ACTIVITY SHOWN WEST OF CITY

MUCH WORK IN PROGRESS AT NEW FACTORIES AND ALONG CARLINE

GETTING READY AT LAKE

Preparations Under Way For Coming Encampments—Improvements By Water & Light Co.

A panorama of marked activity, extending from Floral Heights all the way to Lake Wichita, is shown by a trip along the carline and through the country between Wichita Falls and the lake. The building operations in Floral Heights, the operations at the new glass factories under construction, the new homes in that vicinity, the activities on the irrigated farms and the improvements at the lake itself, with the betterments being made at the water and light plant furnish a "moving picture" of activity that is both interesting and reassuring.

That locality of the city immediately adjoining Floral Heights on the southeast side of town comprising part of the recent Fairview Heights Addition presents such a scene of busy activity just now as would be hard to find in the entire Panhandle. Almost directly east of the auto factory and west of the street car line, seventeen five and six room houses have already been completed or will be finished within the next few days. Ten of these houses are constructed of brick, and all of them in less than a month will be equipped with every modern convenience which this city affords. The houses are being built by J. A. Kemp and Frank Kell and will be rented chiefly to employees of the automobile and glass factories.

The work of extending the city water mains to the new houses and to the new factories has practically been finished, and when the job has been completed, over a mile and a half of four inch mains and more than a mile and a quarter of new two inch mains will have been placed in the ground. The four inch pipe joins the present Floral Heights main at Avenue M and extends south-east for a distance of several hundred yards running along the west side of the street car tracks until it branches off toward the glass factory. The two inch pipe begins where the four inch branches off, and extends on to the seventeen new houses, where it turns west in the direction of the automobile factory. In all, two and three-fourths miles of new water mains will have been laid as soon as the work has been completed, which will be within the next few days.

Arrangements were recently made to extend the electric light system over practically the same ground as that covered by the extension of the water mains, and a sewer system will be constructed in the near future, so that as soon as the gas mains have been extended to that part of town, nothing will be left lacking there which is possessed by any other part of the city, and vicinity adjacent to and including the new Fairview Heights Addition is fast forging to the front. A large

(Continued on Page Six.)

THREE INDICTMENTS FOR POLITICAL FEUD SHOOTING

By Associated Press. Corpus Christi, Texas, June 13.—The Duval county grand jury yesterday indicted Frank Robinson, a ranchman, Chas. K. Gravis, former sheriff and Dr. E. A. Roberts for the killing of County Clerk E. M. Antonio Anguiano and Candelario Sans, alleged victims of a political feud. Each of the defendants sued out writs of habeas corpus and were released under \$15,000 bond each.

Mexican People Weary of Revolution, Demand Peace

By Associated Press. At General Huerta's headquarters, Santa Rosalia, Mexico, June 13.—Indignant at the devastation of the rebels on their northward retreat, residents of this district have become "tired against the revolutionists" and as a consequence, General Huerta could have thousands of recruits for the making. This section has been stripped of provisions, horses and staples, which the isolated farmer had provided with difficulty. At Conchos, north of there the rebels have just taken thirty-six tons of high grade silver ore, valued at \$20,000 and three tons

Boy Campers will Perform Stunts for Public Tonight

The rain which fell late yesterday evening troubled the Y. M. C. A. campers no more than to keep them in their tents, safe and dry until it was over and it did not interfere with the program for the day.

Indoor baseball, boat races and a kangaroo court were yesterday's features and all proved interesting features. Tonight the big public affair is to be held consisting of a "stunt" by the occupants of each of the tents. This will begin at 7 o'clock and the campers extend an invitation to the general public to attend. The tents will be open for inspection and those who go out will have an opportunity to see what the boys are doing.

Yesterday afternoon G. W. Saam, one of the Fort Worth leaders, was placed on trial before a duly constituted court, for the alleged taking of a boat ride with a young lady. His attorney entered a plea of temporary insanity and the case went over for further hearing.

Boat races were participated in by practically all the campers. G. W. Saam won the leaders' race in good style, sending his skiff across the finish line by a safe margin.

"Camera-hunting" is one of the popular diversions of the campers. It is fully as interesting as hunting with fire-arms and is decidedly less

harmful in its results. It is no mean accomplishment to get a close range picture of a mocking-bird sitting in its nest or to snap a cotton tail rabbit eating his dinner. One of the leaders, in getting a picture of what he thought was an empty nest, accidentally disturbed it and found it contained eggs; everybody in camp felt bad about it.

Within the next day or two the boys will have an opportunity to show their culinary skill. Each will be provided with a portion of uncooked meat and other food, and two matches. Unaided by any cooking utensils he will be required to prepare his own dinner, using only Nature's instruments in cooking it. If he fails, he goes hungry. Cooking which every boy scout must learn.

Tonight's "stunts" promise to be among the most pleasing features of the camp. The occupants of each of the tents are busy today devising some kind of performance to entertain the visitors and there will probably be no lack of amusement. A big camp fire will be burning and in addition to seeing the boys cut up, those who go out will have an opportunity to see and inspect the details of the camp.

SHOWERS FALL HERE AND ADJOINING COUNTIES

Oklahoma Points Also Visited By Rain Wednesday Night—Precipitation Not Heavy.

Light showers fell in this section of the State last night, extending into Oklahoma as far north as Altus. The precipitation here was .18 of an inch. In some other places it is believed to have been heavier and in some others lighter.

Stamford, where dynamite was exploded yesterday morning got two showers one in the afternoon and another last night, so that place was better provided for than any other. The Wichita Falls route has received reports of a good rain at Olney. There the precipitation was heavy enough to be of some benefit to crops. A light rain fell at Newcastle but Archer City reported no rain. Light showers fell along the Northwest corner as far north as Altus.

The Wichita Valley received the following reports: Byers—Good rain from 10 to 10:45 p. m. Peotulla—Light rain from 9:40 to 10:40 p. m. Holliday—Light rain from 9:00 to 9:30 p. m. Dundee—Light rain at 9:15 p. m. Seymour—Good shower—from 8:15 to 8:40 p. m. Bomarton—Light rain from 2:45 to 5:00 p. m. The following reports were received from Fort Worth & Denver points: Chillicothe—Rain, from 6:50 to 7:35 p. m. Tolbert—Good shower from 7:30 to 8:00 p. m. Vernon—Light rain from 7:30 to 8:25 p. m. Henrietta—Light showers before and after midnight. Decatur—Light rain at 12:15 a. m.

THRASHING ON MUSGRAVE FARM SIX MILES NORTH.

Otto Hendricks' outfit is thrashing Henry Musgrave's wheat six miles north of town. Mr. Hendricks has a complete new outfit and is expecting to make some good records for a day's thrashing this season in spite of the fact that the straw is unusually heavy. Mr. Musgrave who was in town this morning reported that one of his neighbors as using five pounds of twine per acre, whereas two pounds is usually all that is required.

IS AGAINST LITERARY TEST FOR IMMIGRANTS

Speaker Before Conference of Charities and Correction Says It is Not Practical.

By Associated Press. Cleveland, Ohio, June 13.—The conclusions of the Federal Immigration Commission as published in its recent report were called into question by Cyrus L. Sulzberger of New York in an address on "Immigration" before the National conference of charities and correction here this evening. Mr. Sulzberger insisted that the commission's conclusions which favor a restriction of foreign immigration based upon a test of the immigrant's ability to read and write were unwarranted because they utterly failed to tally with the evidence which has been presented in the forty-old volumes published and to be published as the result of the commission's investigations. That they do so fall is shown not alone in the summary of the volumes which have been published by the commission, but in the book that has been issued by one of its members, Prof. J. W. Jenks in conjunction with Mr. W. Jett Lauck, expert in charge of the industrial investigations of that commission.

"The only accurate generalization made by the restrictionists on the subject of immigration," said Mr. Sulzberger, "is that the nationality of the immigrants has changed; that whereas in former years the bulk of the immigrants came from northwestern Europe, it has lately been coming from south and eastern Europe. This is obviously true, but it is not true, as is so often asserted, that while the so-called older immigration was desirable the newer is undesirable." Mr. Sulzberger questioned a published statement by Prof. Jenks that among those entering who have been debauched for prostitution or arrested and deported for the same cause, by far the largest number in proportion to the total admitted are the French, next to them are apparently the Hebrews, and quod from the report of the immigration commission for 1910,

ADJOURNED SESSION OF CITY COUNCIL TONIGHT

Payment of Interest On Paying Bonds Due Next Month, May Do Sanitary Work

The city council will meet in adjourned session tonight to receive the report of the city treasurer, check the accounts of city officials and to discuss the proposal for the city to do scavenger work. It is believed that the report of the treasurer will show that the municipal treasury is not in a plethoric condition in view of the fact that a payment of about \$9,000 on the street paving bonds is due next month. The building of sewer extensions recently is one of the costs that has drained the treasury. The sanitary committee tonight will recommend that the city engage in the scavenger business.

DEMOCRATS WAIT ON OPPOSITION

BALTIMORE PROCEEDINGS TO DEPEND LARGELY ON THOSE AT CHICAGO.

BUSY WITH PREPARATION

Informal Sessions of National Committee Expected to Do Much of Preliminary Work.

Baltimore, Md., June 13.—The work of preparation for the National Democratic convention is well under way. Informal meetings of Democratic National committeemen with National Chairman Mack within the next week are expected to outline the plan of convention proceedings that formally will be adopted by the arrangements committee which meets June 20 to select temporary officers of the Democratic convention.

Headquarters for Governor Wilson and Speaker Champ Clark are expected to be opened within a day or so and representatives of both candidates are here.

Baltimore will wait on Chicago. There is little disposition, the leaders declare, to start the political pot boiling until the Republican National convention has thoroughly uncovered its hand.

COTTON SEED DEMAND IS IN EXCESS OF SUPPLY.

Memphis, Tenn., June 13.—That the present yield of cotton seed is not keeping pace with the demand for its products was declared by J. C. Newberry of Gonzales, Texas, president of the National Association of Oil Mill Superintendents, at the session of the annual convention of that organization. Mr. Newberry estimated that the yield of seed from the cotton crop of 1911 totaled 7,500,000 tons. A third of this amount was needed for planting and of the 5,000,000 tons available to the mills, 175,000,000 gallons of oil was produced. Several other speakers discussed technical subjects.

