

THE PLAINVIEW EVENING HERALD

TWICE-A-WEEK

VOLUME 27, NUMBER 72

PLAINVIEW, TEXAS, FRIDAY, SEPTEMBER 8, 1916

PROMOTING DAIRYING WOULD BE GREATEST ACHIEVEMENT

Johnson Finds Much Interest in New Industry Among Lubbock County Farmers.

"From Woodward, Okla., to Sweetwater, Texas is a section wonderfully adapted to dairying," said L. L. Johnson, agricultural demonstrator for the Panhandle and Santa Fe Railway Company, to a representative of The Herald this afternoon. "If by giving my time and energy to establishing the dairy industry in this territory I can accomplish the feat of interesting the people in dairying, it will be the biggest year's work I have ever done."

Mr. Johnson has just returned from Lubbock, where the dairy proposition is being pushed under the auspices of Secretary Jacobs of the Chamber of Commerce. Money to finance the proposition has been secured from the bankers, who have agreed to furnish same at a reasonable rate of interest. Col. Clarence Ousley, Director of Extension in Texas, visited them during the week past, and was of material assistance in getting the proposition before the people in its true light.

Mr. Johnson states that good markets for the products of the small farm dairy are assured, Nissley, of Dallas, having assured him that he would install a station where payments for cream will be made as soon as cream is delivered. Swift & Company, of Amarillo, will be competitors of this firm.

This afternoon, at the Chamber of Commerce rooms, Mr. Johnson is consulting with the bankers of Plainview.

Mr. Nissley, or an authorized representative, will be in this section within the next few days, and C. O. Moser, the dairy expert who was here several days ago, will also visit again. They will probably come to Plainview to assist Mr. Johnson and Dr. R. F. Hare, county agent, in the work of organization.

WEST TEXAS DENTISTS ARE COMING NEXT WEEK.

The West Texas Dental Society meets in Plainview in its semi-annual meeting Friday and Saturday, September 15 and 16. Dr. C. D. Wofford is a prominent member of the society, and was largely instrumental in securing the convention for Plainview. The Y. M. B. L. and the Chamber of Commerce of Plainview are co-operating with Dr. Wofford in arranging details of the entertainment for the visitors.

PATRICK WINS BIGGEST EVENT AT SPUR RACES.

Hum Patrick, of Plainview, drove the winning car in the races at Spur Tuesday in the small-car race, winning first prize, \$250, in a Buick. Wednesday he again won first, driving the Stutz car from Estilline in first place in a class in which two Hudson "Super Sixes" and "The Teeser," better known as the "Texas Special," entered. The prize was \$750. Park Dalton, of Plainview, rode with Patrick. The Spur track was in poor condition, the average speed being about 47 miles per hour.

OUTING AT LAKE PLAINVIEW ENJOYED BY BOYS AND GIRLS

Ice-Cold Melons and Other Delicious Refreshments Are Served by Y. M. B. L.

About sixty boys and girls, members of the Girls' Home Economics Clubs and Boys' Pig Clubs, Boy Scouts and Campfire Girls, enjoyed the hospitality of the Y. M. B. L., Dr. R. F. Hare and Mrs. J. L. Landrum at Lake Plainview Wednesday evening. The informal gathering was the result of the announcement by Judge W. B. Lewis, county school superintendent, that Wednesday was to be Rural School Day on the teachers' institute program.

Ice-cold watermelons, which had been in cold storage at the Texas Utilities Co.'s ice plant, bacon fried in the open, plenty of bread and ice water and ice cream cones were served in abundance to those who did not have to leave for their farm homes early to get the chores done before the rain which threatened.

Before the picnic those who cared to row were tendered the use of the boats on Lake Plainview.

Paving Is a Sure Sign of Progress

HOW A TEXAS TOWN PAVES ITS STREETS

MOST OF THESE HOUSES WERE BUILT BECAUSE THIS STREET WAS PAVED

BOTH WERE NEGLIGENT SAYS JURY IN MASTERSON CASE

Lamb County Man Brings Suit Against Sheriff, Alleging False Imprisonment; Asks Damage.

A verdict was returned today by the jury in the case of T. C. Masterson et ux. vs. the Panhandle and Santa Fe Railway Company. That the railway was negligent in permitting a stake to be near the road at the crossing and that Mrs. Masterson was negligent in not choosing the main thoroughfares across the railway and negligent in driving, is the substance of the verdict, which cites the negligence of both. The plaintiff asked for \$10,000 damage, alleging that she sustained physical injury and that she should have pay for mental anguish which followed the accident.

A case from Lamb County comes up this afternoon. It is a suit brought by E. F. Bryant against Robt. McQuillin. McQuillin is sheriff of Lamb County. It is alleged that he imprisoned Bryant falsely, and remuneration for damage is asked. This suit grows out of a physical encounter at Olton several months ago, when Bryant was arrested by Sheriff McQuillin.

CITY DISCONTINUES POLICY OF HAULING TRASH FREE.

The city has discontinued its policy of hauling trash free of charge, according to Mayor W. E. Risser. "The city can't afford to make gatherings as it has done in the past," said the Mayor. "The time of the men and teams is needed on the streets at this time. The earth is moist and easily handled, and a most opportune time for grading up the streets and cleaning the gutters is here. However, those who desire trash moved may call the City Hall, and arrangements will be made with parties who charge reasonable sums for hauling trash."

FINAL ACCOUNT FILED IN REEVES PROBATE CASE.

Final account and settlement has been filed by Mrs. Minnie Reeves, administratrix of the estate of Oscar T. Reeves.

WILLIS DRUG COMPANY IS BOUGHT BY R. M. ELLERD

Three-Fourths Interest Acquired by Plainview Lawyer; Willis Gets Land.

R. M. Ellerd has purchased the interest of J. W. Willis in the Willis Drug Company. The deal is for \$9,000, being three-fourths of the capital stock of the company. W. T. Mise retains his interest.

In the deal Mr. Willis acquires city property of considerable value, a Franklin roadster and seventy-six acres of improved land just east of the E. Graham place, north of Plainview. Half of the tract is in cultivation. It is well fenced and has a modern five-room cottage which has just been finished.

Mr. Willis states that he will probably enter the life-insurance business, but for the next several days he will continue to manage the business for Mr. Ellerd, who will soon place another competent man in charge.

Born to Mr. and Mrs. J. F. Duncan, Jr., last night, an eleven-pound boy.

SIX CARS OF HOGS TO BE SENT TO MARKET TOMORROW

Weyl Will Send Fancy Hereford Cattle and Helen-Temple Farm Fine Hogs to Amarillo Fair.

Six cars of hogs will be shipped from Plainview tomorrow for Wichita, Kans. W. A. Watson will have two cars, H. W. Knapp two cars, J. T. Mayhugh one car and E. B. Hocker, of Alken, will have a car. Jim Phillips and George E. White will ship a car of cattle each, and Fred Weyl will send a car of fancy Hereford cattle to Amarillo for the Panhandle State Fair. Incidentally, his is one of the finest small herds of Herefords in the country.

On Monday a car of show hogs from Helen-Temple Farm's fine herd of registered Duroc-Jersey hogs will also be shipped to Amarillo to be shown in the Panhandle State Fair.

WISCONSIN MAN PROSPECTING.

Herman Schulz, of Madison, Wis., is prospecting in the Plainview country this week.

Get the Weeds and Trash and You'll Get the Insects

You will be surprised how easily those big weeds may be pulled up now. The ground is soft and the big roots respond readily. It's a good time to cut the smaller ones, too. Many weeds have not seeded yet. Every time you cut one down before it seeds you destroy hundreds of potential weeds. Weeds decaying in the yard through the rainy season of the year are unhealthy. They are unsightly if left standing. For a cleaner, more beautiful Plainview, cut the weeds.

The winter home of the codling moth is the old boards, trash, weed piles, etc., left in the orchard. The thrips, or leaf hopper, is wintered over in such debris. If you had leaf hoppers on your ornamental vines or your grape vines this year, and do not clean the trash around your place, you will probably have more next year. A clean orchard or yard will protect your vines, by destroying the wintering-over place of insects.

The satisfaction of having a clean yard, clean alleys and clean streets is remuneration enough for the effort, and we safeguard health.

You've been intending to cut those weeds for a long time. You have just put it off until NOW. Cut them this afternoon when it gets cool, or in the morning before breakfast. Get them either today or tomorrow.

Let's clean up and get rid of the weeds.

RECITAL COMPLIMENTARY TO DEPARTING MUSICIANS

Miss Mills, Pianist, and Mrs. Pritchett, Director of Ability, Will Be With Stamford College.

A delightful musical program and informal reception was given last night at the Methodist Church, complimentary to Mrs. Cora E. Pritchett and Miss Wilma Mills, who have been so faithful in the work of the churches of Plainview.

Mrs. Pritchett for a number of years was teacher of voice in Seth Ward College and choir director of the Methodist Church. Miss Mills was teacher of piano and pipe organ in Seth Ward last year, and during her stay in Plainview has won many friends. Both will teach in the Stamford College this year.

The church was made attractive with autumn blossoms artistically arranged.

Program.
Organ—"Miserere" (from "Il Trovatore")—Lawrence Gray.

Piano—Chopin's "Military Etude"—Miss Ruby Hatcher.

Vocal—(a) "Requim" (Sidney Haner); (b) "The Temple Bells" (Amy Finden)—George Hutchings.

Vocal—(a) "Happy Days" (A. Strelzki); (b) "Nothin' But Love" (Carrie Jacobs Bond)—Mrs. E. L. Doland.

Organ—"At Evening" (Ralph Kinder)—Herbert W. Reed.

Vocal—(a) "Roses by Summer Forsaken" (Newton); (b) "In My Garden" (Liddy)—Mrs. Grady Gentry.

Violin—"Cavallera Rusticana" (Mascheu)—Professor Crabb.

Voice—"Knowest Thou Not That Fair Land" (from "Mignon"—Miss Donnell.

Double Quartette—"Hark, Hark, My Soul" (Shelley)—Soprano, Mrs. Cora E. Pritchett, Mrs. J. J. Clark; alto, Mrs. E. L. Doland, Mrs. Robt. Myers; tenor, George Hutchings, Herbert W. Reed; Bass, M. D. Henderson, T. Stockton.

Closing Address—Rev. J. W. Story.

NO REVENUE TAX ON TELEGRAPHIC MESSAGES.

The one-cent war tax on Western Union Telegraph Company messages will be discontinued after today, is announced by Miss Kathryn Polansky, local manager. A new revenue act abolishes this tax.

COUNTY COURT WAITING ON DISTRICT COURT.

Little business has been transacted in County Court this week, on account of many jurors, witnesses and attorneys being busy in District Court. Hale County court is now open in continuous session.

REV. HAYNIE WILL FILL HIS APPOINTMENT SUNDAY.

Returning this morning from Wichita Falls, where he has been attending the Amarillo Presbytery, Rev. T. B. Haynie states that a splendid meeting was held. He will fill his regular appointment at the Presbyterian Church Sunday.

R. R. RATE CASE COMES UP AT AUSTIN NEXT TUESDAY

Plainview Will Have Good Delegation to Represent Its Citizens Before Railway Commission.

The rate case involving freight charges in the South Plains district will come up for hearing Tuesday morning before the Texas Railway Commission, in Austin. A. G. Hinn, Judge J. E. Lancaster, P. J. Woodruff, Col. R. P. Smyth and R. A. Drumm will probably attend to represent Plainview at the hearing. There will be other representatives from each town in the affected territory. The matter which will be brought up is the removal of differential rates to all points between Fullerville and Amarillo, which, if done, will affect Salton, Lubbock, Hale Center, Abnerath, Plainview, Tulla, Happy, Kress, Canyon City, Alken, Lockney, Floydada and other towns on the line. Another matter to be considered is the consolidation of all the Santa Fe lines in Texas under the name of the Gulf, Colorado and Santa Fe. This would mean the abolition of general offices of the corporation's subsidiary companies.

CONGRESS PASSES REVENUE BILL AND THEN ADJOURNS

In Many Respects This Session Has Been Record Breaking; Long, Tedious Session.

WASHINGTON, Sept. 8.—Congress adjourned sine die today at 10 a. m., concluding a session record-breaking in many respects, with appropriations and authorizations for the future running well toward \$3,000,000,000.

In a statement issued following the adjournment of Congress, President Wilson called attention to the "helpful and humane legislation" passed, and declared that while he regretted additional legislation dealing with the recent dispute between the railroads and their employees had not been completed, he had every reason to believe the question would be taken up immediately after Congress reassembled.

Congress at the session closed today appropriated exactly \$1,626,439,210, which with obligations and authorizations for the future makes the total \$1,856,384,485. These figures, announced in speeches by Representatives Fitzgerald, of New York, Democrat, and Gillett, of Massachusetts, Republican, were defended by the former and attacked by the latter as \$500,000,000 greater than any session of a Republican Congress.

The homestead grazing bill was passed without record vote. It already has passed the House. It provides for stock-raising homesteads, raising the maximum area which may be entered for that purpose from 160 to 640 acres. When the House convened, at 8:30 a. m., Speaker Clark, Democratic Leader Kitchin, Republican Leader Mann and a small number of members on both sides were on the floor to watch the wind up.

Long, Tedious Session.
Speaker Clark, addressing the House, referred to the session of Congress as a long, tedious and laborious session.

"No session of Congress in my recollection," he said, "stayed so many days nor worked so many hours."

Soon after President Wilson reached the Capital the revenue bill was ready for his signature. The Senate adopted the concurrent resolution for a 10 a. m. adjournment, which already had been adopted in the House.

President Wilson signed the emergency revenue bill at 9:25 a. m., in the presence of Senator Simmons, chairman of the finance committee, and Representative Rainey, of the ways and means committee.

To Senator Simmons the President expressed gratification over the passage of the revenue bill and its many legislative provisions. He said, however, that he greatly regretted the failure of the Webb bill to provide for establishment of American collective selling agencies in foreign countries.

As the President was about to sign the \$20 widows' pension bill, with Representative Ashbrook, of Ohio, its sponsor, by his side, Senators Smith, of Georgia, and Bryan, of Florida, who opposed it vigorously until the last minute, entered the President's room, and Ashbrook asked them to witness the signature. The President smiled as the two Senators hurried away.

At 9:30 a. m. the Senate appointed Senators Kern and Smoot to notify the President that Congress was ready to adjourn unless he had some other communication to present. They were joined by Representatives Kitchin, Fitzgerald and Mann, the House committee, and the joint committee waited on the President at 9:35 a. m.

The President congratulated the leaders on the opportunity for a "well earned rest." Officially he informed them that he had nothing further to communicate to Congress.

TEACHERS "SPELLED DOWN."

Mrs. J. W. Day and Mrs. E. E. Warren Win in "Spelling Bee," Competing With Teachers.

About one hundred took part in the old-time spelling bee given at the Christian Church last night. A large number was in attendance.

The words were given from the old "Blue Back Speller" by Mrs. F. P. Powell and Prof. S. J. Woodruff. A number of the Hale County teachers, who are here for the institute, spelled against the same number of citizens, and were defeated by two. Mrs. J. Walter Day and Mrs. E. E. Warren were the winners.

WANTS GIRLS TO MAKE GOOD SHOWING AT TRI-STATE FAIR.

