

WILSON TALKS TO NEWSPAPER MEN

TELLS THEM HE BELIEVES TARIFF BILL MEETS WITH COUNTRY'S APPROVAL

HE EXPECTS BENEFITS

Believes Restoration of Competitive Conditions Will Result in Immediate Good to Public

By Associated Press. Washington, April 14.—President Wilson believes the new tariff bill meets with the general approval of the country and that no healthy business will be interrupted by the reduced rates or the entire removal of duty.

While immediate free sugar is not provided in the bill the president believes the consumers will at once feel the benefits of the reduction in the duty on sugar. These views were informally expressed by the president in an open talk with newspaper men today when he explained that his main reason for requiring a reduction in the tariff on sugar was because the consumers deserved it. The president declared that the arrangement whereby prices were fixed would be made impossible when a truly competitive situation was created and that the public would be benefited very promptly.

In the case of sugar, the president said, each of the new competitive elements were ready to contest. He did not see ruin to the sugar industry in the reduced rates and eventual free sugar.

WARMER TEMPERATURES PROMISED THIS WEEK.

Washington, April 14.—Slightly warmer temperatures, less rainfall and fair weather generally east of the Rockies during the fore part of the week are the probabilities offered by Chief Willis L. Moore of the weather bureau in his weekly bulletin issued last night.

"The distribution of atmospheric pressure over the Northern hemisphere," says the bulletin, "is such as to indicate that temperatures will average near or above the normal the coming week in all parts of the country east of the Rocky mountains and slightly below normal on the Pacific coast. The rainfall during the week will be generally below normal.

Fair weather will prevail during the next several days over the greater part of the country east of the Rocky mountains, while rains will be frequent during the week in the north Pacific states. "The next disturbance of importance to cross the country will appear over the far West Monday or Tuesday, crossing the Rocky mountains to the great central valleys Thursday or Friday and the Eastern states near the close of the week; this disturbance will be preceded by warm weather attended by showers and thunderstorms and be followed by cooler weather with frosts in the Northwest states and the Rocky mountains and plateau regions."

Baylor County Railroad Surveying. Seymour, Texas, April 14.—Surveyors are working in Baylor County on a line for the Quanah, Dublin and Rockport Railway, the Middlebaster route. When finished the line will extend from Quanah to Rockport on the Gulf, through the heart of the State. Seymour will be directly in line of the proposed road and is regarded as one of the important points included in the route.

Karl Hagenbeck Dying. Hamburg, Germany, April 14.—Karl Hagenbeck, the German collector of wild animals is dying here today.

UNION HEAD SLATED FOR PUBLIC PRINTER

J. M. Lynch, President International Typographical Union to Receive Appointment

By Associated Press. Washington, April 14.—James M. Lynch, president of the International Typographical Union, is slated for appointment as public printer, it was announced today. The appointment of W. H. Armore of Greensboro, N. C., for commissioner of internal revenue will probably be sent to the Senate tomorrow.

\$600,000 NEEDED TO CLEAR DAYTON'S STREETS

By Associated Press. Columbus, Ohio, April 14.—Six hundred thousand dollars will be needed to clear Dayton's streets according to a report received by Governor Cox today. The loss in merchandise is estimated at \$30,000,000.

POPE RESTING BETTER TODAY

DISAPPEARANCE OF FEVER REGARDED AS SIGN THERE IS NO DANGER OF PNEUMONIA

WEAKNESS IS INCREASING

In Rome, However, It Is Not Expected That End Will Come Immediately

By Associated Press. Rome, April 14.—Pope Pius' temperature was much lower today being 98 at one o'clock. The disappearance of fever is regarded as a sign that the patient is no longer in danger from pneumonia.

Although there is much concern over his increasing weakness the Pope's heart shows no symptoms of valvular lesion. The patient is taking little notice of those around him but recognized his physician and others with a slight nod.

In the middle of the day the Pope had a short sleep almost uninterrupted by coughing. His temperature was slightly above 98. Dr. Andici visited his patient twice this forenoon.

Rome is taking the illness of the Pope with outward tranquility. There is a widespread belief here that if the end is approaching it will not come for several days at least.

The churches are not unusually crowded but all visit them pray fervently for his illness.

UNDERWOOD ILL; IS SENT TO BED

CHAIRMAN OF WAYS AND MEANS COMMITTEE SUFFERS BREAK DOWN FROM OVERWORK

ILLNESS NOT SERIOUS

With Administration Forces in Control Believed There Will Be No Material Changes

By Associated Press. Washington, April 14.—Chairman Underwood of the ways and means committee was ordered to bed by his physician today. He is suffering from a slight fever as the result of a breakdown from his hard work on the tariff bill. He may be confined to his room for several days.

His illness however did not interfere with the progress of the bill.

Well Defined Opposition To Free Wool.

With the administration apparently in control of the situation in the beginning of the second week's consideration of the new tariff bill and having withstood the test on the sugar schedule, no material changes in the bill are probable.

It is not now believed the opposition can get sufficient support to change any schedule, not excepting raw wool against which well defined opposition has developed. The consideration of the wool schedule will not be reached until the latter part of the week.

"Market Basket" Receives Consideration.

