Store Open Until 9 P. M. Saturday Evenings

## The Bankers of the **United States**

have watched with great interest the progress of the Guaranty Fund Law in Texas.

How splendidly the plan has justified itself is proven by the fact that since the enactment of this law not a single depositor in a state bank in Texas has ever lost One Cent. As a result of this other states have followed the lead of Oklahoma and have passed similar laws for the benefit of depositors in state banks.

State Banks are the ONLY banks in Texas that operate under this law and every depositor in this bank receives the benefit of this wonderful protection.

Drop in and talk with us about it.

Plainvie High Seniors Enjoy Colonial Party

Saturday night in the Woodman hall the seniors of Plainview high school and a number of their friends participated in a colonial party to commemorate Washington's birthday. About fifty young people attended.

Those attending wore colonial cosumes, and the evening was spent in dancing the stately colonial dances.

Announcement

I wish to announce that I have established a sales and service station for

PT-PARR30

Tractor and for the Tractor and Separatar Line of

Aultman & Taylor

I have selected these machines as being the very best built today. Let me show you official tests in which HART-PARR 30 developed more power than any other tractor of similar size. It is the most accessible, tractor in the world today. It has too many good features to tell in an advertisement. Let me show you.

Two loads of machines have been unloaded and other loads are to follow shortly. Repair parts will be carried right here in Plainview.

I believe I can show you why Aultman & Taylor Separators will get more wheat out of the straw than a'y other.

### MISTLETOE ICE CREAM

Is now being served at the Rexall Store.

## The American Hen and the Mighty Dollar

Poets may sing of the glory of their eagle and artists may paint the beatty of birds of plumage, but the American hen is entitled to a tribute for her industry, usefulness and productivity. In less than 60 days she can equal the total production of all our gold mines. In one year and ten moths she could pay off the interest bearing debt of the United States. She can convert 1 cents worth of feed into 10 cents worth of eggs, and sing and cackle while on the job, while a hogs eats and grunts and every penny spent on him for feed costs as much as you get for the hog when sold. A pound of hens sells for as much as 2 pounds of hog today. 1 cent investment in the hen is more profit than 10 cents for the hog. Why not invest in the hen that sings and cackles anr make

10 families are living on the profits from the hen today to where 1 is living from the hog profits.

One 6 pound hen will buy 100 pounds of maize or kaf fir to day. 100 pounds of feed will keep a hen 2 years and she will pay you 500 to 1000 per cent for her keeping if you give her the right treatment. To start right is half the battle, and there is many good breeds to begin with right here. You will want oo s tart right of course, and to start right and stay right should be your

of Great Russian Military Comnder Most Amazing Romance f the War-His Splendid Generalship Is Recalled.

om March, 1917, till October, 1918, and Duke Nicholas Romanoff, forr commander in chief of the Rusn armies and one of the most brilunt generals of the great war, was prisoner in the town of Yalta in the imea. He is now in Milan with his mily, humbly housed. The story of Big Nick" is one of the most amazg romances of the war, the Pitts-Gazette-Times states.

en the bolsheviki gained control ssia Nicholas was residing at where he had been governor unhe czar and under the Lvoff e. He was summoned to Yalta e bolshevik authorities and obeyed ummons. His brother, his wife, ster-in-law and other members of amily and his suite were impriswith him. Twenty-five bolshevil; rs were detailed to guard the disshed prisoners.

see in the summer of 1918 it was cided by the Yalta soviet to execute the prisoners. The bolshevik guards solutely declined to permit the senice of death to be executed and sent firing squad back to headquarters. aree times thereafter executioners vere sent to kill the prisoners, but in each instance the guard prevented the carrying-out of the sentence.

When the Game to Yalta Nichola declined to permit the Germans to carer the nouse that had been his prison, declaring his utter leathing of all things German. Soon after his the allies took Yalta and Nicholas vas rescued.

