ONCE  
There was a large girl of the steam-roller type of beauty who was known as a native in one of those abbreviated municipalities that boasts three bath tubs and has a City Marshal that pinches everything on wheels that exceeds four miles an hour. Samantha, whose name was wished on her when she was too young to get out an injunction, was popular with cats and bachelors of uncertain age, but just when she thought she had winged a sympathizer of the masculine variety he invariably got interested in the scenery and the weather and went chasing off after some ninety-pound gun-chewer who knew how to wear clothes and the pink chamomils dipped in La Blanche, leaving Samantha on the edge of a cloud with no parachute. Samantha wound up by being president of the Snashville Society for the suppression of all forms of wickedness, including chewing gum and Coca Cola. The reason Samantha did not make a home run and beat the ball to Hymen's was that she did not know the game.

**MEMORIES REWARD**

What a great satisfaction is the thought of being loved and revered by our dear ones, even after we have passed that "Undiscovered country from whose bourne no traveler returns."

There are good and worthy citizens here in Wichita Falls whose memory will be honored and revered long after they have lain their armor down. But we have in mind just now a very worthy one whose grave and the plot on which he is buried looks as bad as the graves of a couple of notorious characters do. This same party left plenty for his loved ones. A friend of his said to me the other day: "It's a shame." We would like to see the relatives of such a worthy character place something to their memory even though they bought it from a mall order house.

Of course, we could not interest such careless or indifferent classes, but we want to see all who are interested.

"TESS OF THE STORM COUNTRY" AT THE MAJESTIC MONDAY

Tessibel Skinner, a wild, motherless little elf, lives with her father in a rude hut on the shore of Cayuga Lake. On account of the sudden and regular squalls on the lake, the vicinity is called the "Storm Country"; while the poor and ignorant fisher folk thereabout are generally known as squatters. Tess is one of these people and adores her uncouth father, who lives by poaching and the illegal netting of fish. One day he is found near the body of a murdered game-keeper with a rifle close by containing one empty chamber. Skinner is accused of the murder and convicted on circumstantial evidence. Tess is frantic with grief and anxiety but Frederick Graves, a handsome theological student, and his sister, Teola, befriend Tess. Frederick tells her of God, of whom she has never heard and His written word, the Bible, and bids her pray and have faith. Tess steals a Bible from the Mission Church, painfully spells out the lessons taught her by Frederick and the untutored girl's faith brings her a wonderful strength and hope. Professor Young, an eminent legal authority and an influence in the community, touched by her profound faith in a Power that will aid her father, intercedes for her and secures a new trial for her father. Tess is happy over this evidence of God's love for her, but gives Frederick Graves more credit than she does the professor. Tess and Frederick meet again, and one day as they stand in the squalid hut, looking into each other's eyes, Tess innocently receives her first kiss of love. Frederick loves and reveres the little ignorant girl for her pure nature and strong faith and Tess, who hardly knows what has come into her bleak life, puts Frederick upon her pedestal of faith and almost worships him as a symbol of the God she does not understand. Elder Elias Graves, Frederick's father, a religious but bigoted and narrow man, the relentless enemy of the squatters does his best to secure the conviction of Tess's father. Teola Graves is betrothed to Dan Jordan, who perishes in a fire and leaves

Teola worse than widow. Teola does not dare tell her proud, harsh father of her pitiful plight. Tess hears her weeping one day in the woods, and takes her to the hut, sheltering her there when her babe is born. To shield Teola, Tess takes the child and cares for it. Frederick calls and circumstances force him to believe it is Tess's child. Rather then expose and disgrace his sister, who is now very ill, Tess allows him to believe the child hers and he denounces her as a worthless woman, taking her Bible from her. Tess, knowing that her idol has fallen also, but declares that though he has taken her Bible, he cannot take away her God and left alone, falls on her knees in prayer. Her life now becomes a hard one, indeed. Her father is still in prison. Frederick avoids her, the other squatters comment openly on her "fall," and one of the fishermen persecutes and insults her, but she persists in her sacrifice for Teola and her faith in God. At last, in a tragically dramatic scene, Elder Graves publicly denounces Tess and the fatherless babe she holds to her breast. But Teola, roused by her father's denunciation of Tess, can remain silent no longer and now comes forward and in the presence of the big assemblage takes her baby in her arms and claims it as her own. The proud Elder Graves is overwhelmed with shame and remorse, and Tess is freed from the shadow of disgrace. Teola and her sickly babe both die, and the Elder writes a pleading note to Tess for her forgiveness, which the humble Frederick bears to her. Another fisherman is found to be the murderer of the game-keeper.

