

Community Correspondence

HALFWAY, Texas, June 21.—The weather has been cool and pleasant since the small shower Tuesday night. The program of the eighth anniversary of the organizing of our Sunday school was well rendered and enjoyed by all. A number of persons from West Side and several persons from Plainview and Olton were present.

Mrs. N. K. Smith and two daughters, Mavis and Kathleen, and son, Julian, and Purcelle Huguley, Malzie Wilson and J. E. Stewart and children attended church at Runningwater Tuesday night.

Mrs. R. R. Allen of Georgetown, Texas, is visiting relatives here.

G. W. Lewellen returned from Kansas City yesterday.

Mr. and Mrs. Walters of Nebraska are visiting their friends, Mr. and Mrs. William Barrett and family.

Work on the play to be given by the Mothers' Club is progressing.

C. L. Ford, the Nye boys and E. Moon have begun harvesting their wheat.

Eber Davis of Ohio is here visiting Charlie Brown.

Mrs. Nine McComas, Mrs. R. L. Hooper, Mrs. N. K. Smith and Misses Kathleen Smith, Nannie McComas and Agnes Hooper attended the "Hen" Party given by the Civic League of Plainview Saturday.

Mr. and Mrs. James Calvert, G. E. Lewis and little daughter and Faye Sawyer of Plainview attended the celebration here Sunday.

Mr. and Mrs. G. F. Pool and Emma and Truett Pool of near East Mound were here Sunday and Monday attending the Sunday school celebration and visiting friends. Mr. Pool was the first superintendent of the Halfway Sunday school.

Mrs. Lena Fauiks and two children of Fort Worth are here visiting with relatives.

IRICK, Texas, June 21.—The weather continues dry, but a good rain is needed.

Wheat harvesting is the latest "fad" in this community at present.

Little Miss Faye Johnson was the guest of her grandparents, Mr. and Mrs. Geo. Potts, last week.

Misses Edna and Lucille Reasonover called on the Misses Collier Thursday.

Miss Tina Jackson and brother, Clyde, called on Miss Glenn Brashears Tuesday evening.

Misses Edith and Ethel Smith visited Mrs. Stuart and Miss Fionnie Parson last Monday.

Frankie Smith spent Monday afternoon with Helen Collier.

Mr. and Mrs. Houston and family visited their daughter, Mrs. Ralph

Lam, and Mr. Lam last Sunday. Mrs. Mattie Lam arrived here from Missouri Monday for a visit at the homes of her sons, Fred and Ralph Lam.

Misses Tina Jackson and Glenn Brashears returned home Sunday from a week's visit with friends near Silvertown.

Among the visitors at the Jackson home Sunday were: Misses Glenn Brashears, Georgia Jackson and Edith, Ethel and Myrtle Smith; Clifford Allard, Barton Wetherspoon, Herschl Smith, Mr. and Mrs. J. E. Courtney and Mr. and Mrs. E. L. Wahn.

CULTIVATION OF SWEET POTATOES.

By G. M. GARREN, Agronomist of the Extension Service, A. and M. College of Texas.

The cultivation of sweet potatoes does not differ materially from the cultivation of other field and garden crops. Four furrows are thrown up with a turn-plow to make the ridge on which the potato draws are transplanted. The first thing in cultivation is to run between the rows with a sweep and burst out the small ridge usually left after the main ridges have been thrown up. After that, cultivation consists in destroying weeds and maintaining a soil mulch to conserve moisture. The field should be cultivated shallow, as soon as possible, after every rain, and once a week when it does not rain. For these cultivations a harrow-tooth cultivator is one of the best implements. It will be necessary to give them at least two hand hoeings. Since hand hoeing is expensive, cultivation should be so managed as to dispense with as much of it as possible.

