

THE PLAINVIEW EVENING HERALD

TWICE-A-WEEK

VOLUME 27, NUMBER 78

PLAINVIEW, TEXAS, FRIDAY, SEPTEMBER 29, 1916

NISSELEY WOULD ESTABLISH CREAM RECEIVING STATION

Representative Will Lay Before the South Plains Dairying Association Marketing Plan.

"If there is any country where dairying should be a success, it is the country around Plainview," said W. J. McPheeters, representative of the Nisseley Creamery Company, one of the largest firms in the Southwest. Mr. McPheeters is in charge of the company's station and property in Abilene. "Plainview is certainly the garden spot of all the dairy country I have ever seen, and dairying has been my life business."

Tomorrow Mr. McPheeters will meet with the South Plains Dairy Association and will present a marketing proposition. He proposes to establish a shipping receiving station at Plainview, with a local man in charge, if the members of the association desire this, testing the cream as soon as purchased and issuing a check for same immediately. If the business will justify such action, in the course of time the company would establish a route with motor vehicle to gather up the cream from the various farms on the route.

Mr. McPheeters believes that marketing is one of the serious propositions to be considered in dairying, and has some valuable information to give the association.

His company will make no guarantee as to price other than agreement to pay the highest market price, and invites the comparison of Nisseley prices during the years past with that of the large creameries in the North and East.

"This section is favored with good seasons. Why, in many of the great dairying states there are five and six months of winter. The dairy farmer must spend five or six thousand dollars on a building to house his stock and protect them from the weather. Here only a few hundred dollars will provide barns which are in every sense equal in efficiency to the higher-priced barns necessary in the sections mentioned.

"Poultry and hogs are good things to have in connection with dairy cows. They offer a means of marketing the skimmed milk in a profitable manner."

STOLE CAR; COULDN'T RUN IT.

Towed It Away From Home of Jack Alley With Horse and Got Neighbor to Start It.

They didn't know how to run it. If they had, thieves would probably have made away with the car of Jack Alley, who lives in the Runningwater community. The car was towed from the house on horseback, and those who had taken it got a neighbor of Mr. Alley's to start the car for them. They ran until they came to a fence, killed the engine and could go no further.

"Cake" Mailed to Plainview Man Proves to be Whiskey

"Everything branded 'cake' isn't cake," said Postmaster Ben O. Sanford today, when he narrated an occurrence very similar to that at the San Antonio, Texas, post office, where a bottle of "booze" mailed in a pillow became broken.

There was received in Plainview this morning a box. Now, ordinarily boxes which have glass in them are labeled "fragile," and when the drayman who has the mail contract unloads the mail he handles the fragile packages very tenderly to the employees of the post office. This particular box was marked "cake." Along with other mail it was dumped from the dray, and straightway penetrating odors arose. Postmaster Sanford started an investigation, and laid aside the fragile package to be sent to division headquarters, where all destroyed or badly damaged packages are sent. A pint flask of the "cake" had been broken.

The package of whiskey was addressed to a certain Plainview man from a friend "somewhere in Texas." And there's a penalty provided for sending intoxicating liquors through the mail of a fine of not more than one thousand dollars or a sentence of two years in Federal prison, or both.

PERSONNEL OF MANY Y. M. B. L. COMMITTEE IS CHANGED

About Fifty Enthusiastic Members Meet at Luncheon at Waller Tailoring Company's.

About fifty members of the Y. M. B. L. met last night at the Waller Tailoring Company's place of business for a light luncheon. President E. B. Miller presiding, the regular semi-monthly business session was held. The new secretary, Z. E. Black, was with the organization for the first time since his appointment.

Many of the standing committees were discharged and new members appointed. The committee of securing a standard wagon road from Plainview to Silverton was discharged and a new committee appointed, with J. M. Waller as chairman and the following other members: C. F. Myers, A. G. Hinn, Dr. C. C. Gidney and E. F. Sansom. The committee on the auto road to Silverton was similarly dealt with, and J. M. Waller made its chairman and T. B. Carter and E. L. Doland volunteer members. A new committee was appointed to arrange for street signs. G. Graham is chairman of this committee, with G. Graham, Ben O. Sanford and J. M. Adams, new, and L. R. Pearson, continued, members.

On the sidewalk extension committee J. B. Maxey was appointed to succeed L. O. Shropshire, who is on the border with his company. Raymond Gibbs, a member of the auditing committee, is also on the border, and C. D. Nobles was appointed a member of this committee in his place. Guy Gibbs becomes a member of the entertainment committee in the place of Jennings Anderson, also a member who is with the army.

Considerable interest was manifested in the announced probability of interesting manufacturers in sugar-beet production in the Plainview country, and after a rather general discussion of the proposition a committee which is to select its permanent chairman was named. Dr. R. F. Hare is temporary chairman, and other members are Olin E. Brashears, Jay P. Green, E. T. Coleman, C. F. Myers and Dr. C. C. Gidney.

W. Peterson, P. B. Randolph and R. A. Drumm constitute a committee to assist the road committee in collecting necessary funds for the completion of roads projected.

The talk of the new secretary, Z. E. Black, was pithy and encouraging to the members.

Blain Murder Case in Floyd County is Now With the Jury

Geo. L. Mayfield, district attorney, returned this morning from Floydada, where he has been attending District Court. He states that the jury has been charged in the case of the State of Texas vs. C. R. Blain, charging the murder of Hanton Galloway, in Floydada, last winter.

FAMOUS RACKET-STORE MAN WILL LECTURE IN PLAINVIEW.

Meetings at Wayland College Will Be Open to Public—Financial and Inspirational Talks.

President R. E. L. Farmer of Wayland Baptist College states that H. Z. Dukes, of the well known Duke & Ayres variety-store firm, and Dr. T. C. Gardner, head of the B. Y. P. U. movement in Texas, will speak daily in the Wayland Baptist College chapel throughout the next week. These gentlemen will be with the students in chapel exercises and will speak at 10:30 each morning and 8 o'clock each evening. The class schedules will be arranged so that every student will have the opportunity of hearing the lectures.

The talks by Mr. Ayres will be on financial subjects, while Dr. Gardner's talks will be inspirational. These gentlemen will take part in the services at the Baptist Church Sunday.

CLARENDON COLLEGE HEAD HERE IN INTEREST OF SCHOOL.

Rev. G. S. Slover, president of Clarendon College was here yesterday in the interest of the school. Clarendon College is one of the best established junior colleges in Texas.

As South Plains Irrigation Project Is Viewed By a Disinterested Journalist

William D. Hornaday, several times a visitor in Plainview, and a journalist of note, in The San Antonio Express, writes of the general conditions in the Southwest and the Plainview country in particular as follows:

"As an index to the wonderful era of prosperity which the people of this State have entered upon, a glance at the recently published bank statements in the different cities and towns is conclusive and satisfying. Almost unprecedented increases in bank clearings have taken place during the past week in the larger cities. Bank deposits are mounting up to figures which, if converted into actual cash, would seem to threaten the capacity of the vaults of some of these institutions. That the proceeds from the cotton and other crops are beginning to find their way into the different lines of industry and commerce is indicated by the improvement in these activities.

"Some observing men venture the prediction that Texas and the entire West is on the eve of one of the greatest land booms that these parts of the country have ever witnessed. That this character of investment may be carried to excess and that the prospective boom may cause values to mount to fictitious heights is not deemed improbable. The new rural credits law and the operation of the farm-loan banks are said to be ideally suited for the promotion of the 'back to the land' movement, and that the opportunity which the new Government act affords for the purchase of land at a low rate of interest will be embraced by great numbers of people is believed to be assured.

(Continued on Page Seven.)

A KANSAN WOULD SELL HERE HIS GOOD GRADE HOLSTEINS

E. S. Bishop Is in Conference With President C. E. Moore of South Plains Dairy Ass'n.

Herald publicity is responsible for the presence in Plainview of E. S. Bishop, of Towanda, Kansas, according to his own statement. Mr. Bishop has a herd of some three hundred grade Holstein cows and heifers which he desires to bring to the Plainview country and dispose of to members of the South Plains Dairy Association. Yesterday he conferred with President C. E. Moore relative to the proposition and extended to the purchasing committee an invitation to visit the herds of Bishop Brothers when they started on their tour of inspection.

Mr. Bishop states that in Wisconsin and Illinois there is a great demand from the Middle West and the Northwest for dairy cattle, and the prices are high, while in New York and the Eastern States the prices are lower and the breeding better, the history of many herds being known for sixty to eighty years. The other states mentioned have records of twenty-five to thirty-five years on their dairy herds, stated Mr. Bishop.

Joe Bloodworth and L. P. Bloodworth, of Fort Worth, were here Wednesday on business.

Two Thousand Students Seek Entrance to Texas University

Two thousand Texas boys and girls, probably half of them freshmen, have reported for entrance to Texas University. The work of registration was carried on in the Law Building, every room of which was thronged with pupils waiting their turn. Wednesday's registration included freshmen, students from other colleges, and seniors. Yesterday was devoted to registration of freshmen and seniors. Juniors, sophomores and late freshmen are registering today, and will continue to do so through tomorrow.

Among those from Plainview who are attending the university are W. C. and Burke Mathes, Miss Lucile Abraham, Miss Nell Jones and Robert Brahan, the last two named having left Wednesday for Austin.

WAGNER TO CALIFORNIA.

E. Wagner, who has been in charge of the Layne & Bowler office in Plainview, left Wednesday morning for California. He will be in the employ of the company there. O. A. Layne will arrive within the next few weeks to take charge of the Plainview office again.

FLOYDADA BOOSTERS TELL OF TENTH ANNUAL FAIR

Party of Eighty-Five Visit Plainview in Interest of Agricultural and Livestock Exposition.

The Floyd County boosters were in Plainview this morning, eighty-five strong. They will complete tomorrow a three-day automobile trip. There were seventeen cars in the train this morning.

In behalf of the Y. M. B. L. of Plainview, J. M. Adams welcomed the boosters to Plainview. The response was made by Judge S. D. Tant, of Floydada, who told of the good things which will be offered at the Floyd County Fair, October 5, 6 and 7. The Floydada band, twelve pieces, furnished excellent music.

Among those who were here were: Mr. and Mrs. A. N. Gamble, B. P. Woody, A. H. S. Haynes, Mr. and Mrs. E. C. Nelson, Mr. and Mrs. N. W. McCluskey, Mrs. T. B. Triplett, Roy Snodgrass, H. E. Canaday, Mr. and Mrs. C. H. Featherston, Miss Pearl Miller, Tate Fry, Mrs. Montague, Mr. and Mrs. J. D. Stark, Dr. and Mrs. Geo. Smith, Misses Wilkison, Slaughter, Webb, Rodgers, McKinnon, Mollie Walling, Mrs. McKinnon, Ben Morton, Mr. and Mrs. Carl Surger, Mrs. J. D. Bartlett, Wooster Ross, Teddy Green, Ray Slaughter, C. Foster, Mr. Tye, Mr. Johnson and Frank Moore.

Williams' Furniture Store is Sold to Garner Brothers

A deal has been closed whereby E. R. Williams sells his furniture store to Garner Bros., W. F. Garner, of Plainview, and M. P. Garner, of Canyon City. M. P. Garner has moved his family here. W. F. Garner has been undertaker with E. R. Williams for several years, and is well known to the people of this section.

Mr. Williams will remain in Plainview, but has not yet completed his business plans.

HALE COUNTY CASES IN THE COURT OF CIVIL APPEALS.

Motion for submission, October 3, has been filed in the Court of Civil Appeals, Seventh District, at Amarillo, in the case of the Prudential Life Insurance Co. vs. H. S. Pearson, rehearing. The case of A. L. Anderson vs. P. H. Farmer has been set for submission October 4. The cases of Texas-Kansas Silo Company vs. Nick Alley and of Citizens National Bank of Plainview vs. J. H. Slaton, et al., have been set for submission on October 18.

WEST TEXAS A. & M. COLLEGE FARM CONGRESS DELEGATES SUPPORTERS MEET OCT. 4 AFTER SUGAR BEET FACTORY

Senators and Representatives Have Been Sent Special Invitations to Meet the Convention.

On October 4th the West Texas A. and M. Campaign Association will meet in Fort Worth in general session. The purpose of the executive committee is to have every person interested to attend the meeting. Special railroad rates for Fort Worth will be in effect at that time. Thos. F. Hodge, of Sweetwater, secretary of the association, in a letter to interested parties, says: "It is earnestly desired that every West Texan interested in this great movement for an agricultural and mechanical college in this section, will avail himself of the privilege of attending this meeting. This great movement has progressed to the point where united, aggressive action is necessary in order to attain final success. Your presence, your advice, your influence, is necessary at this particular time, and we earnestly hope that you will not fail us. The representatives and senators elect have been invited and earnestly urged to attend this meeting. We wish to co-operate with them in drafting a bill, and deciding on a vigorous campaign at the next session of the Legislature. Union of forces and ideas is necessary at this particular time, in order that West Texas will present a solid front on measures affecting her interest, and this meeting is for the purpose of determining on a course of action necessary in order to insure success of the measures which so vitally interest her. "We will have special rates on all railroads to this convention, and it is earnestly hoped that you will make every preparation necessary to attend. We would thank you to advise us if we may expect your presence."

FIRST FROST OF SEASON.

A light frost fell over the South Plains section last night. In the vicinity of Plainview the frost was so light that little or no damage was done to the feed crops now maturing.

REDECORATING THE OLYMPIC.

A complete overhauling of The Olympic Theatre is being made by the proprietors, Dye, Ford & Rogers. Decorations, exterior and interior, are being made.