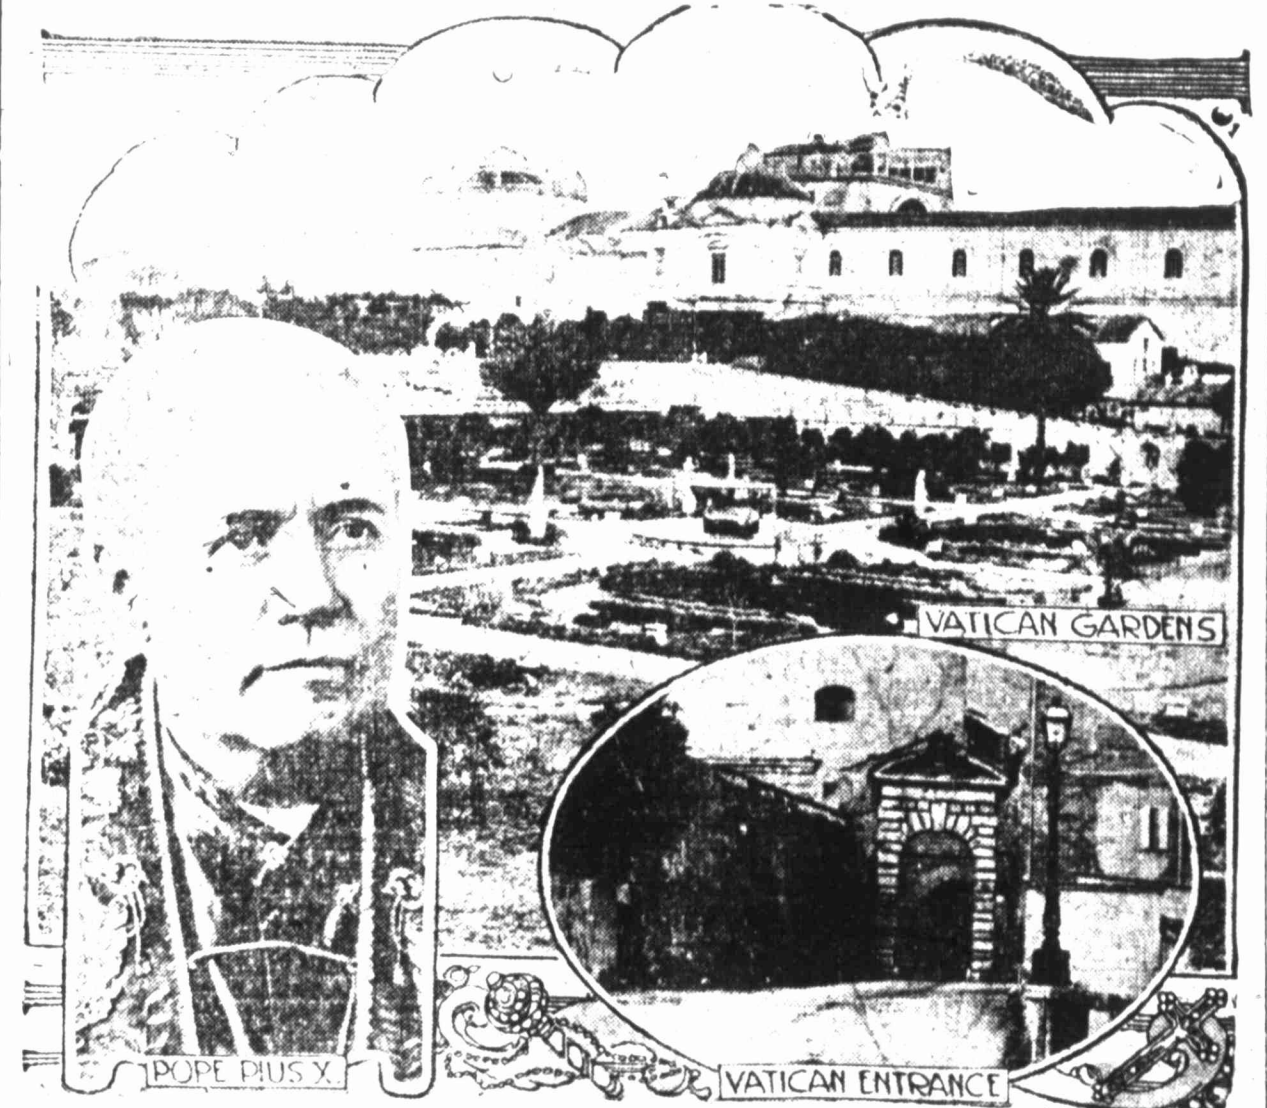

The country's "market basket" attracted the attention of the legislators this morning when the agricultural schedules of the new bill were taken up. The first schedules to receive consideration were the wheat, citrus fruit and flour schedules. The new tariff measure places flour on the free list while a duty of ten percent is continued on wheat.

POLICE AND STRIKERS ENGAGE IN BATTLE.

By Associated Press. Manmaroneck, N. Y., April 14.—One man was shot and killed and one mortally wounded and several others seriously injured in a battle between the police and several hundred striking track layers on the New York, New Haven & Hartford Railway this afternoon. Five of the strikers were arrested.

Four hundred strikers engaged the police in a hand-to-hand battle. Jeremiah Crody, a private detective, received the brunt of the strikers' onslaught and when he fell the policemen drew revolvers and fired. The strikers retreated carrying their wounded.

POPE PIUS X AND VATICAN GARDENS

WHEN POPE PIUS X VISITED VENICE

There are two interesting features about the top picture. One is the general view of the Vatican gardens, for it is there the Pope loved to walk before he was stricken with illness. The Vatican is also shown. The other is the entrance to the Holy Roman See. The lower picture is in some ways like a master's painting. It shows Pope Pius X at Venice where he was a patriarch before he became Pope. The pontiff is in the center at the top of the steps leading down to the canal. A nobleman is kneeling and kissing the prelate's hand. Grouped around the holy father, as though purposely posed, are people of lowly origin who had pressed around the Pope to receive his blessing. Below are the two gondoliers ready to receive the pontiff into their boat.

TWINE OPERATIVES WERE INTIMIDATED

One Hundred Strikers Prevent 500 Operatives From Returning to Work

By Associated Press. Auburn, N. Y., April 14.—Intimidation by 100 strikers at the International Harvester Company's Twine plant prevented 500 operatives from returning to work today. Sixty-eight employees struggled through the lines of the strikers and entered the plant. At the local offices of the company an order was posted this morning for the dismantling of the plant and its removal to Germany.

Agreement On Merger Suits.

Austin, Texas, April 14.—Agreement was practically reached here Saturday whereby the attorney general consents not to file suits against the Santa Fe and Cotton Belt railroads to enjoin the recently enacted merger bills for those companies from becoming effective. The idea is to await the final action in the Katy injunction merger suit and use it as a sort of test case. Attorney General Looney stated he would make such a covenant if it

WEATHER FORECAST

Tonight and Tuesday fair and warmer.

SUNDRY APPROPRIATIONS BILL RE-INTRODUCED

President Wilson Does Not Object Anti-Prosecution Provision of Bill

By Associated Press. Washington, April 14.—Providing that none of its total shall be used for prosecutions of farmers cooperative organizations or labor unions under the Sherman law, the sundry appropriations bill was re-introduced in the House today. Former President Taft vetoed the bill at the last session because he said this provision was "class legislation" of a most vicious character.

The bill carries appropriations for various purposes to the amount of \$116,000,000. While he was not willing to take any formal statement, it is said President Wilson will not object to the passage of the bill in the form as vetoed by President Taft. He is said to look upon the provision as a privilege of Congress and that it will be effective only during the life of the bill and will not affect the Sherman law.

FUNERAL SERVICE FOR J. P. MORGAN

NOTABLE GATHERING IN ST. GEORGE'S EPISCOPAL CHURCH ATTENDS SERVICE

1500 IN ATTENDANCE

Following Service, Special Train Carries Funeral Party to Hartford

By Associated Press. New York, April 14.—Funeral services for the body of J. Pierpont Morgan were held at ten o'clock this morning in St. George's Episcopal Church where a full worshipful for half a century.

After the funeral service his body and the funeral party were taken to Hartford, Connecticut, on a special train. Blanketed by a covering of snow, the dead man of a favored flower, the body was carried from the Morgan library where it had lain since Friday, preceded by a choir of 200 voices.

Over 1,000 persons, one of the most notable gatherings in New York in recent years, crowded into the church. Hundreds could not be accommodated.

MEMORIAL SERVICE IN WESTMINSTER ABBEY.

London, April 14.—A remarkable congregation attended the memorial services for the late J. P. Morgan in Westminster Abbey this morning. King George and Queen Mother Alexandra attended and diplomatic, financial and church circles were represented in force. Many Americans attended.

250,000 JOIN IN SUFFRAGE STRIKE

TIE UP IN BELGIUM, HOWEVER NOT AS COMPLETE AS WAS FEARED

MINERS WERE FIRST OUT

In Many Towns Outside the Mining Districts Strike Hardly Discernible

By Associated Press. Brussels, Belgium, April 14.—The vast political strike planned by Belgian workers to secure universal manhood suffrage started at day break this morning. The first waves to go out were the high hills of the mines throughout the country. It is estimated that 250,000 men and women in the strike throughout the country this morning. There were numerous exceptions to the general walkout. In many towns outside the mining districts the strike was hardly discernible.

In Brussels the strikers, who formed four-fifths of the workmen in the suburban factory district, did not report for work today. The socialist committee estimated that 20,000 had joined the strikers in the district.

FRIEDMANN CURE MUST STAND THE TEST

Washington, April 14.—Surgeon General Blue of the Public Health Service today told Dr. Friedmann that until the exact nature of his tuberculosis vaccine and the method of its preparation had been revealed and the claims made for it substantiated by official tests and investigations, a license for its sale in interstate commerce could not be issued. This was the Surgeon General's answer when the Berlin scientist asked what steps it would be necessary for him to take to obtain such a license.

Dr. Friedmann tomorrow afternoon will treat a number of tuberculosis patients at the George Washington University hospital. Dr. Friedmann announced last night that he would advocate special attention to children afflicted with tuberculosis in the hip joints and others who are not in the advanced stages of the disease.

Today Dr. Friedmann expects to call at the White House to pay his respects to President Wilson.

He said he would work until midnight if necessary to treat all the cases presenting themselves. Dr. Friedmann expects to leave tomorrow for Providence.

Greenville.—The Chamber of Commerce inaugurated a series of trade excursions on April 8 with a tour of North Texas towns.

ANARCHIST FAILS TO KILL ALFONSO

SPANISH KING GREETED BY JOYOUS CROWDS AT MADRID THIS MORNING

HEARING FOR ANARCHIST

Would Be Assassin Utters Witty Remarks at Hearing This Morning

By Associated Press. Madrid, April 14.—King Alfonso rode into the park this morning and was warmly saluted by the crowds who cordially expressed their joy that the King had escaped his attempted assassination yesterday.

Sanchez Aliego, the would-be assassin, is being given a hearing. During his examination this morning Aliego infuriated those in court room with what he intended evidently for witicism but no violence was attempted.

Three shots were fired at the King Sunday afternoon in the streets of the capital by a native Barcelona, Rafael Sanchez Aliego, who was immediately overpowered.

King Alfonso owes his escape to his own courage, quickness and skilled horsemanship. Accompanied by his staff, he was riding from the ceremony of swearing in recruits, when a man sprang from the sidewalk and seized the bridle of the King's horse with one hand, presenting a revolver point-blank with the other.

King Saves Himself. The King, realizing the situation, with lightning rapidity, dug his spurs into his horse, which reared violently. His quickness saved his life. The bullet, instead of burying itself in the King's breast, struck the horse on the neck, but so close was it that the King's left hand glove was blackened by the powder discharge.

Before the assailant was able to pull the trigger again a secret service man fell upon him. The two men fell to the ground locked in each other's arms, struggling furiously.

The would-be assassin managed to free his revolver arm and fired two more shots in rapid succession, but the officer knocked his arm aside and the bullets flew harmlessly through the air.

