PLAINVIEW, TEXAS, FRIDAY, JULY 13, 1917

RED CROSS CHAPTER IN BUSINESS SESSION

VARIOUS COMMITTEES ARE APPOINTED TUESDAY EVENING TO DIRECT SOCIETY'S WORK.

MATERIALS ARE DELAYED

Mrs. Tom Carter, Chairman, Receives Word From Washington That Order Cannot Be Filled Now.

The first regular business session of the Red Cross Chapter of Plainview was held last Tuesday night at the Presbyterian Church. The first course of instruction was given, committees organized, and the organization perfected to carry on the making of supplies for the Red Cross Society.

Owing to the fact that there are so many chapters being organized throughout the United States at the present time, the headquarters at Washington find difficulty in supplying the demands for materials. A letter was received yesterday afternoon by Mrs. Tom Carter, chairman of the local chapter, stating that the request for materials had been received by the national department, but could not be filled promptly because of the rush of orders from all over the country. The letter stated that the order will be filled just as soon as possible.

Mrs. Carter when interviewed this morning, said, "The fact that we are unable to obtain the materials to make Red Cross supplies, makes it necessary for the local chapter to postpone its work until a later date, when the national headquarters can see fit to fill our order. We had planned, in fact announced, a meeting for next Tuesday night, believing that the material would be here by that time. The letter yesterday changes our plans, and I deem it wise at this hour to cancel all meetings until further notice."

At the meeting Tuesday night the committees on membership, supplies and instruction were appointed. These committees will supervise the work of their respective departments for the next year. All matters pertaining to some division of the Red Cross work will be turned over to the committee in charge of that branch of service.

The committee on instruction is composed of Miss Helen Nyhus, Miss Sarah Ross, and all the physicians of the city. This committee will direct the making of supplies and introduce the various methods to produce the most efficient results. Instruction in the various lines of making supplies will be given at each meeting under the direction of various members of the instruction committee.

One of the most extensive committees organized Tuesday night was the committee on membership. This branch will carry on membership campaigns. It is considered important as it will determine the life of the chapter and the character and amount of work accomplished. With the committee on membership rests the responsibility of keeping the chapter members active in work, and the enlistment of new members to aid in the making of materials. It is probable that the committee will launch a campaign within a short period to build up the membership.

Mrs. L. A. Knight, whose services are

(Continued on Page Four.)

E. L. Dolan Resigns 'Phone Managership for Auto Business

From a telephone manager to the automobile business. That's the story of the transition in E. L. Dolan's life, who for the last three and one-half years has been manager of the Southwestern Telephone Company in this district, and who has resigned and is now connected with the Carter Mercantile Company. Mr. Dolan's place with the telephone company has been taken by I. G. Dodd, who has been in charge of the district at Weatherford.

Mr. Dolan has been engaged in the telephone business for more than nine years. He was made manager and in this district three and one-half years ago, when the local telephone system has become one of the most highly developed of the Southwestern district.

Honor Guard Girls Take Second Lesson in First Aid Course

The Girls' National Honor Guards met yesterday afternoon at the Presbyterian Church, where they covered the second demonstration and lesson in first aid work. Dr. E. F. McClendon gave a short instructive talk on the subject of bandages, and the members of the National Honor Guard undertook some experimental work in the making and use of bandages.

At 4 o'clock next Thursday afternoon the members will meet for the third lesson of the course in first aid work, was announced today by Miss Lucile Kinder, first lieutenant of the local organization.

SUGAR BEET EXPERIMENTS SHOW FINE DEVELOPMENT

P. W. Madsen Is Optimistic—Growth on Helen Temple Farm and Other Places Is Extensive.

The sugar beet experiments carried on under the supervision of P. W. Madsen, who was engaged by the Young Men's Business League this summer, are making unexpected progress up to the present hour, and it is the general belief of authoritative agricultural persons, that the beet industry is the coming industry of the Plains.

Some of the beets are now sixteen and one-half inches above the ground, and probably would have been much higher if it were not for the hail storms June 23 and July 3, according to Mr. Madsen. Notwithstanding the hail storms and the dry weather, Mr. Madsen sees a promising outcome for the sugar beet experiments. At this hour the content of sugar the beets will contain can not be estimated and will not be known until a final analysis is made later in the year.

Col. R. P. Smyth's patch of sugar beets which is a quarter of an acre in size, was planted April 25. Hail and dry weather placed the growth at a disadvantage in the beginning, but recently the beets have made considerable growth.

The beets are planted in rows with about ten to twelve inches of space between them. This allows the beets sufficient ground for extensive development. Each sugar beet has about fifteen to eighteen leaves, which may be used for feeding stock after being removed from the beet.

At the Plainview Nursery there are four rows each three-eighths of a mile long. They are about seventeen inches above the ground, and are making daily progress in development. These beets are considered by Mr. Madsen to be some of the best of the experiments carried on in Hale County.

The Helen Temple Farm, northwest of town, offers a splendid demonstration in the cultivation of sugar beets on the Plains. The beets suffered through a heavy hail storm June 22, but nevertheless are sixteen inches above the soil.

The two patches of sugar beets on the farm of E. H. Perry, planted by Mr. Madsen June 14, have been irrigated but once this year, and show remarkable strides toward healthy development.

Pictures have been taken of all the experiment patches by R. E. Cochrane, who made a trip from one experiment plot to another with Mr. Madsen last Wednesday morning.

F. M. Waits Speaks on Christian Education.

President E. M. Waits of the Texas Christian University spoke on Christian education at the First Christian Church last Wednesday night. He pointed out the cultivation of the moral side and the intellectual results of an earnest and thorough Christian education.

More Than Fifty Attend Epworth League Lawn Social.

The Epworth League of the South Methodist Church gave a lawn social on the lawn east of the church building last night. The lawn was artistically decorated and lighted by strings of Japanese lanterns.

More than fifty young persons attended the social affair, and joined in the conversation, singing and the playing of games. During the evening ice cream cones were served.

SUGAR BEET OFFICIALS COMING TO PLAINVIEW

P. W. MADSEN EXPECTS UTAH-IDAHO COMPANY'S MEN TO BE HERE ABOUT AUGUST 1.

TO INSPECT EXPERIMENTS

Y. M. B. L. Decides to Make Arrangements for Entertainment of Visitors; Three More Join League.

The sugar beet officials, Merrill Nibbey, assistant general manager of the Utah-Idaho Sugar Company, and Mark Austin, agricultural supervisor of the same company, will arrive in Plainview about August 1 to inspect the sugar beet experiments carried on under the direction of P. W. Madsen, in the Plains this summer. This announcement was made by Mr. Madsen at the regular meeting of the Young Men's Business League last night.

Mr. Madsen also stated that L. L. Johnson, Santa Fe agricultural and industrial agent, and H. M. Bainer, also of the Santa Fe system, will accompany the sugar beet representatives to Plainview to inspect the demonstrations carried on in Hale County. These men are interested in the cultivation of sugar beets on the Plains and are partly responsible in inducing the Utah-Idaho Sugar Company to make experiments in this part of the country.

The members of the Young Men's Business League decided at the meeting last night to launch plans immediately for the arrangement of an entertainment and reception for the visitors respecting the sugar beet industry. A committee, consisting of E. H. Perry, Col. R. P. Smyth and P. J. Woodruff, was appointed to begin arrangements for the entertainment.

The members of the league hope to make the reception an expression of the whole people of Hale County to show the visiting representatives of the oldest sugar beet factory in America that they are interested in the cultivation of sugar beets. Every effort on the part of the league members will be exhausted in making the affair a success, both from a reception standpoint and as an appreciation of the interest these men are taking in the guiding of the agricultural interests of the Plains to greater prosperity.

Last night Mr. Madsen stated that the progress of the development of the beets, where the experiments have been carried on by him, are more than pleasing. He said that some of the beets which were planted about May 23 are standing sixteen and one-half inches above the ground. Mr. Madsen is optimistic over the prospects at this hour, and as he said last night, if the hail can be kept off and other misfortunes, he can see no reason why the experiments will not prove to be successful.

A discussion of the highways leading to Plainview was taken up last night, but there was not anything definite accomplished. Z. E. Black, secretary of the Y. M. B. L., was instructed to carry on correspondence with different groups connected with the highway developments in this part of the country and endeavor to obtain some material foundation for the league to work on in obtaining a higher developed highway system in and around Plainview. He was asked to confer with highway representatives in Amarillo, where he is today attending a meeting of the Plains Panhandle Dairy Association.

Mr. Perry spoke a few minutes about sending agricultural and grain exhibits to the International Congress at Peoria, Ill. Various members seemed to favor the idea suggested by Mr. Perry and it is possible that exhibits will be sent from Hale County, as Mr. Perry pointed out it's an extensive advertising possibilities and manner in which it would do a world of good in giving this county beneficial publicity.

The applications of three new members were accepted by the league last night.

Hale County Wheat Shipments Are Going Beyond Expectations

The wheat shipments from Hale County continue day in and day out, until now it is expected by John Lucas, that the estimate set before the harvest will be surpassed within a few days. Nearly 100 cars have left this district for the mills in the southern Texas. The value of wheat shipped up to date is placed at \$220,000.

"FATTY-SKINNY" GAME TO BE HELD JULY 24

PROCEEDS FROM BASEBALL GAME WILL BE GIVEN TO RED CROSS SOCIETY.

PRACTICE IS IN SECRET

More Than Fifty Candidates Turn Out for Both Teams—Minister and Doctor to Be Umpires.

July 24 has been set as the day for the "Skeletons" and the "Hippos" families to battle it out for the baseball supremacy in this part of the country. Both aggregations have enlisted the most perfect performers in the national pastime to aid in the defense of the clan's reputation, when the enemy is met face to face at o'clock, the neck-to-neck battle will begin.

G. E. Lewis, who is one of the aspiring performers of the heavyweight class, is the most optimistic person in either circle. He says "It can't be did." Other members of both ranks are taking the situation more serious, and do not claim victory but only pray for such an outcome.

Reporters found it difficult to get interviews with members of either side, but here are a few statements brought into the office today by a member of the Burns' Detective Agency.

With regard to umpires for the Fat and Lean game, Dr. E. Lee Dye and Rev. Henry Hagemer have partially agreed to officiate, the one on balls and strikes and the other for the bases. All big league games require two umpires. It was thought well to have one man acquainted with medicine and first aid work; also to have a minister for his moral effect on the players, as well as for his presence in case of fatal accidents.

It will not be imperative that all players wear suits, that is uniforms, as the difference in architecture of the individuals of both teams will render confusion impossible. However, it is hoped that all married players will be fitted out in appropriate costumes by their wives, something fancy and pleasing to the eye, but not too gaudy. It is requested, though, that all players wear a cap, but not a fur cap.

Among the players who are trying out for the Leans are: Ed Roos, J. W. Richards, Liff Harlan, P. J. Woodruff, J. C. Terry, O. M. Unger, Farris Frye, Skinny Franklin, Jimmy Lash, Jim Dougherty, Jake Burkett, E. Z. Black, E. B. Hughes, R. W. Brahan, H. M. Burch, E. H. Humphreys, B. L. Spencer, Jim Heard and J. O. Wyckoff. Some of the above will doubtless be challenged by the Fats because of their unusual skill. Also there are a number whose names are omitted because their wives would object to their playing on account of the danger, but who expect to be on hand on the appointed day.

"Count me in," said Sheriff Terry, "although I was seriously crippled in the Fats and Leans game here 6 years ago. My accident policy partially covered the time I lost, and I will have twice as large a policy before this game." For the sake of the newcomers it might be well to state that the High Sheriff was injured sliding home at the termination of a home run in that game, which the Leans won.

"I'll be on hand," said Owen M. Unger, "if I am in town." The Leans are imploring Mr. Unger to remain in Plainview for they recall that his playing was the feature of the former game. Standing stalwart and attenuated he played first base without other mits than those nature gave him and without an error. He also starred at the bat.

"I'll play if the Leans get behind," earnestly promised Robert W. Brahan. The Lean leader states that it is ungame.

Tuesday, July 24, at 4:30 o'clock is the day and hour set for the game. There is some talk of the stores closing. Tickets will be sold by the women of the local Red Cross Chapter and possibly by the Boy Scouts. The grandstand will seat only 500 and all who have autos are requested to come in same.

It is rumored that the winning team will challenge the local Maxwell team, and manager Lipscomb will likely have a scout on hand to watch the work. Both teams have gone into secret practice, and each promises to be in

Co-operative Retail Delivery Service May Be Established Here

C. W. Sewell will propose to the retailers of Plainview at the meeting of the Retail Merchants' Association next Monday night, the idea of adopting a co-operative delivery system in this city. Mr. Sewell, who has just returned from a visit in Comanche, believes that the delivery system in that city can be adopted to advantage by the merchants in Plainview. It will, if adopted, do away with the individual merchant's delivery and establish a co-operative delivery of all the merchants under one delivery service. Several deliveries will be made daily.

"WHAT'S YOUR NUMBER?" COMMON QUESTION TODAY

Peyton Randolph Says It's Number Two We Want You for Him—Frank Zenley Draws "Lucky" 13.