When the vines have covered a greater portion of the middle, give them the last working by first turning the vines back across the ridge and then working out the middle, thoroughly drawing the soil to the vines. All cultivation should draw the soil to the vines at the top of the ridge. Then turn the vines back to their original place and work out the next middle the same way until the whole field has been covered. If enough weeds spring up afterwards to interfere with the growth of the vines, they will have to be pulled out by hand. It does not injure sweet potatoes to break the vines loose from the soil, but it greatly reduces the yield of potatoes to cut off any part of the vines during the growing period.

TO HOLD HALE COUNTY SINGING CONVENTION.

The Hale County Singing Convention will be held at the Midway School, seven miles southwest of Plainview, the fourth Sunday in this month. Midway has one of the best singing classes in the county, and the good people of that community can not be excelled in entertaining their friends of the convention work. The following program will be carried out:

- Song by the convention.
- Prayer by chaplain.
- Welcome address by Mr. Allen.
- Two songs by the president.
- Two songs by C. E. Slaughter.
- Two songs by Gorden Hanson.
- Two songs by Hubert Henderson.
- Special music by Professor Cobb.
- Two songs by Grover Leamaster.
- Two songs by W. Jeff Williams.
- Special music by Happy Union Class.
- Two songs by Clay Williams.
- Two songs by Chas. Wilson.
- Two songs by Dennis White.
- Special music by Prairieview Class.
- Two songs by A. W. Waddill.
- Solo by Jake Burkett.
- Two songs by J. W. Gibson.
- Business session.
- Song by Professor Cobb.
- Dinner for all.
- Special music by Sacred Harp Class (30 minutes).
- Two songs by L. W. Sloneker.
- Two songs by Earl Raper.
- Special music by Lakeview Class.
- Two songs by Grover Burt.
- Two songs by Foster Henderson.
- Two songs by W. H. Hand.
- Special music by Plainview Class.
- Two songs by L. D. Griffin.
- Two songs by Clyde Martin.
- Two songs by John Burt.
- Special music by Midway Class.
- Two songs by Tom Davis.
- Two songs by Tom Ellerd.
- Special music by Halfway Class.
- The program begins at 10 o'clock.
- Persons are requested not to forget to

bring their little mite to help take care of the crowd at noon.

The special music by the different classes on the program is to be arranged by the classes individually.

"I hope to meet you and hear a favorable report from each class in regard to a normal school this summer. I am,

Yours in song,
L. W. SLONEKER,
President.

SAID BY BEETHOVEN.

A musician is also a poet. For me there is no pleasure so great as to pursue my art. I live wholly in my music.

He who appears something must in

reality be something.

Art,—who comprehends it? With whom can I discuss this mighty goddess?

Emotions suit women only; music should strike fire from the soul of a man.

Let all that is called life be sacrificed to noble claims and to a sanctuary of art.

I well know that God is nearer to me in my art than others.

I commune with him without fear; evermore have I acknowledged and understood him.

The intellectual realm is the most precious in my eyes, and far above all temporal and spiritual monarchies.

From my childhood, whenever my art

could be serviceable to poor, suffering humanity, I have never required anything beyond the heartfelt gratification that it always caused me.

NO PROFESSIONAL.

"I was in hopes my son would be a professional man."

"Isn't he willing to take up such work?"

"Hasn't shown any signs of doing so as yet. When it comes to work he seems to be in considerable fear of jeopardizing his amateur standing."

Use Every Horse in the Field Haul With Smith Form-a-Truck

EVERY time you take a horse out of your fields to do hauling you waste valuable time that you can never get back. You need every one of your horses for plowing, cultivating, seeding and other work that you can do best with horses. And you cannot afford to keep extra horses just for hauling.

Horses cost you money all the time whether they are working or not. It takes valuable acres out of your fields to feed them. Use Smith Form-a-Truck to do your hauling and not only save the expense of horses, but save the expense of drivers taken away from work in the field to drive to town.

Save your own time by making the trip in two-thirds the time required by horses. And keep only the number of horses that are really necessary to do actual field work for you.

