LOOP FLUNG ABOUT RUSSIONS.

Although no official confirmation has been received in London from Petrograd this morning of the fall Vilna, the British press has accepted the German claim readily in view of the situation that had been devel- By eping. Concern is expressed for the retiring Russian forces. So far as can be judged Field Marshal Von Hind after an absence of several days durenburg's troops have flung a loop ing which he visited the state prison about the Russians over a front of farms and negotiated the purchase of some two hundred miles and are not additional lands for the prison sysonly in their rear but are menacing tem, involving a \$350,000 deal. This seriously the single railway line and the few available wagon roads stretching to the north. As was the case at Warsaw the number of Russian is pleased with the deal. prisoners left behind with the evacuation of Vilna was not great. Apparently the only way in which the re-tiring forces may ameliorate the seeming situation is by counter

It is pointed out that Von Hindenburg's cavalry has penetrated so deeply into hostile country as to create a salient opened to sudden attack if the Russians should be able to command reinforcements at the proper time and place, but it is not believed here that his opponents are in a positien to deal such a blow effectively. There is a great deal of speculation

as to the German objective.

Opinion is divided whether Von Hindenburg will seek merely to close his loop thus capturing the army within the net or not content with this, will press eastward towards Minsk from the west towards Slonim in an effort to reproduce the encirc ing movement on a more gigantic scale and again try for a decisive vietory. Similar tactics attempted after the fall of Warsaw met with failure. The Russians are employing their familiar rear guard tactics and the hope is expressed in the British press that they will be able to fight their way out without shattering losses.

Next to Warsaw Vilna is the most important town in western Russia. It is a railway junction of great military importance. / ms from Vilna that Napoleon flow an disguise in 1812 during the retreat from Moscow.

German forces are pursuing the Russian army attempting to escape from the enveloping movement in the Vilna region. The Russians are ofing Germans.