"PERILS OF PAULINE" AT THE EMPRESS WEDNESDAY

Having left Harry on the road for dead, and having Pauline in his power, Hicks takes her to an old house and locks her up. As he leaves the room he lights a cigarette and carelessly throws the match away. It lights in some straw and sets the house on fire. Hicks starts to put the fire out but gets an idea and walks

out, leaving Pauline to her fate. Harry has revived and tries to follow the trail taken by Hicks. He meets an old farmer who has seen an automobile pass that looks suspicious, Harry borrows one of the farmer's horses and follows. In the meantime Owen has notified the police that Pauline is missing. One of the newspapers hears and sends a reporter to get the story. He meets Harry and joins him in the search. They are attracted to the burning building and Harry Pauline's cries for help, breaking down the door, they rescue her just in the nick of time. The reporter has a big story and does it full justice in the papers the next day. The publicity is very annoying to Pauline and Harry, so she decides to go away for a time. She sends a telegram to her uncle in Montana that she is coming to visit him. Harry telephones the message to the telegraph company and is overheard by Owen, who arranges at once to go to Montana with Hicks. Pauline's uncle arranges some real western life for her in the shape of a fake holdup by some of his cowboys. Hicks also arranges with some bad men to hold up Pauline on her way from the station. The Hicks hold-up is successful as the uncle thinks it is his own pre-arranged joke. By the time he reaches his mistake the party with Pauline is far away and Harry is not at hand to go to her assistance. This episode is wonderfully thrilling and is probably the best of all the episodes that have been shown yet. This seventh episode will be shown at the Empress Wednesday.

MAN RAN TO HELP WOMAN, IS ATTACKED WITH KNIFE

Cutting In Resort Friday Night Almost Results Fatally—Shoe Clew To Knife User

O. M. Ness employed by a local music firm which handles automatic pianos was seriously cut Friday night by unknown parties when he attempted to stop a man beating an inmate of a resort where Ness had been called to repair a piano. Ness was at work on a piano when a woman's screams and cries for help and sounds of blows upon her body caused him to run to the door of the room from whence the cries of distress emanated. He was trying to force open the door, according to accounts, when he was set upon from behind and cut several times.

Loss of Blood Almost Fatal. One of the cuts severed an artery in his temple and cut one of his ears in two about the middle. Another cut a gash about four inches long down the side of his throat and a third cut a long but shallow gash across his abdomen. It is believed that a companion of the man who was beating the woman cut Ness but in the confusion he, with the man who had attacked the woman escaped. Physicians and the police were called. Ness almost died from loss of blood from the severed artery on the temple before a physician could reach him but is now believed to be out of danger.

Woman Beaten With Shoe. The woman told the officers that the man who was beating her was using his shoe. She was badly cut about the head but her injuries are not of a serious character. Her assailant ran off leaving his shoe and hat in the room. This man and the one who cut Ness are believed to live in a nearby town and the officers believe that with the shoe and the coat for a clue they will be able to locate both of them at about the time of the cutting. A hatless and coatless man was seen by automobile riders running up Tenth street at breakneck speed.