Burning Celluloid Comb Causes Fire Alarm—Couldn't Find Fire

Wednesday evening a fire alarm was turned in from the residence of A. C. Hatchell, Democratic nominee for district attorney. After lighting a lamp, the match was laid on a celluloid comb, which was ignited, filling the room with a dense smoke. Unable to locate the fire when the smoke was discovered, a few minutes later Mr. Hatchell called the fire department. It was some minutes before the cause of the smoke was discovered.

JORDAN WILL MOVE TO TULIA.

C. G. Jordan has contracted to buy a house in Tulia and move his family there. Mr. Jordan bought a place several months ago in the Seth Ward College Addition which he has sold to a Mr. Baker who recently moved here from Oklahoma. There is a modern home and ten lots in the property Mr. Baker acquires.

LOADED WAGON INJURES SMALL CHILD AT LOCKNEY.

The five-year-old child of Mr. and Mrs. Floyd Barber was seriously injured yesterday afternoon when a loaded wheat wagon struck it. For a time it was thought the child would not recover, but unless internal injuries now unknown develop it has a chance to get well.

MISSOURI FARMER MOVES TO NEWLY ACQUIRED PROPERTY.

Mr. and Mrs. Will Bicknell, of Morrisville, Missouri, have bought a farm southwest of Plainview. Mr. Bicknell arrived this morning with their household goods. Mrs. Bicknell has been stopping in the home of Mrs. J. W. Day for the past week. They will move immediately to their farm.

Fifteen Certificates for Delegates From Plainview—El Paso Promises Four Great Events.

Certificates have been received and are now in the hands of J. A. Testman, manager of the Ware Hotel, for fifteen delegates from Plainview to the International Soil-Products Exposition at El Paso. Five delegates are to be accredited from the Chamber of Commerce, five from the city of Plainview and five from the county. Judge W. B. Lewis has delegated the power of appointment of representatives from the county to Dr. R. F. Hare, whom he appointed to head the county delegation. Those who have expressed an intention of attending the four great events in El Paso, October 14-24, are J. A. Testman, Dr. R. F. Hare, Thos. Abrams, Mr. and Mrs. E. Dowden, Mr. and Mrs. R. W. Otto, A. G. Hinn, M. D. Henderson and Jay P. Green. Col. R. P. Smyth, secretary of the Chamber of Commerce, will probably represent that body, also.

During the ten days mentioned there will be in El Paso four events of much importance. On the opening day, October 14, President Woodrow Wilson will dedicate the Elephant Butte Dam, one of the largest irrigation dams in the world. It is the largest dam to be built under the direction of the United States Reclamation Service. The reservoir, which stores the flood waters of the Rio Grande, will be 45 miles long, with an average width of six miles and an average depth of 66 feet. The cost of the dam and distribution system will approximate \$10,000,000.

The International Irrigation Congress meets October 14 to 19. The open sessions of this congress will be of especial interest to those delegates from the irrigated belt of the South Plains.

October 19 to 21 the International Farm Congress will hold its sessions. And throughout the ten days, October 14-24, the International Soil-Products Exposition will convene.

Special rates on all railroads have been granted from all points in the United States.

It will be remembered that last year the exposition was held in Denver, Colo. Under the direction of E. H. Perry and J. D. Hanby the Hale County Exhibit made a wonderful showing, its wheat and apples attracting special attention and receiving highest awards.

Dr. R. F. Hare, while living in New Mexico, was largely instrumental in interesting the Holly Sugar Company in establishing beet sugar factories in the town in which he lived. He states that in his opinion the Plainview country is wonderfully adapted to raising sugar beets and that it offers one of the best propositions along this line of which he knows. He has arranged for a conference with the Holly people while in El Paso, and the delegates from Plainview and Hale County will present their proposition to them, asking that they make thorough investigation. Many experiments have been made in sugar beet growing in this section, and encouraging results have been obtained.

F. C. Vickery's Brother Dies in His Old Home in England

News has been received here of the death of John Vickery, on September 8, at his home, in Exeter, England. Mr. Vickery was a brother of F. C. Vickery, of Plainview, and the late R. Vickery, of Fort Worth. He was 47 years of age, and leaves a wife and several children, who were with him in England. In June, 1913, Mr. Vickery returned to his old home in England from Ennis, Texas.

ENLARGING FURNITURE STORE.

Workmen are engaged on an addition to the brick store building of Paxton & Oswald, on Broadway. The building is being extended to the alley property line.

ARE PROSPECTING HERE.

Mr. and Mrs. G. D. Rato, of Omaha, Neb., are here this week prospecting. Mr. and Mrs. F. A. Gillespie, of Garden City, Kansas, who have been here previously visiting, are here for a few days, also.

The Value of Dairy Cows

Are of Highest Value When Six Years Old, According to Estimates of Dairymen.

According to estimates made by more than 1,800 dairymen and breeders, the dairy cow reaches her highest value when between 5 and 6 years of age. These estimates have been used as the basis of a study on the influence of age on the value of dairy cows, just published as Department Bulletin No. 413, by J. C. McDowell. The figures were obtained from well informed farmers throughout the principal dairy districts of the country, and the average may be taken as fairly representative of relative values of cows at different ages.

Estimates were obtained for four of the leading dairy breeds (Holstein, Guernsey, Jersey, and Ayrshire) and for four classes of 3-year-olds of each breed, namely, the \$80 grade cow, the \$100 grade, the \$200 pure bred, and the \$300 pure bred. Working from this series of arbitrary values, estimates covering values from birth to 14 years of age were obtained. For example, it was found that the farmers estimated that a grade Holstein worth \$80 at three years of age was worth \$10 at birth, \$101 at six years of age, and \$46 at 14. In the case of the pure breeds the estimated advance in value up to five or six years of age is relatively sharper, and the decline thereafter correspondingly abrupt. Thus the \$300 pure-bred Jersey is estimated to be worth \$59 at birth, \$351 at six years, and but \$74 at 14.

The accompanying table summarizes the results of this study, showing the estimated rise and fall in values for the different breeds and grades in percentage of maximum value. It is believed that within certain limits this table will be of use to the average dairyman in determining roughly the values of classes of cows other than those specified. Thus the per cent column for the cow worth \$80 at three years of age should be approximately correct for the one worth \$70 at that age; likewise the figures for the cow worth \$100 at three years should hold for the one worth \$110 at that age. On the other hand, however, the figures for the \$300 pure bred would not be applicable to the cow worth \$600 or more than three years of age.

Motor News of General Interest

SUNDAY DRIVING ONCE—AND NOW

Do you remember how on a Sunday afternoon, after everybody had been to church in the morning, and had come home and eaten a fill of stewed chicken and warm biscuits and cherry pie, that grandpa used to hitch up Kitty for an afternoon drive and bring her around to the gate? And then you used to get in gingerly, for fear she would start off abruptly, and, curling up beside the bearded driver, used to draw the odoriferous lap-robe around your belt, and start for the country roads and hill tops? Do you remember—will you ever forget—the taste of warm, sweet elderberries picked at the roadside, or the celestial coolness of a drink from a moss-edged spring, brought to you in the tin cup that they always kept under the rear seat with the storm curtains for the surrey?

If you have any such memories, treasure them zealously, for the family horse is passing, and, like the glory that was Rome's, the gaiety and splendor of the surrey is seen no more along the highways. Nowadays, we have it on the authority of a writer in the Indianapolis News, the family pours in the gasoline and away they go at the wheel, in a whirl of dust, for the next county. It's a motor age. Dinner at home, and tea—nowadays lots of people can't get along without tea—tea in the next town, seventy miles away. It's the way of the world. The account of the change tells us, in part:

"Already the automobile has become the vehicle of family history. You know how it used to be, how the family was forever recalling the days of Old Pet, or Selim, and how the mention of the old family horse inspired prolonged and delightful reminiscences in which the family story joggled along behind the memories of the bays and the blacks and the grays we used to drive. You remember the peculiar understanding that existed between mother and Old Pet, the gray that had a crooked tail. Mother never would drive any other horse, and cried when the crooked tail was trimmed into an absurdity in an effort to make it look straight. You did not care much for Old Pet yourself, perhaps, for she was a nambling sort of creature, but those Saturday-morning drives in the country with mother holding the reins had a charm that lingers about the memories of that little gray mare. As for Selim, mother never understood the dainty black's impetuous ways, and could not be persuaded to drive him. By the time Red became the family horse the children were beginning to drive by themselves, and not just hold the ends of the reins, and it is a wonder that Red lasted as long as he did. He was a tough one, though, that black-nosed little bay, and kept his own independence through many years of trials that would have lessened the courage of another horse. Queen, the big dappled, cream-colored mare with the wavy mane and tail, came after Red, and you remember that father almost sold her to every circus that came to town, and then Boy was the last and perhaps the best of them all. He was a real horse, father used to say. Boy came from Kentucky, and was as proud, and as gentle, and as gay and as wise as a thoroughbred should be.

"That is the way the story used to travel."

Life in the old times was a succession of horses, and, as we are told, the tale winds about from one to another, taking in the individualities of each, much like when you were very young and learned the verses about the British rulers—you know the one, "First William the Norman, and William, his son, . . ." and each ruler had a definite association in the juvenile mind. And the horses, though varied, were largely similar. But nowadays, with the motor, there seems to be no similarity between the first stubby car, with scrawny springs and wobbly wheels, with a rattle and a bang as it chug-chugged down the road, and the silent giant one buys today. The tales travel by automobiles now, with many a gap and chasm between the representatives of the clan. We read:

"Automobiles seem, somehow, to take the family along more swiftly and through stranger places. There was not so much difference, after all, between Old Pet and Boy, but the new automobile seems in no way related to the funny little long-handled first one. And while the family grew very slowly during the years of the family carriage, it has become, with weddings, and colleges, and professions, smaller and smaller with the most unpleasant rapidity during the years it has traveled in automobiles. That narrow-chested, complaining, long-handled little one was very soon forgotten in the possession of a grand affair into which we crawled by way of the back door and which we wore all with its fuss and noise. That one was turned in—for, of course, there is no pleasant pasture for worn-out automobiles—as first payment on a second-hand touring car, a remarkable creation that was

forever losing its parts, and getting along just as well without them. After that the family rejoiced in the possession of a brand-new car, only to be convinced, before the year was over, that there wasn't really any use at all in having an automobile if it was not at least a six-cylinder one. And so, as the family has grown smaller, the automobiles have grown larger, the latest vehicle of the family history being a seven-passenger, six-cylinder machine that would have frightened Old Pet out of her wits."—Literary Digest.

TEXAS MAN CLIMBS PIKE'S PEAK IN WILLYS-KNIGHT CAR.

R. S. Neville, of Dallas, Texas, in a Model 84-B Willys-Knight car, was one of the first drivers to reach the top of Pike's Peak over the new roadway which was recently opened to the public. Mr. Neville made the climb on the day the new highway was opened. Fifteen hundred cars started up the hill that day, but very few completed the trip, as the road was soft in spots, owing to its newness. Near the summit of the mountain the melting snow further impeded the traffic.

WOOL SALES IN ALBERTA.

(By Consul Harold D. Clum, Calgary, Alberta, Canada, Sept. 5.)

According to unofficial figures now available, the Province of Alberta produced approximately 1,870,000 pounds of wool during the current year. Southern Alberta is reported to have shipped, in all, about 1,318,000 pounds, the district centering on Calgary about 285,000 pounds, and the remainder of the Province approximately 267,000 pounds.

At the annual wool sale of the Alberta Sheep Breeders' Association, held at Calgary early in August, 280,515 pounds of wool were disposed of for \$83,867, while the South Alberta Wool Growers' Association handled 413,209 pounds at its sale, held at Lethbridge in July, realizing \$134,930. This is understood to have been the record sale not only of Alberta, but of the Dominion. The members of this association also disposed of 118,464 pounds through their office for \$35,539, making a total of 531,673 pounds, worth \$170,469, handled by the association. The average wool return per head of sheep owned by the members of this association was \$2.02.

The average price realized at the Calgary sale was 29.9 cents per pound, while the average price obtained at the

IT IS EASIER TO SAVE THE HAIR YOU HAVE

Than to Grow New

The tendency to put off until tomorrow what we should do today accounts for most of the bald heads we see in the front row. Newbro's Herpicide stops falling hair and prevents baldness. The dandruff is destroyed by its use and a condition of health maintained in the hair and scalp. Nearly everyone has hair troubles of some description which Herpicide will correct. Don't wait until it is too late. It is conceded to be the standard hair remedy and is recommended and applied by all the best hair dressers and barbers. Newbro's Herpicide in 50c and \$1.00 sizes is guaranteed to do all that is claimed. If you are not satisfied your money will be refunded.

THE R. A. LONG DRUG STORE.

Lethbridge sale was 32.65 cents per pounds, which is believed to have been the best price ever realized for such a large quantity of wool in Canada. It is estimated that the entire clip of the Province brought in the neighborhood of \$561,000. By far the greater part of the shipments went to Boston, Mass.—Daily Commerce Reports.

A NEW RECORD IN MILK PRODUCTION.

In 1907 a Holstein cow, Colantha's Fourth Johanna, made a record of 27,432 pounds of milk in one year. This record was so much larger than any previous record that some men were not afraid to predict that it would never be surpassed. And it was not surpassed until 1915, when Tilly Alcartra, another Holstein, passed the 30,000 mark, with a record of 30,452 pounds of milk. This was indeed a remarkable record. Again there were men who predicted that this new record would stand for all time.

Recently the news came from the State of Washington that Tilly Alcartra must give up her laurels. Lutsche Vale Cornucopia, a Holstein, has just completed a year's record with 31,239 pounds of milk to her credit. Since a quart of milk weighs 2.15 pounds, 31,239 pounds of milk equals 14,529 quarts. At 8 cents per quart, Lutsche Vale Cornucopia's milk would have been worth \$1,162.

Something like 3,600 pounds of dry food material could have been obtained from the milk given by Lutsche Vale Cornucopia in one year.

