, mushrooms, buttered potatoes, in butter sauce for fish, and in soups and salads.

**Sage**—Use fresh or dry with beef, chopped meats or pork, stirred into plain corn-meal mush for frying, and occasionally with cabbage, string-beans, or spinach cooked with salt pork; also in bread dressings for pork or ham.

**Thyme and Majoram**—Use with light meats, such as turkey, broiled squab, pan-cooked chicken; with fish, in bread dressings, and with boiled beans.

**Tarragon**—When fresh, mince and sprinkle on plain salads, use in chicken, fish, and veal salads, or sparingly on broiled fish. Use fresh or dry in making tarragon vinegar.

**Horseradish**—Use with heavy meats mixed with a little vinegar and sugar, or as a sauce made with stock and crumbs, beat into butter and spread on broiled or planked fish, or use in sandwiches; add to pickled beets or to beet-and-cabbage salad. Dried horseradish may be refreshed and used in the same way.

**Bay Leaves**—Use sparingly in meat soups, bisques made of haddock and cod, cream-of-tomato soup, and cream-of-celery soup. Boil with veal, ham, game, and fish. Use in baking fish, carrots en casserole, stewed tomato, in white sauce for meat or fish, or in brown and tomato sauces.

**Celery-Tips**—Use for celery soup, bouillon, in sauce for fowl, for creaming oysters, lamb, or chicken, in making chicken jelly, boiling veal for a loaf, and in potato soup and oyster stew.

**Mixed-Pickle Spice**—Use a teaspoonful in making two quarts of soup-stock, boiling mutton, fish, corned beef, ham, or tongue, making tomato soup, pickling beets, cauliflower, and carrots for immediate use. To use, tie loosely in cheese-cloth.

**Whole Cloves**—Use in making soup-stock, sweet-sour sauces, baked carrots, in boiling beans, spiced beets, and fish, and in baking ham in grape-juice. Use in spiced grape-juice, cod-died apples or pears, and spiced punch.

**Mustard**—Sprinkle sparingly on lettuce to be dressed at the table, in mustard sauce for potatoes, beef, and so on, combine with minced ham and tongue for sandwiches, and add occasionally to cheese dishes.

**Mace**—Use sparingly with spiced beef, oysters, veal, in mayonnaise for shell fish, occasionally in sauce tartare, French oyster soup, scalloped oysters, sauce for asparagus, potato croquettes, and so on; use in rich cookies, berry pies, and pound cake to

produce the old-fashioned flavor. **Nutmeg**—Use very judiciously, as its flavor is pronounced, with spinach, mushrooms, or in place of mace. It may be combined with pickled beets or carrots, also sweet potatoes, stuffed baked potatoes, scalloped fish, and the like. Grate over custard pie or junkets, use in custards, any apple dish, occasionally with cooked peaches or pears, or whenever a blend of spices is desirable.

**Ground Cinnamon**—Use in apple and squash pies, doughnuts, apple rolls, Dutch apple cake, in the sirup for basting baked apples, currantade, spice cakes, toast, cinnamon loaf, and so on.

**Caraway Seed**—Use with pork sausage, in red cabbage salad, for caraway vinegar, in old-time seed-cakes, rye and sweet breads, and so forth.

**Coriander Seed**—Use in pickling fish, in candies, sparingly sprinkled on cookies, ground in cakes, sweet rolls, or bread.

**Curry**—Use with meats which need livening, as soup meat, boiled chicken, sweetbreads and the like, or in sauce for ham, tongue, or fish; in boiled or mayonnaise dressing to be served with veal, lamb, or vegetables. Serve curried rice or potatoes with chicken, veal, or lamb, either plain or creamed. Curry-sauce may be used with quickly boiled cabbage, cauliflower, carrots, or onions.

**TEXAS' VITAL STATISTICS.**

There were 4,920 births in Texas in September, according to a report issued from the office of the State Board of Health, at Austin. The total num-

ber of deaths was 2,203. The leading causes of death are as follows, in the order given: Tuberculosis, Bright's disease, diarrhoea (under 2 years), heart disease, stillbirths, typhoid, cancer, diarrhoea and dysentery, pellagra, malaria, railroad and auto accidents, drowning, suicide, homicide, diphtheria, poisoning, tetanus, burns, scarlet fever, measles, lightning.

The State Board of Health calls attention to the arrangements which have been made for handling serums at low cost through distributing agencies. The nearest station to Plainview that is named is Amarillo. Sixty-one other cities have been selected as distributing places. It is hoped that by this plan serum will be available to all the people of the State. The plan is designed primarily to assist the poor.

**FOR SALE.**

2,000-acre ranch, good water at 20 feet, located 11 miles north of Taft. Thirty-five head good stock cattle go with it. No greater bargain ever offered. The owner can't see after it, so it must sell. \$5,250 buys it. Address "SHALLOW WATER RANCH," Taft, New Mexico. 2t.

## Cutting Cattle Costs

The following article is reprinted from The Country Gentleman. It is from the pen of J. A. Rickart, of Kansas City, Mo. Mr. Rickart's semi-weekly letters on the conditions of the market at Kansas City are carried regularly in The Herald. He has made a close study of the cattle industry and has a broad view of the business, both from the standpoint of the raiser and the buyer.

"Every time a beef animal is sent on a railroad journey it costs the owner from \$3 to \$6 in freight and shrink in weight. It is seldom that cattle are disposed of to the slaughterer with a single transfer by railroad. It may reasonably be considered necessary to transport a large share of the cattle in the country from one point to another by rail at least three times before they reach their final destination at the packing house—first from the breeding ground to a market point, thence to a feed lot, and eventually back to market. But a considerable number of cattle are shipped about the country more than three times, and all such extra transfers are at the expense of the cattle industry, and have their influence in determining whether or not the business is paying.

"Sheep are hauled from one point to another less than cattle, and hogs less than sheep. Therefore, unless cattle sell at a relatively higher price than sheep or hogs, in which case the consumer pays the freight, they are handled at a smaller margin of profit than either sheep or hogs.

"Accordingly, wherever the transferring of cattle about the country is at a minimum, there the profit in the business is greatest. If the breeder and raiser is prepared to finish his cattle he gets largest net returns, for he saves the expense of shipping to market, selling on the market, buying his cattle at the market as feeders, and shipping them to his feed lot—four expensive transactions.

"J. A. RICKART."

## KANSAS CITY STOCK MARKET IN DETAIL

KANSAS CITY STOCK YARDS, Nov. 15.—Beef cattle sold 10 to 15 cents higher after Wednesday last week, but stockers and feeders quit at the low point, but with the yards pretty well cleared.

Receipts today are 26,000 head, a big drop from recent Mondays, killing grades steady to strong, yearlings and twos 10 to 25 cents higher, and good feeders also stronger. Buyers apparently realize that the time is short when they can get good range cattle, and they are taking them today eagerly.

A feature sale today was 15 cars of Burkburnett Panhandle feeders, which have had five pounds of cottonseed meal per day on the grass for three or four weeks, at \$7.50, 1,070 pounds average. Another lot of 1,000-pound Panhandle feeders sold at \$7.65. Best Panhandle yearlings sold at \$7.75, other good yearlings and twos at \$7.00 to \$7.70.

Colorado yearlings and twos sold at \$7.10 to \$7.35, some 1,100-pound Colorado feeders at \$7.10, cows \$5.50 to \$6.00, heifers \$6.40. Short-fed Kansas pasture cattle sold at \$7.25 to \$8.00, which class corresponds to the heavy Westerns from Montana and other Western states, none of which are here.

Country purchases of stockers and feeders last week were 42,262 head, as compared with 26,790 same week a year ago, showing an immense unfilled demand yet existing.

Hogs sold higher after Tuesday last week, but a big run at Chicago today caused a decline of 10 to 15 cents. Receipts here are 9,900 head, top \$6.70, bulk of sales \$6.40 to \$6.65. Both packers and order buyers paid the top price today, which means that hogs of any weight above 180 pounds are eligible to the top, if they have the quality and finish. Packers have exhibited larger capacity for supplies recently, and increasing receipts were taken care of at advancing prices last week. However, a six-dollar market is still the objective of the buying side.