OIL ACTIVITY CONTINUES IN THE PETROLIA DISTRICT

Petrolia Round-Up. Brown & McAlester are drilling some more shallow wells on their leases in block 15. Judge Allen is building a new push and pull pump station and is having more shallow wells drilled on his lease in block 15. Landrum contracted for seven new wells and the first brought in this week was 4 barrels. Mr. Allen has nine old wells that average three barrels each. The new engine is a Super 20 horse. A Howell well in old Oil City is on the hard rock at 1450. They passed up a gas strata at 1640 which was estimated at 18 million cubic feet. The Four Sands Oil Co. are down 1400 feet, will pass up the 1640 gas and go to the 1700 oil. The Farmer Oil Company has let a shallow well lease near their deep wells and the first came in at 260 feet and was five barrels. Smith Webber No. 2 was drilled in today and Pink Hammonds the contractor seemed disappointed because it was a gas well and not oil. It was estimated at 15 million. Hammonds, Nelson and McAlester on Holmes one acre tract set at 1710. We guess it be gas as it seems that is all that can be found on that hill since the Cullerson big oiler came in. Ernest Cain reports the second shallow well finished for Palmer Oil Co., each well 255 and 258, four barrels each. The new deep well on the Henry Worth tract near the Lone Star pump station, has set. pressed by the British Admiral. Sir Percy Scott, that the development of submarines and hydroplanes made dreadnoughts and large cruisers obsolete has caused much discussion in German naval circles. So far as their public utterances go, German naval experts unanimously reject Admiral Scott's views. The German Fleet Society has pronounced itself decidedly against it, and now Admiral von Breusing has published an article, taking the same position. He admits that the submarine has recently made great progress and now exceeds the hopes that were at first held for it; and he also admits that the means of protection against the submarine had not been developed at an equal pace. Nevertheless the submarine range of activity is a limited one. Even if it should put the dreadnoughts out of commission in shore-waters, the latter would still be needed for operation on the high seas, where as yet, nobody expects that the submarine can venture owing to its constant need to replenish supplies.

## MAKES RHEUMATISM PROMPTLY DISAPPEAR

Chronic, Crippled-up Sufferers  
Find Relief After Few Doses  
of New Remedy are  
Taken

It is needless to suffer any longer with rheumatism, and be all crippled up, and bent out of shape with its heart-wrenching pains, when you can surely avoid it.

Rheumatism comes from weak, inactive kidneys, that fail to filter from the blood, the poisonous waste matter and uric acid; and it is useless to rub on liniments or take ordinary remedies to relieve the pain. This only prolongs the misery and can't possibly cure you.

The only way to cure rheumatism is to remove the cause. The new discovery, Croxone, does this because it neutralizes and dissolves all the poisonous substances and uric acid that lodge in the joints and muscles, to scratch and irritate and cause rheumatism, and cleans out and strengthens the stopped-up, inactive kidneys, so they can filter all the poisons from the blood and drive it on and out of the system.

Croxone is the most wonderful medicine ever made for curing chronic rheumatism, kidney troubles, and bladder disorders. You will find it different from all other remedies. There is nothing else on earth like it. It matters not how old you are, or how long you have suffered, it is practically impossible to take it into the human system without results. You will find relief from the first few doses, and you will be surprised how quickly all your misery and suffering will end.

An original package of Croxone costs but a trifle at any first-class drug store. All druggists are authorized to sell it on a positive money-back guarantee. Three doses a day for a few days is often all that is ever needed to cure the worst backache or overcome urinary disorders.

The meeting under tent in factory addition has closed, with several professions and four admissions for baptism. The tent will be located elsewhere in city this week. Further announcements will be made in Monday's paper.

## WOULD TAKE PLACE OF HOUSE OF LORDS

PROPOSED NEW CHAMBER WOULD  
ELIMINATE THE HEREDITARY PRINCIPLE.

### TO CONSIDER QUESTION SOON

Will Be Taken Up, But With Small Chance of Adoption in Near Future.

By Associated Press.  
London, July 4.—During the month of July the prime minister will lay before the House of Commons the proposals of the government for a constitution of a new second chamber to take place of the House of Lords. It is not expected that any attempt will be made this year to translate these proposals into law, but they are being made in accordance with a promise in the King's speech at the opening of Parliament that they would be submitted for consideration during the present session. While the scheme is not yet complete it is known that the hereditary principle, which even many Unionists oppose will be largely or entirely

eliminated, and that the other churches of the Kingdom will be given similar representation to that now enjoyed by the Established Church of England. What the Liberal party, except those opposed to any second chamber at all, aims at is to secure that the new second chamber shall, to a large extent, be in union with the House of Commons. In order to obtain this it is probable that every freshly-elected House of Commons will have the right to nominate a certain proportion, perhaps one-third, of the second chamber. Thus if a House of Commons is Liberal, so will be the other branch of the legislature, and, if on the other hand, it should be conservative, it will be able to constitute the second chamber in harmony with its own views.