Amarillo, Texas, Sept. 4, 1916.

Dearest Club Girls:

This has been a most wonderful and busy week. I don't think that I ever traveled as fast and as far by auto in my life as we have done the past week. But this is a great and beautiful country, and one does not grow tired easily. I must tell you first about the lovely Girls' Day we had at Claude last Sunday. There is a wonderful bond of fellowship between the girls of the county and the town of Claude, and when Girls' Day is held it means a gathering together of all the girls of the county who can possibly get to the nice little town of Claude. This year, although it rained hard, there was a big gathering. All the girls brought baskets for dinner and it was spread upon the lawn of the hospitable home of Dr. and Mrs. W. A. Warner. In fact, Mrs. Warner is the responsible person for creating the delightful occasion. After the dinner, an interesting and beautiful service, dedicated to girls, was rendered at the Baptist Church. There were short sermons by the visiting clergymen from Amarillo and the local clergymen and others. Of course, I was delighted to talk, for girls and their interest has almost become my religion. We also had short talks upon the various kinds of girls. I was given the topic "The Girl Who Does Things," and I illustrated my talk with the story of Annie Mae Hudgins, the wonderful club girl of Layne (R. F. D. Denison), Grayson County. I am sure all who attended the Austin convention remember the girl whom I introduced from the platform of the Senate Chamber of the Capitol, where we held our club meeting. I hope to hold a Girls' Day in every club district in the course of time.

I visited the wonderful Goodnight Ranch a few days ago and held a meeting at the town named in honor of the pioneers of that name. Colonel and Mrs. Goodnight are known all over this section of the State for their generosity to young people and others. In fact, they are known everywhere. The ranch home is so quaint and pretty, with its many narrow halls and rooms filled with Indian relics and old guns and hides of the native animals that used to rove these plains before the going of the Indians and the coming of the white settlers. I am going to send you an autobiography of these old settlers and let every girl read what the women of that day went through to build for her this great and wonderful State. No State in the Union has the thrilling and romantic history that belongs to the State of Texas. In another letter I will tell you of the great herds of buffaloes that roam the plains of the Goodnight ranch.

Now, many are asking about their fruit exhibits. Please call for a fruit exhibit in every club, so that you can ship it on short notice. Don't forget to call for a textile exhibit also. It has not been definitely decided where it will be placed first, but I will know in a few days and will let you know where to send them. Try to send at least one and one-half dozen jars from each club. I will take good care of them and return to you when the fairs are over. We are anxious to make a fine Texas showing at the Tri-State Fair, at Memphis, Tennessee.

With lots of love, from,

Cordially yours,

MRS. J. L. LANDRUM.

SWEET CLOVER A GOOD CROP FOR HOG PASTURE; A LEGUME.

Recent observation has shown that white sweet clover, *melilotus alba*, has far greater possibilities than most people believe. On waste lands and by road sides plants can be seen looking thrifty and growing in very warm, dry weather. If they will grow so well under such unfavorable circumstances, it would seem that cultivation on good soil would show excellent results.

The white sweet clover is not a clover, botanically speaking. It is a *melilotus*. It is a biennial, but will frequently reseed itself for a number of years. The plants grow from 18 inches to five feet tall, according to the soil and the season. So far as is now known, there are no very troublesome insects or plant diseases to interfere with the crop.

There are, generally speaking, three uses of white sweet clover. (The yellow variety, *melilotus officinalis*, is worthless as a crop.) It is grown for soil improvement, for hay and for grazing. Often two or more uses of the crop may be had in the rotation.

For soil improvement sweet clover is excelled by none of the other legumes where it thrives. Its long, branching tap roots extend to considerable depth in the soil and renovate it. Being a legume, sweet clover uses free nitrogen and stores it on its roots in the form of tubercles or nodules. Following a crop that has fibrous roots, such as oats, wheat, corn or grass, the clover enriches the soil, adds humus and thus increases the yield. It grows in fall, winter and early spring, when a growing plant is greatly needed on the soil.

Sweet clover makes most excellent

grazing. Cows, horses, sheep and poultry do well on sweet clover pasture. The plants are a little bitter or acrid and animals may not like it at first, but they soon learn to eat it and thrive well on it. It will not bloat cattle and sheep, like alfalfa and some of the clovers, and for this reason is a valuable grazing crop. Stock may be turned on the fields soon after the plants are well started, and when grazed off soon come back. As hog pasture sweet clover has much to recommend it.

For many years dairymen farther north have planted sweet clover for hay. The hay is as rich in feeding nutrients as alfalfa, and when cows learn to eat it relish it as well. As is the grazing, the hay is a little bitter, but the odor is sweet and tempting. Animals soon learn to relish it. It grows where the land is not suitable for alfalfa, and, while it is a biennial, it need not be planted every year ordinarily.

When planted for hay the crop may be cut two or three times for hay and the last cutting for seed. The seeds are threshed like clover or alfalfa.

Sweet clover hay may be fed with grain, silage and such concentrates as cottonseed meal. It is cut and cured like alfalfa or red clover hay.

Sweet clover may be planted either in the fall or the spring, depending upon the locality. Generally speaking, fall planting is preferable here in the Southwest, as our mild winters scarcely interrupt growth, but give the plant an excellent start. This reduces danger of drouth the first summer. Furthermore, fall planting gives the plants a start of weeds, which may be troublesome when the sowing is done in the spring.

Land for sweet clover should be prepared some time before planting. Best stands are generally obtained when the land has been prepared in time to settle well, so a firm seedbed may be made. Fall planting may be done in the latitude of North Texas any time from September 1 to November 1. Usually about the first of October is a good time. Farther north from September 1 to October 15 would be about right. In South Texas planting might be done till the first of December.

From 15 to 20 pounds of seed per acre is generally recommended. Where the seeds are heavy and clean and the land in good condition 15 pounds per acre will be sufficient. Sowing may be done by a seeder with clover or alfalfa plates. The drill should be set shallow.

Those who are not sure that sweet

clover will thrive on their farms might find it desirable to plant a small area and give it a fair trial before going to much expense. This will be the best plan to try this crop and find out for yourself whether or not it will pay to grow it.—Farm and Ranch.

NEW EDUCATION BUILDING.

AUSTIN, Texas, Sept. 6.—The ground is being cleared at the University of Texas for the erection of a building for the Department of Education, to cost \$170,000. This building will be devoted to training teachers for the public schools of Texas. The University is sending out already more than 400 teachers a year, and has many applications that it cannot fill. Dr. W. S. Sutton is Dean of this Department.

EAT POTATO SKINS, SAYS DR. HARVEY W. WILEY.

Eat potato skins and apple peelings and bread of unbolted flour if you would be well and strong; so says Dr. Harvey W. Wiley. The poor waste part of their food in peeling apples and potatoes and in their effort to live on refined foods.

Good food is the best kind of vaccination you can practice.

In a nourished body nature provides enemies against disease. The present tendency toward refinement of foods deprives us of essential elements of diet.

SHURTER NOW HEAD OF TEXAS UNL. EXTENSION DEPARTMENT.

AUSTIN, Texas, Sept. 6.—Dr. A. Caswell Ellis, who has for two years been in charge of the Extension work of the University of Texas, has been succeeded by Dr. E. D. Shurter, who for nearly twenty years has taught public speaking in the institution. Dr. Ellis will continue his connection with the Department of Education of the University of Texas.

CARD OF THANKS.

To all of our friends who were so kind and sympathetic during the illness and death of our beloved wife and mother, we extend our thanks, and for the many beautiful flowers sent at the time of our great bereavement.

R. W. O'KEEFE,
MR. AND MRS. JOE W. RYAN.

If your galvanized tank leaks from small rust holes or any other cause, PROTEX will mend it. FULTON LUMBER CO.

School Days Are Here

And its time to dress the kiddies up.

Boy's School Suits

We have suits that are not only equal to any in appearance but they are noted for their wear.

Every suit guaranteed and marked at prices that invite your inspection—\$3.50 to \$9.25.

Girl's School Dresses

We have an excellent assortment of school dresses in original styles. We are offering some exceptional values for school wear.

Shoes

We are featuring the Selz "Waukenphat," the best school shoe at any price.

This is the logical shoe for the growing child. Careful attention given the youngsters.

Motor News of General Interest

WINS AUTO RACE AT 97.06 MILES AN HOUR

Johnny Aitken Leads in 300-Mile Contest on Sharonville Track.

CINCINNATI, Ohio, Sept. 4.—Johnny Aitken assumed a lead over Dario Resta at the 168th mile and won the first annual 300-mile sweepstakes at the new Sharonville track today. Wilbur D'Alene was second, while Frank Galvin, far behind, drew down third money.

Gilbert Anderson, while in the stretch run on the 168th mile, skidded and dived into the fence. His car turned turtle and he was dangerously injured. His mechanic, Bert Shields, suffered a fracture of the thigh and internal injuries, and his recovery is doubtful.

Aitken's time for the race was 3 hours, 5 minutes and 27 seconds, an average of 97.06 miles an hour.

The first automobile sweepstakes race which was run over the two-mile saucer track drew twenty-nine entries, all of whom qualified by making better than eight miles an hour, and some exceeded 110 miles.

The new speedway track is of wood, made of 2x4-inch oak, laid lengthwise, and an eighth of an inch apart. This small opening cools the tires, it is said. The track is seventy feet wide. The stands have a seating capacity of 30,000, while parking space has been provided for 15,000 machines.

The purse contested for was \$30,000, divided into thirteen prizes, with \$12,000 to the winner and an extra award of \$500 each for the drivers leading at the 100, the 200 and the 250 miles, respectively.

HOW TO WASH A MOTOR CAR.

Soap With a Little Lye Should Be Used; See That All Soap Is Removed.

The general appearance of an automobile depends a great deal upon the way the car is washed. With a view to giving the automobile public some particular information in regard to the proper washing of cars, R. L. Cleveland, superintendent of the Moon Motor Car Co., makes the following suggestions:

"An automobile should be washed carefully at least once a week," Cleveland declared. "It should be gone over with soap and water, applied with a sponge. Care should be taken to use a soap with a small percentage of lye."

"After the car has been carefully cleansed it should be rinsed with a hose and all the soap removed. Then it should be dried with a chamamois and polished with a dry cloth."

"If the car is then gone over with a dry cloth every day when it is taken out of the garage the new finish may be preserved for a long time. But by permitting dust and dirt to remain on the finish it is only a question of a short time until the surface of the car will be dotted with little spots where this dirt has ground away the finish."

"Incidental to the washing of the car is another point that should be remembered. All grease cups should be freshly filled before washing, in order to force out any dust that has accumulated and to prevent this dust from being forced in farther. By filling the grease cups the water is also kept out of the spring bolts and bushings."

MAXWELLS AID IN PARALYSIS FIGHT.

The Maxwell Motor Company, Inc., of Detroit, through its branch at Brooklyn, N. Y., has donated two motor cars to fight the epidemic of infantile paralysis. The company is also providing all the maintenance expense, including chauffeurs. The Health Department assigned one of the cars to the Municipal Garage for emergency work and the other at the Kingston Avenue Hospital for ambulance work. The percentage of paralysis cases is heavier in Brooklyn than in any other borough of New York, and the health authorities were glad of the assistance rendered by the Maxwell Company.

LINCOLN HIGHWAY PAINTERS' FAST WORK.

The work of painting the signs on the Lincoln Highway is making rapid progress. The painting squad, in two specially equipped Overland Model 75 delivery cars, is at work in Indiana and Illinois. It is expected that they will be across the Mississippi River before the last of August.

Their work in New Jersey, Pennsylvania and Ohio has received the highest praise from the communities through which they have passed, as well as from tourists they meet on the way.

According to the present rate of progress, it is expected that the Lincoln Highway road signs will be ready to guide tourists as far as Cheyenne, Wyoming, before the present touring season is complete.

FEDERAL-AID ROAD ACT.

Secretary of Agriculture Discusses Important Features of the Newly Enacted Law.

At a meeting of the State highway officials held August 16, 1916, in Washington, to discuss tentative rules and regulations for carrying out the Federal-aid road act, the Secretary of Agriculture made the following statement:

"The Federal-aid road act and another law—the co-operative agricultural extension act—that the department is charged with the duty of enforcing establish a new principle in American government—the principle of co-operation between Federal and State officers. They are the only laws I recall which recognize and insist upon this principle. They are, therefore, very significant. Heretofore Federal and State officers have too frequently looked at one another across the line, sometimes with apprehension as to what the other was going to do or think, sometimes with jealousy, not infrequently with friction. We serve the same people. They have a right to the best service of the representatives of both jurisdictions. You represent the States. I represent the Federal Government. Together we are charged with the execution of a very difficult and very important law."

"I need not emphasize before you the importance of good roads. Most intelligent people who think about good roads know that they are essential to comfortable living, essential to proper community development, especially to the development of rural life, to efficient production and orderly marketing of farm products, to good schools, and to the development of a satisfactory rural life."

"Many people, however, do not appreciate this; and I have occasionally

met road officers who, when the importance of good roads was emphasized, have said: 'Yes; but they cost so much!' Apparently they have not thought how much more bad roads cost, not only in dollars and cents, but also in all those indirect ways for which one can make no definite calculation."

Large Expenditures for Roads.

"This law appeals to me as of especial importance, not so much because it carries with it out of the Federal Treasury an appropriation of 85 millions of dollars, not because it will be met by an appropriation of 75 million or more out of State funds, if all the States accept the act, but because, as great as is the aggregate, it is relatively insignificant in comparison with amounts the States are now annually expending and will spend during the period covered by the act."

"I remember that, on one occasion, when I was speaking to a public official about the road bill and suggested that we ought to begin with a modest initial appropriation of three, four, or five millions of dollars, he expressed surprise, and said that such an amount would not get us anywhere; that the expenditure by the Nation of a few millions of dollars for roads would be merely trifling with the matter. I asked him if he knew what the people of the Nation were contributing annually for road building; that the Nation was already expending the equivalent of nearly half of what the Panama Canal has cost. Of course he did not. And the majority of people do not realize that the Nation is expending approximately \$250,000,000 a year for roads."

A Dollar's Result for Each Dollar Expended.

"The main question that I am immediately concerned with, that the people of the Union are immediately concerned with, is whether we shall get a

dollar's result for every dollar we expend for roads. I am quite sure that if we do so and we can convince the people that we have done so, they will

Don't Think A Modern Windmill Looks Like This

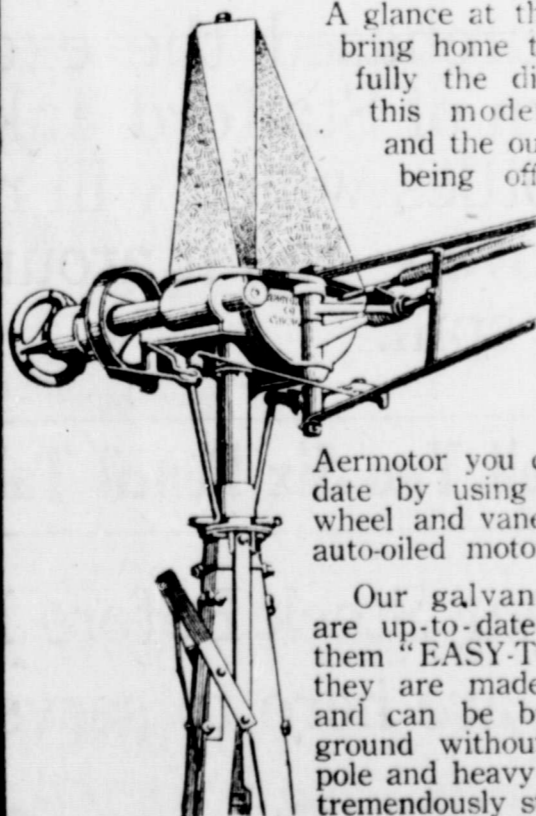

The same kind of ingenious, inventive ability that has perfected the automobile, flying machine and submarine has been at work on the windmill.

