## AN APPEAL FOR WILSON DOLLARS

TIME IS SHORT AND NEED FOR MONEY IS URGENT—PEOPLE MUST FINANCE FIGHT

### NO MONEY FROM TRUSTS

Archbold, Frick, Morgan and Others Will Have No Greater Claim On Our Candidate Than You

The Times: I appeal to the Democrats of Wichita county for funds to help elect Governor Wilson President. The time is short and the need for money is urgent. There are no trust masters to finance this campaign for our candidates. Your dollars will help to win the fight and you will get a receipt from the National committee for same that you can lay away as a remembrance of the contest.—Texas the banner Democratic State, is expected to do her part in raising money.

I have remitted \$134 so far to the campaign committee. Wichita Falls ought to do better than that. We should make it at least \$250. Mail me a check for any amount or hand it to me on the street or leave at either of the newspaper offices. Keep in the people's fight and DO IT NOW.

W. J. BULLOCK, Sec. Wilson Club. Contributed to fund since last published:

A. L. Huey \$1.00

V. A. Kay 1.00

J. Milton Erwin 1.00

E. P. Greenwood 5.00

## WICHITA COUNTRY APPLES AT THE DALLAS FAIR

W. D. Bentley and Son Will Have Exhibit of Apples and Pears From Thornberry Farm

Wichita county apples will be exhibited at the Dallas fair this fall in the display of this section's products. W. D. Bentley and son, who have a large orchard in the Thornberry neighborhood this morning brought in a large basket of Ben Davis apples and a basket of Kiefer pears, some of the latter weighing as much as seventeen ounces. The fruit was placed on exhibit at the store of O. W. Bean and Son, where it attracted much attention.

The exhibit is now being crated, preparatory to shipping it to Dallas. In addition to the farm and garden products which it will include, there will be samples of the output of a number of local factories, together with views depicting the progress this city is making.

## FOUR DENVER TRAINMEN INJURED NEAR AMARILLO

Freight Trucks Dropped and Caboose Rols to Bottom of Cut—George Thompson May Die

By Associated Press. Amarillo, Texas, Oct. 3.—Four men were seriously injured early this forenoon ten miles south of Amarillo, when the front trucks of the Fort Worth & Denver local freight No. 34 dropped loose and the caboose was hurled to the bottom of the cut. The most seriously injured is George Thompson, a brakeman, whose arms are broken and who is internally hurt. Physicians say he probably will die.

## GALVESTON BREAKS ALL PORT RECORDS

491,798 Bales of Cotton Sent to Foreign Countries in September

Galveston, Texas, Oct. 3.—Sending to foreign countries 491,798 bales of cotton, valued at \$31,626,776, Galveston broke all port records for September exports of cotton. This record goes ahead of September last year, when 461,240 bales were exported, valued at \$27,138,408, and is also ahead of September, 1910, when there were exported from Galveston 368,944 bales, valued at \$27,284,696.

Cotton cleared and actually at sea during the month amounted to 446,098 bales, valued at \$28,749,684, the balance being cleared prior to the last day of the month, but the shipment not getting away until October 2.

## JUDGE CLEM B. POTTER DEAD AT GAINESVILLE

Mrs. L. H. Mathis received a message last night announcing the death of her nephew, Judge Clem B. Potter at his home in Gainesville. His death was caused by typhoid fever. He was judge of the district composed of Cooke, Montague and Denton counties.

Until Tuesday it was thought there was slight chance for recovery, but a sudden relapse darkened this hope and the end came peacefully yesterday at 1:30 o'clock.

Judge Potter was appointed in 1906 to fill the unexpired term caused by the death of the late Judge D. E. Barrett. He was elected in 1908 and in the primaries held in July of this year he had no opposition and his election in November was certain. The fact alone that he had no opposition attested his fitness and capability for the high position he held.

At the time of his appointment by Governor Lanham, Judge Potter was the youngest district judge in Texas. He was 40 years old August 8 last. Clem B. Potter attended Bingham Military Institute at Ashville, N. C., and from there went to State University at Austin, graduating in the law school and being admitted to the bar in 1895. He was known as one of the most brilliant attorneys and orators in Cooke county and in spite of a natural affection of the throat which made his voice sound hoarse he had held the closest attention when discussing questions of public welfare, and on the bench his decisions met with the highest approbation.

Judge Potter is survived by a wife and five small children besides his father, Judge Clay C. Potter. The funeral will be held Thursday afternoon at 4 o'clock. Rev. J. E. Pierce officiating. Judge Potter was a prominent member of the Elks' lodge, Woodmen of the World and Maccabees and these orders will take part in the funeral ceremonies.

## OROZCO'S FORCES WERE DEFEATED

REPORT REACHING LAREDO SAYS BATTLE IN COAHUILA ONE OF MOST SERIOUS OF REVOLUTION

### NINETY FEDERALS KILLED

No Account of Rebel Losses Have Been Received—Federal Outnumbered Rebels

By Associated Press. Laredo, Texas, Oct. 3.—Rebels said to have been commanded by General Pascual Orozco are reported defeated in one of the most serious battles of the Orozco rebellion near Musquillo, in the State of Coahuila. The federalists brought ninety dead and wounded to Monterrey last night from the battle field. No account of the rebel losses have been received. The federalists say the rebels were defeated. The federalists were commanded by General Blanquet who had six thousand men and Orozco's forces are said to have numbered four thousand.

### Senator Fall Summons Smith to El Paso

By Associated Press. El Paso, Texas, Oct. 3.—Senator William Alden Smith, chairman of the Senate subcommittee engaged in probing the Mexican revolution, has been summoned to El Paso by Senator A. B. Fall for the purpose of investigating the activity of Mexican secret service men on American soil, according to a statement by Senator Fall here today.

Senator Fall came here for a few days from California, and says he became indignant at the operations of Mexican secret service men. "Spain," he called them and telegraphed to Senator Smith to come here and join him in investigating their activities.

### Three Americans Rescued

By Associated Press. Mexico City, Oct. 3.—Three American citizens were rescued today from Mexican rebels just as they were being compelled at the point of rifles to write letters to friends in the capital asking for ransom money.

They were captured by the rebels and taken to a camp near Amatlan. Their captors had insisted they were probably spies or newspaper men and in either case they stood to be shot.

## MORGAN DIDN'T GIVE HALF ENOUGH

GOV. MARSHALL SAYS MONEY KING A TIGHT WAD IF HE GAVE ONLY \$100,000

### HE MADE \$69,000,000

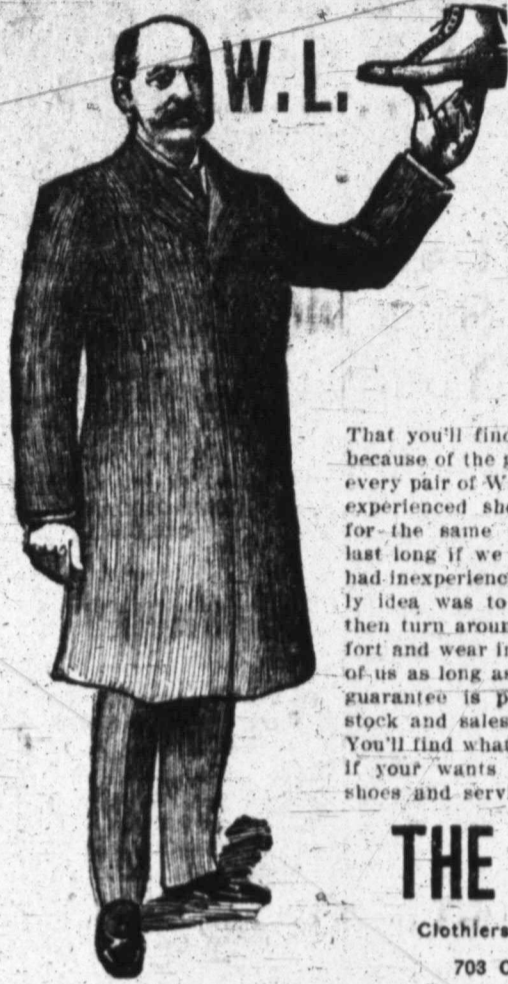

Vice Presidential Candidate Says Roosevelt's Fight Against Taft is a Personal One

By Associated Press. Worcester, Mass., Oct. 3.—"I read in the morning papers that Morgan gave \$100,000 to the Republican campaign fund," said Governor Marshall of Indiana, Democratic vice presidential candidate at a rally here today. "If that is all he gave, he is a tight wad. He did not give half enough. President Roosevelt gave the right in violation of the law to amalgamate the Tennessee Coal and Iron Company with the steel trust. That steel netted Morgan \$69,000,000."

Governor Marshall declared Col. Roosevelt's controversy with President Taft and Republicans was not a controversy of principle but of personal interests.