SUFFRAGETTES SMASH WINDOWS IN IRISH CITY

Eight Are Arrested After Inflicting Considerable Damage On Public Building.

By Associated Press. Dublin, June 13.—A campaign of window smashing was begun today by Irish suffragettes who came into vigorous conflict with the authorities. After the women had attacked most of the public buildings, eight of them armed with bags of stones, were arrested.

The women before the police camp had shattered 43 windows in the customs house, the postoffice, the land commission office and the police and military barracks.

MOBILE SUICIDE BLAMES POLICEMAN FOR TROUBLES.

By Associated Press. Mobile, Ala., June 13.—James E. McCormick, at one time possessed of considerable means, committed suicide in a sensational manner last night. He left a note naming Policeman George Arbo for his rash act, and when the policeman heard of the suicide he resigned his position on the force at once. Mrs. McCormick secured the note her husband left and says she lost it. McCormick telephoned a drug store that he wanted acid to kill flies. When the messenger boy brought the bottle he placed it to his lips and drank the contents.

SEVEN ARE ACQUITTED ON CHARGE OF MURDER.

Asheville, N. C., June 13.—After being out all night the jury in the Myrtle Hawkins murder case returned a verdict of not guilty for all seven of the defendants.

The verdict was greeted by a wild demonstration by a crowded courtroom, when the prisoners and some of their friends shouted for joy and leaped to the twelve and embraced. The seven defendants, Dan McCall and daughter, Mrs. Beatrice McCall; her husband, Abner McCall; George Bradley and brother, Boone Bradley, and Mrs. Lizzie Swift and Mrs. Nora Britt, the latter two of Asheville, were adjudged not guilty under the four counts in the bill of indictment, thus leaving the oft-repeated question, "Who killed Myrtle Hawkins?" still unanswered, and the whole mystery intensified.

The girl's body was found in Lake Osceola last September. It was alleged she did under an operation.

Dynamite Brings Rain in Jones County Wednesday

By Associated Press. Anson, Texas, June 13.—Anson received rain yesterday by the dynamite route. Becoming impatient of what seemed to be a continued drought, residents of Anson, Stamford and Hamilton in Jones county became interested in the dynamiting experiments and tried it.

The firing was done about five miles northwest of Anson, beginning at 10 o'clock yesterday morning and lasting until 3 in the afternoon. By the time the last shot was fired, big drops of rain were falling, although they were intermittent as at the beginning of a shower.

The rainfall continued light but clouds piled up in a manner to give hope of a good rain.

Thurber, Texas, June 13.—General Manager M. A. Williams of the Texas Pacific Mercantile & Manufacturing Company of this city made the initial experiment with aerial bombardment with dynamite to produce rain. He has had plans under way for this test for many days, which would be put into execution as soon as weather conditions proved most favorable. About 3,500 pounds of dynamite was used in this experiment, and this amount was equally divided at fifteen stations and shot off in intervals.

About five sticks were used in each explosion. Operations began at 1:30 and a continual bombardment was kept up for four hours. The sky at the beginning had very few visible clouds and these generally disappeared in the middle of the afternoon, but at 7 o'clock a dark heavy cloud hangs in the western horizon and the situation is being closely watched, as interest in the result is at fever heat and adjoining sections are entertaining optimistic views on the situation.

While the test was made merely to demonstrate to this section what could be expected of aerial bombardment for rain and while the success of this experiment means much to West Texas, yet should this initial bombardment fail, General Manager Williams feels that his company is satisfied from the fact that in making the test it has in a way determined what can be depended on in the future. However, should a rain materialize, Manager Williams will continue operations at suitable intervals.

MORGAN'S \$25,000,000 TO HELP BLOCK PANIC

Hitherto Untold Story of 1907 Stringency Is Told At Money Trust Inquiry.

New York, June 13.—Some heretofore unwritten history of how J. P. Morgan helped stem the panic of 1907 by supplying \$25,000,000 at a crucial time was dramatically told on the witness stand Wednesday by R. H. Thomas, president of the Stock Exchange at that time, testifying before the Pujo committee investigating the so-called money trust.

Mr. Thomas said that on the morning of October 24, 1907, 60 per cent was being offered for call money and none was available. He went to James Stillman, then president of the National City Bank, and told him \$25,000,000 was needed. Stillman sent him to Morgan saying he would tell Morgan he was coming.

"When I go to Mr. Morgan's office there was great excitement," said the witness. "Mr. Morgan was in a conference and people were going in and out. The excitement was intense. I waited for him twenty minutes. He came out of his office and said to me: 'We are going to lend you \$25,000,000. Go over to the Stock Exchange and announce it.' I said 'Allow me to make a suggestion, Mr. Morgan.' 'He said, 'Yes, yes; what is it?' 'I think,' I said, 'that this money should be divided up into lots and distributed among the banks. It would have a better effect.' 'Very good suggestion,' said Mr. Morgan, 'Perkins,' he said, and snatched his finger, 'Perkins divide that \$25,000,000 up into small lots.' George W. Perkins was the Perkins referred to.

Mr. Thomas testified that the loan had a very decided effect in relieving panic conditions.

"Then it rested with one man to say whether the panic should go on. Don't you think that's a dangerous condition?" asked Samuel Untermyer, counsel for the committee.

"I couldn't answer that," replied the witness.

There is no clue to the identity of the intruder.

ABANDONMENT OF ARCHER COUNTY LOCATION REPORTED

The Red River Company is reported to have finally abandoned its well near the Miller well in Archer county—as a depth of about 1800 feet. The hole was dry at that depth. A number of sands aggregating 125 feet in thickness were found but all of them were full of water.

CENTENARIAN, VETERAN OF THREE WARS DEAD

By Associated Press. San Angelo, Texas, June 13.—Daniel Patterson Ridgill, aged 107, a veteran of three wars and a pioneer of West Texas, died today near West Grape Creek, not far from here. He fought in the war for Texas independence, the Mexican and Civil wars.

WICHITA FALLS DOES NOT SECURE CHIEF'S CONVENTION

By Associated Press. San Angelo, Texas, June 13.—The Texas Police Chiefs closed their annual convention today, electing Galveston as the next meeting place over Wichita Falls and Temple. H. J. Barron of Waco was elected president.

BRIBERY CHARGE IS AGAIN HEARD

SERIOUS ALLEGATIONS AT CHICAGO—COMMITTEE GIVES FOUR VOTES TO ROOSEVELT.

TRY TO EXCLUDE HENEY

Efforts Made to Keep San Francisco Co. Attorney Out On Charge of His Being a Democrat.

By Associated Press. Chicago, Ill., June 13.—The awarding of Missouri's four delegates at large to Roosevelt and the giving to Taft of ten district delegates from Mississippi are the net results of today's session of the National committee. The decision in the Missouri case was unanimously for the Roosevelt forces.

The districts in Mississippi were the second, fourth, sixth, seventh and eighth, the decision being made by viva voce after roll call had been refused.

Among the features of the morning were the renewal of the charge of bribing delegates and an effort by Committeeman W. S. Sturgess of Arizona to exclude Francis J. Henev of San Francisco from the committee on the ground that the latter was a Democrat.

Mr. Henev had presented a proxy of Thomas Thomson of South Dakota. Mr. Sturgess said the record showed Henev had run for prosecuting attorney on the Democratic ticket in San Francisco.

Mr. Henev denied this, saying he had refused the Democratic nomination, had run on an independent ticket and had been defeated by "the money of Patrick Calhoun." The committee refused to exclude Mr. Henev, laying the motion on the table.

New charges of attempted bribery in the battle for Republican National delegates were made by Senator Dixon, campaign manager for Col. Roosevelt, today. He charged that a member of the Republican National committee had been offered a United States marshalship if he would vote for Taft on the contest now under consideration.

"I am prepared to name the man if necessary," said Senator Dixon, "I sent word to the committee that any federal appointment made in the nature of a bribe for Taft votes would be held up in the Senate." Senator Dixon challenged Taft managers to be specific and give the names of the Roosevelt leader who is reported to have offered a bribe to a delegate in Alabama and the name of the man who received the money.

The contest settled Wednesday in favor of President Taft were: Arizona delegates at large, 6; California Fourth district, 2; Louisiana delegates at large, 6; First, Second, Third, Fifth, Sixth, Seventh districts, 14; Michigan delegates at large, 4; Mississippi delegates at large, 4; First district, 2. Total 40.

Pearl Wight, national committeeman from Louisiana, and the Roosevelt leader there, lost in his fight to seat the Roosevelt delegates from that state. An effort was made by Committeeman Harry S. New to end the long-standing difference among Louisiana Republicans by officially recognizing the Loisel faction, now controlling the State Republican organization there, but Mr. Wight headed off such action.

Governor Chase E. Osborn of Michigan and his Roosevelt delegates at large were uneaten by the decision of the Michigan case for Taft. The contest over the Fourth California district, decided for President Taft, furnished the most bitter fight of the Roosevelt forces; insisted upon recognition for the Roosevelt delegation there.

The national committee had before it when it adjourned last night 122 contested seats still to pass upon.

(Continued on Page 8)

SENSATIONAL SHOOTING FOLLOWED BY \$300 FINE

Stephenville Woman Who Shot Girl Enters Plea of Guilty to Aggravated Assault.

By Associated Press. Stephenville, Texas, June 13.—Mrs. J. K. Reynolds, who sometime ago shot and wounded Miss Mildred Logan, a handsome young woman here, today pleaded guilty to aggravated assault and was fined \$300 and costs. Her plea was by agreement of counsel.

Miss Logan was at the Reynolds' home when the shooting occurred.

COULDN'T FIND STAIRS, 'CAUSE THERE WERE NONE

Intruder Has Good Excuse When Found In One-story House Last Night.