You would not think of buying an automobile with the transmission gears uncovered and exposed to dirt and water. Nor would you buy one which required that each bearing be oiled separately. We simply urge you to use the same good judgment in selecting a windmill.

There is ONE, but ONLY ONE, thoroughly modern and up-to-date windmill.

You will find in it every feature which you know to be desirable in a windmill. It runs in the lightest wind, it is strong and durable, all working parts are inclosed and flooded with oil from the supply in the gear case. The oil supply needs replenishing only once a year. The brake and furling device are simple and effective.

A glance at this illustration will bring home to you very forcefully the difference between this modern wind motor and the out-of-date windmills being offered for sale. If you have a mill of another make it will pay you to replace it, on your old tower, with an Auto-Oiled Aermotor.

If you have an Aermotor you can bring it up to date by using your old tower, wheel and vane and installing an auto-oiled motor.

Our galvanized steel towers are up-to-date also. We call them "EASY-TO-BUILD-UP," as they are made in 7-foot lengths and can be built up from the ground without the use of gin pole and heavy tackle. They are tremendously strong.

Progressive windmill dealers in every locality are taking up the sale of the Auto-Oiled Aermotor. Ask them about it or write us direct for fuller information. Aermotor Co., 2500 West Twelfth St., Chicago, Ill.

THE BUICKS ARE HERE

We are glad to notify the public that we are this week unloading several cars of **Buicks**. We wish to thank those that have been patiently waiting for their arrival and to advise that we will distribute them impartially.

WE HAVE

- The D-6-45 5 Passenger Touring Car at \$1095, Delivered
- The D-4-35 5 Passenger Touring Car at \$730, Delivered
- The D-6-44 Roadster at - - - \$1050, Delivered

The rightness of the **Buick** valve-in-head motor has made the **Buick** conspicuous for leadership. It is so reliable—so near trouble proof and yields the maximum of service with the least possible expense. Nothing has been omitted in the construction of these cars to make their goodness and beauty lasting.

The owner of a **Buick** valve-in-head motor car obtains from his investment a satisfaction which grows in completeness as his car continues in service. He marvels at the manner in which the matchless **Buick** motor retains its snap after thousands of miles of use.

He is pleasantly surprised to discover that his car improves with age, and that it runs with an ever increasing smoothness.

And his satisfaction is increased and intensified when he finds out that the value that is built into **Buicks** is the lasting value of carefully chosen and rigidly inspected materials.

There can be no more satisfactory possession than a **Buick** valve-in-head motor car. Come in and inspect them.

FEDERAL-AID ROAD ACT.

(Continued from Page Three.)

be willing to put much more money into good roads where they are needed. Therefore, the matter of administering this law, of devising good road systems, of careful selection of roads, of formulating projects, of developing plans and specifications, of having all matters considered on their merit by competent men, seem to me to lie at the root of this business. If, as the result of this act, the people are induced fully to realize the necessity of placing skillful and experienced men in charge of road building and road maintenance, a great advance will have been made and the efforts of those who labored to secure the legislation will have been rewarded.

Employment of Experts.

"I assume that as a matter of necessity this law will require the employment in every State of experts, of real experts. This word is very much misused and abused, as the word 'theorist' is. I frequently hear a contrast drawn between the theorists and the practical men. There is no basis for it. The classification ought to be into good theorists and bad theorists, of practical men and unpractical men. A really good theorist is highly practical; and so is a real expert. The public is somewhat suspicious of experts, because, I think, so many people pose as experts who are not. When the public sets an expert aside, it is worth while to inquire into the expert's claims and competency.

"I repeat that this act will necessitate trained intelligence in the service of the State as well as in the service of the Federal Government. The act requires the State to accept it. That, as I understand it, implies the assent of the State to every provision of the act. One of these provisions is that projects, plans, specifications, and contracts shall be submitted and approved; and I have a suspicion that plans and specifications will not be approved unless they are submitted by people who know about such things. So the assent of the State involves the calling of trained men into the service of every State which is now without them.

"The law involves another thing, the pledge of the faith of the State to meet in full the Federal appropriation for the entire period covered by the act. The State Legislature may not be able to appropriate money one year for the whole period covered by the act, but it can pledge the faith of the State to meet the financial provisions of the act for the period covered by it. This is as it should be. It would be unfortunate if it were otherwise. It would be wasteful not to make plans at the outset for the full period covered by the act; it would mean piecemeal road building and much dissipation of effort and misdirection of funds. These requirements hold whether the State, as such, under the existing law, may engage in road building or not. The provision that where the State may not engage in highway improvement, the money may be secured if counties raise an amount sufficient to meet the apportionment to the State, involves the necessity on the part of such counties of raising an amount sufficient to meet the full apportionment for the State, the existence of a highway commission, and compliance with all the other terms of the act. I speak of this because there are evidences that individual counties think that if they raise a certain sum of money they will of necessity get a corresponding sum from the Federal Treasury. That is not my construction of the act, and not the one that will be likely to prevail.

"The duty will rest upon you gentlemen who represent the States of informing the people as to the meaning of this legislation and as to the procedure under it, because the initiative under the law lies with you. We are directed to co-operate with you, with the State through the State highway department. It is your duty, if your State accepts the law, to agree with us on roads to be constructed and to submit projects, plans and specifications. Therefore, individuals, associations, and counties will, of necessity, take up such matters directly with you, and we shall hear from them through you for the most part.

Roads and Trails for the National Forests.

"There is a section of the act which contemplates only parts of the country. The Nation owns great areas, especially in our western States, and is acquiring areas in certain others of our States. The Nation owes a duty to the people living in the national forests or near them. In many instances communities struggling for development have been compelled to rely too exclusively for necessary improvements on taxes from private property or on private contributions. It is true that under the law we have heretofore been setting aside for road improvement 10

per cent of the gross receipts from the forests. This has been no inconsiderable sum, nearly three-quarters of a million dollars since the act was passed, and approximately \$278,000 for the present fiscal year. But in some sections there are no receipts from the forests, and communities have been left to struggle as best they could. The Government in many instances is the owner of the greater part of these assets, and it is only equitable and wise that the Federal Government should assist them. So there is appropriated by the act \$10,000,000, a million a year for 10 years, for the construction of roads and trails in or near the national forests, with the understanding that communities interested will co-operate financially and otherwise. Those of you who represent forest States, as a matter of course, will think of co-ordinating work under your direct State-road funds and those arising under the general provisions of the road act with the work to be undertaken under this special appropriation.

Legislation to Aid Distribution.

"I am hopeful that great benefit will accrue to the Nation from the wise and efficient administration of this act. It is one of a series of measures recently conceived and enacted for the develop-

ment of rural life. We began by formulating a law on similar lines—the co-operative agricultural extension act. We then enacted the cotton-futures law to give the cotton farmers and dealers standards to trade on and to secure supervision of the operations on futures exchanges, a similar law to establish standards for grain and to regulate interstate commerce in them, and the warehouse bill for the better storage of staple crops and for the emission of a warehouse receipt which should be good collateral for loans. We have given an opportunity to the national banks to lend funds on farm mortgages, and have extended the period of maturity for farm paper and adopted the Federal farm-loan act. All these lie in the field of distribution, as does this road act, which lies at the foundation of satisfactory and orderly marketing.

Attitude of Department of Agriculture.

"I have come here today mainly to meet you and to express my appreciation of the very ready response you have made to the request of the department to give it information and the benefit of your experience in framing the rules and regulations for the administration of the Federal-aid road act. I am a very great believer in co-

operation, and I think one saves much trouble by beginning to co-operate at the outset.

"I appreciate the keen interest you have shown in the shaping and development of this legislation. I shall do everything in my power to facilitate your tasks, to aid you in the discharge of them so far as the powers of the department permit, whether through this law or through the direct appropriations to the Office of Public Roads. I ask your full, generous, and efficient

co-operation. If we view matters broadly and generously, we shall have no difficulty. I pledge that the Department of Agriculture will approach the administration of this law in that spirit, and will co-operate heartily with you to give the people of the Nation full value for the money which they have pledged under this act."

RYE BREAD IS GOOD.

One cup scalded milk; cup boiling

water; tablespoon lard; 1-3 cup sugar; tablespoon salt; yeast cake dissolved in one-half cup tepid water; 2 cups wheat flour. Add lard, sugar and salt to water and milk. Cool. When lukewarm add flour and dissolved yeast. Beat thoroughly and set aside to rise until very light. Add rye meal until the dough is stiff enough to knead. Knead thoroughly and allow to rise. Shape into loaves. Let rise again, and bake for 50 minutes.

THE K.C. STAR and TIMES

We have arranged for the distribution of the Kansas City Star and Times, two of the strongest conservative publications in the United States. You will find them here regularly—no disappointments.

We are gradually increasing our periodical orders and expect to offer the Plainview public a complete assortment of the most desirable periodical literature. If you don't see the magazine you like to read tell us about it and we will include it in our rapidly growing list.

Just now there is not a great deal of fruit on the market, but you may be assured that we will have to offer what we can obtain from the best wholesale markets. Later in the fall and during the winter we will have a fine line of fresh fruits. You will do well to keep an eye on our fruit counter.

Our stock of King's candies and our cigar and tobacco offerings are growing right along as we become better acquainted with the demands of our trade.

We will endeavor to keep our stock of sheet music to a point that you will feel sure when you buy here that you are getting the latest hits of the musical world.

We are making new friends daily and want to continue the system, it looks good to us and we are doing everything in our power to make it look good to our patrons. If you haven't tried our service don't delay longer.

**SUNDAY SCHOOL AT
LONE STAR REORGANIZED.**

LONE STAR, Sept. 6.—Fine rains have fallen in this community the past week, and farmers are stirring early and late getting ready for wheat sowing.

We have been having meetings here the past two weeks. Rev. Crain preached one week and Rev. S. W. Smith one week. Brother Smith went home Saturday, expecting to return Sunday afternoon, but did not return. Sunday afternoon we reorganized our Sunday School, and had singing and prayer meeting Sunday night.

Our young people are beginning to scatter, now that school days are here.

Miss Ruby Fowler left Saturday for Canyon, where she will attend school. She was accompanied by her cousin, Vera Fry, from Lockney.

Miss Rankin and Miss Suet Fowler have gone to Silvertown. Miss Fowler will teach music and Miss Rankin history in the high school.

Orval Thompson, Virgil Dodson and sister, Marie, left Sunday for Canyon, where they will enter the State Normal.

Miss Linnie Wimberly will leave for Denton next Sunday, to attend college in that city.

The Hardshells had church here Sunday. Brother Fisher did the preaching.

Miss Willhight left Saturday for her home, in Central Texas. She has been visiting Miss Myrtle Reeves and relatives near Lockney.

Mrs. Chas. Merrick and Miss Applewhite, our teachers, are attending the Institute in Floydada this week. Our school begins next Monday, the 12th inst.

Mr. and Mrs. Rankin have been sick the past week, but are up now.

Mr. Lawson's eleven-room house is near completion. Mr. Lawson has certainly built himself a beautiful home.

Wyly Nance returned home from Olton Monday, where he has been with Mr. Nollin to carry his cattle.

E. C. Dodson, wife and daughter Beulah Mae were visitors in Plainview Monday.

**KANSAS CITY STOCK
MARKET IN DETAIL.**

KANSAS CITY STOCK YARDS, Sept. 4.—Unsettled conditions made a slumpy cattle market after Wednesday last week. Salesmen who had no cattle after Wednesday called the market today steady to lower, while those who had cattle here Thursday and Fri-

day called today's market strong to 15 cents higher, more in some cases. Receipts were 6,500 head, one-fourth a normal September Monday supply, and one-half as many as were expected, but a liberal supply is looked for later in the week. Stockers and feeders sold 10 to 25 cents higher.

Beef Cattle.

Nobody risked any prime cattle for today's market, although as things are now shaped the eleven-dollar quotation is effective on the right kind. Grass steers got feeder competition up to \$7.50 today, and middle-class grassers sold at \$7.15 to \$7.65. Good wintered steers experienced some slowness, and disagreement as to values promised to carry some cattle over. Sales in this class were made at \$8.00 to \$8.75. Southern Kansas and Oklahoma steers sold at \$6.25 to \$7.25, and 11 loads of Utah steers weighing 995 pounds sold to killers at \$7.00. Order buyers were unhampered today, and took a good many cattle. Cows sold up to \$7.00, good Idaho cows at \$6.40, medium grass cows at \$5.50 to \$6.00.

Stockers and Feeders.

Not many outside buyers were here, but yard traders were active and paid higher prices, taking grass steers in competition with killers up to \$7.50. The range supply was very light, but good to choice yearlings would have found quick sale at 25 cents higher prices, plain cattle steady to strong. Best yearlings are worth up to \$8.25, bulk of the stock steers \$6.25 to \$7.99, feeders \$6.75 to \$7.75, with occasional demand for fleshy steers up to \$8.25.

Hogs.

Prices were unevenly higher, some hogs held from Saturday bringing an advance of 25 cents. Most of the sales were 15 to 25 cents higher, with a top of \$10.80, receipts less than 4,000 head. Order buyers led, paying the top price for middle-weight hogs, and \$10.75 for lights, but packers stopped at \$10.70. The small supply, of course, limited quality, as well as prevented the demand from extending itself. The situation is very strong, as stocks of product show a sensational decrease for August, and supplies of live hogs are running lighter than in recent weeks.

Sheep and Lambs.

Four thousand was the supply today, and prices were 15 to 25 cents higher, top lambs \$10.50, best natives \$10.00, fat ewes \$7.00. Supply from the range country will be light this fall, and markets will be uneven, the advantage generally with the seller. A fair number of Utah lambs will be offered this week, and there will be a chance at a good variety of feeding stock, feeding lambs now selling at \$9.65 to \$10.10,

and breeding ewes a shade lower than heretofore, at \$7.00 to \$9.00.

J. A. RICKART,
Market Correspondent.

PLANNING A SHEEP BARN.

By M. F. MILLER,
Missouri Agricultural Experiment
Station.

It is impossible to suggest any very definite sheep-barn plans without knowing under just what conditions the barn is to be built, but Professor H. Hackedorn, of the Missouri College of Agriculture, makes some general suggestions. He says: "In planning barns or sheds for a breeding flock of sheep, a space of 10 or 12 square feet per ewe will give sufficient room. The essentials of shelter for sheep are: (1) dry floor, (2) good roof, (3) an abundance of fresh air, (4) avoid drafts, (5) avoid narrow doors and passages so ewes heavy with lamb will not be injured, and (6) provide sufficient feeding-trough space so that all the sheep can eat at the same time.