Any hour of the day one may walk into the Courthouse and see young men of Hale County deeply interested in search of a number and name tabulated on a sheet on the bulletin board. This list of names contains the soldiers' numbers for all the men in Hale County subject to selective draft. They are not known to Uncle Sam by their first or last names, but by number 1, 666 or 999. They have all been renamed.

Mott Finch Zollieffer just took one glance at the list and knew his number, which is number 1. Frank Zenley does not feel any too optimistic about remaining at home, as he learned his number is number 13 today—Friday, the 13th. Robert Fred Rife of Abernathy drew 23, and says he will skidoo unto somewhere in France. Peyton Randolph says its number two we want you for him. Walter (Doc) Longmaire, who drew number 397, says "I'm studying French; there's a reason." Eugene Thomas Powell, number 999, utters, "Tell the Kaiser I'm coming."

As it is now planned, the selecting process will begin at Washington next week. The drawing will be public and for the whole country. The plan which is favored by the military officials is calling out a man from each county that holds any particular number drawn. If number 355 is drawn, then, every man subject to draft, who holds number 355 is considered drafted for the citizen army.

It is not certain at the present whether one or two million will be selected on the first draw. The officials have refused to give out any detail information for publication. It has been announced that provision will be made for exemptions estimated to amount to about 50 per cent.

JOE GUY ROSSON WILL WEAR UNCLE SAM NAVY UNIFORM.

"Well, I can't wait for the draft; Uncle Sam needs me now," said Joe Guy Rosson this afternoon as he boarded the 4:30 o'clock Santa Fe train for Amarillo, where he will take the naval physical examination. Mr. Rosson is not doubtful about passing the examination and expects to be on his way to a training station within a day or two. He is the son of Mrs. B. M. Rosson.

Mr. and Mrs. J. M. Massie of Floydada are in Plainview today visiting friends.

fit condition. It would not be fair to either team to announce just where these practices are being held. If the players on both teams are as good as each claims he is, Plainview fans indeed have a treat in store. Sells-Forpaugh circus showed in Amarillo and passed up Plainview, but we should worry.

Promising Fats: J. H. Slaton, Jno. Vaughn, Dan Ansley, Jim Pipkin, E. H. Perry, W. R. Simmons, E. G. Bennett, Wilbert Peterson, Shorty Watson, Dick Germany, T. Stockton, C. E. White, L. S. Kinder, D. L. Miller, C. D. Wofford, Ben Sebastian, R. E. L. Farmer, Jimmy Cox, Dick Ware, Geo. Mayfield.

John Vaughn says: "My gun is as big as Sheriff Terry's, and I'll be right on the job."

Shorty Watson states: "Dad has promised to feed the shoats the day of the game so I can get into the game."

TEUTON CHANCELLOR RESIGNS, IS REPORT

KAISER WILLIAM HAS NOT STATED WHETHER HE WILL RECOGNIZE WITHDRAWAL.

BAKER TO DRAW NUMBERS

Draft Selection Next Week Holds Thousands of Lives in Balance; Will Be Public and Solemn.

LONDON, July 13.—A dispatch to the Morning Post from Amsterdam says that rumors current that Emperor Williams has abdicated in favor of his son, Prince Joachim, are unconfirmed and must be taken with all reserve.

BERNE, July 12 (British Admiralty per Wireless Press).—The Vossische Zeitung of Berlin says the German imperial chancellor, Dr. Von Bethmann-Hollweg, has resigned.

Emperor William, the newspaper adds, has postponed his decision whether to accept the chancellor's resignation.

WASHINGTON, July 12.—Secretary Baker announced today that in drawing to select men for draft into the war army numbers will be drawn representing every one of the nearly 10,000 registered so that each may know the order in which he is liable to be called for service.

Liability will be fixed by the order in which the names come out. There are some 6,000 districts with numbered registration cards, so that the first number drawn will represent first 6,000 to appear before the exemption boards.

It is estimated that 50 per cent of the men examined will be exempted or fail to pass the physical examination, so that more than a million men probably will appear before the boards before the 687,000 or more wanted on the first call are obtained.

Secretary of War Baker himself probably will draw the numbers which will tell who is to be drafted. He announced this last night following a long conference with President Wilson at the White House, during which final plans for the actual drawing were discussed.

If he himself does not officiate, he made it plain that one of the highest officials of the government would. The secretary denied a report printed this morning that President Wilson will draw the first number, but asserted that great care would be taken to have a man high in the administration councils in actual charge of the drawing.

Went's Use Boy.

The government is taking good care that there shall be no criticism of the draft which might result from slipshod methods of drawing. A proposed plan to have a blindfolded boy, son of one of the cabinet members, do the drawing was abandoned because of the criticism that might have followed. The lives of thousands of men are cast into the balance in the draft and the ceremony of drawing to determine which men shall go to war will be most solemn and impressive.

Draw in Gloomy Room.

The great, gloomy, oak-furnished reception room of the war department, a mausoleum of a room, about the walls

(Continued on Page Eight.)

Z. E. Black Leaves for Dairy Meeting at Amarillo Today

Z. E. Black, secretary of the Young Men's Business League, left today for Amarillo, to attend a meeting of the Plains-Panhandle Dairy Association. Efforts will be made at this meeting to introduce some method to stimulate the dairy industry on the Plains. It is probably that the postponed Dairy Excursion to the dairy center in Wisconsin will be taken under consideration.

Special Session of U. S. District Court to Be Held at Amarillo.

A special term of the United States District Court at Amarillo will be convened July 23, Judge George Whitfield Jack presiding. There will be no jury in attendance, and only equity matters and court business will be transacted.

PLAINVIEW, TEXAS, FRIDAY, JULY 13, 1917

RED CROSS CHAPTER IN BUSINESS SESSION

VARIOUS COMMITTEES ARE APPOINTED TUESDAY EVENING TO DIRECT SOCIETY'S WORK.

MATERIALS ARE DELAYED

Mrs. Tom Carter, Chairman, Receives Word From Washington That Order Cannot Be Filled Now.

The first regular business session of the Red Cross Chapter of Plainview was held last Tuesday night at the Presbyterian Church. The first course of instruction was given, committees organized, and the organization perfected to carry on the making of supplies for the Red Cross Society.

Owing to the fact that there are so many chapters being organized throughout the United States at the present time, the headquarters at Washington find difficulty in supplying the demands for materials. A letter was received yesterday afternoon by Mrs. Tom Carter, chairman of the local chapter, stating that the request for materials had been received by the national department, but could not be filled promptly because of the rush of orders from all over the country. The letter stated that the order will be filled just as soon as possible.

Mrs. Carter when interviewed this morning, said, "The fact that we are unable to obtain the materials to make Red Cross supplies, makes it necessary for the local chapter to postpone its work until a later date, when the national headquarters can see fit to fill our order. We had planned, in fact announced, a meeting for next Tuesday night, believing that the material would be here by that time. The letter yesterday changes our plans, and I deem it wise at this hour to cancel all meetings until further notice."

At the meeting Tuesday night the committees on membership, supplies and instruction were appointed. These committees will supervise the work of their respective departments for the next year. All matters pertaining to some division of the Red Cross work will be turned over to the committee in charge of that branch of service.

The committee on instruction is composed of Miss Helen Nyhus, Miss Sarah Ross, and all the physicians of the city. This committee will direct the making of supplies and introduce the various methods to produce the most efficient results. Instruction in the various lines of making supplies will be given at each meeting under the direction of various members of the instruction committee.

One of the most extensive committees organized Tuesday night was the committee on membership. This branch will carry on membership campaigns. It is considered important as it will determine the life of the chapter and the character and amount of work accomplished. With the committee on membership rests the responsibility of keeping the chapter members active in work, and the enlistment of new members to aid in the making of materials. It is probable that the committee will launch a campaign within a short period to build up the membership.

Mrs. L. A. Knight, whose services are

E. L. Dolan Resigns 'Phone Managership for Auto Business

From a telephone manager to the automobile business. That's the story of the transition in E. L. Dolan's life, who for the last three and one-half years has been manager of the Southwestern Telephone Company in this district, and who has resigned and is now connected with the Carter Mercantile Company. Mr. Dolan's place with the telephone company has been taken by I. G. Dodd, who has been in charge of the district at Weatherford.

Mr. Dolan has been engaged in the telephone business for more than nine years. He was made manager and supervisor of this district three and one-half years ago, when the local branch was in its infancy. Under his efficient direction the system has grown to be one of the most highly developed branches of the Southwestern Telephone Company.

Honor Guard Girls Take Second Lesson in First Aid Course

The Girls' National Honor Guards met yesterday afternoon at the Presbyterian Church, where they covered the second demonstration and lesson in first aid work. Dr. E. F. McClendon gave a short instructive talk on the subject of bandages, and the members of the National Honor Guard undertook some experimental work in the making and use of bandages.

At 4 o'clock next Thursday afternoon the members will meet for the third lesson of the course in first aid work, was announced today by Miss Lucile Kinder, first lieutenant of the local organization.

SUGAR BEET EXPERIMENTS SHOW FINE DEVELOPMENT

P. W. Madsen Is Optimistic—Growth on Helen Temple Farm and Other Places Is Extensive.

The sugar beet experiments carried on under the supervision of P. W. Madsen, who was engaged by the Young Men's Business League this summer, are making unexpected progress up to the present hour, and it is the general belief of authoritative agricultural persons, that the beet industry is the coming industry of the Plains.

Some of the beets are now sixteen and one-half inches above the ground, and probably would have been much higher if it were not for the hail storms June 23 and July 3, according to Mr. Madsen. Notwithstanding the hail storms and the dry weather, Mr. Madsen, sees a promising outcome for the sugar beet experiments. At this hour the content of sugar the beets will contain can not be estimated and will not be known until a final analysis is made later in the year.

Col. R. P. Smyth's patch of sugar beets which is a quarter of an acre in size, was planted April 25. Hail and dry weather placed the growth at a disadvantage in the beginning, but recently the beets have made considerable growth.

The beets are planted in rows with about ten to twelve inches of space between them. This allows the beets sufficient ground for extensive development. Each sugar beet has about fifteen to eighteen leaves, which may be used for feeding stock after being removed from the beet.

At the Plainview Nursery there are four rows each three-eighths of a mile long. They are about seventeen inches above the ground, and are making daily progress in development. These beets are considered by Mr. Madsen to be some of the best of the experiments carried on in Hale County.

The Helen Temple Farm, northwest of town, offers a splendid demonstration in the cultivation of sugar beets on the Plains. The beets suffered through a heavy hail storm June 22, but nevertheless are sixteen inches above the soil.

The two patches of sugar beets on the farm of E. H. Perry, planted by Mr. Madsen June 14, have been irrigated but once this year, and show remarkable strides toward healthy development.

Pictures have been taken of all the experiment patches by R. E. Cochrane, who made a trip from one experiment plot to another with Mr. Madsen last Wednesday morning.

F. M. Waits Speaks on Christian Education.

President E. M. Waits of the Texas Christian University spoke on Christian education at the First Christian Church last Wednesday night. He pointed out the cultivation of the moral side and the intellectual results of an earnest and thorough Christian education.

More Than Fifty Attend Epworth League Lawn Social.

The Epworth League of the South Methodist Church gave a lawn social on the lawn east of the church building last night. The lawn was artistically decorated and lighted by strings of Japanese lanterns.

More than fifty young persons attended the social affair, and joined in the conversation, singing and the playing of games. During the evening ice cream cones were served.

SUGAR BEET OFFICIALS COMING TO PLAINVIEW

P. W. MADSEN EXPECTS UTAH-IDAHO COMPANY'S MEN TO BE HERE ABOUT AUGUST 1.

TO INSPECT EXPERIMENTS

Y. M. B. L. Decides to Make Arrangements for Entertainment of Visitors; Three More Join League.

The sugar beet officials, Merrill Nibley, assistant general manager of the Utah-Idaho Sugar Company, and Mark Austin, agricultural supervisor of the same company, will arrive in Plainview about August 1 to inspect the sugar beet experiments carried on under the direction of P. W. Madsen, in the Plains this summer. This announcement was made by Mr. Madsen at the regular meeting of the Young Men's Business League last night.

Mr. Madsen also stated that L. L. Johnson, Santa Fe agricultural and industrial agent, and H. M. Bainer, also of the Santa Fe system, will accompany the sugar beet representatives to Plainview to inspect the demonstrations carried on in Hale County. These men are interested in the cultivation of sugar beets on the Plains and are partly responsible in inducing the Utah-Idaho Sugar Company to make experiments in this part of the country.

The members of the Young Men's Business League decided at the meeting last night to launch plans immediately for the arrangement of an entertainment and reception for the visitors respecting the sugar beet industry. A committee, consisting of E. H. Perry, Col. R. P. Smyth and P. J. Woodriddle, was appointed to begin arrangements for the entertainment.

The members of the league hope to make the reception an expression of the whole people of Hale County to show the visiting representatives of the oldest sugar beet factory in America that they are interested in the cultivation of sugar beets. Every effort on the part of the league members will be exhausted in making the affair a success, both from a reception standpoint and as an appreciation of the interest these men are taking in the guiding of the agricultural interests of the Plains to greater prosperity.