Beef So High Priced Mutton Must Become More Popular

In a very interesting discussion of meats, in the current issue of Farm and Fireside appears the following: "A conversation recently had with the very clever cook of a large institution seems to throw an odd sort of light on this subject. He remarked that they were using less meat than usual because of the high prices of cattle and hogs. When asked what about mutton? That's cheap enough, he replied: 'Well, I don't know; lamb chops are worth thirty to thirty-five cents, and our people seem to think that the animals consist entirely of chops, so that the dozen good dishes I can conjure up out of the cheap cuts never get a show.' This curious ignorance seems to be almost universal, for it is only among the more wealthy households and the better class of hotels that one meets with a good roast shoulder or a savory dish from the neck of a well fed wether or lamb. The leg of a well fed Down wether, treated exactly as a ham is and hung and smoked for winter consumption, is quite as sav-

BOSTON SUPPORTERS LAYING ODDS AGAINST N. Y.

Confidence in Woods' Pitching and Speaker's and Gardner's Batting Causes of Optimism

New York, Oct. 3.—Authentic information as to the extent of betting on the approaching world championship ball games, is impossible. It is known, however, that many Boston supporters have given New York enthusiasts odds as good as 10 to 7 on wagers that the Red Sox will defeat the Giants in the series.

Such odds, however, are an exception rather than a rule. Most wagers are even, with some New York enthusiasts undoubtedly giving odds to Boston men. Both clubs are finishing their league races with practically the same percentage of winning games. Detailed comparisons of individual work and team play show little advantage one way or another. The facts and the uncertainty which naturally surrounds a contest between two teams which have not been matched before, all lead to an evening up of the betting business.

Tendency of the Boston fans to indulge in the greater odds may be traced to confidence in Joe Wood's pitching, Speaker's and Carden's batting and all round team work. Also, perhaps to the fact that during the latter half of the season the Giants showed a great falling off from their earlier play.

Almost everyone known in baseball has volunteered to pick the winners beginning with the opposing managers themselves. Jake Stahl says that he believes he will bet that the Giants and John J. McGraw says he

expects to turn the trick, expecting much of his new pitcher Tesreau.

Connie Mack, who knows the Giants well from having led the Philadelphia Athletics against them in victory in the world championship last year, is certain that the Giants are doomed again. He is quoted as calling the Boston club the best balanced organization he has seen in 21 years. But Mack is an American League man.

Frank Chance and his Chicago Cubs were beaten by the Giants for the National League pennant, and the Chicago manager thinks that a sufficient guarantee that they will beat Boston. A parallel of similar guesses might be continued almost indefinitely with about equal showing of support.

Robatich's Mineral Water. Highly recommended by physicians and patrons who have tested its merits, for indigestion, catarrh of the stomach, kidney and bladder trouble. This water stimulates the secretory of the stomach, increases digestion and favors a more complete absorption of the food and prevents the action of germs that cause typhoid and other infectious diseases. This water can be purchased at all drug stores or delivered in jugs or cases. This well is located one mile south of Alamo school building in Florida. Light, two deliveries daily morning and afternoon. G. J. Robatich, Owens. Phone 1601-1 long-4 shorts.

REBEL'S MIXED ARMY

How Zapata Recruited His Followers in Mexico.

Every Outlaw and Fugitive From Justice Was Enlisted by "The Attila of Mexico," as Peons Call Him.

Mexico City.—When Zapata first recruited his followers they told me he had drawn to himself every outlaw and fugitive from justice who up to that time had been hiding in the Morelos hills or in the vast underground caves of Cacahuamilpa, near Cuernavaca.

Later, when Zapata and his men took Cuernavaca, Zapata opened the jail and penitentiary, and, putting a good rifle and a handful of cartridges into each convict's hands, he bade them help themselves to horses wherever they could find them. As there are several horse ranches and rich haciendas with celebrated racing studs in the immediate vicinity of Cuernavaca, it did not take long before all those new recruits were mounted on the best of horses, as was here to be seen.

After the great review of Zapata's bandit forces, Senor Madero committed the colossal blunder, as it turned out to be, of paying off all of Zapata's men for their alleged services in the Madero revolution, without putting an armed guard over them to see that they actually turned in their rifles and cartridges before returning to their homes.

The result of this was that Emiliano Zapata simply drew the sum of 50,000 pesos set aside for himself and his followers, without bothering to turn in more than a few stacks of arms, after which he announced that he and his men would not give any more arms unless they received twice the amount of the originally stipulated sum.

After this the misunderstanding between the newly constituted government authorities and the Zapata brothers grew apace. Zapata was summoned to the capital. He came reluctantly, surrounded by an armed bodyguard. In his brief stay at one of the principal hotels in Mexico City he livened things up by shooting out all the windows of the cantina because they would not serve him with drinks after 3 in the morning.

On the following day he and his companions commandeered some half dozen city taxicabs and rode back to Cuernavaca, about 75 miles away. After this Zapata and his men in Morelos became quite unmanageable so far as the newly constituted authorities were concerned. Francisco la Barra, Mexico's president ad interim, tried to temporize with the Zapata brothers for a while, after which Senor Madero, in his capacity as leader of the revolution, pending its election as constitutional president, made a special trip to Morelos to "smooth down" the enraged Zapatistas.

But the "smoothing down" did not last, for within a week Zapata's followers were "shooting up" the columns of regular soldiers who had been sent to garrison the most important towns of Morelos, in response to the frantic appeals of the bandit harried inhabitants of that state.

From this time forth the campaign between Zapata's bandit hordes and various expeditions of government forces has been in full swing. All this so-called "campaign" on the part of the Zapatistas, was marked by acts of unbridled murder, arson and rapine.

When the government forces resorted to savage reprisals, such as burning down villages, imprisoning women and children and hanging or shooting all men believed to be in league with Zapata, the warfare in these unhappy districts of Mexico naturally took a turn for the worse, and the whole region became almost uninhabitable.

The railway traffic between the capital and Morelos has been brought to a standstill since the recent hold-up and massacre of railway passengers and their escort of armed soldiers half way between the City of Mexico and Cuernavaca, when forty persons were killed.

Since this event several of the railway stations and bridges along the line have been burned down by the Zapatistas, only a few hours from the City of Mexico, so that the railway service between the capital and the states of Morelos and Guerrero has had to be suspended altogether.

BID FOR NAPOLEON RELICS American Museums to Be Represented at Sale of Villa on Island of Elba.

Boston, Mass.—Several American museums and private collectors of Napoleon relics will probably be represented at the auction sale of the villa of Sen Martin on the island of Elba. The house has thirteen rooms and contains all the furniture and other things used by Napoleon Bonaparte during his residence in the villa while confined on the island. The Napoleon museum will be included in the sale. The reserve price fixed by the present holders of the property is \$27,500.

TEMPLE TO RHODES

Empire Builder's Memorial Erected on Lion Preserve.

Table Mountain in South Africa is Where the Structure is Built—Beautiful View is Obtained From Spot—Made Road.

London.—The memorial erected to Cecil Rhodes on the slopes of Table Mountain is both magnificent and fitting. The site was always a favorite one with Rhodes, who believed that the view from the eastern spur of the mountain excelled any other prospect in the world for beauty. He made a broad road to it and placed a seat there. From it a very fine view is obtained of Table Bay in the Atlantic to the north and of Fake Bay in the Indian Ocean to the south, as well as the Cape Flats and the distant mountain ranges stretching for a hundred miles to the east and north.

Not far from this seat it was his intention at one time to build a great temple, as he called it, the object of which was twofold. He intended to make a huge enclosure for his lions, that they might be housed with the greatest possible freedom and amid natural and beautiful surroundings. The idea in his mind was that the lions, enjoying a large range of liberty and magnificently housed, would attract people to the mountainside, where art and nature together at their best must lift them out of themselves and inspire them with lofty thoughts.

Remembering that such had been Rhodes' imaginings on the mountainside, the memorial committee decided that the best form for the monument would be a temple dedicated to himself.

The monument has been built of the granite which forms the natural base of Table Mountain and has been worked to a texture which is not so fine as to be out of scale or harmony with its mountainous surroundings.

In front of the monument is the statue "Physical Energy," by F. Watts, R. A., representing a man reining in his horse after some great deed and scanning the future for his next achievement. It was not designed by

Cecil Rhodes Memorial.

Watts especially for Rhodes or his monument, but was presented as a gift to South Africa out of admiration for the genius of Cecil Rhodes.

Suggestions were made to place it elsewhere. But it was Rhodes' dream to make the Cape Peninsula the center of art and beauty in South Africa. It seemed natural, therefore, that this gift of the greatest of English artists should be placed in Rhodes' monument on Table Mountain.

The eight lions, four on either side of the long flight of steps leading up to the portico, are the work of the late J. M. Swan, R. A.

WOMEN IN 120 MILE PARADE

Suffragettes Have Plan to Boom Suffrage in 400 Automobiles in New Jersey.

Newark, N. J.—An automobile parade over a route 120 miles long is to be held in northern New Jersey under the auspices of the advocates of woman's suffrage. It is expected that 400 machines will be in line. The parade will start early in the morning at New Brunswick and disband after sundown in Jersey City. It will pass through Plainfield, Elizabethtown, Newark, Hackensack, Jersey City, Bayonne and other cities. At each town there will be brief open air meetings with addresses by women leaders.

DAM BUILDERS USE BEAVERS

New Mexico Company Hopes to Get a Reservoir Without Cost to Them.

Santa Fe, N. M.—The revival of a custom followed by many pioneer ranchmen in the west, that of employing beavers in the building of dams, is announced by the Santa Fe Light and Water company. The first pair of beavers obtained by State Game Warden Thomas F. Gable will soon be put to work on the Santa Fe dam.

