NUMBER 213

DATE IS SET FOR **HEARING APPEAL**

Injunction Restraining Construction Pipe Line to United States Gypsum Co. To be Heard Oct. 27

ASSEMBLING GANG OF WORKMEN

Construction Will be Rushed as Soon As Water Available-Harry Cress Named Mayor "Injunction City"

The Civil Court of Appeals at Fort Worth has set October 27 as the date for a hearing on the injunction proceedings which prevented the city offi cials from constructing a pipe line to sum Co., according to word received here by Judge H. R. Bond ed with City Attorney A. B. Yantis.

A decision in the case is not expected for several weeks and possibly months after the hearing, according to members of the legal fraternity.

The permission granted by Judge the original injunction has not as yet been taken advantage of. While it may be filed at any time, a hearing is not expected on the amendment until who was killed Saturday night. after the higher court shall have passcity limits.

Briefly the injunction consisted of ing 75 pounds. two principal features: the one prohibiting use of waterworks revenues lope containing the "hand of death," for other than waterworks purposes the ace, duece and trey of diamonds and interest and sinking fund on and the five of spades. In the other totaling 20,000 have been offered for waeterworks bonds, and prohibition of hand was an empty envelope in which his arrest. extension of mains outside the city limits. It may be sustained in whole or part by the higher court. If it is killed. sustained ,the purpose of the proposed amendment would be to make it still more restrictive. If it is not sustained with reference to the selling of water outside the corporation limits, then the status of the amendment proposed becomes rather doubtful.

The wri of injunction which is now follows:

Text of Injunction

1. From using any revenue derived plant owned by the city of Sweetter so that the same shall be ap propriated and used only for the payment of operating expenses, for maintenance, interest and depreciation account, for replacement and betterment providing for a sinking fund for the outstanding bonds created and assumed for the purpose of the purchase, con struction and improvement of said waterworks plant, together with at ings to be applied to an emergency fund for the sole was fund for the sole use and benefit of said utility plant,

2. For making any contract to erect construct or maintain any pipe line imanating from within and extending out of and beyond the city limits to any plant or citizen not a tax paying citizen of the city of Sweetwater and not residing within the limits of Sweet water and.

3. From making any contract to issue any warrants or pledging any of the revenues of said waterworks for showed changes in the retail cost of the payment of any pipe lines or con- food in 20 of the 51 cities included in struction thereof outside of the limits the Bureau's report of the city of Sweetwater for the purpose of furnishing water to any purchaser thereof.

and so ordered that this decree shall the present. not prohibit or prevent the city of Sweetwater from making or carrying any one else water in such quantity chundra of Bombay, India. and under such terms and on such con ditions as may appear for the best interest of such city and to permit the United States Gypsum Co. or any other purchaser of water to connect day in regular session at the Court lected and sworn in this morning in Duffey just before the evening sercity at and within such city limits up matters of routine were completed. on terms and conditions that may be prescribed by the city.

popular subscription and contract let relatives, for the building of the pipe line to the United States Gypsum Co. plant which constructing. This work is proceedcarloads of pipe already in the city fore the hearing at Fort Worth, In anticipation of getting water soon

LOUISVILLE, Ky., Oct. 8 .- A wo Entire Population of United States man's love was responsible for the slaying of three guards and three convicts in the fighting at Eddyville prison, according to a confession by Mrs. RADIO STATION TO BROADCAST Lillian Walters, 21, made public by police here today.

She is the wife of Monte Walters, one of the three convicts who for four days held the mess hall against half a hundred guards and militia.

"Monte and I were alone in plotting

Part of World's Series Will be Fought On World's Greatest Playground, Yankee Stadium

By Associated Press. NEW YORK, Oct. 8 -- Part of the

world's series that begin Oct. 10. will be played in baseball's greatest playground, Yankee Stadium, the first wonder of the baseball world, built on the Bronx side of the Harlem River by the NUew York American League club at an estimated cost of more than

About ten acres of ground, purchased from the esate of William Waldorf Astor by Colonels T. L. Huston and Jacob Ruppert, then joint owners of the Yankees, were utilized in providing the great stadium. It was said that that ground cost \$600,000. Some of the land was filled in, the filling in process at various places serving to keep out the waters of the Harlem, which in years gone by ebbed and flowed over it.