Last night Mr. Madsen stated that the progress of the development of the beets, where the experiments have been carried on by him, are more than pleasing. He said that some of the beets which were planted about May 23 are standing sixteen and one-half inches above the ground. Mr. Madsen is optimistic over the prospects at this hour, and as he said last night, if the hail can be kept off and other misfortunes, he can see no reason why the experiments will not prove to be successful.

A discussion of the highways leading to Plainview was taken up last night, but there was not anything definite accomplished. Z. E. Black, secretary of the Y. M. B. L., was instructed to carry on correspondence with different groups connected with the highway developments in this part of the country and endeavor to obtain some material foundation for the league to work on in obtaining a higher developed highway system in and around Plainview. He was asked to confer with highway representatives in Amarillo, where he is today attending a meeting of the Plains Panhandle Dairy Association.

Mr. Perry spoke a few minutes about sending agricultural and grain exhibits to the International Congress at Peoria, Ill. Various members seemed to favor the idea suggested by Mr. Perry and it is possible that exhibits will be sent from Hale County, as Mr. Perry pointed out it's an extensive advertising possibilities and manner in which it would do a world of good in giving this county beneficial publicity.

The applications of three new members were accepted by the league last night.

Hale County Wheat Shipments Are Going Beyond Expectations

The wheat shipments from Hale County continue day in and day out, until now it is expected by John Lucas, that the estimate set before the harvest will be surpassed within a few days. Nearly 100 cars have left this district for the mills in the southern Texas. The value of wheat shipped up to date is placed at \$220,000.

"FATTY-SKINNY" GAME TO BE HELD JULY 24

PROCEEDS FROM BASEBALLIC BATTLE WILL BE GIVEN TO RED CROSS SOCIETY.

PRACTICE IS IN SECRET

More Than Fifty Candidates Turn Out for Both Teams—Minister and Doctor to Be Umpires.

July 24 has been set as the day for the "Skeletons" and the "Hippo" families to battle it out for the baseball supremacy in this part of the country. Both aggregations have enlisted the most perfect performers in the national pastime to aid in the defense of the clan's reputation, when the enemy is met face to face at o'clock, the neck-to-neck battle will begin.

G. E. Lewis, who is one of the aspiring performers of the heavyweight class, is the most optimistic person in either circle. He says "It can't be did." Other members of both ranks are taking the situation more serious, and do not claim victory but only pray for such an outcome.

Reporters found it difficult to get interviews with members of either side, but here are a few statements brought into the office today by a member of the Burns' Detective Agency.

With regard to umpires for the Fat and Lean game, Dr. E. Lee Dye and Rev. Henry Hagemeier have partially agreed to officiate, the one on balls and strikes and the other for the bases. All big league games require two umpires. It was thought well to have one man acquainted with medicine and first aid work; also to have a minister for his moral effect on the players, as well as for his presence in case of fatal accidents.

It will not be imperative that all players wear suits, that is uniforms, as the difference in architecture of the individuals of both teams will render confusion impossible. However, it is hoped that all married players will be fitted out in appropriate costumes by their wives, something fancy and pleasing to the eye, but not too gaudy. It is requested, though, that all players wear a cap, but not a fur cap.

Among the players who are trying out for the Leans are: Ed Roos, J. W. Richards, Liff Harlan, P. J. Woodriddle, J. C. Terry, O. M. Unger, Farris Frye, Skinny Franklin, Jimmy Lash, Jim Dougherty, Jake Burkett, E. Z. Black, E. B. Hughes, R. W. Brahan, H. M. Burch, E. H. Humphreys, B. L. Spencer, Jim Heard and J. O. Wyckoff. Some of the above will doubtless be challenged by the Fats because of their unusual skill. Also there are a number whose names are omitted because their wives would object to their playing on account of the danger, but who expect to be on hand on the appointed day.

"Count me in," said Sheriff Terry, "although I was seriously crippled in the Fats and Leans game here 6 years ago. My accident policy partially covered the time I lost, and I will have twice as large a policy before this game." For the sake of the newcomers it might be well to state that the High Sheriff was injured sliding home at the termination of a home run in that game, which the Leans won. "I'll be on hand," said Owen M. Unger, "if I am in town." The Leans are imploring Mr. Unger to remain in Plainview for they recall that his playing was the feature of the former game. Standing stalwart and attenuated he played first base without other mits than those nature gave him and without an error. He also starred at the bat.

"I'll play if the Leans get behind," earnestly promised Robert W. Brahan. The Lean leader states that it is ungame.

Tuesday, July 24, at 4:30 o'clock is the day and hour set for the game. There is some talk of the stores closing. Tickets will be sold by the women of the local Red Cross Chapter and possibly by the Boy Scouts. The grandstand will seat only 500 and all who have autos are requested to come in same.

It is rumored that the winning team will challenge the local Maxwell team, and Manager Lipscomb will likely have a scout on hand to watch the work.

Both teams have gone into secret practice, and each promises to be in

Co-operative Retail Delivery Service May Be Established Here

C. W. Sewell will propose to the retailers of Plainview at his meeting of the Retail Merchants' Association next Monday night, the idea of adopting a co-operative delivery system in this city. Mr. Sewell, who has just returned from a visit in Comanche, believes that the delivery system in that city can be adopted to advantage by the merchants in Plainview. It will, if adopted, do away with the individual merchant's delivery and establish a co-operative delivery of all the merchants under one delivery service. Several deliveries will be made daily.

"WHAT'S YOUR NUMBER?" COMMON QUESTION TODAY

Peyton Randolph Says It's Number Two We Want You for Him—Frank Zenley Draws "Lucky" 13.

Any hour of the day one may walk into the Courthouse and see young men of Hale County deeply interested in search of a number and name tabulated on a sheet on the bulletin board. This list of names contains the soldiers' numbers for all the men in Hale County subject to selective draft. They are not known to Uncle Sam by their first or last names, but by number 1, 666 or 999. They have all been renamed.

Mott Finch Zollicoffer just took one glance at the list and knew his number, which is number 1. Frank Zenley does not feel any too optimistic about remaining at home, as he learned his number is number 13 today—Friday, the 13th. Robert Fred Rife of Abernathy drew 23, and says he will skidoo out somewhere in France. Peyton Randolph says its number two we want you for him. Walter (Doc) Longmire, who drew number 397, says "I'm studying French; there's a reason." Eugene Thomas Powell, number 999, utters, "Tell the Kaiser I'm coming."

As it is now planned, the selecting process will begin at Washington next week. The drawing will be public and for the whole country. The plan which is favored by the military officials is calling out a man from each county that holds any particular number drawn. If number 355 is drawn, then, every man subject to draft, who holds number 355 is considered drafted for the citizen army.

It is not certain at the present whether one or two million will be selected on the first draw. The officials have refused to give out any detail information for publication. It has been announced that provision will be made for exemptions estimated to amount to about 50 per cent.

JOE GUY ROSSON WILL WEAR UNCLE SAM NAVY UNIFORM.

"Well, I can't wait for the draft; Uncle Sam needs me now," said Joe Guy Rosson this afternoon as he boarded the 4:30 o'clock Santa Fe train for Amarillo, where he will take the naval physical examination. Mr. Rosson is not doubtful about passing the examination and expects to be on his way to a training station within a day or two. He is the son of Mrs. B. M. Rosson.

Mr. and Mrs. J. M. Massie of Floydada are in Plainview today visiting friends.

fit condition. It would not be fair to either team to announce just where these practices are being held. If the players on both teams are as good as each claims he is, Plainview fans indeed have a treat in store. Sells-Forpaugh circus showed in Amarillo and passed up Plainview, but we should worry.

Promising Fats: J. H. Slaton, Jno. Vaughn, Dan Anley, Jim Pipkin, E. H. Perry, W. R. Simmons, E. G. Bennett, Wilbert Peterson, Shorty Watson, Dick Germany, T. Stockton, C. E. White, L. S. Kinder, D. L. Miller, C. D. Wofford, Ben Sebastian, R. E. J. Farmer, Jimmy Cox, Dick Ware, Geo. Mayfield.

John Vaughn says: "My gun is as big as Sheriff Terry's, and I'll be right on the job."

Shorty Watson states: "Dad has promised to feed the shoats the day of the game so I can get into the game."

TEUTON CHANCELLOR RESIGNS, IS REPORT

KAISER WILLIAM HAS NOT STATED WHETHER HE WILL RECOGNIZE WITHDRAWAL.

BAKER TO DRAW NUMBERS

Draft Selection Next Week Holds Thousands of Lives in Balance; Will Be Public and Solemn.

LONDON, July 13.—A dispatch to the Morning Post from Amsterdam says that rumors current that Emperor Williams has abdicated in favor of his son, Prince Joachim, are unconfirmed and must be taken with all reserve.

BERNE, July 12 (British Admiralty per Wireless Press).—The Vossische Zeitung of Berlin says the German imperial chancellor, Dr. Von Bethmann-Hollweg, has resigned.

Emperor William, the newspaper adds, has postponed his decision whether to accept the chancellor's resignation.

WASHINGTON, July 12.—Secretary Baker announced today that in drawing to select men for draft into the war army numbers will be drawn representing every one of the nearly 10,000 registered so that each may know the order in which he is liable to be called for service.

Liability will be fixed by the order in which the names come out. There are some 6,000 districts with numbered registration cards, so that the first number drawn will represent first 6,000 to appear before the exemption boards. It is estimated that 50 per cent of the men examined will be exempted or fall to pass the physical examination, so that more than a million men probably will appear before the boards before the 687,000 or more wanted on the first call are obtained.

Secretary of War Baker himself probably will draw the numbers which will tell who is to be drafted. He announced this last night following a long conference with President Wilson at the White House, during which final plans for the actual drawing were discussed.

If he himself does not officiate, he made it plain that one of the highest officials of the government would. The secretary denied a report printed this morning that President Wilson will draw the first number, but asserted that great care would be taken to have a man high in the administration councils in actual charge of the drawing.

Won't Use Boy.

The government is taking good care that there shall be no criticism of the draft which might result from slipshod methods of drawing. A proposed plan to have a blindfolded boy, son of one of the cabinet members, do the drawing was abandoned because of the criticism that might have followed. The lives of thousands of men are cast into the balance in the draft and the ceremony of drawing to determine which men shall go to war will be most solemn and impressive.

Draw in Gloomy Room.

The great, gloomy, oak-furnished reception room of the war department, a mausoleum of a room, about the walls

(Continued on Page Eight.)

Z. E. Black Leaves for Dairy Meeting at Amarillo Today

Z. E. Black, secretary of the Young Men's Business League, left today for Amarillo, to attend a meeting of the Plains-Panhandle Dairy Association. Efforts will be made at this meeting to introduce some method to stimulate the dairy industry on the Plains. It is probably that the postponed Dairy Excursion to the dairy center in Wisconsin will be taken under consideration.

Special Session of U. S. District Court to Be Held at Amarillo.

A special term of the United States District Court at Amarillo will be convened July 23, Judge George Whitfield Jack presiding. There will be no jury in attendance, and only equity matters and court business will be transacted.

The community met the Fourth of July at the home of R. R. Clark and enjoyed ice cream and cake.

Miss Alma Scalus, who has been spending several days in Dallas County, returned here July 3.

Miss Sadie Miller of Halfway was the guest of Myrtle Spence Wednesday evening.

Miss Eva McDaniel, after teaching a class in music several weeks, returned to her home in Plainview Sunday. She was accompanied by Hubert Douthett and her cousin, Mary Clark.

Farmers are busy heading their wheat.

SORGHUMS AND MILLETS ARE THE BEST HAY CROPS FOR SOUTH.

WASHINGTON, D. C., July 12.—In the Southeastern States the sweet sorghums, Sudan grass, millets, and cowpeas are the forage crops best suited for summer planting. The transportation problem, under present conditions, promises to be a highly important one. It is very desirable for this reason that farmers in the Southeastern States should grow sufficient hay to feed their work stock and other farm animals, instead of importing it from other sections of the country. By doing this, the United States Department of Agriculture states they will relieve the pressure on transportation agencies and release large quantities of marketable hay for the use of the army.

The forage crops named succeed even on the moderately fertile lands of the South.

It is not necessary, however, for the cotton farmer to reduce his acreage in cotton to insure himself of an abundance of hay for his own live stock. Usually there is a large amount of unfilled land in the South, and if this were utilized in the production of forage there would be an abundance of hay to supply all home requirements.

One feature to be considered if southern farmers are to produce their own hay is the cost and scarcity of seed for planting. In particular the price of Sudan seed is so high that it practically prohibits the seeding of this crop for hay purposes. To a certain extent this is true also of the cowpea. On the other hand, seed of millets and the sorghums can be obtained at a much more reasonable price. These, therefore, are recommended as the most satisfactory crops for providing hay for home consumption in the Southeast.

In order to conserve the seed supply of sweet sorghums it is advised that the practice of seeding these sorghums broadcast or in close drills be discontinued very largely for the present. Sixty pounds of seed per acre are required where these crops are drilled or broadcasted, and only five pounds if planted in rows and cultivated. This latter method requires more labor, but the yield per acre of fodder will equal or exceed the yield of hay from broadcast or drilled seedings and a much larger acreage can be planted with the same amount of seed.