The carcass of a 1,200-pound steer contains a little over 500 pounds of dry matter. In this 500 pounds are included considerable material, such as bones, hair, hide, etc., that cannot be used for human food. Two years are

usually required to bring a steer to 1,200 pounds weight. In one year Cornucopia produced more than seven times as much dry food material as can be obtained from the carcass of a 2-year-old steer. And practically all of the dry food material of milk can be used by the human body, while a considerable portion of the dry material from the carcass of a beef animal cannot be so used. The dairy cow is indeed a wonderfully efficient and economical producer of human food.—J. M. Fuller, dairy department, Oklahoma A. & M. College, Stillwater.

TWO CARLOADS HERE TODAY OF THE

A KNOWLEDGE of motor car principles leads the prospective buyer to the Buick car—as surely and inevitably as the needle seeks the pole.

There is no greater fallacy than the oft expressed one that "any standard motor car is a safe buy." When a member of a man's family becomes ill he doesn't turn to the classified directory in the telephone book and send for "any regular doctor." Indeed not! He sends for that doctor about whom he has *knowledge*.

And *knowledge* of motor cars is the guiding principle by which you should be actuated in making a purchase. It is the principle that the Buick Motor Company is extremely anxious for you to accept in reaching your decision.

A *knowledge* of motor car principles will lead you to the conviction that the Buick Valve-in-Head motor is the most powerful and efficient motor made—the most powerful because it conserves and uses a higher percentage of the heat energy contained in gasoline than any other motor, and the most efficient because it is so constructed that each fresh charge of gasoline vapor taken into each cylinder is not diluted through mixture with portions of the dead gases remaining from the last previous explosion, as is the case with other types of motors. The power and efficiency, because of these reasons, is approximately one-fifth more than in other types of motors of the same cylinder dimensions.

You will regret it if you allow yourself to be stampeded into buying a motor car. Make sure that you understand the fundamentals. You can very easily acquire an understanding of those underlying mechanical principles which it is necessary to have in order to buy a motor car *intelligently*. We will be very glad indeed to help you acquire this knowledge at any time.

Motor News of General Interest

TO ENLARGE OVERLAND PLANT.

By New Year Company Will Be Prepared to Turn Out 300,000 Cars Annually.

By the end of the present year the Willys-Overland Company will be in position to manufacture 300,000 cars annually, according to a statement by John N. Willys, president of the company.

The total outlay for this construction and additional equipment will be less than \$5,000,000, and will terminate, temporarily, at least, the company's policy of expansion, which has made Overland the second largest car manufacturer in the world.

From this time on, Mr. Willys states, the energies of the organization will be devoted to reducing costs, increasing efficiency and improving production.

The recent sale of 600,000 shares of common stock has placed the company in such financial position that no further increase in preferred or common will be required for its expansion, it is announced. The statement of assets and liabilities as applied to the balance sheet of June 30, last, shows that upon payment for the new stock the company will have more than \$20,000,000 cash on hand and more than \$25,000,000 of other quick assets.

Mr. Willys owns a majority of the common, and states that it is his intention to continue personally to control and direct the affairs of the company.

HINTS FOR THE CAR OWNER.

A very handy tool is a portable vulcanizer. With it the tube may be patched and the expense of having it done outside may be saved. It may also be used to close up cuts in the tread of the outer shoe, thus prolonging its life. The method of using it may be easily mastered after a few attempts. Use an old tube to practice on and you will never use applied patches after you learn to vulcanize.

Inspect the cones of your front wheel bearings occasionally. When they begin to wear through at the bottom they use up a lot of power and should be shifted. Turn them one-quarter around. This brings a new surface into use and so prolongs the life of the bearing.

An interesting and profitable trip that every motorist should take, but very few think of, is a trip under the car to see the condition of things there. Inspect brake connections, to see if there are any which do not get attention when the car is oiled. See if they are wearing out or weakening. Sometimes one finds grease cups that have been neglected for a long time. Also inspect the universal joint, to see if it is loosening up or needs grease.

Watch the steering wheel for lost motion, i. e., any movement which does not move the front wheels. One inch or even a little more is not objectionable, but if any more develops it should be removed by adjusting the steering gear. If a looseness develops suddenly and tends to increase rapidly, it must be corrected immediately, as it shows that some part is coming loose and will soon drop off, rendering the car unmanageable.

Never take a car out on a hill to work on it without knowing the brakes. To test them properly the rear wheels should be jacked up and the brakes applied gently and then firmly. At the same time the wheels should be tried, to see if they turn freely or are held rigidly. If there is no time for the above test, speed up and stop the car several times, using the foot brake and emergency brake separately.

MOTOR VEHICLES FORCING FAITHFUL HORSE FROM SCENE.

This is the Golden Age for horses. There's nothing for them to do. Not only has their usefulness in the social sphere become a thing of the past, but now they are being crowded from industrial activity. Look around the city streets and you can't fail to observe the scarcity of horses in delivery work. The commercial motor vehicle is rapidly coming into its own, and with its ascendancy horses are becoming a negative quantity in the great whirl of city traffic.

Business firms and corporations having a great amount of light delivery work are coming more and more to the realization that the light delivery car furnishes the solution of their transportation problems. Not only private corporations, but great municipal, state and Federal departments are introducing the light commercial motor vehicle into their work, and it has been found universally serviceable, economical and dependable.

RUNS AUTO ON KEROSENE.

While stories have been told and retold of freak performances of automobiles, E. E. Lawson, of Oakwood, Okla., tells one that occurred on his recent tour into West Virginia which is well worth recording. Driving an Overland New Series Model 75-B touring car, Lawson ran out of gasoline a few miles after entering West Virginia. He managed to reach a small farm house, and went there in quest of "fuel." All he could get was a quart of kerosene. With the next town four and a half miles away, he decided to take a chance. He poured the kerosene into the tank and stepped on the starter. Almost immediately there

was a whir, and with a few sputterings the car proceeded on its way. Although he found the new "fuel" lacking in the power of gas, he succeeded in making the next town with comparatively little difficulty.

EARLY USE OF KEROSENE AS FUEL PREDICTED BY JOURNAL.

The widespread efforts to perfect devices which will make the use of kerosene as automobile fuel practicable are responsible for the following editorial in The Automobile:

"The stimulus given to the use of kerosene in internal-combustion engines on both sides of the Atlantic simultaneously can not fail to have a great effect on the automobile industry. The rising price of gasoline in America has made it almost impossible to operate a tractor on the lighter fuel; many trucks are now running on kerosene, and devices are appearing which will function well in passenger-car service.

"In England government control of gasoline has almost shut off supply from passenger-car users and has restricted the commercial vehicle supply greatly, so that a man must burn kerosene in his engine or allow his machine to lie idle. The inventive genius of two great engineering nations is thus concentrated on the one problem. "It is not an easy problem in many ways, but it is no harder than many others that have been solved, and there is reason to feel confident that the days of gasoline are numbered; at least for gasoline as the commonest automobile

fuel. So many inventors are so near the kerosene carbureter that will do everything that can be done with gasoline that perfection can not be far off. A little merging of patent interest, a little give and take between the inventors and a little really sympathetic interest on the part of motor-car manufacturers are needed. Given these three things and the problem is solved. "If the matter is not tackled promptly and squarely, the European industries will steal another march on the American trade."

STEALS CAR; SENDS CHECK.

Texas Man Wants Dodge Brothers Car So Much That He Drives Off Demonstrator.

Dodge Brothers motor cars are in great demand, to say the least, in West Texas. In the Panhandle, for instance, they steal them, if they can't get the cars by other means. An Amarillo paper tells it:

"In the midst of prosperity many are unable to get cars even after they have been ordered for several weeks. Every shipment of cars unloaded in Amarillo finds many buyers ready with the hard cash and eager to drive away. Last week, according to W. E. Groendycke, a Dodge Brothers customer from Panhandle wanted a Dodge Brothers car badly, but could find none in stock except Groendycke's demonstration car. He watched his chance. While the dealer wasn't looking he drove away with the only car remaining in the place. Officers were scouring the country, but no trace of the car was discovered until the 'anxious buyer' called by long-distance telephone and informed Groendycke that he had

bought' the car and was sending a check for it.

"What else could I do?" asked the

'purchaser.' 'I had to have that car.' "What else could I do?" asked the dealer. 'I had to let him keep it.' "

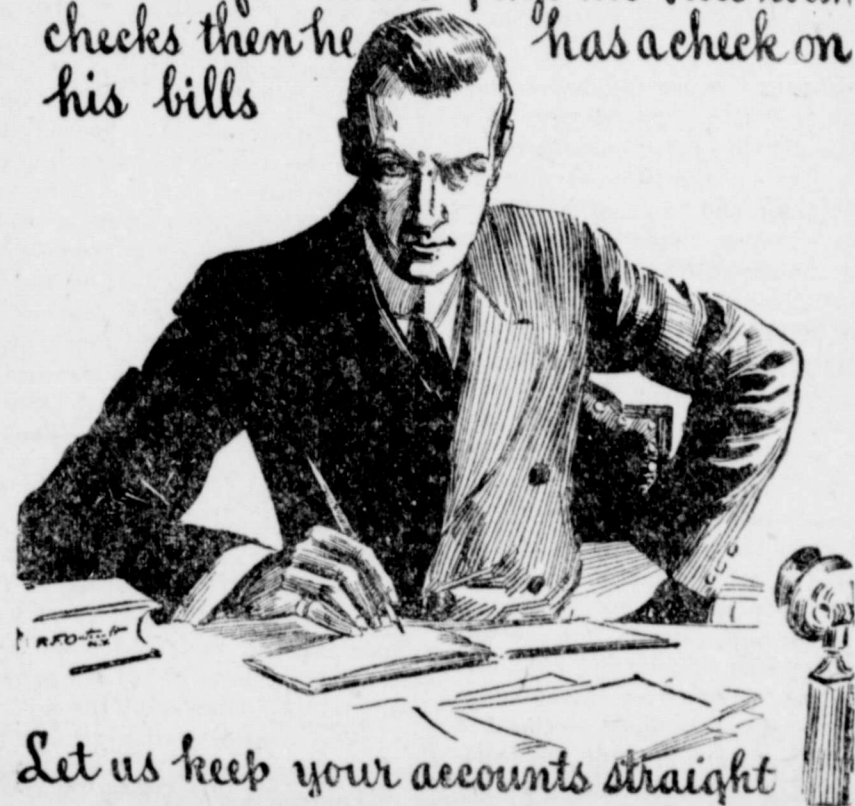

beauty

These new Studebakers—the FIFTY horse power SIX at \$1085 and the FORTY horse power FOUR at \$875 are striking examples of the Studebaker ideal of beauty—nothing freakish or faddish but modest and dignified in design. Style that will be just as popular in years to come as it is today and a finish that does not grow old. Isn't that the car you want?

HOW PAVEMENTS PAY DIVIDENDS

BEFORE AND AFTER

The problem of maintaining good streets comes before every municipality. There is to be considered not only the cost of installation but the cost of maintenance. It is a recognized fact that good streets enhance the value of all abutting property; they lower the cost of transportation in whatever region they may be for both motor-driven and horse-drawn vehicles; they are passable in all kinds of weather; their cost of maintenance is small compared with streets of only temporary crown material. There is the question to answer, does increased property valuations, which are ordinarily in excess of the cost of constructing permanent streets; the lowered cost of transportation; the civic attractiveness and ethical benefits; and the lessened cost of maintenance offset the high cost of installation; and are clean, firm, permanent streets under our conditions preferable to dusty, rough, muddy and unsightly dirt roads through our business section?

Short-Time Farm Loans Explained

Being an Exposition of the Purposes and Aims and the Administration of the New Federal Loan Act.

II. Purpose and Size of Farm Loans.

Every farmer before borrowing money should ask himself certain questions, according to Bulletin No. 409, "Factors Affecting Interest Rates and Other Charges on Short-Time Farm Loans," recently published by the U. S. Department of Agriculture. Very often the farmer who does not ask himself these questions may find that the banker will require answers before he makes the loan.

"As the importance of promoting and encouraging improved systems of farming becomes increasingly apparent," to quote the bulletin, "attention will be directed more and more toward such questions as the purpose and size of farm loans. How are the proceeds of a proposed loan to be employed? Are they to be expended for a productive purpose, such as would lead to improvement in the farming business? Is the size of the loan well adapted to the purpose in view? Does the period for which the loan is to run conform to the time the capital is actually needed. All of these questions have a direct bearing on the costs of short-time farm loans.

Purpose of the Loan.

The use of any given loan ought to

yield a return sufficient at least to repay both interest and principal. If the returns are not sufficient for this purpose, then the money should not be borrowed. The only way in which the use of credit can be directed so as to serve the interests of improved agriculture is to control the extension of loans so that they may be used for productive purposes only. This means, at the same time, a safer use of credit.

In some localities banks offer loans to farmers at reduced rates of interest when the money borrowed is used for some specific and approved purpose, such as the purchase of live stock, the building of silos, or the making of other improvements which will make farming more profitable under the given conditions.

Size of the Loan.

The banker usually charges a higher rate of interest on a small loan than on a large one. The clerical and book-keeping expenses are the same in both cases. Unless a higher rate were charged on small loans, the point would be reached where the expenses connected with such loans would be greater than the interest. On the other hand, it pays the banker to handle large loans at a lower rate of in-

terest.