As the House of Commons is becoming more and more a House of groups, it would follow that the various groups would have representatives in the second chamber, and England may yet live to see a Liberal, Socialist and even Irish Nationalist, seated on the benches now sacred to peers of the realm. If this plan were adopted it would be a question whether it would be necessary to continue those provisions of the Parliament act, which prohibit the Upper House from voting twice.

However, this is one of the tremendous tasks which the Liberal party has undertaken and to carry which it must overcome not only the opposition of the Unionist party, the

church, the present peers, but that great body of English conservatism which will brook no change in established things and customs.

MAY INVITE EUGENE DEBS TO DELIVER ADDRESS HERE

Prominent Socialist Will Be in North Texas in August and May Visit This City

Eugene Debs, many times the Socialist nominee for president of the United States, will be in North Texas in August and some of the local Socialists are planning to bring him to this city for an address if possible. Local Socialist circles have been somewhat disrupted recently since J. J. Manley and O. D. Cottrell, two of the erstwhile leaders of the local organization were expelled. These two refused to support the Socialist put out by the Socialists in the city election and were voted out of the local by the other members, after charges had been filed against them.

GETTING READY FOR SOUTH POLAR TRIP

LARD, SUGAR AND NUTS TO BE PRINCIPAL DIET FOR PARTY.

1800 MILE MARCH IS PLANNED

Explorations Will Cover Antarctic Continent and Hard Trip Is in Prospect.

By Associated Press. London, July 4.—All the provisions for Sir Ernest Shackleton's trip across the South Polar Continent are to be packed in sausage skins. "They are the most nutritious part of the composition," says Sir Ernest. "We tried them in Norway, but did not succeed. We shall no doubt do better at the South Pole when we are more hungry."

The menu prepared for the party is not an enticing one. It has been decided upon, however, under the advice of the Royal Army Medical College, and is made up of food that is easy to transport and at the same time will keep the body warm and strong. The rations will be 36 ounces a day, compared with the average of three pounds a day eaten by the ordinary person. In the latter there is a lot of waste which has been eliminated from the rations of the explorers.

The Daily Schedule. There will be daylight during the whole five months the party is on the march, so the ordinary day of twenty-four hours will be disregarded, and a new day of nineteen hours established. Supposing the hour for rising on the first day is seven o'clock, the timetable will work out on these lines:

7 a. m.—Preparations for the start and breakfast, consisting of three ounces of pure lard per man, two ounces of sugar, one ounce of dried milk, wheat protein and oats. 8-12 p. m.—Rest and lunch, consisting of nut food, composed of Brazil, almonds and beach nuts, mixed with oil, and dried milk, oats. 1-5 p. m.—March. 2-7 p. m.—Pitch camp, rest and take dinner, consisting of the same food in the same quantity as breakfast. 7 p. m. to 2 a. m.—Sleep. The same round of nineteen hours will then be repeated. Sir Ernest explains that the lard and sugar supply heat; the protein builds up muscle; the nuts are the most

nourishing food in the world; and the oats, mixed with other rations, afford the bulk necessary to keep the organs from becoming atrophied. "You may feel rather sick when you hear of it," said Sir Ernest, "it's rather a greasy compound. Indeed, when we tried it in Norway we thought it a very unpleasant sort of ration, but I can assure you that, scientifically considered, it is the finest that has ever been devised. I hope that this time hunger will play a very small part in our troubles."

Making Careful Plans.

As the party intends to cut right across the continent, a march of 1800 miles, they will have to carry all their food with them and cannot, like previous explorers, whose objective was the pole, depend upon food depots on the return march. Therefore, the greatest attention is being paid to provisions. The organization is perfect so far as human ingenuity can devise. They are allowing fifteen days' food for blizzards, but they can go on much shorter rations if necessary. To carry the food motor sledges with aerial propellers will be used for the first time, and in addition there will be one hundred Canadian dogs which can carry 100 pounds each.

For protection while sleeping a sleeping hood, something after the fashion of an automobile hood, is to be used. This weighs 37 pounds and accommodates six men whereas the old tents weighed 30 pounds and accommodated three people. The first nine hundred miles of the journey will be across land never before covered by man, and it is here that the chief difficulties are looked for. With the last 800 miles Sir Ernest is fairly familiar, having crossed and recrossed it on his trip to the pole.