Any up-to-date farmer who is looking for all the money he can make can cut off the expense of from two to four horses by installing Smith Form-a-Truck—can keep the horses he must have to do his heavy work, busy all the time, and put real money into his earnings.

Don't cut off trips that you could make with profit, hauling early crops or money-making live stock to take advantage of high prices just because you cannot slow up other work that must be done. With Smith Form-a-Truck you are always ready to haul any load anywhere, with no waste time, with no hold up in your farm work and with a lower cost than you have ever known.

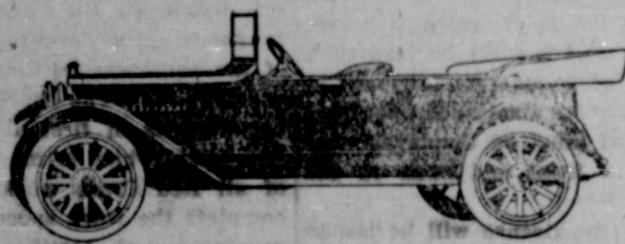

Use Any One of Six Chassis

Using any one of six chassis, Smith Form-a-Truck combines with any Ford, Maxwell, Dodge Brod., Buick, Chevrolet or Overland chassis to make a fully guaranteed one ton truck. It gives you real truck construction that will stand up under the hardest hauling you could ever do.

When you are in town drop in and see Smith Form-a-Truck. It will pay you well

PROFIT IS \$49.50 TO \$78 AN ACRE ON SUGAR BEETS

Farmer in Bear River Valley Submits Figures to Show Gains From Various Crops.

This is the day when farmers are making a very careful study as to the profit they are making. It is not so much a question of how much does it cost to produce a certain crop, but what is the profit after all expenses are paid. How many farmers really know the cost of producing any certain crop? Do you keep a careful account so that you can tell the profit?

Here are some figures submitted by John P. Holmgren, a very successful farmer of Bear River Valley, the man who won the prize when he raised 39 tons per acre of sugar beets.

Cost of growing oats per acre:

Plowing	\$ 2.50
Harrowing	.50
Floating	.50
Drilling	.50
Seed grain	1.75
Irrigating	2.50
Water rental	1.00
Harvesting	1.00
Twine	.75
Stacking	1.50
Threshing 60 bushels, 4c	2.40
To market	.75
Fertilizer	10.00
	\$25.65
Straw	5.65

Figure the estimated yield of 60 bushels per acre.
60 bu. (1,920 lbs.)
at \$1.25 per cwt. \$33.60
Expense 20.00

\$13.60 Profit.
An 80-bushel crop increases your cost \$1.30 and your 20 bushels additional is worth \$11.20
Or an additional gain of 9.90
Added to 13.60

Cost of sugar beets per acre:

Plowing 1 acre	\$ 2.50
Harrowing 2 times at 25c	.50
Floating	.25
Harrowing again	.25
Seeding	2.75
Thinning and 2 hoeings	11.00
Water rental	1.00
Irrigating 4 times	5.00
Cultivating 5 times	2.00
Plowing up beets	2.50
Topping 15 tons crop at 70c	10.50
Hauling 15-ton crop at 60c	9.00
Fertilizer, 10 tons manure	10.00
	\$57.50
Beet leaves, pasture	2.00

Figure the yield at 15 tons per acre.
15 tons at \$7 ... \$105.00
Expense 55.50

\$49.50 Profit.
A 20-ton crop of beets increases your cost \$6.50 and your 5 tons additional is worth \$35.00
Or an additional gain of 28.50
Added to 49.50

Cost of growing wheat per acre:

Plowing	\$ 2.50
Harrowing	.50
Floating	.50
Drilling	.50
Seed grain	1.25
Irrigating	2.50
Water rental	1.00
Harvesting	1.00
Twine	.75
Stacking	1.50
Threshing 36 bushels	2.10
To market, 2 1/2c	.75

Mr. Prince has severed his connections temporarily with the big automobile industry to join the Diplomatic Mission, which is headed by Elihu Root.