"We find that a shed of 25 or 30 feet as long as necessary to house the flock gives very good results at the Missouri Agricultural Station. It should open on the south and may be built with a feed trough and feed alley along the north side. Economy of rack space may be gained by the use of movable racks, so arranged as to make as many as are needed in the shed. These partition racks can be moved out of the way whenever a wagon is driven in to be loaded with manure. The shed should be high enough to provide plenty of loft room. As we feed baled hay, a loft five feet high at the eaves gives us room enough to store a winter's supply for the flock, but if loose hay is put in and fed correspondingly, more loft room must be provided."

**MODERATE LIVING BRINGS
HONOR OF PERFECT HEALTH.**

What profiteth a man if he gain the whole world yet lose his health?

Naturalists say that long ago the prehistoric waters were infested with a species of enormous shark which finally became extinct by reason of the workings of its voracious appetite. Thus Nature eliminates the over-fed.

The desire for ease of life and plentiful diet is universal and is the great stimulus of man and animals alike. When man becomes greedy and takes more ease and food and drink than is his share, Nature discards him.

In the race for power and place, for ease of circumstance and relief from

the stimulus of hunger, the modern man is apt to forget that unless he is careful of his body he will soon be made to suffer for the infraction of Nature's inexorable physical law. With the loss in body tone comes an equal loss in mental faculty, and the brain which for a time was able to operate despite the complaints of an over-fed, under-exercised, self-poisoned body, stops working.

Statisticians have discovered that mortality rate of persons in the United States over 45 years of age is increasing. The strenuous life of today is not alone responsible for this. Lack of health-giving exercise, superfluity of diet, lack of restoring sleep, over-stimulation, the high pressure of the race for power, wealth and position, plus physical neglect—these bring early decay. The goal is reached, wealth is amassed—honor, position and power are just being grasped when the apple of accomplishment turns to the ashes of dissolution. The brilliant mind becomes clouded, the steady hand is no longer accurate, the eye which once gazed fearlessly on the whole world is dimmed, and it is not long before the final break-up occurs. All of this was entirely preventable.

Other things being equal, it is the man who leads the well balanced life who lasts the longest, whose work to the end is uniformly the best, he who neither over-works nor over-plays, neither over-eats, over-drinks, nor over-sleeps, he who maintains a standard of simple healthy diet in moderation, who offsets mental work with physical recreation, who is as honest with his own body as he is with his own business. When success comes to such an one his physical and mental condition is such that he can enjoy in peace of mind and contentment of body the fruits of his labors.

The regulations of the U. S. Public Health Service state: "It is the duty of officers to maintain their physical as well as their professional fitness. To this end they shall be allowed time for recreation and study whenever

their official duties will permit." If the Government regards it as essential that its sanitary experts shall be safeguarded in this way, is it not equally important to every citizen that he similarly maintain a high standard of physical integrity?

WIT AND HUMOR.**No Children Allowed.**

"Have you any children?" demanded the landlord.

"Yes," replied the would-be tenant, solemnly, "six—all in the cemetery."

"Better there than here," said the landlord, consolingly, and proceeded to execute the desired lease.

In due time the children returned from the cemetery, whither they had been sent to play.—Sunshine Bulletin.

The Colonel eyed the piece of meat critically a moment.

"Feigner," he said, judiciously, "your ingenuity reminds me of a conversation I heard the other day in a Brownsville hotel. The head waiter of the hotel came over to the man sitting opposite me and genially inquired of the guest: 'And how did you find your steak, sir?' 'Why,' responded the man, 'I just rolled over the potatoes—and there it was.'"

As It Is Today.

Penitentiary Guard—"Convict 411 is not in his cell, sir!"

Warden—"That's all right! He's still hunting for the ball he lost on the

links this afternoon!"—Life.

The Contrast.

"I gorry, I'm tired!"
"There you go! You're tired! Here I be a-standin' over a hot stove all day, an' you wurkin' in a nice, cool sewer!"—The Masses.

"I want to get this check cashed," said the young wife to the paying teller at the bank.

"Yes, madam; you must indorse it, though."

"Why, my husband sent it to me. He is away on business."

"Yes, madam. But just indorse it. Sign it on the back, please, and your husband will know we paid it to you."

She went to the desk and in a couple of minutes came back with the check indorsed:

"Your loving wife, Edith."

Experts of the Forest Service estimate that the farm woodlots of the United States contain from 200 to 300 billion board feet of lumber and from one to one and a half billion cords of wood.

On some of the National Forests of the Northwest the snow lay on the ground longer this spring than for many years. In consequence stockmen have been considerably delayed in getting their herds on the ranges.

Black and White at THE REXALL STORE.

NEW LAUNDRY

I have opened a home laundry in the east part of town. Have expert help, and my purpose is to do good, clean work and get the money. Will call for and deliver goods at any time you wish. Phone L. J. Warren for me. Country people can leave bundles at Warren's store.—G. J. MILLER, East Plainview.

POULTRY**POULTRY**

We will have a poultry car in Plainview, Monday, Tuesday and Wednesday, September 11th, 12th and 13th, and will pay you the following prices in cash for your poultry delivered at our store:

Hens, per pound	13c
Friers, per pound	15c
Ducks, per pound	8c
Old Cocks, per pound	5c
Guineas, each	15c
Turkeys, per pound	12c

Now is a good time to cull your bunch and sell off your old hens and at the same time get top prices.

White Crest Flour Talk

WE just want to say a few words about WHITE CREST FLOUR. Most of you know that the 1915 wheat crop was very badly damaged, especially the soft wheat of the Missouri Valley from which WHITE CREST and practically all high grade soft wheat flours are made. The 1915 crop was the worst wheat that has been in that belt for years, the mills say it was the sorriest wheat that was ever raised there.

This being the case WHITE CREST was not as good flour as it should have been, however it was then better than most any flour sold on this market.

It takes the very best wheat to make the best flour. White Crest Mill could not get the best wheat as it could not be had.

CONDITIONS ARE DIFFERENT NOW.

The 1916 crop of soft wheat is as good as was ever raised and White Crest is as good flour as was ever put in a sack. We have just unloaded a car of WHITE CREST MADE FROM THIS GOOD WHEAT AND IT IS SURE FINE.

WHITE CREST flour has been used by hundreds in this country for several years and some customers quit using it in the past year on account of it not being up to the usual high standard. We would like for you to try it again and will guarantee it to be as good as in former years and to give you entire satisfaction.

WHITE CREST is a pure soft wheat flour and will make better biscuit or pastry than any blend of hard and soft wheat.

Our GILT EDGE, a pure hard wheat, is best for light bread. We guarantee it the best hard wheat flour in Plainview.

We guarantee WHITE CREST to be the best soft wheat flour in Plainview.

The Plainview Evening Herald

—PUBLISHED EVERY TUESDAY AND FRIDAY EVENING BY—
THE HERALD PUBLISHING COMPANY,
Corner Broadway and Second Sts.

HEMBERT S. HILBURN, Editor E. B. MILLER, Business Manager

Entered as second class mail matter July 1, 1914, at the Post Office at Plainview, Texas, under the act of March 3, 1879

\$1.80 a Year; 75c, 6 Months. Advertising Rates on Application.

DIDN'T KNOW THE WEEDS WERE SO BAD.
"I didn't know the weeds in my alley were so bad," said a prominent citizen of Plainview when one of the city officers called his attention to the matter. "I'll certainly have them cut right away."
Do YOU know how bad the weeds are in YOUR alley and in YOUR yard? Look them over. If they are desirable and worth keeping, leave them alone. If they are not—
Let's make Plainview a clean, healthful, beautiful city!

THE TEETH AND HEALTH.
Health depends largely on the teeth. You will find scores and scores of youngsters in Plainview whose teeth are kept in poor condition. The habit of caring for the teeth, once formed, is almost instinctive. The child taught when it is young to care for its teeth will keep the habit up.
The recommendations of a specialist in a household column of one of the great daily newspapers are worth while:
"Dentists say that it takes time to clean the teeth properly; that the vertical movement should be used instead of the usual horizontal one; that after the powder or paste application there should be a final brushing with clear water, so that every jot of foreign substance may be removed."
"Nearly all powders contain borax, an element which is very cleansing, but bad for the enamel. Charcoal, too, though cleansing and possessing antiseptic qualities, is bad for the enamel, for it can not be pulverized fine enough to rid it of the needlelike particles of the fibers."
"Salt is good, though if used too strong by people with sensitive gums is liable to smart painfully. One dentist recommends common baking soda as the best dentifrice known to science."
"It is, of course, pure alkaline, and is thus a neutralizer of the acid condition of the mouth; if rubbed on the tooth just at the gum margin it cures that sensitiveness which is often so distressing even when there is no actual decay."
"In case of pyorrhea it may be used as an antiseptic mouth wash in connection with the regular prescriptions given by one's dentist."
"Another good dentifrice is from the old English recipe of orris root, English prepared chalk and pulverized eucalyptus leaves."

So, also, has the prejudice against spring lambs given away, until the demand is growing faster than the population; and it has raised the price until a fat lamb is worth more than its mother, and yet they are only commencing to value a ewe lamb more than a wether lamb, and thereby save them from slaughter.
The number of sheep in the United States a few years ago was one for each man, woman and child. Now there is only one-half a sheep for each person. Nearly all countries of the world have decreased their sheep. Australia, the largest sheep country in the world, passed through a drouth that lasted eight years and reduced her sheep to a comparatively small number. Since that time she has been increasing until about two years ago, when another drouth set in, and she has lately lost nearly half as many sheep as are in the United States today.
The war has swept off the goats, and Turkish mohair is going out of sight, and it looks like there will be many sheep bred to death for the same cause.
If the man with the hoe has broken up our cattle ranges and caused a great and lasting boom in cattle, why is it not reasonable to conclude that sheep will be affected the same way? The fact is, sheep have not had a boom for about forty-six years, which came following the war that we know something about. Soldiers in the trenches and out in all kinds of weather have to have wool clothing to protect their health. Now, it is about time for us to wake up to preparedness on this line, for we are dependent on other countries for half the wool we use.
Sheep prices will continue to advance if wool continues to rise, for the reason that as wool rises in value people figure on how much they will get in the spring from wool, and each one holding a few more sheep on account of big prices for wool reduces the number to say to market. Yes, but you may say, "Free trade may continue, the war will stop, the embargo on wool will be raised and wool will go down." Great Britain and Germany are watching each other. Each wants to control the commerce of the world after the war is over. To control commerce they must have the manufactured goods on hand and the ships to carry the goods. Great Britain, though she has lost many ships, still has the largest number, but Germany has most all hers intact. Therefore, it all depends on who can get the raw material. Great Britain is forming the most gigantic combine with the Allies the world has ever seen to get the raw material, give their people employment in factories, and keep Germany from getting it long after the war is over. And with an embargo already on in all of her scattered possessions, she is going to make the United States pay dearly for all her raw stuff. They have got to cripple Germany in her shipping facilities before the struggle can end, or Germany will not be hurt much and will soon be after supremacy again. This war will not be given up until one side or the other is exhausted.
Now if these reasons are sound, sheep are going to have their turn at high prices for a long time to come, war or no war.

Food For Thought

A man he seems of cheerful yesterdays
And confident tomorrows.
—Wordsworth.

The world knows only two, that's Rome and I.—Ben Johnson,
"Sejanus."

A wise man may traverse the whole earth, for all the world is
the fatherland of a noble soul.—Democritus, "Ethica."

A TASK!

To be honest, to be kind; to earn a little and to spend a little less; to make upon the whole a family happier for his presence; to renounce when that shall be necessary and not to be embittered; to keep a few friends, but these without capitulation; above all, on the same grim condition, to keep friends with himself, here is a task for all that man has of fortitude and delicacy.—Robert Louis Stevenson.

When you are offended at a fault in someone else, turn at once
and consider what similar fault you are guilty of yourself, such as love of money, or of pleasure, or of glory or the like. For by fixing your attention on this, you will quickly forget to be angry, particularly if the thought is added that he cannot help himself.—Marcus Aurelius.

The worst thing about dreadnaughts and armies and military
and naval reviews and sham battles, is their psychological effect. They create a permanent hypnotism, a permanent obsession of the people. They create a deep-seated admiration for war; they idealize war, blind men to its horrors and its folly; thus they produce a permanent madness.—J. T. Sutherland.

LET SOMETHING GOOD BE SAID.

When over the fair fame of friend or foe
The shadow of disgrace shall fall, instead
Of words of blame, or proof of this and so,
Let something good be said.

Forget not that no fellow being yet
May fall so low that love may lift his head:
Even the cheek of shame with tears is wet,
If something good be said.

No generous heart may vainly turn aside
In words of sympathy; no soul so dead
But may awaken strong and glorified,
If something good be said.

And so I charge ye, by the thorny crown,
And by the cross on which the Savior bled,
And by your own soul's hope for fair renown,
Let something good be said!
—James Whitcomb Riley.

FARMERS AT HALFWAY BUSY SOWING WHEAT.
HALFWAY, Texas, Sept. 8.—We are having plenty of rain. In fact, farm work has been delayed to some extent by the amount and frequency of the rains. Crops are looking fine and the farmers are all busy sowing wheat.
The health of our community is fine. There has been no illness of much consequence at any time during the summer.
G. W. Lewellen returned from Hillsboro last Friday.
Mrs. G. W. Lewellen and children

have moved to Plainview, to be near school.
John and Marion Ralls, of Center Plains; Misses Lena and Essie Hooper, of Mayfield, and Willie Cornelius and Steward Scales, of West Side, attended the party at R. L. Hooper's on last Friday evening.
Mr. and Mrs. Chas. Smith have been in attendance at the Teachers' Institute this week.
R. L. Hooper and family, Mrs. N. K. Smith and children, Mr. and Mrs. W. W. Pinkerton, Wm. Barrett and Nine McComas and family all attended the Teachers' Institute on Wednesday.
Mrs. Wm. Barrett is spending the week with her sister-in-law, Mrs. Joe Barrett, of Plainview.
Prayer meeting was revived here again on last Sunday night, and there was a splendid attendance.

TODAY'S FORT WORTH MARKET.
FORT WORTH, Texas, Sept. 8.—HOGS—2,200; opening steady; prospects, top \$10.80; bulk \$10.55 to \$10.75; late top yesterday, \$10.85; light \$10.00 to \$10.70; mixed, \$10.55 to \$10.70; heavy, \$10.65 to \$10.80; pigs, \$7.00 to \$8.00. CATTLE—2,000, including 200 calves; steady. SHEEP—2,400, including 1,600 through; steady.

NEW FEDERAL CIRCUIT COURT VOTED BY SENATE.

At the suggestion of Senator Chas. A. Culberson, of Texas, the United States Senate has passed a bill creating a fifth Federal judicial circuit in Texas, with headquarters at El Paso. The measure is now pending before the House Committee on the Judiciary. In addition to El Paso, court will also be held in Amarillo, Lubbock, Pecos and San Angelo.

Reader's Forum

The Sheep Outlook.

The question arises, will high prices be maintained? Not many years ago there was a great prejudice against mutton in this country, and the demand for hot-house lambs in the great city of New York could be supplied by a few lambs. Now it has grown in all our cities to be in great demand.