It is expected that the beavers will build a series of small dams along the stream so that water may be conserved during the rainy season.

Dies From Micegoups. New York.—After Hiccoughing for five weeks, George Washington Stewart (Colored) has just died at the General hospital.

A bulldog with a gold tooth and another set with a diamond is in pawn in New York.

MEN'S FURNISHINGS!

We were never quite so well prepared to supply your every want in the Furnishing Goods line as we are this season. The stock has been improved in every detail. ## FREAK SHIPS OF NAVY

OLD MONITOR WAITING FOR AUCTIONEER

**W**HEN the Monitor steamed in to Hampton roads half a century ago and played "Dellah" to the Merrimac's "Samson" an important era in the life of the confederacy, also in naval architecture, was marked.

The United States began building more monitors with feverish haste. Wooden sloops, cruisers, corvettes and frigates were hurried into the discard. A navy wasn't the real thing unless it had a lot of queer looking ironclad vessels resembling "the cheese box on a raft."

Naval historians say that the building of the Monitor was an illustration of the adage, "Necessity is the mother of invention." The United States was threatened by an unconquerable iron coated foe. A new style of fighting craft was needed. Ericsson heard and interpreted Mother Necessity's call. The Monitor was the result, says the Kansas City Star.

All well and good! But Ericsson's success caused a score of embryo naval designers to strain their eyesight and bearing searching for another Mother Necessity. Navy departments, admiralty offices and ship-building firms were besieged by architects. Specifications for all sorts of odd appearing war vessels were produced. Most of these met a prosaic death in the waste paper basket; many got as far as the experimental stage; some were actually built and launched and once or twice the sea-going military establishments of the world have been given hair raising scares.

Two Notable Marine Freaks. The Katahdin and the Vesuvius were the names selected by the United States for two of its more noted sea freaks. Both were radical departures from accepted naval construction. Both were expected to revolutionize naval warfare. And both failed.

Rear Admiral Daniel Ammen was responsible for the Katahdin. He lived and died believing that he had given to his country its most valuable weapon of defense.

Admiral Ammen was a studious sort of a chap. He was interested in his profession. He knew how seamen had fought and how ships had been built since the days of Phoenicia. Particularly he liked the methods used by the valiant sea fighters of Rome. He was impressed with their naval architecture, the sharp ramming beaks on solidly built craft.

Why, the admiral probably reasoned to himself, could not this ram be used in modern warfare? He began a quiet search for Mm. Necessity. He took the ram idea of the Romans, the armor plated idea of his own day and the compact machinery plan of Ericsson and began work. He rolled and hammered and welded these three ideas together and produced the Katahdin.

"It won't work. It is impractical," said the navy department officials. Then Admiral Ammen smiled and began to explain his theory. Ammen coated, exported, demanded and brought. Also he persisted. The navy department said go ahead. The Katahdin was built.

The ram looked like a cross between a great lake whaleback grain boat and a water logged cigar of monster proportions when it was launched in 1889. Then for four years the Katahdin was put through all the trials naval officers could devise. The boat did everything its inventor claimed. The government paid \$300,000 for the Katahdin and then waited for an enemy to humiliate.

In 1898 Spain balanced a husky chip on its shoulder. Uncle Sam promptly slapped it. Here was the Katahdin's opportunity. Along about March, 1898, things looked pretty dark for the United States navy. Spain's fighting ships still had considerable standing. Great things were expected from the Katahdin.

"We have in our navy," one enthusiast declared, "one boat which alone could fight the whole much vaunted Spanish fleet." He meant the Katahdin.

But the Katahdin was a failure. It was designed to chase an enemy into a corner and then puncture a hole in the side of the hostile ship with the 400,000 ton blow the Katahdin ram could deliver. Of course the enemy would fight back; but the conical armored deck of the Katahdin was made to shed shells like a duck sheds water.

It took only a few days to learn

that the Katahdin couldn't steam fast enough to ram a rowboat and, most any old popgun could punch holes in its armor before it got under way. In addition the ram was not seaworthy.

**Vesuvius Terror of the Navy.**

So the skipper of the Katahdin brought his boat back to Washington navy yard and the junk pile. The ram became a curiosity of naval construction instead of a revolutionizer of naval warfare.

Quite recently the Katahdin met a prosaic end by acting as a target for a new style of naval artillery.

The Vesuvius came nearer fame. It was launched in 1886. The Spanish-American war also heralded its death. The Vesuvius was a dynamite cruiser. Its weapons were three bronze tubes projecting amidships and forward. From these tubes dynamite shells containing 250 pounds of gun-cotton were hurled by compressed air. It was expected that a few of these monster charges would destroy a whole continent.

And they might have had the Vesuvius been able to fire accurately. The tubes were immovable and the only way to aim was to point the ship at the target and then regulate the air pressure. In the language of one naval expert, "Sometimes we hit the island of Cuba."

The Vesuvius saw real war service in 1898. It has the Katahdin's record beaten. The Vesuvius would sneak close in to shore at night near Santiago and fire a few dynamite shells. They made a frightful noise when they exploded and won the sobriquet of "the earthquake maker" for the ship, but nothing more.

To quote a naval officer: "The Vesuvius was turned out to be the terror of the seas and the bismarck the terror of the American navy."

Officers were afraid the dynamite magazines would explode in a heavy sea.

### CLING TO THEIR PRIVILEGES

Ambassadors Enjoy Many Rights That Have Been Accorded Them for Centuries.

"Ambassador" and "minister" mean pretty much the same to the average man, but there is a very great difference between the two, inasmuch as an ambassador possesses many privileges abroad that do not pertain to a mere minister.

Perhaps the most curious privilege of an ambassador, who is accredited to the ruler of a country and not merely to the government thereof, as is a minister, is that the ambassador may when dismissed turn his back to the sovereign to whose court he has been assigned. Briefly described the mode of procedure is as follows:

When the audience is at an end the ambassador waits to be dismissed by the sovereign. When dismissed the ambassador bows, retires three paces, bows again, turns on his heels and walks to the folding doors. But when the reigning sovereign is a woman a more polite method is employed. To turn his back would be to resign a privilege; therefore the ambassador retires sideways. He keeps one eye on the sovereign and with the other he endeavors to find the door. By this unique means he contrives to show all politeness to the sovereign and at the same time retain his ambassadorial privilege in retiring. Another privilege of an ambassador is that of being ushered into the royal presence through folding doors, both of which must be swung wide for him. None save an ambassador can claim this privilege, the greatest favor in this respect that can be shown any non-ambassadorial representative consisting in the opening to him of one door only.

There is one privilege of the ambassador, a privilege that sometimes occasions great inconvenience to the ruler, which consists of his right to demand admission to the sovereign by day or by night.

"Tantalize the Flowers." Coming home the other day in a rush of excitement, Doris rushed to her mother and said:

"Oh, mamma, guess what we are going to do?"

"I don't know, dear, but I hope it is nothing dreadful."

"We're going to study botany, and next Saturday we are going out to the woods to tantalize the flowers."

This summer on the Rockefeller grounds. "I thought you might need the money," wrote the boy.

## FINDS FLIRTATIONS A CONSTANT JOY

Husband of a Flirt Says Early Adulthood of His Wife Has Never Ceased

(London Globe)

"I didn't marry a flirt. She really married me. But that is quite beside the point. The question is, why did I allow myself to succumb sufficiently as finally to be led to the altar?"

Well, there were several reasons for my "leading;" but the principal one, to be perfectly candid, was my wife's reputation for being that "abandoned creature"—looked askance at by every match-making mother with plain daughters—a flirt.

In old days her reputation in this particular art was firmly established. Didn't I suffer from it in those breathless moments of alternate hope and despair, when every single eligible man within a radius of twenty miles was favored with exactly the same kind of smile from her laughing eyes as I was? Wasn't her reputation perfectly apparent on those never-to-be forgotten afternoons when I turned up to play "singles" only to find half the fellows of the neighborhood already there, at her invitation presumably with no other object in view than to spoil sport?

Wasn't the fact impressed upon me—but I could go on forever. She was a flirt—there is no matter of doubt about it; a perfectly unashamed little hussy!

And that early adroitness of my wife still fills me with a joy that is keen, rendered doubly sweet by the thought that it was I—who snatched her from the others after all.

And that keen joy isn't diminished by the faintest tittle—indeed, rather increased—by the fact that the girl I married is still a flirt. This very trait in her character drew me to wards her in the days that are gone, and it draws me towards her still.

My wife must flirt with someone, so she flirts with me. We have never yet reached that joy-trot stage of married life about which enthusiastic lovers are invariably warned by "optimistic" friends.

And pray heaven we may never reach it if the present fascinating state of affairs is to cease. For instance, in some subtle way all her own, my life-partner even now—and we've been married quite a ridiculous number of years, and have three kiddies shooting their way up—still keeps me eager to know her opinion on such and such a subject. I don't know how it's done; I only know it's vastly entertaining.

The fact of the whole matter is, I believe, that she never takes me "for granted." Do you know what I mean? She never appears to think I owe her a debt of affection because I'm married to her, which—such is the general cussedness of my nature—makes me always want to give in to her more than ever.