GRANDFATHER FARMER KILLED WHEN HIS TEAM RUNS AWAY

(Frederick Leader) George Hill, a farmer residing north of Grand Falls, was killed and his daughter, Mrs. Della Dallas, was severely injured Friday evening when their farm team ran away. The accident occurred between seven and eight o'clock on the Hill farm. Mr. Hill and Mrs. Dallas were engaged in hauling a load of sheep, oats and were riding on the load. In crossing a ravine in the pasture, Mr. Hill slipped off the load onto the team. This scared the horses and they ran. Mr. Hill fell from the wagon and the wheels of the wagon passed over the side of his chest, crushing it, and causing death within several min-

utes' time. His neck was dislocated, evidently by the fall. He was never able to speak after the accident occurred. Mrs. Dallas fell off the load to one side, but was not run over and suffered no broken bones. She was injured, but it is not believed that her injuries are of a permanent character.

ANTI-VACCINATIONISTS ARGUMENT IS NOW UPSET

By Associated Press. Berlin, July 4.—The anti-vaccinationists are about to lose their strongest argument: Their most telling objection against vaccination has long been that it was impossible to get absolutely pure vaccine matter; notwithstanding the greatest precautions,

like the use of calves under specially sanitary conditions, the lymph obtained would not infrequently contain deleterious germs. According to the German Medical Weekly, however, a way has at last been found for sterilizing lymph so that its purity can always be relied upon. This has been accomplished by Prof. E. Friedberger and Dr. E. Mironescu, who have availed themselves of the well-known prin-

ciple that the ultra-violet rays of light are destructive of bacterial life. The virus is put into small tubes of quartz glass, which are then exposed to the ultra-violet rays of an electric lamp in twenty or thirty minutes there is not a live germ left in them. ### INTERESTING BIT OF HISTORY TOLD

#### DID MCKINLEY FEAR WAR WITH GERMAN EMPIRE IN 1897

#### HIS CABLEGRAM TO SAMPSON

#### German Writer Declares President Told Admiral Not to Risk a Single Ship.

By Associated Press. Berlin, July 4.—Did President McKinley cable to Admiral Sampson during the war with Spain: "Don't risk a single ship; war with Germany imminent?" A writer who uses the pseudonym of Carolus Adolphus and who is understood to be a former prominent diplomat, declares that this dispatch was sent, following closely on the Dewey-Hedrich dispute at Manila. The statement is made in a book entitled "Julchen in the Land of Liberty," which consists of a series of letters describing a trip to America. One of these letters describes the Manila incident and continues: "The question is, what did our diplomats have in mind in sending a fleet? If it had been merely a mat-

ter of protecting Germany's life and property, an armored fleet would have been sufficient. The truth is, however, that we really intended to grab the Philippines. If possible, since we were badly informed and believed that Americans did not want them. This mistake of ours was strengthened by the then ambassador in Berlin, Mr. Andrew White. He is believed to have held the opinion that by occupying the Philippines the United States would simply be thrusting a fishhook into its own skin—and he was not so far wrong—and he expressed this opinion, howbeit quite unofficially in Wilhelmstrasse, although he later denied officially that he had said anything of the kind. "In any event, the sending of our fleet to the Philippines provoked great displeasure in America, especially since Washington knew of our plans. I recently made the acquaintance of an American officer who had been the adjutant of the commander in chief of the Cuban campaign. This officer, who spoke excellent German told me that he still had a copy of a telegram from the then President McKinley direct to the commanding admiral in Cuban waters which read: "Don't risk a single ship; war with Germany imminent." "This is an absolute fact, and the historians can take official notice of it." Pyrene fire extinguishers. For use in the home, store, garage, factory or other buildings. ### ACTORS BADLY TREATED BY GERMAN THEATER MANAGER