Sheep and lambs sold unevenly last week, but averaged steady, top lambs \$8.85 on Friday. Today receipts are 11,000 head, market 10 cents lower, due to weaker prices at Chicago and Omaha. Top lambs brought \$8.60 today, both Westerns and natives bringing that price. Fat ewes are worth \$5.25 to \$5.75, yearlings \$6.50 to \$7.25, wethers \$5.75 to \$6.25. Feeding stock is in liberal supply, but will be scarce after this week. Prices are not much changed, except that feeding and aged breeding ewes are lower. Feeding lambs sell at \$7.75 to \$8.25, feeding yearlings \$6.50 to \$7.00, feeding ewes \$4.25 to \$5.00, breeding ewes \$5.50 to \$7.00.

FURNITURE and UNDERTAKING

## FALL CARE OF ORCHARDS

(Continued from Page Two.)

laying, the scar later producing a much-deformed and weakened branch. Care should be taken to cut out these injured twigs, with the view to developing new, sound branches.

### Destroy Borers by "Worming."

There are various species of borers attacking fruit trees which may be very effectively searched for and destroyed during the fall, winter, or spring. "Worming" for the peach borer should be begun in early fall and continued until the trees have all been gone over. This is done by cutting away the injured bark sufficiently to trace the burrow and then removing the borer with a knife or hooked wire. Previous to worming the soil should be dug away from the base of the trees so that the castings exuding from the burrows may be seen and assist in the more ready location of the borers. Since many of the peach borers in the fall are yet quite small, very careful work will be necessary to destroy all of them. After the trees have been wormed once, it is a good practice to go over them again. The earth should be drawn around the base of the tree before there is danger of freezing weather. The same plan should be followed in worming the trees in the spring, at which time it will be somewhat easier to detect the borers, because of their increase in size. Throughout the Central and Eastern States apple trees should be regularly wormed in the spring and fall for the roundheaded apple-tree borer. This insect attacks the trees near the ground, and its injury is indicated by brown patches under the bark and the casting, which often accumulate in some quantity on the soil. The use of a sharp knife and moderately stiff wire is usually sufficient in the work of worming the trees, in the case of either the peach borer or the roundheaded apple-tree borer.

### Prune and Apply Washes for Shot-Hole Borer.

The work of the fruit-tree bark-beetle, or shot-hole borer, is often first detected on trees during pruning operations in winter, and steps should be taken as soon as it is discovered to correct the trouble, if possible. The shot-hole borer as a rule attacks trees which are in a state of decline from any cause. It winters in various stages in galleries just beneath the bark. Peach trees attacked by this insect and which still have vitality to exude gum at the injured points may in some cases be brought into condition by severe pruning and an application as the buds swell in the spring of an effective wash, as fish-oil soap, at the rate of 1 pound to the gallon, or heavy whitewash, or a wash made of 1 pint of crude carbolic acid and 1 gallon of soft fish-oil soap dissolved in 8 gallons of water. Washes should be thoroughly applied to the trunk and larger limbs. In the case of apple, pear, and other trees which do not exude gum to any extent, it is a question of judgment whether it will be possible to save trees attacked by this insect. If the infestation is rather severe, it usually indicates that the tree is beyond hope of saving. Individual branches on trees may often show attack by this insect, and should be promptly removed and burned to prevent its further increase and spread.

In regions where the seventeen-year locust has been abundant, young orchards especially are often severely injured. During pruning operations in winter particular attention should be given to cutting out the injured branches, since these are usually so weakened that they will not support any considerable crop of fruit.

### Burn Trash to Destroy Grape Insects.

Several grape insects winter among the fallen grape leaves in trash in vineyards, and much may be done to destroy them if the trash be raked together and burned. Such work will be of value against the grape-berry moth and the grape leaf-hopper, which hibernate in the pupal condition in the fallen grape leaves. The grapevine flea-beetle and the grape leaf-hopper spend the winter as adults under trash of all kinds in and about vineyards, and the destruction of trash as indicated will expose them to adverse climatic conditions.

### LIVE STOCK HELPS FARMER MARKET HIS BY-PRODUCTS.

In exclusive grain farming there is no successful way of utilizing the large amount of roughage, such as straw and corn stover, which results as a by-product in the growing of the cash crops. Such materials are merely in the way and are disposed of in the earliest manner, often by burning, without regard for the loss of vegetable matter, so much needed by the soil. In a well planned system of stock husbandry all these materials are utilized for feed or bedding. Much of the material which cannot be consumed by the stock and would otherwise be wasted is refined through the agency of a mill and converted into a form suitable for the nourishment of man,

while a large part of the organic matter is returned to the fields in the resulting manure. Immense amounts of by-products result from the manufacture of the cereals and other seeds into flour, breakfast foods, vegetable oils, etc. While unsuited for humans, some of these by-products are among our most valued feeds for stock. As the density of population increases and the prices of foodstuffs advance, the feed supplied our farm animals must, to an ever-increasing extent, consist of substances resulting secondarily from the making of human food, whether they be coarse roughage or milling by-products.

In some sections of our country much of the land is so rough or stony that it cannot be cropped economically. Here cattle will gather the grass on the smoother stretches and sheep will search out the herbage on the more inaccessible, rocky slopes. Over great areas of the West there is too little rainfall to warrant even dry farming, and irrigation will never be possible, either because of lack of water or the roughness of the land. Yet stock will thrive on the scanty but highly nutritious grasses and other forage. Through well planned systems of grazing, with additional feed in time of winter storm or parching

drouth, the Western ranges should, at no far-distant date, carry even more stock than they did before large areas were broken up into farms. In the cut-over districts of our country large areas of land may be profitably grazed by live stock before they are finally brought under tillage.

Under exclusive grain farming the chief demand for labor is confined to the periods of preparing the land, planting the crops, harvesting, and later marketing the products. During the rush seasons labor is high priced, and often hard to secure at any cost. On the other hand, live-stock farming offers employment throughout the entire year. Winter, when little other farm work can be done, is the very season when farm animals require the most care and attention, for they are then usually housed instead of at pasture. Because the live-stock farmer can thus offer steady employment he is usually able to secure men who are both more efficient and more reliable than he would otherwise be able to obtain.—University of Wisconsin.

The tallest trees are the Australian eucalyptus, which attain a height of 480 feet.

"Nothing Shallow but the Water."

**IRRIGATED ACRES.**

An average yield of fifty bushels of red kaffir to the acre from a forty-acre field is the achievement of H. D. Witt in the Plainview country. This is from un-irrigated land. Many are the successful farmers in the Plainview country who use only dry-farming methods. The success of the county at the International Soil-Products Exposition and International Dry-Farming Congress at Denver attest this fact, as does also the number of prosperous farm homes in the Plainview country.

But how much more successful is the man who has a few irrigated acres. R. R. Claridge, the agricultural agent of the Texas and Pacific, recently discussed the subject of irrigated land on the farms of Central and West Texas. He urges irrigation from streams, wells, lakes, etc., according to the Abilene Reporter. He says: "Every irrigated acre will be worth in cash returns and GOOD LIVING more than any other ten acres on the place."

The farmer who has to contrive ways and means of getting water, and then is uncertain as to when his supply will be available and how long it will last, is at a great disadvantage. The man who is so fortunate as to possess land in the Shallow Water Belt, where pure water in dependable and inexhaustible quantity can be cheaply secured, has a natural wealth which is enviable. When he needs water he has it, and as much as he needs.

Irrigated land means a sure living for the family. Even under most auspicious weather conditions the man with the well is the man of the hour. The yield can be made larger and the quality better if plants are never allowed to suffer for moisture. It's good insurance of a crop.

Irrigated acres in the Plainview country are making a productive section unequalled in the Southwest, the Mecca of the man who tills the soil for a living and profit.

**BUILDING FOR THE FUTURE.**

Methods and systems which suffice in the small country village are not sufficient in Plainview. Plainview is modern and her citizenship prides itself in this fact. But despite the progressive spirit of the citizens of the town, we must keep ever on the alert to keep her in the front rank.

We are building now for the Plainview of the future. We are laying the foundation for the greater Plainview. How well we build will do much toward shaping the future of the town.

Improvements installed today benefit not only the people who live in Plainview now, and not only for a single year, two years or five years—if they are of the proper kind.

**Plainview should—**

Install an adequate street-lighting system. And the cost can be distributed through a series of years, so that it may be paid as the service is rendered.

Construct one or two good storm sewers to serve as a nucleus for a future system of storm sewers.