"Blankety blank it anyhow I can't find the stairs!" exclaimed a man who turned on the light in a room occupied by Earnest Katz at the home of Mrs. Harrison on Twelfth avenue between Ninth and Tenth streets last night sometime after midnight. This exclamation was provoked by Mr. Katz who had been awakened when the light was turned on and demanded to know what the intruder wanted. It was certain also that the intruder couldn't find the stairs for there were none in the house. After exclaiming at his inability to locate the stairs the man left the house hurriedly. Lights were also turned on in the room occupied by Mack Taylor at the home of C. W. Bowen next door, but the man evidently didn't see anything he wanted and left without disturbing anything or anybody.

There is no clue to the identity of the intruder.

ABANDONMENT OF ARCHER COUNTY LOCATION REPORTED

The Red River Company is reported to have finally abandoned its well near the Miller well in Archer county—as a depth of about 1800 feet. The hole was dry at that depth. A number of sands aggregating 125 feet in thickness were found but all of them were full of water.

Pipe Line Common Carrier Says Interstate Commission

By Associated Press. Washington, D. C., June 13.—The Interstate Commerce Commission today held that pipe line companies transporting oil between the States are common carriers with obligations as such and ordered thirteen large companies to file rate schedules by September 1 and to comply with the interstate regulations.

The commission holds that the obligations of a common carrier are impressed upon a pipe line engaged in the transportation of oil in interstate commerce even though such pipe line was built over its privately

acquired right of way and transports only its own oil. Among the pipe lines against which the commissions order is directed are the Oklahoma Pipe Company, Prairie Oil and Gas Company and the Standard Company of Louisiana.

ROOSEVELT NOW GETTING WALL STREET'S SUPPORT

Financial Publication Declares That Money Powers Are Throwing Influence To Ex-President

New York, June 13.—The latest edition of the Wall Street Journal publishes the statement that the big banking influences suddenly have turned to the support of Colonel Roosevelt in the fight for the Republican presidential nomination.

Under the heading "Evidence of Wall Street Swinging Toward Roosevelt," the publication gives elaborate details of what it declares to be an actual fact. Its reference to a bank "not far off Broadway in the New York financial district," is supposed to mean the Hanover National Bank, which is controlled by J. P. Morgan, the description of a dark-eyed little banker, a wonderfully capable man of whom the country has heard but little, seems to fit the description of George H. Reynolds, president of the Continental and Commercial National Bank of Chicago. It will be recalled that last February Mr. Reynolds delivered an address at a convention of bankers. In which he declared that there was such a thing in this country as the money power—the term Samuel Untermyer, counsel to the congressional committee now investigating the money trust, prefers to the latter designation—and he (Mr. Reynolds) frankly confessed that he was one of those men in the United States who controlled the money power.

The Wall Street Journal's article is as follows: "Theodore Roosevelt's bitter and most powerful enemies in Wall Street have capitulated. Within the past ten days, following a series of conferences at Oyster Bay between midnight and dawn, the whole complexion of the presidential campaign has changed.

"Not far off Broadway in the New York financial district stands one of the nation's largest banks, controlled by perhaps the wealthiest family in the country. To the management of this bank the mention of the name of Roosevelt at any time during the past four or five years has been a rubbing of salt into an open wound. When at the last state election, New York was handed over bag and umbrella to the Democrats, one of the controlling directors of the bank, in voice a tremble with emotion said 'It was an awful price to pay but it was a case of doing anything to get rid of that rabid heretic for all.'

The management of this same bank has now declared itself in favor of Roosevelt, predicting that he will be nominated and elected.

"The explanation is this: 'We have decided to support Roosevelt, because in spite of all our former hatred of the man's personality, he is the only man in sight who can give the country the four years of tremendous prosperity for which all fundamental conditions are ripe.

"If we are going to have prosperity for the next four years, the railroads of this country must have a moderate increase in rates. There is no market for railroad securities today except at impossible bargains. That is because with the increase in wages and the taxes and with the decrease in rates under government regulation, the investor no longer has the assurance of security of railroad earnings that will make certain even a fair return on his capital. For that reason the investor has turned almost entirely to industrial issues, which yield 6 per cent to 8 per cent. This condition in American investment conditions is momentous. Assurance of security is given to the railroads will be unable in the future to sell their bonds except at prices that mean such profits as the roads may make will be eaten up by interest charges. That would mean that the vast capital requisite for the development of the country in the next ten years will not be invested.

"Theodore Roosevelt is the only man who can convince the people of the United States of the fairness of the demand of the railroads that they be allowed to earn sufficient to prevent the diversion of capital from railroad securities. He sees the position the railroads are in. He appreciates the attitude of capital in its demands for the security of a fair return and he knows that with rates at their present level there will not be invested in the country's transportation systems in the next three or four years the hundreds of millions of dollars necessary to provide adequate increase of facilities.

Robinson's Mineral Water. is highly recommended by physicians, and patrons who have tested its merits, for indigestion, catarrh of the stomach, kidney and bladder trouble. This water stimulates the secretion of the stomach, increases digestion and favors a more complete absorption of the food and prevents the action of germs that cause typhoid and other infectious diseases.

This water can be purchased at the wells or delivered in jugs or cases. This well is located one mile south of Alamo school building in Floral Heights, two deliveries daily morning and afternoon. G. J. Rohatow, Owner. Phone 1691-1 long-4, shorts.

ROLLS FOR LUNCH OR TEA

Recipe Gives Directions for Making Toothsome Variety Known as White Mountain.

White Mountain rolls are used either at luncheon or tea. Sift two quarts of flour, add a teaspoonful of salt and three tablespoonfuls of sugar. Have ready a pint and a half of boiling milk and set it aside to become blood warm. While it is cooling melt half a cupful of butter in it. When it has reached the desired degree of coolness beat the whites of two eggs till stiff, and stir them into it. Then add half a cupful of liquid yeast or half a cake of compressed yeast, dissolved in one-third of a cupful of lukewarm water. Stir the whole into the flour and beat well with a spoon. Then knead for twenty minutes and let the dough rise overnight. In the morning cut the dough into pieces the size of an egg. Form them into long rolls and place them side by side in a shallow cake pan. Let them rise to a little more than double their original size. Then bake them for half an hour in a moderate oven. Owing to the presence of milk and butter in the mixture the rolls will be very brown in fifteen minutes, so that it is well to cover them with brown paper for part of the time they are baking.

FOR KEEPING FOOD WARM

Electrically Heated Tray Is One of the Latest Ideas in Electric Concoctions.

An electrically heated tray for keeping food warm while it is being served is one of the latest ideas in the application of electric heaters. The bottom of the tray is shaped to receive

Food Tray.

lashed and sets upon a pan filled with water kept warm by a coil in its base. The tray allows steam to escape. By connecting the pan and tray to the electric circuit for a few minutes, and thus heating the water, the stored up heat will keep the food warm for some time if not immediately served.—Popular Electricity.

Domestic Specialist.

The doing of one thing over and over makes the specialist in any line. Every housekeeper is aware that when she goes into the kitchen herself, and with her own hands makes delicious bread, cakes and pies, she is all to a nicety what her results will be. She cannot be sure that her ingredients will not be ruined, her inner spoiled and her family peace interrupted by the ill-temper consequent upon indigestion, when she delegates her cooking to a maid. The woman who does her own work sometimes craves our sympathy, relating to us to sun, but woman's work is never done," still, it is she who is independent, whose home is well ordered, whose table is daintily spread, and who never needs to sit down and bewail waste.

Peanut Cookies.

Put a cupful of sugar and two eggs in the mixing bowl and beat them together vigorously three or four minutes. Then add a tablespoonful of softened butter and stir again a few moments. Then add a cupful of nuts, freed of their skins and chopped coarsely; two cupfuls of flour sifted with two teaspoonfuls of baking powder and a few grains of salt and about half a cupful of milk. Mix it into a stiff soft dough and turn out on the oiled pastry board. Flatten it thin and stamp out pieces with a plain blong cutter, arrange them on a greased bake pan and bake them in a moderate oven eight minutes.

A Brush to Clean Coat Collars.

To clean coat collars try the following way: Instead of a cloth, which has to be kept in motion for a long while to avoid leaving a ring in place of a spot, use an old toothbrush. Dip it into naphtha until thoroughly saturated, then a few black rubs and the spot or grime has left for parts unknown. The most delicate velvet can be cleaned in this way, though it would not be advisable to use a brush on any fabric like satin.

Sand Tarts.

To make sand tarts take two eggs covering the white of one, two cups of sugar, one cup of butter or clear lard dripping, and three cups of flour. Mix, heating the egg light, and creaming the shortening and sugar. Roll out thin, spread white of egg on top of each cake out, sprinkle with sugar and cinnamon, and press a blanched almond or a seeded raisin in the center of each. Cook in a quick oven.

Pineapple Pie.

One can pineapple, one cup sugar, two cups water, two eggs, two heaping tablespoonfuls corn starch, a little salt. Makes three large or four small pies.

Harlingen—The tree nurseries located in this city have shipped six car loads of ornamental palms to points in Texas, during May.

We Go to Greater Length

FOR

A Suit to Sell You

AT

\$17 Than Most Dealers Do

And we do it because it pays us and you.....

We might do a whole lot of things to save, or rather, to increase, the profits we make and you would not be one bit the wiser, until you'd worn the clothes, a while. You'd know it then.

We rely upon good makers in the big cities to make the very best clothes, and we buy only the good ones from them. Nameless makes, whose trade marks are never advertised we never consider. And that sort of clothes we offer you. The STYLE-PLUS SUITES WE ARE SHOWING IN BLUE SERGE AT \$17.00 THE SUIT ARE THE BEST VALUE ON EARTH FOR THE PRICE.

GOOD SERVICE—you get in the Crossett Shoes. Lasting leathers and model workmanship. Style in every line. You don't need to "shop around," if you wear Crossetts.

Men's Silk Hosiery, every wanted color, special values at the pair... 25c and 50c
Don't fail to visit our Men's store. Everything for every man at the right price.

Pennington's

IS AGAINST LITERARY TEST FOR IMMIGRANTS

(Continued From Page One)

"that 238 Mexican women were deported or debarred, 96 French, and only 8 Hebrews, the Hebrew falling below the English, Scotch, Irish and German."