There is another little thing, too. Her very flirting taught her the value of men just as continued shopping has since taught her the value of foodstuffs. She was therefore able in those bygone days, to discriminate perfectly soundly between the good, bad and indifferent characters of the men who surrounded her. So that when she finally made her choice, it was done—clearly and forever.

I do not feel that carking fear which other men have confided to me—the men with wives who have never mixed with a crowd of male acquaintances, and whom they are afraid to trust with another man, lest the girl may discover some unsuspected sympathy which does not exist between her and the man she married.

Parasol—To determine whether a bond issue of \$80,000 shall be issued for the building of roads in Frio county, a special election will be held December 7th.

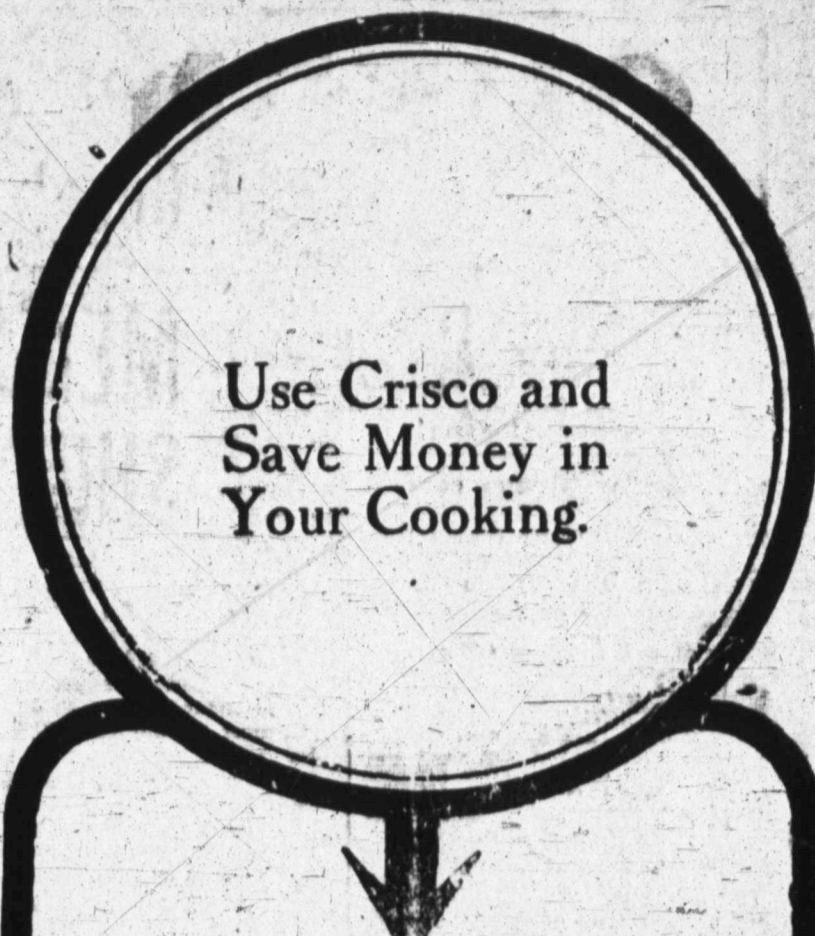

## CURIOUS BITS OF HISTORY

AS WELLINGTON EXPLAINED WATERLOO.

By A. W. MACY.

Military dispatches are usually very formal, and necessarily so; for it would hardly do to allow officers to exercise great freedom of language, especially in reporting battles. At the same time the non-military reader would understand such reports better if they were couched in less formal language. Shortly after the battle of Waterloo the Duke of Wellington wrote this to a friend, and we have no difficulty in understanding what he means: "You will have heard of our battle of the 18th. Never did I see such a pounding match. Both were what the boys call 'gluttons.' Napoleon did not maneuver at all. He just moved forward in the old style in columns, and was driven off in the old style. The only difference was, that he mixed cavalry with his infantry, and supported both with an enormous quantity of artillery. I had the infantry for some time in squares, and I had the French cavalry walking about as if they had been our own. I never saw the British infantry behave so well."

(Copyright, 1911, by Joseph B. Davies.)

Use Crisco and Save Money in Your Cooking.

Phones 432 and 232

Now that the cool weather is advancing you will use more fried food than usual. There will be meats, potatoes and other dishes that will require a good cooking oil or grease. You will find in Crisco, the famous cooking oil which comes in hard form in cans the most desirable for all purposes. There is no odor nor taste, just pure, wholesome vegetable oil. It looks like lard but is more of a cream color. You can use it over and over again as it does not discolor readily and does not absorb odors. It comes in two sizes of cans at 60c to \$1.15 per can. Get used to it and you will undoubtedly use it in place of either lard or butter and you will save much money.

Wichita Falls, Texas, Oct. 3, 1912.

303 WICHITA FALLS 303

Of course, all of us should lay a little aside for Christmas, but let us bear in mind that the tax collector's books are now open, and we who want to vote at the elections next year should do our poll-tax shopping early.

There are fields of cotton within a mile of Wichita Falls that are good for a bale per acre. This cotton, however, is in the irrigated district, and the Times only makes mention of the fact that those who have no faith in irrigation may notice the difference in cotton that has been irrigated and that that has not.

Dr. Elliot, president emeritus of Harvard, is also for Wilson for president. Not only that, but Dr. Elliot says Mr. Roosevelt is unsafe and peculiarly unfitted for a third term, while Mr. Wilson's knowledge, experience and temperament fit him to deal safely and wisely with the great problems that are likely to come before him for action, should he be chosen president of the United States. While a nonpartisan, Dr. Elliot usually votes the Republican ticket. Thousands like him will vote the Democratic ticket this year.

If Wichita Falls secures a new charter, she can then vote a sufficient amount of bonds with which to make public improvements that are essential to the growth and prosperity of the city. It is a matter for the property owners to decide, and if the Times is not mistaken they will act favorably upon it when the opportunity shall present itself. As to whether the new charter to be applied for shall call for an aldermanic or commission form of government, will also be decided by a vote of the people, and while they are by no means a unit on that proposition, it need not be feared that the minority will join with the majority in their efforts to make a success of either form of government that is to be decided upon. The success of either depends a great deal on the character of men that are selected to carry out the things to be provided for in the new charter to be adopted. There is by far a greater chance of making a mistake in the selection of men, than there is in the character of government, and it might be well to provide in the new charter a clause that will result in the quick removal from power any officer whether elected or appointed, who proves unfaithful to his trust.

He will never again be president, but all the same Mr. Roosevelt has a way of his own in saying and doing things that are distinctively original. The other day while making a speech at Knoxville, the crowd apparently, was not one that was in sympathy with him, and an attempt was made to howl him down. They kept up the noise for fifteen minutes, but the Colonel finally silenced his disturbers and did the job neatly. Among the turbulent element was one fellow of loud voice who could make himself heard above all others, and the ex-president, standing with his arms folded and with his teeth showing like the bowls of two rows of teaspoons, finally spotted the noisy fellow, and pointing his finger straight at him, said: "Your voice is all right; but I am trying to appeal to your intelligence." From that time on the fellow was silenced and the ex-president was permitted to finish his speech without interruption. Another instance of this nature took place in a Dallas opera house years ago at the time Senator Tillman of South Carolina was delivering a lecture. In the audience occupying a front seat was a fellow who had taken it upon himself to interrupt the speaker at every opportunity, very much to the disgust of the great majority of the audience. Finally, a man who had become thoroughly weary of the disturber, called to Senator Tillman to pitch-fork the Smart Aleck, but the Senator quietly assured the gentleman that such an implement was unnecessary for such a small game, and pointing his finger directly at the disturber, said: "I can dig all

the 'aters in that bill with a teaspoon." Shortly after this pointed remark the Smart Aleck fished his hat from under his seat and sneaked from the house. It served him right, and was only another instance going to prove that the man who attempts to interrupt a public speaker generally gets what is coming to him.

Press dispatches indicate that Congressman A. S. Burleson was the author of the injurious newspaper law recently passed by Congress, and the inference is drawn that Congressman Bob Henry approved it, as he was chairman of the committee under whose inspection it came. If the law proves as unpopular as it now appears it will, these two Texas congressmen will distinctly and frequently be remembered by the Texas editors and when they again go before the people for re-election, their paths will be strewn with something else than roses. Newspaper men can scarcely be expected to indorse a law that requires them to make public their private affairs any more than would the merchant, the banker, or the farmer. There may be evils and abuses in the newspaper business that need correcting, but the evil doers should be selected and the honorable men left alone. It is not believed that Congress intended to thus punish the country newspaper man, but through some congressional blunder they were all put in the same class—Childress Post.

The old idea that the circulation and ownership of newspapers is private property is rapidly becoming obsolete. Only those newspapers which are afraid to have their true circulation or ownership known can have any objection to the new law and The Times for one is sorry that the effectiveness of the new law has been weakened by the attitude of the postmaster general. The people have a right to know who own their newspapers and certainly no reputable publication can object to making its circulation known. Congressmen Burleson and Henry deserve praise for the enactment of this law.