**Begin, now, to plan municipal parks and a market square.**

These are improvements which Plainview needs. A street-lighting system is needed. There are few of the most pessimistic who will gainsay this. Storm sewers are a necessity to drainage. They will save much work and expense on upkeep of streets of the city. They will protect Lake Plainview from overflow and devastation by flood water.

Plainview can afford these things. The Plainview of the future will absolutely need them, even as Plainview does now, and as the town grows the need will be emphasized.

**THE MOST VALUABLE CROPS WE HAVE EVER PRODUCED.**

The pessimists denied the presence of prosperity even long after they felt its jostle. When they no longer had the hardihood to deny the presence of an obtrusive fact they fell back on the assertion that, at all events, it was a mushroom prosperity, a prosperity without economic warrant, since it was due to the artificial conditions created by the war.

For such, and for such others as may have become infected, there ought to be some tonic in certain figures given out the other day by the Department of Agriculture relative to the volume and value of this year's principal crops. Of course, these estimates and computations must be accepted with considerable reservation; exactitude is not a characteristic of them. But, at all events, the same formula is used every year, so that if these estimates and computations are inaccurate in the absolute, they may be fairly accurate in the relative sense. Hence it may be that the department greatly errs in computing the value of this year's harvest at five and a half billion dollars, and is yet substantially correct in stating that this year's harvest exceeds by half a billion dollars the value of any annual harvest since it began to keep the records.

The interesting and salient fact is that this year's crops, as a whole, are of greater value than those of any preceding year in the history of the country. In part this is due to conditions created by the war, and to that slight extent the contentions of the pessimists who insist that it is an ephemeral prosperity we enjoy are made plausible. But it is but slight support that this consideration gives them. If the war has given a fictitious or artificial value to some crops, it has had the contrary effect on some others, notably cotton. And then, too, the unprecedented value of this year's harvests is due in part to the abnormal value of several crops. The wheat harvest, for example, is of unprecedented size, while the corn harvest has been exceeded by three times. After all possible discounts have been made, the fact remains that the country has been endowed with more agricultural or basic wealth this year than ever before in a twelvemonth.

And that fact is an ample foundation

not merely for the prosperity which the country enjoys, but for a much greater. There is no reason to expect an early recession of it; there is, on the contrary, much reason to expect a steadily increasing swell of the tide, and this without much regard to the progress of the war. Mr. McAdoo spoke something more than the boast and hope of a partisan when he said the other day that the country had only begun to experience the greatest prosperity it had ever known.—Dallas News.

**ARE WE MONEY MAD?**

That the world is money mad and that our foundations are tottering appeals to us as the utterance of the calamity howler. This is a commercial age; but that does not imply that we are centering our every activity on accumulating money. Then, too, the reason why we want to accumulate wealth affects our attitude. There never was a time when the Nation as a whole spent more money for philanthropic purposes than now. Never before has so much wealth been invested in churches, schools and libraries. We are a commercial Nation, but we are putting our money to good uses, on the whole. What elicited the magnificent gifts the United States sent to war-ridden Belgium? Those were gifts prompted by the heart. Sidney Lanier's masterful arraignment of our commercial spirit, which created much comment, was the expression of one of the South's most soulful men. His pleadings for more heart and less head was his message to the Nation. And even the soulful Lanier would recognize the sympathetic characteristics of the American public, and could see progress. We are not money mad! We are not wild over accumulation of wealth. Our institutions are more firmly founded than those of any other Nation, despite the cries of the reformists. Never at any time have the American people expended their wealth more freely to improve civilization. The world's better today than it was yesterday—we believe that. No, we're not money mad.—Reprinted from The Herald in the Dallas Evening Journal, November 12.

W. R. McCluskey, of Spring Lake ranch, was here yesterday.

**YIELDS ITS MEANING PERSONALLY.**

I am sorry for the men who do not read the Bible every day; I wonder why they deprive themselves of strength and pleasure. It is one of the most singular books in the world, for every time you open it some text that you have read a score of times beams with a new meaning. Evidently the mood and the thought of that day, bred by circumstances that you cannot analyze, has suddenly thrown its light upon the page, brings out upon the page something that you never saw lie upon it before. There is no other book that I know of which this is true; There is no other book that yields its meaning so personally, that seems to fit itself so intimately to the very spirit that is seeking its guidance.—Woodrow Wilson.

**NEWS FROM BOOK LAND.**

Owen Wister's "The Pentecost of Calamity" is proving so popular that an edition a week has been necessary ever since it was published, in August.

Some of Mrs. Kathleen Norris' readers in San Francisco think that they can identify a number of the characters in her new novel, "The Story of Julia Page," with well-known residents of that city.

Zane Grey, after a summer spent in the wild parts of the West, is now at his winter home, at Middletown, N. Y., at work upon a novel for which he collected material during his summer wanderings.

Eleanor Hoyt Brainerd writes from the Connecticut farm where she spends half of each year that she will "guarantee gardening as the best insurance against discontented old age."

Bertha Runkle, who is the wife of Captain Louis H. Bash, Sixth Infantry, U. S. A., wrote her new novel, "Straight Down the Crooked Lane," at Presidio, San Francisco, where she has stayed while her husband has been with his regiment at the Mexican border.

The Library Commission of the Boy Scouts of America have appointed the time from November 28 to December 4 as "Safety First Juvenile Book Week," during which they will endeavor to inspire as widely as possible an interest in better books for boys.

Kate Douglas Wiggin is in Los Angeles, where she will remain until the end of November, rehearsing at Morosco's Burbank Theatre "Mother Cary's Chickens," which she and Rachel Crothers have dramatized from her book of the same name. Edith Tallaferro will be starred in the play.—New York Times.

**THE LOCAL NEWSPAPER.**

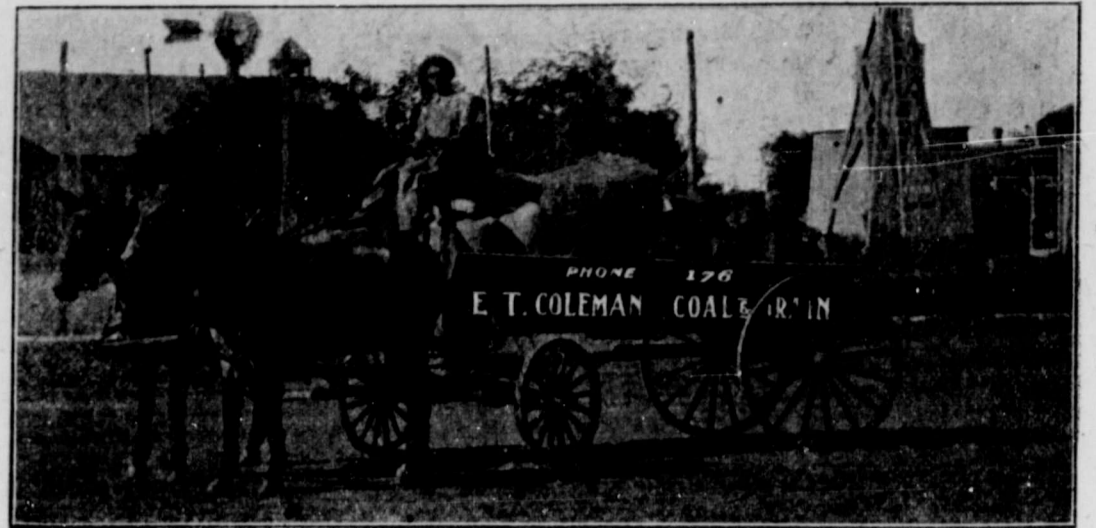

"Stand by your town newspaper. If there is anything in your town worth talking about, ten chances to one your little town paper had a hand in putting it there, and if there exists any unsightly or unsavory nuisance, twenty chances to one it will stay there until your town editor sees it or smells it and wipes his pen on the town board's breeches. If anybody beyond the walls of your little burg learns that there is such a place as Peaceville, it will be through the town oracle.

"Every village gets its money's worth in the village newspaper. It's the wagon that carries all your good things to market. It ought to be kept in good repair. In many places it would pay to grease it, paint it, keep its running gear in shape and shelter it at the public expense.

"Stand by your local newspaper. It's the guardian and defender of every interest, the forerunner and pioneer of very advance movement and the sturdy advocate of law and order. Take it away, it would not be six months before the town would look as if it had been doped. Business would drag, society would yawn and grass would grow between the cobbles."—Publishers' Auxiliary.

