Centimeter Guns, But With Little Success

Perograd, Jan. 21.—Along a mile front Ciechanow to the south of Mlawa, to Dobrzyn on the Vistela twelve miles from Plock, the Germans are on the defensive against the Russian advance "toward East Prussia Heavy artillery engagements have ocsurred at various points along the

Meanwhile the struggle is in prog ress for possession of the left bank of the Vistula from its junction with he Bzura at Wiszograd westward to Dobrzyn a distance of approximately of miles. Possession by the Russians Wizsgograd and a footing on the left bank of the Bzura in that vicinity affords them a base for their operation against the Germans who are in force to the west of that position and effectively prevents a movement on Novo Georgiewsk which has been the German objective in the advance ward Warsaw from the north. In endeavoring to retake trenches captured by the Russians immediately west of Wizsgograd the Germans are eported to have lost 900 men.

Southward from Tarnow, Galicia the Austrians have employed for the first time, the famous German 42centimeter guns, in an effort to dis-lodge the Russians from their position along the Dunajek River. Ac cording to reports received here they have been unsuccessful hafing been ferced to retreat to the northwest leaving the Russian position intact Russian officers are of the opinion that the heavy German guns are an impediment rather than aid to

Three Armies Trying To Advance In East—Roumanian Troops May Enter Soon

# RIVER RHINE OBJECTIVE OF ALLIES IN WEST

French Trenches Said To Be Only 16 Miles Away-German Reports Still Optimistic, However

By Associated Press.

London, Jan. 21.—Russia's threefold assault on the Germanic allies has in the opinion of Engish observers of war, resumed its steam roller characteristics alike in the north, the center and the south. In the north the advance into East Prussia is reported as threatening the German lines of communication and in Poland the trench warfare continues with small results for either side, but the Russians confidently dwell on what they call large German losses, in efforts to hold present positions.

In the South, the Russians declare that the Austrian resistance seems to have broken down entirely and that Transylvania les open to them.

Reports of Roumania's long-awaited entrance into the fight continue to circulate; one rumor today has it, however, that Roumania will not immediately declare war but that she will throw troops into Transylvania, which is Hungarian territory, for the purpose of protecting Roumanian nationals.

Meanwhile, German official utterances continue optimistic. The communications given out every day say the situation in the eastern theatre of war remains unchanged. Certain semi-official summaries of events, received in London by wireless telegraphy from Berlin, are somewhat more communicative. Such a message received recently said the Russians had some successes in which their losses were heavy and that the Turks have been operating successfully in the Caucasus and are now marching on Egypt.

Telegrams reaching here from Berlin record the arrival there of Archduke Charles Francis, the Austrian crown prince, and Dr. Betham-Hollweg, the German imperial chancellor, who are to be joined shortly by M. Burian, the new minister of foreign affairs, presumably for a conference regarding a plan of campaign against Russia as well as the adoption of suitable measures gainst Russia as well as the adoption of suitable measures against the prospective entrance into the war of Italy and Roumania.

Recent dispatches from Sweden indicate that German airship attacks on the new Finnish railroad between Sweden and Russia are beginning to be expected. This is the line that runs around the northern end of the Gulf of Bothnia. Its destruction would be a serious blow to Russia as the only other routes of communication between Russia and her allies are by way of the Baltic Sea or through Archangel on the north. The former route has been made impassable by mines and the latter is to be cut off by the ice.

In the western arena of the war the activity has been generally confined to artillery exchanges, except to the south of Metz where sharp fighting promises interesting developments.

Fighting between Austrians and Montenegrins which has been almost at a standstill on account of the winter weather and heavy snows has resumed across the border from Catarro. The Austrians bombarded Montenegrin positions, it is said, at Cettinje, but no damage was inflicted.

The allies now have their eyes on the River Rhine and British troops may be sent to Belfort in eastern France to take part in any possible advance toward the river, says a Geneva report, which lacks verification, however. It is stated that the advanced French trenches are within sixteen miles of the Rhine.

# Oriental Methods of Buying Texas Oil Products

Millions of natives in the Oriental countries buy oils made in Texas by The Texas Company-most of these natives cannot read or write, and the few who can know little about the English language. Nevertheless, they insist upon buying the oil they find most valu able and they recognize it by the picture.

The Five-Pointed Star and Green T emblem goes on every case which is shipped from Port Arthur by The Texas Company, whether kerosene, gasoline, lubricating oil, etc. To identify the kerosene another picture is added, by which the natives can recog-

In the illustration above the picture which is used for India is shown. This picture of Vishnu, one of the supreme trinity of the Brahmins, revered all through that vast country, but particularly so by the Vishnavites by whom he is regarded as the equal or superior of Brahma and is styled Vishnu, the Preserver.

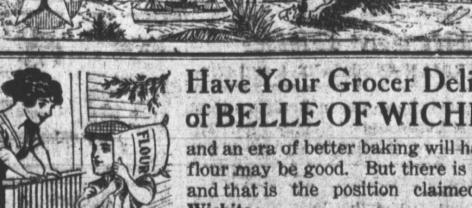

To the natives of China the Texaco kerosene is identified by a picture of a pair of scales

In the Philippines the Carabao is the animal best known and used for drawing loads of all kinds, and the Carabao Kerosene of The Texas Company is known as the best for light.

Hercules, Tower, Matador, Unicorn and other pictures adorn the cases for various countries, and by these pictures the goods are sold. It would not do to send a Carabao picture to India, nor a Vishnu picture to the Philippines, but for each country the picture represents something they will understand and something they can identify.

With all these pictures, however, goes the Red Five-pointed Star and Green T emblem of Texaco service and reputation. In your town you can buy the oil products of The Texas Company with the same Star and T brand. Better try them.

A GOOD DOCTOR and a competent druggist go a long way toward re storing the patient to health. However if your druggist is interested in other lines more than he is in Pharmacy you should not expect results. A druggist should know intimately the science of medicine including doses and effect because the doctor who has mastered the art of diagnosis is indeed a great physician even if he did not know the dose of calomel. The mind is too small to know the human body, it's diseases and then remember medicine. The knowledge of medicine is our part of the burden. A prescription represents the confidence of a patient, a family and a physician and the man whose ignorance or indiference betrays this confidence is a criminal. We are selling drugs.