All the private fortune of the grand tuke has been lost. His lands have err confiscated. At all of the order of the Grand perney owes much to Grand

Nicholas. He was, in fact, a h upholder of the old Russian absm. But first of all Nicholas was issian. He knew Russia's salvadepended on the vanquishing of, any. He was a leader of conate skill and it is more than probhat only his splendid generalship nted Germany from winning the n the early stages. His retreat e the tremendous attack of Mack and Hindenburg, which resulted ne saving of the Russian armies, one of the most notable chapters he war.

ween the bolshevist Russia of toad the old autocratic Russia for Nicholas fought, practical stuand statesmen find little choice, must be admitted that the auy produced great men, while the communism has found only rels for its leaders. In the ag of justice there should be on for this gigantic Rusin 1914 and 1915 prevented from marching to easy vic-

#### MEXICAN IDEA OF CREATION

Maya-Quiche Scripture Resembles in Marked Degree That Handed Down by Other Peoples.

The true indigenous civilization of Mexico-the Maya-Quiche, so named from its foremost peoples, still numerous and robust-has its authentic scripture in the Quiche tongue, the Popol Vuh, unearthed by Padre Ximenez about 1675, and printed in full, with an interleaved French translation by the Abbe Basseurde Bourbourg in 1865, according to an article by Charles Johnston, in the Atlantic monthly.

The scripture's cosmogony begins with universal night-what the Sanskrit scriptures call the night of Brahma-when darkness was upon the waters. Then follows the development of worlds, first formed like thin cloud-wreaths in the abyss, and gradually hardening into hills and plains, under the formative will of "the Creator, the Moulter, Heart of the Heavens, Heart of the Earth." Then beasts and birds are formed. But, although they have voices, they have no articulate speech; they can not invoke their Creator, or call upon the Heart of Heavens in prayer.

Therefore the Divine Powers set themselves to make man, who can pray and praise the Creator, so the Divine Powers may receive adoration from their bandiwork. Two races are made only to fail; men formed of wet clay, who melt and dissolve, and the manikins, whose hearts are hard and who can not worship. At last a race, intelligent, reverent, full of a penetrating wisdom that sees all things in the heavens as well as on earth, is brought into being. This perfect race renders praise and glory to the Creator.

### SPEED OF EPIDEMIC VARIES

Diseases Travel According to the Modes of Transportation in the Regions Afflicted.

The speed at which an epidemicwhether it be of influenza or any other infectious disease-spreads depends upon the rapidity of the usual means of transportation. In his presidential address at the congress of prices drop off, few opals are mined. American Physicians and Surgeons, Dr. Simon Flexner said:

"In eastern Russia and Turkestan caravan, in Europe and America with the world at large with the rapidity of an ocean liner; and if one project forward the outcome of the means of intercommunication of the near future | up. we may predict that the next panould one arise, will extend with the swiftness of the airship. Moreover, not only is this rate of spread determined by the nature of the transportation facilities of the reglon or the era, but towns and villages, mainland and island, are invaded early or late or preserved entirely from attack according as they approach or are protected by inacces. backed with their own genuine matrix. way through! - Philadelphia Public lie within or without the avenues of sibility, as in instances of remote The better class of Mexican opals is mountain settlements and of islands distant from the ocean lanes or frozen in during winter periods."

Tin.

Tin is a mineral the same as fron which is the direct result of and lead. It is not made in the sense ment's efforts to stimulate that brass is made of other metals. tg of wheat, is described by The principal countries that supply tin are the East Indies, the islands of arm is devoted entirely to Banca, Billiton and Sumatra, the nd if it produces somewhere Malay peninsula, Australia, Bolivia he country's average of twen- and Cornwall, England, Most of the bushels per acre, which is ore from the East Indies and the y certain, it will add approxi- Malay peninsula is obtained by wash-650,000 bushels to the 1919 ing alluvial graveis. There are also mines in Saxony, Bohemia, Russia, me work is being done with | Spain, Portugal and Japan, but the toast fall when the first tal output of these countries is insigas broken, there were fifty nificant. Islanders Pay No Taxes.