**Possibilities Ahead.**

A scientific stock farmer of this State shipped last week a 6-week-old Duroc-Jersey pig that weighed thirty-one pounds and sold for \$15—another instance of the possibilities of swine-breeding. Railway companies in Texas are commenting on the variety of the freight traffic handled this year. Cotton, of course, heads the list, but cottonseed, peanuts, cattle, hogs, mules, corn, hay, wheat and oats are being sent out even from the sections which at one time were used for grazing purposes only. When Texas soil and Texas resources are made to measure up to their possibilities this State will be the Mecca of aspiring agriculturists, prosperity will abound and diversification will have reclaimed this great commonwealth.—Cleburne Review.

**WHY WAIT?** You are going to need that load of coal before you realize it. These fine days won't last always. **BE PREPARED**—You can't find better grades of coal at better prices than we will deliver for this week.

## ANNOUNCEMENTS.

The Five Hundred Club meets Tuesday afternoon with Mrs. H. W. Harrel, 300 Archer Street.

The B. F. Club meets Tuesday afternoon with Mrs. Jesse D. Whitman, 306 North Cottage Street.

The Browning Club meets tomorrow afternoon with Mrs. J. C. Anderson, 314 White Street.

## MRS. HUMPHREYS HOSTESS FOR THE HIGHLAND CLUB.

The Highland Club, ever popular and noted for its cordial hospitality, met yesterday afternoon with Mrs. E. H. Humphreys. Score cards in the form of miniature turkeys, in remembrance of Thanksgiving, marked progression in the game.

Assisted by Mrs. H. C. Randolph, Mrs. J. O. Wyckoff and Miss Casey, the hostess served delightful refreshments, including salads and sweets.

Invited to share this gracious courtesy were Mesdames G. B. Doubleday, T. C. Shepard, George Saigling, J. W. Longstreth, W. W. Underwood and W. E. Armstrong.

The next meeting will be with Mrs. J. F. Garrison, Thursday, December 2.

## MISS SANSOM IS HOSTESS.

A few of Miss Nell Sansom's many friends were delightfully entertained Wednesday evening at her home, 455 Restriction Street.

Cards, and music, vocal and instrumental, by the young hostess, afforded entertainment.

Refreshments of sandwiches, salads, cake and chocolate were offered the following: Mr. and Mrs. Robert Malone, Mr. and Mrs. Wallace Settoon, Misses Mildred Buchheimer and Joe Keck, and Messrs. Beal Pumphrey, Ed Doland and Tom Malone, of Lubbock.

## THE NEEDLECRAFT CLUB.

Miss Geraldine Marrs, 900 Wayland Street, was hostess yesterday afternoon for the Needlecraft Club. Chrysanthemums were effectively used for decorating.

The large attendance of ladies present indulged in the stitchery cult while Miss Meryle Marrs, younger sister of the hostess, entertained them with piano selections.

A dainty salad course was served.

## MATINEE PARTY FOR HALCYON CLUB TUESDAY AFTERNOON.

The members of the Halcyon Club and other invited guests met at the Mae I Tuesday afternoon in response to an invitation issued by Mrs. A. M. McMillan, the hostess for the day. The date was changed from Wednesday, the usual day of meeting, to Tuesday, because of the feature offered on that day.

After enjoying the shifting shadows of filmdom for an hour or more and the confections served during the play, hostess and guests adjourned to the parlor of the Willis Drug Co., and were served an ice course. Violets were given as favors.

Those present other than the members were Mesdames W. B. Armstrong, F. E. Blasingame, C. C. Gidney, W. W. Underwood, E. T. Coleman, R. E. Meyers and J. W. Webb, of San Marcos.

## THE BRIDGE CLUB MEETS WITH MRS. L. S. KINDER.

Cut flowers to welcome the Bridge players were a feature of the meeting Tuesday afternoon with Mrs. L. S. Kinder, 214 South Covington Street.

Invited to share the pleasure of the popular game were Mrs. Charles McCormack and Mrs. J. W. Grant. The winner of high score for the members was Mrs. P. J. Wooldridge; for the guests, Mrs. Grant.

After the serving of a beautifully appointed two-course luncheon, the club adjourned to meet Tuesday, November 30, with Mrs. L. A. Knight, 1600 West Third Street.

## MEMBERSHIP IN DISTRICT FEDERATED CLUB IMPORTANT.

Mrs. Longstreth Tells of Visit to State Federation Before Travel Study Club.

The Travel Study Club met in regular session Saturday afternoon, at the Club Room. Mrs. C. A. Malone was leader, and her lecture, "The Northmen," was listened to with much appreciation. One of the purposes of these lectures, as suggested by the Year-Book Committee, was the linking together of the club lessons historically. This Mrs. Malone did in a comprehensive manner, using the large map in telling of the invasions.

The round-table topics were "Alfred the Great," "Dustan—Ecclesiastical Statesman," "The English Chronicle," and "Oxford and Cambridge." Every member present took part in the discussion of these subjects.

The critic's report, by Mrs. L. T. Mayhugh, was of more than usual interest.

## Mrs. Longstreth's Report.

Following a short business session, Mrs. J. W. Longstreth, delegate from the club to the State Federation of Women's Clubs which met last week, in Brownwood, gave the following report:

"Madam President and Club Members: With the permission of the club, I am going to give by report on the installment plan, reporting it by days at the convention. I feel that you will in this way get the little personal touch and spirit of this great convention that I particularly want to bring you. Through the writing of a note to the chairman of the entertainment committee, whose husband is a business acquaintance of my husband, the Plainview delegates were entertained in one of Brownwood's lovely homes, instead of a hotel. We were more than grateful, not only for the many comforts of a modern home, but also for association with some of the most delightful people we had ever met.

"Brownwood is a beautiful little city of between ten and eleven thousand inhabitants. The streets are oiled; rock from the hills near town being crushed and spread with the oil, as I understood it, to make the road bed hard, after which a light oiling every two weeks keeps the streets like pavement. These oiled streets reach eight miles in every direction. The people in Brownwood drive to the right of the streets; in fact, the pedestals in the streets have "Drive to the right" printed on arms that point four ways, so that all may know just what to do. There was no feeding or selling on the public square, but otherwise things looked much like home. Brownwood has many natural advantages, and her people are making the most of them. Plainview has the chance to surpass her in every way, and in the making of Plainview into the most beautiful city of Texas we may find our opportunity as club women.

"The Mayor, in his address of welcome, paid a tribute to club women in general, but what was of interest to most of us was his assertion that no one could gainsay the good the City Federation of Brownwood had done. He said it was by their efforts Brownwood became known as the cleanest town in Texas, giving to it the most wholesome advertising a town could have.

"It was a pleasure to attend so great a meeting entirely controlled by women. The State president, Mrs. Henry B. Fall, of Houston, is a remarkable woman, of unusual personal charm and with marked ability as a presiding officer. Never have I seen a large convention so well controlled and with so much praise from delegates as to the fairness of the president.

"We learned that the State Federation of Women's Clubs is managed on business principles, that it was necessary to conform to all regulations before we were recognized as delegates. We also learned that we can save a good deal of money for use at home by joining the State Federation through our City and County Federation. We are too far from the places of meeting, as a usual thing, to have more than one or two delegates, and we want a report to be read of our club work. This can be done only through our District, County or City Federation. It seems to be of great importance to be in good standing in our District Federation, to which none of our clubs at present belong.

"The new president of the First District is Mrs. W. R. Potter, of Bowie. The next District Federation meeting will be at Seymour. We should send a delegate from every club to that meeting."

## HONORS ST. LOUIS FRIEND.

Honoring his friend H. S. Dodson, of St. Louis, F. C. Vickery entertained Tuesday night with a well appointed turkey dinner, including oyster cocktail and all other accessories for a well planned menu. Those present were the guest of honor and Dr. A. H. Lindsay, D. C. Aylesworth, E. B. Miller and W. E. Armstrong.

# Thankful—Yes

Store will be closed Thanksgiving Day

For the bountiful crops, the health, good cheer, peace and prosperity of our nation, state and Hale.

For the friends and patrons of this store, your confidence and your patronage. For the excellent lines of merchandise that we have been able to select and offer our customers. ## MRS. ALLEN CALDWELL VISITS.

Mrs. Allen Caldwell (nee Miss Amy Nash) arrived yesterday from Salt Lake City, Utah, for a visit with her parents, Mr. and Mrs. W. A. Nash. Mr. Caldwell will arrive within the next two weeks. He is completing a contract for the American Light and Waterworks Company at Salt Lake City, being their superintendent.