So, also, has the prejudice against spring lambs given away, until the demand is growing faster than the population; and it has raised the price until a fat lamb is worth more than its mother, and yet they are only commencing to value a ewe lamb more than a wether lamb, and thereby save them from slaughter.

The number of sheep in the United States a few years ago was one for each man, woman and child. Now there is only one-half a sheep for each person. Nearly all countries of the world have decreased their sheep. Australia, the largest sheep country in the world, passed through a drouth that lasted eight years and reduced her sheep to a comparatively small number. Since that time she has been increasing until about two years ago, when another drouth set in, and she has lately lost nearly half as many sheep as are in the United States today.

The war has swept off the goats, and Turkish mohair is going out of sight, and it looks like there will be many sheep bred to death for the same cause.

If the man with the hoe has broken up our cattle ranges and caused a great and lasting boom in cattle, why is it not reasonable to conclude that sheep will be affected the same way? The fact is, sheep have not had a boom for about forty-six years, which came following the war that we know something about. Soldiers in the trenches and out in all kinds of weather have to have wool clothing to protect their health. Now, it is about time for us to wake up to preparedness on this line, for we are dependent on other countries for half the wool we use.

MRS. JACK HAWLEY BETTER AFTER RECENT OPERATION.

Mrs. Jack Hawley is slightly improved after an operation made at St. Anthony Sanitarium, in Amarillo, early in the week.

MEYERS COMING BACK.

C. F. Meyers, formerly general manager of the Texas Land and Development Company, is due to arrive in Plainview Monday. Mr. Meyers has been with a Cuban railway since leaving Plainview, a few months ago.

GOOD LOCAL RAIN.

A good rain fell Wednesday night in the Plainview country. South of Plainview, in the Petersburg community, there was a very heavy rain. The rain was lighter in Plainview than in the south part of the county.

TEXAS HEAT PREFERRED TO THAT OF NORTH.

The intense heat of Chicago is distressing to persons from Texas, according to Miss Nelle Sansom, who has recently returned from a stay in the "Windy City," where she studied piano and voice. Hundreds of persons died each day during her visit from heat.

THE OLTON SCHOOL BUILDING ALMOST READY FOR OCCUPANCY.

The new school building at Olton is almost ready for occupancy, according to Professor D. M. Green, who is here attending the Hale and Lamb counties teachers' institute. The plasterers are at work now. When the building is ready a school rally will be held there.

DOES NOT WANT CONTRACT.

Geo. Martin, contractor, who was awarded the contract Monday night for the construction of the Presbyterian Church, has notified the chairman of the building committee that oversight in the calculation of the cost of the building will make the contract a losing proposition for him. He has asked to be released from the contract.

SCHOOLS OPEN MONDAY.

The Plainview Public Schools will open Monday morning. The temporary buildings on the Westside grounds have been completed, and the seats and other furniture are expected today. Tonight the members of the faculty and the board of trustees are holding a get-acquainted meeting at the Methodist Church.

WILL HAVE HALE COUNTY HOGS IN AMARILLO FAIR.

A show herd from the Helen-Temple Farm will be sent to Amarillo next week for the Panhandle State Fair, which is to be held September 12-16. Geo. R. Quesenberry, manager of the farm, believes he has a good herd, one of the best show herds the farm has ever had, and hopes to bring back some of the premiums.

FOX SUCCEEDS KOUNS.

F. T. Fox, of Amarillo, general manager of the western lines of the Atchison, Topeka and Santa Fe Railway, has been appointed general manager of the eastern lines. Mr. Fox is well known to Plainview business men, and has many warm personal friends here. R. J. Parker, general superintendent, of Topeka, becomes general manager of western lines, to succeed Mr. Fox.

SANTA FE WILL NOT OBSERVE THE NEW EIGHT-HOUR LAW.

A statement has been issued to the public by E. P. Ripley, president of the A. T. & S. F. Railway Company, that the Santa Fe does not intend to comply with the requirements of the Adamson eight-hour law, recently enacted by Congress to avert a threatened railroad strike, and does not intend to do so until ordered by the court of last resort.

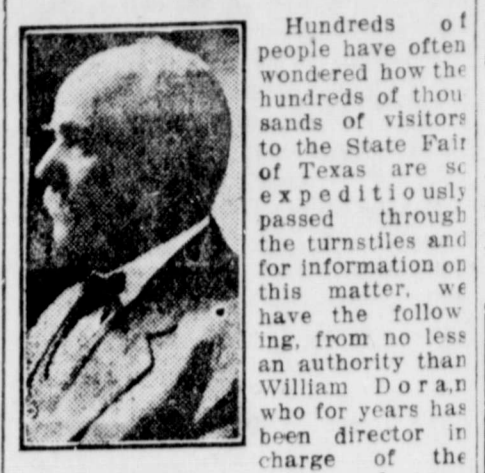

STUDENTS MAY HAVE TO STAY WITH TEXAS NATIONAL GUARD.

Members of the Texas National Guard who are students in the colleges and universities will probably have to remain in the service until their companies have been demobilized, is the gist of a dispatch from Washington quoting Congressman McLemore, who has recently conferred with Secretary of War Baker on the matter.

OKLAHOMA MAN TO OPEN NEW GROCERY IN DORSETT BUILDING.

T. L. Gordon, formerly of Frederick, Okla., is arranging to open a grocery and feed store in the Dorsett Building, formerly occupied by the Plainview Buggy Co. The store room is being thoroughly overhauled to accommodate the business of Mr. Gordon. Mr. Gordon and his family moved to Plainview about two months ago.

NEW STATE FAIR TURNSTILES TO HANDLE LARGE CROWDS

Hundreds of people have often wondered how the hundreds of thousands of visitors to the State Fair of Texas are so expeditiously passed through the turnstiles and for information on this matter, we have the following: from no less an authority than William D. Doran who for years has been director in charge of the gates and turnstiles at the State Fair of Texas. "It is a little confusing to even a close observer," said Mr. Doran, to find out how Fair crowds are handled at the gates, and for the information of those who care to know I would say that all possible speed in admitting visitors is secured through the use of the new automatic cash turnstiles with which all entrances to Fair Park are equipped. These turnstiles operate by placing a coin in the proper receptacle, and the number of entrants is automatically registered. There is consequently, no confusion in making change or buying tickets, and we are able to pass crowds through at a rapid speed. I might say, in this connection, that we have made our plans for this year to take care of a million visitors, and I confidently expect the total of visitors to reach that figure."

MACHINERY EXHIBITS LARGEST IN STATE FAIR'S HISTORY

Many thousands of annual visitors to the State Fair of Texas, who go to Dallas particularly to see the newest and most improved specimens of farm implements, vehicles and machinery will be rewarded this year by a bigger and better display than has ever before been seen at any Fair. J. C. Duke, director in charge of this department, states that there is every reason to believe that there will be more exhibitors in line this year than ever before, and that the exhibits will be more interesting and more valuable than formerly. Particular attention will be paid this year to tractors, as this is an item of farm machinery in which the farmer of the Southwest is vitally interested. It is stated that practically all of the manufacturers of the popular models have made application to the Fair management for space in which to exhibit their tractors. A feature of the tractor exhibits which is expected to be of much interest to Fair visitors this year will be the showing of the various belt operations possible on the good modern tractor. Farmers of this section had an opportunity recently at Dallas, to see and compare the draw-bar possibilities of the various machines, but the belt operations have never been jointly shown in this section. The Implements and Vehicles divisions will be complete with a showing of everything that is latest and best in those lines, and it is quite sure that the farmers of the Southwest can find much of profit in the exhibits in this department of the State Fair of Texas this year. The dates set for the Fair are October 14 to 29, inclusive.

J. Neil Goggans, L. A. Wicks and Mr. and Mrs. Hugh Goggans, of Ralls, were here yesterday.

L. L. Johnson, agricultural demonstrator for the Panhandle and Santa Fe Railway Company, came up from Lubbock today.

J. F. Lagot and family, of Quitaque, were here yesterday.

Lee S. Evans and family, of Midland, were here today. They were riding in a large Cadillac "eight."

SOCIETY

Telephone Number 72

ANNOUNCEMENT.

The Epworth League of the Methodist Church will give a social this evening on the lawn at the home of Mrs. F. P. Powell, 315 Beech Street.

The Benevolent League will meet Wednesday afternoon at three o'clock, in the Mayor's office, at the City Hall.

WEDNESDAY BRIDGE CLUB.

Mrs. Robert Malone entertained the Wednesday Bridge Club Wednesday afternoon. Three tables were arranged for bridge. Miss Celestine Harp won high score.

At the conclusion of the games an ice course was served.

The next meeting of the club will be with Miss Harp.

FOR GUESTS FROM DALLAS.

Mr. and Mrs. H. T. Sharp, of Dallas, were guests of honor at a six-o'clock dinner given Tuesday evening by Mr. and Mrs. Thomas Abraham, at their home, on Boswell Heights.

A delightful three-course dinner was served to Mr. and Mrs. Sharp, and Misses Grace and Martha Thomas, Burr and Josephine Goode and Mrs. Oda Thomas.

PHILLIPS-OWENS.

Yesterday morning at eight o'clock, at the home of Mr. and Mrs. L. M. Faulkner, was solemnized the marriage of Miss Mildred Phillips and Alford V. Owens, of Eldorado, Texas. Rev. J. W. Story pronounced the ceremony, in the presence of only a few relatives and close friends.

The bride is a daughter of Mrs. Cora Phillips and a sister of Mrs. L. M. Faulkner.

Mr. and Mrs. Owens left on the nineteenth train for Eldorado, where they will be at home.

FOR MILDRED SHOFNER, WHO LEAVES FOR NEW HOME.

A delightful party was given by Miss Dixie Biles, at her home, on West Eleventh Street, Wednesday night as a compliment to Miss Mildred Shofner, who left yesterday for her new home, in Port Lavaca, Texas.

Music and games gave pleasure during the evening.

Those present were: Misses Mildred Shofner, Maurine Richards, Wil-

lena Winfield, Ruth Towery, Sarah Sue Landers, Ollidene Doubleday, Sayde Earl Adams, Gladys Speer, Ena and Gertrude Reeves and Dixie Biles; Messrs. Arthur Reinken, Newton and Claude Gilbert, Lonnie Sewell, Chauncey Gidney, Albert Garrett, Bob Doubleday, Curtis Mathes and Edgar McClendon.

PRESBYTERIAN S. S. CLASS GUESTS OF MRS. W. E. RISSER.

Mrs. W. E. Risser entertained the Bible Class of the Presbyterian Sunday School Wednesday evening, at her home, 707 Denver Street.

A pleasant, social afternoon was spent, and during the afternoon a business session was held.

Before the close of the afternoon the hostess served dainty refreshments to the class and their teacher, Mrs. T. P. Whitis.

THE MYSTIC CLUB.

Mrs. L. Lee Dye delightfully entertained the Mystic Club Saturday afternoon, at her home.

The house was prettily decorated in dahlias, goldenglows and white clematis, carrying out the club colors of white and gold. In the refreshments the color scheme was also observed. White and yellow cake and lemon snow with whipped cream and pineapple were served.

The meeting was one of interest and delight.

Those present other than the club members were Mesdames T. J. Finnie and W. W. Connell.

MUSICAL PROGRAM METHODIST CHURCH, SUNDAY, SEPT. 10.

The following is the musical program at the Methodist Church for Sunday, September 10th:

WHERE PEOPLE WHO DRESS BEST TRADE

Dress Styles That Are Distinctly Fall 1916

The popularity of our new dresses is already attested for the styles have been greatly admired and many garments have been delivered to the homes of the city's elite.

The loveliest styles continue to arrive and are immediately placed on display.

From our lines may be selected a garment for almost any occasion. The choicest materials and combinations are shown. All wool serge and silk dresses are priced from \$7.50 upward.

EUGLO SOCIETY ENTERTAINS.

Thursday evening the Euglo Society of the Wayland Baptist College entertained the faculty and student body with an informal reception.

Entertaining and helpful talks were made by a number of the students. Harry Beauchamp, president of the society, made an address. Professor R. M. Crabb delighted the guests with a violin solo, and a number of pleasing piano selections were contributed by Misses Ziegler and Mildred Farmer. The entire evening was one of pleasure.

"AS YOU LIKE IT" CLUB.

Mrs. H. C. McIntyre entertained the "As You Like It" Club yesterday afternoon, at her home, 810 Baltimore Street.

In response to the roll call, the members gave an original verse of four or more lines on Shakespeare, some of his characters or something pertaining to his life.

The roll call was followed by a sketch of the poet by Mrs. McIntyre. Mrs. Geo. Hutchings gave a reading on Cleopatra, and another reading from Shakespeare was given by Mrs.

E. F. McClendon.

Victrola music also added to the pleasure of the afternoon.

At the conclusion of the program, brick ice cream and angel-food cake were served. In the refreshments the club colors of orange, white and green were effectively used.

The first regular meeting for the club year will be held in the club room at the City Hall Thursday afternoon.

CENTRAL MOTHERS' CLUB MEETS FRIDAY AFTERNOON.

The program for the meeting of the Central Mothers' Club, at Central Building, Friday afternoon, September 15, at 4 p. m., follows:

Song: Roll Call.
Music—Miss Ruby Hatcher.
Reading—Miss Effie Murphy.
"What Other Mothers' Clubs Have Done"—Miss Myrtle Jackson.
"Our Club and Its Aim"—Mrs. Fred Brown.
Business.
Social Hour.

Every mother interested in her child's welfare is urged to be present.

Mrs. J. H. McKee returned this morning to her home, in Amarillo, after a few days here on business.

Alva Hooper, Bert Vaughn, Don Wallen, Clifford Shook, Richard McWhorter, Ray Blakemore and John Mathes attended the races at Spur Wednesday, returning Thursday morning.

Rev. A. L. E. Weber returned today from a trip to Central Texas.

Kelly Hooper is recovering from a minor operation which was made in Amarillo Tuesday.

Mrs. Beulah Hoyle Kier, one of Plainview's sweetest singers, who has been continuing her musical studies in Fort Worth since her residence there, will sing at the Methodist Church, next Sunday, at the morning service.

W. B. Tinsley, of the Texas Utilities Company, has been in Floydada for the past few days.

Frank Stapp, of Falls, is here today on business.

Professor E. C. Nelson, of Floydada, was a visitor in Plainview today.

L. E. Ensign, of Olton, was here today.

Carl Goodman, of Abernathy, was in Plainview today on business.

Misses Juanita and Opal Marchman arrived in Plainview Thursday morning. They will go from here to Lockney for a few days, and then will go to Amarillo, where they will be at home with their parents.

Miss Wilhelmina Harrington left yesterday for Plano, Texas, where she will visit with relatives, after which she will enter the Texas Woman's College, Fort Worth.

J. J. Lash returned home this morning, after a few weeks' visit in Nebraska.

Miss Ethel Greenwood, of Colorado City, Texas, who has been the guest of Miss Cora Rountree, left yesterday morning for her home. She was accompanied by little Miss Mona Rountree, who has been visiting here.

Mrs. M. S. Montgomery, of Amarillo, came in yesterday for a visit with Mr. and Mrs. J. P. Duncan.