Assailant Fights Fiercely. At the sound of the first shot the King's staff forced their horses on the sidewalk and made a ring around the monarch's assailant, who fought fiercely in the grip of four policemen but he was overpowered and handcuffed.

King Alfonso, as soon as he saw that the man had been secured, raised himself in the saddle, turned to the crowd, gave a military salute and shouted in a ringing voice: "Long live Spain!"

He then dismounted and reassured his staff, saying: "It is nothing gentlemen."

Crowds Cheer Ruler. Then arose a mighty roar from the wildly enthusiastic masses which rolled along in great waves of sound, all the way as the King rode to the palace, cool, collected and smiling.

A spectator, a pensioned royal halberdier, pushed forward so impetuously to offer his congratulations to the monarch that he was mistaken for an assassin and arrested. He was released as soon as the mistake was discovered.

A young Frenchman who was standing beside Aliego was arrested, but it does not appear that he was connected with him.

Try to Lynch Assailant. The crowds made a determined attempt to lynch Aliego, who was rushed into a house and kept there until an automobile ambulance, escorted by mounted police, took him to prison.

STRONG COMPETITION FOR WICHITA FALLS

Dallas and Corpus Christi Candidates for 1914 Convention Texas Press Association

Wichita Falls is now actively in the contest for the 1914 meeting of the Texas Press Association, and letters and literature are now being mailed out to the various members, setting forth this city's claims. The 1913 meeting will be held at San Antonio next month.

Dallas and Corpus Christi are also candidates for the convention and Wichita Falls will not have the field to herself. This city's chances, however, are considered good, in view of the fight that was made last year at the Temple convention.

It is proposed to send a large delegation from this and neighboring towns to press this city's claims.

Men's Spring and Summer Clothes at The Globe

Where Clothes Are An Institution

Our ready-for-service clothes this spring and summer are superior to any we have ever produced. This is impressive because last spring and summer it looked impossible. We did not quite see how we could excel in 1912 what seemed so perfect in 1911. Perfection, however, always lies a little ahead of the best men do and trying to attain it is like the futile effort of pussy to fasten her teeth on her fugitive tail. All she gets is a glimpse and perfection is just as elusive. But he who works with his heart works better than he knows, and we have surely worked with ours. That is why we are consistently foremost in contemporary styles, and why our present spring and summer exhibit of men's suits, hats, shoes, shirts and furnishings is probably without a peer in the reputable clothes.

NAVAJOS are Self-Supporting

NAVAJO VILLAGE

As a rule the public generally know or hear very little about sport in Roumania. Many people, therefore, are surprised to learn that in the forests of Moldavia there exist today several species of big game, most of which are the largest of their kind now living in Europe. The list of game is by no means a small one, containing as it does red deer, roe deer, chamois, bears, wild boar, wolves, lynx, foxes and wildcats. On one large private estate, which is well known to the writer, you can find all these animals with the exception of chamois. The red deer here are notorious for the size of their antlers, which on the average exceed even those now found in the Carpathians. The roe deer, too, can boast of horns which put to shame the best heads from Austria and Germany. Also the brown bears grow to a size which is seldom approached by any other European bear. And the reader can certify this statement by glancing at a photograph which accompanies this article and depicts a road scene when the writer recently encountered a traveling troupe of bear trainers. It is worthy of note that the largest bear in this group is only a female and as every sportsman knows, the males grow to a far greater size.

Animals Are Large.

Put above all animals the giant wild boars of Roumania stand in a class by themselves. So much larger are the old boars there than specimens found in other parts of Europe that one is almost inclined to classify them as a distinct species.

It is probable that the abnormal size of the Roumanian big game is owing to the fact that the woods there are so rich in natural feeding grounds. For here in the vast forests are countless acres of beech and oak trees, while the open glades are densely clothed with luxuriant grasses and wild flowers which often reach to the height of a man's shoulder. In summer time the meadow slopes are thickly strewn with a profusion of wild fruits and berries, so densely are the forests that it is seldom possible to approach game, other than roe deer or chamois by stalking them. Consequently it is only during winter months, when big game are organized that much shooting is done. But during the past summer the writer and a friend happened to be staying on the best estate for big game in Roumania. Their real object was a fishing expedition, but a steady succession of rainy days had driven the rivers into a state resembling pea soup in desperation it was decided that they must kill something. Hence one morning, when a foster reported that wild boars were numerous and much in evidence by their nightly depredations on his farm, we set forth to reach our quarters from a comfortable long and break ourselves to the woods, where we proposed to try what the Americans call "still hunting" for boars. Since this method was somewhat unorthodox our good host, who was himself a great sportsman, was rather skeptical about our chances of getting game.

Having requisitioned the services of two pack ponies, and accompanied by a couple of foresters, we set out on a short trek of about six miles to a spot where an old abandoned log cabin, on the edge of a forest clearing, appeared to us strongly as a good camping ground. Since my companion S., and myself were both old campaigners it was not long before camp was fixed up, and towards evening we wandered off to take up positions near to the place where the boars fed at night.

Battle With Mosquitoes.

For some two hours we waited motionless, save for our enforced movements to repel the attacks of countless mosquitoes which suddenly appeared in such numbers and were so vicious that they reminded us of many months which we had spent in former years on the shores of Alaska and Siberia, combating by day or night the onslaughts of these pests. Soon after the sun had sunk to rest beyond the highest peak away on the Hungarian frontier our ears were

Bless Her Dear Heart!

Now could I see the button on my overcoat lever?
"Mrs. Newell—No, darling, I couldn't find the button, so I just sewed up the buttonhole."
"Ha! arding a Guess."
"There's something grotesque about pillows. I don't know exactly what."
"Ahem! Have you ever seen his wife?"

Standford—The Commercial Club is maintaining the interest of the farmers in planting broom corn as they be-

lieved by the sound of two heavy animals moving slowly through the forest. There was no doubt from the noise of cracking sticks and the rustling of dead leaves, that two boars were coming leisurely through the wood, rooting up the ground on the way. They actually passed up close to us, breathlessly waiting behind a giant spruce tree, but so dense was the thicket at this point that neither of us could detect a movement in the brushwood. We had, however, the consolation of knowing the boars were making in a straight line for where S. was sitting, and could probably afford him a chance of a shot. Then all was silent again for a while, until suddenly a rifle shot echoed from hill to hill, and was quickly followed by another. Filled with great expectations, we pushed our way through the brushwood to where we found S. using decidedly strong language and ruefully regarding the blaze on a small sapling which bowed where his first bullet had struck, and this proved the means of availing a big boar's life, since a second arrow at a young pig in such dense timber was naturally hopeless. Alas, it is always thus with the big game, on the monster fish which we use, and F., who had kept wild boars in many lands, declared that this was indeed a fair one. Since the boars had probably cleared the neighborhood of game for a time, we wended our way back to camp.

At two o'clock next morning we were again and after a somewhat early breakfast took up our positions in the hillside long, before the rising sun appeared. Several hours' waiting, and more battles with mosquitoes added to our patience. Finally the forester persuaded us to climb to the mountain top, where we could take up positions, while he and his assistant would walk along the hillside and attempt to move some boars which might make for the higher ground.

We had not been waiting long before a fox trotted up to within a few feet of my position and remained listening for a while, until finally he was allowed to pass on his way unobserved. Soon afterward from far below in the valley came wild shouts from one forester, and it afterwards transpired that two very big boars had jumped up close to him and broken back in the wrong direction. In a short time the man himself arrived breathless from a steep climb and explained as best he could that he had seen a boar go into a thicket below us and that he might be possible to get a shot at him. Although feeling very little about our chance of seeing the boar again, I was induced to follow the forester in a wild scramble down a steep hillside, falling over rocks, into bunches of brambles or nettles as we went. Finally we reached a spot at which the second forester had been keeping observation on the place where the boar had been seen, and shortly after entering the thicket the man seized my arm and, pointing to some dark object under a tree said, in Roumanian, "Pig, shoot!" Now, the object in question might have been a rock, a pig or anything else, but it surely was no part of the tree, and although it is strongly against my principles to shoot at anything unless I can clearly distinguish what the object is, I decided to break this rule once, and so fired. Sure enough, it was a boar, but the bullet only grazed his side, causing him to jump forward into an open space between two trees. Alas! poor pig, this was fatal, for a second later another bullet passed through his heart, and my first Roumanian boar lay on the ground.

TAFT AND ROOSEVELT GOOD FRIENDS BUT THEIR NAMES AREN'T TED AND BILL

Taft (left) and Roosevelt.