## WEDNESDAY BRIDGE CLUB WITH MISS BUCHHEIMER.

Miss Mildred Buchheimer was hostess this week for the Wednesday Bridge Club.

Miss Mary McKinnon, of Floydada, assisted in serving a salad course to the members and to Mrs. Hugh Burch, the special guest.

Mrs. D. H. Collier will entertain the club Wednesday, December 1st.

Prof. Marvin Edwards, of Floydada, was here yesterday visiting friends.

H. F. Ford, of Tulsa, was here on business yesterday.

Mrs. C. S. Ebeling went to Abernathy Wednesday to visit relatives.

W. G. Nairn, after a visit to W. A. Todd and family, left Wednesday for his home, in Lubbock County.

R. L. Burns, of Artesia, N. M., was here Wednesday visiting his sister, Miss Eula Burns.

J. B. Wilson, of the El Paso Herald, has been in Plainview this week.

J. A. Testman is in Nebraska on a business trip.

Dr. Hill and family, of Sulphur Springs, Texas, are guests of Mr. and Mrs. J. H. McKee.

John Clark, of Floydada, was in Plainview on business Wednesday.

C. B. McCauley, of Fort Worth, has been in Plainview on business.

Miss Mary McKinnon, of Floydada, spent the mid-week with Miss Mildred Buchheimer.

J. B. Downs, of Lockney, was in Plainview yesterday.

E. L. Warren, of Childress, left for home yesterday, after a visit to his mother, Mrs. M. E. Warren, and other relatives.

Miss Meta Raunsaville will spend the week-end at Sweetwater.

Mrs. W. F. Parks, of Tulsa, Okla., is the guest of Mrs. J. J. Lash, 300 Archer Street.

H. S. Dodson, of St. Louis, was in Plainview this week, the guest of F. C. Vickery and family.

Mrs. Emil Kaufman, of Lockney, was shopping in Plainview today.

Miss Eula Johnson, of Roscoe, who has been visiting Miss Dora Anderson, left for home today.

A. C. Hatchell has purchased the home on Grover Street now occupied by J. L. Wheeler and family.

Mrs. H. M. Fletcher, who has been visiting her sons at Midland and San Angelo, returned home today.

Mrs. J. B. Davidge came in from California today to visit her daughter, Mrs. W. H. Dickerson.

Mrs. J. H. McMillan, of Comanche, is visiting her sister, Mrs. T. E. Richards, 400 Jones Street.

Carl Lanier left today for Amarillo. Mrs. J. E. Hawley left today for Amarillo, where she will enter a hospital for treatment.

A. C. Blair, who has been visiting his parents, Mr. and Mrs. W. S. Blair, left today for his home, at Grand Saline, Texas.

W. L. Harrington left today for Lubbock.

A. B. McBride, of Jacksonville, Texas, general sales manager for the Brenand Manufacturing Company, came in today.

Mr. and Mrs. M. P. McClusky, of Clarksville, Texas, were in the city today en route to Floyd County, where they will locate.

Mrs. Silas Maggard, who has been visiting her mother, Mrs. R. A. McWhorter, left for Hale Center today.

Guy McClung, of Dallas, after a short stay in the city, left for Lubbock today.

Ernest Hood, who has been visiting his sister, Mrs. J. C. King, returned Wednesday to Hill County.

Mr. and Mrs. J. W. Williams left today for a visit to Cleburne.

## Cause of Pellagra is Known; Health Service Finds Cure

WASHINGTON, D. C., Nov. 12.—Announcement was made at the Treasury Department today that as a result of continued research and experiments of the Public Health Service, both the cause and the cure of pellagra have been discovered, and that the cause of this dread malady, which has been increasing in the United States at a terrific rate during the past few years, may now be checked and eventually eradicated. Assistant Secretary Newton, in charge of the Public Health Service, expressed great interest in the discovery, and regards it as one of the most important achievements of medical science in recent years.

Pellagra has been increasing alarmingly throughout the United States during the last eight years, and it is estimated that 75,000 cases of the disease will have occurred in the United States in 1915, and of this number at least 7,500 will have died before the end of the year. In many sections only tuberculosis and pneumonia exceed it as a cause of death.

The final epoch-making experiment of the Public Health Service was carried out at the farm of the Mississippi State Penitentiary about eight miles east of Jackson, Miss., and together with the previous work of the Service completes the chain in the prevention and cure of the disease. The work at the Mississippi Farm has been in charge of Surgeon Joseph Goldberger and Assistant Surgeon G. A. Wheeler, of the United States Public Health Service. The farm consists of 3,200 acres, in the center of which is the convict camp. The final experiment was undertaken for the purpose of testing the possibility of producing pellagra in healthy human white adult males by a restricted, one-sided, mainly carbo-hydrate (cereal) diet. Of eleven convicts who volunteered for this experiment, six developed a typical dermatitis and mild nervous gastrointestinal symptoms.

Experts, including Dr. E. H. Galloway, the secretary of the Mississippi State Board of Health; Dr. Nolan Stewart, formerly superintendent of the Mississippi State Hospital for the Insane at Jackson; Dr. Marcus Hause, professor of dermatology, Medical College of the University of Tennessee, Memphis, Tenn., and Dr. Martin R. Engman, professor of dermatology in the Washington Medical School, St. Louis, Mo., declare that the disease

which was produced was true pellagra.

Prior to the commencement of these experiments no history could be found of the occurrence of pellagra on the penitentiary farm. On this farm are 75 or 80 convicts. Governor Earl Brewer offered to pardon twelve of the convicts who would volunteer for the experiment. They were assured that they would receive proper care throughout the experiment, and treatment should it be necessary. The diet given was bountiful and more than sufficient to sustain life. It differed from that given the other convicts merely in the absence of meats, milk, eggs, beans, peas, and similar proteid foods. In every other particular the convicts selected for the experiment were treated exactly as were the remaining convicts. They had the same routine work and discipline, the same periods of recreation and the same water to drink. Their quarters were better than those of the other convicts. The diet given them consisted of biscuits, fried mush, grits and brown gravy, syrup, corn bread, cabbage, sweet potatoes, rice, collards and coffee with sugar. All components of the dietary were of the best quality and were properly cooked. As a preliminary, and to determine if the convicts were afflicted with any other disease, they were kept under observation from February 4th to April 9th, two and a half months, on which date the one-sided diet was begun.

Although the occurrence of nervous symptoms and gastro-intestinal disturbances was noted early, it was not until September 12th, or about five months after the beginning of the restricted diet, that the skin symptoms so characteristic of pellagra began to develop. These symptoms are considered as typical, every precaution being taken to make sure that they were not caused by any other disease. The convicts upon whom the experiment was being made, as well as twenty other convicts who were selected as controls, were kept under continuous medical surveillance. No cases of pellagra developed in camp excepting among those men who were on the restricted diet. The experimenters have, therefore, drawn the conclusion that pellagra has been caused in at least six of the eleven volunteers as a result of the one-sided diet on which they subsisted.

On the basis of this discovery, the

States of Mississippi, Louisiana and Florida have laid their propaganda through their respective boards of health for the eradication of the disease.

### TO STUDY WATER RESOURCES.

#### United States Geological Survey and State Co-operate in Measuring Volume of River Flow.

The United States Geological Survey is co-operating with the Board of Water Engineers of the State of Texas in investigating the streams of the State, provision for the work having been made by the State Legislature.

Brazos and Colorado rivers, the Concho and its North Fork, Frio, Guadalupe, and Llano rivers, North Fork of Llano, and Nueces, Pecos, San Saba, San Antonio, San Marcos, and Trinity rivers are to be studied to ascertain the quantity of water that the streams carry and the methods by which it may be utilized. The adequacy of the stream waters for storage, for irrigation, or for the development of water power will be determined, as well as the necessity for building flood-prevention works by which human life and property may be safeguarded. Considerable work has already been done in studying the water resources of Texas, and the present operations will furnish valuable supplementary and new data.

The results of some of the earlier studies of Texas surface waters are represented by the following water-supply papers of the United States Geological Survey: No. 71, Irrigation systems of Texas, by T. U. Taylor; No. 195, The water powers of Texas, by T. U. Taylor; and No. 358, Water resources of the Rio Grande basin, 1888-1913, by Robert Lollanbee and H. J. Dean, including surface water supply of the western Gulf of Mexico basins, 1913, by Robert Follansbee, W. W. Follett, and G. A. Gray.