GIANT OF AUTOMOBILE INDUSTRY PREDICTS GREATER PROSPERITY IN WAR.

By JOHN N. WILLYS.

Automobile manufacturers throughout the country are being deluged by letters, telegrams and verbally with queries as to what effect America's declaration of a state of war existing with Germany will have on business generally, and particularly on the automobile industry.

It seems to me that the unprecedented era of prosperity of the last two years must be continued.

In addition to the enormous business now being handled by this country, the United States Government has just passed a war budget of seven billion dollars. Three billion dollars of this fund will be advanced as a loan to the Allies—who will spend it in the United States.

The remaining four billion dollars will be used to put our own army and navy on a sound war footing.

Every cent of this money will be spent in this country. Every product that is raised or made in this country will be purchased in larger quantities than ever. Every section of the country will benefit—every class of people.

Some of the money will go south to buy cotton. A big share will go to the western states and to the coasts for grain, meat and other foodstuffs. Some of it will go to Pennsylvania for steel and coal. New England will get a share in exchange for shoes. The factories of the Central States will get a share. There will be more money in circulation than ever before.

In Canada, in spite of the handicap of the war, Willys-Overland dealers have since January 1 booked more retail orders than the total Overland sales in Canada for any previous twelve months. The demand in the Dominion for Willys-Overland cars is far in excess of the supply.

Prior to the war, in Canada money was very tight. The per capita wealth across the border was only \$55. At the present time Canada is in better shape financially than ever before; its per capita wealth is now said to be \$92.

The United States today has more money than ever in its history. A recent statement published by U. S. Camp-troller Williams showed that the United States banks had assets of sixteen billion dollars, exceeding by two hundred and ten million dollars the previous high water mark of five months ago, and an increase of five

billion dollars in four years. The total national wealth, according to authoritative estimates, is given out as \$250,000,000,000, with a national debt of only \$5,000,000,000. The estimated combined wealth of Great Britain, France, Russia, Italy and Germany is \$275,000,000,000, while their total national debt is \$60,000,000,000.

There seems to be no cause for pessimism. We can safely look forward to a continuance of good business right here in our own country.

NAVY BEANS ARE VALUABLE IN FOOD.

The navy bean is a good crop to afford food for the family table. A few rows of navies may yield considerable food if the proper attention is given to the preparation of the soil, planting and cultivation.

One good point in the argument for planting beans is that they do well on comparatively thin soil. It is said that in Missouri the yield of navies is from 10 to 25 bushels an acre.

The bean may be harvested and stored for future use. It would not be a difficult matter to produce enough beans to last all the winter.

The following cultural methods are given by the extension department of the University of Missouri and are applicable to most localities of the Southwest:

The beans should be planted 20 pounds to the acre, one inch deep and about three inches apart in rows 20 to 26 inches apart to admit horse cultivation. If corn cultivators are to be used, it is best to make the bean rows the same distance apart as the corn to avoid changing the cultivators.

As soon as the beans are up they should be thoroughly cultivated to break the crust. If the soil is fine, this may be done with a skipe-tooth harrow without killing the plants. Only one or two subsequent cultivations will be needed unless the land is weedy.

Beans should be harvested when the seeds are fully ripe. In small areas the plants may be pulled by hand. As the stems get fully ripe the roots rot sufficiently that the plants frequently may be gathered with a horse rake.

Small lots of beans may be threshed on a barn floor with a flail or stick. If grown on a larger scale, special bean threshers are best. The ordinary wheat thresher is often used, though it is likely to break some of the seed. Skillful threshing men often clamp a larger pulley on the cylinder to reduce the speed one-half, and reduce one-half

DO YOU KNOW THAT
Keeping healthy is a part of doing "your bit"?
Universal public health service is the duty of the Nation?
Much valuable food material is diverted in the manufacture of alcoholic beverages?
The only good fly is the dead one?
Good health is the foundation of personal usefulness either in peace or in war?
He who is too busy to care for his health may have to take time to cure disease?

the teeth from the concave.
If beans are to be stored after threshing, weevils can be kept out during the entire winter by fumigating once with carbon bisulphide. If stored in large quantity, one pound of carbon bisulphide should be used for a space 10 feet wide, 10 feet long and 10 feet high. The bin must be tight to hold the fumes of the carbon bisulphide for 24 hours. Carbon bisulphide can be poured on the top of the beans. The fumes are inflammable; the work should be done away from any fire.

The awful question "What shall I have for dinner?" is easily answered if your shelves are full of home-canned products.

BE CANNY.
Get that canning impulse. Make your hoe this summer keep you can opener busy next winter. Get ready for canning season now. Regrets are the only things ever canned in the jars you forgot to order.

Can nothing that can be kept without canning. Dry such vegetables as corn, string beans, navy beans, mature Lima beans, okra, etc.
You can brag about your garden all winter if you have your canned evidence on the dinner table.

Concentrate products, especially soup mixtures, so that each container will hold as much canned food and as little water as possible.
Really there is nothing to canning fruit and vegetables except care, cleanliness, fresh products, jars, and heat.

BUY NOW

Just for a short time we will offer some interesting specials in our new store as well as our grocery and meat department.

We have shoes, hats, ladies' ready-to-wear goods, and a nice line of racket goods and we sell sugar per sack for \$8.95, one sack to a customer, and flour for \$3.00 per sack.

A Special Exhibition of the New Mechanical Bookkeeper at THE THIRD NATIONAL BANK

A cordial invitation is extended to you to come into this bank and inspect the wonderful Burroughs Bookkeeping Machine which we have just installed. This "bookkeeper with brains of steel" that cannot make a mistake is on exhibition in our banking room.

We want you to see just how this machine operates—how it adds, subtracts and figures balances without an error. Our bookkeepers will show you exactly how our books are posted by machinery. The demonstration will be both interesting and instructive. Samples of the work will be distributed to everyone present.

This machine has been installed for the purpose of giving added protection to our depositors. We urge you to call and become acquainted with this improved method of handling your account.

Third National Bank

TRUTH

As its advertisement—so the car. An honest announcement goes with an honest car.

Truth is the eternal test.

You will never read a Chevrolet statement making any extravagant claim.

True, we have claimed certain qualities for our car—superior motor-power, easy riding comfort, low cost of upkeep—but we have always been prepared to support our statement with the proof.

We claim that the Chevrolet model—now as always—stands for the highest motor value in its price class.

Test our statement—see the Chevrolet car, ride in it.

You will find—as thousands of others have—that we have spoken the truth.

STATEMENT REGARDING FARM LABOR PROBLEM BY THE SECRETARY OF AGRICULTURE.

There is one factor, in particular of great importance, one about which there is much concern. I refer to the labor supply not only for the ordinary farming operations, but especially for the harvest season. There is general agreement that labor may be the principal limiting factor in increasing production. It is true, generally speaking, that in the section west of the Mississippi River and south of the Ohio River the labor supply is not very far short of normal, but even in that region there are particular areas where there is a shortage reported. The exact extent of it I have no means of knowing. There have been reports of migrations of negroes from Alabama and Georgia.

In the neighborhood of the larger industrial centers, even in the West, there are reports of a considerable shortage of labor. There are reports of greater shortages in the Northeast generally—in the section immediately north of us, in eastern Pennsylvania, in New Jersey, in northern Delaware, in southeastern New York, in southeastern Michigan, and in parts of New England, especially in Connecticut. The creation of a large army will involve some additional abstraction of labor from the farms. It is, therefore, of the utmost importance that steps be taken to assure the farmers that, in the harvest season especially, they will be able to secure an adequate labor supply. I believe the problem can be solved. It must be, and I believe farmers should have no hesitation in extending their planting to the limit. The Nation must see to it that they have labor to harvest their crops and must extend such aid as may be needed.

Many suggestions have been made looking to its solution. I believe that the problem can be solved largely by organization and co-operation. The department is taking steps to place in each State, in contact with the State central board, a man whose thought and time shall be given to the matter of labor supply and its organization. He will work with the State central board and the local bodies that are being formed. One of the first things that we shall undertake to do will be to make a sort of farm-labor survey. We know, of course, that even in the same community the load may not come on one farm at exactly the same time that it comes on another. Through co-operation on the part of the farmers, even in the same community, something can be done to mobilize labor, to render help in a pinch on certain farms that need help, through the utilization of labor on other farms which may not, at a given time, be so hard pressed. Over larger areas, the possibility of discovering labor in one section to render help in another part is even greater. The load does not come at the same time in different States. Through a careful survey, we can discover surplus labor or labor not fully employed at a particular time in a given section, give information concerning it to the proper agency in another section or State where there is a deficit, and assist in securing the surplus. We shall, as I have pointed out, work with the State central and local agencies and shall co-operate with other Federal departments, particularly the Department of Labor. We have done this in the past with some success without very much organization and without very much previous planning.

In former years, when the crops were large, the Department of Labor has been instrumental in assisting State commissioners of agriculture in certain States to locate labor not then employed in their States and in adjoining States. I think we can do much to make more effective the regular labor remaining on the farms in particular localities. I think we can do something to bring about a transfer of labor temporarily from one section to another. I think it will be possible to call into service labor not heretofore regularly or fully utilized. We have had large numbers of boys and girls organized in clubs rendering useful service. There is an army of nearly 300,000 of them. I have no doubt that it can be extended; that its number can be increased; and that its services can be used in additional directions. It has been estimated that there are over 2,000,000 boys in town and cities, some of whom have been in touch with rural life, who could be utilized, especially in harvest seasons, if proper steps to organize them were taken. There are many in rural communities whose service has not been fully utilized. It might be found to be desirable and feasible for schools and colleges in certain sections of the country not to resume their sessions so early in the fall so that the boys may help on the farms during the harvest season. In some directions, girls may render valuable and valiant help.

I am not trying to indicate all the methods we might employ or persons we might utilize, but simply to give some hints. Whether it will be necessary to go further, I can not now say; but,

since ample food is so fundamental a need in this crisis, no steps to render aid should be omitted which the emergency may require, and the farmers should know this.

WETTING SPOILS 5,016,000 DOZEN EGGS EACH YEAR.

WASHINGTON, D. C., July 12.—Approximately 5,016,000 dozen eggs spoil needlessly every year in cold storage simply because some one has let clean eggs get wet or has washed dirty eggs before sending them to market, according to the specialists of the United States Department of Agriculture. Careful investigations of large quantities of stored eggs show that from 17 to 22 per cent of washed eggs become worthless in storage, whereas only 4 to 8 per cent of dirty eggs stored unwashed spoil. The explanation is simple. Water removes from the shell of the egg a gelatinous covering which helps to keep air and germs out of the inside of the egg, washing or rain which gets to eggs in the nest, germs and molds find ready access to the contents and spoil the eggs.

This enormous loss in storage eggs largely can be prevented if producers and egg handlers, especially during March, April, and May, will refrain from washing eggs destined for the storage markets and take pains to reduce the number of dirty eggs by providing plenty of clean, sheltered nests for their hens.

Millions of eggs spoil in storage because they have been exposed to dew, rain, dirt, and sun in stolen nest in the grass or fence corners.

In view of this great loss of valuable food, the Department urges country storekeepers and hucksters not to accept washed eggs for shipment in case lots. Shiny eggs, especially in the early spring, probably have been washed. All washed eggs purchased should be sold locally for immediate consumption.

NUMBERS SLOWLY POISONING SYSTEMS.

Auto-Intoxication Is Foundation of Most Diseases and Ill Health, Says Noted Authority.

Advanced medical authorities assert that auto-intoxication is the foundation of most of the ills and diseases to which the human flesh is heir. "This condition," says L. T. Cooper, who has made an exhaustive study of the subject, "is nothing more nor less than the slow self-poisoning of the vital organs, produced by the excessive

organs lame and inactive and permits toxins—actual poisons—to be generated within one's own body.

"In the process of digestion a number of poisonous substances are produced, which, although absorbed in the alimentary canal, are prevented by the liver from entering the circulation. As a result of overwork, fatigue products, sarcolactic acid and prolonged spasms may lead to auto-intoxication. Excess of uric acid in the blood is associated with high arterial pressure, headache, and nervous irritability, and is an indication of imperfect metabolism (malassimilation) and auto-intoxication is the result as shown by the fact that marked improvement occurs by suitable diet and treatment.

"Symptoms of auto-intoxication may be associated with various nervous phenomena. Bile in the blood may be attended by stupor and mental depression and the term melancholia, signifying black bile, indicates the importance which has long been attached to the liver as an organ, the derangement of which causes nervous depression.

"Sometimes the trouble starts in the liver and kidneys, and sometimes it starts in the stomach, or elsewhere, but in any case the blame lies with the faulty method of living, which has become so prevalent of recent years, and it is the more important organs that suffer the final damage—as when they falter or fail in their duties the body fills up with poisons and the victim readily yields to their baneful influences. Bright's disease, stomach and intestinal troubles, catarrhal affections of the mucous membrane, in fact, may be called auto-intoxication or self-poisoning."