Mrs. Emma Spilner, of Flora, Indiana, and Morris Keys, of Paris, Ill., arrived yesterday for a visit in the home of Mr. and Mrs. E. S. Keys.

Mr. and Mrs. H. A. Keys, of Lockney, are visiting in the home of Mr. and Mrs. E. S. Keys.

Mrs. M. L. Young left Saturday for Denison, Texas, to be with her mother, Mrs. V. E. Harris, who is very low.

Miss Madge May left Thursday morning for Plano, where she will visit. She will also visit in Rockwall, Texas.

Miss Gertrude Maynard, who for the past several months has been chief operator at the local office of the Southwestern Telephone Company, left Thursday for Sweetwater. She will be located there. Miss Dottie Wilson will be chief operator of this office.

Mr. and Mrs. S. H. Pegson left Thursday morning for Brownwood, where they will visit for some six weeks.

Miss Frances Griscoon left Wednesday for her home, in Weatherford, after a visit with relatives here.

Mrs. H. M. Fletcher, of Buchanan, New Mexico, who has been visiting the past three weeks with her daughter, Mrs. Oliver Anderson, returned home Wednesday.

Miss Raye Fowler is visiting her sister, Mrs. R. W. Elliott, of Petersburg.

W. A. Shofner and Reynolds and Mildred left Thursday morning for Port Lavaca, Texas.

Mrs. W. B. Lewis went to Crosbyton this morning to visit with her sister, Mrs. S. J. Dendy.

H. T. Sharp left this morning for his home, in Dallas, after a visit in the home of Mr. and Mrs. R. J. Goode.

Mrs. F. L. Barnes, of Houston, who is visiting here with her sister, Mrs. E. F. McClendon, went to Amarillo this morning for a few days' visit. She was accompanied by Miss Martha McClendon.

William Clark, of Owatana, Minn., left Wednesday for his home.

Dr. Hagood, a former resident of Plainview, arrived Wednesday morning from Southern Texas for a visit with relatives and friends.

A. J. Crager went to Lockney Monday, where he has taken charge of Akers' second-hand store.

Miss Myrtle Palmer went to Abernathy Wednesday.

Miss Annie Butterfield, who has been spending the summer in Canyon, arrived in Plainview Wednesday.

Dr. J. W. Grant is in El Paso visiting with Mrs. Grant, who is in a sanitarium there.

Dennis Heffelfinger left this morning for Oklahoma City on business.

R. A. Drum left this morning for Dallas on business.

Mrs. J. L. Vaughn accompanied her son, Earl Jo Amarillo this morning for surgical treatment.

W. Y. Price and family were here today from their farm near Hale Center.

L. E. Ensign, of Olton, was here today.

Sim Sheffy went to the Estes Ranch today to arrange for marketing part of his wheat crop.

Mr. and Mrs. W. E. Brittain, of Merkel, Texas, came in yesterday afternoon for a visit with Mr. Brittain's parents, Rev. and Mrs. G. I. Brittain, and family.

W. M. Turner, of Lubbock, has been here for the past few days on business.

Mrs. C. E. Howard, of Lubbock, was here Wednesday.

Jno. Armstrong, of Hutchinson, Kan., and Tony Chism, of Amarillo, were here Thursday en route to Amarillo from Spur, where they attended the races. They were interested in the Hudson Super Sixes which entered the races there, Armstrong having ridden in one of the cars.

J. D. Moore, of Sweetwater, was here Thursday.

Mr. and Mrs. Geo. A. Magee and Chas. K. Ritter and mother, of Philadelphia, Penna., were here Thursday.

Otis Trulove is here from Amarillo on business. He has a number of cases in the District Court.

Geo. Doubleday and family have been visiting in Crosbyton.

J. W. and Grady Pipkin, P. B. Randolph, H. S. Hilbarn and Byron and Pat Brown attended the Dickens County Fair, at Spur, Wednesday.

Mrs. J. J. Clark had as her guests at luncheon yesterday Misses Wilma Mills and Maude Dotson, of Olton, and Mrs. Cora E. Pritchett.

Miss Celestine Harp spent the week end in Amarillo.

Mrs. Ira Little and mother have returned home, after a few days' visit with relatives and friends in Amarillo.

Judge W. E. Gee, of Amarillo, was in Plainview the latter part of last week.

Miss Maude Dotson, of Olton, is a guest of Mrs. J. J. Clark.

Figure this out for yourself

You order a suit made up for you. Rarely is it done within a week. Often there are vexatious delays.

You judge how the suit will look from a *sample* of cloth which often looks very different in the finished suit.

That's one way to get clothes.

The other way is—*see your whole suit before you buy it.*

Which means—see how the lines suit you, see how the fabric becomes you, be certain of the final fit and get the suit without trips back and forth which eat up valuable time.

Kirschbaum Clothes

\$15, \$20, \$25 and up

SEE THE GUARANTEE AND PRICE TICKET ON THE SLEEVE

Kirschbaum clothes are scientifically proportioned for the five physical types of men—the normal, the tall, short, stout, and stocky figures. The coats of each model are perfected through fittings on human models. In all our experience we have never found better-fitting clothes.

And finally—there is a style and a quality guarantee which is not duplicated in any other clothing made.

See us for ten minutes tomorrow.

IN AN AUTOMOBILE.

By MAURICE MAETERLINCK.

On the great sea steamers subdue it day after day; but the sea is so vast that the extreme speed our frail lungs were able to endure could achieve no more than a kind of motionless triumph. And again, as we travel by rail, and Space flies submissive before us, it is still far away—we do not touch it, we do not enjoy it—It is like a captive adorning the triumph of a foreign king, and we ourselves the feeble prisoners of the power that has dethroned it. But here, in this little chariot of fire, that is so light and so docile, so gloriously untrifling; here, beneath the unfolded wings of this bird of flame that flies low down over the earth in the midst of the flowers, greeting corn-fields and rivulets, inviting the shade of the trees; passing village on village, glancing at the open doors and watching the tables spread for the meal, counting the harvesters at work in the meadows, skirting the church, half hidden by lime-trees, and taking its rest at the inn on the stroke of noon—then setting forth once more, singing its song, to see at one bound what is happening among men at three days' march from the last place of halt, and surprising the very same hour in quite a new world—here Space does indeed become human, in the line of our eye, in accordance with the needs of our insatiable, exacting soul, that craves at once for the small and the mighty, the quick and the slow; here it is of us at last, it is ours, and offers at every turn glimpses of beauty that, in former days, we could only enjoy when the tedious journey was ended.

Now, however, it is not the arrival alone that causes our eyes to open, that revives the eagerness so precious to life, and invites admiration; now the entire road is one long succession of arrivals. The joys of the journey's end are multiplied, for all things adopt the admirable form to the end; the eyes are idle no longer, no longer indifferent; and memory, simplest of all the fairies whose touch of the wand brings happiness—memory, pondering silently on the less happy days that await every man, treasures the beauties of good mother earth; and fixes forever, among those possessors of which none can deprive us, the unexpected gifts that have been so abundantly offered by the glad hours and the enfranchised roads.

SCENIC BEAUTIES OF U. S. ARE THE BEST ON EARTH.

That the Americans who have been spending \$100,000,000 a year on European tours have been paying a heavy premium for their scenic beauty, and have been going an unnecessary distance to get it, is the discovery made by the United States Department of Interior in its inventory of the wonder spots of this country. It is exposing the self-victimization of our citizens in no uncertain terms, and is preaching the sermon of home consumption of American scenery.

"This Nation is richer in natural scenery of the first order than any other nation," declares Stephen T. Mather, assistant secretary to the Secretary of the Interior. "It possesses an empire of grandeur and beauty it has scarcely heard of."

The discovery of this grandeur and beauty by the motorists of this country is the sermon set for by National Touring Week, the automobile movement that has seized our Nation from the Atlantic Ocean to the Pacific strand. The impulse for a general outpouring of United States motorists to visit the natural beauty about them

which followed the inception of the movement indicates that the country is primed for a widespread appreciation of the scenic wonders of our homeland.

DOES COLLEGE EDUCATION PAY?—EXPERTS ANSWER.

AUSTIN, Texas, Sept. 6.—Does a college education pay? This question is answered in some statistics recently collected showing the salaries of the class of 1903 of the University of Texas, ten years after they left college. The women graduates the first year out of college averaged \$559; the tenth year, \$1,015. The graduates in pharmacy averaged the first year \$636; the tenth year, \$1,850. The engineering graduates averaged the first year \$857; the tenth year, \$2,008. The academic graduates (men) averaged the first year \$686; the tenth year, \$2,582. The law graduates averaged the first year \$668; the tenth year, \$2,812. The physicians averaged \$1,092 the first year, and \$4,467 the tenth year. It is thus seen that the women and the pharmacists average the smallest amount, while the doctors attain the largest income. All of them, however, after the lapse of ten years, are earning a competence.

Other statistics from fields outside of Texas show similar results. For example, for positions in the New York Bridge Department demanding of their holders only a knowledge of reading, writing and arithmetic, an average annual salary of \$982 is paid; while for positions demanding high-school training and three or four years of college work an average salary of \$2,400 is paid. Statistics of the distinguished men in America further give final confirmation of the fact that a college education does pay. Out of five million Americans with no schooling at all, only thirty-one attained distinction. In other words, a college education increases a child's chance of performing distinguished service eight hundred times over the child with no schooling.

ORIGIN OF "PETRIFIED FOREST."

The "Petrified Forest" of Arizona, really a series of petrified forests, lies a short distance south of Adamana, on the line of the Santa Fe Railway. There are four "forests," included in a Government reservation called "Petrified Forest National Monument," created by Presidential proclamation in 1906. The name "forest" is not strictly appropriate, for the petrified tree trunks are all prostrate and are broken into sections. The logs are the remains of giant trees that grew in Triassic time, the age of reptiles. The trees were of several kinds, but most of them were related to the Norfolk Island pine, now used for indoor decoration. Doubtless they grew in a near-by region and, after falling drifted down a water-course and lodged in some eddy or a sand bank. Later they were buried by sand and clay, finally to a depth of several thousand feet. The conversion to stone was effected by gradual replacement of the woody material by silica in the form called chalcedony, deposited by underground water. A small amount of iron oxides deposited at the same time has given the brilliant and beautiful brown, yellow, and red tints which appear in much of the material.

Some of the tree trunks are 6 feet in diameter and more than 100 feet in length. In the first forest there is a fine trunk that forms a natural bridge over a small ravine, the water having first washed away the overlying clay and sand and then, following a crevice, worked out the channel underneath.

The length of this log is 110 feet, and the diameter 4 feet at the butt and 1½ feet at the top.

The petrified woods are beautiful objects of study. When thin slices are carefully ground down to a thickness of 0.003 inch or less and placed under the microscope they show perfectly the original wood structure, all the cells being distinct, though now they are replaced by chalcedony. By studying the sections, F. H. Knowlton, of the United States Geological Survey, Department of the Interior, has found that most of these araucarian trees were of the species "Araucarioxylon arizonicum," a tree now extinct. It is known to have lived at the same geologic time also in the east-central part of the United States, where the remains of some of its associates have also been found. These included other cone-bearing trees, tree ferns, cycads, and gigantic horse-tails, which indicate that at that time the rainfall was abundant.—U. S. Geological Survey.

PROF. DUNN BACK FROM SPAIN.

AUSTIN, Texas, Sept. 6.—Professor William E. Dunn, of the University of Texas faculty, has just returned from Spain, where he has been for a year and a half searching in the state archives for manuscripts relating to the early history of Texas. He brings back with him a large number of copies of old Spanish documents for deposit in the University Library of great value to the future historians of Texas. Professor Dunn will resume his work in the class room.

THE RIGHT NOT TO LAUGH.

If one were to accuse you of poisoning your grandmother you would presumably smile in unruffled fashion and go about your affairs without feeling any burden of accusation. But if one accused you of lacking a sense of humor, you would first of all resent it indignantly; and, furthermore, for an indefinite time to come you would be conscious of a desire to disprove the charge, scrutinizing anxiously every phrase that might conceal some subtle hidden test, emitting now and then forced laughs on suspicion. Perhaps you boast your emancipation in many fields where public opinion customarily rules. You wear a straw hat when you please; you object to the insignia of mourning; you flaunt your readiness to discuss any subject in mixed company; you do or do not serve butter at your dinner table; yet you are afraid you may not laugh in the right places. Many a one who proclaims his right to individuality of opinion fears to assert an equally inalienable right not to laugh. Deep in his heart he dreads the withering accusation that he lacks a sense of humor.—Burgess Johnson, in Harper's Magazine.

CARD OF THANKS.

We want to extend our deep gratitude to the many kind friends who came to us with their expressions of love and sympathy in deeds of kindness during the illness of our son and brother, Alvin, and for their sustaining influences that made it possible for us to bear the great sorrow that followed. We wish to extend our thanks and appreciation for the song service at the church and also for the beautiful floral offerings.

Oysters! Oysters!!

We are now receiving twice each week shipments of fresh oysters. We believe that you will appreciate the service which we are trying to render our patrons in bringing to the local market the delicacies as they become seasonable.

With our extremely low cost in doing business and our varied stock of fancy and staple groceries we believe that we are in a position to offer you quality at prices which it will be very difficult for you to duplicate in the city. At least we would like to have the opportunity to convince you that we can do this and will appreciate your business for the remainder of September.

Vickery-Hancock Grocery Company Telephone Number 17

WHAT WILL BE OFFERED AT THE TEXAS STATE FAIR.

"The 1916 State Fair of Texas, which will be held in Dallas October 14 to 29, is to be the largest, most interesting and most valuable agricultural and educational exposition ever held in America. No previous State Fair or Exposition—in Texas or any other State—has reached the high standard of quality set for this year's big exposition at Dallas."

The above paragraph is taken from a recent announcement issued by R. E. L. Knight, president of the State Fair of Texas, and indicates the position of the Fair management with reference to the coming Fair.

Incomparable agricultural exhibits, together with vast showings of all that is latest and best in farm implements and machinery, are some of the features which are expected to prove of vital interest to the Southwestern farmers.

Then, too, there will be wonderful exhibits of all kinds of horses, cattle, swine and sheep, and the thousands of specimens of woman's work will be carefully featured.

It is said that practically all of the educational institutions of Texas are preparing interesting exhibits, and the educational division will doubtless be of much interest.

But the State Fair of Texas is not entirely educational. While education—and development through education—may properly be called its theme, it has other interests. The various programs of attractions—the various amusements for which it is famous—annually draw hundreds of thousands of people to Dallas, and it may be said that these vast crowds of pleasure-seekers have never been disappointed. Nor will they be disappointed this year, for the program of amusements for this year's Fair reads like a trip through a veritable wonderland of pleasure.

First and foremost there is the wonderful bill of vaudeville which will be presented in the Coliseum. This will undoubtedly prove to be the greatest collection of individual stars ever seen in the South. Several of the world's best and highest-paid acts have already been put under contract to appear at the performance throughout the entire period of the Fair, and others of the same high class are being booked. The completed bill will be one that will linger long in the memories of Fair visitors.

Then, in addition, there will be a mammoth Circus and Hippodrome performance, an attraction requiring the services of more than 25 of the best acts in the circus world. This attraction will be seen twice daily, in order that all Fair visitors may have an opportunity to see it.