When William H. Taft succeeded Theodore Roosevelt as president a photograph was made of the two together on the White House portico that attracted much attention. Here is a new Taft and a new Roosevelt, both of whom are connected with the new administration, the former as a newspaper man covering the executive offices, and the latter as the new assistant secretary of the navy. Both are related distantly to their more famous namesakes. The young Roosevelt whose name is Franklin K. holds the position once held by Theodore in the navy department. He is a Democrat and comes from Dutchess County, N. Y., and has served as a state senator.

FEW BIRDS ARE OUR ENEMIES

RATHER ARE THEY MENACE TO INSECTS' DESTRUCTIVE POWERS

GOVERNMENT BULLETIN

One of the Most Useful Groups is Sparrow Family—Information is Yours for Asking

Illustrated in colors and giving a full description of fifty common birds of farm and orchard. Farmers' Bulletin No. 513, prepared by the bureau of biological survey of the United States and it would be equally interesting to adults.

It will be sent free to all who will write for it to the United States Department of Agriculture, Washington, asking for Bulletin No. 513.

This bulletin is intended to serve the very practical purpose of enabling farmers and their boys and girls to identify the birds that frequent the farm and orchard. The material prosperity of state and nation depends largely on agriculture and any agent that serves to increase the size of crops and insure their certainty is of direct interest and importance to the farmer. Birds constitute one of the most valuable of these agents, since they depend largely for their food on insects which are among the farmer's most dreaded enemies.

Insects Cause Great Loss

Entomologists have estimated that insects yearly cause a loss of upwards of \$700,000,000 to the agricultural interests of the United States. Were it not for birds, the loss would be very much greater, and indeed it is believed that without the aid of feathered friends successful agriculture would be impossible. A knowledge of the birds that protect his crops is, therefore, as important to the farmer as a knowledge of the insect pests that destroy them. Such knowledge is the more important because the relation of birds to man's interests is extremely complex. Thus, while it may be said that most birds are useful there are only a few of them that are always and everywhere useful and that never do harm. Insectivorous birds, for instance, destroy, along with a vast number of harmful insects, some parasitic and predatory kinds. These latter are among nature's most effective agents for keeping destructive insects in check. To the extent, then, that birds destroy useful parasitic insects, they are harmful. But taking the year round, the good they do by the destruction of insects injurious to man's interests far outweighs the little harm they do. It may be said, too, that of the birds usually classed as noxious there are very few that do not possess redeeming traits. Thus the crow is mischievous in spring and sorely taxes the farmer's patience and ingenuity to prevent him from pulling up the newly planted corn. Moreover, the crow destroys the eggs and young of useful insectivorous and game birds; but, on the other hand, he eats many insects, especially white grubs and cut worms and destroys many meadow mice, so that in much (although not all) of the region he inhabits the crow must be considered to be more useful than harmful. Most of the hawks and owls even—birds that have received so bad a name that the farmer's boy and the sportsman are ever on the alert to kill them—are very useful because they destroy vast numbers of insects and harmful rodents.

Birds occupy a unique position among the enemies of insects, since their powers of flight enable them at short notice to gather at points where there are abnormal insect outbreaks. An unusual abundance of grasshoppers, for instance, in a given locality soon attracts the birds from a wide area, and as a rule their visits cease only when there are no grasshoppers left. So also a marked increase in the number of small rodents in a given neighborhood speedily attracts the attention of hawks and owls, which, by reason of their voracious appetites soon produce a marked diminution of the swarming foe.

Gems of Bird World

America is greatly favored in the number and character of its birds, which not only include some of the gems of the bird world as the warblers and humming birds, but on the whole embrace few destructive species. Not only do many birds satisfy our esthetic sense through their beautiful plumage, and their sweet voices, but they are marvelously adapted to their respective fields of activity. No other creatures are so well fitted to capture flying insects as swallows, swifts and nighthawks. Among the avian ranks also are vireos, trim of body and agile of movement, that creep in and out of holes and crevices and explore rubbish heaps for hidden insects. The woodpecker, whose whole body exhibits wonderful adaptation of means to end is provided with strong claws for holding firmly when at work, a chisel-like bill driven by powerful muscles to dig out insects, and a long extensible tongue to still further explore the hidden retreats of insects and drag forth the concealed larvae, safe from other foes. The creepers, titmice, warblers, flycatchers, quails, doves and other families have each their own special field of activity. However, unlike they may be in appearance, stricture

and habits, all are similar in one respect—they possess a never flagging appetite for insects and weed seeds.

Sparrows Useful

One of the most useful groups of native birds is the sparrow family. While some of the tribe wear gay suits of many hues, most of the sparrows are clad in modest brown tints, and as they spend much of the time in grass and weeds are commonly overlooked. Unobtrusive as they are, they lay the farmer under a heavy debt of gratitude by their food habits, since their chosen fare consists largely of the seeds of weeds. Selecting a typical member of the group, the tree sparrow, for instance, one-fourth ounce of weed seed per day is a conservative estimate of the food of an adult. On this basis, in a large agricultural state like Iowa, tree sparrows annually eat approximately 875 tons of weed seeds. Only the farmer, upon whose shoulder fall the heavy burden of freeing his land of noxious weeds, can realize what this vast consumption of weed seeds means in the saving and cost of labor. Some idea of the money value of this group of birds to the country may be gained from the statement that the total value of the farm products in the United States in 1910 reached the amazing sum of \$8,926,000,000. If we estimate that the total consumption of weed seed by the combined members of the sparrow family resulted in a saving of only 1 per cent of the crops—not a violent assumption—the sum saved to farmers by these birds in 1910 was \$89,260,000.

The current idea in relation to hawks and owls is erroneous. These birds are generally classed as thieves and robbers, whereas a large majority of them are the farmers' friends and spend the greater part of their long lives in pursuit of injurious insects and rodents. The hawks work by day, the owls chiefly by night, so that the useful activities of the two classes are continued practically throughout the 24 hours. As many as 190 grasshoppers have been found in the stomach of a Swainson's hawk, representing a single meal and in the retreat of a pair of barn owls have been found more than 3,000 skulls, 97 per cent of which were of mammals, the bulk consisting of field mice, house mice and common rats. Nearly half a bushel of the remains of pocket gophers—animals which are very destructive in certain parts of the United States—was found near a nest of this species. The notable increase of noxious rodents during the last few years in certain parts of the United States and the consequent damage to crops are due in no small part to the diminished number of birds of prey, which formerly destroyed them and aided in keeping down their numbers. A few hawks are injurious, and the bulk of the imputations on birds and chicken-chargers against hawks is committed by three species—the Cooper's hawk, the sharpshinned hawk and the goshawk. The farmer's boy should learn to know these daring robbers by sight, so as to kill them whenever possible.

States Made Mistakes

From the foregoing it will at once appear that the practice of offering bounties indiscriminately for the heads of hawks and owls, as has been done by some states, is a serious mistake, the result being not only a waste of public funds, but the destruction of valuable birds which can be replaced, if at all, only after the lapse of years.

As a rule birds do not live very long, but they live very fast. They breathe rapidly and have a higher temperature and a more rapid circulation than other vertebrates. This is a fortunate circumstance, since to generate the requisite force to sustain their active bodies a large quantity of food is necessary, and as a matter of fact birds have to devote most of their waking hours to obtaining insects, seeds, berries and other kinds of food. The activity of birds in the pursuit of insects is still further stimulated by the fact that the young of most species, even those which are by no means strictly insectivorous, require great quantities of animal food in the early weeks of existence so that during the summer months—the flood time of insect life—birds are compelled to redouble their attacks on our insect foes to satisfy the wants of their clamorous young.

Field observations of the food habits of birds serve a useful purpose, but they are rarely accurate enough to be fully reliable. The presence of certain birds in a corn or wheat field or in an orchard is by no means proof, as is too often assumed, that they are devastating the grain or fruit. They may have been attracted by insects which unknown to the farmer or orchardist, are fast ruining crops. Hence it has been found necessary to examine the stomachs and crops of birds to ascertain definitely what and how much they eat. The biological survey has in this way examined upward of 50,000 birds, the most of which have been obtained during the last twenty-five years from scientific collectors, for our birds are too useful to be sacrificed when it can possibly be avoided, even for the sake of obtaining data upon which to base legislation for their protection.

Terrell—Over twenty-one street blocks in this city will be paved with rock asphalt as the result of the \$90,000 bond issue for these improvements. Work will begin May 1.

IN THE SPHERE OF WOMANKIND

Telephone No. 167.

Mr. and Mrs. H. A. McFarland of Electra are visiting Mr. and Mrs. B. L. Stewart.

