## Pair Arrested and **Area Burglaries**

Two men were apprehended in Parmer county on Wednesday of last week, leading to recovery of between \$3,000 and \$4,000 worth of loot, Sheriff Lovelace has reported.

After following a recent tip, Clovis peace officers, arrested a barn one mile west and onehalf miles south of Hub. Harry Fenning was arrested as he wa working on a farm in the Oklahoma Lane community. Allen immediately led the officers to his home in Clovis where the haul was found, including a 9-ft refrigerator, floor machine, an automatic washer tires and many other items that made a staggering total. Some of these items were identified as having been taken from the home of Supt. Jack Williams in Farwell on December 13th.

The pair were charged with house burglary and were placed in the jail at Clovis. Bond for bond.

## Editorially Speaking.

## LaFont Asks For Suggestions

does represent a step in the right direction by some of our state office-holders. Representative Harold LaFont has prepared an outline of the purpose and work of the Legislative Council of which he is a member, and we pub-Aish it in a similar vein to Congressman Walter Rogers' "Letter to the People."

The Fifty-first Legislature, recognizing a definite need in this State for an agency to assist the Legisloture and its individual members in obtaining accurate and reliable information on specific legislative problems and matters affecting the general welfare of the state, and to assist the members in drafting proposed legislation, established the Legislative Council.

As most people know, the Legislature meets in regular session every two years and passes bills to meet the problems of the State. The regular sessions of the Legislature usually last about five months.

At the last regular sessinon of the Legislature, ending June 9, 1951, and beginning January 9, 1951, 2,283 bills, resolutions and constitutional amendments were considered by the Legisladure. Approximately 450 bills were actually passed by the Legislature and became the law

The membership of the Legislature feels a need for some method to obtain accurate information in reference to these various bills. It is not difficult to find someone in Austin to advise members of the Legislature on how to vote on a proposed law, but it is difficult to be able to know whether or not the advice that you get is accurate and unbiasd.

The Legislative Council is composed of five State Seantors, appointed by the Lieutenant Governor, and ten State Representatives, appointed by he Speaker of the House of Representatives. The Lieutenant Governor is Chairman of the Legislative Council and the Speaker of the House of Representatives is Vice Chairman of the Legislative Council. The Council meets during the time the Legislature is not in session and studies problems that are likely to be presented before the next Legisla-

The present Legislative Council was appointed about July 15, 1951. They have a staff of four people with office in Austin, who compile information and assist the Council in the studies made by the Council.

The problems of the State to be studied by the Legislative Council are submitted to the Council by the high officials of the State, members of the Legislature themselves and citizens of the State of Texas. From the list of subjects submitted to the Council, the Council decides which subjects will be investigated.

The Council has a Subject Matter Committee that recommends to the Council what prob- lems of the State.

Editor's Note; Though the following report is lems will be studied out of those submitted to somewhat lengthy and maybe dull reading, it the Council. The Chairman of the Subject Matter Committee is Rep. Harold M. LaFont of the 120th District. His committee is composed of five members of the Council.

> Twetny-two subjects have been submitted to the Council for study, and they are as follows:

- (1) Tax Structure of the State;
- (2) Urban Local Governmental Units;
- (3) State and Local Highway Construction (4) Uniform Commercial Code;
- (5) State Law Enforcement Agency:
- (6) Distribution of Judicial Wrok;
- (7) Juvenile Delinquency Laws; (8) Texas Constitution;
- (9) Study of Reorganiztation of State Gov-
- ernment; (10) Public Health Laws;
- (11) Texas State Library System; (12) Higher Education:
- (13) State Agencies Project;
- (14) Texas Southern University;
- (15) Housing Facilities for Texas Education Agencies
- (16) Public Utilities Commission; (17) Teacher's Certification;
- (18) Analysis 1950 Census Data;
- (19) Procedure of Statutory Revision;
- (20) Court Decisions Manifesting Legislative Problems;
- (21) Surface Water; and (22) Study of Gilmer - Aiken Bill.

From the list of twenty-two subjects, the

Subject Maltter Committee has recommended six subjects for the Council to begin immediate study upon. They are:

(1) Study of the State Tax Structure to eliminate inequities.

(2) Study of Urban Local Governmental Units, to study opportunities for economy through organization of urban governmental units and state and local governmental relationships.

(3) The State and Local Highway Construction and Maintenance problems of the State

(4) The study of the recommended Uniform Commercial Code, to determine whether or not this Code should be adopted and become a part of the Texas law.

(5) The study of the law affecting Surface

(6) Study of the Gilmer-Aiken Law.

When the Council has completed the study of these six matters, they will begin work on others from the list as recommended by the Subject Matter Committee.