Automobile racing, with the world's master drivers and fastest cars entered, will be a feature of this year's State Fair that will be of interest to many. The track at Fair Park has been put in ideal condition for this sport, and world's record time will doubtless be made.

A tremendous showing of 1917 models of automobiles has also been arranged, that Fair visitors may have a chance to see and compare all of the standard makes. This feature will be free to the public and will be on the grounds throughout the Fair, October 14 to 29. It is stated that about three hundred cars will be shown in connection with this year's Fair.

The C. A. Wortham shows have also been engaged for the entire period of the Fair, and this wonderful collection of all-star amusements will undoubtedly add much to the pleasure of a visit to Fair Park. The Wortham Shows for 1916 include the following: Baackman Trained Animal Circus, Model City, My Lady's Fan, Arabian Knights, Panama Canal, Athletic Show, Follies of Life, Wild West, Wonders of the Universe, Pike's Peak Toyland, The Whip, Over and Under the Sea, Ferris Wheels, Merry-go-arounds, etc.

With all this wonderful wealth of exhibits and amusements already arranged for, it is apparent that the ambitions of the Fair management are in a fair way to be realized, and that the 1916 State Fair of Texas will go down in history as the biggest and finest State Fair ever produced in any part of the world.

CAUTIONS CONCERNING METHODS OF FLY EXTERMINATION.

A recent issue of the Bulletin of the Chicago School of Sanitary Instruction makes some interesting comments on fly extermination, from which the following suggestions are taken.

Dead flies are dangerous and should not be handled by children. In some towns and cities the authorities are paying the children a stipulated price per hundred for the flies killed. A safer plan would be to pay by the pint or quart. This would involve less handling of these dead insects, which have germs on their feet and bodies. Dead flies may be just as dangerous as live ones.

Another phase of fly-extermination work that deserves attention is the use of poisonous substances for destroying

these household pests. Not only the arsenical poisons, but all the insecticides now known are dangerous. They should always be used with extreme care and should be so placed that children cannot possibly reach them.

The Bulletin recommends as an insecticide a mixture of two tablespoons of formaldehyde with one pint, equal parts, of milk and water. Flies swarm on the back porch when attracted by the odors of cooking in the kitchen. Keep the back porch clean and free from anything that flies feed on. Place the fly poison on shallow plates in which several squares of bread have been put. The receptacles containing this mixture should be placed outside the home rather than in it, unless the screening facilities have been neglected and the flies have had free access to the house.

The trapping, killing and effective extermination of flies should be done outside of the home. In the important work of ridding a community of flies, it has been established that instead of swatting the fly, we should swat the places where the flies breed. If this has been done, the flies in any community will be reduced to a minimum.

UNITED STATES IS PLANNING A GREAT NEW INDUSTRY.

The high prices of linen and of the flax fiber from which linen is made has centered attention on the necessity of establishing a real linen industry in this country, the greatest consumer of linen in the world. There seem to be two big problems which must be solved before success is assured. One is to find some artificial method of preparing the flax straw for the spinner, thus relieving the flax grower of this task, and the other is to convince the American public that American-made linen is as good as any other. There are a number of minor problems, and they are all discussed in a report by W. A. Graham Clark, just published by the Bureau of Foreign and Domestic Commerce, Department of Commerce.

The only country in which the production of flax fiber has increased consistently in recent years in Russia, the report states. In the British Isles and in France the production has decreased in spite of all efforts to keep the industry growing, and in Austria-Hungary, Belgium, and the Netherlands the industry has not been able to hold its own. The American production has never been of importance. Thanks to liberal government aid and to cheap labor, the Russians had gradually been getting a monopoly of the business up to the time the war broke out.

In the United States flax has been raised almost entirely for the seed, which is used to make the well known linseed oil, so necessary for the production of good paints and varnishes. Of some 3,000,000 acres of flax raised in this country in 1915, the Department

of Agriculture estimates that only 2,000 acres were devoted to flax for fiber. The bulk of the straw from the seed-bearing plants is burned and used for fertilizer. It should be borne in mind, however, that flax growing for seed and flax growing for fiber are separate and distinct industries. Some flax is grown for both seed and fiber, but a decision must be made as to which is to be the more important product, just as the sheep raiser must decide whether mutton or wool is to be the primary consideration.

In Europe the farmer not only raises the flax, but prepares the fiber for the spinner. This preparation requires several processes, one of which, known as "retting," requires considerable cheap labor and much time and is, in addition, a most disagreeable process for the workman. The problem in this country is to find some chemical process of retting that can be carried out at a factory and thus allow the farmer to confine his attention to the agricultural end of the industry. This is the only condition on which the American farmer will take to growing flax for the fiber, Mr. Clark thinks. Some progress is already being made in chemical retting, and at least two concerns are now buying flax stalks from the growers for further treatment. Chemical processes have been tried before without much success, but one of the new concerns is now selling chemically retted fiber to Europe and the other is making coarse linens for use in clothing and for curtains.

Even if a good all-American linen is produced in this country, however, there still remains the great problem of finding a market for it. That means that time and effort will be required to persuade the consumer to buy the domestic product instead of the imported. Many people invariably choose the imported article when it is displayed alongside of domestic products, almost regardless of quality. The president of a mill now making dyed and bleached dress linens from American flax has found that, small as is his product, there is difficulty in getting the jobbers and department stores to handle it. The tendency is to assume that, even though it is apparently of excellent quality, it cannot equal the old-established linens from abroad. There will never be a better time than the present to popularize the domestic product, for the imported article is scarce and high priced. In normal times our imports of linen goods vary from 25 to 30 million dollars, and the demand had been steadily increasing up to the time of the war.

If you have roof troubles of any kind, whether your roof is of rubberoid, shingles or iron, ask us for PRO-TEX. Guaranteed. Easy to apply. You do not need to hire it done. Do it yourself. FULTON LUMBER CO. 21.

Here You Will Find a Definite Policy

IT IS that we try to give the same courteous treatment to all, old or young, whether you buy much or little, without distinction. Then there is the same uniformly low price on every article in the house to everyone, and the same high quality of foods which we give to one as well as to the other.

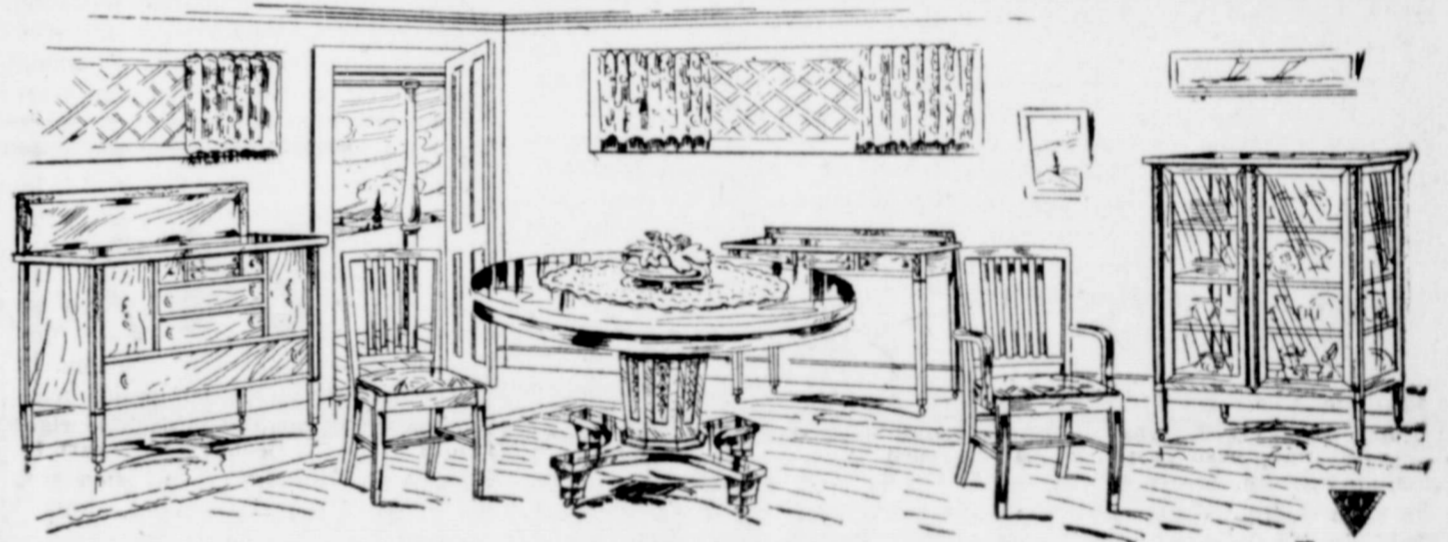

Our low costs in doing business, our volume of business, our cash basis, and many other details of saving mean that we can and do give you the advantage in prices when you are in need of groceries. We can verify these statements and ask the privilege of doing so if you will let us have your orders during the month of September.

We are sure of one thing that any time that you are displeased and we don't make it right that you will go elsewhere. so you see the necessity of our maintaining our high standard at all times. The thing we most need is your first order. After that we will try to keep them coming if our policy means anything to you as a careful buyer.

If we haven't before served you we want to do so now, if you are already a customer we want you to be pleased well enough to stay with us.

Motor News of General Interest

NON-STOP MAXWELL ON IMPORTANT TOUR.

Famous Car Now on Journey to Help National Defense Movement.

The non-stop Maxwell, the car that holds the world's record of 22,022 miles continuous travel without a stop of the motor, is engaged in a mission of national importance, and the trip will carry it from Tia Juana, Mexico, to Vancouver, Canada, and return.

It is a great loop trip that is being made by the non-stop champion. The route as at present outlined will carry the party up the California and Oregon coasts as far as possible toward the northern boundary of the United States; the return itinerary is through the interiors of Washington, Oregon, and California to the starting point, at the southern international line.

The highway between Mexico and Canada generally followed by motorists is inland for almost the entire distance. The coast road north has been neglected, mainly because the population is so scattered that it has been impossible to wield sufficient influence for a boulevard system that would make all-year-round travel feasible.

Road Will Be Logged.

The necessity for defending this coast road has been pointed out innumerable times by military experts, and one of the first important items in making our west coast safe against foreign invasion is to place the roads in such condition that troops and heavy armament could be moved expeditiously in motor trucks and automobiles.

Every detail of topography is being carefully noted by the Maxwell party. The road is being logged, and at the conclusion of the expedition a report will be submitted to the Federal authorities and to the officials of the States through which the tour extends.

Magazine Writers on Trip.

The non-stop Maxwell is carrying as passengers Wilbur Hall and Albert Gill Waddell, widely known as magazine writers, and Jack Griffin, touring expert.

Along the coast towns, the non-stop Maxwell is attracting great attention. The service-scarred veteran had traveled more than 35,000 miles before starting on its latest tour, and the original covers on its motor and transmission are yet to be removed for an overhauling of any sort of the interior workings.

ON THE SUNSET TRAIL.

Were it not for the terrible going encountered at the Blewitt Pass, about 200 miles out of Spokane, the Sunset Trail would afford the most popular route from that city to Seattle. But the Blewitt Pass is to be reckoned with, and its glowering grades haggled desperately with the cars that would pass. The weaker mounts find prudence the better part of valor. For them, it is prudence to avoid the Blewitt Pass by taking a route that adds 100 miles to the total distance between Spokane and Seattle. But the Maxwell owner may scoff at the thought of avoiding the test.

The trail, prior to the arrival at Blewitt Pass, offers little resistance.

At Wenatchee we are about 160 miles out of Spokane, and the Columbia River is at our backs, the ferry having taken us across from Orondo. At Cashmere, the Great Northern Railroad swerves to the right, while the Sunset Trail dwindles to a ribboning trail at the left. It worms through several lumber villages, and leads finally to the foot of Blewitt Pass. For the first ten miles the trail forbids two cars abreast. The grades are steep and perilous in the extreme. It is at this point that the Maxwell driver promises forever to discredit the climbing abilities of the rank and file. Here, confidence in the pretty car of your dreams is shattered. You see your erstwhile favorite being pushed disgustingly up to the ridge and over.

And it is here that the Maxwell owner prides himself on the performance of his car. Ray McNamara, who is at present piloting his Maxwell over the Pacific Coast territory, has furnished pictures of the route.

The Maxwell made all of the severe mountain grades without the addition of water to the radiator. And economy was by no means sacrificed. Twenty miles to the gallon, and 354 miles on less than two quarts of oil is the record. Real results for a climb that many cars would be glad to make regardless of gas and oil consumption.

DODGE BROTHERS CARS PERFORM GREAT FEATS.

At Opposite Ends of the Earth They Prove Their Ability to Surmount Difficulties.

A strange coincidence occurred at the Dodge Brothers' plant Thursday, when letters were received in the same mail from Cape Town, South Africa, and Fairbanks, Alaska, each announcing a record-breaking performance by a Dodge Brothers car.

In South Africa, a Dodge Brothers car had climbed to the top of Pearl Rock mountain, a mass that looms on the horizon of Cape Town. Almost since the day that motoring began in Africa, Pearl Rock's peak has been the objective of ambitious motorists. Failure after failure was recorded, but that did not deter others from attempts. For several months a prize of 50 pounds (\$250) has been posted for the first car making the ascent.

A Dodge Brothers car owner conceived the idea that the money might be of some benefit to the martyrs of war, so he took the rocky trail. "It will interest you to know," writes H. W. Alkin, Dodge Brothers district representative in South Africa, "that one of our standard model cars made the climb without difficulty on June 24. The feat has been vouched for and certified by the editor of 'Motoring in South Africa.' The 50 pounds will be turned over to the editor for distribution among the war funds."

The Alaskan feat was that of Grover Frame, who, in a standard Dodge Brothers touring car, broke all records in a trip from Fairbanks to Chitna, Alaska. The time for the 360 miles was 46 hours, 30 minutes, including stops. This is six hours less than ever accomplished before.

ADDITIONAL TERRITORY FREED FROM CATTLE TICK.

Quarantine Lifted From 9,493 Square Miles in Six States—California Wholly Free.

WASHINGTON, D. C., Sept. 6.—Approximately 9,493 square miles of territory in six States is released from quarantine on account of the Texas-fever cattle tick by an order signed by the Secretary of Agriculture to become effective September 15, 1916. The order releases the last area under quarantine in California, adding this State to the tick-free list. The other territory released consists of ten counties in Georgia, three in South Carolina, two in Alabama, two whole counties and two fractional parts of counties in Oklahoma, and a portion of one county in Mississippi.

Greater interest in tick eradication is being taken throughout the South than at any time since the beginning of the work co-operatively by the U. S. Department of Agriculture and the States, in 1906.

The territory released is, in detail, as follows:

In Alabama, the counties of Autauga and Greene.

In California, the remainder of San Diego County, making the entire State now free from quarantine.

In Georgia, the counties of Barrow, Bartow, Campbell, Columbia, Fayette, Floyd, Henry, Jackson, Paulding, and Walton.

In Mississippi, the remainder of Yazoo County.

In Oklahoma, the entire counties of Wagoner and Stephens and portions of Muskogee and Tulsa counties.

In South Carolina, the counties of Bamberg, Barnwell, and Edgefield.

TO KNOW SUDAN GRASS SEED FROM JOHNSON GRASS SEED.