Those who have read "Westward Ho!" remember Lundy island, which lies in the English channel. It is one of the best known of the many island "monarchies" that surround Great Britain. It is a delightful little jewel that was once the haunt of pirates aker, went to her door the and smugglers. It was once captured by French pirates, and later fell into the hands of Turkish privateers. adianapolis News. The ber- While the island may not be the real paradise of man, it is actually owned by the Heaven family. A clergyman by that name rules over a kingdom of 1,200 acres and fewer than 500 souls. No one can dwell on this island without the consent of the parging a rather exorbitant owner. It is declared, in the deed from the Critish crown, to be forever free sight) in a high degree. The be-

Ostend Manifesto.

On the eighteenth of October in 1854, the Ostend manifesto was drawn up. The slavery leaders in the United ticles in their paws and held them States were in favor of annexing the island of Cuba. In President Polk's administration \$100,000,000 was offered Spain as a purchase price, but refused. President Pierce sent Buchanan. United States minister at London, to Ostend to confer on the question with Mason, minister to Paris and Soule, minister at Madrid, The manifesto of Ostend was the result. This extraordinary document down. declared that the Union could not be secure unless Cuba was annexed, and very correct English." that Cuba, if not annexed, would become Africanized and "endanger" the a floorwalker to interpret for her, roads are suitable for heavy motor

#### CITY HAS VARIED HISTORY

Trau, Situated on Small Island the Adriatic Sea, Is Place of Unusual Interest.

Trau is a little city, on a little island, in the Adriatic sea. Trau is the Greek name for watermelon, which is the shape of the island, but the people claim that the name is a derivation of Traghilon, whence the Greeks came to Trau in 380 B. C. Many fascinating fictions are fixed beliefs in the minds of the natives of the island. They believe a cypress bush was miraculously planted to sheiter a statue of the city's patron eat, and all the time. We used to feel saint, Giovanni Orsini, and that the same saint's spirit nourishes it. They also bel'eve that the book which the Lion of St. Mark holds was snapped shut when Venice relinquished the island, rather than that the statue was carved that way. The town has less than 20,000 population and fairly breathes a medieval spirit. The houses are built so close together that vehicle traffic is almost impossible, and the ples were more than we could use up streets are so crooked that pedestrians find difficulty getting around, This was because of military necessity at the time the artistic little city was created.

The father of the Dalmation history. Giovanni Lucio, was born there. King Bela IV fled there after the Tartars overrun his country, but continued to Kraglievae when the intrenched city was beseiged, although it did not fall. Byzantines, Huns, Franks, Genocse and Venetians fought for Trau, the Saracens looted it, Napoleon took it in 1806, and the Austrians gained it seven years later.

#### MEXICAN OPALS IN DEMAND

Even With Primitive Methods. Our Southern Neighbors Dig Beautiful Stones From Their Mines.

The Queretaro district is the chie! source of supply of Mexican opals. A.l the mines are owned by Mexicans. No foreign capital is invested. Old-fashioned methods of mining are employed and activity is desultory. If prices are good, work becomes feverish. If

Most of the best quality stones go to Mexico City. Dealers there market them in other countries. The poorer influenza spreads with the pace of a grades are sold in little shops throughout Mexico or are peddled to tourists the speed of an express train, and in at railway stations. Thousands of these \*cheap opals are sold in towns along the border in the United States. They can be bought for from 30 cents

> It is this cheap grade of stones that e given Mexican opais a poor reputation among jewelry buyers. The act is, a fine Mexican opal is a beautiful gem. It differs from Australian opals in that the latter are usually opaque to transmit light, whereas Maxican opals are usually clear. To bring out the soft play of colors in a Mexican stone, artificial backs are often used in setting the gems. Many are not so expensive as the Australian or those imported from the famous mines of Australia, but they are far from cheap.