Copies of these reports may be obtained free of charge by applying to the Director, United States Geological Survey, Washington, D. C. There are also several reports on underground waters, and a list of them will be furnished on application to the Director.

Ski runners in "full go" have been known to leap a hundred feet at a bound.

The Savoy Theater was the first theater in London to be entirely lighted by electricity.

## GAME CALLED PROMPTLY AT 3:30

EAST SIDE GROUNDS

## ADMISSION 50 CENTS

PLAINVIEW

TEXAS

**KRESS.**

KRESS, Texas, Nov. 17.—James Walker, of Auburn, was hauling wheat to Kress all last week.

Mrs. John Gaylor and Mrs. Marian Beck went to Kress Thursday to shop and visit.

Mr. and Mrs. F. Rousser were callers in Kress Saturday.

H. Behrend's sons, of Auburn, were hauling wheat to Kress last week.

F. J. Moore went to Plainview Saturday in his auto to bring his daughter, Ruth, from the M. E. College to visit a day or two at home.

Mrs. M. C. Morrison and daughter and two sons came from Tulla in their auto Saturday to visit with her daughter, Mrs. Lynn, in Kress.

Rev. Dickinson and family left Kress Thursday to live in Abernathy, and he is a M. E. preacher there.

Rev. L. G. Haggard, of Plainview, preached at the M. E. Church in Kress Sunday.

Dave Wood is to be a petit juror in Tulla Monday.

T. A. Oliver hauled wheat to Kress Monday and hauled a load of coal eight miles west, to the Central Plains School.

Mildred Duftman, from nine miles west, was shopping in Kress Tuesday.

Will Rousser went to Kress Saturday evening to attend the W. O. W. initiation.

**ABERNATHY.**

Mr. Andrus is building two new residences in Abernathy.

Rev. B. Y. Dickinson, who is to succeed Rev. D. C. Ross as pastor of the Abernathy Methodist Church, has arrived with his family, from Kress, and began the year's work by preaching at Pearce's Chapel Sunday. His appointments for the year are as follows: First Sunday, Bartonsite; second Sunday, Pearce's Chapel at 11 a. m. and at Center at 3 p. m.; third Sunday, Abernathy 11 a. m. and at night and at

Caldwell at 3 p. m.; fourth Sunday, Murray.

Mr. Holland, of Dallas, has been in Abernathy this week attending to business with the townsite company.

Redd Tudor is erecting a new home in Abernathy.

Smith Shaw and family returned last Thursday from an extended visit to Mississippi.

J. C. Arnett, our efficient postmaster, has been confined to his bed for the past 15 days with fever, but is now on the road to recovery.

Rev. D. C. Ross and W. S. Duffender are in Lubbock this week making preparations to move their families there. Rev. Ross will have charge of Lubbock Mission. He has just closed his 39th year of active work in the ministry, and his work in Abernathy has been good and lasting, and his many friends wish him well in his new work.

**MIDWAY.**

MIDWAY, Texas, Nov. 15.—Miss Fred Day is suffering with a severely sprained thumb, the result of Friday's basketball practice.

Bob Fletcher was in Plainview on business Saturday.

The dance at Mr. Bloomer's was enjoyed by quite a number.

Mrs. J. W. Day and Miss Bird Fletcher were in Hale Center shopping Saturday afternoon.

The Rev. Holland preached a fine sermon here both Saturday night and Sunday morning.

H. T. Wingo, of Abilene, visited friends in the Midway community Sunday.

The friends of Mell Felagle will be glad to hear that he is improving rapidly.

The singing at G. R. Fletcher's was well attended.

Mrs. Benton Ritchey was in Plainview shopping Monday.

The Midway school organized a literary society Friday afternoon.

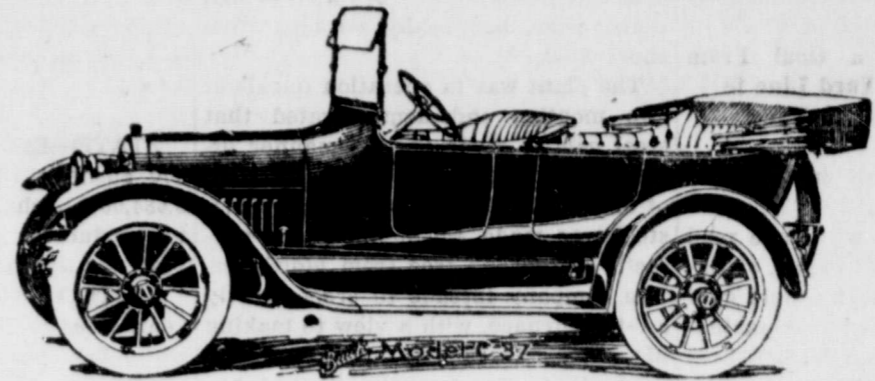

**Which?**

“Everything baked with Calumet is so tempting—wholesome—delicious—I want 'em all. For things hard to bake right it can't be equalled. Calumet is the world's best Baking Powder—it's moderate in price—pure in the can and pure in the baking—wonderful in leavening and raising power—the most economical to buy and so use.”

**THE LONGEST GOAL KICK WAS BY PRINCETON STAR IN 1882.**

**J. T. Haxall Scored a Goal From Placement From 65-Yard Line in Annual Game Against Yale.**

By Walter H. Eckersall, in Chicago Tribune.

Followers of football who have read of the drop kick by Mark Payne, of Dakota Wesleyan, who made a field goal from the sixty-three-yard line against Northern Normal October 16 and beat the record held by Pat O'Dea, of Wisconsin, by one yard, should not consider it the greatest kicking feat, for J. T. Haxall, of Princeton, scored a goal from placement from the sixty-five-yard line in the annual game against Yale in 1882.

O'Dea made his goal against Northwestern in 1898, and although his record has been approached it has stood the onslaughts of many prominent kickers until the present year. The Badger was favored by a strong wind when he made his successful attempt, but he had such a powerful swing in his leg that he was dangerous any place inside of the fifty-five-yard line—the field at that time being 110 yards long, while it is ten yards shorter in the present game.

**Investigation of Record.**  
Just what conditions prevailed when Payne made his drop kick are not known, but it certainly was a meritorious performance. Before it is accepted as a record by the rules committee the conditions of the performance will be considered and a thorough investigation made.

Outside of these kicks, the next longest was made by J. P. Davis, of Dickinson, who made a goal from placement, fifty-eight yards, against Pittsburgh in 1905. J. V. Cowling, of Harvard, scored a drop kick from the fifty-five-yard line in the annual clash with Princeton in 1883, and J. E. Duffy, of Michigan, duplicated the performance in the Wolverines' game with Cornell in 1891.

**Two 55-Yard Place Kicks.**

Two place kicks have been made from the same distance. W. G. Crowell, of Swarthmore booted the ball over the bar and between the posts against Franklin and Marshall in 1904, and Fred Bernion, of Utah, did the same thing in the same year against the Utah Aggies.

From the fifty-five yard mark the performances run to such small distances as fifteen yards. E. C. Robertson, of Purdue, is credited with marking the greatest number of field goals in one game. In the Rose Poly game of 1900 the Boiler-maker booted the ball between the posts seven times. B. W. Trafford, of Harvard; W. H. Eckersall, of Chicago, and C. E. Brickley are tied for second honors, each having booted the ball over the bar five times in a single game.

**Booting Game Important.**  
That kicking is just as important in the present game as it was in the style of play employed in 1875 is shown by the number of games which have been won in recent years by kicking. The value of a kicker was emphasized only last Saturday, when the failure of the Wisconsin kicker to boot the ball between the posts after a touchdown resulted in a 14 to 13 Chicago victory. Notre Dame was defeated by Nebraska, 20 to 19, because of failure to register the point after a touchdown. Many other games have been lost in the same manner.

Games have been won this season by field goals, but not with the frequency of recent seasons. Of course, the harder and more important struggles between teams more evenly matched yet remain to be played. Then the value of a reliable field kicker will be increased 50 per cent over his worth in earlier contests.