EVOLUTION OF THE PHONE.

First Old-timer—"Not so very many years ago the telephone was an object for laughter."
Second Old-timer—"Yes; at first it caused laughter. Now it induces profanity."

REPLANTING THE GARDEN SPACE WHICH HAS ALREADY PRODUCED A CROP.

Home Gardeners Should Plan to Follow Early Harvested Crops With Others.

Now that radishes, lettuce, and in some sections peas, spinach and other early crops are being harvested, home gardeners should be making preparations to utilize the freed space by planting other crops, say specialists of the U. S. Department of Agriculture.

In planning for these plantings, the specialists suggest, it is well at all times, but especially this year, to concentrate efforts on the production of vegetables that have considerable food value and on those which may be stored in their natural condition, dried or canned for winter use. The Irish potato is one of the important crops that can be grown on the freed ground. Navy beans furnish substantial food which is easily stored, and the present market prices make it worth while in sections where they thrive to replant space from which crops have been harvested with this legume.

Other vegetables having considerable food value from which choice may be made for late plantings include sweet corn, string beans, late beets, turnips, tomatoes, squash and pumpkins. As far north as northern New Jersey, southern Pennsylvania, central Ohio, central Indiana, northern Illinois and central Iowa, sweet potatoes may be depended on to mature

from plantings made as late as June 10 on sandy land.

Among the less nutritious vegetables which may be planted in soil freed by early harvests are late cabbage and cucumbers. Winter onions, fall lettuce and fall radishes also may be planted late in the season.

It is not essential, the specialists point out, to wait until all radishes, heads of lettuce and other early maturing plants are removed before planting seed or setting plants for succeeding crops. Corn or beans, for example, may be started in spaces made in radish or lettuce rows, or between the rows. The radishes or lettuce will then be harvested before the late planted crops need all the ground. Equally satisfactory results can be obtained from the combination of other early and late vegetables.

SARCASTIC.

The new recruits were drilling, and they were all very keen; one man especially did everything with an energy that made the N. C. O. tired. The order was given to march, and the enthusiastic one, who was in the front rank, set off with a will.

He strode out, arms swinging, head

erect, and eyes strictly "front," and never noticed that he had left his comrades several paces behind.

The N. C. O. swallowed hard, and then called sweetly, "Say, you! When

you get there send us a picture post-card."—Tit-Bits.

It is better to go back than to go wrong.

Galveston, Texas, June 18, 1917.
Dearest Club Girls:
In a very interesting letter from Audrey McKin of the Mission club recently, she says, "I am so sorry the conventions are over, for we loved so much to have you write about them." I have some convention news for this week's letter, and I am sure you are going to enjoy it. The last week I spent in the attractive, wooded county of Panola, one of the border counties of Texas and Louisiana. It would be impossible for me to describe all the beauties of this county and the school sites where we held our club meetings. Two hundred and fifty girls of that county enjoy club organization. Their county convention was one of the most enjoyable of our club records. They are energetic girls, living in a field of resources, and I am sure they are going to make some of our best club history. What a joy the great magnolia trees of that section were to me, and the tall pines festooned with beautiful wisteria vines. I want you to especially learn to know the delegates from each section of the State at our State meeting, that you might become familiar with the beauties of each. Come prepared to boost your section each to the other.

Leaving Carthage and Panola County, I went to Galveston to attend the Texas Press Association in convention. It gave me much pleasure to be given the opportunity to personally tell those good Texas editors how much they had done for us through their papers. To them indeed are we much indebted for our club space, and I am sure every club girl in this State appreciates it with me.
Now I have piles of letters before me. Clubs from every section are sending in excellent reports. Mission tells of the beautiful stereopticon machine donated to the school as its club work. The Wilson Tract girls write of wonderful interests. Hale County sends interesting reports, and I am so anxious that every club of that fine county sends its representatives to the convention at Austin. Nueces County through its numerous clubs are mak-

ALCOHOL TEST PREVENTS WASTE OF SUGAR AND FAILURE OF JELLIES.