### MARSHALL AND TAFT

AT BANQUET  
Boston, Mass., Oct. 3.—Gov. Thomas R. Marshall of Indiana, the Democratic candidate for the Vice Presidency shook hands with President Taft last night just before the banquet of the supreme council of Scottish Rite Masons, at which both were guests. The meeting took place at the hotel in which Gov. Wilson of New Jersey greeted the President last Thursday night.

President Taft joked with Gov. Marshall for a few moments on the wear and tear of campaigning and then both passed into the banquet hall, where they stood side by side in the receiving line and shook hands with the diners. The President motored into the city from Beverly, laid the cornerstone of the new Young Men's Christian Association and attended the Cambridge carnival.

Fifth Death From Explosion.  
Newport, R. I., Oct. 3.—The fifth death, that of First Class Fireman J. Delaney, due to the explosion of the steam chest of the torpedo boat destroyer Walko on last Tuesday, occurred today.

Completing the Ticket.  
Syracuse, N. Y., Oct. 3.—With Congressman William Sulzer named for governor, and Martin H. Glynn of Albany chosen for lieutenant-governor, last night, the delegates to the Democratic State convention met today and selected the remainder of the State ticket.

Woman's Misdirected Talents.  
Ex-Chief of Police Byrnes, the famous New York detective, says that he "never knew a better man" than Miss Ellen E. R. Peck, which, translated from the police vernacular, signifies that in all his varied experience he never had to do with a more skillful swindler than the woman, now in her eighty-second year, whose latest sentence of ten years imprisonment was being commuted by Governor Dix. She would probably have made a first-class "captain of industry" if her talents had been so directed.

## Colonna Garments

Autumn Ready-to-Wear Garments For Women

The past week has been one of the busiest ever experienced in the Ready-to-Wear and Millinery Sections, one of the many pleasing features of the week's experience is the large demand for our special \$25.00 Tailored Suits. These suits were made up especially for us and are being sold on a very close margin of profit. It is impossible to form any adequate idea of these garments from any description that can be given of them. They must be seen to be appreciated.

SCHOOL CHILDREN'S Eyes should receive attention. We Know How. DR. J. W. DUVAL

### Now There are Two Kinds of Velva Syrup

The Velva in the green can that you've always liked so well and the new Velva in the red can that will delight you from the first taste.

### The New Velva Breakfast Syrup In the red can

Is a fine flavored syrup for eating on griddle cakes, waffles, etc., also splendid for making candy and fudge. In fact, it may be used with confidence of success in any dish that requires sweetening. Your grocer has the two kinds. Try a 10c can of the new Velva with the red label.

PENICK & FORD, LTD.

#### How Far a Baseball Can Be Made to Curve.

Hugh S. Fullerton, an expert on baseball, writes an interesting article in the October American Magazine entitled "The Physics of Baseball." On the subject of how far a baseball can be made to curve, he reports the following experiments:

"Perhaps the most frequent question asked of a baseball writer is, 'How far can a ball be made to curve?' Of course they mean by a normal pitcher not using mechanical assistance. I never have been able to find the limit of the curve, nor indeed, to calculate the curve accurately, although I have made some experiments. I refer to the actual curve of all the ball due to its rotary motion and air resistance. I do not think that the real curve of the ball in 60 feet (distance) from the pitcher's hand when he releases the ball to the home plate can be more than twenty inches. I have heard ball players declare the ball curves from six inches to five feet. I tried it before with Orval Overall, who had, I believe, the most sweeping and widest fast curve ball I ever saw.

"We placed twelve big sheets of paper between staps, eight of them at short intervals over the first fifteen feet in front of the plate, the rest scattered at wider intervals up to the last one was six feet in

front of the pitcher's slab and, to my surprise, his hand struck the paper as the ball was released, proving the actual distance of the pitch is much shorter than usually supposed. Of course Overall's reach was much greater than the average, but I do not think the actual pitching distance from hand to plate is more than 56 feet.

"Overall pitched his wide overhand curve. The ball entered the first sheet four feet to the right of the center of the two plates at a height of five feet, and almost six feet above the ground (he was pitching off a slight elevation). His hand hit the paper and tore a hole a foot lower, showing he had released the ball before his arm reached the extreme limit of its swing. The ball went through the second sheet, which was ten feet from the first, just four inches lower than through the first and a little over two and a half feet from the right of the line. It was less than a foot from the line when it struck the first of the eight sheets placed closely together in front of the plate, and it tore through the next one a trifle higher. Then it began its true curve. Nine feet in front of the plate it broke and went downward and outward and crossed the sheet at the home plate ten

inches above the ground and nearly twelve inches to the outside (that is, for a right handed batter) of the center of the plate. The ball had dropped five feet two inches downward, through the force of gravity, the angle at which it was pitched and the curve, and had angled and curved practically five feet. The closest calculation we could make was that the ball actually curved, as a result of its rotary motion, approximately seventeen inches.

"The air resistance, which was disputed at the time of Tyng's experiments, has, of course, become a known factor with the study of the science of aeronautics. The amount of resistance can be computed closely by the use of the barometer. The ball curves in the direction in which it revolves. The amount of the curve depends upon the rate of rotation and the weight of the air. The entire science of pitching consists in the deft application of friction upon some point of the ball which makes it rotate in a certain direction, or which counteracts its natural rotation and cause it to wobble or float with little revolving motion. The slow balls, fadeaways, knuckle balls, all have as their object the prevention of rotary motion, or to give false rotary motion or reverse English."

#### ABOUT RIVERS.

In a river which changes its channel every point gains ground and every bend tends to become still more crooked.

The Palana, of Brazil and Argentina is 2200 miles in length, and after the Amazon is the largest river in South America.

The Orinoco is only 10 miles in length, but is much larger than might be supposed, owing to the heavy rains of the tropics.

We have in Alaska one of the greatest rivers of the world, the Kwichpak. It is believed to be more than 1800 miles long.

The Amazon is 3944 miles in length rising within seventy miles of the Pacific ocean and flowing clear across the continent.

The Amoor, the greatest stream of China and Siberia, is 1500 miles in length but for nearly nine months in the year is ice-bound.

The Hoashoo, or Yellow river of China, is 2800 miles in length and drains a territory equal to one third the area of the United States.

The Yang-tee-Kiang river of China is 3,000 miles long and navigable for good-sized vessels for more than two-thirds of that distance.

The Volga is the greatest river of Russia, having a length of 2,300 miles and draining nearly one-half of European dominions of the Czar.

The St. Lawrence river is only 775 miles long, but if the lake system be also taken into account its total length will exceed 2,000 miles.

The San Francisco, a river of Brazil is 1,400 miles in length, and was so called because it was discovered on the feast day of St. Francis.

The Mackenzie, the principal river of the Dominion, is 2,500 miles in length and drains an area equal to one-half of the United States.

The Euphrates is 1,780 miles in length. Most of its lower course is through a sandy desert, and for several hundred miles is has no tributaries.

The ancient historians say that over 1,000 miles of the Lower Nile were protected by artificial embankments and other works of engineering skill.

The River Thames at London is from a quarter to a half mile in width but bears on its bosom more commerce than any other stream in the world.

The Indus, the second sacred river of India, is 1700 miles long. Its waters have always been considered almost as holy as those of the Ganges.

The Ohio River is 875 miles long. From the source of its longest tributary to the junction of the Mississippi the total length is nearly 1500 miles.

River water purifies itself. A few miles below a large city no trace of impure matter can be found in the waters of a river into which its sewers empty.

The Nile mud, which renders Egypt a habitable country, is said to bear a striking resemblance to that which every season is brought down by the Missouri.

#### The Great Salt Lake

The Great Salt Lake is two feet lower today than ever before known in the history of Utah, and according to competent observers it is rapidly changing its chief characteristics and turning into an inland sea of fresh water. Every fall the lake is several feet lower than in the spring, but this such an extent that many of the bathing pavilions and bath houses are left and dry upon the beach. It has always been believed by experts that the lake had an underground outlet, but no explorer has yet been fortunate enough to discover any. It is supposed, however, that outlets exist, and that during the last six months they have gained noticeably upon the springs which supply the lake. On the northern slopes of the lake's shores and down the western border are numerous less springs which have always run pure brine into the inland sea. These springs evidently run through immense rocks in the earth, and by washing through them they make the spring water intensely briny and the time it reaches the surface. There have been signs of a change in the springs in recent years. Several times they have ceased to flow a rapidly as usual, and the water they poured up appeared fresher. They have now become partly choked up, either with rocks or salt, and they no longer give the same supply of salt water as they did years ago. In several other places—notably on east Antelope within 15 feet of the brimming lake basin—there are many fresh water springs that gush up at all seasons of the year and pour into the lake.

The fresh water springs have become larger and more powerful since the salt water springs became choked up and it is supposed the underground reservoir of water, diverted from its usual course, is now seeking adequate outlet through the springs where no salt took exists.

If this theory is correct, the Great Salt Lake will gradually turn to fresh water, and the surface will continue to fall until the winter and spring freshets from the mountains fill it again. This additional water will add no salt to the great sea, but make it fresher than ever. It has been well known for many years that the Great Salt Lake is fresher in the spring than in the summer, and the phenomenon is probably caused by the addition of great quantities of water from the snows and streams of the mountains. Those engaged in manufacturing salt on the lake say that it takes six gallons of water to make one gallon of salt in the summer and fall, but that in early spring it often takes seven

and even eight gallons to make the same quantity.