By the same sort of statistical tests, the speaker insisted that the southern and eastern European immigrant made a better showing in recent years in America than did the older and so-called more desirable immigrant from northern and northwestern Europe in relation to alcoholism, hospital costs, insanity, average wages, illiteracy, and criminality.

"The congestion of population in cities is one of the results generally attributed to immigration. We see the growth of cities, we see the incoming immigrant, and we connect the two. A closer study of the question will show us that there is no real connection between them. The tendency to urban in preference to rural pursuits is one of the marked developments of modern times, and in the inevitable consequence of the establishment of great industries in cities. Establish a great factory in a small city and the effect is instantly reflected in population. Such a plant, great as it is, would not be immediately noticeable in New York, but the process of attracting population to the site of the plant is precisely the same, whether we observe its operations or not. Deplore as we may the congestion in cities, we must realize that it is related only remotely, if at all, to the matter of immigration, and that any attempt to lessen it by lessening immigration would be certain to increase the domestic migration from farm to factory.

Onion Crop \$1,568,500.

San Antonio, Texas, June 13.—The onion growers of south Texas will realize approximately \$1,568,500 from this season's crop. Upward of ten thousand acres were planted in this product in South Texas this year, producing so far 3,700 carloads and 800 more cars will be shipped before the season ends. These cars will represent 2,250,000 crates, which will sell at an average of \$1.25 per crate, making a gross income of \$2,812,500. The average cost of production will total \$1,250,000, therefore the profit will reach 125 per cent, an average of \$166.25 per acre.

Brenham—The Brenham Gas Co. filed articles of incorporation with the secretary of state; capital stock \$100,000.

SHIRKS ARMY DUTY

German Crown Prince Not Enthusiastic About War.

Kaiser's Heir is Attacked by the Press—Colonel of Famous Regiment—Nearly Always Absent from Military Service.

Berlin, Germany.—The article attacking the crown prince for neglect of military duties, which is attracting great attention, being reproduced in many leading newspapers, appeared originally in Der Tuermer, a monthly review, according to a Berlin dispatch. It was written by Herr Guenther von Viebrogge, a retired officer.

The article observes that up to the time when the Kaiser appointed his heir to the colonelcy of the famous Death's Head Hussars at Danzig last September the crown prince had never done any military service worth mentioning. It was hoped that the command would at last fall to the prince, in whose veins the blood of so many warriors flowed, with genuine enthusiasm for the profession of arms.

"Up to the present, however," continues the article, "the hopes aroused by the transfer to Danzig have remained unfulfilled. The crown prince is absent far too much on leave. Indeed, one might ask when he is at the head of his regiment at all."

"Immediately after his appointment the august young gentleman went traveling for four weeks, principally to hunt. Soon after his return we saw him in Berlin; sometimes in the Reichstag, where he attended the Morocco debates; sometimes at the flying grounds.

"At the beginning of December he spent a week in Silesia hunting, and at the end of December and the beginning of January he was in Berlin again.

"Between the last named leaves he was prostrated by illness, which not only confined him to his room, but to bed over the Christmas holidays. The illness could not have been very grave, otherwise the Berlin newspapers would not so soon have been able to report that he was dedicating himself to winter sports in the Tiergarten.

"At the end of January the crown prince again came to Berlin to participate in the court festivities and those connected with the Kaiser's birthday and christening of his own son. When these were over he betook himself to Switzerland, where in company with his gracious consort he threw himself into the joys of the sleigh and ski with his accustomed zeal.

"That he remained in Switzerland longer than he intended is due to the injury he received at ice hockey."

"On March 6 the Danzig Hussars saw their commander again and were at last able to give the winter ball, which they had postponed on account of the crown prince's many prolonged absences."

GIRL NEIGHS LIKE A HORSE

Inoculated With Serum From Rabid Animal and Has Hydrophobia.

Youngstown, O.—Suffering from hydrophobia, resulting from anti-toxins given in a case of diphtheria, early in the winter, Miss Anna Hughes, a young girl of sixteen years, is in a serious condition at her home at Struthers, O.

For days Miss Hughes has been slowly dying, and required, at times, six people to restrain her. Dr. Spring, the family physician, unable to account for the unusual effort of the serum, had an analysis made and was taken from a horse which had gone "loco."

Miss Hughes has been neighing and displaying her teeth in the same manner as a horse. Her friends and all who know her are deeply grieved at her condition. The only alternative to death seems to be the probable life of a "raving maniac."

17 DOGS FIGHT POLICEMEN

Two St. Louis Officers Have Battle of Their Lives in Cellar Full of Canines.

St. Louis, Mo.—Their uniforms were almost torn from Patrolmen M. J. Coffey and Patrick Dolan when they battled with seventeen dogs in the cellar beneath the home of Mrs. George Thompson at 5008 Columbus avenue.

Two of the dogs were killed by blows from baseball bats which the patrolmen used to protect themselves with.

Later it was found three additional dogs had been injured so severely that they had to be shot.

Mrs. Thompson telephoned the police that all the dogs in the neighborhood had invaded her cellar.

Coffey and Dolan reported to the Mounted District police station that they had engaged in one of the worst fights in their careers.

Woman Refuses Pardon. Valley City, N. D.—Preferring jail to freedom through the payment of a fine by friends, Mrs. Laura M. Allen of this city, author of "The Lost Art," a book on suffrage, for the unlicensed sale of which on the streets she was arrested, says she will serve her sentence of a week in jail. She refused a pardon.

Brownsville.—The first car of watermelons to be shipped this season have been received in this city.

BONHAM HERE TOMORROW SEASON'S FIRST SERIES

Test of Strength Between Two Leaders Will Come at Last—Local Lineup Changes.

For the first time since the Texas-Oklahoma league season opened in April, Bonham and Wichita Falls will meet tomorrow afternoon on the City Park diamond. The fearfully and wonderfully made schedule for the first part of the season failed to put these two leading teams against each other, but they meet tomorrow and it ought to be a sure-thing game.

Bonham is blessed with three left-handed pitchers, but the Drillers have done as well against the southpaws this season as against the right-hand flingers. This is in spite of the fact that there are several left-hand batters on the local line. Haxter will probably work against Durant this afternoon, leaving Jones, Myers and Mullins to do the box work against the Fannin county boys.

"Pop" Clark did not show up yesterday afternoon and is said to have left the city. Nobody seems to know why or whether. It is likely that McMahan of last year's team will take his place.

Ty Cobb Phillips is still out with an injured hand and Chapman joined him on the injured list yesterday. With these two injured and Clark missing, the lineup is shot up some.

The Dallas News apparently does not know that the first half of the season is over, as it was still keeping books on the first half yesterday.

No answer has been received yet to the inquiry about the record of Wichita Falls made on her last road trip, eleven victories and no defeats. There are some who believe this is a new world's record, but definite figures are still lacking.

Score by innings:
Sherman.....210 002 000-5
Ardmore.....002 000 001-3
Batteries—Discher and Townsend; Scott, Wright and Naylor.

Letter to JIM SURIEN

Wichita Falls, Texas

Dear Sir: New Orleans is one of the cities hard on paint; but nevertheless, they paint and oil a good deal there.

A. C. Callier painted two houses last year for F. Hinderer; one lead and oil and the other Devoe. The first is already in bad condition; Devoe is perfect.

M. Augustin, New Orleans, has painted his house Devoe three times in eighteen years, we have no complaint of Devoe and we know of its wearing ten years in several instances. We don't say it wears ten years, you know; there are such instances.

No complaint is enough to say till we have long time experiences; they're coming. Meantime, Devoe is the paint that takes least gallons, makes least bill and wears longest. So much we're sure of.

Yours truly,
F. W. DEVOE & CO.
P. S. E. R. McClendon sells our paint.

GREEN'S SPITTER BEATS LOCALS

DURANT TAKES SECOND GAME OF SERIES FROM THE DRILLERS.

CRIPPLED LINE-UP USED

Several On Absent List For Wichita Falls Team But No Errors Are Made

Hetty Green's pitching against his one-time team-mates gave Durant the second game of the series yesterday, 9 to 6. The locals played with a makeshift lineup, but it was the inability to connect with Hetty's spitters that lost the game.

At the opening of the game, Chapman was catching. White was on second in place of the crippled Phillips and Brown was at short in place of the mysteriously missing Clark. Early in the game, Chapman split his finger and White replaced him, Jones going to second. But in spite of the crippled team, not an error was made by the Drillers.

The locals got to Green in the first and third for five hits, which with one error gave six runs. It was three up and three down in the other seven innings.

Lefty Mullins had an off day and seven runs had been scored off him before he seemed able to control his shoots. He walked the first three men in the second inning and two hits which followed netted three runs. Five hits brought in four runs in the third and there were some scores later in the game. The Durants landed safely thirteen times, including a homer, a triple and two doubles.

The locals started in the first as if to make another runaway game of it. Guthrie singled, was sacrificed to second and scored when Graves dropped Brown's fly. Lawrence went out to first and Kizzlar walked. Fred Morris whacked one through center field for four bases. In the third inning White hit for two bases. Lawrence singled and Kizzlar's triple scored them both; that ended the run-getting for the locals.

Durant started in the second. Tucker, Wright and McCarty got free transportation to first and singles by McCarty and Hornbuckle brought in three scores. Jones started warming up but Lefty was not taken out. In the third inning, McCullum singled and was forced at second by Tucker. Wright singled and Reed hit over the left field fence for the full circuit. McCarty tripled and Hornbuckle singled, scoring him. Another run was added in the seventh. Tucker hit for two sacks and Reed hit a long one between right and center. It was easily good for all four bases, but Umpire Miller ruled that he failed to touch third, so it counted for only two sacks. Durant's last run came in the ninth on a single by Harper, a sacrifice by Graves and a hit by McCullum.

Wichita Falls got only three men to first base in the last six innings, and all of these were put out at second. It seemed to be Hetty's good day, for there were no outfield flies knocked off him, all outs being made by the infield. Wright at second accepted ten chances without a bobble and Reed at first had seventeen putouts.