WASHINGTON, D. C., June 22.—Much waste of sugar and spoilage of jellies can be avoided by using a simple alcohol test recommended by the Bureau of Chemistry, United States Department of Agriculture. To determine how much sugar should be used with each kind of juice, put a spoonful of juice in a glass and add to it one spoonful of 95 per cent grain alcohol, mixed by shaking the glass gently. Pour slowly from the glass, noting how the pectin—the substance in fruits which makes them jelly—is precipitated. If the pectin is precipitated as one lump, a cup of sugar may be used for each cup of juice; if in several lumps, the proportion of sugar must be reduced to approximately three-fourths the amount of the juice. If the pectin is not in lumps, but is merely precipitated, the sugar should be one-half or less of the amount of the juice. If the juice shows no precipitation under this test, it is unsuitable for jelly making, and must be combined with apples or other juices rich in pectin.
The housewife will do well before making the test, to taste the juice, as fruits not as acid as good tart apples probably will not make good jelly unless mixed with other fruits which are acid.

MUSICAL THOUGHTS OF GREAT MASTERS.

Children cannot be brought up on sweetmeats and confectionery to be sound and healthy men. As the physical, so must the mental food be simple and nourishing. The masters have provided amply for the latter—keep to that.—Schumann.

The first requisite in a musician is that he should respect, acknowledge and do homage to what is great and sublime in his art, instead of trying to extinguish the great lights, so that his own small one may shine a little more brightly.—Mendelssohn.

The musician who is especially inspired by Nature, without copying her, breathes out in tones the tenderest secrets of his destiny; he thinks, feels and speaks through her.—Liszt.

Art has no fatherland, and all that is beautiful ought to be prized by us, no matter what clime or region has produced it.—Weber.

Whatever the relations of music, it will never cease to be the noblest and

purest of arts.—Wagner.
Art and composition tolerate no conventional fetters; mind and soul soar above them.—Haydn.
Music's final cause is none other than this, that it minister solely to the honor of God and refreshment of the spirit.—Bach.

In no other art is demonstration so difficult as in music. Science fights with mathematics and logic; poetry wields the golden, decisive spoken word; other arts have chosen Nature, whose form they borrow, as their judge; but Music is an orphan, whose father and mother no one can name, and perhaps in the mystery of her origin lies half her charm.—Schumann.

Desire ye to know whether a land is well governed and its people have good morals, hear its music.—Confucius.

NEXT OFFICERS' CAMP TO START AUGUST 27.

(Continued from Page One.)

alry or artillery.

5. Men who are qualified for commissions under general orders No. 42, War Department, 1915.

6. Citizens of the United States who have had service in the present war as officers and noncommissioned officers of the line in the armies of friendly powers. Maximum age of this class 44.

7. Men of exceptional qualifications who tendered their services to the government prior to June 5 and who have been listed under general orders No. 37, War Department.

8. Other citizens with valuable military experience and who have demonstrated marked ability and capacity for leadership. Maximum age for this class 44 years.

"Rookie's" Day Begins at 5:15 a. m.

Day begins at Camp Funston at 5:15, with the first call; it used to be 5:30, but the officers found they had to cram in 15 minutes more of work.

Job follows job then in rapid order, eating being included among the jobs.

At 6:30 the prospective officer is engaged in his breakfast.

At 7:30 he's on a hike.

At 8:30 he's going through the infantry drill.

At 9:30 he's learning how to fire his small arms.

At 10:30 he's receiving instructions in signaling.

At 11:30 he's polishing up his kit and whetting his appetite.