"The importance of restricting loans to those for approved productive purposes and of having the size of the loan conform to the requirements of sound farm investment has been recognized by some bankers to such an extent that they employ advisers who discuss such questions with their farmer patrons in order to promote the interests of their farm-loan business. This plan has been followed by banks in the Central West, in New England, and in the South. The plan of one of the Southern banks may be taken as an example. The agricultural adviser employed by this bank, after a conference with the prospective borrower, decides whether the proposed loan is businesslike and expedient. If the purpose of the loan meets with his approval, he works out a plan of procedure with the farmer. The farmer may consider that he needs a loan of \$1,000. As a result of his conference with the adviser it may be found that \$700 is sufficient. They discuss the safety of the proposed investment, the additional equipment necessary, and in case live stock is to be purchased, the crop rotation that will furnish the most economical supply of feed. These items are all arranged and agreed upon before the bank makes the loan. After the loan has been made and the capital invested, it is the duty of the adviser to visit the farm from time to time to see if the plan adopted is adhered to and if the investment is yielding proper results. Such a plan means added pro-

tection to both the farmer and the banker."

PAY DAY IS WELCOME ALWAYS TO PLAINVIEW SOLDIERS.

In Camp, Sanderson, Texas, September 24, 1916.

Satisfaction among the boys has been the rule yesterday and today. Pay day this month was somewhat late. Last week an article appeared in one of the papers that the Guards who had not received their pay would not receive any until they were mustered out, and as the mustering out is an indefinite article, the boys were feeling a little blue. Friday we were agreeably surprised, as the captain with his guard arrived from Marathon, and that afternoon we were paid off.

L. R. Pearson was ordered to join our company at Marathon last week, but Tuesday he passed through here

on his way to San Antonio.

When our teamster, Cornell, left on his furlough, our laundryman, Slim Watkins, applied for his job. Slim is very anxious now for Cornell to return. He says there is no fun in trying to keep track of a bunch of mules without a stable or corral.

Our acting quartermaster, C. S. Nilsson, left for Marfa last week for a minor operation. We expect him to rejoin us this coming week.

Three of the boys left yesterday afternoon to try their hand at fishing in the Pecos River between here and Del Rio. They returned this morning on the early train, and said the water was too muddy to catch any fish.

I was pleased to note in Tuesday's issue of The Herald that my old friend, Z. E. Black, was returning to Plain-

view to become one of its citizens again. (Black, I wish you luck in your new position.) The Y. M. B. L. could

not have made a better choice for secretary, no matter how many applicants they had investigated. I know that Black will make them a good man.

I received a letter from L. R. Pearson the other day, and he said they certainly were working him at San Antonio.

Friday afternoon, after we were paid off, we took up a collection among the boys and sent Sergeant Dishon to Alpine to see if he could buy the pair of bears. If he is successful, we will have quite a menagerie, as this week we picked up a sheep that had hurt its leg and had dropped out of a drove that was passing camp. The sheep is somewhat better. Our hog is getting very tame, and will follow anyone that wears Uncle Sam's uniform.

In spite of all the reports that the Fourth Texas would be mobilized, we are all on the job. W. J. KLINGER.

COOL DAYS and HOT DRINKS

Sounds Good Doesn't It?

We Want You to be Convinced that We Stand Ready to Give the Sort of Service You Most Desire When You Desire It

We have already commenced serving a few Hot Drinks, Chili, Sandwiches, Hot Lunches, and other cool weather dainties. This menu will be increased as the colder weather comes on and we want you to know that whatever the season demands you will find here.

If you haven't yet become acquainted with the Kansas City Star and the Kansas City Times we want you to read a copy of each. These newspapers are paramount in the field of conservative up-to-the minute publications. They give all the news that is fit to print and give it with the stroke of the gong. Drop in as you go home some evening and take a copy home for the evening reading. We have a nice assortment of magazines to supplement your news reading.

AMERICA AND PROSPERITY.

The United States is a creditor nation. No less authority than John Skelton Williams, Comptroller of the Currency, in his address before the American Bankers' Association, is quoted:

"Is it not hard to grasp the thought that this country of ours, which in 1902 had already reached a pinnacle among the nations, has since that year doubled the volume of its business in virtually all the great cities of the land?" he asked. "If we should divide the new wealth created annually among all the men, women and children engaged at work, they would not be far from a thousand dollars per year each.

"Our deposits in all the banks throughout the United States at this time are so huge that if there should be withdrawn from these banks an amount of deposits equal to the total resources at this time of the Bank of England, the Bank of France, the Bank of Spain, the Bank of Netherlands, the Bank of Norway, the Bank of Sweden, the National Bank of Switzerland and the Imperial Bank of Japan, all combined, the deposits of our banks would still be as great as they were three years ago.

"If a balance should be struck today the probabilities are that we would find ourselves, for the first time in our history, a distinctly creditor nation. We hold a mortgage on the world's physical assets. The world holds a mortgage on our soul, on our good will and broad nobility of purpose."

COURTESY.

Courtesy is a business asset. It is a mark of good breeding. Even the discourteous like to have courtesy shown them.—Plainview Herald.

Courtesy is capital. The man without it is broke. Sometimes it happens that a boor gets rich; but not often. And after he gets rich his boorishness still shows through the gilt. To treat others as you would wish to be treated is only a variation of the rule for doing as you would be done by. The poor duff who thinks it decorates his own importance to be rude is giving himself more consequence than anybody else allows him. The smartest man in the world is a dunce in some respects, and the mutt who makes it a habit to be discourteous to those over whom he exercises a bit of brief authority is naturally a crude and coarse and cowardly individual. To insult weaklings, either physical or financial weaklings, is no sign of courage. But it is the one best sign of a cheap character.—State Press in The Dallas News.

CITY NEEDS AWAKENING TO ITS RESPONSIBILITY.

"The next great thing to do for the betterment of agriculture and rural life is effectively to awaken urban communities and business men to a sense of their responsibility towards agriculture and rural life and to enlist their constructive interest and support for their improvement," is a statement by Hon. D. F. Houston, Secretary of Agriculture, before the Association of Commercial Organization Secretaries in Cleveland, Ohio, Monday.

President Wilson has said: "It has, singularly enough, come to pass that we have allowed the industry of our farms to lag behind the other activities of the country in its development. * * * It is from the quiet interspaces of the open valleys and the free hillside that we draw the sources of life and of prosperity, from the farm and the ranch, from the forest and the mines. Without these every street would be silent, every office deserted, every factory fallen into disrepair."

The South Plains is making splendid progress in agriculture, but the era of development has barely begun. The State Department of Agriculture, the University of Texas and the Federal Extension Service have all come in touch in a very intimate way with this section. They go where their work will mean most. It does not follow that they go where there is the greatest need, but, rather, where the best co-operation and willingness to be assisted is shown; for there the most good can be accomplished. These splendid departments of government deserve the support of South Plains citizens, both on the farm and in the towns. Most intimate of all the agencies helping to build up the agriculture of this immediate section of the South Plains is Dr. R. F. Hare, whose helpful office is maintained partly by the counties of Hale and Floyd and partly by the Federal Extension Service. The splendid co-operation given him by merchant and farmer bespeaks the alacrity and farsightedness of our people.

EDUCATION PAYS IN CASH.

According to a survey made of 100 Kansas farms recently, the farmer with a high-school education is making 70 per cent more profit than his neighbor with only a common-school education, while the college graduate is earning an income so much greater than that of either that he is frankly in a class by himself.

Here is an argument for education that gets right down to brass tacks. The remark is heard frequently that the farmer's boy does not need much education unless he intends to leave the farm and enter one of the professions, but this survey has developed the fact that he can stand all he can get.

Moreover, inasmuch as one of the burning questions of the hour in Texas is the further development of our educational system and the most fundamental need in this connection is money, this information comes to us with special timeliness. Governor Ferguson will ask the next Legislature to appropriate \$2,000,000 for rural schools, and the movement in the direction of creating rural high schools by consolidation will be continued during the coming year. Also, West Texas will ask the Legislature to create an Agricultural and Mechanical College to be located in that section and devoted to developing trained men to deal with the peculiar conditions of soil and climate which prevail there. All of this and other educational reforms which may be urged will cost money. Here is argument to justify the expending of all the money we can spare.

We knew before that education makes for better citizenship and more wholesome social conditions generally, but here is a clinching argument. It shows conclusively that education pays cash dividends, not only to the community, but to the individual. Let's have as much of it as we can afford.—Fort Worth Star-Telegram.

West Texas, just as every other progressive citizenry, wants better educational facilities. She wants an Agricultural and Mechanical College of her own, because, in the first place, she believes she is entitled to it. She pays her taxes, and liberally, too, to the support of the present Agricultural and Mechanical College, and in so far as practical benefits are concerned, she is almost left out of the reckoning.

Education pays in cash, to say nothing of the other benefits; and West Texas has not been slow to provide good public schools, good private schools, colleges and academies. She needs an agricultural college which will teach young West Texans practical farming under conditions dissimilar to those of any other section of Texas. The State owes it to this section, which has subsidized the common schools of the rest of the State for these many years, to do the substantial thing by West Texas.

SEVEN CARS STOCK SHIPPED DURING THE PAST WEEK.

Wednesday two cars of cattle were shipped to Winston, Ariz., by J. L. Creswell.

L. A. Knight shipped three cars of horses to Fort Worth this morning.

Two cars of hogs were shipped to the same market Saturday morning by W. A. Watson & Son.

STATE FAIR COMPARES WELL WITH OTHER GREAT FAIRS

President Knight Has Just Returned From Visit at Nation's Greatest Expositions.

DALLAS, Texas, Sept. 28.—President R. E. L. Knight of the State Fair of Texas announces that, aside from what may be termed "the finishing touches," the big Texas exposition is ready—ready for the biggest year in its history and with every preparation made for the proper entertainment of more than a million visitors.

Mr. Knight has just returned to Dallas from an extended visit to Northern and Eastern cities, and during the trip had an opportunity to take in some of the largest of the Northern fairs.

"I was particularly impressed," said Mr. Knight shortly after his return to Dallas, "with the Indiana, Minnesota and Wisconsin fairs. Each of these three states had a splendid exposition this year, and was playing to enormous crowds. I was informed by officials of each that new high attendance records were being established every day, and I consider this a most happy augury for our Fair. There can be no doubt that 1916 is a prosperous year—and prosperity and big fairs seem to go hand in hand.

"While some of the rats I saw on this trip were monumental in size, I think the State Fair of Texas would profit from a comparison with the best of them. It is a well-known fact that we entertain annually more people, and I think it is equally well known that we entertain them properly.

"For this year the Fair management has provided a Fair that represents the very best obtainable in all sections and divisions. This is as true of exhibits as of amusements.

"During the past year we have made considerable improvements at Fair Park, in anticipation of an unusually big Fair, and the way that requests for exhibit space have been coming in surely proves that our work was founded upon something more substantial than optimism.

"I am well within the facts when I say that we will have more exhibits, and better exhibits, than ever. In some departments the increase is more than fifty per cent. It is at least 25 per cent in all sections. This is probably due, in a measure, to the fact that we have offered largely increased premiums, but the general prosperity of the country and the former good work of the Fair are factors that have contributed most to our growth.

"When it comes to amusements I am almost afraid to make a perfectly truthful statement of what attractions have been secured, for even a simple list of the various engagements sounds much too big for a State Fair. Briefly, we will have the largest and most expensive Vaudeville show the South ever saw, with eight big head-line acts. Then we will have a three-ring Circus and Hippodrome, employing the services of thirty of the best-known and most popular acts in the circus world. We will also have championship automobile races, with all of the world's best dirt track drivers entered. I don't mean a few of the best, but actually all the stars of the game today. I don't think there is a dirt-track driver of any prominence either in this country or Europe who has not sent in his entry blank for our races. We will have seven big events each day, including the fast State Fair Sweepstakes, in which the real speed merchants are to lock horns. During the past year we have remodeled our track for automobile racing, and experts who have seen it say that it should prove to be one of the fastest in the country.

"We'll have a thousand things in addition to what I have mentioned. I can't think of them all, but will just take refuge in the simple statement that no feature has been overlooked to make this the biggest Fair in the history of all Fairs.

"The railroads are all offering popular rates throughout the entire period of the Fair, October 14 to 29, and confidently expect to see a million good Texans within our enclosures during the Fair."

WATSON INDICTED AGAIN.

WACO, Texas, Sept. 27.—T. R. Watson has been indicted by a grand jury in McLennan County, charged with the murder of State Commissioner of Banking and Insurance John S. Patterson. Watson is president of the Farmers and Merchants State Bank of Teague.

FOX WILL BE HERE NEXT WEEK.

Roy E. Fox, manager and proprietor of the Fox Popular Players, has announced that the company will remain in Plainview at least another week.

Mr. Fox is presenting a class of plays unusual for the repertoire companies making the smaller towns. The wide variety of his plays makes it necessary to place some of the players in roles to which they are not suited, but each actor is found at his best and well

served to his part in some one or more of the offerings. That his company pleases Plainview people is shown by the steady patronage given him. Some of his between-acts monologues are most excellent.

SANTA FE HAS GOOD YEAR.

NEW YORK, Sept. 27.—Gross operating revenue of the Atchison, Topeka & Santa Fe Railroad for August showed an increase of \$2,334,485 and net oper-

ating revenue increased \$1,632,515. For the year ended August 31 the company shows 6.28 per cent earned on its property investments, compared with 5.09 per cent in the preceding year.

Announcement

We have purchased the furniture and undertaking stock of E. R. Williams and will continue the same in the present location.

Our Mr. W. Flake Garner has been with Mr. Williams for several years and is well known in the community. Our Mr. M. P. Garner is also well known here although he has been a resident of Canyon in recent years.

The new firm solicits the continued patronage of the old customers of Mr. Williams assuring them and all new customers which we may attract of an up-to-date stock of standard lines of merchandise and courteous attention to their needs. If you have not traded here before we want you to consider doing so now. We will make every effort to make the service and the prices attractive to you.

Come in and get acquainted with the new firm and their stock.

In another place in this paper you will find an important announcement of our approaching Hoosier Kitchen Cabinet Sale. Read every word of it. Its highly interesting.

GARNER BROS.