**STEEL MADE DIRECT FROM ORE.**

**Electric Smelter at Belleville, Ontario, Uses Preheater That Utilizes Heat From Waste Gases.**

Especially interesting attaches to the electric smelter at Belleville, in the Kingston consular district, because of the production there of steel of all grades, including tool steel, *direct* from the ore. An unusual feature of the process is the use of a preheater that utilizes the heat from the waste gases produced during the smelting of the ore.

The preheater consists of two wrought-iron pipes 8 feet long, increasing regularly in diameter from 14 to 18 inches, to allow the charge to slide easily down the heated portion. These pipes are inclosed in the preheater stack, which has firebrick linings and baffle plates with openings arranged in such a manner that the heated gases circulate about the preheater pipes.

**No Waste of Electrodes.**

The furnace is charged from the upper floor into the preheater, the charge consisting of iron ore, limestone, and charcoal, crushed to pass through a 1-inch mesh. The furnace is operated on a two-phase current, the transformers being connected by what is known as the Scot connection. The electrodes are 3 inches in diameter,

threaded so that they can pass down continuously, and are used up entirely, there being practically no loss from short ends.

The plant was in operation for about two months, and demonstrated that steel can be made in this manner directly from ore containing 7.5 per cent of titanium. A quantity of high-carbon steel was made, the ingots being perfectly sound and free from blowholes. The company intends to erect shortly a 3-ton furnace, with a view to making high-carbon tool steel and steel castings.—U. S. Consul Felix S. S. Johnson.

**GOVERNMENT CROP REPORT.**

WASHINGTON, D. C., Nov. 8.—A summary of preliminary estimates of crop production and prices for the State of Texas and for the United States, compiled by the Bureau of Crop Estimates (and transmitted through the Weather Bureau), U. S. Department of Agriculture, is as follows:

**Corn.**  
STATE—Estimate this year, 176,000,000 bushels; final estimate last year, 124,800,000 bushels; price, November 1, to producers, 56 cents per bushel; year ago, 77 cents.

UNITED STATES—Estimate this year, 3,099,000,000 bushels; final estimate last year, 2,673,000,000 bushels; November 1 price, 61.9 cents per bushel; year ago, 70.6 cents.

**Wheat.**  
STATE—Estimate this year, 21,080,000 bushels; final estimate last year, 14,066,000 bushels; price, November 1, to producers, 106 cents per bushel; year ago, 97 cents.

UNITED STATES—Estimate this year, 1,002,000,000 bushels; final estimate last year, 891,000,000 bushels; November 1 price, 93.1 cents per bushel; year ago, 97.2.

**Oats.**  
STATE—Estimate this year, 39,060,000 bushels; final estimate last year, 22,500,000 bushels; price, November 1, to producers, 40 cents per bushel; year ago, 47 cents.

**MRS. J. W. STORY LEADS WEEK-OF-PRAYER SERVICE.**

Papers Discussed by Members of Missionary Society Prove Profitable.

The devotional exercises of Wednesday's meeting of the week of prayer were led by Mrs. J. W. Story.

Among other good features of the program was a paper by Mrs. E. F. Williamson upon "Japan's Back Door." This was followed by an animated discussion.

"The Appeal of the Council to the Missionary Society" was discussed in an entertaining manner by Mrs. L. A. Jones. This was followed by "A Little Argument With Myself" upon the subject of giving to missions, by Mrs. J. T. Mayhugh.

This meeting was the last for the week of prayer.

During the business session, the ladies present voted not to have their usual Thanksgiving dinner, but will probably have one sometime in December.

**PRESBYTERIAN CHURCH.**

Services at the Presbyterian Church next Sunday will be as follows:

Sunday School at 9:45. At the close of the Sunday School a short Rally-Day program will be given.

Preaching at 11 a. m.; subject, "Christian Dynamics." Preaching at 7:30 p. m.; subject, "Nehemiah Restores the Worship of Jehovah." There will be a special thank offering taken at the morning service. Good music at both services.

Strangers in the city and those who have no place of regular worship will receive a hearty welcome at all services. T. B. HAYNIE, Pastor.

**ST. MARK'S EPISCOPAL CHURCH.**

At St. Mark's Episcopal Church Sunday morning Rev. J. S. Wicks will celebrate Holy Communion at eleven o'clock. There will also be preaching Sunday morning following Holy Communion and preaching Sunday evening at eight o'clock.

**AT BAPTIST CHURCH SUNDAY.**

Rev. I. E. Gates, the pastor, will preach at both hours at the Baptist Church Sunday. Sunday night four young men are to be baptized. There is to be a special musical program at both hours, Mr. Hatchell having charge of the choir and Mr. Jenkins the orchestra.

The church is enlarged now so as to seat comfortably 1,000 people, and we expect a full house at both hours.

Come and worship with us. I. E. GATES, Pastor.

**BAPTIST LADIES' AID.**

Circle A of the Baptist Ladies' Aid Society held a pleasant social meeting Wednesday afternoon with Mrs. J. Murray Malone. The hours were spent in sewing for the bazaar which will be held early in December. Later, refreshments were served by the hostess.

**REV. ROBERTS IN LUBBOCK.**

Rev. A. B. Roberts, of Plainview, was here Saturday and Sunday visiting at the home of J. K. Caraway, who is a relative of Rev. Roberts, and preached two fine sermons at the Methodist Church Sunday, morning and evening. Rev. Roberts is a superannuate preacher, not doing regular pastoral work, but preaches very often and assists in revival meetings. He is an old timer on the Plains, having driven cattle across the Plains in the days of Indians in this section, and related some very narrow escapes when attacked by the redskins of that day and time. The congregation at each service very much enjoyed his sermons, and hope to have him with them again some time in the near future.—Lubbock Avalanche.

**COSTLY RAILROAD DRAMA AT MAE I THANKSGIVING.**

Real "mellodrama" is to be seen at The Mae I all day Thanksgiving. "The Juggernaut," in five parts, is the bill offered. The New York Tribune tells the story of the play in this manner:

"The plot tells of Phillip Hardin, a dissipated, good-natured son of a millionaire, who forms a friendship with John Ballard, the son of a man killed by the railroad controlled by Hardin's father.

"In a fight at a gambling house, Hardin is rescued by Ballard. A blow struck by Ballard kills one of the gamblers. In the years that intervene Hardin steps into the control of his father's estate. Ballard becomes the District Attorney of a large city. The two clash.

"In quick succession there are gripping melodramatic scenes. The big climax shows a train wreck over a bridge, true in every detail save that it was specially staged by the Vitagraph people for this photoplay.

**EAST SIDE SCHOOL NOTES.**

A hen's egg is worth a great deal more than a duck egg. A hen's nest is more easily found than a duck's nest, because a hen cackles! East Side cackles because of her nest of bright little boys and girls who are climbing and a faculty of teachers who are giving their best time and energy.

Harmony and co-operation are the essentials to successful school work. This Lamar proudly claims. Each teacher is only too glad to co-operate with and oblige her fellow teachers. The Mothers' Club is giving every encouragement to the teachers and to the school. The parents and patrons of the school are showing their appreciation by hearty support.

The pupils long since gave evidence to their love and good will to their teachers, without which a school is a failure, by treats, gifts, fruit showers galore, and the smiles that ripple upon their little faces when teachers enter their rooms to find apples, bananas, candies and the like (all of which are very dear to a teacher's heart) spread in abundance upon the tables, they had sufficient proof that the kindest feeling

and love exists between pupils and teacher.

Lamar is striving earnestly for a Victrola for the school. Most every pupil has subscribed something to the fund.

The third grade gave a play Friday for the benefit of the fund. The seventh grade gave a pie supper for the same, and the fifth and sixth grades had a miniature picnic Friday as a financial aid. So little by little the fund grows.

Most all the teachers have added most charmingly and beautifully to the appearance of their rooms by placing within them pretty flowers and pictures. They seem to realize that a child grows in character and disposition in accordance to its own environments and home surroundings. The school room is the child's home, even as much, if not more so, than its own real home. This the teachers see and are trying to make Lamar a pleasant place for them to advance.

Twelve pupils from the seventh grade were transferred after the first quarterly examination to Central School. The following are those who

averaged above 95 and were transferred: Francis Stovall, Ivy Hart, J. Q. Vencil, Agnes Coleman, Mary Bain, George Keys, Willard Warren, Lella Bryan, Chas. Rushing, Pearl De-Jarnatt, Ruth Lipscomb and Fay Sawyer. These were invited to attend the Alcyonian Literary Society of the seventh grade, and were present.