At 12:30 he's filling the cook's heart with great dismay.

At 1:30 he's listening to the daily lectures and instructions.

At 2:30 he's going through drill movements, or he's on guard duty.

At 3:30 he's off duty and probably hiking for his daily mail.

At 4:30 he's fussing up and brushing up his clothes and kit.

At 5:30 he's on parade, under the eye of his superiors.

At 6:30 he's just sitting down to demolish his dinner.

At 7:30 he's visiting with his fellow rookies.

At 8:30 he's in barracks, studying army text-books.

At 9:30, if study is done, he's read-

ing or writing. At 10:30 he's putting out the light, with "nothing to do till tomorrow."

MUSICALLY SPEAKING, DO YOU KNOW

That many composers find the night hours more conducive to work than the hours of the day, hence Nocturnes?

That Crevantes said: "There ne'er was born a Spanish woman yet, but she was born to dance"?

That Marie Gabriel Leschetzky, widow of the famous Viennese piano teacher, is coming to America to live?

That Donizetti's comedy-opera "L'Elisir d'Amore" was recently revived at the Metropolitan? This opera was first produced in Milan, in 1832, and was an instant success. The story goes that the book and music were written in fourteen days?

That Antonin Dvorak composed the "Humoresque"? His name is pronounced "Dvor-zhak."

That when "Tristan and Isolde" was first produced at the Metropolitan, in 1886, the New York Post had the following to say of the opera: "A work not wanted outside of Germany—and not too often there—beginning of the end of the craze for symphonic music in the opera"?

That there are five thousand known folk-songs in England alone?

That Haydn's famous oratorios were written after he was sixty-six years of age?

That the word "Vaudeville" is very old? In the Sixteenth Century it referred to a satirical song. Later it was applied to plays in which such songs were introduced; and finally to the variety performances of the present day.

That Tschalkowsky directed that cannon be fired during the playing of his "Overture 1812," which celebrates the victory of Russia over Napoleon?

FOR SALE—One good Ford touring car, in first-class condition. Will sell worth the money. PLAINVIEW RUBBER CO. Phone 105. 1t.

Third Big Express Shipment of Buick Cars

Arrived this morning—ordered to accommodate our waiting customers before the prices advance on July first. This will be the last shipment we will be able to get before the prices advance.

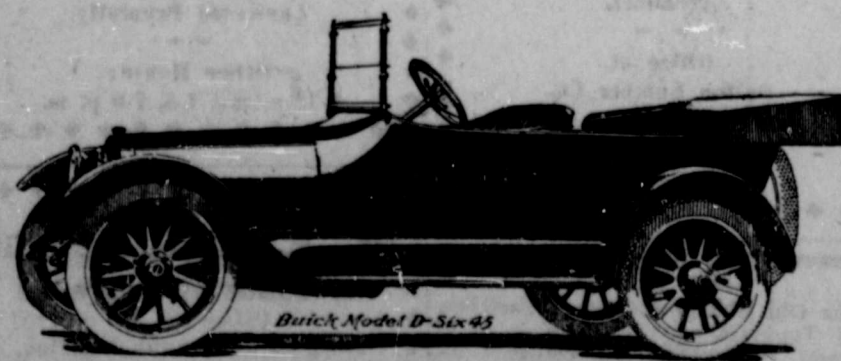

The Choice of all Motorists

In no matter what company you find yourself with a Buick valve-in-head, you are impressed with the fact that all have dignified respect for your choice of a motor car, for the reason that it is generally accepted as the car of first choice by nearly every owner regardless of the car he drives.

Their inability to get a Buick when they bought their car is the excuse of many. The world known truth that the Buick is a car of unusual beauty and refinement and that the valve-in-head is the correct principle of gasoline engine construction is responsible for the complete approval of the general public enjoyed by the Buick valve-in-head.

Everybody Knows
Valve-in-Head
Means Buick