Brown performed at short for the locals and accepted six chances in good style. Chapman, who was forced to retire from behind the bat in the third, did nice work in pulling down fouls. He copped two that were not too easy. The score:

Durant	A	B	R	H	P	O	E
Harper, 3b.	5	1	2	0	3	0	0
Graves, lf.	4	0	0	1	0	1	0
McCullum, rf.	5	0	2	0	0	0	0

If a Genuine Mocha and Java Coffee Appeals To You

SENT TO YOU BY AUTO PHONES 432 & 233

Here It Is

Since the stringent food laws have been in operation, much of the Mocha and Java coffee so called has disappeared from the market. As a matter of fact, there is not a great amount of the genuine article produced, which accounts for its high price.

The real Mocha and Java flavor when properly blended and perfectly roasted is something so uncommonly good and so much sought after that a great many people once they taste it are never satisfied with anything less good. I haven't handled much of this blend of coffee, but in my new line it is put up at 45c per lb. and if you want the world's best coffee, here it is.

Entered at the Postoffice at Wichita Falls as second-class mail matter

Wichita Falls, Texas, June 13th, 1912.

The battle of Waterloo was fought June 18, 1815. The date of the Republican National convention is set for June 18, 1912, and from present appearances the outcome of that convention will be the surrender of the Republican party and the downfall of its two leaders, Taft and Roosevelt.

Gov. Colquitt will address the people of Wichita Falls on the 18th. He is the governor of our great State, and without regard as to political argument, should receive hearty welcome to our city. The best way to extend such a welcome is to hear what he has to say in his own behalf as a candidate for re-election.

One of our Kansas exchanges is authority for the statement that "a shabby pair of trousers often covers a warm and honest heart," by which we take it that in Kansas themake-up man or man's trousers are different in that their hearts are located below the waist-band, or that trousers are worn that reach to the armpits.

While it is a fact that the steam roller as manipulated by the Republican committee is working in behalf of Taft, there is no telling just what will be the result when the majority and minority report is submitted to the National convention. Therefore, if you who are Republicans have tears of sympathy to shed either for Teddy or Taft it will be far safer not to stop over until after the convention acts.

According to the experiment of Wichita Falls and the opinion of C. W. Post, you have to wait until the weather gets right before you can entice the rain from the clouds even with dynamite. If you are going to wait for the clouds to get right before using the dynamite it may be just as well to wait for the rain to come in the regular orthodox way after all. One might judge from Mr. Post's statement that he always waits until it is going to rain anyway and then discharges his dynamite just to hurry it up a few hours. This is hardly making it rain in a fair way but we opine it is about the only way it can be done.—Childress Post.

Well, the people at Stamford dynamited for rain yesterday, and got a good one. Presumably, they got all they wanted, and sent the clouds over in a roundabout way to Wichita Falls, and we got a slight sprinkle—just about enough to settle the dust. But

this is better than nothing. At any rate, we extend thanks to Stamford for the small favor.

If Roosevelt should be nominated for president and should receive a plurality of the popular vote would he insist that by reason thereof he had been elected and try to take possession of the office regardless of the action of the electoral college?—Independence, (Kas.) Reporter.

No. Teddy has an abundance of nerve, but he has not yet reached that stage where he would be a fit subject for the insane asylum. Only once in the history of the United States has the popular will of the people been defeated and the presidency stolen, and that was the time Tilden was elected by the Democrats and Hayes seated. This could not have been accomplished except from the fact that the Northern Democrats, of which Tilden was the leader, were not willing to stand up and fight for their rights. The South, though at that time, just recovering from the effects of a bloody war, was ready and willing to have another, provided their Northern brothers were willing to start the ball to rolling. Such a thing will never occur again. Not even if ex-President Roosevelt should make the attempt.

Straws, the saying is, indicate whicher the wind blows. For that reason we reproduce the following from the esteemed Waco Tribune, edited by the beloved Col. A. R. McCallum—another anti, by the way, who is supporting Judge Ramsey.

"Our valued friend, Judge A. Haldusek, of La Grange, the Grand Old Man of the Texas Bohemians, an 'anti' of rock-ribbed faith, who voted for Colquitt in 1906 and 1910, was in Waco Wednesday. We asked the editor of 'Svohoda' (that is the name of the splendid paper Judge Haldusek owns and edits, his preference for Governor and he answered 'Ramsey.' That shows how the political breezes are blowing in Texas. It is the anti element of democracy that will put Ramsey in the executive office. This is something to think of. Such things are not mere accident.—Denton Record and Chronicle.

Without doubting the sincerity of the Waco Tribune in what it says, it is difficult to believe any considerable number of the anti Democrats are going to support Judge Ramsey as against Gov. Colquitt, though occasionally such notable exceptions like the above will attract attention. For instance, at one place in Texas, an esteemed, cultured and refined lady, the president of a local W. C. T. U. took upon herself the pleasure of introducing Gov. Colquitt to his audience, and she did it nicely, paying the Governor a tribute and praising his administration. But we must not conclude by that, that all the ladies of Texas were in sympathy with the present State administration, or of the policies for which Gov. Colquitt stands committed. On the contrary, the way the situation looks to us, the pros are about as solidly lined up for Judge Ramsey and Morris Sheppard, as the antis are for Gov. Colquitt and Jake Wolters, and it will make no difference how hard the candidates themselves may deny that the question of prohibition is an issue in the gubernatorial and senatorial campaign, it is there just the same, and is by odds the biggest issue. Just who is responsible for it being there is difficult to determine. The number of pros who will vote for Gov. Colquitt, in our estimation, will be no more than an offset for the number of antis who will vote for Judge Ramsey, and if our sizing up of the situation is correct the reader can figure out which of the two is going to get the nomination for governor on July 27.

Twelve Million to Schools Washington, D. C., June 13.—A report just issued by the Bureau of Education, Department of Interior, shows there were \$21,821 pupils enrolled in the public schools of Texas during the school term of 1909-10. The cost of maintaining the school system of that state during this period was approximately \$11,777,000; the largest item of expense was for the salaries of superintendents and teachers.

Factory Output in Texas Houston, Texas, June 13.—The factory output for May shows a slight decrease compared with the previous month. The value of products manufactured during that month approximated \$12,000,000. Press reports, which in some instances lack verification, show there are 48 new factories under construction in the state at present and 19 factories were reported as completed and starting operation that month.

40,000 Tons of Coal Austin, Texas, June 13.—The total production of the Texas mines during the month was approximately \$1,310,000 which consisted chiefly of coal and petroleum. There were 40,000 tons of coal and lignite taken from the mines during May, with an approximate value of \$55,000 while the oil output was 950,000 barrels valued at \$600,000. During the month there were six oil wells brought in and one coal mine opened up.

Refineries Active Beaumont, Texas, June 13.—There were approximately 1,550,000 barrels of crude oil run by the oil refineries during May. The Texas Company reports 22 miles of pipe lines laid during the month which completes the line between Henrietta and Fort Worth. The Magnolia Petroleum Co. reports 48 miles of pipe line laid between Corsicana and Electra during May.

Tomorrow is Flag Day. There will be no formal observance of the day in Wichita Falls.

Sherman—The Young Mens Business Association is planning a trades excursion into the trade territory of this city. Picnics in Oklahoma will be visited.

San Binito—The Brownsville Truck Growers Association has installed a packing station in this city.

The Gem

the only exclusive Motion Picture Theatre in the city.

Change of program Every Day. Night show at 7:30. Matinee at 2:30.

NEW LAMPS FOR OLD WATER CAKE RECIPES

WELL KNOWN DISHES SERVED IN NEW WAYS.

Latest method of "Patting" Oysters improves Fish and Appearance—Printanier Salad is Dainty and Delicate Dish.

Naturally, it would not do for us all to be cast in the same mold, like tall candles, for then we should all like the same things and there would be no progressive ideas in the air and no searching for new styles in foods as well as clothing, and no excuse for me to tell you how to cook and serve some well known foods in new ways.

First let me tell you about "patting" oysters as the process of laying them is called where oysters lay be browned and crisp and more delicate in taste and appearance than we usually see them.

Drain the oyster, very well, by placing them in a wire basket and hanging them where their liquor can drip in a receptacle below. Roll cracker crumbs exceedingly fine and season them with salt and pepper and celery salt (this last is excellent for all fish and game). Cover the oysters with this and lay them on a tray in layers and when the first layer is done look them over to see if every part is covered with a thick coating of the cracker dust. This should be done some time before the oysters are to be cooked. Clams smothered in cream are just the thing for supper toward the close of Lent when the appetite for fish is satisfied.

Wash the clams, after draining them and saving the liquor. Chop them in a bowl, for a dozen clams a pint of this cream thickened with blended flour and butter and nicely seasoned. This is a splendid chafing dish mixture; if you do not use a chafin add an egg to the sauce, mix in the clams and bake them until they are a slightly brown over the top. Use shells or individual baking dishes to bake them in.

Printanier is a French word signifying spring-like, and a Printanier salad is the most delicate and dainty of any that can be made.

Tear crisp lettuce leaves in shreds after dripping them in a mixture of oil, vinegar, salt and pepper. Place on the salad plate and lay on chilled, sliced tomatoes, then a few tender sprigs of onions or Bermuda onions sliced, and on the top of all a great spoonful of rich, mild salad dressing. Or use cress and onions and minced celery and rosy spring radishes, dress with French salad dressing made over the recipe I have given so often.—By Henrietta D. Grauel, Domestic Science Lecturer.

Peach Pudding.

This recipe makes a delicious pudding, wholesome for the children and greatly relished by the elders. For one quart can of peaches add four tablespoonfuls of sugar, unless the peaches are already rather sweet. Heat the peaches in their own juice and then drain them, saving the juice, and place, hollow side up, on squares of stale sponge cake in a pudding dish. Now take the juice and mix with it two tablespoonfuls of beaten egg, one egg, very lightly beaten, and one tablespoonful of corn starch moistened with a little cold water. Put this mixture on the stove in a saucepan and let it boil up once or twice and when slightly cooled pour over the peaches. Serve cold. The strip of butter about the peaches and forms a delicious dessert. This can be eaten without sauce or with cream or milk as one prefers.