This is the first time that the Panhandle of Texas has been representated on the Legislative Council of Texas. Rep. LaFont would like to have the advice and suggestions of the people of this area who are interested in the prob-

## Political Potpouri in '52

won't be disappointed in 1952, for the field of political aspirants will be full from the precinct to the national executive offices.

Let's caltalogue some of the candidate types: Too many candidates like to put on a side show; even some of the more serious politicians think it's shrewd campaiging to give the folks "at the crossroads and down by the creek forks" a little spice and variety. We don't ap-

Then there are the pompous boys who talk so much; so easily, promising so much; why. they talk so continuously they haven't had time to give a serious thought to what they would do should they actually become office

And there are some that will be campaigning as victims of circumstance, being pushed along by a group or party because they believe "that fellow can win for us." Often he is a good

Just what do you prefer in the way of can-man, but many times he is pushed onward in his campaign on his name alone, with his actual Well, whatever you like to hear or see, you merits, plans, and platform vaguely publicized. And, thank goodness, there will be some serious, service-conscious candidates.

There's going to be wisecracks, scandal mongering, and ghost hunting on the higher levels of government for several months now.

This paper, however, will follow a policy in local, area, and national elections, of being dead serious in anything said. We will watch with interest the developments in all the races, sure, but we'll leave the loose talk and wisecracks to others, and any comments made in our own columns will be printed only after our sincere attempt to analize the candidate or the situation. In local races, our observations will be confined to principles. As well acquainted as each of us are in Parmer County, probably every candidate will be well-known by his neighbors, so for ourselves we will just apply our yardstick of qualifications to each candidate, inviting you to do the same.

## "SMALL BUSINESS" By C. WILSON HARDER

As this is being read, Con- | failure of the Marshall Plan, the gressmen are arriving in Wash ington to resume sessions after a vacation at home. And they are returning perhaps sadder in mind, but perhaps also wiser.

WASHINGTON AND

Many of them have learned that the independent businessmen in their

In addition, many Congressmen feel they have been had by lowed on their bland assurances

that their plans would solve all the problems of the world. For example, after voting billions of dollars for the Marshall Plan. Congressmen now find that the glamourized top administra-

tors of the plan are admitting in public the Marshall Plan failure. \* \* \*

But of course, these officials in their public pronouncement

manage to relieve themselves of all responsibility for failure. Both William Foster, Marshall-Plan administrator, and Paul Hoffman, former administrator

now report that the condition of Europe will not be improved until European monopoly business to the American anti-trust laws are put into effect in European nations. Neither bothers to explain why this fact did not occur to them many billions of

American tax dollars ago.

\* \* \*

Congressmen are wondering

valve is not shut right now. Two weeks after Hoffman's

public announcement, the Marshall Plan announced a gift of \$330,000 worth of tobacco to Adstria. That brings the total Marshall Plan shipments of tobacco mark. Yugoslavia, under Tito, continues to get millions.

\* \* \*
Apparently, thinking Euro peans realized the failure of the Marshall Plan long before Amer ican leaders admitted the fact.

That is 'e reason why a delegation of French businessmen came to America to sludy the nation's anti-trust laws.

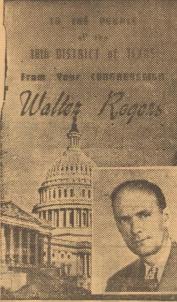

It is also reported that govern ment is prepared to ask Congress for more taxes. The ex are needed to combat inflati.

\* \* \*
Yet many leading economists state that when total taxes exceed 25% of the national income, inflation is bound to hap pen. At the present time the total tax bill is slightly more than 28%, or higher than it was alm ing the middle of World War II.

necessary to keep giving billion other nations to keep the rom going Commun that is all that keeps them from going Communist, this nation is

That's because while back

home, and away from the perverted standards of bureaucratridden Washington, Congressmen have re-learned many of the o'd virtues. One is that blackmail is blackmail, no matter if pracwhy, in the face of the admitted theed by individuals or nations.

Washington, D. C. December 28, 1951.

THE HUNGARIAN EPISODE: Many of you will recall the newsletter of the week of December 10, 1951, which was written by my administrattive assistant, Mr. Dee C. Dodson. In this letter he recounted a number of his observations while stationed much of a surprise.

Although these fliers are not free at the time this letter is man. being written, it is hoped that by the time it is published those four American boys will be safely on this side of the Iron Curdo some thinking. They are move.

nappers, they are going to find out that the \$120,000 will be the most costly blood money that they have ever extracted from anyone or any people. The action of the communist officials in this case will not be forgotten by the American people. Much has been said as to whether or not the money should be paid.