"A tired, dragging feeling of the body," continued Mr. Cooper, "or sluggish mind and dull memory, intense nervousness, headaches, stomach and bowel troubles, poor circulation, imperfect digestion, constipation and depression, are common symptoms of auto-intoxication, and nine out of every ten persons in the average city are likely to be so affected."

Tanlac, the powerful reconstructive tonic, was designed especially to overcome these troubles, and it is Mr. Cooper's theory that the Tanlac treat-

ment is the direct remedy therefor. There is not a single portion of the body that is not benefited by the healthful work of this celebrated preparation, which begins its action by stimulating the digestive and assimilative organs, thereby enriching the blood and invigorating the entire system. Next, it enables the stomach to thoroughly digest the food, thereby permitting the assimilable products to be converted into blood, bone and muscle. It overcomes that great exciting cause of disease—weakness. It renders the body vigorous and elastic and keeps the mind clear and energetic and throws off the symptoms of nervousness and indigestion. It builds up the constitution, weakened by disease and mental and physical overwork, quickens convalescence and is an unfailing source of comfort to those suffering from these troubles.

Tanlac is sold in Plainview by Long-Harp Drug Co. and in Hale Center by Hale Center Drug Co.—Adv.

Farmers are busy heading their wheat.

SORGHUMS AND MILLETS ARE THE BEST HAY CROPS FOR SOUTH.

WASHINGTON, D. C., July 12.—In the Southeastern States the sweet sorghums, Sudan grass, millets, and cowpeas are the forage crops best suited for summer planting. The transportation problem, under present conditions, promises to be a highly important one. It is very desirable for this reason that farmers in the Southeastern States should grow sufficient hay to feed their work stock and other farm animals, instead of importing it from other sections of the country. By doing this, the United States Department of Agriculture states they will relieve the pressure on transportation agencies and release large quantities of marketable hay for the use of the army.

The forage crops named succeed even on the moderately fertile lands of the South.

It is not necessary, however, for the cotton farmer to reduce his acreage in cotton to insure himself of an abundance of hay for his own live stock. Usually there is a large amount of untilled land in the South, and if this were utilized in the production of forage there would be an abundance of hay to supply all home requirements.

One feature to be considered if southern farmers are to produce their own hay is the cost and scarcity of seed for planting. In particular the price of Sudan seed is so high that it practically prohibits the seeding of this crop for hay purposes. To a certain extent this is true also of the cowpea. On the other hand, seed of millets and the sorghums can be obtained at a much more reasonable price. These, therefore, are recommended as the most satisfactory crops for providing hay for home consumption in the Southeast.

In order to conserve the seed supply of sweet sorghums it is advised that the practice of seeding these sorghums broadcast or in close drills be discontinued very largely for the present. Sixty pounds of seed per acre are required where these crops are drilled or broadcasted, and only five pounds if planted in rows and cultivated. This latter method requires more labor, but the yield per acre of fodder will equal or exceed the yield of hay from broadcast or drilled seedings and a much larger acreage can be planted with the same amount of seed.

GIANT OF AUTOMOBILE INDUSTRY PREDICTS GREATER PROSPERITY IN WAR.

By JOHN N. WILLYS.

Automobile manufacturers throughout the country are being deluged with letters, telegrams and verbally with queries as to what effect America's declaration of a state of war existing with Germany will have on business generally, and particularly on the automobile industry.

It seems to me that the unprecedented era of prosperity of the last two years must be continued.

In addition to the enormous business now being handled by this country, the United States Government has just passed a war budget of seven billion dollars. Three billion dollars of this fund will be advanced as a loan to the Allies—who will spend it in the United States.

The remaining four billion dollars will be used to put our own army and navy on a sound war footing.

Every cent of this money will be spent in this country. Every product that is raised or made in this country will be purchased in larger quantities than ever. Every section of the country will benefit—every class of people.

Some of the money will go south to buy cotton. A big share will go to the western states and to the coasts for grain, meat and other foodstuffs. Some of it will go to Pennsylvania for steel and coal. New England will get a share in exchange for shoes. The factories of the Central States will get a share. There will be more money in circulation than ever before.

In Canada, in spite of the handicap of the war, Willys-Overland dealers have since January 1 booked more retail orders than the total Overland sales in Canada for any previous twelve months. The demand in the Dominion for Willys-Overland cars is far in excess of the supply.

Prior to the war, in Canada money was very tight. The per capita wealth across the border was only \$55. At the present time Canada is in better shape financially than ever before; its per capita wealth is, now said to be \$92.

The United States today has more money than ever in its history. A recent statement published by U. S. Camp-troller Williams showed that the United States banks had assets of sixteen billion dollars, exceeding by two hundred and ten million dollars the previous high water mark of five months ago, and an increase of five

billion dollars in four years. The total national wealth, according to authoritative estimates, is given out as \$250,000,000,000, with a national debt of only \$8,000,000,000. The estimated combined wealth of Great Britain, France, Russia, Italy and Germany is \$275,000,000,000, while their total national debt is \$60,000,000,000.

There seems to be no cause for pessimism. We can safely look forward to a continuance of good business right here in our own country.

NAVY BEANS ARE VALUABLE IN FOOD.

The navy bean is a good crop to afford food for the family table. A few rows of navies may yield considerable food if the proper attention is given to the preparation of the soil, planting and cultivation.

One good point in the argument for planting beans is that they do well on comparatively thin soil. It is said that in Missouri the yield of navies is from 10 to 25 bushels an acre.

The bean may be harvested and stored for future use. It would not be a difficult matter to produce enough beans to last all the winter.

The following cultural methods are given by the extension department of the University of Missouri and are applicable to most localities of the Southwest:

The beans should be planted 20 pounds to the acre, one inch deep and about three inches apart in rows 20 to 36 inches apart to admit horse cultivation. If corn cultivators are to be used, it is best to make the bean rows the same distance apart as the corn to avoid changing the cultivation.

As soon as the beans are up they should be thoroughly cultivated to break the crust. If the soil is fine, this may be done with a skipe-tooth harrow without killing the plants. Only one or two subsequent cultivations will be needed unless the land is weedy.

Beans should be harvested when the seeds are fully ripe. In small areas the plants may be pulled by hand. As the stems get fully ripe the roots rot sufficiently that the plants frequently may be gathered with a horse rake.

Small lots of beans may be threshed on a barn floor with a flail or stick. If grown on a larger scale, special bean threshers are best. The ordinary wheat thresher is often used, though it is likely to break some of the seed. Skillful threshing men often clamp a larger pulley on the cylinder to reduce the speed one-half, and reduce one-half

DO YOU KNOW THAT

- Keeping healthy is a part of doing "your bit"?
- Universal public health service is the duty of the Nation?
- Much valuable food material is diverted in the manufacture of alcoholic beverages?
- The only good fly is the dead one?
- Good health is the foundation of personal usefulness either in peace or in war?
- He who is too busy to care for his health may have to take time to cure disease?

the teeth from the concave. If beans are to be stored after threshing, weevils can be kept out during the entire winter by fumigating once with carbon bisulphide. If stored in large quantity, one pound of carbon bisulphide should be used for a space 10 feet wide, 10 feet long and 10 feet high. The bin must be tight to hold the fumes of the carbon bisulphide for 24 hours. Carbon bisulphide can be poured on the top of the beans. The fumes are inflammable; the work should be done away from any fire.

The awful question "What shall I have for dinner?" is easily answered if your shelves are full of home-canned products.

BE CANNY.

Get that canning impulse. Make your hoe this summer keep your can opener busy next winter. Get ready for canning season now. Regrets are the only things ever canned in the jars you forgot to order.

Concentrate products, especially soup mixtures, so that each container will hold as much canned food and as little water as possible. Really there is nothing to canning fruit and vegetables except care, cleanliness, fresh products, jars, and heat.

BUY NOW

Just for a short time we will offer some interesting specials in our new store as well as our grocery and meat department.

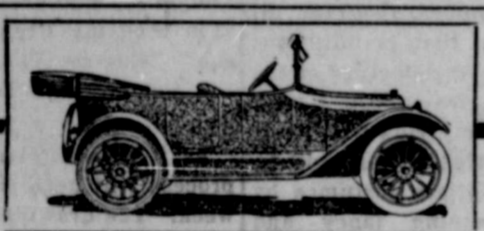

We have shoes, hats, ladies' ready-to-wear goods, and a nice line of racket goods and we sell sugar per sack for \$8.95, one sack to a customer, and flour for \$3.00 per sack.

Watch our ads, come see us and save money.

Come and see our premium windows and your premium tickets, they are valuable.

TRUTH

As its advertisement—so the car. An honest announcement goes with an honest car.

Truth is the eternal test.

You will never read a Chevrolet statement making any extravagant claim.

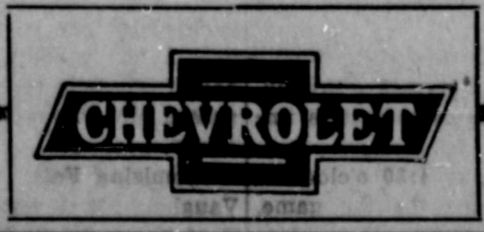

True, we have claimed certain qualities for our car—superior motor-power, easy riding comfort, low cost of upkeep—but we have always been prepared to support our statement with the proof.

We claim that the Chevrolet model—now as always—stands for the highest motor value in its price class.

Test our statement—see the Chevrolet car, ride in it.

You will find—as thousands of others have—that we have spoken the truth.

E. N. Egge Auto Co.

A Special Exhibition of the New Mechanical Bookkeeper at THE THIRD NATIONAL BANK

A cordial invitation is extended to you to come into this bank and inspect the wonderful Burroughs Bookkeeping Machine which we have just installed. This "bookkeeper with brains of steel" that cannot make a mistake is on exhibition in our banking room.

We want you to see just how this machine operates—how it adds, subtracts and figures balances without an error. Our bookkeepers will show you exactly how our books are posted by machinery. The demonstration will be both interesting and instructive. Samples of the work will be distributed to everyone present.

This machine has been installed for the purpose of giving added protection to our depositors. We urge you to call and become acquainted with this improved method of handling your account.

STATEMENT REGARDING FARM LABOR PROBLEM BY THE SECRETARY OF AGRICULTURE.

There is one fact, in particular of great importance, one about which there is much concern. I refer to the labor supply not only for the ordinary farming operations, but especially for the harvest season.

In the neighborhood of the larger industrial centers, even in the West, there are reports of a considerable shortage of labor. There are reports of greater shortages in the Northeast generally—in the section immediately north of us, in eastern Pennsylvania, in New Jersey, in northern Delaware, in southeastern New York, in southeastern Michigan, and in parts of New England, especially in Connecticut.

Many suggestions have been made looking to its solution. I believe that the problem can be solved largely by organization and co-operation. The department is taking steps to place in each State, in contact with the State central board, a man whose thought and time shall be given to the matter of labor supply and its organization.

In former years, when the crops were large, the Department of Labor has been instrumental in assisting State commissioners of agriculture in certain States to locate labor not then employed in their States and in adjoining States.

I am not trying to indicate all the methods we might employ or persons we might utilize, but simply to give some hints. Whether it will be necessary to go further, I can not now say; but,

since ample food is so fundamental a need in this crisis, no steps to render aid should be omitted which the emergency may require, and the farmers should know this.

WETTING SPOILS 5,016,000 DOZEN EGGS EACH YEAR.

WASHINGTON, D. C., July 12.—Approximately 5,016,000 dozen eggs spoil needlessly every year in cold storage simply because some one has let clean eggs get wet, or has washed dirty eggs before sending them to market, according to the specialists of the United States Department of Agriculture.

This enormous loss in storage eggs largely can be prevented if producers and egg handlers, especially during March, April, and May, will refrain from washing eggs destined for the storage markets and take pains to reduce the number of dirty eggs by providing plenty of clean, sheltered nests for their hens.

Millions of eggs spoil in storage because they have been exposed to dew, rain, dirt, and sun in stolen nest in the grass or fence corners.

In view of this great loss of valuable food, the Department urges country storekeepers and hucksters not to accept washed eggs for shipment in case lots. Shiny eggs, especially in the early spring, probably have been washed. All washed eggs purchased should be sold locally for immediate consumption.

NUMBERS SLOWLY POISONING SYSTEMS.

Auto-Intoxication is Foundation of Most Diseases and Ill Health, Says Noted Authority.

Advanced medical authorities assert that auto-intoxication is the foundation of most of the ills and diseases to which the human flesh is heir. "This condition," says L. T. Cooper, who has made an exhaustive study of the subject, "is nothing more nor less than the slow self-poisoning of the vital organs, produced by the excessive

organs lame and inactive and permits toxins—actual poisons—to be generated within one's own body.

"In the process of digestion a number of poisonous substances are produced, which, although absorbed in the alimentary canal, are prevented by the liver from entering the circulation. As a result of overwork, fatigue products, sarcolactic acid and prolonged spasms may lead to auto-intoxication. Excess of uric acid in the blood is associated with high arterial pressure, headache, and nervous irritability, and is an indication of imperfect metabolism (malassimilation) and auto-intoxication is the result as shown by the fact that marked improvement occurs by suitable diet and treatment.