Superstitious Londoners. In London there is said to be a deep-seated belief among East end she was born at Carlisle, Pa., on Ocgirls in the efficacy of dragon's blood tober 13, 1744. Her biographers difas a love-philtre. Touching on the fer somewhat as to details, but she is same subject, a Whitechapel herbalist described as a sturdy, red-faced Irish relates how a girl, after buying some woman who during the battle of Mona bunch of tormentil and burn it at his wife seized the rammer and took midnight on a Friday. The faithless his place, which she filled with skill one would then revert to his al- and courage. Molly was presented to of the root, when either the charm geent. Exactly how she came to be reased her purchases. Mandrake, too, doubt. is largely purchased by superstitious cockneys. Every Sunday at a pitch by Petticoat lane a hawker does a profitable trade in slices of mandrake, which, he assures his audience, will cure everything. On his barrow are a few roots carefully selected for their resemblance to the human form, "Gathered at midnight," he shouts, "and they screamed terrible when pulled out of the ground."

Apes Have Poor Sight.

"Apes are frequently short-sighted and require spectacles as much as human beings do." This is a statement of Prof. Behr. of Kiel.

The professor placed 25 monkeys in a darkened room and after a careful eye inspection found that 18 of the animals suffered from myopia (short all, broken by a return to England. havior of these monkeys was entirely similar to that of shortsighted human combe, Berkshire county. beings in a similar environment.

They approached objects lying on the ground with bowed head and bent back and finally they grasped the arclose to the eyes to obtain a better

### CREATED DEMAND FOR APPLES

How the Distribution of Free Samples Won Big Trade for Wise Growers of Fruit.

Have you ever noticed when you drive into town with a load of apples to peddle about, or dispose of to grocers, what a hungry look that man standing upon the street nearby gives you as you pull up to the curb, and especially if you have extra fine fruits displayed in nice crates? We did, and we took a valuable lesson from the hungry look. The whole world is hungry for good apples to sorry when we shied glances at him with the hungry look, but our apples were all weighed up in measures ready to deliver, and we must not start in handing out, or we would run short. We caught a trick one day when packing in our orchard for the market. Quite a few specimens were always found with little defects, overripe or bruised just a little. These apat home, and often went to waste. Next day when we took our load of apples to town, a half-bushel basket of these specimens, mellowed for ready eating, went under the seat, and everywhere we met that hungry look with a ripe apple.

And it worked better than we had suspected, for the next time we went to town with apples that hungry look met us with an order for some of our apples. Then it went still further. The grocers where we delivered apples did not find out, and we did not tell them either, that we were handing out ripe samples. It increased their trade and thereby increased the demand for more of our apples .-George Welmar Brown in Farm and

Philadelphia Newspaper Writer Voices Use of Ammonia to Be Avoided in Objection to Some Common Varieties of the Handshake.

How do you shake hands? I heard a man express himself very forcibly on the subject the other day. there's anything drives me wild," he said, "it's to have a woman lay her hand in mine as though it were a drink of milk and water, or a soggy pancake. If she doesn't want to shake hands, then she ought to just plain refuse. But if she does want to, why then, let her do it as though she means it."

Shaking hands is just like everything else. You can do it with your heart in the right place, or you can go through the ceremony as if your heart

The woman who puts her hand out as though it were half a yard of handkerchlef linen is the same woman who will yawn in your face when you take her to the movies, or who will tell you none in her family cares for automobile riding, when you have taken her out in the country in your car for the afternoon. Half-heartedness, all the Ledger.

"Molly Pitcher."

Molly Pitcher was the first waman military officer in America. It is said she served eight years and was retired as an officer on half pay. Her correct name was Molly McGuire and ormentil root of his, volunteered the mouth was engaged in carrying water aformation that, having been jilted to the soldiers, and when her husband, by her young man, she consulted a a cannoneer, was so badly wounded 'wise woman," who told her to get that he could no longer serve his gun egiance. On three successive Satur- General Washington, who conferred lays she returned for fresh supplies upon her the commission of a serworked or she grew tired of it, as she called Molly Pitcher seems to be in

William Penn.