By Associated Press. Berlin, July 4.—An astonishing commentary upon the conditions in the German theatrical world, has been furnished by a libel suit at Munich. Ernst Schruppf, director of the Munich Folk's Theatre, brought action against the publisher of a magazine devoted to stage-affairs who had accused Schruppf of mistreatment of his employees. The testimony at the trial disclosed conditions which moved the presiding judge to declare that "we have experienced a great deal in this courtroom, but never before such testimony as this process has brought to light. The poorest workmen are better off than these actors. Workmen, would not endure such treatment." Uncontradicted testimony showed that Schruppf was accustomed to strike and kick actors and to lash them with a whip; that actresses were engaged at a salary of \$15 to \$22.50 monthly and required to furnish their own wardrobes, although the theatre was extremely profitable and Schruppf had become rich through its management; that the director had declared in the presence of the whole company that "it is a pity that we are not in Russia, so I could walk into you with a knout," that he had struck a woman prominently in the face with a bunch of keys (German keys are so big and heavy that a bunch of them is almost a deadly weapon). The testimony concerning the plaintiff's conduct toward the women of his company was of such a nature that the public was excluded from the courtroom while it was being given. The abused actors declared that they submitted to such treatment because they were, under prevailing conditions in their profession, helpless to resist. Moreover, they said, there was no feeling of solidarity among actors which would make resistance effective. It was a question of bare existence with them, and they bore ills they had, rather than flee to others which might be worse.

### A WAY OUT

A Resident of Wichita Falls Shows the Way There's one effective way to relieve kidney backache. Linctment and plasters may relieve it. But they seldom reach the cause. Backache is caused to suspect the kidneys. Doan's Kidney Pills are for disordered kidneys. Wichita Falls people back them up. Read a case of it. Mrs. W. M. Langford, 299 Lee St., Wichita Falls, Texas, says: "At times my back was so painful that I could not sleep. Doan's Kidney Pills promptly relieved all the pains and strengthened my kidneys. Since then I have taken a box of Doan's Kidney Pills occasionally and they have kept my kidneys in good working order." Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Langford had. Foster-McBurn Co., Props., Buffalo, N. Y. (Advt.)

### SAFETY AND SANITY MARK INDEPENDENCE CELEBRATIONS

Special Features and Pageants Observed in Several Texas Cities July Fourth. By Associated Press. Dallas, Texas, July 4.—The safe and sane principle of July Fourth celebration prevailed rigidly throughout Texas today. In place of noise and fireworks a great variety of municipal and club and society events were planned. Corpus Christi had a three days' celebration which began yesterday and which finishes tomorrow with a religious patriotic celebration headed by a large civic chorus. Today's feature, there was the parade with floats, some of which were contributed by boys and girls' corn clubs. At Fort Worth the Mosiah Temple of the Mystic Shrine, granted in May at Atlanta, was to be dedicated tonight. Fort Worth had a Greek pageant and strict fireworks regulations. San Angelo scheduled a motorcycle meet and it was announced that dancing would be permitted in the streets tonight. Notable among a variety of entertainments at Dallas was a traveling men's celebration which included a feature called the coolie race. Dallas had a benefit entertainment, the proceeds of which went to the Boy Scouts' Campfire and the Girl's Industrial Home. A 108-mile motorcycle road race was scheduled from Fort Worth to Waxahatchie and return to Fort Worth via Dallas.

### FIFTY DOLLAR DONATION TO BE SPENT IN 2254

By Associated Press. Berlin, July 4.—Herr Seifert, mayor of the little Saxe-Weimar city of Weida, has made a donation to the city which has set mathematicians to figuring compound interest problems at an unusual sort. The donation consists of \$50, and it is to be invested and the interest compounded regularly for 340 years, or until 2254. In May of that year 70 per cent of the accumulated interest is to be at the untrammelled disposal of the municipality. The remaining 30 per cent is to be similarly compounded for a further 100 years, when the total shall vest as an absolute gift in the city. Estimates of the sum that will be available in 2254 vary from \$1,250,000 to \$15,000,000, always assuming that financial conditions do not vary greatly from what they are today.