Furniture and Undertaking

Winter Baking

WHEN the nipping days of Fall come and the kitchen fire feels mighty good to be around the housewife determines to take advantage of the situation to do her own home baking. Every member of the family has been looking forward to the time when the steaming biscuits, rolls, pies, cakes, and home made bread are to be served on the home table.

That time has come—the time when the "woman in the house" can best serve her household and save money thru home baking without sweltering over a hot stove.

To make the baking all that it should be there remains but one prime necessity—that of good flour, the principal ingredient contributing to the success of the baking.

Pride of the Plains Flour

will answer every requirement you demand in good baking. It is a home made product, chock full of the nutrition in Plains grown wheat of the best quality. Every dealer in Plainview handles this flour or will get it for you if you insist upon it. Don't get into the habit of shifting from one make of flour to another. Make it Harvest Queen flour and stick to it.

HARVEST QUEEN MILLS

A. G. HINN, Prop.

SOCIETY

Telephone Number 72

ANNOUNCEMENT.

The Five Hundred Club will meet with Mrs. Jos. Buchheimer Tuesday afternoon, at her home, in Lakeside Addition.

The Junior Missionary Society of the Methodist Church will meet tomorrow afternoon with Mrs. Jno. Lucas, at her home in Lakeside Addition. Hours, from four to six.

WEDNESDAY BRIDGE CLUB.

Miss Jo Keck delightfully entertained the Wednesday Bridge Club and a few invited guests yesterday afternoon, at her home, on Denver Street.

Five tables were arranged for bridge, and a number of enjoyable games were played.

Before the close of the evening a dainty salad course was served to the club members and the following invited guests: Mesdames H. W. Harrel, Wm. Cook, F. W. Clinkscales, P. J. Wooldridge, R. W. Otto, E. L. Dye and E. E. Roos, and Misses Vera Newton, Kathleen Joiner, Jennie Humphreys and Louise Donohoe.

SILVER TEA NETS LADIES OF PRESBYTERIAN CHURCH \$7.50.

The Woman's Missionary Society of the Presbyterian Church gave a Silver Tea Tuesday afternoon, at the home of Mrs. T. B. Haynie, 304 West Eighth Street.

A splendid program was enjoyed. First, Mrs. G. Graham delighted the guests with a reading; then Miss Donnell gave a charming vocal solo. Other pleasing numbers were readings given by Misses Maurine Richards and Adrienne Hanby and a piano selection by Mrs. T. B. Carter.

Tea and cake were served during the evening.

About forty-five guests enjoyed the occasion, and seven dollars and fifty cents was received.

EPWORTH LEAGUE PROGRAM FOR SUNDAY, OCTOBER 1ST.

Following is the program for the meeting of the Epworth League Sunday evening at 7 o'clock, at the Methodist Church:

Subject—"The Consecration of School Life."

Prayer.

Song.

"What School Life Means"—Miss Maxie Speer.

"The Consecration of Personal Powers"—Miss Martilla Espy.

"Living for Others"—Miss Lucy Story.

Leader—Ralph Porter.

MARRIAGE LICENSE ISSUED TO CECIL WAGONER TODAY.

A marriage license was issued today to Cecil Wagoner and Miss Ida Bramham. Mr. Wagoner left this morning for Amarillo, where the ceremony will be performed.

THURSDAY BRIDGE CLUB.

Mrs. J. J. Bromley was hostess yesterday afternoon to the Thursday Bridge Club, at her home, on Baltimore Street. Other than the club members, there was one table arranged for guests.

At the conclusion of the games, an ice course was served.

DAVENPORT-HARP.

At the home of the bride's parents, Mr. and Mrs. G. W. Davenport, 806 El Paso Street, on Wednesday morning at 8 o'clock Willard K. Harp and Miss Bessie Lee Davenport were married.

Rev. I. E. Gates performed the beautiful ring ceremony, in the midst of a host of friends and relatives. Mrs. Eva L. Barnes played the wedding March, and just before the ceremony Miss Claudia Quisenberry sang "I Love You Truly."

Miss Cora Rountree was bridesmaid, and the groom's attendant was Wallace Davenport.

The bride wore a handsome tailored suit of blue with gray for trimming, and hat and other accessories to harmonize.

They left immediately after the ceremony for Colorado City, where they will visit until about October tenth, when they will be at home in Plainview.

The bride is very popular in the church and social circles, and is a member of one of Plainview's best families.

Mr. Harp is the son of Dr. and Mrs. E. M. Harp, of Abernathy, one of Hale County's most prominent families. He is a partner in the firm of Long-Harp Drug Company.

AUCTION BRIDGE CLUB WITH MRS. O. M. UNGER.

Tuesday afternoon the Auction Bridge Club was delightfully entertained by Mrs. O. M. Unger, at her home, 907 Austin Street.

Those present other than the club members were: Mesdames E. L. Doland, C. F. Myers, E. E. Roos and Ben Smith.

Mrs. Doland was the fortunate player among the guests and Mrs. Kinder won high score for the club.

After the games dainty refreshments were served. Mrs. R. E. Burch assisted the hostess in serving.

HONORING GUEST HERE FROM BIRMINGHAM, ALA.

Mrs. Chas. McCormack honored Mrs. George Wilson, of Birmingham, Alabama, Wednesday afternoon with a delightful party. The rooms were attractive with cut flowers. Bridge and Forty-two formed the principal diversion.

A number of vocal and piano selections were given by Mrs. Geo. Wilson. A salad course was served to the following: Mesdames G. C. Keck, J. R. Kerley, of Amarillo; Jas. R. DeLay, B. C. Holle, F. W. Clinkscales, G. W. Wilson, W. E. Armstrong, E. H. Bawden, L. G. Wilson, Ben O. Sanford, A. M. McMillan, J. W. Willis, L. S. Kinder, R. B. Tudor and P. J. Wooldridge.

SURPRISE PARTY HONORING EFFIE MURPHY, BAYLOR GIRL.

With Misses Lucy Glenn and Myrah Morris as leaders, the young school-mates and friends of Effie Murphy gave her a delightful surprise party Friday night, before her departure, Saturday morning for Belton, where she will attend Baylor College.

They rushed in about thirty strong, and amid much laughter and music Misses Thelma Murphy and Edith Richardson served pineapple punch and veronice wafers, after which the merry crowd enjoyed the pictures at The Olympic and refreshments at "Everybody's."

The girls remained with her for a slumber party, and Myrah Morris, Lucy Glenn and Fern Winn presented to her a beautiful green-and-white "Plainview" pennant as a remembrance.

Those present were: Thelma Reeves, Lois Hatcher, Hazel Sawyer, Zephia Brown, Ruby Miller, Mollie Goode, Electra Hammond, Louise Miller, Lucy Glenn, Myrah Morris, Jones Goode, Kelly Hooper, William Gouldy, Jim Vaughn, Otis Dillard, Ross Towery, Austin Miller, Thomas, Vertrees Barnes and Tom Fletcher.

Chorus, "Hide Me, O My Saviour" ... Tosti

Ladies' Quartet, "The Saviour Is Calling" ... Foster

Postlude ... Lefebure Wely

Evening Service.

Organ Prelude "Fantasia in A Minor" ... Ashford

Chorus, O, My Soul, Bless Jehovah" ... Donizetti

Offertory, "Andantino in B-flat" ... Lowden

Solo, "The Earth Is the Lord's" ... Lynes

Postlude, "Soldiers' Chorus" ... Ashford

HERBERT WM. REED, Organist.

EUGLOSSIAN AND BETA GAMMA SOCIETIES ARE ACTIVE.

Much Interest Taken in Work of Wayland College Literary Societies.

The Euglo and Beta Gamma societies began work this year with some thirty or more members.

The first Friday of regular work a program was rendered. On the Tuesday preceding the societies had a social hour for all students and members of the faculty.

The second Friday, or the second meeting, names of new members were solicited. Fourteen names were submitted. The next meeting sixteen other young people joined the society. Our total enrollment to date is sixty-two.

The object toward which our endeavors are directed is the "loving cup" presented to all societies of the school by A. C. Hatchell. While the cup is the immediate incentive, to win over our rival society in the annual debate is the real motive.

Our society meets each Friday afternoon from half after three until four-thirty. The programs are arranged so as to instruct as well as entertain.

We extend a hearty invitation to every one.

Program for October 6th.

Opening Song—Society.

Prayer—Chaplain.

Roll Call.

Business.

Piano Solo—Miss Mildred Farmer.

Paper—"Life of Queen Elizabeth"—Miss Bessie Simpson.

Vocal Solo—Miss Lucy Dalton.

Paper—"Present Administration"—Earl King.

Debate—"Resolved that Mr. Hughes rather than Mr. Wilson should be the next President of the United States." Affirmative—Otis Dillard and A. R. Ellberry; negative—Ruel Haynie and Willie Graham.

REPORTER.

Fresh Oysters, Celery and other Fall Delicacies at all times at VICKERY-HANCOCK GROCERY CO. Phone 17, if

AT THE METHODIST CHURCH.

The subject for services at the Methodist Church Sunday morning will be an exposition of the 6th chapter of Romans. For evening the subject is "The New Birth."

REV. J. W. STORY, Pastor.

WAYLAND COLLEGE NOTES.

Reverend J. P. Hardesty, of Lamesa, and R. M. Hardesty, of Abernathy, were visiting here Thursday.

A new garage has been completed in the basement of the main building.

J. P. Reynolds, former dean of Wayland, visited here Thursday.

The enrollment of Wayland College is growing steadily. Already it has passed the two hundred mark, and new students are enrolled every day. The spirit of interest and enthusiasm pervades the student body. Organization has been completed and excellent work is being done.

The discipline of the school is very good and every step for its betterment is being taken.

A new stairway is now being erected in the Main Building, for the use of the girl students.

The Wayland College football team will play a matched game with Lubbock, at the Lubbock County Fair, Saturday afternoon.

Doctor Hannah, of Abernathy, visited his son, Curly Hannah, who is now boarding in the boys' dormitory.

Miss Brittain, of the voice department, rendered a beautiful solo at the chapel exercises Monday morning.

Hugh Hartley is away with his parents on a visit to other parts of Texas.

Wayland College welcomes to her girls' dormitory Mrs. Gardner and her two children, Miss Margaret and D. B. who are students in the college.

The Euglossians and Philomatheans will meet in regular session Friday afternoon at 3:30 o'clock. Excellent programs will be rendered. Visitors are cordially invited.

Harold Knupp has moved to Mador.

Walter Lemond and Mr. and Mrs. Nick Alley, of Hale Center, were here Tuesday.

Miss Lucile Bayer, of Post, Texas, returned to her home this morning, after a visit with her aunt, Mrs. W. E. Boyd. Miss Gladys Bayer is also visiting in the home of Mr. and Mrs. Boyd.

Mr. and Mrs. L. A. Knight and Mr. and Mrs. Robt. Malone returned this morning from Kansas City, where they went to attend the meeting of the American Bankers' Association.

Mr. and Mrs. Geo. Saigling spent Wednesday and Thursday at the Saigling Ranch.

Mrs. Jo W. Wayland returned home Monday from an extended visit with her mother, Mrs. T. O. Buckett, in New Market, Alabama.

Mr. and Mrs. Jess Elrod and G. P. Kuykendall, of Muleshoe, were here this week.

Dr. R. F. Hare, county agent, has been in Floyd County this week. He was a member of the Floyd County Fair booster excursion party.

Geo. Yates, of Hale Center, came up yesterday on business.

A. E. Pipkin, of Abernathy, was here yesterday.

H. Wurdack was here yesterday from Lubbock.

T. A. Miller returned yesterday from a business visit in Lamesa.

Rev. L. G. Haggard went to Kress yesterday.

Miss Rebecca Ansley left yesterday morning for Amarillo, where she will visit.

Mrs. E. E. Hardegree, who has been visiting her sister, Mrs. B. T. Ansley, left yesterday morning for a visit in Dumas.

Y. W. Holmes returned yesterday morning from Amarillo, where he has been attending Federal Court.

Mr. and Mrs. A. B. Spencer, of Crosbyton, were in Plainview Wednesday.

J. T. Wooldridge, of Lubbock, was here Wednesday on business.

Mrs. F. Medley, of Amarillo, was a visitor in Plainview yesterday.

Rev. J. B. Reynolds, of Canadian, was here yesterday on business.

E. C. Nelms, of Hale Center, was here yesterday on business.

Rev. Geo. W. Truett, of Dallas, is conducting a revival meeting in Vernon.

Mr. and Mrs. J. W. Burton and Miss Mary Steffen, of Crosbyton, were here today.

F. F. Jameson, of Dumas, was here today on business.

Mrs. F. Weiling, of Danville, Ill., and Miss Gladys Pace, of Salem, Ill., have returned to their homes, after a visit with their brother, Lynn Pace.

Dudley Kennedy, representing the West-Cullum Paper Co., of Dallas, was here yesterday on business.

Comfortable Underwear

Mrs. Harold Berry, of Amarillo, and Mrs. Horace Gray, of Salt Lake City, Utah, were here yesterday and today visiting friends.

Mr. and Mrs. J. J. Lash have returned from an extensive visit in Colorado, Nebraska and Missouri. Mr. Lash reports the sale of a section of land while away.

Mrs. W. M. P. Rippey returned Wednesday morning from an extended visit in Tennessee.

Long-Harp Drug Company are remodeling the entrance and show windows at their store.

The masonry of the new brick residence of Jno. P. Crawford is nearly completion.

AS SOUTH PLAINS IRRIGATION PROJECT IS VIEWED BY A DISINTEREST JOURNALIST.