"Symptoms of auto-intoxication may be associated with various nervous phenomena. Bile in the blood may be attended by stupor and mental depression and the term melancholia, signifying black bile, indicates the importance which has long been attached to the liver as an organ, the derangement of which causes nervous depression.

"Sometimes the trouble starts in the liver and kidneys, and sometimes it starts in the stomach, or elsewhere, but in any case the blame lies with the faulty method of living, which has become so prevalent of recent years, and it is the more important organs that suffer the final damage—as when they falter or fail in their duties the body fills up with poisons and the victim readily yields to their baneful influences. Bright's disease, stomach and intestinal troubles, catarrhal affections of the mucous membrane, in fact, may be called auto-intoxication or self-poisoning."

"A tired, dragging feeling of the body," continued Mr. Cooper, "or sluggish mind and dull memory, intense nervousness, headaches, stomach and bowel troubles, poor circulation, imperfect digestion, constipation and drowsiness, are common symptoms of auto-intoxication, and nine out of every ten persons in the average city are likely to be so affected."

Tanlac, the powerful reconstructive tonic, was designed especially to overcome these troubles, and it is Mr. Cooper's theory that the Tanlac treat-

HARRISON & KERR CO., General Contractors. Office at Fulton Lumber Co. Phone 107. House Phones, 328 and 423.

ment is the direct remedy therefor. There is not a single portion of the body that is not benefited by the healthful work of this celebrated preparation, which begins its action by stimulating the digestive and assimilative organs, thereby enriching the blood and invigorating the entire system. Next, it enables the stomach to thoroughly digest the food, thereby permitting the assimilable products to be converted into blood, bone and muscle. It overcomes that great exciting cause of disease—weakness. It renders the body vigorous and elastic and keeps the mind clear and energetic and throws off the symptoms of nervousness and indigestion. It builds up the constitution, weakened by disease and mental and physical overwork, quickens convalescence and is an un-failing source of comfort to those suffering from these troubles.

Tanlac is sold in Plainview by Long-Harp Drug Co. and in Hale Center by Hale Center Drug Co.—Adv.

THOSE SUGAR BEETS.

The sugar beet industry appears to be the coming industry of the Plains. The possibilities of successful cultivation of the beets on the Plains have gone beyond expectations of P. W. Madsen, the sugar beet expert, who was engaged by the Young Men's Business League to carry on experiments here.

Mr. Madsen stated last night that about August 1, Merrill Nibley, assistant general manager of the Utah-Idaho Company, and Mark Austin, general agricultural supervisor of the same company, will visit Plainview to determine the progress of the beet experiments here and also to investigate the possibilities of the industry in this of the country.

If the farmers will get behind the movement and show their willingness to recognize the coming industry of the Plains, it is quite possible that these two men will make an attractive proposition to them in helping to increase their profits. These two men have been in the sugar beet industry many years. They have made the industry one of the main and supporting agricultural and industrial interests in the State of Utah.

It is up to the people of the Plains to determine whether or not they want to take the progressive step in the direction of the cultivation of sugar beets. The beets themselves at the present are biding their own, and it is just about certain they can be grown here in the same extensiveness that they are in other parts of the country if the farmers just get behind the industry, realize its far-reaching vastness, and the wide range of profits.

HANDS.

"Speaking of hands," observed Mr. Lately Married, "my mother's were beautiful."

In reply his young wife maintained the silence of discretion. She had met that mother only a short time before her death, but of her hands young wife had a distinct recollection.

She knew that they were gnarled at the joints, puffy and discolored with swollen veins showing through the wrinkly skin, finger tips blunted, nails ragged.

Yet Mr. Lately Married was right. His mother's hands were indeed beautiful, so beautiful that, to those who understood, their ugliness went unseen.

Days by the thousands those same worn hands had been soft enough to smooth the table-cloths or pillow cases or hot cheeks. They knew how through dexterity to remedy what awkwardness had bungled. To a million wants they had ministered and to two million whims, doing the apparent task always, forever finding work where none was commanded. They had fashioned material things into essences of the spirit.

There is a loveliness of the hand that the manicurist wots not of. Mother hands often possess it. But it's just as likely to be discovered in the mit of gruff-spoken farmers, storekeepers, mechanics.

There is service.—Wichita Beacon.

BE A PATRIOT.

Word comes from the War Department at Washington to the effect that it is now possible and probable that two million men will be selected on the first draw. The Government expects and allows 50 per cent exemptions, which will leave a citizen army of one million Americans.

In accordance to population, Hale County will be called upon to furnish in the neighborhood of 200 men for the national army. Those men from Hale County who have already enlisted are not to be accredited to Hale County in the draft, unless their numbers are drawn on the draft selection, which will take place the beginning of next week.

Now, is the time for the citizens of Plainview to be minute patriots. They have only a short period in which they may plan and prepare a patriotic celebration in the honor of the young men of this county who will say farewell.

It is going to be a privilege to entertain these young men, and don't forget that. These young men who will battle for the salvation of your ideals deserve the backing and support of every liberty-loving American in Hale County. Be a patriot and serve your country in some form, shape or manner.

This is the golden opportunity for those persons who claim they are too old to serve in the army to do their bit. Every day a person may be heard to say that if he were young enough or if he were not a married man, he would have been over in France before this hour. Well, here is the chance for those persons to do some service. Let's get behind the man behind the gun. Be a patriot.

RED CROSS CHAPTER IN BUSINESS SESSION.

(Continued from Page One.)

in a way responsible for the establishment of the chapter in Plainview, has been made chairman of the committee. The other members on the committee are Mrs. E. E. Roos, Mrs. Joseph Buchheiser, Z. E. Black, M. D. Henderson, E. H. Perry, Dr. Ernest E. Robinson, Dr. Henry Hagemeier, Dr. I. E. Gates and Dr. T. B. Haynie.

The committee on supplies is composed of Mrs. T. P. Whitts, chairman, Mrs. E. B. Hughes, Mrs. Cora Pritchett, Mrs. W. E. Risser, Jo W. Wayland and John Lucas. This committee has been placed in charge of the supervision of obtaining supplies for the local chapter and also the distribution of the same at the various meetings of the active Red Cross members.

Mrs. Tom Carter this morning said that the members of the chapter will be notified as soon as the supplies reach Plainview. There will be no further meetings until the materials are here to make Red Cross supplies, as everything is organized up to the point of active service.

Mrs. Nannie Stringfellow arrived this morning from her home in Los Angeles, Cal., to visit her sister, Mrs. J. L. Vaughn, and brother, Thornton Jones.

Miss Gladys Speer left today to visit her sister at Rule.

Mr. and Mrs. Guy W. McCarty of Abilene, who have been visiting Mrs. McCarty's parents, Mr. and Mrs. John M. Gist, the last two weeks, have returned to their home.

Mr. and Mrs. O. K. Unglesbe, who have been visiting Mrs. I. L. Marrs, left this week for their home in Strand, Okla.

Mr. and Mrs. Asa Brookshire and daughter and Arthur Schrock arrived home from a visit at Casa Grande, Ariz. They made the journey in six days, visiting Phoenix, Bisbee, Douglas and El Paso. They reached Plainview last Sunday evening.

Miss Nellie Rountree left this morning for a visit in Colorado with friends for the next two months.

Mr. and Mrs. George R. Jordan of Forney are the guests of Mr. and Mrs. Grady Pipkin.

Miss Jewell Clark, who has been attending the State Normal School at Canyon, has returned to Plainview for a short visit.

MAXWELLS WIN ANOTHER HAIR-RAISING GAME, 6-1

Humphries Is Puzzle to Visitors After First Inning—Same Teams Will Play Today.

The Maxwellites surprised the invading crew from Crosbyton yesterday afternoon in a nerve-racking baseball matinee, capturing the battle, 6 to 1. The home team traveled in the rear for five innings, and as the sun was about to set in the West, the members of Plainview fandom saw defeat staring them in the face.

C. Humphries was on the mound for the Maxwellites, and after an unsettled beginning in the opening round, he twirled his usual 14-karat game. Seutler, the lanky third sacker for the Crosbyton clan, picked out one of Humphries' twisters and twisted it over the right field wall for a circuit clout. This one run appeared as if it were worn in the clothes of victory.

The cannon balls, the skyrockets and various other fireworks were turned loose in the fifth round, after the mystery of the enemy's pitching staff had been solved. "Red" Craig led off with a solitaire to center garden, and registered on a clout by E. Humphries. The latter scored a minute later, when Hinds smacked one in the face. These two runs disturbed and discouraged the visitors. Confidence and victory flew away from their bench, and Seely's smile was wiped off for the remainder of the day.

Disaster came to the camp of the Crosbyton performers in the very next session. Hits were as prominent and as common as the set of ivories in "Teddy" Roosevelt's mouth. Five whistling clouts were sprinkled in this round, and resulted in four runs being chalked up to the Maxwellites. E. Humphries' two-station blow with two runners on the sacks, put the "See" in Pitcher Seely's name. He realized that it was a hopeless task to float the "pill" over the platter without hitting a submarine, mine or some other instrument of war that brings disaster.

terday with three wallops, all of which terday with three wallops, all of which were clean and opportune. Two of them were delivered at the psychological moments of the battle, and did more than anything else in bringing about the downfall of the visitors' moundsman. E. Humphries' hitting also was spectacular. He got two punches out of three trips to the rubber.

The same two teams are scheduled to play this afternoon, and Manager Lipscomb says he expects the home boys to tell the same old story in the same old way, that is, never quit until the other fellow says he has enough. The Maxwellites have gained a reputation of fighting until the last minute.

Box Score. MAXWELL— AB R H PO A E C. Humphries, c. 5 0 0 12 2 0 Craig, lf. 5 2 3 0 0 0 Wilson, cf. 5 1 2 0 0 0 E. "I Can Sell Almost Any Make of Tire Once"

—but this town is not big enough in which to do business on the ONE SALE ONLY basis.

I must sell tires again and again to the same people.

On this principle my business has grown because I sell a tire that cuts down upkeep to a fair and reasonable figure.

People ask how far will this tire run? I tell them we rarely see a Diamond that won't go five thousand miles. Yet Diamonds are PRICED on a basis of only three thousand five hundred miles.

There is no "velvet" in the price, but plenty of "velvet" in Diamond mileage.

We carry a complete line of sizes in stock and can fill your tire wants immediately. If you can't come, telephone.

Every Diamond Tire must deliver full value in service. If ever a Diamond Tire fails, a cheerful, willing adjustment will be promptly made.

ENTERTAIN IN HONOR OF THEIR VISITING SISTER.

Wednesday afternoon at the Hotel Ware, Mrs. Clint Shepard and Mrs. T. C. Shepard entertained in honor of their sister, Mrs. J. L. White of McKinney.

Eighteen tables were arranged for forty-two. Mrs. James R. DeLay was the high point winner during the social hour. The artistic score cards were original and beautiful in design.

The out of town guests were Mrs. Robert W. Lemond of Kansas City, Mrs. J. J. Roberts, Hale Center, Mrs. W. A. Bennett, Fort Worth, Mrs. Geo. E. Jordan, Forney, Mrs. Staden Odell, Hillsboro, Mrs. S. H. Adams, Slaton, and Miss Lowenburg, New York.

Shoulder Cape Will Be Missing In Winter Wardrobe.

The mantle of fur, which has been worn this summer, will replace the shoulder cape or scarf in many a winter wardrobe. Seal and ermine make an exquisite and expensive combination. Mole skin is used for some of the most charming of these short wraps, Hudson seal for less expensive. A garment of this style can be worn over a coat dress in the fall, and over a heavy wrap when the snow flies.

The price of fur went rocketing at the beginning of the war and it has not stopped yet. This has brought into the market more kinds of pelts than the average woman can name. The humble rabbit skin no longer hides as a coat lining, but bravely parades as the collar on many a velvet coat.

Long and short haired pelts divide fashion's favor.

GUEST IS HONORED.

Miss Alma Armstrong entertained in honor of her niece, Miss Adele Dillingham of Blooming Grove, last Saturday night. The evening was spent in the playing of games and a musical hour. Ices and cake were served.

ARE HOSTS AT THEATRE PARTY.

Miss Martha McClendon and Edgar McClendon were hosts at a theatre party at the Olympic theatre last night. The chaperones for the young persons at the "movies" were Mrs. E. F. McClendon and Miss Beulah Alexander of Monument, N. M.

Those who comprised the guest list were Misses Maurine Richards, Zella and Resanne Hulen, Gladys Speer, Sadye Earle Adams, Grace Rosser, Ruth Towery and Louise Lamb. The boys were Chauncey Gidney, Elbert Lamb, O. C. McDaniels, Newton Gilbert, Curtis Mathes, Arthur Reinken and Albert Garrett.

WOMEN MOTORISTS HAVE DISTINCTIVE FASHIONS FOR JOY RIDES.

Braiding is popular and appears on gowns, jackets and hats. The white satin toques with black braiding are just now a fad. Silk soutache is used, so they are good looking. Black net veils with narrow black satin ribbon borders are worn with the hats.

Among tuck pillows for touring use are small square ones and those in heart shape, and a woman who spends much time touring says the hourglass shape is most comfortable of all. The latter is made with hourglass proportions, only the center does not run quite so small as the model, but leaves a slender neck which just fits under the back of the head or under one arm if the shoulders are tired.