WASHINGTON, D. C., Sept. 7.—Seed specialists of the U. S. Department of Agriculture have developed a method whereby seed of Sudan grass may accurately be distinguished from the seed of Johnson grass which, while valuable in some sections, is considered so troublesome a weed in others

that State laws prohibit its admission. Careful study of the seeds of the two grasses has disclosed differences in size, form, color, and physical characteristics, which are easily detected

under a good glass. Seed inspectors and others interested in determining the purity of Sudan grass seed may obtain a technical description of this method in Department Bulletin 406,

"Distinguishing Characters of the Seeds of Sudan Grass and Johnson Grass," which will be furnished on application as long as the Department's supply lasts.

Success Is the Thing That Succeeds

Buy a Proven Car

The present series of Studebaker cars was announced thirteen months ago. Improvements and refinements were added in January, and it is called the series '17, but it is really the same car that was announced a year ago, and which has made such a tremendous success in every part of the United States.

Over 70,000 of these cars have been sold, and they have been placed in every kind of service imaginable, and they have never failed to demonstrate their quality and their value for the money, and every car has sold two or three more just like it.

Buy a World Winner

Do you suppose this increase in business is merely the result of favorable conditions? Partly, it is true; but not entirely, because in the last thirteen months Studebaker has produced and sold and put in actual service more seven-passenger six-cylinder cars, more four-cylinder seven passenger cars, than any company in the world has ever done before in the same length of time.

The success of Studebaker cars has established Studebaker leadership, not only in quality, in value, in power, in appearance, and in service, but also in number of cars manufactured and sold in its class.

Buy a Studebaker

It is said that "nothing succeeds like success." And this saying is particularly true of automobiles. There is no automobile that succeeds like the automobile that successfully demonstrates its value and quality in every kind of service.

24²/₁₀% Won Away From A Higher Price

Owners Who Will Have No Other Car 50⁸/₁₀%
11,000 Owners Rate Hupmobile Efficiency 99%

HERE is a startling glimpse of what is going on below the surface in automobile buying.

Our service system statistics show that 24 2/10 per cent of Hupmobile sales are made to men and women who have used higher priced cars.

We knew we were winning away great numbers who had previously paid more. We have known it for years. The Hupmobile has always held its sales on a quality basis.

But these statistics were a gratifying surprise even to us. Consider what they mean.

Hupmobile Market Goes On Growing

The multi-cylinder car has never presented its claims more aggressively than it is presenting them now. Millions of dollars have been expended in emphasizing these six, eight and twelve-cylinder claims in the past three or four years.

The Hupmobile stands out distinctly as an exponent of the older, simple, four-cylinder principle.

Its market goes on steadily growing, and 24 2/10 per

cent of that market is coming to us from the field of higher price.

Our extensive system of service enables us to analyze sales more accurately than other cars can.

We are in almost continuous contact with our owners. We know that 24 2/10 per cent of these owners are coming from the higher priced source. We know that 50 8/10 per cent of Hupmobile owners will have no other car. But we know, in addition, something still more important to you.

11,000 Owners Say:
99% Efficient

We know exactly what 11,000 owners think of every phase of Hupmobile construction. We know exactly what they think of Hupmobile performance.

We know what they think of its lugging power, its nimbleness, its flexibility, its get-away, its high-gear efficiency.

We have their opinions of every unit in the car—their complaints, their criticisms, their favorable comments.

And these 11,000 opinions, tabulated and reduced to a percentage basis, register a rating of 99% for all-around Hupmobile efficiency.

No such thing as this has ever been made possible by any other car.

It is clinching, convincing and conclusive.

Performance That Matches Any

It proves that Hupmobile owners know that the Hupmobile daily outdoes cars that have more cylinders, or cost more money.

In pulling power, and quick get-away, they see nothing

under a multi-cylinder name that they do not have.

In flexibility, they find themselves relieved of gear-shifting to an amazing extent.

And they know they are getting in the Hupmobile service system more than any other car offers: expert inspection, adjustment and care each month for eight months, by trained Hupmobile experts at Hupmobile service stations. A service they pay for with coupons supplied free of cost.

The least you can do is to have a demonstration of Hupmobile performance.

The Mark of Superior Motor Car Service

Standard Hupmobile Performance

GOES to a speed of 25 miles an hour, from a stand, in 10 seconds. Throttles to a man's walking pace, on high gear, without bucking or jerking. Picks up, without gear change, instantly and smoothly.

Climbs the average low-gear hill, on high gear. Pulls through sand and mud, on high gear. Develops great pulling power on high gear. Registers a minimum of vibration, at any speed, on any gear.

5-Passenger Touring Car \$1185. Roadster \$1185. 7-Passenger Touring Car \$1175. Prices f. o. b. Detroit.

HOW COLLEGES ARE AIDING IN BETTER COMMUNITY LIFE.

Initiative and stability are being contributed to the widespread movement for rural progress by the agricultural extension work of the State universities and colleges. The most recent demonstration of effective co-operation is furnished by the better community conference held at the University of Illinois, says the Survey. To its staff, which conducts extension schools of agriculture and household science, there was added a year or two ago a new official, the community adviser. Prof. R. E. Hieronymus holds this position, appointed largely because of his State-wide acquaintanceship with the schools of Illinois and with rural social conditions.

Social advisers or agents had already been set to work in many parts of the State by the co-operation of several counties with the university and the Federal Department of Agriculture. The University of Illinois is now equipped to supplement the technical instruction and advice for the farm and the farmhouse which has been furnished by its extension schools and these county agents, so as to promote better community conditions and relations throughout the State.

Toward that end three specific means are employed. In connection with its extension schools, evening conferences on community betterment are held, to which the country-life clubs and federations organized by agents of the university are tributary. At these evening conferences, held in the villages and towns where these extension schools are in session, the civic and business affairs, the home, school and church interests are discussed, and, wherever possible, a local federation is organized.

The adviser meanwhile steadily prosecutes local surveys in communities willing and able to furnish adequate co-operation. These surveys emphasize inquiries and reports on schools, library facilities, the press and the circulation of periodicals, moving pictures, theaters and other amusements, lectures, lyceums and Chautauques, clubs, classes and exhibits, sanitation and public health, organizations, facilities for recreation, church and religious agencies, and on holidays or other celebrations.

The third effort of the university is to organize permanently this State-wide better-community conference to which successful initiative has just been given. Over 500 representatives, many of the hundred or more State organizations whose interest was enlisted in the conference, decided that it should be permanently organized and held annually at the university. In view of the approaching centennial celebration of the founding of the State, it was decided to attempt an inventory of community conditions. To this end friendly rivalry will be promoted by means of a community "score card."

The communities of the State, grouped according to size and situation, will be urged to compete with each other in scoring their own conditions for better or worse. Thus the thirty cities of 10,000 or more inhabitants, the forty-one cities of between 10,000 and 5,000, the towns and villages and the open-country regions, it is hoped, will enter the lists for the awards showing the best conditions. The data collected on these score cards is to be submitted to experts for analysis, summarizing and conclusions.

The University of Colorado has also a new bureau of community welfare, of which Prof. Loren D. Osborn is director and Arthur E. Gilman secretary. In co-operation with educational, social, civic and commercial agencies, local conferences are held throughout the State. Advance inquiry is made to ascertain the most pressing problems in each locality and the means at hand for their solution. The best advisers in the community and elsewhere are enlisted to participate in these conferences. An exhibit of charts, diagrams and models descriptive of conditions and efforts to improve them is an interesting feature of each conference. Through a public service department, aid is given any group in securing addresses, lecture courses, lantern slides and literature to further community improvement.

Prompted by the rural extension work in colleges in the United States, which has not yet been attempted by any Canada university, the private provinces of Manitoba, Saskatchewan and Alberta have united to organize a bureau of social research, with J. S. Woodworth as its director at Winnipeg. The Ottawa Commission of Conservation had instituted studies of the

Dominion's natural resources so suggestively that the conservation of its human resources was considered to be of at least equal importance.

FOR SALE—At my place, southeast of Plainview, about 65 bushels of nice clean alfalfa seed; 16c per pound. T. J. TILSON.

SWAT THE FLY.

Experiment Station Tells How to Prevent and How to Eradicate the Pest.

The best means of getting rid of flies is never to let them get a foothold, according to W. W. Swett, of the Missouri Agricultural Experiment Station. Although his recommendations are made mainly from the standpoint of protecting cows against flies, they are just as applicable to the protection of people.

The best means of fly control is through preventing them from breeding. It requires ten days for the fly to develop from egg to adult, so if all barnyard manure and other filth in which it can develop is cleaned up every five or eight days, the flies' supply will be cut off. If it is impossible to remove the filth far enough so that the flies which breed in it can not reach the house or barns, it may be treated with powdered borax sprinkled over the manure pile or other filth at the rate of about an ounce for each cubic foot to be treated. After it has been sprinkled on, it should be washed through the pile with water. Half a pound of hellebore which has been allowed to stand in ten gallons of water from ten to twenty-four hours may be sprinkled at the rate of a gallon to the cubic foot on the filth to be treated.

In either barns or house, fly-traps help a little, and a great deal of relief may be obtained by mixing half a pint of milk, half a pint of water, and two tablespoonfuls of formalin (40 per cent formaldehyde). Stronger mixtures have so much formalin in them that the flies do not drink it. A slice of bread may be placed in the plate in which the mixture is exposed.

Cows may be protected by means of commercial or home-made repellents. Pyrethrum powder is good and the commercial repellents are generally preferable if they do not cost too much.

Home-made mixtures of either one part of crude carbolic acid or pine tar with nine parts of cottonseed oil give very good results, if applied lightly, but if applied too heavily they will injure the skin and hair and do more damage than the flies will.

WICHITA MARKET.

WICHITA, Kans., Sept. 5.—Owing to the threatened railroad strike, the supply of cattle was very light at all points on the opening this week, and the market opened 10 to 20 cents higher than the close of last week. Locally, offerings consisted principally of hold-overs and a few shipments of plain, light-weight, killing steers. There were very few choice or good heavy-weight cattle offered. Sales here included some good 1,250-pound Kansas cattle at \$8.40, a shipment of 1,175-pound Kansas cattle at \$7.50, some medium-weight Oklahoma around \$7.00 and several bunches of light-weight, plain cattle from \$6.00 to \$6.50. Butcher stuff met with a fair demand, and sold about steady with the opening of last week. A few fancy, fat cows selling from \$6.00 to \$6.40, with the bulk of the good grass fat cows from \$5.25 to \$5.75, medium butcher cows around \$5.00, canners and cutters \$4.00 to \$4.75. Good light-weight, grass, fat heifers around \$6.50, heavy-weights around \$6.00. Best grass fat bulls up to \$6.00, with the bulk of the good, medium bulls from \$5.00 to \$5.50. Veals are up to \$10.00, heavy-weight killing calves from \$7.00 to \$8.00, depending on the fat.

A limited supply of fresh stockers and feeders caused a reaction in the market after the dull close of last week. Choice Hereford calves sold up to \$8.00, yearlings up to \$7.50, twos and threes up to \$7.25. Medium white-face yearlings sold up to \$7.00, twos and threes up to \$6.75. The bulk of the best deborned native steers are selling around \$6.50, good medium kinds around \$6.25, plain kinds \$5.50 to \$6.00, cut-backs \$4.50 to \$5.00. Choice Hereford stock heifers up to \$7.00, with the bulk of the good, native, light-weight heifers from \$6.25 to \$6.40, heavy-weights around \$6.00. Choice light-weight stock cows up to \$5.50, with the bulk of the good, medium cows around \$5.00. Stock bulls around \$5.00.

While we look for heavy receipts and

a lower market for a few days when cattle start moving again, we do not look for any radical change in the market and think these good grass cattle and best grades of stockers and feeders will sell fairly steady the balance of the season.

The hog market ruled 10 to 15 cents higher today, and we had a top here of \$10.67½. Bulk of the hogs sold from \$10.40 to \$10.60. The market closed weak at Chicago. Good to choice light hogs sold from \$10.60 to \$10.70, fair light mixed \$10.40 to \$10.60. Good to choice mediums \$10.55 to \$10.65; fair to good mediums \$10.40 to \$10.60. Good to choice heavies \$10.25 to \$10.50. Rough heavies and stags \$9.00 to \$10.00. Pigs \$7.00 to \$8.00.

CITATION—BY PUBLICATION.

THE STATE OF TEXAS

To the Sheriff or Any Constable of Hale County—GREETING:

YOU ARE HEREBY COMMANDED, That by making publication of this citation in some newspaper published in the County of Hale for eight consecutive weeks, previous to the return day hereof, you summon the unknown heirs, executors, administrators or legal representatives of B. J. Brummer, deceased, also every person, firm, corporation or association owning or claiming to own or to have or possess any right, title, claim, lien or equity in, to, upon or against or concerning the hereinafter described land or any part thereof; also the unknown mortgages, lien holders, owners or claimants of said real estate or any part thereof, the names of whom and the places of residence thereof are unknown to this plaintiff, to be and appear before the District Court of the 44th Judicial District, of Dallas, Texas, to be holden in and for the County of Dallas, at the Court House thereof, in the City of Dallas, on the first Monday in October, 1916, then and there to answer to the First Amended Petition (in lieu of original petition filed herein by plaintiff January 30, 1916) of C. C. Slaughter Co., filed in said Court on the 7th day of July, 1916, against the said unknown heirs, executors, administrators or legal representatives of B. J. Brummer, deceased, also every person, firm, corporation or association owning or claiming to own or to have or possess

any right, title, claim, lien or equity in, to, upon or against or concerning the hereinafter described land or any part thereof; also to the unknown mortgages, lien holder, owners and claimants of said real estate or any portion thereof, for suit, said suit being numbered 21956-B, the nature of which demand is as follows: Suit upon a certain promissory note, executed by the said B. J. Brummer to C. C. Slaughter, dated November 11, 1908, and payable on or before November 11, 1915, with 6 per cent interest per annum, at Dallas, Texas, interest payable annually as it accrued, being for \$920, a vendors lien being retained in said note and in the deed of conveyance executed by said C. C. Slaughter to the said Brummer, conveying the Northeast Quarter of Section 11, Block S-4, Hale County, Texas, containing 160 acres, and said note being part consideration for the said land; said note providing that all past due interest shall bear 6 per cent interest from date of maturity and that default in the payment of any installment of interest shall, at the election of the holder, mature all said note and also providing for 10 per cent attorney's fees if collected by suit; default has been made in the payment of the annual interest installment due November 11, 1914, and said note is long past due and unpaid. Plaintiff is the legal owner and holder of the said note, together with all rights, title and interest therein, the same having been duly transferred to this plaintiff. Defendants wholly fail and refuse to pay the same.

Plaintiff prays citation; judgment foreclosing said lien as it existed on November 11, 1908, and in the alternative that title to said land be vested in plaintiff, for damages, costs and general and special relief.

HEREIN FAIL NOT, but you you then and there before said Court this writ, with your return thereon showing how you have executed the same.

WITNESS: MATT L. COBB,
Clerk of the District Court
of Dallas County, Texas.
Given under my hand and the seal of said Court, at office in the City of Dallas, this 7th day of July, A. D. 1916.
MATT L. COBB,
(SEAL) Clerk District Court,
Dallas County,
By A. W. THOMAS, Deputy.