With the Cook in the Kitchen.

A delicious way to bake the new salted just coming in is to cover the fish with milk in the baking pan and bake it with the milk several times during the hour.

If filets of flounders, commonly known as "sole," are left to lie in salt, arley, thyme, a sliced onion and onion juice for half an hour before frying they will take on a flavor much as the French chef gives them. They are best fried in deep fat.

Broiled smelt with maitre d'hotel sauce seasoned with a little nutmeg as well as the usual lemon juice and parsley are delicious. Prepare the fish as for frying—they should be of good size—dip each into melted butter, then roll in bread and cook over the fire, first one side and then the other.

Macaroni Napoli.

Cut four thin slices of bacon into small pieces, fry and strain off the fat. Set into a saucepan. Add three-fourths of a can of tomatoes, one sliced onion, one-fourth teaspoonful each of mace and allspice, one-eighth teaspoonful of cayenne and a bit of bay leaf. Bring to the boiling point, simmer one hour and season with salt and pepper. Add cooked macaroni or spaghetti cut into two-inch pieces (of which there should be two cupfuls) and cook until the macaroni is thoroughly heated. Serve very hot.

Silver and Gold Laces.

To clean silver and gold laces or braids when they have become tarnished apply spirits of wine with a soft flannel cloth.

Plain Cake.

One cup sugar, two eggs, nine tablespoonfuls of melted shortening, one cup of milk, 1 1/2 cups flour, two teaspoons baking powder, one teaspoon vanilla.

Paris—The Frisco lines will replace the rails on its lines between this city and Monett, Mo., with heavier material.

DELICIOUS CONFECTIONS MADE WITHOUT MILK OR CREAM.

Sponge Cakes Made With Hot Water Familiar Example of This Kind of Cooking—Cookies and Spice Cakes.

There are many delicious kinds of cake that may be prepared with water instead of milk or cream, and in the absence of the latter such recipes are very useful. Hot water sponge cakes are a familiar example of this kind. Recipes for black molasses cake and cookies and also spice cakes rich with fruit often call for hot or cold water.

The following is a Washington pie that calls for water instead of milk: Beat three eggs light and add a cupful of sifted powdered sugar through them, then fold in one cupful and a half of flour, sifted several times with a teaspoonful of soda and two of cream of tartar. Moistened the dough with two tablespoonfuls of cold water and favor it with lemon extract. Bake in two layer tins after greasing them with a little very pure fat. The housewife who offers this recipe does not use butter to grease her cake tins because of the slight salty quality in it, which she considers detrimental to the delicate quality of the cake. When the cake is baked let it stand in the tins, and when cool split open each layer, thus making four layers. Four layers of this kind will make a much softer and more delicate cake than if they had been baked in four layer tins, because there is not so much hard crust. Granulated sugar may be used in the cake if the powdered sugar is not at hand.

For the cream filling mix a tablespoonful of cornstarch with a little cold milk, just enough to dissolve it; then add an egg and beat the whole into half a pint of boiling milk, stirring the milk rapidly to prevent curdling. When all has become a smooth custard, beat in half a cupful of sugar and a piece of butter the size of a walnut. Spread the mixture, after favoring with lemon rind (grated), over three of the layers and then place together in the usual way, with the fourth layer on top of all. This makes a moist and delicate loaf with four thin layers of the cake and three layers, almost equal in thickness, of the cream.

The following is a recipe for a white cake with water instead of milk: Cream a liberal quarter of a cupful of butter with a cupful of sugar. Then with half a cup of water and stir the whole into one cupful and a half of pastry flour, sifted several times with two teaspoonfuls of baking powder. Fold in the whites of two eggs whipped to a very stiff froth.

To Remove Ink Stains.

Ink stains on cotton, linen or woolen fabrics may be removed with turpentine by saturating the spots for several hours then rubbing out, leaving neither color nor texture injured; but in the case of the cream cashmere coat which it is not desired to wash, it will be best for you to use salt and lemon juice. Fold a pad of blotting paper beneath the stain, touch the spot with lemon juice, and immediately put on the salt; leave this for a time then brush off and treat again in the same way when the stain will be found very faint. Rub the next application well into the fabric with a soft clean cloth and the final traces will disappear. Touching the stains lightly with Javelle water or solution of chloride of lime will also bleach the ink, if of the common kind, but must touch the stained portion only. Sponge off lightly with a damp cloth and press when the stain is removed.

Worth Knowing.

Enameled ware which has become discolored can be cleaned with a paste made of coarse salt and vinegar.

Discolored cups and dishes used for baking can be made as new by rubbing the brown stains with a flannel dipped in whiting.

Many families will really put up with a squeaking hinge for weeks, when one application of machine oil or the like heated lard will result in perfect silence.

Valuable lace should be kept wrapped in blue paper. White paper is often bleached with chloride of lime, which injuriously affects any delicate fabric that lies against its length of time.

Nice Meat Balls.

Take a quantity of cold meat sufficient for a meal, scraps of roasts or fried beef that has become dry, run through food chopper, season with salt and pepper, nutmeg and allspice; soak about one-third as much stale white bread in cold milk, press out, and mix with the meat. Add beaten egg, one egg is enough for three persons, and lump of butter size of a walnut; mix thoroughly and roll into balls; fry in hot lard. Pile in pyramid on a flat dish to serve.

For Individual Pies.

I use my muffin pans for making individual pies, lining each one with pastry, and proceed as for a large pie. They bake beautifully and look dainty when served individually.—Woman's Home Companion.

A Kitchen Hint.

You who find it difficult to cut up a rough-skinned pumpkin will find the kitchen or woodhouse saw the most convenient article for the purpose, as it is superior to the sharpest knife and far less dangerous.

Hempstead—6000 acres of water melons will be harvested in this vicinity this season.

ACTIVITY IS SHOWN

WEST OF CITY

(Continued from page 1)

contract for cement sidewalk construction has been awarded to I. H. Roberts.

Manager T. R. T. Orth of the

Wichita Falls Traction Company, in speaking of that part of town, said today that he has found it necessary to place in service three extra cars each morning for the benefit of the workmen employed at the automobile and glass factories and other places nearby. Over a hundred men were transported to the factories this morning, and Mr. Orth feels confident that within the next ninety days it will have become necessary

to add three additional extra cars. The cars leave the city each morning at about 6:30 o'clock and make the round trip to the lake. Another round trip is made beginning at 5:30 o'clock in the afternoon to bring the workmen back to town.

Leaving the Fairview Heights Addition and continuing a few miles south to Lake Wichita, an opportunity is given for inspecting a number of new improvements there. The

swimming pool has recently been opened to the public, and is liberally patronized every afternoon by the young folks. The pool is seven feet in depth in the middle, and is three feet deep around the edges. A large springboard in range of the deep water furnishes opportunity for diving.

The pavilion at the lake has recently been opened for the summer and the dance floor upstairs has been

placed in excellent condition. Preparations are now being made to open the hotel, and within the next few days the serving of meals will begin. The hotel has been leased to the arrangement committee in charge of the Interstate Baptist Encampment, which begins on the 18th of July; and negotiations are now in progress looking towards the rental of the hotel to those behind the Methodist Lakeshore Assembly, although definite arrangements have not yet been completed with the Methodists. It is probable that the time between the Baptist encampment and the Methodist assembly will be employed in operating the hotel exclusively for the benefit of those who desire to live at the lake. However, Cap Robbins, who is in charge of the hotel, has not yet made up his mind on this point.

There are a number of summer cottages at Lake Wichita and several of them are already leased for the summer. Quite a few Wichita Falls families have decided to make the lake their home during the hot weather, and it is expected that many people from surrounding towns will also rent cottages for the summer, and several have already done so. At the present time, seven or eight tents pitched on the shores of the lake may be seen from the pavilion, indicating that not all who make their summer homes at the lake are living in cottages and houses. A street car service of thirty-nine minutes between cars has been inaugurated.

Leaving the lake and passing along a well kept road lined for most of the way with five and ten acre irrigated truck farms the productivity of which is testified to by the vegetables which are seen growing on them, the panorama continues. At the power plant, some extensive improvements are being made.

Among these improvements, is a new settling basin, which will be more than twice as large as any of the getting basins now in use by the water works system. This particular basin will be two hundred and forty feet wide running east and west and more than a hundred and fifteen feet in width running north and south.

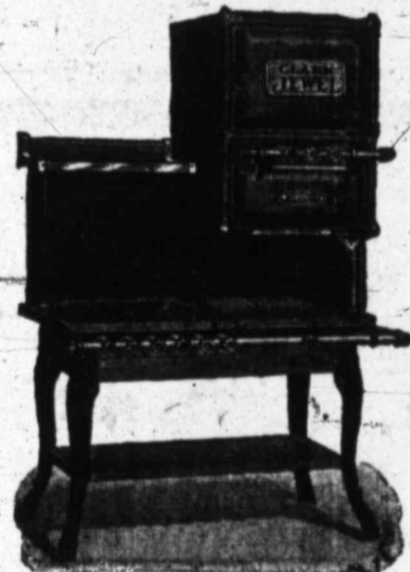

H. Roberts was recently awarded the contract for the cement and concrete work connected with the construction of the settling tank, and this feature of the work alone involves a cost of more than six thousand dollars. Mr. Roberts thinks that his part of the job will have been completed in less than three weeks.

Mr. Orth, present manager of the Water & Light Company, more than five years ago predicted that such a basin would be found necessary within a few years. So sure was Mr. Orth that the basin would become essential, that a few years ago when the city reservoir was drained for repairs, he had placed under the ground ordinarily covered by the water, a large drainage pipe, which now proves of great service in connection with the new monster settling tank.

Other improvements by the water and light company include the new pumping unit and the Turbine motor, mention of which has already been made in The Times.