There are three large streams emptying into the Great Salt Lake—the Bear, Weber and Jordan rivers—but they make no appreciable difference in the saltiness of the lake, except early in the spring, when they carry the melting snows of the mountain down to the lake. So long as the underground springs of salt continued to pour their brine into the lake it required an immense volume of fresh water to neutralize them.

The Great Salt Lake is seventy miles long and fifty miles across its widest part, and it has an area of 2,000 square miles. Another peculiar change that has taken place is the gradual upheaval of the bottom. In recent years its greatest depth has not exceeded 40 feet, while the average depth is only from 12 to 20. Fifty years ago the bottom could not be sounded in places, and lines 100 feet long failed to strike the bottom.—Philadelphia Times.

#### Allendale Notes.

Cotton picking is still the popular work in Allendale. Most farmers have quit plowing as the land is too dry.

Mr. and Mrs. Floyd Billingsley came out Saturday evening to spend the week with his parents, Mr. and Mrs. W. P. Billingsley.

Miss Hattie Gwinn has returned from Fort Worth, after an extended visit with friends.

W. L. Sweeting returned Sunday from Haskell and other western points where he had been on a prospecting tour.

Mr. and Mrs. D. A. Allen spent Saturday and Sunday with friends and relatives in Wichita.

Mr. and Mrs. W. H. Gwinn and family spent Sunday with Mr. and Mrs. R. A. Crowell of the Bowman neighborhood.

A large crowd of young people enjoyed the singing at the church Sunday evening.

No Me's Dandruff or Falling Hair. Men and women—do you want a splendid head of luxuriant hair free from scalp itch and dandruff?

Do you want a scalp as immaculate as that of the admiral of all who see it? Do you want a scalp as immaculate as that of the admiral of all who see it?

If you do, get a 50 cent bottle of PARISIAN Sage today at dealers everywhere. The girl with the Auburn hair is on every carton and bottle—ask for PARISIAN Sage and see that you get it. Foshage & Lynch guarantee it.

Deeds Filed For Record. D. P. Woodward and wife to C. E. Mendle, lot 7, block 167, \$500.

J. B. Marlow to J. W. Stone, all of lots 20 and 21, block 75, and an individual half interest in lot 23, block 15, \$112.50.

J. B. Marlow to J. W. Stone, 30 acres of the S. L. B. Jasper survey, \$350.

Floral Heights Realty Co. to T. S. Freeman, lots 2 and 3, block 162, Floral Heights, \$310.

A piano stool containing leaves that can be spread to hold two persons has been patented by an Illinois man.

**REMINGTON-UMC**

**AUTOLOADING SHOTGUN**

For singles—trap or field—just toss in a shell, press the button and—"PULL." The side bolt makes it easy. You don't have to tug at the barrel or watch an on-and-off device. The action stays open after each single shot is fired—it always stays open when the magazine is empty. Five shots—three to get the cripples—each under absolute control of the trigger finger. The recoil reloads for you—kicks another shell in; takes the strain off the gun—the discomfort out of the kick—all without diminishing the drive behind the shot.

Simple take-down—a few turns of the readily handled magazine screw-cap makes cleaning, carrying and inter-change of barrels quick and easy.

Send for a motion picture booklet telling how the kick is used—how a friction device found only on the Remington-UMC Auto-loading Shotgun takes the punishment out of heavy loads.

Write to-day.

**REMINGTON ARMS-UNION METALLIC CARTRIDGE CO.**

299 Broadway New York City

#### SCHOOL DISTRICT LIMITS MAY BE EXTENDED

Industrial Addition Will Be Included In the Proposed Extension, According To Plans

An extension of the limits of the Wichita Falls independent school district is among the plans of the school board for the near future. It is learned, the extension being planned to take in the industrial addition near the glass and automobile factories. Practically all of the houses recently constructed there are now occupied, with many children, and these will be with inadequate school facilities unless they are permitted to attend the city schools.

If the new charter, as approved by the voters, provides for the taking over by the city of the control of the schools, different arrangements for the factory addition will probably be necessary.

Since the talk of the city's taking charge of the schools began, many have understood this to mean that the school board would be abolished and the schools managed by the city council or commission. This is not contemplated at all; the only result of the change would be that the schools would have their taxes collected by the city instead of independently, and the management of the schools would remain with the school board.

Beaumont—The Southern Rice Growers Association recently sold 6592 sacks of rice. The rice crop in this vicinity is averaging twenty sacks per acre.

#### ANDERSON PROMOTED TO WALTON'S PLACE

Will Be General Superintendent of the Katy Railway System.

Denison, Texas, Oct. 3.—Official announcement was received in Denison this afternoon from Dallas that H. P. Anderson, superintendent of the Katy North Texas division with headquarters in Denison, had been promoted to the position of general superintendent to succeed J. W. Walton, who resigned last Monday.

Mr. Anderson came to Denison July 14 from San Antonio, where he had been connected with the Southern Pacific for about 25 years as trainmaster, superintendent and general superintendent. Mr. Anderson is in Dallas but is expected to arrive here tonight. No announcement has been made as to who will succeed Mr. Anderson.

Benefits Local People. Wichita Falls people have discovered that A SINGLE DOSE of simple buckthorn bark-glycerine, etc., as compounded in Adlerika, the German appendix remedy, relieves gas on the stomach and constipation AT ONCE. Foshage and Lynch sell it.

Greenville—Forty newspaper men of Northwest Texas met here recently and organized what is known as the Northwest Texas Press Association. The meeting was called by Harvey P. Nelson, editor of the Greenville Banner, who started the movement.

# Three Days Only Thursday, Friday and Saturday 3d, 4th, 5th

We offer you choice of Thirty Pieces New Fall Woolens, for Suits or Overcoats, made to your order; our regular \$22.50 Woolens, at

## \$18.00

## There Was a Man In Our Town

and he was Wonderful Wise— You couldn't fool Him, Oh No!

He had drank coffee for years. Coffee didn't hurt him.

### But the Bump Came

Many a man is pretty sure that while coffee may hurt others it don't hurt him— till the bump comes.

But when headache, frazzled nerves, an irritable heart, indigestion and sleeplessness begin to "get him," he's apt to look around for a reason.

#### COMES A TIME

When Coffee Shows What It Has Been Doing.

"Of late years coffee has disagreed with me," writes a friend from Rome, N. Y.

"The highest punishment being to make me 'loopy' and dizzy, and it seemed to thicken up my blood.

"The heaviest was when it upset my stomach completely, destroying my appetite and making me nervous and irritable, and sent me to my bed. After one of these attacks, in which I nearly lost my life, I concluded to quit the coffee and try Postum.

"I went right to the spot, it not only a most palatable frothing beverage, but a food.

"All my ailments, the 'loopy' disease, the unsatisfactory of my blood, my nervous irritability disappeared in a few days, and my sorely afflicted stomach began quickly to recover. I began to rebuild and have steadily continued until now. I have a good appetite and am rejoicing in sound health which I owe to the use of Postum."

Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pgs. "There's a Reason."

The reason is plain when a change is made from coffee to

## POSTUM

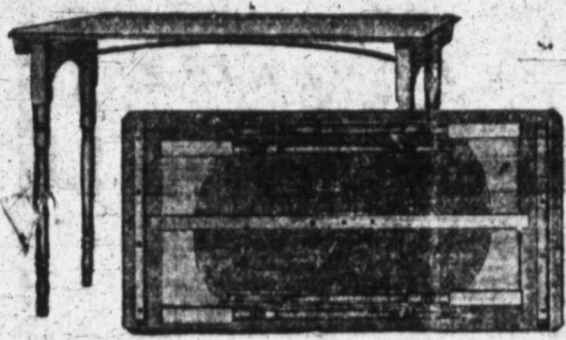

It drink much resembles real coffee, but is free from "caff" or any other harmful

Postum, made from choice Northern wheat and the juice of Southern sugar cane, has put many former coffee drinkers on the Road to Wellville.