White broadcloth robes are a fad that is rather costly. The robes are unlined and are finished with wide stitched hems.

Women handy with their knitting needles are making fascinating silk scarfs for use now as well as for winter comfort. The popular ones are about twelve inches wide and two yards long, made of black or white, with the brilliant borders and fringe.

An After Supper Sale Saturday

Offering Many Choice Bargains Desserts

Indeed it will pay you to have supper a bit earlier than usual in order to get first choice of these splendid values.

Real needfuls are offered—just the things you'd have to buy anyway. And here they are at saving prices, obtainable with no more trouble than a trip to the store after supper.

Our After Supper Sale Starts at 6:30; Closes at 9:30

We propose to give after Supper Shoppers the greatest opportunity that we could possibly offer in a matter of merchandise values, and have accordingly prepared quantities of special offerings so that the expected large crowd of bargain hunters shall not be disappointed.

WHERE PEOPLE WHO DRESS BEST TRADE

CLEAN COTTON RAGS WANTED AT THIS OFFICE. FIVE CENTS PER POUND.

A novel orange Shetland sweater has a perling in black that draws it in close from under the bust to the hip line. The collar, a small sailor, and the cuffs are also of black. The sweater slips on over the head.

C. O. Spann of Kress was a visitor in this city yesterday.

Mr. and Mrs. E. E. Roos, Dr and Mrs. J. C. Anderson and daughter left this week for an auto trip through Colorado.

CLEAN COTTON RAGS WANTED AT THIS OFFICE. FIVE CENTS PER POUND.

THE SALE IS NOW ON

EVERY pair of Oxfords in our store will be sold at greatly reduced prices. All regular quality, the well known Florsheim and Walk-over make.

\$7.50 and \$8.00 Oxfords cut to **\$5.95**

\$5, \$6 and \$7 Oxfords cut to **\$4.50**

\$4.50 Oxfords cut to **\$3.50**

Buy a pair of Oxfords now while you can make a big saving. Every pair is the well known standard of quality.

We have plenty of sizes and styles but they won't last long at these prices. These prices are lower than we can buy these Oxfords for today.

Reinken's
CLOTHING and
SHOE STORE

Pongee rompers for small trippers are made with sailor collars and pointed necks, but have shields to button if the weather turns cool or breezy. Stitced pongee hats to match, tan socks and sandals complete a cool and sensible costume. The extra coats are made of nut brown tweed with large white buttons and stitced edges in a real raglan model. Boys and girls wear the same style up to five years.

White broadcloth top coat with white fox fur boas to go with them are the smartest coats of the season, but are not practical for touring. They are lined with heavy white silk. When they are soiled and perhaps after one cleaning the coats may be dyed, and they are so well tailored that they will be none the worse for the experience. High crowned straw hats with the White Indian wing wreaths are worn with the coats. White chiffon veils with white velvet polkadots go with the hats.

Separate magazine bags to swing on the rail are very convenient. The bags are made of heavy chintz with two compartments, and may be washed without injury. Some are made of embroidered canvas.

Khaki toilet set carriers or dressing cases, though intended for army use, make good over-night outfits. There is nothing about them to spoil and they stand the weather perfectly.

"Hold-alls," made of enameled duck, are very convenient for carrying little extra needs for small travelers. The cases are very light, roomy and not bad looking with the smarter luggage. The latest fancy hat box is one with white satin over the cover, and around the box small black velvet birds are on the wing. The boxes have large black satin ties.

Fan-shaped tuck pillows are new and are made in material like the upholstery of the car. One, made of black satin, is heavily embroidered in gold thread. Both sides are alike and the pillows are filled with duck down.

Mrs. D. W. McGlasson returned yesterday to Plainview from Denver, where her daughter, Miss Mary Brazelton, is in the sanitarium.

Charles McCarty and family are here on business.

J. M. Gist left yesterday for a business trip to Kansas City.

Miss Josephine Gilbert, who is a student at the State Normal School at Canyon, spent the week-end with her parents, Mr. and Mrs. C. A. Gilbert.

Fancy Wash Fabrics

At Surprisingly Low Prices

Season's best sellers reduced to close out.

5c—One lot of lawns and calicos worth up to 15c yard, choice, yard.....5c

9c—One lot lawns, pretty designs, worth about twice what we ask, yard.....9c

Also a few pieces of ratine, splendid for quilts....14c

29c—Marquissettes, voile and fancy silk stripe novelties, sold at 50c, 65c, 75c and up to \$1.50, choice....29c

Carter-Houston's

"GOODS THAT SPEAK FOR THEMSELVES"

Food Service in War Time

(By Miss Cornelia Simpson, Demonstrator Home Economics, Extension Service, A. and M. College.)

How to Save Fruits and Vegetables.

Glass jars are higher in price than ever and tin cans are scarce and high; but housewives must save all of the food possible for use next winter.

Dry fruits and vegetables in the sun or in one of the inexpensive cook-stove evaporators, which you can buy or make at home. Bottle fruit and vegetable juices in commercial bottles or in any bottle, you may have. Sealing wax and corks are often successfully used. Can foods in the cans and jars already on hand and in as many more as you can obtain at reasonable prices.

Many persons are today interested in knowing how to use such grains as ferulita, milo maize, kafir corn and Egyptian wheat, after they are ground into meal or flour, in making nutritious and palatable breads and cakes. Milk products, poultry products, and certain vegetable foods like cottonseed flour, dried beans (also soy beans), dried peas, and peanuts are rich in body-building material and may be used to great advantage instead of fresh meat, which we all know is steadily rising in price. Food experts are working with these special products to determine how they may be used by housewives in the family dietary. The foods mentioned may help us to lower the high cost of living, especially during the present crisis. We may be forced to resort to them before this war is over.

The United States Department of Agriculture and the State institutions in Texas are offering free instructions by demonstrations and by bulletins to those who wish to prepare now to ward off the "hungry wolf."

Following are a few recipes for conserving wholesome foods. These and many others will be demonstrated by the trained workers in the U. S. Army for Food Service:

Sour Kraut.

Kraut is not only popular, but it is a very wholesome food when properly made, cured and stored.

Scald crockery jar, cement tank, wooden keg or barrel to be used for curing vat.

Shred firm, hard head cabbage with kraut cutter, or long knife. Do not chop. Remove outside leaves and split cores.

Place shredded cabbage in layers from two to three inches deep. Sprinkle lightly with salt, using about two and one-half pounds best dairy salt to each 100 pounds of cabbage.

Scald stone or wooden cover, which is fitted to inside of vessel, and place on cabbage. Weight down with heavy weight of rocks or concrete block. Do not use metal. The liquid will rise above cabbage. Leave to ripen until the proper flavor develops. This takes from ten days to two weeks in warm weather, longer in cool weather.

As soon as "cured" store in cool place or can by packing in No. 3 or No. 10 tin cans, or in glass jars and cooking (in jars) three hours for quart sizes, if hot water bath is use. A steam pressure cooker is best for this.

Note: The Houston Chamber of Commerce has arranged to store bulk kraut for Harris County farmers until cool weather.

To Can Greens.

Turnip greens, mustard, spinach, or any cultivated or wild greens may be canned for winter use.

Use only fresh, tender greens. Wash and blanch (heat in small amount of water until they shrink); usually 20 minutes is sufficient to reduce them in bulk. Steaming them is better. A wire basket, set in a large kettle which has just enough water to furnish steam, makes a good steamer, if covered. Small turnips may be blanched and canned with greens.

Season greens with salt (1 teaspoon to each quart) and with pepper and fat meat or bacon drippings if liked.

Pack into jars or tin cans and process (cook). No. 2 tin cans should be processed in steam pressure canner 45 minutes at eight pounds pressure. In hot-water bath cook cans or jars three to five hours continuously, or one hour each day for three days.

Bottled Juices.

Fruit and tomato pulps and vegetable juices may be bottled down until thick and rich, then flavored and poured into sterilized bottles. Sweetened fruit and berry juices may also be reduced and bottled. When filled, these bottles should be placed in cold water on a piece of wire screening or board to prevent breaking, and boiled twenty minutes (time from boiling point). New corks which have been soaked in boiling water should be pressed into the bottles and held down by standing bottles upside down or by placing a heavy board on several bottles. When bottles are cold, trim corks, if necessary, and cover with sealing wax or paraffin. Store in a dark place or wrap bottles in brown paper to prevent fading of juice.

Verjuice, an old-time condiment, was the extracted and seasoned juice of

green apples, crab apples or any unripe fruit, bottled for use on meats, fish or game. Lemons were once scarce and may be so again.

Shrub, made from berry juices, sweetened and flavored with a small quantity of cider vinegar, was bottled and used by our grandmothers as we serve grape juice today.

Bottles with metal caps may be bought for home use. Hand machines for sealing them may be had at moderate expense.

Note: Vegetable juice may be seasoned with salt and pepper and various herbs.

Dried Raw Okra and Shredded Vegetables.

Cut tender okra in about three-fourths-inch cross sections and spread on boards to dry. Placing several pods parallel and using a long knife facilitates the work. Move about with the hand once or twice during drying. When apparently dry, put into thin cloth bags (flour sack will do) and place in open air frequently until late summer, when it may be closed up in tins or tight boxes.

Drying under screening keeps flies, etc., away and later results in an absence of worms, etc., in the dried okra. Heating in a warm oven (about 130 degrees F.) for thirty minutes, cooling and packing into coffee cans, etc., further insures against insects.

Sweet potatoes, field pumpkins and carrots may be shredded and dried raw. Pumpkins and sweet potatoes may be used for pies after being soaked for hours; the carrots will do for soups.

Any wholesome scraps of vegetables left from canning, pickling or drying (in uniform sizes) may be run through a coarse food chopper and dried quickly in a warm oven or evaporator. This method retains the coloring matter in vegetables and fruits. Various combinations of vegetables suitable for soup may be ground together and dried.

Examples:

- | | |
|------------|---------|
| Onion | Cabbage |
| Okra | Tomato |
| Celery top | Onion |
| | Parsley |

- | | |
|-------------|--------------|
| Onion | English peas |
| Parsley | Celery |
| Carrot | Carrot |
| Green beans | Red pepper |

A thrifty woman will catch the vegetable juices dripping from the food chopper and reduce them in a shallow

enamel or earthen vessel for bottling as grape juice is put up. Salt, pepper, and suitable herbs may be added to this juice. Clean medicine bottles, new corks and sealing wax can be used to bottle these juices.

Use these bottled vegetable extracts in hash, gravies, meat sauces or soups. Note: For detailed instructions for bottling see recipe for "Bottled Juices" in another column.

Bean Sew With Dumplings.

(By School of Domestic Economy, University of Texas.)

- 1 quart beans.
 - ½ cup milk.
 - 1 pint flour.
 - ½ cup chopped celery.
 - 1 large onion.
 - 1 carrot.
 - 1 teaspoon salt.
 - 2 teaspoons baking powder.
 - Few grains pepper.
- Soak beans over night. Drain and heat in fresh water to boiling point. Add the onion, carrots, celery and pepper. Cook until the beans are tender. Add salt. Make dumplings of the flour, baking powder and milk. Drop these dumplings by spoonfuls over the beans; cover the kettle. Boil ten minutes without lifting the lid. Serve at once.

Mock Turkey.

(By School of Domestic Economy, University of Texas.)

- 1 pint cotton seed flour.
 - 1 pint pecans, peanuts or black walnuts.
 - 1 pint boiled rice.
 - 6 hard-cooked eggs.
 - 3 raw eggs.
 - 1 teaspoon grated onion.
 - 1 teaspoon salt.
 - Few grains pepper.
 - 1 pint water.
- Cook cotton seed flour in water for a few minutes, add hard-cooked eggs, chopped. Remove from fire, add nuts and rice, raw eggs slightly beaten. Shave to represent turkey, if desired, or bake in loaf. Time to bake, one hour. Serve with cranberry sauce.

Jambolaya.

(By School of Domestic Economy, University of Texas.)

- 1 cup kidney beans.
- ½ cup peanuts.
- ½ cup pecan meats.
- ½ pound rice.
- 3 chili peppes.
- 2 teaspoons butter.
- 2 cups tomatoes.

½ teaspoon curry powder.
1 teaspoon salt.
Cook beans; melt butter in sauce pan; add chili peppers, pecan meats, chopped; curry powder, salt, tomatoes and peanuts. Heat to boiling point, then add beans. Simmer over hot water for twenty minutes. Serve the cooked rice at end of large platter, with this mixture in center.

Home Drying Fresh Fruits.

Ripe peaches, pears, apples, apricots and quinces may be cut into practical sizes and dried in the open air and sun until they appear dry. Figs, large sweet plums, and cherries should be dried without cutting. When dry, place in thin cloth sacks and lay in the sun or wind until late summer.

Before closing dried fruits or vegetables in cans, jars or tight boxes, place them in a warm (not hot) oven for an hour, then cool and pack.

Paring fruits and removing seeds not only improves the quality of the dried

products, but insures more rapid drying.

Screened porches are excellent drying rooms, since flies and gnats may be kept from the stock. This precaution will result in fruit free from worms, etc.