Work On Good Roads

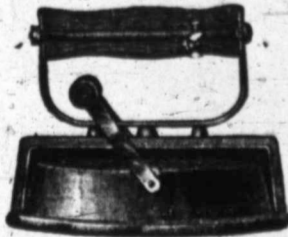

Paris, Texas, June 13—Work on the highways in precinct number one of Lamar county is expected to start within the next few weeks. The delay has been caused by the board of commissioners—making a thorough search for the very best material obtainable and an excellent quality has been located in Oklahoma, on the Frisco lines. The commissioners have requested the railroad to build a spur line to the rock in order to facilitate the handling of the material. In case the road officials do not deem it advisable to comply with the request, arrangements will be made at once to secure more available material.

why you should not have the best. In many instances it costs less than some cheap and inferior article. If you can't judge for yourself then trust to a reliable firm, one who *does* know, one who has been in the same line of business a lifetime. Experience has taught us to advertise *only the best*. True, we have cheap wares, such as certain class of trade demands, but you will never know of us spending *good money* to advertise a poor article. Hence you can trust and believe us when we tell you that Clark's Chicago Jewel Gas Stoves are the best. For every point of advantage that our competitor will attempt to show you, we will show *five* points of advantage that we claim and prove for Clark's Chicago Jewel over any other natural gas stove that has been offered for sale in Wichita Falls. You may ask, Why? Yes, why do you know so much about stoves, and why do you know that the Clark's Chicago Jewel stove is so much better.

Our answer is *EXPERIENCE*, yes a life long experience in the stove business has taught us that gas and gasoline stoves should be made of stamped steel, a double

connected wheel valve, a double asbestos lined steel oven bottom. These are only three points of a score of advantages that Clark's Jewel Gas Stove has over all others who have just recently entered into the manufacture of gas stoves with the view of taking the business from the old reliable manufacturers Geo. M. Clark & Co's Jewel Stoves that so well deserve the support of its agents and satisfied customers. Before you buy a gas stove, call at our store and see our Clark's Jewel, note carefully the advantage that this wonderful stove has over all others. We show a very popular pattern, the square top with broiler, notice the wheel valve, the oven lighter on the side, its neat appearance and general construction. Seeing is knowing; come and be shown.

Asbestos Sad Iron

Here we show the Asbestos Sad Iron. Possibly you need a new iron to keep those dresses nicely ironed. We are selling quite a lot of these Asbestos lined irons and we believe they are much better than the regular old patterns of Pott's Irons and cost only a trifle more.

Economy Fireplace Heater

True, it's a little early to talk Heaters, but we just remind you that the Economy Fireplace Heater is going to be the household word this winter, and why shouldn't you know about it now. Did you see our Sunday ad? If not, we ask that you refer to it and read it. You may need a new heater when cold weather sets in and it would be well to know about this new Fireplace Furnace.

Bear in mind that our shelves are loaded to their capacity at all times with the best line of hardware, tinware enameled ware and a complete line of such goods as are usually sold in a first class hardware store.

NEW JERSEY YOUTH A CHAMPION EATER

Frederick Binks Establishes World's Record in Art of Consuming Cream Puffs.

Paterson, N. J.—Emulating "the young man with the cream tart," from Robert Louis Stevenson's "Modern Arabian Nights," Frederick Binks, sixteen years old, of 80 Ellison street, has established a world's record.

He ate 42 cream puffs on a bet, thereby being the champion lightweight cream puff eater of the world. As a grand finale and at the same time to prove there was no ill feeling, Binks, with great satisfaction, ate three coconut pies. The entire performance took twenty minutes. Binks now stands ready to meet all comers in the cream puff line.

Louis Geng, a farmer of Wanauque, and a close friend of Binks, came to visit the latter. During a conversa-

The Contest Was On.

tion about his fondness for cream puffs, Binks declared he could eat a dozen of them. Geng, who has a keen sense of humor, made a wager that Binks could not eat fifteen.

Before accepting the bet Binks asked to be excused for a few minutes. He left the room and came back in ten minutes smiling. He announced that he would take the bet and the money, \$10, was placed in the hands of Ernest Steinhebler of 80 Ellison street, who was made referee by mutual agreement.

Then the contest was on. When the fifteenth puff had been eaten Binks never stopped, but kept right on until he had eaten all the puffs on the pan, 27 in all. There was nothing left to eat but three coconut pies. Binks finished these and smacked his lips.

"Tell me," asked Geng after the bet had been paid, "why you left the room before you would say that you would take the bet?"

"Well, I wanted to see if I really could do it," he replied. He had gone outside and eaten fifteen to make sure of things.

LEGS BURNED AND FROZEN

Section Hand, Camping Near Village, Has Fit and Falls into a Bonfire.

Norwalk, O.—Suffering from burns on his right leg, extending from the hip to the ankle, and with his left leg badly frozen, Joe Moyrock, aged thirty-one years, a Polish railroad section hand, was brought to the county infirmary in this city recently from Greenwich.

Moyrock started to walk along the railroad track from Shelby to Greenwich, and when darkness overtook him he built a bonfire alongside the track just outside the village. He reclined beside the fire to spend the night. During the night he was seized with

an epileptic fit, and while in that condition his right leg fell among the embers of his fire. When he regained consciousness, Moyrock says, he was unable to walk or to drag himself to where he could receive assistance. He was not found for two days. During that time his left leg and right foot and ankle were frozen. Both legs were amputated.

Was Seized With a Fit.

in epileptic fit, and while in that condition his right leg fell among the embers of his fire. When he regained consciousness, Moyrock says, he was unable to walk or to drag himself to where he could receive assistance. He was not found for two days. During that time his left leg and right foot and ankle were frozen. Both legs were amputated.

Brownville—The contract for the canal to drain approximately 8000 acres near here and work is expected to start at once.

TRADE WAR WITH RUSSIA LIKELY

ABROGATION OF TREATY MAY RESULT IN BAN AGAINST AMERICAN COTTON

MORE HOME PRODUCTION

Government Will Encourage Raising of Staple by Russian Farmers To Supply Needs

St. Petersburg, June 13.—The Russian cotton industry is feeling the effects of the abrogation of the Russo-American treaty. Russian determination to resist influence with reference to the Jewish passport question is now seen to involve the eventuality of trade hostilities with America.

The building of a railroad from Arva, on the Onegub and Tashkent line, to Yerny, in Semiretchensk Province, 726 miles away, has been sanctioned by the proper authorities. The plans call for its completion in 1915. It could be built in two years. Its capacity will be 2,800,000 bushels yearly of Semiretchensk grain to relieve Ferghana and Samarkand, where prices are double and the market tight. Being in itself a splendid outlet for the grain of Russian colonists in Semiretchensk, who are 38 per cent of the population, it will serve its principal purpose in automatically releasing a large part (perhaps up to a million acres) of irrigated land in Ferghana and Samarkand from the obligatory grain crop, to pass under the more valuable cotton crop but in Samarkand only 4 per cent whereas practically all could be were imported grain only cheap enough.

The tour of M. Krivoshein shows that the chief needs in Central Asia are cheap grain, cheap credit and cheap labor. The state and the peasant's banks will now enter the field to compete with the Jewish, Armenian and Tartar bankers and agents. In lieu of the available cheap Afghan, Cashgar and Chinese labor, M. Krivoshein proposes to colonize Russians exclusively on the lands to be reclaimed by irrigation.

Cotton is also successfully pushed northward in the Caucasus, on land non-irrigated, and in the Mughan and Mii stopes, irrigated from the Arax and the Kura. Since 1905 it has been planted for experiments in the valleys of the Bug and the Dnieper. The results show that this is botanically possible, but so far, commercially risky or doubtful, on account of frosts.

All Russian cotton in Central Asia is irrigation grown. Upon 1,926,000 of the total of 3,569,000 acres of irrigated land there has been produc-

ed, roughly, half of the cotton Russia now needs. But this area has been powerless to change the ratio, and has barely succeeded in keeping up with the demand. Alongside of it, however, are 5,000,000 acres of suitable land, available for irrigation from the waters of the Syr Darya and the Oxus, at an estimated expense of from \$19 to \$38 per acre, the work to occupy 20 to 25 years. Causes connected with the cost the requisite technical skill and labor, have hitherto blocked progress. Bills pending before the Duma, or being drafted by the Ministry of Agriculture, would establish a water law in the Turkestan and permit private initiative and capital to assist the treasury in this big undertaking. A contract with a Moscow engineer, M. Tchaoff, calls for the completion of a canal to irrigate 135,000 acres in Samarkand Province by 1914. The work had been advancing slowly for years, when the Russo-American events intervened and forced the pace.

It is understood that Belcher lays the blame for the shooting upon an employe at the farm. He maintains it is said, that the farm hand was intoxicated at the time.

Mrs. Belcher, mother of the accused boy, has declared her belief in her son's innocence. She was at the family town residence when the shooting occurred.

She has retained Edwin Dabney of Worth, to aid in the boy's defense. Mr. Dabney called at the county jail Thursday to see young Belcher and was allowed to talk with him as he walked down to the street car in company with Sheriff Walker. Attorney Dabney could not say upon which ground the attorneys would base their defense but referred significant-ly to the prisoner's unworked state.

Foreign Rural Loan System

Paris, France, June 13.—Local bankers are looking forward with interest to the coming visit of the committee from the American Bankers Association who will investigate the Rural Credit system, in vogue in this country. The object of the investigation is to devise plans whereby the farmers of America will be enabled to secure loans on their property with greater ease and dispatch. The necessity of these loans is felt in the southwestern country, especially Texas where there is no central authority or established standard for farm loans. Edwin Chamberlain, a banker of San Antonio, Texas who will be a member of the Bankers' Association committee, is well known in financial circles here.

Galveston—The Federal Government has decided to have the Galveston harbor deepened to a depth of thirty-four feet. The work is expected to be completed by September first.

PERSONAL MENTION

Mrs. G. E. Martin from Stamford is in the city visiting her son, Fred Martin.

Mr. and Mrs. H. B. Zoeller are visiting relatives and friends at Lubbock.

B. M. Bell of Oxford, Miss., is visiting his uncle, Dr. J. M. Bell.

Miss Myrtle Henderson who is attending Hamilton College at Lexington, Ky., will arrive home Saturday to spend vacation with her parents, Mr. and Mrs. J. W. Henderson.