Mrs. M. B. Johnson leaves tonight for a visit at Dallas.

The Woman's Home Missionary Society of the First M. E. Church is meeting this afternoon with Mrs. A. E. Anderson.

The Ladies Aid Society of the First Christian church met at the church this afternoon.

Mrs. R. P. Webb entertained the Ladies Aid Society of the First Presbyterian church at its regular monthly social session this afternoon.

AT THE CHURCHES

Sunday was the last service before conference at the First M. E. Church at the corner of Seventh and Lamar streets and all the services were well attended. At the evening service Rev. A. J. Smith of Fort Worth lectured on "Religions in the Orient." The Sunday school in the factory addition mission is progressing nicely. Rev. Lee leaves tomorrow for Anadarko for the meeting of the Fort Worth conference there this week. An Epworth League conference will also be held here this week. It is expected several delegates from the local church will attend.

Rev. Chester Wood, who has been acting as rector at the Church of the Good Shepherd for the past several months, concludes his last service today morning, before leaving for his home in New York for a short stay. The Parish will not allow it to be said that Sunday morning's service was Rev. Wood's last in the church, for they are still hopeful that he can prevail upon him to return in the fall. Since Rev. Wood has been rector the church has struck out for itself and is no longer a mission church and is growing in membership and usefulness. Tonight a reception will be held at the home of Mrs. Borer on Tenth Street as a farewell to Rev. Wood.

Rev. W. C. Rose, presiding elder of the Free Methodist church will be here the latter part of the week for the district quarterly conference of that denomination. Rev. C. M. Beyer, of the Lutheran church (Mo. Synod) went to Ringold Sunday afternoon to fill his engagement with the church there.

LEAGUE OFFICIALS WILL ATTEND GAME

The Denison team is due to arrive tonight over the Katy, ready for the opening game of the Texas-Oklahoma League season. President Johnson, Secretary Finley and other league officials are expected to accompany the team here to witness the first contest.

The outlook is for good baseball weather and if the conditions are like those of today, the first game should be full of "pep" and a fast contest. Arrangements have been made for special service for the game, so that here will be ample accommodations for all the fans.

HOW ONE WOMAN WON

Her Health and Strength Back Again by The Use of Cardui.

Tampa, Fla.—In a letter from this city, Mrs. E. C. Corum writes: "I was all weakened and worn out with womanly troubles. My husband brought me some Cardui as a tonic, and, from the first day, it seemed to help. I had almost lost my reason, but, thanks to Cardui, I did not. Soon, I felt and looked like a new woman. I think the remedy is wonderful. I recommend it to my friends, for I have received great benefit from it."

Cardui acts specifically on the weakened womanly organs, strengthening the muscles and nerves, and building them up to health. It helps to refresh the worn-out nervous system and relieves the effects of overwork, both mental and physical. Fifty years' successful use fully prove the merit of this purely vegetable, tonic remedy for women. In every community, there live some who have been benefited by Cardui. The beneficial effects of this time tested woman's remedy, soon show themselves in many different ways.

MARIETTA TEAM DEFEATED 6 TO 2

Without Particular Features

Wichita Falls won easily from the Marietta team in Sunday afternoon's game, before a large gathering of fans.

The game was without particular features. Valverde, a left hander, pitched for the locals and did very well considering that it was a pretty cool day for a south-paw to be working. He allowed only five hits; one of these, a three-bagger, came when two men were on bases, giving the Oklahomans their only scores.

The only reliable way of carpet cleaning is the Handy Man's way. Try it.

Entered at the Postoffice at Wichita Falls as second-class mail matter.

Wichita Falls, Texas, April 14, 1913

The cold weather, apparently, is now about over, and those who planted their gardens early can now with comparative safety, plant them over again.

Hugh Nugent Fitzgerald, one of the ablest newspaper men in the state, is now managing editor of the Fort Worth Record, and under his management that paper, always good, is showing some marked improvement in the news gathering and dispensing department.

Before the conspirators attacked character of Senator Gore they ought to have been able to produce some witnesses of character themselves.—Tulsa Daily World.

The Philadelphia Record says "There is no wish to destroy any business, and time for the readjustment is allowed. But in all tariff legislation from now on the public welfare rather than the private interest must control. Special privilege must cease. The right of any men to have other taxed for their benefit can no longer be recognized."

With two as good papers as Waco a city of 40,000 population, now boasts it would seem there is little need of a third, but notwithstanding, a company with a paid up capital of \$75,000 is going to start the third paper. It is good way in which to sink the money and when it is spent those who made the investment will have little or nothing to show for it. More money can be sunk in the establishing of a daily newspaper than in almost any other line of business, and it is a game in which the fellow who has the money does not always win.

Congressman Stephens has made the following recommendations for post masters in this 13th district: C. C. Davis, Iowa Park; L. E. Haskett, Childress; Thos. Durham, Wellington; J. Wash. Davis, Alvord; Miss Mini Daugherty, Chillicothe; Sam Anderson Knox City; Miss Laura V. Hammer Claude; J. G. Witherspoon, Crowell; W. B. Smith, Shamrock, and W. P. Hitehinson, Tulsa.—The terms of some of the incumbents of these offices expired under the Taft administration and they were, or other applicant who were Republicans were reappointed, but the Senate failed to confirm any of the appointments made by President Taft. This indicates that the present administration is not going to stand for the trick attempted by the Taft administration of making appointments of Republicans to postmaster positions whose terms would hold over for four years, or for the entire period of the Wilson administration. Ninety-five per cent of all federal offices were held by Republicans during the sixteen years of the Republican control, and it would not be right to continue them in office under a Democratic administration unless the present administration is willing to go on record as saying that it cannot find efficient and capable Democrats to fill the offices.

HIGH TREASON OF JOURNALISM

(By James Keeley) "Suppression of news is more of a wrong than the printing of a piece of news that might possibly better not have been written. By improper suppression of news a newspaper sells its soul and betrays its readers. Suppression of the news, to my mind, is the high treason of journalism." So said James Keeley, editor and general manager of the Chicago Tribune, in a recent address before the students in Journalism at the University of Wisconsin. "No paper that permits its advertisers of the personal, social and financial friends of its editor to control its news and editorial columns ever has become a big newspaper, or a successful newspaper, or a newspaper that is respected by the people. The man in the street instinctively senses this sort of treason and the punishes, continued Mr. Keeley. "In the past there have been notorious examples of papers owned and controlled by politicians and the predatory powers. Some are dead, others have changed hands, and those that remain are leeches on the money bags that gave them birth and furnished the substance to keep them alive. The sneering belief expressed by so many that the advertisers have mortgages on the editorial columns of

all newspapers is not true. There are free men and there are slaves in our business, as there are in all lines of work. The newspaper field is not inhabited solely by saints, neither has any other profession a monopoly of the pure heart. The average of honesty, in the newspaper business, however, will compare favorably with that of many other trades or professions. "The man who thinks he can betray his readers; the man who thinks he can let dollars supersede duty; the man who thinks that he can let private interest dictate his policy—and loing these things secretly imagine that he can pose as a leader of public opinion, an exponent of right and honest—is fooling himself, not the public. The public is canny and its eye teeth are getting sharper every minute. The day of invisible government in the newspaper world, as in the political world, is vanishing. "Honesty of purpose, and the determination to carry that purpose into effect, is the backbone of a newspaper's reputation. An honest man makes mistakes, and a newspaper is operated and produced by finite minds. The decent newspaper wants to print the truth. A lie is a business boomerang. A newspaper's reputation for reliability is its stock in trade. Inaccuracy is the cardinal sin. Doubtless some papers are in need of absolution."

TODAY'S MARKET REPORT

Cotton Spots. Associated Press. New York, April 14.—Cotton spots closed quiet today. Middling upland at 12.40; middling gulf at 12.65. Fort Worth Livestock. Associated Press. Fort Worth, Texas, April 14.—Cattle receipts today were 3200 head including 2600 grassers. The market was steady to ten cents lower at \$5.25 to \$7.50. Hog receipts were 1800. The market was steady; tops brought \$9.20.

"HOSS" DOCTORS ARE IN TROUBLE

PAIR ARRESTED AT ELECTRA SAID TO HAVE PRODUCED "DISEASE" TO GET JOB

CITIZENS VERY INDIGNANT

Two "Veterinarians" Barely Escape Rough Handling By Crowd at Electra

Two veterinary surgeons from Electra are in the county jail following the discovery of an alleged scheme on their part to fleece liverymen and others at Electra. No complaint has been filed against them. Several days ago horses at Electra were found to be suffering from a swollen irritation on their legs and flanks and veterinarians seemed unable to treat it. The two men now under arrest then, it is alleged, volunteered their services, charging \$25 to effect a cure. The disease abated and finally the services of the A. & M. veterinary were called in. In order to determine the nature of the ailment he tried to inoculate healthy horses with "the virus" but found it would not "take."