Test for Dryness: When a handful of dried fruit pressed into a ball springs back and falls apart the moisture content is sufficiently reduced to prevent spoiling. Wiping the slatted trays or wire netting on which the fruit is dried with a cloth dipped in melted lard or tallow, prevents sticking of the fruit.

In wet weather and in the coast country, where there is much moisture, evaporating devices using heat will have to be employed.

Farmers' Bulletins Nos. 291 and 213 describe types of evaporators and give valuable information for indoor drying.

Over-ripe, but sound, peaches, plums, figs and quinces may be pared, freed

from seeds, etc., then mashed with a potato masher or ricer and spread in thin sheets, on boards, patters, glass, etc., and dried in the sun in a warm oven. Store in sheets, small squares or sprinkle lightly with sugar, roll up and slice across in one-fourth-inch pieces. Peach or plum "leather" was an old-fashioned name given this product.

To Save is to Serve

The Women of America May Lend Tremendous Aid In These Turbulent Times

Simply by exercising the woman's prerogative—by acting in her natural capacity as the censor, and sponser, and dispenser of her own household.

By installing in your home the greatest of time-savers and money-savers. By employing the power of electricity as the greatest help of the age.

The woman who cooks, cleans, sews, washes or irons electrically, has her work simplified. Thus she saves time to serve her household as well as a Nation.

"DO IT ELECTRICALLY"—yourself—save time—save effort. Let electric service do your work—more easily, more readily—more economically.

TRY IT! SUBSTITUTE FOR NASTY CALOMEL

Starts Your Liver Without Making Every Druggist in town—your drug-You Sick and Can Not Sallivate.

Every druggist in town—your druggist and everybody's druggist—has noticed a great falling off in the sale of calomel. They all give the same reason—Dodson's Liver Tone is taking its place.

Calomel is dangerous and people know it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist. Dodson's Liver Tone is personally guaranteed by every druggist who sells it. A large bottle costs 50 cents, and if it fails to give easy relief in every case of liver sluggishness and constipation, you have only to ask for your money back.

Dodson's Liver Tone is a pleasant-tasting, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose a day's work! Take Dodson's Liver Tone instead and feel fine, full of vigor and ambition. —Adv

L. A. KERR, Architect. Office at Fulton Lumber Co., Phone 107. House Phone, 423.

Piles Cured in 6 to 14 Days Your druggist will refund money if FAZO OINTMENT fails to cure any case of Itching, Bleeding or Protruding Piles in 6 to 14 days. The first application gives Ease and Rest. 50c.

W. A. TODD, Agent All Kinds of Insurance Office No. 14, First National Bank Building. Phone 129.

CITATION BY PUBLICATION.

THE STATE OF TEXAS, To the Sheriff or Any Constable of Hale County—GREETING: YOU ARE HEREBY COMMANDED that you are summoned, by making publication of this citation in some newspaper published in your county, if there is a newspaper published therein, but if not, then in the nearest county where a newspaper is published, once in each week for four consecutive weeks previous to the return day hereof.

THE HEIRS OF A. M. DAVIS, deceased, to be and appear before the District Court of Hale County, Texas, at the next regular term thereof, to be begun and held at the Court House thereof, in the City of Plainview, on the 6th day of August, 1917, then and there to answer a petition filed in said Court on the 1st day of June, 1917, in a suit numbered on the docket of said Court No. 1543, wherein J. M. Shafer is plaintiff and the heirs of A. M. Davis, deceased, are defendants; Plaintiff's cause of action being a suit in trespass to try title to Lot Number Five (5) in Block Number Forty-Four (44) in the Town of Plainview, Hale County, Texas; plaintiff alleging that A. M. Davis, deceased, is common source of title; and claiming title by and under a tax deed made by R. E. Burch, Sheriff of Hale County, Texas, and dated the 2nd day of October, 1901; and also claiming title by both the Five- and Ten-Years Statute of Limitation; and plaintiff prays that cloud be removed from his title, that he be quieted in his title and that he have judgment for the title, possession and restitution of the said land.

HEREIN FAIL NOT, and have you before the said Court on the first day of the next regular term thereof this writ, with your return endorsed thereon, showing how you have executed the same.

Given under my hand and the seal of said Court at office, in Plainview, Texas, this 1st day of June, 1917.

JO W. WAYLAND, (SEAL) Clerk, District Court, 4t-Frl. Hale County, Texas.

FOR TRADE. Good town property in heart of richest peanut section. Address Box 152, Cross Plains, Texas. 4t.

To Cure a Cold in One Day Take LAXATIVE BROMO Quinine. It stops the Cough and Headache and works off the Cold. Druggists refund money if it fails to cure. B. W. GROVE'S signature on each box. 25c.

NOTICE IN PROBATE.

THE STATE OF TEXAS To the Sheriff or Any Constable of Hale County—Greeting: You are hereby commanded to be published once a week for ten days in a weekly newspaper of general circulation which has been continuously and regularly published for a period of not less than one year in Hale County, Texas: THE STATE OF TEXAS To All Persons Interested in Estate of Daniel Baldwin Gardner: Mrs. M. F. Gardner has filed an application in the County Court of Hale County, on the 5th day of July, 1917, for appointment as guardian of the estate of said Daniel Baldwin Gardner, which application will be heard by said Court on the 3rd day of September, 1917, at the Court House of said County, in Plainview, at which time all persons interested in said estate are required to appear and answer said application, should they desire to do so.

HEREIN FAIL NOT, but have you before said Court, on the first day of the next term thereof, this writ, with your return thereon, showing how you have executed the same.

Witness my hand and official seal, at Plainview, this 5th day of July, 1917.

JO W. WAYLAND, (SEAL) Clerk County Court, 2t-Frl. Hale County, Texas.

Cold Days Require Coal Why is it that some folks always delay their coal buying and the installing of their stoves until the last minute when every member of the family has run the risk of serious cold or pneumonia and until all of the coal and stove dealers are so busy they cannot give the best service? Surely the wise man will not be caught in a blizzard with his coal supply not yet laid in. We have the supply of coal, we have the prompt service, and the prices are lower now than they will be when winter gets here. Isn't it good health insurance, isn't it good business, isn't it the sensible thing to do to place your order now? Just phone us at 162 and we will do the rest. ALLEN & BONNER

With The Home Economics Club

San Antonio, Texas, July 11.
Dearest Club Girls:
I am so happy to be able to write you this club letter. I am getting along nicely and hope to be fully recovered soon.
The time is almost here for our great State meeting. I hope there will be 400 girls attending. Don't fail to bring your own tin cup, plate, knife, fork, and spoon, two towels, and, of course, your toilet articles.
Last week we sent to your club a copy of the Proceedings of the Girls' and Boys' Sessions of the State Farmers' Institute, 1916, just received from the printer. This will help you in getting up your report. I am sure you will think our proceedings of that meeting are good.
Before I can write you again the pauses will have been sent to our delegates. These will be mailed to each delegate to the address furnished by

your president and secretary. Notify each delegate to be on the lookout for her pass.
You may send your exhibits, prepaid, to me at Austin and have them in by July 20. Please label everything very carefully. I hope every club can send a good exhibit. It will be a girls' club and many persons all over the State will be interested and invited to visit it. Let's have a splendid one.
I want to thank every one of my girls who have shown so much sympathy and love for me during my trying experience and confinement to my room after my unfortunate accident. It certainly makes my heart swell with pride and gratitude from having been the recipient of such manifestations of your affection. With love,
Sincerely yours,
MRS. J. L. LANDRUM,
Organizer and Supervisor of Home Economics Clubs, the State Department of Agriculture.

GOVT AGENT AT AMARILLO GIVES DAIRY COW RATIONS.

In this time of scarcity of feed and high-priced grain it is necessary that waste be eliminated and that in the feeding of live stock that the greatest production possible be secured from the minimum amount of feed. Possibly there is a greater waste in the feeding of live stock through the lack of using various feeds in the proper proportions (that is, a balanced ration) than there is in an actual loss in wasted and destroyed feeds. Therefore, we can not be too careful of the way we handle our feeds. For instance, it has been shown that when hogs are fed a ration consisting only of kafkir or milo that about 500 pounds of grain are required to produce 100 pounds of pork, but when tankage or some other protein concentrate is added to the ration 100 pounds of pork can be produced with about 375 pounds of the grain ration. This is equally true, if not more so, in the feeding of dairy cows and every man, from the one who is running a dairy on a commercial scale down to the man who keeps only one cow for family use, should select the feed to be given his cows with great care, so that he may get the largest amount of milk from the least amount of feed.
Several suggested rations for dairy cows are given below that are properly balanced and any one of which should give good results, though it should be remembered that a ration with some succulent feed such as silage is always better than a dry ration. The rations given are not to be taken as exact, but are approximately correct, and should not be varied greatly. Any of the hays from sudan, sorghum, or kafkir fodder may be substituted one for the other, while silage from any of the sorghums may be used interchangeably. There is also very little difference between green and kafkir chops in feeding value. Where good pasture is available the best possible use should be made of it and in such case all silage and a large amount of dry roughness may be dispensed with. When the pasture is good it may not pay to feed cows giving less

than two gallons of milk any grain, and if they are giving more the grain ration should be fed in proportion to the amount of milk given, and if the increased amount of milk does not pay for the grain it should be reduced. Save all grain possible and utilize pasture and roughness to the greatest possible extent.

DIAGNOSIS.

Into a general store of a town in Arkansas there recently came a darkey complaining that a ham which he had purchased there was not good.
"The ham is all right, Zeph," insisted the storekeeper.
"No it ain't boss," insisted the negro. "Dat ham's shore bad!"
"How can that be," continued the storekeeper, "when it was cured only last week?"
The darkey scratched his head reflectively, and finally suggested:
"Den mebbe it's had a relapse."—Holland's.

TEES IS POSTPONED.

Owing to the small attendance, the Chautauqua meeting scheduled for last Wednesday night was postponed. A meeting will be called sometime later, when it is believed that a more representative attendance may be present. The building of a municipal auditorium for Plainview will be discussed at that meeting.

If you have more preserving jars than you can fill, lend them to a neighbor who will make them work for the Nation.

TEUTON CHANCELLOR RESIGNS, IS REPORT.

(Continued from Page One.)

of which are oil paintings of former secretaries of war from the earliest years of the republic's life, will be the scene of the drawing.

The stern visages of departed leaders will look down upon the scene. Mexican War and Civil War and Spanish War secretaries from high on the walls will be silent witnesses of the new drama of life and death.

President Will Attend.

Around the oaken center table will be ranged the leaders of the administration who are steering the course of government in the present time of turmoil. President Wilson, although not taking part in the drawing, is expected to be present when the first number is drawn. His cabinet will also be there. The war department does not intend to leave any loophole for charges of unfairness in the making of the draft and the presence of the congressional committee, direct representatives of the people, is for the purpose of having the men drafted as completely represented as possible.

Begin With Prayer.

The ceremony of the drawing will begin with prayer. Either the chaplain of the Senate or the chief army chaplain will officiate. Then, blindfolded, Secretary Baker or his representative, will draw the first number. The numbers will be in a large receptacle, each enclosed in a glass globe. The numerals themselves will be written in red ink on white paper and carefully rolled up and placed within the black glass capsule. The first drawing will be made for Alabama and the drafting will continue through the alphabetical number of the states; concluding with Wyoming.

Alabama Will Be First.

In the receptacle will be placed globules containing numbers to correspond to the number of registered men in the list containing the greatest number. That is, if there are fifty districts in Alabama and the sixteenth district has the greatest number of registrants, say 500, there will be 500 numbers in the bowl. Alabama, say, is called upon to furnish 50,000 men. On the first drawing to carry out the example, say No. 2 is drawn. That would mean that the man whose card bore the No. 2 in all the fifty districts would be drawn. Suppose No. 500 was drawn. It might be that only one district would have 500

registrants. So only one man would be selected on that draw, while fifty were on the other.

As a globule is drawn by the blindfolded man, he hands it to another official beside him who opens it, draws out the printed slip bearing the number and holding it up so that all around can see reads it aloud. A third official in charge of the registration lists marks off immediately the men drawn.

This process will continue all the way through the states. The bowl will be refilled for each state. It is estimated that the entire draft will be completed within a day.

Notification will immediately be sent and they will make the names public from their own lists. The names also

will be made public here from the duplicate lists in possession of the war department.

The first call to the colors will be for 687,000, but the entire draft will be completed at one time and the 687,000 will be selected from those who were first to be drawn. Others will be held in reserve for later call if needed.

On the basis of 9,500,000 men, it is believed approximately 4,000,000 will be required by the quotas. This would enable the government to secure a force after all physical disqualifications and exemptions of about 1,750,000, ac-

ording to estimates, leaving a million or more men subject to later call after the 687,000 had been sent to training camps.

An important announcement was made today by Provost Marshal General Crowder in respect to exemptions. This is that a drafted man himself need not apply for exemption, but that his employer or a friend may do so for him. The man himself will be questioned orally by the local board, but will not be put into the position of having an exemption claim of his own against his record.

CLEAN COTTON RAGS WANTED AT THIS OFFICE. FIVE CENTS PER POUND.