The leveling of the field was completed in 1921 and the construction of the triple deck stand started in the Spring of 1922. Sod was hauled from Long Island for the top-cover of the diamond and dirt suitable for the under-layers transported from distant

The triple-deck stand, a novelty in baseball, includes a mezzanine floor. Wide seats, with ample aisle room assure fans a good view of the playing field from every angle. The extreme length and width of the plot is 700 feet, and the area of the playing field 160,0000 square feet.

The seating capacity of the stadium is 62.500, but there is room for many more thousands to stand. The record paid attendance during the past season was recorded on September 16 when 60,331 fans went through the

And Canada Are Urged to Concentrate on Problem

Message of G. B. Muldaur of Underwriter's Laboratories to be Transmitted to Public Tonight

Associated Press.

NEW YORK, Oct 8 .- "Fire prevention week" throughout the United States and Canada begins today. The entire population of the two countries will be urged to concentrate, during the next six days, upon the problem of decreasing a fire loss which last year resulted in the death of 15,000 persons and the destruction of more than \$520,000,000 worth of property.

It is estimated, according to the Underwriters Laboratories, that between 75 and 85 per cent of this enormous waste is preventable by ordinary care, and it is a fact that the waste, in spite of efforts to prevent it, is increasing rather than decreasing year after year. The per capita loss in the United States is approximately \$5.00. The per capita loss in Holland is 11 cents. The nearest approach to the huge per capita in America is approximately 75 cents in England and France.

In order to reach the largest possible number of people with an appeal to prevent fires, advantage is being taken of radio transmission. George B. Muldaur, general agent of the Underwriters Laboratories, has prepared an address which is to be broadcast tonight from 16 different radio stations in this country and Canada. The estimate of the number of people who will hear this message thru the air runs as high as 10,000,006. The address reads in part as follows:

"The time to put out a fire is before it starts; in other words, prevention. While the use of improper build ing material is doubtless the cause of makes headway with unexpected rap fire loss, it is certainly true that bad housekeeping, both in the home and industrial establishments permits the starting of an enormous number of fires which could never take place if were observed.

"How much do you know about the fire hazards existing in your own home? One of the most dangerous things in a house is the common match, because it is apt to be left care lessly about, within the reach of children or where it may be dropped and stepped upon. Matches carelessly thrown away after lighting, are alone accountable for many millions of dol-. lars of fire loss. An electric iron is . a most useful implement, but if left alone with the current turned on will almost invariably cause a fire. The same is true of many other electrical devices, excellent in themselves, but a menace when improperly used. Greasy cloths, if thrown together and left for any length of time, will ignite spontaneously. Nothing is more dangerous than to throw such rags and other rubbish into a closet or wooden receptacle. All cleaning cloths and fluids should be kept by themselves High _____ 27.44 27.13 away from combustible materials. HONORS

It is fitting that the citizenship of this town arrange to turn out en masse to welcome the American Legionaires night at 10:30 and change over to the Santa Fe enroute to the San Francisco Convention. And any difficulty that might be experienced in getting a crowd out at that hour when most folks are thinking seriously of hitting the hay will be more than over come by the lure of the famed Old Gray Mare Band, which has promised selections. The fame of this band is rapidly extending beyond the confines of the Southwest.

MAN NOT SAFE

Four women rivals for a man, and that man dead almost three and a half years. It only goes to prove that : man is not safe from women even when he is dead. This week the . . Campbell chapel in New York had gen eral "clean-up" day, when the ashes of 500 men and women were unclaimed. Among these were the ashes of Prince Sarath Kumar Gosha. Four women rushed forward and claimed the ashes-Mrs. Henry Moeller, a singer; Miss Irene Marcellus, an actress; Miss Lucy Love, a writer, and Mrs. Herman Behr, the wife of a wealthy manu faacturer. The reason none of the prince's ashes, according to the under no one except a block relation is entitled to the gruesome remains. So the ashes will stay right where they are until they are buried ignominiousin the same jar. And that's where the four feminine rivals get off!