By that time some suspicions had been aroused and it was determined by watching the two veterinarians closely, that they entered stables at night and applied some sort of oil to their flanks, causing the irritation. Their arrest soon followed and when the news became public it is said to have looked like violence would be done there before they could be brought here in an automobile.

MERIT ONLY TO GOVERN IN POSTAL SERVICE.

Washington, April 14.—Postmaster General Burleson has determined to effect the most radical reorganization of the postal service ever proposed in the history of civil service reform in this country. The plan upon which he is at work is distinguished by these features: All postmasters shall be placed under civil service and required to pass examinations for admission, retention, and promotion. Postmasters shall be appointed and transferred without regard to locality so that, for example, a resident of San Francisco, could be made postmaster of New York and a resident of Duluth postmaster of New Orleans. The new postmaster general has not his terms, but his highest ambition is to take the postoffice department completely out of politics and make it an organization of the highest business efficiency.

He has submitted an outline of his plan to President Wilson, who has commended it enthusiastically and assured him that all the influence of administration possessors will be used to put it into effect. Mr. Burleson has reached the conclusion that politics is a blight on the postal service. Postmasters are appointed as a reward for political services and not for their fitness to discharge the duties of the position efficiently and economically. The result is that in ninety-nine cases out of a hundred the political postmaster takes the appointment merely as a perquisite.

The postmaster general believes postmasters should be a professional class, trained in their duties and devoted to the service as a life work. He thinks a postmaster should not be restricted to one locality, but should be promoted from the smaller to larger communities, according to ability displayed. The postmaster general has decided to subject all fourth-class postmasters to a "civil" service test. Those who pass it will be retained and those who do not will be removed. This examination will be open to outsiders also and an eligible list of fourth-class postmasters will be established. Plans Big Experiment. It is Mr. Burleson's intention in the appointment of fourth-class postmasters to experiment with the proposition of ignoring geographical considerations. Wherever a vacancy occurs the man at the top of the eligible list will be appointed, regardless of the fact that he does not reside in the community affected.

If this scheme works well, Mr. Burleson will ask congress to enact legislation placing first, second and third-class postmasters under similar

The Gem Picture Theatre will close from 3 to 6 on account of opening of ball season.

GRAFT CHARGES TO BE INVESTIGATED

By Associated Press. Chicago, April 14.—Whether vice flourishes in Chicago under the protection of money paid public officers is to be investigated by the Illinois Vice Commission. This decision was reached today after Elmer Williams a Methodist minister had testified before the committee and had promised that he would produce women and saloonkeepers witnesses who would testify they gave regular sums to the police. "One woman told me they life would not be worth a cent if she revealed that she had paid protection money to the police," said Rev. Williams. "The saloonkeepers told me of similar doings."

Kingsville—A corps of surveyors has started the survey of the Kleberg county lines. The new county will be almost square except for the meanders of the Gulf of Mexico and will comprise about 980 square miles.

D. A. R. CONVENTION STARTS IN A FIGHT

Trouble Starts as Soon as "Peace and Harmony" Address Was Finished. By Associated Press. Washington, April 14.—The Continental Congress of the Daughters of the American Revolution opened today in a fight that started almost as soon as President General Scott had finished her address urging "peace and harmony." The report of the credentials committee aroused a strong protest, and a substitute committee was proposed on which each of the three candidates for president-general would be given representation. The motion for the new committee met with no recognition and the report of the original committee was adopted amid scenes of confusion. A split in the organization was predicted.

JAPAN MAY BRING TEST CASE TO SUPREME COURT

That Government Will Institute Proceedings to Show Japanese Not of Mongolian Origin. By Associated Press. Tokyo, Japan, April 14.—The Japanese cabinet reported to the Emperor today that President Wilson's decision not to interfere with the proposed legislation in California to prohibit ownership of land by aliens would make it necessary for Japan to present a test case before the Supreme Court of the United States to prove that the Japanese were not of Mongolian origin and were therefore entitled to citizenship in the United States.

STATE CONVENTION EVANGELICAL ASSOCIATION

The State Convention of the Ministerial Young Peoples Association and Sunday schools of the Evangelical Association will be held in the Bowman church beginning Tuesday, May 13 and lasting through the following Sunday.

For the Kiddies After School

Give the kiddies Velva on bread, after school. They'll love it, because it's good, because it's

flavorful, because it satisfies the hunger for sweets that every child has. Besides, it will do them good, because it's nutritious.

Chocolate Taffy
1/2 cupful Red Velva Syrup, 1 cupful sugar, 1/2 cupful milk, 1/2 cupful butter, 1 lb. bitter chocolate, 1/2 teaspoon vanilla extract. Put Syrup into a pan, add chocolate, butter, milk and sugar, boil steadily 20 minutes, stirring now and then. Add extract, pour into a buttered tin.

VELVA

It is that better syrup with the RED LABEL—a clean, sanitary package that ought to be on every pantry shelf. It's fine for desserts and great for cake. It helps wonderfully on griddle cakes, waffles or hot biscuit. In the green cans, too.

If you prefer it. Both kinds 10 cents up. Send for the book of Velva recipes. Nothing to pay. PENICK & FORD, Ltd. New Orleans, La.

WEALTH INCREASE DURING MARCH

APPROXIMATE INCREASE IN TEXAS LAST MONTH WAS \$47,420,000 GROSS WEALTH

AGRICULTURE IN THE LEAD

Agricultural Production For Month Was \$19,250,000, Foreign Capital Next Factor

Fort Worth, Texas, April 14.—There was an approximate increase of \$47,420,000 to the gross wealth of Texas during March which is a gain of \$3,835,000 or 8.8 per cent over the preceding month, according to statistics compiled by the Texas Commercial Secretaries and Business Men's Association.

Agriculture was the greatest factor in the increase with a total of \$19,250,000, a gain over February of \$2,000,000 or 11.5 per cent.

The different sources of increased wealth during March were as follows: Agricultural production—\$19,250,000. Foreign capital—\$15,100,000. Factory production—\$12,000,000. Mineral production—\$990,000. Fish and oysters—\$80,000. Total—\$47,420,000.

Agriculture.

Reports from the Southern Texas Truck Growers' Association state that over 200 cars of products were hauled by them during March, principally lettuce and cabbage. So far this spring the above association has handled more than 350 cars of truck products.

From the Alvin district reports indicate that over ten cars of farm products were shipped during the month. A total of 150 carloads is expected to be shipped from this section this season. Berry shipments exceed any previous year and the crop is well colored and developed.

The lower Rio Grande Valley section moved more than 100 cars of mixed vegetables during the past three years. The recent freeze curtailed the output to a great extent.

A total of 650 cars of farm products were shipped from Texas points during March.

Information received from East Texas fruit growers indicates that the damage done by the recent freeze was not as heavy as first reported.

Lumber.

The Gulf Coast Lumbermen report that the production of lumber in East Texas has been about three-fourths of normal on account of continuous rains making logging difficult and costly.

The timber cutting during the month is estimated at one and a half billion feet.

Conditions of the yellow pine trade are very bright from a Texas standpoint.

Yard stock demand is good; mill stock is being reduced and the market is expected to be bolstered by the middle of spring.

Livestock.

Livestock receipts by the Texas markets during March reached a total of 178,900 head valued at approximately \$4,470,000. The total receipts show

a gain of 41,650 head over the preceding month.

Hog receipts during March exceeded those of last month by 10,900 head.

Mineral Production.

The value of the output of the mines and wells of Texas during March was \$990,000, an increase of \$45,000 over the preceding month. There were 1,232,901 barrels of oil produced, a daily average of 39,771 barrels, the total being valued at approximately \$230,000. The coal and lignite production was about 125,000 tons valued at \$157,000.

The daily production of the Wichita fields, which include Electra, Burk Burnett and Petrolia districts, was about 19,871 barrels. This is a new high record and both the Electra and Burk Burnett fields are being extended daily.

Fish and Oysters.

The fish and oyster industry shows a marked increase over the February catch. The total value of the output was \$800,000. There were approximately 14,000 barrels of oysters and 285,000 pounds of fish taken from the Texas Gulf coast waters during the month of March.

CAUSE OF IMPURE BLOOD

Druggist Tells of Best Remedy. Pure healthy blood is a most essential factor to good health.

Poor, thin, devitalized blood may be caused by a weakness of the digestive organs, an accumulation of waste matter in the system, an inactive liver or lack of exercise.