(Continued from Page One.)

that was headed by the late Dr. F. S. Pearson, who lost his life when the Lusitania went down. The Pearson Syndicate owns the City of Mexico Light and Power Company, the hydro-electric plant at Nexaxa, Mexico; the electric systems of the City of Mexico; the Federal district and the City of Puebla; the Mexico Northwestern Railroad, that runs from Juarez to Chihuahua; also large lumber mills at Madera and Pearson, Mexico, as well as 3,000,000 acres of timber land in Western Chihuahua. The largest box factory in the world, at El Paso, Texas, is also owned by this syndicate, and it also built the great Medina Dam, near San Antonio, contemplating the watering of 60,000 acres. Its investment interests extend to South America. It owns railway, light and power plants in Brazil. This syndicate is not to be confused, however, with the other so-called Pearson Syndicate which also has large interests in Mexico, being one of the largest producers of oil in that country, and also owning the electric street railway systems of Vera Cruz and the new one at Tampico, and operates the National Tehuantepec Railroad under a fifty-one-year lease from the Mexican government. This latter syndicate is also British, and is headed by Lord Cowdray, who was known as Sir Weetman Pearson before he was elevated to the peerage.

"Both these huge financial concerns are known as the Pearson Syndicate, but are entirely separate, having nothing in common except the name.

"Conditions Affecting Success.

"The pumping of water from shallow wells for irrigation, which is being undertaken on such a large scale by the former Pearson Syndicate, has been tested out in a number of localities in the last few years in Western Texas, Eastern New Mexico and in one

notable district in Southern New Mexico. The success or failure of such enterprises depends, according to the best authorities, upon a great number of conditions: (a) the head against which water must be lifted; (b) the character of soil and climate, which determines whether or not high-priced crops can be grown; (c) the purity of the water supply; that is, it must contain no mineral element that deadens the soil; (d) the character of the water-bearing sand and gravel and its depth, which determine largely the expense of putting down and properly "screening" a well; (e) the price of fuel, which means the price of power; (f) the extent to which rain can be counted upon to supplement irrigation, and so on. In the Plainview, Lubbock and several other localities remarkable success has been attained; in others, the results are perhaps not so promising. The determination of the Pearson Syndicate to go ahead with the project at Plainview, after several years' actual experience in growing crops, seems to presage an extension of this character of irrigation over large areas of Western Texas where water, soil and climatic conditions are practically the same as in the Plainview region."

BIRTHS.

Born, to Mr. and Mrs. Claud Purser, at Janes, September 23, a boy.

Born, to Mr. and Mrs. G. T. Thorpe, Petersburg, September 21, a girl.

Born, to Mr. and Mrs. J. T. Ellerd, near Abernathy, September 21, a boy.

Born, to Mr. and Mrs. Will I. Pool, 10 miles west of Plainview, September 22, a girl.

WANTED: 250 Brown Leghorn pullets. B. H. TOWERY. 8t.

On Restriction Street, 7-room house on easy terms. H. L. KING. 4t.

OLYMPIC

"QUALITY DID IT"

A really remarkable program will be offered next week — and each week thereafter. For instance next week there's

Marie Doro in "Common Ground," Tuesday.

Blanche Sweet in "The Ragamuffin," Thursday.

Mary Pickford in "Hulda from Holland," Friday.

Wm. S. Hart in "Hills Higgis" and a two reel Keystone Comedy Saturday.

This theatre is dedicated to the purpose of "Pleasing its Patrons."

Is Your Name on Our Mailing List?

Here is the Guarantee Ticket which you get when purchasing a Kirschbaum suit at Reinken's.

The Guarantee Means:

- The color won't fade.
- The cloth won't shrink.
- The suit will hold its shape.
- 100 per cent WOOL cloth.
- Hand made
- And a come back at us if garment does not turn out as represented.

Community Correspondence

MRS. FAIR TO BE HOSTESS FOR LIBERTY SOCIAL CLUB.

Revival Meeting Will Be Held at Liberty, Beginning October 18, by Rev. S. J. Upton.

LIBERTY, Sept. 27.—Rev. S. J. Upton, of Plainview, delivered a splendid discourse at this place Sunday morning to a crowded audience.

E. E. Freeman and family, and Misses Roxie Range and Eileen Groff spent Sunday with L. L. Wheeler and family.

A number of our people were shoppers in Plainview Saturday.

Some of our young people attended the tent play "The Old-Fashioned Folks" in Plainview Monday evening.

Mr. and Mrs. Willie Miller and son, of Plainview, attended church at this place Sunday, and dined with her parents, Mr. and Mrs. J. J. Boston, and family.

Mrs. Mary Ott and son, Ira, visited relatives in our community Sunday.

C. P. Seipp, Miss Helen Groff and little Margaret Tumberg, took supper Sunday evening with Nick Klein and wife.

The singing at Mr. Perkins' Sunday evening was well attended.

Liberty was well represented at Howe's Circus Saturday afternoon.

Carol Gundrum is building a new house.

John Garstang purchased a new buggy last week.

L. L. Wheeler lost a valuable cow Friday, from eating green maize.

R. E. Houston and family and Herman Tumberg and wife attended the singing convention at Bellevue Sunday.

J. J. Groff and family, E. E. Freeman and family, L. L. Wheeler and family and Miss Roxie Range motored to Tullia Sunday afternoon to see the ruins of the fire which occurred there last Friday morning.

Rev. S. J. Upton will hold a series of meetings at this place in October, starting at 8 o'clock p. m., Wednesday, the 18th.

Rev. Holland, of Plainview, will preach here Sunday at 11 o'clock a. m. Sabbath School meets every Sunday at 10 o'clock a. m. Several new people were enrolled Sunday.

The Liberty Social Club met Thursday afternoon with Mrs. C. C. Alexander.

During the business session, the president, Mrs. J. J. Groff, presented two letters, from Mesdames John Garstang and Carol Gundrum, who wish to resign for one year. Their resignations were received with regrets. It was also mentioned that the members go and call on the sister members who had been absent for several meetings.

After the business meeting closed, the hostess, assisted by others, served two kinds of sandwiches, punch and watermelon.

We want to ask each one of our members and we urge you to be present at our next meeting, October 5th, with Mrs. H. J. Fair.

We had three visitors, Mesdames Klein and Simmons and Miss Dora Seipp. Ten members were present and six absent. We want each of the members to have some good receipt or household hint to tell in answer to the roll call at our next meeting.

WEST SIDE HEREFORDS WON BLUE RIBBONS AT AMARILLO.

WEST SIDE, Sept. 27.—John Chilton, who has been in bed for the past six weeks, is able to be up a while.

There will be preaching here Saturday night, September 30th, by Rev. G. I. Brittain. Everybody is invited to attend.

School opened here September 25th, with good attendance. Professor Williams is principal and Miss Pearl Williams is assistant.

Mrs. Ira Hammer entertained the club girls Wednesday evening, ice cream, cake and fruit being the refreshments.

Bud Cornelius and family attended the Singing Convention at Bellevue last Sunday afternoon.

Several of the farmers have been marketing hogs the past week.

Douthit and Sons won a blue ribbon on a fine bunch of Herefords which they sent to the Amarillo Fair.

Mr. Reiter's team became frightened last Sunday evening and ran away, doing considerable damage to his vehicle, while none of the occupants were injured. Two of the children jumped out.

The social given by Miss Bessie Branson was enjoyed by all present. Stuart Scales had the misfortune of losing a horse last week.

WHITFIELD PERSONAL NEWS.

WHITFIELD, Texas, Sept. 27.—Wes Dameron's baby was on the sick list this week.

Mr. and Mrs. W. C. Bates, Mr. and Mrs. I. C. Nations and the Misses Dodson and Crosthwait took in the Roy Fox show in town Monday night.

Everybody from here went to see the big tent show in Plainview last Saturday.

Mr. and Mrs. Stallings have moved to Plainview to live.

Mr. Starks and family were shopping in Plainview last Saturday.

PLEASING others is more than sentiment—it's almost an obligation.

Your family and friends want your photograph.

Make the appointment today

Cochrane's Studio

Rev. Smith will preach here next Sunday.

Rev. Duelling preached here Sunday. Chas. Barrett and wife were visitors at the Thomas home, near Floydada, last week.

Mrs. M. E. Palmer was the guest of Mrs. Calvin Nations Monday.

Will Kraunn is having a well dug on his place this week.

Mrs. Stella Smith and Mrs. Gamble, of Floydada, visited Mr. and Mrs. John Edwards last week.

O. B. Jackson and brother were here recently looking for cattle.

KRESS NEWS.

KRESS, Texas, Sept. 23.—We had a nice shower in the Kress community Saturday morning.

Sam Bell, 10 miles west of Kress, returned home Saturday morning from Kentucky, where he had been on a business trip. His niece accompanied him home for a visit.

Mr. and Mrs. Ed Grassman and two daughters called on Mr. and Mrs. J. C. Gilbert, of near Kress, Sunday afternoon.

Miss Rena Gilbert, of near Kress, returned home Saturday morning, from Plainview, for a short visit. She will

return to her work Monday morning.

Leon M. Riegel, of White Deer, Texas, came down Sunday morning to Kress to spend the week end with Miss Rena Gilbert.

There will be preaching at the Baptist Church in Kress Sunday night, October 8. Everybody is invited.

The farmers are all busy sowing wheat, after the nice rain we had Sunday morning.

The grass is growing and the row crops are looking fine. There will be a large acreage of wheat sown here this fall.

Fay Kerr and wife, of Kress, will build a nice residence on their farm some time in the near future.

J. C. Gilbert and wife are expecting their son-in-law, Burch Vanzant, wife and children, of Hillsboro, Ohio, in a few weeks. They expect to make Texas their future home.

F. T. Skipworth is harvesting his cane.

We are glad to know that Mrs. T. R. Boney is recovering from her recent serious illness.

Professor Evans and wife will move on a Syndicate farm known as the Le-master farm in a few days.

Mrs. J. V. Boston expects to go to Coffeyville, Kansas, next week to visit

her daughter, Mrs. Glen Gartside, and her daughter, Mrs. Ed Brenneman, expects to join her there for a visit. She will probably visit her daughter in Oklahoma before returning home.

FARMERS' BULLETIN TABLE.

An innovation of its kind is the new reading room and writing table, characterized as the Farmers' Bulletin Table, established by the Rosenberg Lumber Company, at their office in this city. This hustling company has made arrangements with the State Department of Agriculture to furnish it with a copy of every bulletin issued by the department. These are kept in handy form in a room provided for them, and stationery for the use of the general public added to "Bulletin Table."

The company has now extended an invitation to the general public, and especially the farmers visiting town, to make their Bulletin Room their headquarters; to come there to read up on all the department bulletins, and to use the stationery provided for them in writing their business letters.

The Rosenberg Lumber Company is under direct management of Mr. R. C. Clampitt, who recently came to this