In 1644 on Oct. 14 William Penn, founder of Pennsylvania, was born in London. He was the son of Admiral Sir William Penn. At the age of thirty-eight he came to America and settled in Philadelphia. He was a Ouaker and his humanitarian and peaceful policies were strikingly shown in his dealings with the Indians. Of all the white settlers, Penn was the only one with whom they kept faith. The Indians trusted him completely and no treaty made with them by Penn was ever broken. The Indians, it is said, never attacked one of Penn's Quaker followers. William Penn spent but a short time in America, a trifle more than four years in In 1701 he returned to England, where be remained until his death at Rus-

Mineral Wealth of Persia.

Persia bids fair to become one of the richest mining countries in the world, according to the London Times, which says its mineral wealth is almost inestimable, but as yet scarcely touched. In addition to oil fields already tapped, there are others awaiting exploitation. There is much gold, lead, silver, copper and coal.

The difficulty hitherto has been with transportation, it being necessary to \*The professor seems a trifle cast carry ore several hundred miles over the mountains on the back of camels uses or mules, which ate up the profit. A very good start has, however, been made on building railroads and, as the United States. The advent of the Thought the professor was some kind traffic, it ought to be easy to install Civil war ended the controversy.

### JAP GAMES HAVE PURPOSE

Children's Pastimes in That Country Are Played With the Idea of Strengthening Character.

For centuries before America was discovered, Japanese children were playing games upon which our boys and girls considered they have a monopoly, and which are regarded as strictly modern. As a matter of fact, most of our pastimes and games have For County Judge: come to us from foreign lands, though they have been modified to suit our needs, and perhaps renamed.

"Pussy wants a corner" and "blindman's buff" are as old as Japan itself. As played across seas, however, these games are far superior to ours. Puss, for instance, is represented as an "Oni," or devil, the corners of the room the four safe harbors of truth with certain shelter from all harm.

In "blind-man's buff," the children wear queer little costumes made of For County Treasurer; blue and white cotton crepe, with painted eyes and queer stuffed beaks For Commissioner Precinct No. 1: resembling birds', for noses. They look like weird little gnomes rather than children, as they dash about in a frantic endeavor to catch their victims. A ghostly game particularly en-

joyed by heroic boys requires the same costumes. Some of them plant flags in different parts of the cemetery during the day, under a lonely tree or by a hill, alleged to be haunted. At night they meet for their game of "soul examination," telling stories about ghosts, goblins and on!. At the conclusion of each tale when their imaginations are so wrought up that they are in terror, they go up the hill one at a time and bring back the flags planted there, until all are brought in. Thus do they discourage fear and foster courage, the trait of character that they most covet.

### PLEADS FOR CONCIAL GRASP TO ALLAY PAIN OF STINGS

the Case of an Attack by an Irate Wasp.

Ammonia promptly applied when & bee stings you prevents serious con sequences and allays pain. It has gen erally been supposed that this was true also of wasp stings; but Edward R. Speyer, an Oxford university spe cialist, points out in a letter to the London Times that the application of ammonia or any other alkali to a wasp sting makes it worse.

The reason is that the polson of a bee's sting is acid; that of a wasp's sting is alkaline. Hence alkalles, like ammonia, neutralize the acid of the bee's sting, but aggravate the toxic

effects of the wasp's alkaline sting. The best thing to apply to a wasp's sting is vinegar, being the nearest acid in domestic service. Onion juice. for lemon fuice, or any other handy acid

will do as well. The Lancet says these facts ought to be widely known, "for not uncommonly the sting proves to be not a simple puncture but the beginning of a toxic process sometimes fatal. A wasp sting on the moist mucosa, as in the mouth, invariably leads to ser ous inflammation, with most distress ing results. If the simple gargling or washing of the attacked spot with an Upstairs over Shiflett Grocery Store acid fluid in such a case keeps down the swelling lives may well be saved."

Whale's Breathing Apparatus.

An em'nent naturalist says concerning the breathing apparatus of the whale: "The windpipe does not com- 4 lbs. Coffee for municate with the mouth; a hole is, as 9 lbs.