Chicago Opera companies were grouped in a gala performance. Under the magic of their touch scenes were reand favorite operas. It was the second of a series of benefits arranged for the American Legion in aid of its \$2,500,000 fund for the veteran's moun tain camp in the Adirondacks. The camp and its object is pretty well known. Its value as a rehabilitation center for men who have not claimed government compensation, who left the army, as Dr. Samuel Lloyd, president of the camp, pointed out, "with- given of missing persons suits this out telling of the slight gas attack they went through or of the chronic bronchitis they contracted from influ- water, several days ago. The man enza." There were a lot more things he called attention to, and when a plea was made nearly a thousand dollars was cheerfully contributed by the audi ence, and telephone calls showed that more than \$500 was on its way from men and women who had "listened in" on the radio. They made up the two million people who were, at no cost to themselves, part of the audience that heard the performance

Jim: Say, Boso, I heard you were sick last week.

Boso: Yes, I was, I had the nev disease called the "clothing sickness," Jim: What on earth is that?

Boso: Well, I had a coat on my tongue and my breath came in short pants. Selected.

A combination rat trap and dry-mash feeder is a rather novel addition to the poultry house. The feeder is a long box, 1 ft. high and 1 ft. wide, with a sloped and slatted top, through which the hens put their heads to eat during the day. To box; this was kept open by means of a book during the day, but the hook was released, and a small prop with a string attached to it used at night. The string

Soviet Picture Cars Draw

By sending trains of picture cars into the rural districts, the Russian government is attempting to educate in the principles of communism more than 100,-000,000 people who, heretofore, have shown little or no interest in politics. Painted on the sides of the railroad cars by the nation's most skilled artists, are propaganda and educational designs illustrating the communistic doctrines. In trying to "sell" this form of government to the peasants, the Soviets probably have become the world's largest advertisers.

Fifteen Years Added To Span Of Life in Past Fifty

Figures have been compiled showing that the average length of life for in-habitants of the United States has inreased almost 15 years in the past 53. In 1870, the average was 41 years, while now it is almost 56. By 1960, the span will have reached the biblical threescore

ed away to a distant window so that the oultryman could pull it without entering he poultry house and disturbing the rats. A yank at the string let the cover drop and trapped the rats inside. Then, by beating Interest of Peasants

> n the cover with a stick, the rats were made to run through the hole, down the pipe, and into the bag, where a few blows killed them. As long as the hens ate from the feeder the rats never seemed suspicious.

Sweetwater, Texas

"An Ounce of Prevention Is Worth a Pound of Cure"

This is fire prevention week, and it is the duty of every citizen of Sweetwater to see that all rubbish is cleaned up and disposed of. Many fires in the United States are caused by accumulated rags an dtrash.

The year 1922 recorded the greatest fire waste ever known in the United States with a property loss of \$521,-860,000. The fire loss in this country is \$4.75 per capita while in Europe the loss is approximately 33 cents. Carelessness is responsible for mose fires—carelessness about equipping buildings, providing fire protection and enforcing fire prevention ordinances.

A clean city will have few fires. Attics and cellars should be kept free from combustible accumulations. Don't deposit ashes in wood boxes carelessly, against wooden fences or other combustible materials. Burn ing trash or autumn leaves too near a house or building is dangerous. The careless use of pipes, cigars and cigarettes causes countless fites.

DOUBLY assure yourself of protection. To do this means INSURANCE. Every property owning citizen of Sweetwater should take notice of the preventions of fires, and govern himself accordingly, but he should also protect himself and property from a money loss.

Cover Your Property with Adequate Fire Insurance