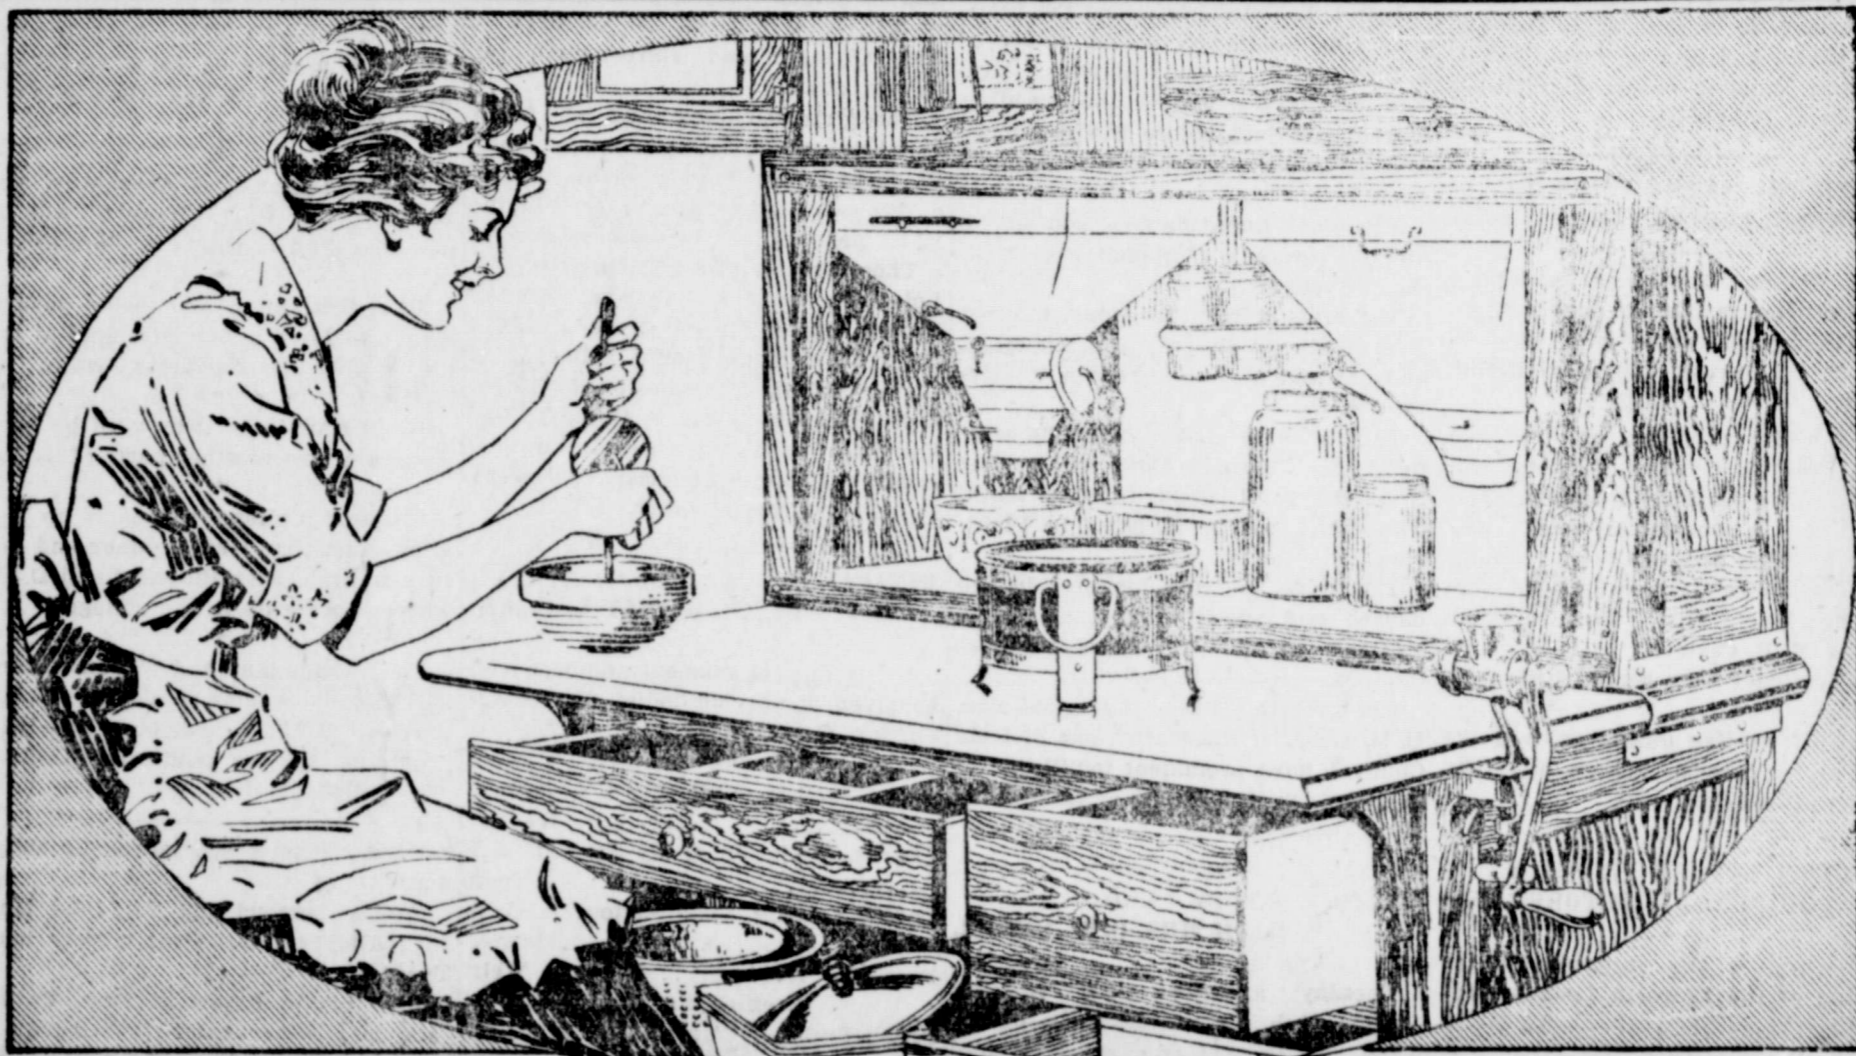

city from El Campo. Since coming here Mr. Clampitt has made many business and social friends, and his success in the lumber business is practically assured. He is up to the minute on business methods, and like all modern business men, is a firm believer in printer's ink.—Rosenberg News-Herald.

Commissioner Fred W. Davis of the Department of Agriculture, at Austin, has expressed a willingness to furnish reading material for other such Farmers' Bulletin Tables, and there will likely soon be many such opportunities presented. The aed gasood r ties presented. The idea is a good one, and should be widely patterned after.

FOR SALE—Windmill on 40-foot tower, 2-inch piping, brass cylinder, 6,000-gallon tank, and all pipings complete with tower. \$75.00 for the outfit. At my Coal Yard. E. T. COLEMAN, Coal and Grain Dealer. 2t.

Fresh Oysters, Celery and other Fall Delicacies at all times at VICKERY-HANCOCK GROCERY CO. Phone 17. tf.

WANTED—A second-hand buggy. OSCAR HILL, Elk Shop. 1t.

The Great National Fall Sale of Hoosier Cabinets Opens Here Thursday, October 5th

The Hoosier Kitchen Cabinet Cuts Work in Half

This marvel of convenience has places for 400 articles, all within arm's reach. But it's more than a centralized store-house. The Hoosier is an automatic servant with 40 labor-saving inventions—each like a helping hand! Some cabinets have copied a few of them, but 17 of these Hoosier features can't be found in all other cabinets combined. Into the Hoosier are built the pick of the ways for saving work that the leading Domestic Science Experts have discovered.

The picture above shows the section of your cabinet that is most important—the part that makes it a real helper. Storage space is above and below; the articles most often used are placed where they are easiest reached. There is plenty of unhampered room above and around the aluminum (or porcelain) work-table.

There are no useless little partitions to chop up the space and leave no room for work. Your cabinet must have big table space to work on. The Hoosier gives it.

Six exclusive Hoosier features you must have:

- 1—The all-metal glass front flour bin.
- 2—The gear-driven shaker flour sifter which makes flour light and fluffy.
- 3—Scientific arrangement—articles needed most frequently easiest reached.
- 4—Revolving caster—the final touch of convenience.
- 5—The ingenious, big-capacity sugar bin—holds more than twice as much as most other bins.
- 6—Finally, the doors that roll back at the sides of the cabinet, entirely out of the way.

And regardless of the room in your kitchen, there's a special Hoosier model to fit, at a price you can easily afford.

Prices and Terms

Over 1,000,000 women use the Hoosier. Enormous output makes possible our low prices, which now range from \$17.00 to \$44.00.

Have the Hoosier delivered by paying \$1.00. Then pay for it a little at a time if you wish, without extra cost or interest.

Learn How to Save Miles of Steps

Come in and see the Hoosier—learn how to save miles of steps, hours of toil, how delightful it is to sit down at the Hoosier and do your cooking comfortably, how it helps you to get good meals quickly, helps tidy up in just a few moments after meals.

The Hoosier saves countless trips to the cellar, to the sink, pantry and cupboard. You may think you already have a convenient kitchen, but a million other women know better. You may change your mind when you see the Hoosier.

THE MERCHANT.

When all your cash has faded, quite,
And your friends are scarce, and your
larder's light,
Who gives you grub "till tomorrow
night?"
The Merchant.

Or if you ever farm at all,
And you haven't a bit of grain to haul,
Who carries you till the following fall?
The Merchant.

And then if the crops are a little slack,
You skip out some night—never come
back!
Who is the man who holds the sack?
The Merchant.

When debts pile up that you cannot
pay,
And you go through the bankruptcy
court some day,
Who loses—but smiles in the same old
way?
The Merchant.

When the church's funds are running
low,
'Cause the members' gifts are rather
slow,
Where do the deacons get the dough?
The Merchant.

Balls and picnics, lodges galore,
All take their toll from the general
store,
But he'll get his reward on that beau-
tiful shore—
The Merchant.

FARM SANITATION.

(By M. E. HAYS, Assistant Entomolo-
gist, Extension Service, A. and
M. College of Texas.)

Insect pests have done much damage
in Texas this year. With their
ravages before us, it is time for us to
plan our farm operations for next year
in order to combat them. The most
successful way to control any insect
pest or plant disease is to prevent it.
There are many farm operations which,
if rightly conducted, will check this
damage. The insect tax on the crops
of this State will vary from 10 to 50
per cent of the total value. Is it neces-
sary that we continue this waste?

By co-operative effort we can ac-
complish great results in lessening
this waste. In order that this work
may be done most successfully it is
necessary that each farmer do his
part. The individual farmer can, how-
ever, increase his own crop. The fol-
lowing farm practices, if put into oper-
ation, will materially increase crop
yields:

Clean Farming.—The sanitary farm
is as important in the control of in-
sects and plant diseases as is the sani-
tary home in the control of diseases of
mankind. All weeds and trash should
be destroyed by plowing under deep.
If weeds are allowed to mature and fall
in the fence rows they will form a
winter blanket for insects. The chinch
bug is one of the common pests that
hibernates over the winter in the
weeds along the waste places in the
field. The boll weevil also passes the
winter in any trash that it can find
around the farm.

Crop Rotation.—By crop rotation we
change the crops from one field to
another. This has a decided advan-
tage as a farm practice aside from pest
control. In rotating crops, plant those
that are not related—that is, do not
follow one small-grain crop with an-
other, because many insects feed on
the same family of plants. In plan-
ning your rotation, plan a change of
crops. By rotating our crops we ma-
terially decrease the insect ravages.
The reason why this is so important
is that many of the insects winter in
the fields where they fed the year be-
fore, and if the crop is not there the
next year many will die before they
can find their host plants.

Time of Planting.—This is especial-
ly important in the control of the boll
weevil and the Hessian fly. The
earlier the cotton is planted, the soon-
er it will mature. The boll weevil
will work on the early cotton, but
there are not as many boll weevils in

the early part of the season as later,
since they multiply more rapidly as
the season advances. In the sections
that are infested with the Hessian fly,
it is necessary to plant as late in the
fall as possible to have the wheat up
in time to stand the winter, since the
adult fly deposits the egg in the early
fall. This is the most practical means
of controlling this pest.

Fall Plowing.—This is probably the
most important single farm operation
in insect control. The land should be
plowed as soon as possible after the
crop has been harvested. This ap-
plies to all of the crops on the farm,
and the garden as well. Many of our
common insects, such as the boll worm,
army worm and others pass the winter
in the "pupal" or "resting stage,"
just beneath the surface of the ground.
By fall plowing these burrows are
broken and the pest destroyed. This
is one of the most important means of
controlling these pests; therefore, plow
under the crop as soon as the cotton
is picked.

Burning.—The practice of burning
over the cotton fields should be dis-
continued, because it destroys too much
vegetation. Burning to control in-
sects should only be resorted to in
extreme cases, such as burning the
picked cotton squares to destroy the
larvae of the boll weevil, or destroy-
ing the limbs that have been pruned
in the orchard.

**MILK AND PEANUTS TO BE
TESTED AS HOG FEED.**

COLLEGE STATION, Texas, Sept.
28.—The peanut crop of Texas will be
very large this year, and at this time
farmers are considering the best and
most profitable ways of disposing of it.
Experience has proved that it is more
profitable to market feed crops
through livestock than to sell them in
the raw state. In the case of peanuts,
however, it has been found that the
meat of peanut-fed hogs is soft and
oily, and such hogs have been discrim-
inated against in the markets. Since
so many oil mills have been equipped
to crush peanuts, it has become possi-
ble to buy peanut meal and cake, and
there has been a widespread demand
to know if the meat of hogs fattened on
peanut cake or meal would be hard and
firm and free from the objections to
meat produced by feeding the whole
peanut.

To answer this question the Texas
Experiment Station conducted a feed-
ing experiment at College Station.
Sixty hogs of uniform age and weight
were divided into six pens of ten each
and fed different rations for a period
of 70 days. The rations fed were as
follows:

Lot No. 1.—Milo chops alone.

Lot No. 2.—Milo chops and cotton-
seed meal in the ratio of 1 to 6.

Lot No. 3.—Milo chops and tankage
in the ratio of 1 to 10.

Lot No. 4.—Milo chops and peanut
meal in the ratio of 1 to 7.

Lot No. 5.—Milo chops and peanut
meal containing hulls in the ratio of
1 to 2½.

Lot No. 6.—Milo chops and peanut
meal, equal parts.

Careful record of amount and cost of
gains of each lot were kept, and when
the hogs were sold the packing house
kept accurate record of the dressed
weight and quality of pork.

L. B. Burk, associate professor of
Animal Husbandry of the A. and M.
College, who conducted the tests for
the Experiment Station, is now em-
bodying the results of the test in a
bulletin which will be available at an
early date. In the meantime, he has
authorized the statement that the hogs
fattened on peanut meal made satis-
factory gains and that their meat was
not soft.

The importance of this announce-
ment will be appreciated by the thou-
sands of farmers with peanuts ready
for harvest.

It pays to buy at BONNER FASHION
SHOP. **tt**

**TEN GOOD REASONS
FOR BUILDING SILO.**

Professor Skinner, of Purdue, Tells
Why Every Farmer Should Have
Huge Receptacle.

Ten reasons why every farmer who
keeps live stock should have a silo,
written by Prof. J. H. Skinner, of Pur-
due University, should afford some sell-
ing argument for dealers. They are
as follows:

1. The silo preserves the palatability and succulence of the green corn plant for winter feeding.
2. It helps to make use of the entire corn plant.
3. The silo increases the live stock capacity of the farm.
4. Silage is a good summer feed when pastures are short.
5. Because of the small amount of ground space required by the silo it is an economical means of storing forage.
6. The silo prevents waste of corn stalks, leaves and husks, which contain about two-fifths of the feeding value of the corn plant.
7. The silo located near the feed manger is an assurance of having feed near at hand in stormy as well as fair weather.
8. The silo assists in reducing the cost of grains in fattening cattle and sheep.
9. Silage greatly increases the milk flow during the winter season and decreases the cost of production.
10. There are no stalks to bother in the manure when corn is put into the silo.

LISTEN!

We want the people of this community to know that WE SELL LUMBER AND OTHER BUILDING MATERIAL, and want them to know that they will save money dealing with us—that they can supply their needs in this line through us to better advantage than from any other source under the sun. This is why we advertise.

Plainview Lumber Co.

**The fable of the Young Man
who would not Dress Up**

ONCE upon a time there was a Young Man who was busy Gathering, Sorting and Pigeonholing Noble Thoughts, that he didn't have time to bother with Trivial Things like Clothes—any old Vintage of '76 Suit was all right for him, and besides, didn't some Patriarch say, that Clothes don't make a Man—back there in the Age when a Sheet wasD anytime Dress Up.

One day this Boy Encyclopedia decided to take his Twin-Six Intellect to some Captain of Industry, thereby giving Big Business its first Real Chance.