Whatever the cause, the best remedy we know is our delicious cod liver and iron tonic, Vinol. It will purify and enrich the blood, tone up the digestive organs, give you a hearty appetite and create strength.

A case has just come to our attention from Schenectady, N. Y. Mrs. Hattie Hall says: "I was forcibly reminded that my system was run down and my blood in bad condition by an abscess forming in my side which required treatment for several weeks. Under the regular use of Vinol to purify and enrich my blood and build up my strength this was soon healed and my general health was much improved."

If you have the slightest indication of poor blood take Vinol. If it fails to help you we will give back your money.

PANAMA-PACIFIC EXPOSITION IN THE MAKING; ARMY OF WORKMEN CHANGING WEST COAST INSIDE GOLDEN GATE AT 'FRISCO INTO MAGIC EXPOSITION CITY

Workmen Laying Mains, Niche in the Great Statuary Court of Four Seasons and View Through the Portico of the Service Building, First of the Expo Structures to be Completed.

The world is watching the Panama-Pacific International Exposition in the making. An army of men is busy on the site, extending almost three miles along the shores of San Francisco bay. The preliminary work is finished. All fourteen of the main exhibit palaces will be under construction by the coming summer. All will be completed by June, 1914.

W. D. A. Ryan, who has charge of the illumination of the Panama canal, is working out a marvelous night lighting plan in harmony with the glorious color scheme created by Julius Guerin. There will be no glare and no dark places or shadows by night.

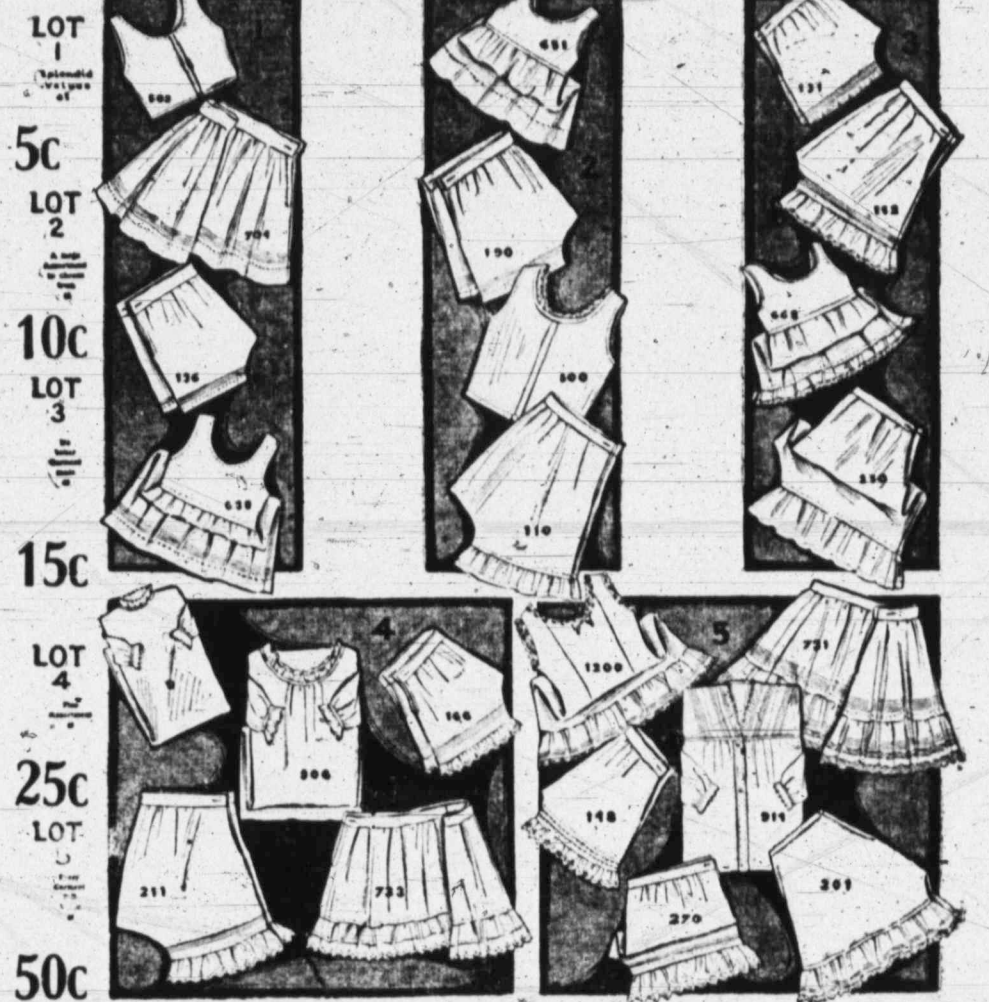

Eighty conventions already have voted to meet in 1915 in the \$1,000,000 auditorium to be built at the new civic center. The Welsh National Bazaar is offering \$50,000 in prizes for its chorus competitions. Twenty-seven nations already have accepted invitations to take part in the exposition. This beats all records and signifies the great interest with which America's work at Panama is regarded.

To care for motor exhibits a huge Motor Palace, covering five acres, will be constructed. It is said that no single industry will have ever presented an exhibit so vast in extent. The Machinery Hall, which is to be the largest single building on the grounds, will be 367 feet in width and 270 feet long. All exhibits of machinery are to be shown in this building.

Beneath a huge tower, the visitor will enter the exhibition city through an arcade, 125 feet in height, to the most splendid of the effects of the exposition, the Court of the Sun and Stars, which will stand out among the most brilliant creations of the great expositions of America and Europe. Some of the towers and minarets will rise 175 feet and 520 feet. Concessions will occupy 65 acres. The Santa Fe railway is spending \$2,500,000 on a representation of the Grand Canyon of the Arizona. A model of the Panama canal will cost \$250,000 Japan is to spend a

TEXAS PROGRESS DURING MARCH

CONSTRUCTION ACTIVITIES THROUGHOUT TEXAS WERE MORE PRONOUNCED LAST MONTH

WICHITA FALLS' RECORD

Good Roads Campaign of Past Year Is Now Showing Good Results

Fort Worth, Texas, April 12.—During March the construction activities throughout Texas were more pronounced than in either of the two preceding months of this year, especially in the erection of new business houses and residences in the larger cities.

Building permits in the nine leading cities, population basis, aggregate \$2,405,992, which surpasses any previous month in this year. Cities and towns all over Texas, in reports to the Texas Commercial Secretaries and Business Men's Association, tell of unusual progress and growth, notable being the report from Wichita Falls of \$197,259 in building permits during the month of March.

The Good Roads campaign that has been in progress in this state for the past year is showing results, there being a total of \$1,120,000 voted upon in road precincts of seven different counties during March. Five of these resulted in issues, aggregating \$920,000 being carried, while in two counties the necessary two-thirds majority to carry was lacking.

Every city and town in the state, through its Chamber of Commerce or Commercial Club, is engaged in a spirited campaign to secure more factories with the result that during March a large number of new manufacturing concerns were chartered and more than fifty started operations.

The Gulf, Texas and Western completed the extension from Jackboro to Shreveville during March and the road was opened, while the Kansas City, Mexico and Orient Railway extension from Girvin to Alpine was completed and the line is expected to begin operations about April 15th.

Good Roads Bond Elections. During March road precincts in seven different counties of the state voted upon issuing a total of \$1,120,000 in good roads bonds. Five counties voted favorably upon the issues, resulting in \$920,000 for good roads, while in two counties the issues, in-

volving \$200,000, met defeat for a total of a necessary two-thirds majority. The counties in which the issues were carried were: Navarro, \$400,000; Matagorda, \$300,000; Nueces, \$100,000; Chambers, \$100,000, and Cameron, \$100,000. Issues of \$100,000 each met defeat in Colorado and Dickens counties.

The interest in highway improvement in Texas is statewide and the passing of a bill creating a state highway department by the Thirty-third Legislature is notable. The activities of the various committees in the good roads movement is indicated by the unusually large number of special county road laws passed by the last legislature.

The commissioners' court in Hays, Brazoria, Limestone, Polk, Midland, Glass, Kerr and Henderson counties has set dates for good roads bond elections—issuing \$900,000.

Building Permits. The building permits issued in the nine cities having the largest population totaled \$2,405,992 during March, compared with \$1,596,917 during the previous month. The building permits in Dallas were exceptionally large being \$1,020,100 for the month.