Superintendent Harrison has added greatly to the encouragement of out-of-school duties, which are as essential to youthful development as class-room work, by giving credits for home work and Sunday School attendance.

**500 THREE-YEAR-OLD STEERS UNLOADED FOR CALLAHAN RANCH**

Fred L. Chase and E. A. Chase, of Council Grove, Kans., were in Plainview Wednesday on business. They unloaded five hundred three-year-old

**Thanksgiving Proclamation**

By WOODROW WILSON

It has long been the honored custom of our people to turn in the fruitful autumn of the year in praise and thanksgiving to Almighty God for His many blessings and mercies to us as a nation.

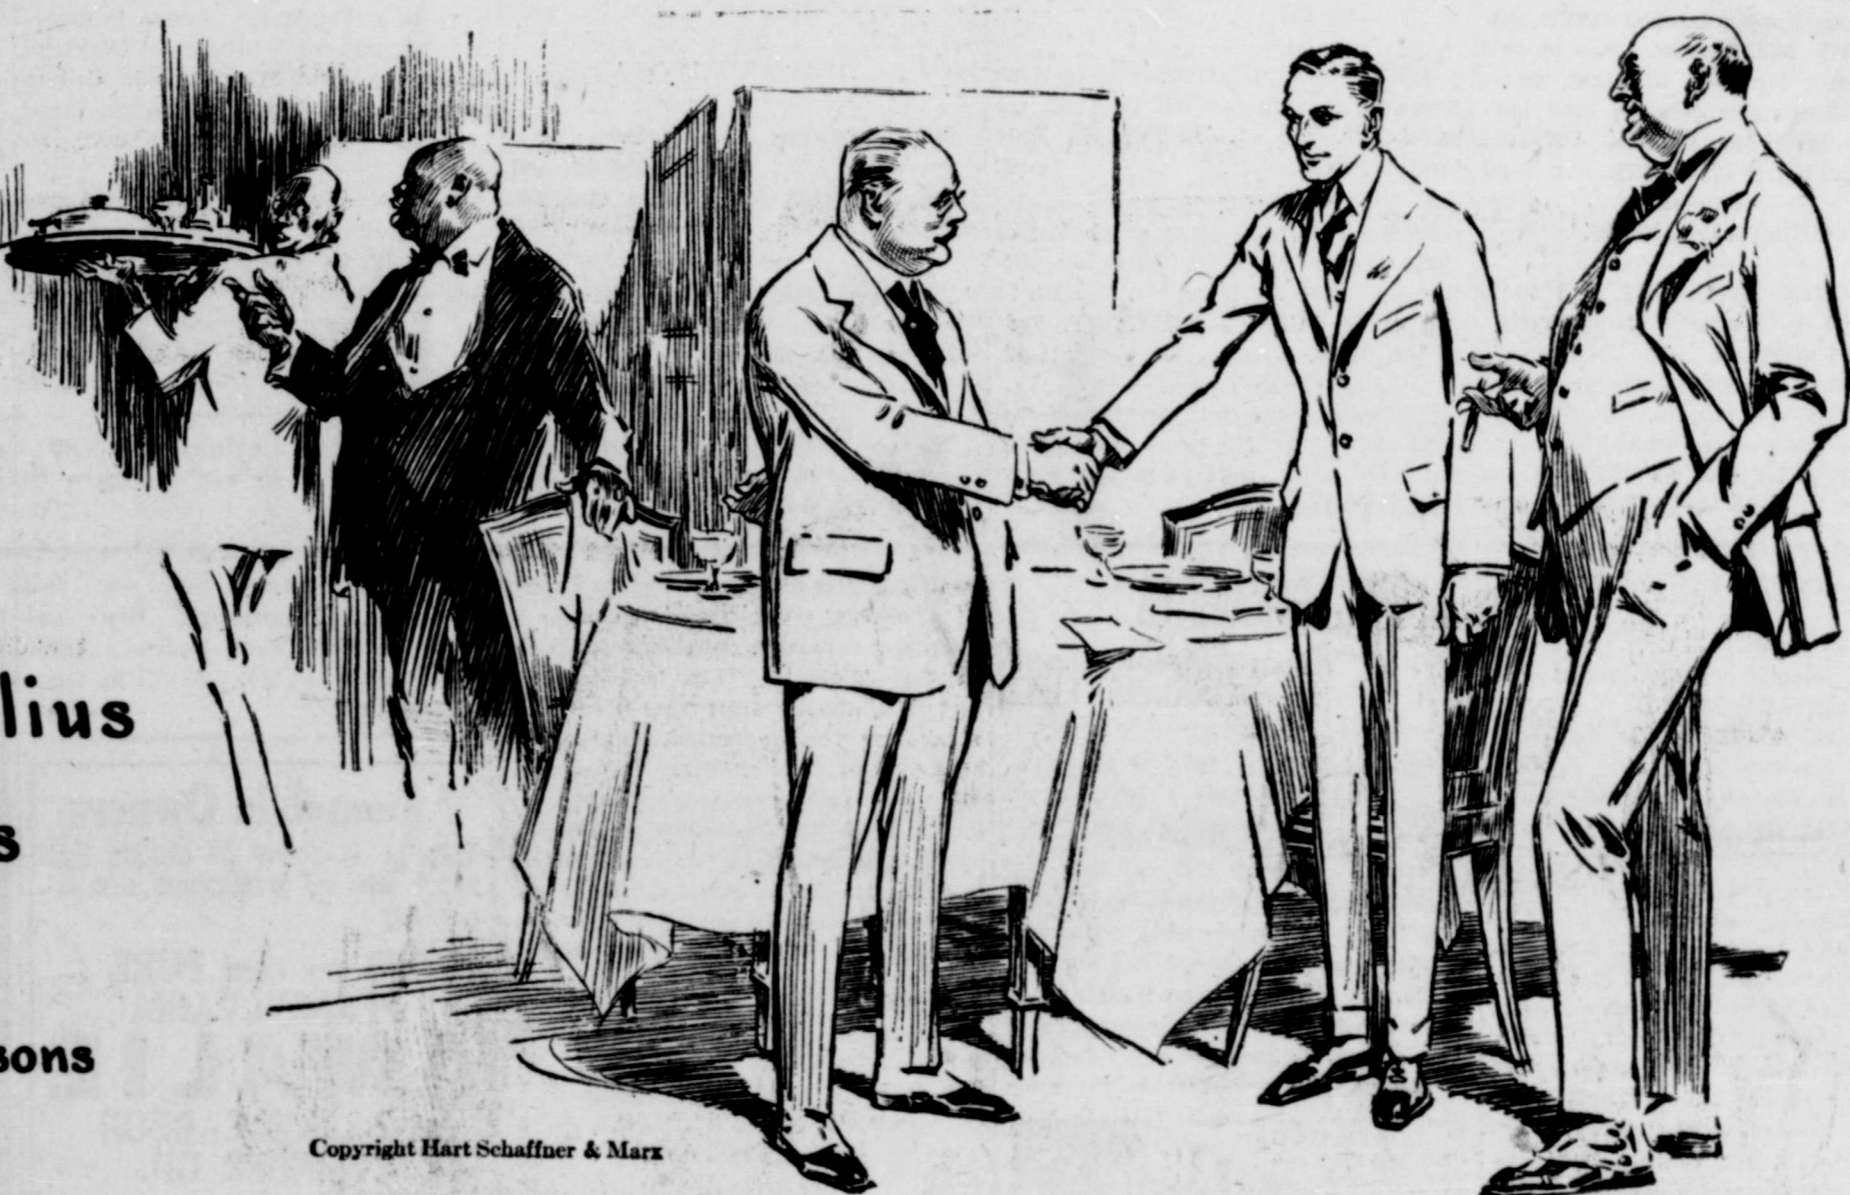

Never before have the people of the United States been so situated for their own advantage or the advantage of their neighbors or so equipped to serve themselves and mankind.

Now, therefore, I, Woodrow Wilson, president of the United States of America, do hereby designate the last Thursday of November next as a day of thanksgiving and prayer and invite the people throughout the land to cease from their wonted occupations and in their several homes and places of worship render thanks to Almighty God.

steers to be placed on the Callahan Ranch.

College courts, Lockney High School girls defeated W. B. C. The score was 20-16. The Lockney team was accompanied by Professor Hill and Miss Mate Hunt.

This afternoon in an interesting basketball game on the Wayland Baptist