He tried to get an Audience with all the Big Guns in the Seven Figures. The Chiefs lamped him for a Ne'er-Do-Well looking for a Hand-out, and ordered the Office Boys to give him the Gate.

The Young Man couldn't get near enough to a Higher Up to explain that he had been so busy filling his Mind that he didn't have Time to decently cover his body.

The Moral of this Fable is:—Dress-up; Clothes make all of a Man except his Hands and Face during Business Hours.

We've told you this little fable to get your mind on new clothes and the fact that the Fall "Dress Up" begins tomorrow. What do you need—a suit, overcoat or both?

KANSAS CITY STOCK

MARKET IN DETAIL.

KANSAS CITY STOCK YARDS, Sept. 25.—The cattle market weakened late last week, under stress of liberal supplies at all markets, decline ranging from 15 to 40 cents. The supply today is 38,000 head here, and again liberal at other points, resulting in further declines, most sales 10 to 15 cents lower.

Some pretty good Panhandle stock steers sold at \$6.75, as compared with their mates of the same brand Tuesday of last week at \$7.00. Some choice yearlings from Hereford sold at \$7.65 to \$8.00. Western Colorado heavy feeding steers brought \$7.95 today, weighty beef steers, 1,216 pounds, brought \$7.00 to \$7.60, and some 900-pound beef steers, horned, sold at \$6.50. These latter were same brand as steers that brought \$6.65 and \$6.40 last week. A large string of New Mexico yearlings, 577 pounds average, sold at \$7.00. Last week 36,279 stockers and feeders went to the country from here, and there were plenty of buyers today.

Sheep receipts were 20,000 head, market a shade stronger. Lambs with wet fleeces sold at \$10.25, and a six-car drove weighing 75 pounds brought \$10.35, the top. Fourteen cars of Arizona lambs were sold, one-third to killers, at \$9.65, and two-thirds to feeder buyers, at \$9.50. Nevada feeding lambs sold at \$9.75, and Utah sorts sold at \$10.15 to \$10.25, Idaho at the same price. Feeding and breeding ewes are stronger than a week ago, feeders selling at \$5.50 to \$6.50, and breeders from \$7.00 upwards, to \$9.25 for choice light ewes. The market is taking care of the fall runs in good shape, salesmen having little difficulty in holding prices up well.

Hogs had to stand a small break last week, but it was already in process of repair before the week ended. Packers will have difficulty in enforcing their customary fall break in prices, being without their usual fighting weapons, as demand for meat continues heavy, and stock in packing houses is almost down to bed rock. Receipts were 11,000 today, prices steady to unevenly higher, two loads of choice lights selling at \$11.00, 20 cents above any other market on the Missouri River today. Bulk of sales ranged from \$10.30 to \$10.80.

J. A. RICKART, Market Correspondent.

CITATION—BY PUBLICATION.

THE STATE OF TEXAS To the Sheriff or Any Constable of Hale County—GREETING:

YOU ARE HEREBY COMMANDED, That by making publication of this citation in some newspaper published in the County of Hale for eight consecutive weeks, previous to the return day hereof, you summon the unknown heirs, executors, administrators or legal representatives of B. J. Brummer, deceased, also every person, firm, corporation or association owning or claiming to own or to have or possess any right, title, claim, lien or equity in, to, upon or against or concerning the hereinafter described land or any part thereof; also the unknown mort-

gagees, lien holders, owners or claimants of said real estate or any part thereof, the names of whom and the places of residence thereof are unknown to this plaintiff, to be and appear before the District Court of the 44th Judicial District, of Dallas, Texas, to be holden in and for the County of Dallas, at the Court House thereof, in the City of Dallas, on the first Monday in October, 1916, then and there to answer to the First Amended Petition (in lieu of original petition filed herein by plaintiff January 30, 1916) of C. C. Slaughter Co., filed in said Court on the 7th day of July, 1916, against the said unknown heirs, executors, administrators or legal representatives of B. J. Brummer, deceased, also every person, firm, corporation or association owning or claiming to own or to have or possess any right, title, claim, lien or equity in, to, upon or against or concerning the hereinafter described land or any part thereof; also to the unknown mortgagees, lien holder, owners and claimants of said real estate or any portion thereof, for suit, said suit being numbered 21956-B, the nature of which demand is as follows: Suit upon a certain promissory note, executed by the said B. J. Brummer to C. C. Slaughter, dated November 11, 1908, and payable on or before November 11, 1915, with 6 per cent interest per annum, at Dallas, Texas, interest payable annually as it accrued, being for \$920, a vendors lien being retained in said note and in the deed of conveyance executed by said C. C. Slaughter to the said Brummer, conveying the Northeast Quarter of Section 11, Block S-4, Hale County, Texas, containing 160 acres, and said note being part consideration for the said land; said note providing that all past due interest shall bear 6 per cent interest from date of maturity and that default in the payment of any installment of interest shall, at the election of the holder, mature all said note and also providing for 10 per cent attorney's fees if collected by suit; default has been made in the payment of the annual interest installment due November 11, 1914, and said note is long past due and unpaid. Plaintiff is the legal owner and holder of the said note, together with all rights, title and interest therein, the same having been duly transferred to this plaintiff. Defendants wholly fail and refuse to pay the same.

Plaintiff prays citation; judgment foreclosing said lien as it existed on November 11, 1908, and in the alternative that title to said land be vested in plaintiff, for damages, costs and general and special relief.

HEREIN FAIL NOT, but have you then and there before said Court this writ, with your return thereon showing how you have executed the same.

WITNESS: MATT L. COBB, Clerk of the District Court of Dallas County, Texas.

Given under my hand and the seal of said Court, at office in the City of Dallas, this 7th day of July, A. D. 1916. MATT L. COBB, Clerk District Court, Dallas County. By A. W. THOMAS, Deputy.

UGH! CALOMEL MAKES YOU DEATHLY SICK

Stop Using Dangerous Drug Before It Salvates You! It's Horrible!

You're bilious, sluggish, constipated and straighten you right up better than calomel and without griping or making you sick I want you to go back to the store and get your money.

Take calomel today, and tomorrow and believe you need vile, dangerous calomel to start your liver and clean your bowels.

Here's my guarantee! Ask your druggist for a 50-cent bottle of Dodson's Liver Tonic, and take a spoonful tonight. If it doesn't start your liver you will feel weak and sick and nauseated. Don't lose a day's work. Take a spoonful of harmless, vegetable Dod-

Whenever You Need a General Tonic Take Groves'

The Old Standard Groves' Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

GLORY OF AUTUMN DEPICTED IN NEW MERCHANDISE

Autumn foliage is not more colorful than the shades pronounced right by Milady Fashion, and only the exquisite pictures left by Jack Frost on window panes of a cold morning can rival in beauty the patterns of this season's laces and materials.

Modes are alluringly, willfully feminine—you will be enchanted with them. Come, wander thru the store at your leisure and examine the new arrivals.

In addition to the interest wrapped about the New you will find here worth while opportunities in the way of special offerings.

New Colors

The fruit colorings are new and wonderfully rich. These range from a deep burgundy, raspberry, strawberry, plum, grape, etc. They have all the depth of hue of crushed fruit. Boise de rose is the new shade of rose, though it is off the usual rose color, having less yellow. There are some wonderful new blues out this season. One of the very new and favored colors is "brass." This has a little more yellow in it than chartreuse and less than gold.

Blouses You Will Like— And the Price is Irresistible

GEORGETTE CREPE BLOUSES, flesh and white, beautifully embroidered and trimmed with fine lace. Large collars and deep cuffs.

CREPE DE CHINE BLOUSES, flesh and white, some embroidered, others depend on large double collars and still larger tucked collars to open your hearts for them.

PLAID BLOUSES of taffeta and silk serge; bright, cheery color combinations. Just to see them will gladden your heart.

When you see them you will decide that you can use at least one of each.

A Most Complete Sweater Display at Carter-Houston's

All our Sweaters were bought six months ago, thus giving our customers a material saving. We cannot duplicate the values when our present stock is gone.

The New Coats and Suits

at Carter-Houston's

They are frequently fur-trimmed, and there is every indication that fur will predominate as trimming. It is used very lavishly and many novel effects are gained by means of fur edges and fur buttons.

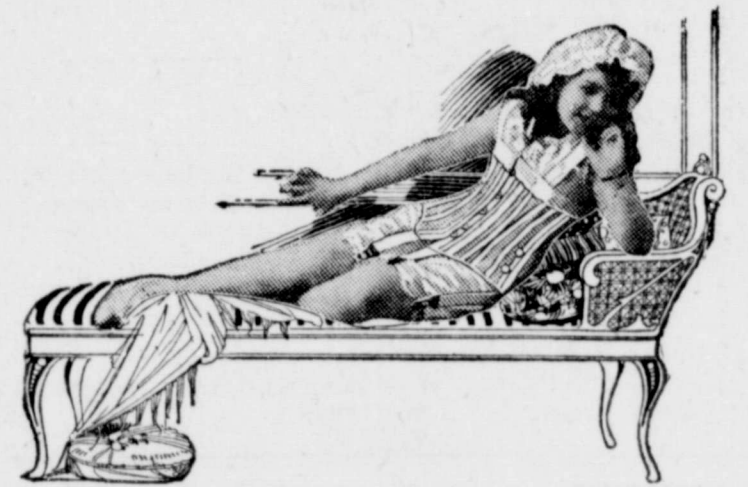

The New Suits \$15, \$18.50, \$25 and Up

Many of the suit jackets are "Finger-tip," some shorter, some high waisted and some normal. The tailored Suit, in whatever line it is built, is chosen because it is individually becoming. There are rich Velours, Broadcloths, Serges and Poplins in the deep soft shades of the season—midnight blue, Java brown, hunter's green, Burgundy and purple. Feel free to come in and see these lovely garments, whether you are ready to buy or not.

The New Coats \$12.50, \$15, \$25 and Up

New Winter Coats in handsome assortment of colors and fabrics. Soft, warm fabrics, yet light in weight. The new collar which is so prominent in this year's Coat may be either of self material or fur, or fur-trimmed. Some models are loose, others semi-fitted. Materials are Bolivia Wool Velours, Velvet Plush and English mixtures. Come, try them on. See what lovely Coats they are.

True Products of Science of Right Corset Making

LaCAMILLE and
KABO CORSETS

No costume, be it ever so pretty, is really becoming unless it "sets off" the figure—enhancing the charm of outline, giving poise and grace to its wearer.

No costume be it ever so lovely, can give distinction to its wearer unless the foundation over which it is fitted is right.

Our Corsets Give Right Foundations

This we can readily prove to you when you come in for your new autumn model.

The only corset consciousness you will feel is one of easy support and a realization that your figure is at its best.

Warm, Cozy Bathrobes

and lounging robes are one of the most important considerations in the boudoir wardrobe.

Why not select one or two of these right now from our large assortment? You will find them from the most inexpensive variety up.

GLOVES

We are showing some very clever new ideas in gloves. These are in white, black and the new shades. Our Gloves are unequalled. The distinctive fit and quality place them in a class by themselves.

Washable Gloves are more than ever in vogue. The scarcity of these really desirable gloves should prompt you to pick out your season's glove supply immediately.

For Cool Days

Knit Underwear becomes an important consideration at this season of the year.

Our women's knit underwear fits like a glove. We feature a fall-weight union suit at \$1.00; various styles. Vests and drawers separately at 50c the garment—Munsingwear.

For Cool Nights

Outing Flannel Gowns, comfortable and well made, are an extremely sensible investment.

Send some to daughter away at school. While girls do not pick them out for becomingness, they are mighty glad to slip one on of a cold night. 85c up.

CARTER-HOUSTON'S

"GOODS THAT SPEAK FOR THEMSELVES"

- Oyden Allen to N. G. Allen, west half of section 27, block O, 320 acres; consideration, \$3,520.
- B. O. Sanford and wife to H. E. Mason, lots 13 to 24, inclusive; consideration, \$750.

these war times, when the supplies of some fertilizers are cut off by the blockade and the materials used in making others are very high in price because they are used in making explosives. Composted manure is as good or better than the ordinary well rotted article, and very much cheaper, because more can be saved and much less is wasted by being washed away or leaching into the soil while rotting. It is a better-balanced plant food and does not produce so much leaf and vine instead of the fruit or roots, for which most gardens are grown.

At the University of Missouri such a compost pile is made every year, not only for garden use, but for use in potting house and green-house plants. The directions given the workers there are as follows: Select a level, well drained spot as near the barn door as possible, where the wash cannot go through the pile and wash out the plant food. Dig away three or four inches of the looser surface soil over a strip four feet wide and as long as desired.

Fill the hole with well rotted or composted manure and pile on top of this alternate six-inch layers of fresh manure and weeds or sod, mixed with some earth, until the pile is about

waist high. The weed seed will be killed in the process if the heap is properly handled, and an addition of such extra material as leaves and straw increases the amount of compost obtained from a given amount of manure. When many leaves are used, add lime, to make them decay more quickly and to sweeten the acid condition they produce.

The whole pile should be covered with a thin layer of earth, to help absorb the ammonia and many other valuable plant foods which escape in the vapor. Keep the pile wet, but not so well soaked that water runs from it and carries away the plant food. Fork over and rebuild the pile every six or eight weeks and cover it again with earth. Composting should be completed in from six months to a year, depending on the kind of material used and whether lime and water have been used to hasten decay.

From ten to fifteen tons of compost should be added per acre or a little more than that if undiluted manure had been used. Lighter applications should be for fruit and root crops, like beans, tomatoes, potatoes and beets, than for leaf crops, like lettuce and cabbage, which can use a great deal of rich food.

COMPOST FOR NEXT YEAR'S GARDEN.

By J. S. GARDNER.
Well-rotted manure is better than fresh manure for gardens. It is also cheaper than commercial fertilizers in