The amounts of the building permits issued in the nine cities in population were:

Dallas	\$1,020,100
Houston	588,695
Fort Worth	219,082
San Antonio	193,830
El Paso	171,228
Waco	163,850
Galveston	51,831
Austin	35,917
Beaumont	21,467

Total \$2,405,992. The Gulf, Texas and Western Railway completed the extension from Jackboro to Shreveville during March and the road was opened March 26, 1913. This line is 100 miles long and work began in June, 1912. It has a joint arrangement with the Weatherford, Mineral Wells and Wichita Falls and Southern Railroad.

The Kansas City, Mexico and Orient Railway extension completed the line from Girvin into Alpine, a distance of 30 miles in March. Nineteen miles of steel were laid during the month. The line from Fort Stockton to Alpine will be in operation about April 20th.

The J. & T. C. Railway began laying steel in earnest on the Giddings Stone City extension and about seven miles of track was placed during the latter part of the month. The piers at the Brazos river were also completed.

The Santa Fe Railway reports track laying progressing on the Coleman cut-off on the Lubbock-Texas extension. Six miles of track were laid out of Lubbock in March and is progressing

at the rate of about a half mile per day.

The Paris and Mount Pleasant railway reports grading completed and eight miles of steel laid during March. 1148 feet of bridging was built and 5 miles of track surfaced.

The San Antonio, Uvalde and Gulf Railway reports 14 miles of steel laid below Cambellton towards the Gulf. During the month the first shipments of nine thousand tons of rail to be used on the extensions of the coast division began to arrive and it is expected that by July the track will be laid into Mathis where connection will be made with the San Antonio and Aransas Pass Railway. There are 232 miles of road operated by the San Antonio, Uvalde and Gulf railroad.

The Paducah-Roaring Springs extension of the unanah, Acme Quid Pacific railway is now laying steel and expect to open the line for traffic about May 15th.

The San Antonio, Fredericksburg and Northern Railway are still at work on the grading but expect to begin laying steel during April.

The Dallas-Waco-Corsicana Interurban received three steel bridges during March and rapid progress was made on both the extensions between Dallas and Corsicana, and Waxahachie and Waco. Twenty miles of steel were laid on each of the two lines during March. The total mileage under construction for the Southern Traction Company at present is about 125 miles.

The Rio Grande Valley Traction Company has completed ten and a half miles of grading on their line between El Paso and Ysleta and the remaining three miles is expected to be completed at an early date. Overhead work has started and 100 tons of steel is expected early in April. The probable date of completion will be July 15th.

The San Benito and Rio Grande Valley Interurban in the lower valley reports one mile of steel laid from Mission to Monte Cristo during March and one mile graded on the Brown Loop, twenty miles of which is now under construction. There are 60 miles of interurban now in operation between the following towns: Rio Grande, Santa Maria, Lagaloma, Carriectos, Mission, Monte Cristo, Alton and Cardinal, and San Benito.

The Anna Blue Ridge-Greenville Interurban reports that seven cars of steel and three cars of ties have arrived at Anna for this line. It is expected that the work will be completed on this road in a few weeks.

The Eastern Texas Traction Company reports grading and bridge work progressing rapidly on the Dallas-Greenville interurban and that 50 per cent of the grading is now completed between Dallas and Rockwall and as much of the remainder is more than half completed.

This is the Type of Homes You Have Been Looking For

A FIVE-ROOM MODERN BRICK HOME, PLASTERED THROUGHOUT AND LOCATED IN A CHOICE SECTION OF FLORAL HEIGHTS. This house must be seen to be appreciated. Its arrangement, finish and completeness makes it an ideal home. The material used in its construction is of the best grade. Being plastered throughout it assures one of a sanitary home, one that is warm in winter and economical to heat, and on the other hand is cool in summer. Has hot and cold water to every fixture, bath, lavatory, commode, and natural gas in every room. A brick house costs less to maintain in insurance, painting and deterioration and it gives the greatest amount of home comfort. Located on 9th street 1-2 block west of bend in car line. On continuous sidewalk and adjoining restricted district. Also on the only 100 foot street in the city. Look over the property before you pass judgment on the price. Then you will concede it is the cheapest property in Wichita Falls.

SOCIETY WOMEN MOVED BY WHITE SLAVE TALK.
New York, April 14.—"You women of good homes and quiet lives do not realize the perils that young girls in this city are subjected to. Hundreds of unfortunate girls are being forced into white slavery every year in this city. New York is worse than Chicago. We need money to fight this devilish crew. Who will help?"

When Clifford G. Roe of Chicago, an associate of John D. Rockefeller Jr., in vice crusading, concluded his talk before 700 women in Sherry's restaurant Sunday with an appeal for funds, a quietly gowned woman of middle age left the audience, hurried to Mr. Roe, and handed him a gold ring with a setting of diamonds and rubies.

"Please take this ring," she said. "Sell it and devote the money to the cause. I have little money to give away, but I can do without this ring. It is a family heirloom. My father gave it to me just before he died. I offer it to you as a memorial to him."

Mr. Roe, as the active representative of the American Vigilance association, the organization that is conducting a nationwide fight against the vice traffic, has had many curious experiences, but, as he said, he had never seen a woman so moved by his appeals as to strip herself of jewelry. He tried to learn the woman's name, but she refused to give it.

Frankest Possible Terms.
The women who listened to Mr. Roe in Sherry's and in the Park Avenue hotel heard white slavery explained in the frankest possible terms. Miss Janet Richards, of Washington, who conducts fortnightly meetings in this city, invited Mr. Roe to appear and to tell the exact truth about the vice traffic. She said to the audience of women at the outset of the meeting in Sherry's:

"I have asked Mr. Roe to call things by their right names. Some of you may be shocked. I warn you in advance. Perhaps some of you would like to leave before Mr. Roe begins to talk."

Miss Richards waited expectantly, but not a woman of the 700 left the room. Later many of them flinched nervously, but they stayed, nevertheless.

"My experience has convinced me," said Mr. Roe, "that girls in New York are in more danger than girls in Chicago. The public conscience is much keener in Chicago. People in this city are interested for a little while. Then they lose touch with the situation. People here seem to be more callous than in the great western city."

IF YOU ARE A DRINKING MAN
You had better stop at once or you'll lose your job! Every line of business is closing its doors to "drinking" men. It may be your turn next. By the aid of ORRINE thousands of men have been restored to lives of sobriety and industry.

We are so sure that ORRINE will benefit you that we say to you that if after a trial you fail to get any benefit from its use, your money will be refunded.

When you stop "drinking," think of the money you'll save; besides, sober men are worth more to their employers and get higher wages.

Costs only \$1.00 a box. We have an interesting booklet about ORRINE that you are giving away free on request. Call at our store and talk it over.

Matinees Every Afternoon 2:30. Prices 5c and 10c. Night Shows 7:30 and 9:00. Prices 10c and 15c.

A Prescription

Is a physician's order for medicinal agents used for the alleviation of pain and the cure of disease. This order is of vastly more importance than your grocery order. If your groceryman sends you spoiled strawberries or petrified beef steak you know it the moment you see it but if your druggist uses cheap imitations in the prescription for your child that is sick you do not know any difference. If your child should die you would think it was fate; if it recovered you would be thankful but you would never know whether your prescriptions were correctly filled with standard goods or not. Years of experience has taught us the gravity of the responsibility that rests on the shoulders of the man whose duties are in the silent prescription room where every effort should be made to aid the physician in his fight to save life. It is here that paltry dollars are not a consideration and price is of no importance. When a life hangs in a balance that a grain of dust would break you would throw in the earnings of years of toil and give every thing but your soul to bring the sick one back to life and health. Should misfortune overtake you remember our mission is to help you and there is nothing in the markets of the world that is too expensive or far away for us to get for you.

NEGLIGENCE

WHAT does an unmarked grave call to mind? You look upon it and wonder who they were. Every cemetery shows the unmistakable outline of unmarked, unremembered graves, and as we look we know their life was as full of all the human emotions, of love paths and tragedy as our own.

Inattention, neglect, penury, who can tell? The unremembered spot, it is unmistakable proof that some one has lived, and that the name, together with all that life holds dear has perished from this earth.

There are more unmarked graves in Riverside cemetery than any city of like size in the state. What is it? Inattention, neglect, or plain penury. We upon investigation are inclined to think it is the former in most cases.

Don't Sacrifice Quality for Quantity

There is no economy in buying cheap Groceries. Every housewife knows this, or ought to know it, and a careful comparison will prove it. Our business has been builded upon the plan of handling only the very best grades of goods—giving the very best values, but never sacrificing for quantity or price.

We take pride in the knowledge that not a single customer has ever gone out of our store dissatisfied. Our prices are low—when the quality is considered, and a dollar spent with us buys a full dollars worth of groceries—no matter who buys them.