## Harvesting the Bumper Wheat Crop of the Northwest

Threshing

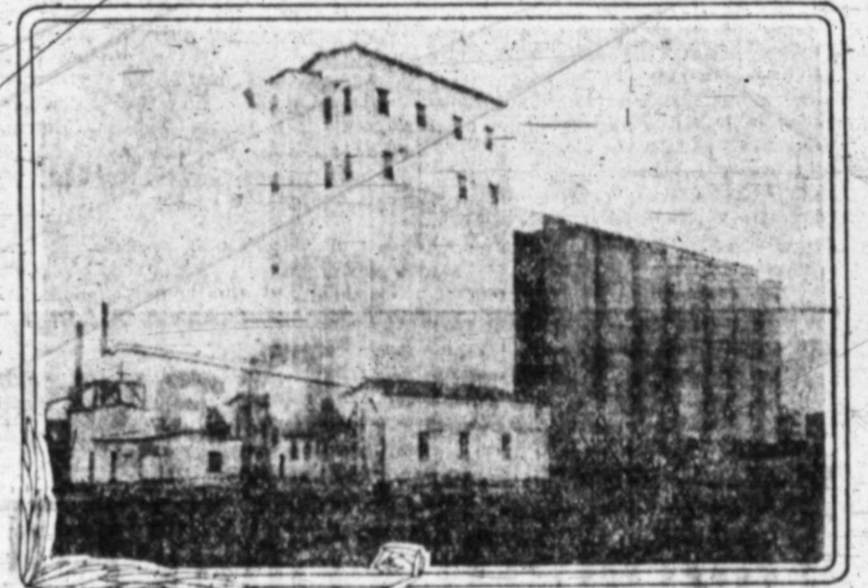

One of the Largest Flour Mills in the World

Through the Soo by Moonlight

The Harvest

New Style Elevators Concrete Tanks Reinforced by Steel

Sixty thousand men are wanted in wheat fields of the Northwest. This is the cry that has just gone up and with it went demands for thousands and thousands of bales of twine, for railroads to move cars so that tracks might be unobstructed and the great wheat trains rushed to their destination so that the bumper crop of the Dakotas and Minnesota may be cared for. Never has there been such a year as this. The small and big farmers have put forth grain that runs more to the acre and of better quality than in years and this will effect the whole country. Wall street, bankers, transportation companies, as well as the growers are concerned in the harvest outcome and a sixty-acre field of oats or wheat that yields over eighty bushels to the acre is something in which the farmer himself is concerned.

It also means work, work, work for a short time and with rapidly for many men, and hence state employment agencies, as well as labor bureaus issued frantic calls for aid. Then the cry for twine, more twine went up, from counties that only had about a third enough for the heavy crops. More than this conditions this year have been wonderful favorable. The grain is of the first quality, and hard. Hail and wind have done little damage. Even Montana, a dry, farming state, had big crop and all through the Northwest, East of the Rockies, telegrams were sent to the railroads asking for help in getting men to work for free transportation and every facility for shipping. And the West responded. Prosperity on the farm touches many hearts.

Think of walking through acres and acres of grain and hay that come over one's head! It is a bumper crop this year, and those who have been watching in terror for the dread black rust are rejoicing that prosperity reigns. In fact never before has there been such calls for men, skilled and unskilled labor in the fields and the records of the Northwest have been broken. Last year the Dakotas suffered poor crops and hence men hastened to the fields this year, but this same territory has made good as never before and all the men from every direction that Minneapolis, St. Paul, Duluth and Chicago could send found work and plenty of it. For fear that there might be a car shortage for this bumper crop the railroads worked night and day. Construction work was stopped in various places, roads were cleared and coal dealers were asked to ship their product before the rails were needed for the grain.

For weeks men poured into the Dakotas and Minnesota from the South, for first comes the barley and oats to harvest, then the wheat. They came from Kansas, Missouri, Nebraska, through Iowa to South Dakota and then North Dakota and Minnesota and still they were needed, and laborers came from mines and lumber camps to help out. Those who arrived first were put on the hay fields and from these they passed on to the barley and wheat. These men earn one dollar

and seventy-five cents a day, sometimes three dollars, and get their board. The farmer's wife knows this for they have big appetites, these men who work in the fields all day in the sun, and cooking is going on constantly in the farmers' home. Experience is not necessary, though old hands get better pay, but one feature of this bumper crop was that if a laborer started for the fields and found he was not needed, he could pass on to other localities and shift about. As cutting and threshing lasts until late autumn and the demand for men is constant, the farmer "sweat in summer" and he must depend on transient labor at that. All this has brought forth marvelous machinery, wonderful threshers which, cut, gather, thresh and clean the wheat and sack it for the market without touch of hand. Sometimes machines are drawn by twenty to forty horses, sometimes an engine is used, but there are many small farms where more primitive pro-

cesses are employed, for all farmers cannot afford an apparatus that is costly. The demands also differ. The thresher that sacks grain without touch of hand is chiefly applicable for the Pacific Coast farms.

Yet, all this is preparatory, for wheat must be transported from the farm to the local market, from the local market to the primary market, from the primary market to the seaboard and from the seaboard to the foreign market. On the Pacific Coast the grain is usually shipped in sacks and in the Dakotas it is more often run into grain tanks, or the cars ready for the great railroad centers into which the wheat concentrates for the local markets. One must think of the large numbers in this connection. Minneapolis alone receives about 90,000,000 bushels of wheat a year and Chicago, Winnipeg, Detroit, Port Arthur, Fort William, Duluth, Milwaukee, Toledo,

Yet, all this is preparatory, for wheat must be transported from the farm to the local market, from the local market to the primary market, from the primary market to the seaboard and from the seaboard to the foreign market. On the Pacific Coast the grain is usually shipped in sacks and in the Dakotas it is more often run into grain tanks, or the cars ready for the great railroad centers into which the wheat concentrates for the local markets. One must think of the large numbers in this connection. Minneapolis alone receives about 90,000,000 bushels of wheat a year and Chicago, Winnipeg, Detroit, Port Arthur, Fort William, Duluth, Milwaukee, Toledo, Kansas City and Omaha are other large receiving ports. From many of these towns the wheat moves to the seacoast so that the wheat traffic on the Great Lakes has become immense. Great grain boats carrying 200,000 to 400,000 bushels are common. The Pacific ports also ship their share of wheat. Nor is this all, great railroads network the Northwest and Canada in an endeavor to care for the crop that as a rule await them. One Canadian road has a locomotive capable of pulling 100,000 bushels of grain. At least six of our long trans-continental roads are great grain carriers and distribute to the Great Lakes or the East. It is interesting to note the movement of the wheat fields and all it implies. Pennsylvania and New York wheat fields were superseded by those of Illinois and there in turn were overshadowed by the fields of Minnesota, Nebraska, and the Dakotas, and of late by the Canadian provinces. It is this Northwest trend that has had a tendency to move the wheat trade from Chicago to the head of the lakes and to increase the importance of Duluth, Superior, Fort William and Port Arthur as shipping points, for they are at the Western extremity of Lake Superior. All this has produced a natural sequence of events, among them the deepening of channels on the Great Lakes so that boats drawing many feet of water can pass through Duluth has a magnificent harbor, the largest fresh water harbor in the world, and the distance to Buffalo, a large receiving port, via the lakes is practically the same as from Chicago. No greater indication of the development of the Lake Superior traffic in grain can be found than by statistics obtainable at the St. Mary's Falls ca-

inals—famously called the "Soo." All boats from Lake Superior ports to places on the lower lakes or the Georgian Bay (and Canada ships much wheat to ports on this body of water), must pass through these canals. Fifteen million bushels of grain have passed through the locks in one month. These are figures to astound the uninitiated. This grain is shipped in bulk in contrast to the treatment on the Pacific Coast where the grain is carried in burlap sacks of a hundred pounds each. Grain reaches the Pacific ports by rail and it is in this section that the "caterpillar" machinery is used. It is an apple, a story of many lives and ambitions, this history of the wheat, and little is known of it save to those directly interested. For instance at all the wheat ports there are great elevators which loom up—built often of concrete or steel tanks—and by their sides stand the huge freighters or boats carrying both grain and passengers. Into the cavernous holds of these vessels the grain rapidly descends. Sometimes these elevators are owned by the farmers or local grain dealers, but there are also "line elevators" controlled by companies who have hundreds situated at the railroad stations in the grain territory. Cars are unloaded at the terminal elevators by means of large scoops worked by machinery and everything is accomplished with speed.

Fort Worth—Two cars of cattle from a ranch at Durango, Mexico, were marketed here recently. F. J. McCaughy, owner of the cattle, said that the shipment was experiment but that he probably would market here the remainder of the winter.

### Some Interesting Example of Horse Sense.

The following about horses is taken from the current issue of Farm and Fireside:

"Now this is no argument that a horse knows more than a man, but

"A farmer sent his hired man to town with a load of hay. The hired man was provided with nose-bags to feed oats to his team. One of the bags had straps so short that when the man fastened them the horse's

nose was shoved too deep down into the bag, and the horse (without check-rein, thank goodness!) deliberately hooked the end of the wagon tongue into the mouth of the bag and tore the bag loose from his head, and ate the oats from the ground.

"The straps on the second nose-bag were so long that the hungry horse could not get at the oats at all, so he kept tossing his head, thus throwing the oats into his open mouth.

"Here are two horses which knew more than their driver.

"A man was plowing. He had fastened the reins across his shoulders in the usual fashion, leaving both hands free to guide the plow. But the reins were all skew-gee on his shoulders and kept pulling his horses 'gee' whilst he yelled 'haw'—and this man reported to the owner of the horses: "Them horses are dum fools!" "All right!"

"When a collar harts, the average horse winces upon being asked to throw his weight into the collar. Later, he becomes what we foolishly

call balky, perhaps—and finally he fights like an army mule when someone tries to put a collar on him. That's knowing something!

"I am personally acquainted with a horse which simply hates a certain blacksmith who once upon a time pulled a bad fitting pair of shoes to his feet and inflicted sore feet upon this horse for all time to come.

"There are men in this world of ours cruel enough to fasten a horse with a heavy rope in a stall and then beat the horse WITH A CHAIN.

But such men have had luck for forever afterward. If the horse which has received this sort of discipline hears a chain-rattle he will bolt in terror, whether hitched to a mowing machine, a carriage with children in it or a heavy wagon loaded with produce. This is either horse sense or horse revenge."