Byron C. Player of Quannah was yesterday on business.

J. W. McFayden of Childress was visitor here yesterday.

B. S. Craig is in the city looking after business matters.

J. A. Kemp left this morning for short sojourn at Mineral Wells.

S. C. Redd who is manager in territory for the Eastern Oil Co. back from a trip to the West Virginia field.

B. F. Berry arrived here last night from Houston, and will do some trap shooting this afternoon. He is representative of the U. M. C. of the ridge Company.

Mr. and Mrs. Riggs left this afternoon for points on the Wichita railroad, where they will visit for a few days. It is probable they will not return to this city but make their home in one of the towns in which they visit. They were accompanied by Miss Lillian Potter, formerly of the Daylight store.

George W. Henson, a resident of Wellington, Texas, arrived here tonight on business.

L. C. Heydrick returned last night from a stay of several days in Duncan, Okla., on business connected with the development of an oil field in that city.

A. L. Lemex of Corsicana, Texas, arrived here last night on business in the oil fields.

Ed Napier of Electra is in the city today on business.

J. B. Marlow is expected to return tonight from Dallas, where he has been since last Sunday on business.

O. E. Maer, superintendent of the Fort Worth and Denver railroad, has returned to his home in Childress, after a business trip to this city.

A. L. Baker, a prominent citizen of Abilene, arrived here this morning on business.

Miss Zelma Bell, who has been attending school here for the last nine months will leave tonight for her home in Patroon, where she will spend the summer. She will be accompanied part of the way by Miss Adele Mackechney, and John Hampton Mackechney, who will go to San Augustine, to spend several weeks visiting relatives.

BRIBERY CHARGE IS AGAIN HEARD

(Continued from page 1)

With the Mississippi cases disposed of, the Missouri contests were taken up. Gov. Hadley's Roosevelt delegates at Bart's challenge, the Taft supporters and Taft delegates from the first, third, fifth, seventh and fourteenth districts opposed the regular delegation instructed for Roosevelt.

Colonel Victor Rosewater, in a statement at the end of the session, said the committee was not keeping pace with the work of the last convention. In 1908 but eighty-eight contests remained to be decided on the Wednesday night preceding the convention. Members of the committee fear that the contests will run well over into the opening day of the national convention.

One of the delegates declared entitled to a seat, P. W. Howard of the Eighth Mississippi district, appeared on both the Taft and Roosevelt delegations under conflicting instructions. The question to determine in which camp Mr. Howard could be counted failed to bring from him a definite statement but it was asserted by his attorneys he would heed the Roosevelt instruction.

STORM CAUSES DAMAGE ALONG THE MISSISSIPPI

Morgan City and Biloxi Sustain Damage—Former's Business Streets Under Water.

By Associated Press.

Morgan City, La., June 13.—Morgan City and surrounding country were swept last night by a severe southeast wind which brought a rise of two feet of tide water to add to the inundation of the streets from the Mississippi crevasse waters. The principal business streets of the city are four to six feet under water.

Every telegraph wire in this section is down. No loss of life is reported.

Biloxi, Miss., June 13.—A high southwest wind from the gulf this morning did considerable damage to the water front here.

SIX-YEAR TERM MATTER TO BE VOTED ON SOON

Question Will Probably Come Up For Action In House Before Term Ends.

Washington, D. C., June 13.—Action before the close of the present session of Congress on the pending resolution providing for a change in the terms of President and Vice President of the United States from four to six years, with a further provision that the President and Vice President, when so elected, shall be ineligible for re-election, is expected by the author of the resolution, Representative Henry D. Clayton of Alabama. Mr. Clayton said today:

"Notwithstanding the claims of certain members of the House that the calendar of that body is too crowded to permit action on this important piece of legislation at the present session, I am of the opinion that the committee on the judiciary will be able to present a practically unopposed favorable report on the measure within a few days."

Representative Robert L. Henry of Texas, chairman of the committee on rules, is of the opinion that the House calendar is too greatly crowded to permit of the Clayton resolution receiving consideration in the manner desired by Mr. Clayton. He said, however:

"The committee's docket is sadly crowded. I recognize to the fullest extent the importance of the measure which the judiciary committee will father, but I consider the bill providing jury trials in Federal courts in cases of contempt a matter of greater moment, and until the committee on rules has had a chance to act on that, I do not see how the committee can bring in a rule for debate and vote upon the Clayton measure."

Hartinger—The Rio Grande and Coast Association, has shipped ten cars of farm products to points in Texas so far this season.

TEST OF FRANCHISE TAX PLANNED BY RAILROADS

Mandamus Proceedings Against Secretary of State Are Heard In Supreme Court.

Austin, Texas, June 13.—There was submitted to the Supreme Court the mandamus case of Houston and Texas Central Railway Company vs. C. C. McDonald, Secretary of State, to compel the latter to accept payment of franchise tax and issue receipt in due form. It involves the correctness of the amount of franchise tax due from corporations having capital stock in excess of \$1,000,000.

The railroad company contended through its counsel, Judge H. M. Garwood of Houston, that while corporations having less than \$1,000,000 capital stock are subject to a franchise tax based upon the amount of the authorized capital and surplus, if they have any, corporations having over \$1,000,000 capital stock are not so situated. He argued that corporations of the latter class are liable for a franchise tax based upon their authorized capital stock and that their surplus can not be considered in measuring the tax.

James D. Walthall and E. B. Robertson, Assistant Attorney General, made argument that the railroad company must pay a tax based on the combined capital and surplus. They insisted that there was no distinction between corporations having authorized capital stock of less than \$1,000,000 and those having more than that sum; that all must pay on the authorized capital plus the surplus, if the corporation has any surplus.

The court took the matter under advisement and is expected to render a judgment before the adjournment of the terms of the end of this month.

The Supreme Court today affirmed the judgment of the District Court for \$4,000 against the Texas Company because of injuries sustained by Mike Beck, an employee. The judgment of the Court of Civil Appeals

reversing and rendering the judgment of the District Court was reversed by the Supreme Court, holding that the Appellate Court's decisions of law were incorrect.

OPERATE ON MAN FOR WHOSE INJURY WIFE IS HELD.

Newnan, Ga., June 13.—Eugene H. Grace, who was mysteriously shot at his home in Atlanta last March and who has since been partially paralyzed, was operated on today for the removal of the bullet supposed to have severed his spinal column. The ball was not removed, but it was found that the spinal cord was not severed, nor was the bullet in the spinal column. It was imbedded in one of the vertebrae, causing it to press against the spinal cord, resulting in paralysis. Grace showed no bad effects from the operation and is expected to recover.

Mrs. Daisy Oyle Grace, his wife formerly of Philadelphia, who is charged with the shooting, is now at liberty on bond. Her trial is set for the week of June 24, but the developments in the case condition may result in a postponement.

New Lines Opened.

Austin, Texas, June 13.—The Texas Railroad Commission reports forty-one and one half miles of new line opened for operation during the month. They are as follows:

Port Bolivar and Iron Ore, between Longview and Ore City, opened May 16th, twenty-three miles; St. Louis, Brownsville and Mexico, Bloomington to Victoria opened May 1st, thirteen and one-half miles; San Antonio, Uvalde and Gulf, San Antonio to San Jose, five miles.

May Building Permits

Fort Worth, Texas, June 13.—The building permits issued in the principal cities of Texas during the month of May according to reports compiled by the Texas Commercial Secretaries and Business Men's Association approximated \$1,697,135. (San Antonio leads with a total of \$371,769, other cities rank as follows: Dallas, \$310,332; Houston, \$276,035; El Paso, \$173,053; Waco, \$159,000; Fort Worth, \$140,535; Beaumont, \$32,454; Galveston, \$27,000; Austin, \$25,327.

DAILY DIET AND HEALTH HINTS

By DR. T. J. ALLEN

Food Specialist

ECONOMY IN EATING.

Economy in eating is physiological and economic. Health with resulting efficiency, in business, in social life, in capacity for enjoyment—health is dependent largely upon proper food selection and proper eating. Vitality spent in digesting wrong food or proper food improperly eaten cannot be used for work or play. That food which supplies the body's requirements with the least expenditure of energy for digestion (with due regard to the necessity for exercising the digestive organs normally) is the best, and that which supplies the necessary food with the least expenditure is, otherwise, the best. Boiled cabbage, for instance, contains practically no nourishment and requires five times as much energy to digest as bananas, which are a complete food. Nuts and olives are a better source of fat than butter or lard. Sugar contains no waste, but it is, ordinarily, unwholesome. Coffee has no food value. Fresh skim milk with the addition of olive or other vegetable oil, is more economical, physiologically and otherwise, than sweet milk. Meat is inferior as a source of protein to nuts and much more expensive. Taste is an important element in food selection and fashion cannot be entirely ignored, but food selection on the basis of fancy is less wise than selection of clothing on the exclusive basis of fancy.

San Antonio—A new record has been made on the Medina Irrigation project. During the month of May over 33,500 yards of material has been placed.

A WOMAN'S HAIR

has more to do with her beauty than anything else. A nice head of hair, properly taken care of will give to the most ordinary features an indescribable charm which cannot be obtained by any other means. On the other hand, no woman without pretty hair well cared for, will ever be considered beautiful or attractive, or even pretty.

We have shampoos—preparations that will strengthen, invigorate—cure dandruff—in fact, everything to make your hair the beauty nature intended.

THE TESTIMONY IS NEARLY ALL IN

Large Number of Character Witnesses Testify in Kenney vs. Moore Suit

It was expected this afternoon that testimony in the Kenney vs. Moore suit would be concluded before court recessed for the night today.

The day has been taken up with the testimony of character witnesses and the reading of depositions from residents of Greenville and other points as to the plaintiff's general reputation. A great number of these were introduced by the plaintiff. Kennedy himself was put on the witness stand late this afternoon.

Paris—Every public road leading into this city is being dragged by members of the Paris Automobile Club.

It's Fun

When you burn gas and do not have to fuss and worry about wood and coal. It is a necessity for every modern home.