### REVERSE ENGLISH USED BY MEXICAN NEWSPAPERS

Distort News to Suit Their Own Preferences—Deny Villa Has Captured Zacatecas. By Associated Press. Laredo, Texas, July 4.—Mexican papers published on the border continue to distort news to suit their factions. Carranzista papers persist in publishing fake stories of Euzelista filibusters who are preparing to attack Nuevo Laredo. They see a Huertista spy in every Spaniard speaking Spanish or who reaches town. On the other hand the Huertista papers—and there are still some left in this section—put what is aptly termed the "reverse English" on every news item about Mexican military events. They daily deny every Villa victory while telling of wonderful federal successes in other parts of Mexico. Recently a federal paper at El Guardo del Bravo was suppressed here because of its open and anti-American tone. A few weeks later the former business manager of this paper and another Mexican began publishing a tri-weekly called Los Sucesos, while equally Huertista in tone, was carefully neutral to the American government. A late issue of Los Sucesos published a day or two after the Associated Press report of the capture of Zacatecas denied the Villa victory, giving a detailed account of Villa's defeat, saying his disorganized army was seen then retreating to Torreon, after losing several thousand killed and wounded. The date of this alleged defeat was given as June 22, while the Villa victory occurred on June 23, leaving the paper an apparent chance to explain the discrepancy. Nevertheless Huertista sympathizers here still claim Villa is miles from Zacatecas, reporting his shattered command, hoping to renew the attack. Carranzista papers published here denied the break between Carranza and Villa, one of them going so far as to bring a rebuke from Carranza himself, who the other day sent a telegram in which he not only acknowledged there had been "difficulties" between them, but that the strange ment still existed, and that later he would have something to say about it. The same paper, which has appeared as an enthusiastic Villa partisan, published a most bitter attack against Villa, saying it was now convinced Villa was a bloodthirsty bandit, assassin and traitor, and that he should be treated as an enemy to Mexico for having turned his back upon the man who elevated him to his high position of general in the army.

### HESSIAN FLY IS RECEIVING ATTENTION OF GOVERNMENT

Wheat Farmers All Over Country Are Asked as to Damage Done by the Pest. Washington, July 4.—"Has your wheat been infested by the Hessian fly this season?" is a question that the U. S. department of agriculture is now asking farmers. The information is desired that there may be general co-operation between all concerned in reducing the devastations of the fly. There is every indication that the pest will be unusually troublesome to the crop this fall. Every wheat grower in the country who suspects that his crop has been infested is requested to send his name to the department's bureau of entomology at Washington, D. C., with a request for a question blank. The questions to be answered are merely as to whether the wheat grower's crop was infested at certain seasons. The farmer will then be asked to forward some of the infested wheat plants for examination, postage to be paid by the government. He will also be asked to give his name, address and the nearest railway station.

The department is co-operating with various state experiment stations in this campaign against the Hessian fly, and in some cases the infested straw will be sent by the farmer to local stations for examination. The wheat grower can learn just where his sample of straw is to be sent when he sends his name to the department, indicating his willingness to send the sample. The department encourages the sender not to be afraid to forward too much of the straw, even though it has to be sent by parcel post. The upper part of the straw need not be sent, but enough above the ground should be included to get the insect in what is known as the "flaxseed" stage when the larva is incased in a hard, brown skin and somewhat resembles a flaxseed. The insects will remain for a considerable time in the "flaxseed" stage during a drought and will only emerge after rains have moistened the soil. Dry weather in the late summer tends to keep the insect in that stage which is a fact of special importance in the north where the wheat must be sown early enough to enable the plants to stand the winter. Probably no other insect causes more damage to the wheat crop in the United States than the Hessian fly, although there are certain years when the chinch bug exceeds the fly in its devastations. During the seasons when the fly is especially abundant hundreds of thousands of acres of wheat may be either totally destroyed or so badly injured as to reduce the yield 50 to 75 per cent. The monetary losses run far up into the millions. A number of years ago there was in Kansas general co-operation between grain dealers, millers and farmers to restrict the ravages of this dangerous insect. According to their own estimate, over a million dollars were saved by prompt action and thorough measures. This year the department hopes to secure general co-operation throughout the country in combating the pest. There are indications that its ravages may be severe. Already in Iowa and Oklahoma there have been threatening outbreaks of the insect. Not only are federal and state organizations in the government co-operating in this campaign but others such as the National Miller's Federation are working to secure better control over the Hessian fly. The individual wheat grower is asked to send his samples of infested straw before the middle of September and sooner if possible, as after that, the fly will have hatched and have entered into the wheat. Late sowing of the seed and burning of the stubble when not needed to grass or clover are the only measures known to date that are effective in controlling the Hessian fly—that is, for winter wheat growing sections. In the spring wheat sections, late seeding will not apply. On the contrary, the earlier it is sown in the