The Republican Club of the city of New York announces that Theodore Roosevelt has resigned. But is he?

### 4,000 REBELS UNDER OROZCO SURROUNDED

Federal Forces Under Gen. Blanquet Number 6,000—Battle is Imminent.

By Associated Press. Laredo, Texas, Oct. 3.—Six thousand federalists under General Blanquet are reported to have a force of four

thousand men under the leadership of General Orozco, surrounded in the mountains near Muscaty, in the State of Coahuila.

It is said a big battle is imminent. Blanquet proposes the only way the rebels can evade him is by opening up the earth.

PERSONAL MENTION

Mrs. A. F. Conlick of Fort Worth, is expected in the city the first of the week. Mrs. Conlick is one of the grand officers of the Ladies Auxiliary to the Conductors and comes to meet with the Local Division. While in the city she will be the guest of Mrs. Geo. Hurst at 309 Lamar.

Mrs. N. C. McIntyre is in the city looking after her business interests here.

Mrs. C. B. Turton, who has been the guest of the Misses Kate and Jodie Haynes for several months, left today for her home at Lille Rock, Ark.

Mrs. O. B. Cecil is spending several days at Electra with her son, Norman Cecil and family.

C. Mandel arrived from Ottumwa, Iowa today for a visit with his daughters, Mrs. E. M. Brown and Mrs. C. C. Huff.

J. A. Kemp left this afternoon for Houston to attend the annual convention of the Texas Commercial Secretaries' Association.

T. B. Greenwood, the attorney, left today for Newcastle on professional business.

The condition of A. C. Henson, the ranchman, who was stricken with paralysis several days ago, was no better today. He passed a bad night.

Mr. and Mrs. J. P. Boone, Sr., and daughter, Miss Sadie, arrived here from Fort Worth this afternoon and will spend the winter with Rev. J. P. Boone and family.

Will Carrigan and wife arrived from Louisiana this afternoon and will be the guests of Jurge A. H. Carrigan and family.

R. H. Joyce left for Memphis this afternoon to superintend the shipment of a lot of hogs from his farm near that place to the Fort Worth market.

Mrs. Herbert Perkins returned to her home at Petrolia this afternoon after a short visit with friends here.

Linn Boyd has resigned his position at the City National Bank to engage in the real estate business. He has opened up his office in the Ward building on 8th street.

ROOSEVELT LOSING SUPPORT THROUGH DISCLOSURES

Chicago, Ill., Oct. 8.—Hamilton White, who was a delegate to the Illinois State Bull Moose convention and to the Bull Moose Congressional convention in his district, walked in to the Democratic headquarters in the Karpis building this morning and announced his repudiation of the third term candidate and declared his intention to support Governor Wilson. When Roosevelt was named by the third term party Mr. White who had helped to bring about his nomination, was enthusiastic in his behalf, but recent events have cooled his ardor and in fact led him to support Governor Wilson.

The disclosure of the fact that Standard Oil contributed to Roosevelt's campaign fund; the support of Roosevelt by Perkins and the steel trust and harvester trust interests as well as other developments of the campaign have caused Mr. White to abandon his support of Roosevelt. Mr. White emphasized his change of heart by informing Representative A. S. Burleson in charge of the Speaker's Bureau that he was willing to devote his time to the campaign to the extent of making speeches wherever the committee might desire to send him. Mr. White was formerly from Iowa and has indicated a preference to be sent to that state for speaking purposes.

10 Children Burned to Death

St. Bernard, Quebec, Oct. 2.—The ten children, ranging in age from 18 months to 15 years of age, of Alexander Gravel of this place were burned to death today.

Gravel and his wife left their home last evening and returning today found it in flames. They were unable to aid the children, whose deaths they witnessed.

Roosevelt in Seclusion

By Associated Press. Oyster Bay, Oct. 2.—Col. Roosevelt shut himself off from the outside world today to rest at Sagamore Hill. He gave instructions that no one should be permitted to see him and that no messengers should be taken to him. He spent the day riding and playing tennis.

NEWS FROM OIL FIELDS

Considerably over a million barrels of oil was in storage at Electra on October 1, the total being 1,193,800 barrels. This was distributed as follows: Pierce-Fordyce Oil Association, 3800; Magnolia, 1,150,000; Texas Company, 40,000. During September the Pierce-Fordyce received 28,000 barrels from the Producers and shipped 18,000 barrels in tank cars. Magnolia runs for the month totalled 185,000 barrels, 300,000 barrels were pumped into the pipe line, there being a decrease of 115,000 barrels in stock. Texas Company runs for the month were 195,000 barrels, and 180,000 barrels were pumped through the six-inch line, the gain in stock being 15,000 barrels. The Corsicana now has forty tanks on its tank farm northeast of Electra, with a total capacity of probably two million barrels.

C. N. Payne of Titusville, Pennsylvania, and E. R. Brown of Corsicana, prominent officials of the Magnolia and Corsicana companies, are in the city today. Both went out to Burkhardt early this morning, accompanied by A. B. Smith of Petrolia. It is understood they will remain in this section several days, looking after company interests.

H. N. Cole, late of Shreveport, has arrived here and will make Wichita Falls his headquarters while looking after the interests of the Sun Oil Company. The Sun company has considerable acreage in Archer county and is now drilling a well on the Luke Wilson ranch and is getting ready for another. The bit is down about 950 feet. It is said that the Sun contemplates a material enlargement of its interests in this section. Mr. and Mrs. Cole will occupy the new Jolie cottage on Tenth street.

Drilling is still in progress on Russell Brothers well on the Falls county school land in Archer county, being down nearly a thousand feet. B. K. Russell, one of the brothers, says that a very favorable showing was encountered in the shallower sands, but that the driller went on deeper. He is very optimistic as to the outlook. The Russell well is northwest of the Miller, that being almost the only direction in which dry holes have not been encountered.

Big Gas Well at Santa Anna. Santa Anna, Texas, Oct. 3.—A good gas well was brought in Wednesday in Tricketham field by G. A. Robertson & Son. A number of people from Brownwood, Coleman and Santa Anna saw the well uncapped. This is the second gas well brought in in the Tricketham field, of about 3,000,000 cubic feet each per day. J. A. Robertson & Son and Lewis A. Robertson have secured a franchise to pipe gas into Santa Anna and also into Coleman City and the franchise provides they are to lay a pipe line into this place within six months. They will probably also put in a pipe line from here to Brownwood.

Three oil rigs are drilling in the Tricketham field and confidence is expressed that oil will be struck there. Clint Woods has sold the Guffey company half of his interest in the M. A. Eeds lease of 120 acres, originally leased to C. H. Clark. The consideration was \$6000.

Archepiscopal Feast.

A correspondent sends us the material for a dinner given by the Archbishop of York in 1468: Three hundred quarters of wheat, 330 tons of ale, 104 tons of wine, 1 pipe of spiced wine, 80 fat oxen, 6 wild bulls, 1,004 sheep, 2,000 hogs, 300 calves, 3,000 geese, 3,000 capons, 300 pigs, 100 peacocks, 200 cranes, 200 kids, 2,000 chickens, 4,000 pheasants, 4,000 rabbits, 204 bittern, 4,000 ducks, 400 herons, 200 pheasants, 500 partridges, 4,000 woodcocks, 400 plovers, 100 curlew, 100 quails, 100 egrets, 200 roes, 4,000 bucks, 5,000 venison pasties, 5,000 dishes of jelly, 8,000 custards, 300 pike, 300 broom, 8 seals, 4 porpoises and 400 tarts. There were 1,300 servants, 62 cooks and 515 scullions. Our correspondent informs us that his authority does not state in what circumstances the dinner was given, or how many guests assembled. Possibly some reader may be able to throw light on the subject.—London Globe.

BEEF CATTLE ARE HIGHER THIS YEAR

Washington, D. C., Oct. 3.—Beef cattle, veal, calves, hogs, sheep, milk cows, lambs and horses brought substantial higher prices to the producers on Sept. 15 last than a year before, though hogs and sheep brought less than two years ago. This showing, indicative of the relation of agriculture to the high cost of living, was made in a report of the Department of Agriculture issued today. Fruit brought a slightly decreased price and vegetables fluctuated. Beef cattle per 100 pounds brought \$5.35 this month, \$4.43 a year ago and \$4.65 in 1910; veal calves, respectively, \$6.83, \$6.11 and \$6.43; hogs, \$7.47, \$6.53 and \$8.27; sheep, \$4.11, \$3.91 and \$4.81; lambs, \$5.49, \$5.02 and \$5.85. Milk cows and horses brought \$46.79 and \$141, respectively, each against \$42.22 and \$139 respectively, a year ago. The average of prices paid to the producers for other articles for this month and a year ago, respectively, follow: Apples, per bushel, 62c and 70c; peaches, \$1.10 and \$1.29; pears \$1 and \$1.04; beans \$2.28 and \$2.26 a bushel; cabbage \$1.25 and \$1.94 per 100 pounds; onions 89c and \$1.04 per bushel; tomatoes, 59c a bushel; broom corn \$76.50 and \$91.70 per ton, and sweet potatoes, 89c and 98c a bushel.