Frankly, I see no other course

under the circumstances. The lives of four American boys are at the safe side of the Iron Curtain. When this is done, retaliation can then come into being. Certainly the loved ones of these boys should be taken into consideration and the welfare of the boys considered, just as any of us would expect if it were our son who was being held in Budapest by an international kidnapper, or our ten year-old child being held in a secret hiding place by some vicious kidnapper criminal in this country. The proper time for retaliation is after the boys are released. Otherwise, their lives and their safety will be jeopardized. The immediate response of the American people to raise by in Budapest, Hungary, during private subscription all of the World War II. To those of you money necessary to bring about who read that newsletter, the the release of thes boys should action of the Hungarian com- be sufficient notice to the munist officials concerning the Kremlin crawlers that this counfour American fliers was not try is still united and that the American public believes in going to the aid of their fellow

### THE FAITH OF A FAMILY ENDURES

To enjoy the good in daily lives, the family group has learned the worth of spiritual values and how to benefit by them. Religion and the family go hand in hand through life, as each must practice love and cooperation, and each is bound together by ties that are more than earthly.

To get the most out of life, bring your family to the church of your faith regularly. Your service there is a service to mankind, and the lessons you learn there will benefit your fellow men and women.

### White Clover is Valuable Southern Pasture Legume

Louisiana White Clover-Dallis Grass-Bermuda Grass Pasture.

Southeastern States than any other crop. It is compatible with all pasture grasses, grows well in so many places and has so many good points that it is really the most important pasture legume for that area.

No other clover fits so well into a ermanent pasture mixture in the States as white clover Although not best suited to light, droughty soils, it will grow in nearly all parts of the Southeast and on many soil types. It normally grows there as a perennial, but in the more southern portion or under ooor growing conditions may behave as an annual. It spreads either by seed or by rooting at the nodes of the runners.

over a longer period than other outstanding pasture clovers of the clovers under most permanent pasture conditions. It mingles freely with all common pasture grasses and spreads naturally on soils adapted to its growth. It begins growing with the first fall rains and provides grazing until retarded by freezing weather. It resumes growth in early spring, grows well partial shade where moisture is plentiful ever be mid-summer tem-Live ellier pasture legumes white the ver is rarely grown atone when seed primarily for grazing, because of the superiority of the grass-begune combination over either grown alone and also purity for use in pasture mixtures because of the greater likelihood of bloat in cattle troe feeding on pure able from local seed dealers

ly lessened by keeping the clover grazed down to a reasonable degree so that it takes a longer time for the United States in 1950 was Lou-the animal to fift its stomach. It is islama white grown in the States of

White clover is probably more | stomach with rank, moisture-laden generally used as a legume for per-manent pastures throughout the orchardgrass, or any other spring grass with the clover, will go a long way in preventing bloat.

white clover — large, intermediate and small—and there is a wide varitermediate are both useful in the Southeast but the small type is not desirable for pasture. Ladino clover is the large type used and is well adapted to most of the northern part of this area, as is also the Louisiana White which is of the intermediate type. Within a belt extending some 100 miles or more from the Gulf Coast, Ladino clover does not bloom as freely as it does farther north, and is not so well adapted as the Louisiana White. White clover provides grazing Both of these strains, however, are Southeastern States.

bination with white clover are Dallisgrass, Bermuda - grass, smooth cue, and orchardgrass. One acre of good clover-grass combination will furnish grazing for three animals in April, May and June, and some grazing during the summer and fall if moisture is plentiful. It is better to depend on grass following clover during summer and fall.

The danger of Most can be greathalf of the total of over 3 million lessened by keeping the clover pounds of white clover seed (not indis from a too sapid fill of the Louisiana, and Arkansas.

There are three general types of

Louisiana and Ladino white clow er seed of good germination and in the Southeastern States is availthroughout that area. More than cluding Ladino clover) produced in

#### TROOP II

Girl Scout Troop No. II met at the Methodist church on Monday. We talked about what we would do at our next meeting. We also elected new officers. Paltsy Anthony was elected Seniors of 1951 president; Carolyn Stowers, vicepresident; Merline Gibson, secretary and treasurer; Delene Massey, reporter; and Katheryn Dunn, assistant reporter.

Carolyn Stowers, and Marlene graduation. Gibson. Mrs. O'Brian and Mrs. Anthony were leaders present.

#### TROOP IV

The Girl Scout Troop No. 4 met January 7, and elected officers. First we elected Joyce O'Rear for reporter, Joy Crow for president, Nancy Outland for vice-president, Robbie Boggess for secretary. Before we elected officers Mary Tom Spring served refreshments, then she taught them how to play a game. There were thirteen present, they were Robbie Boggess, Pat Cranfill, Joy Gladys Dean, Frances McGlothlin, Lanette Prichard, Mary Tom Spring, Jolynda Stokes, Joyce O'Rear, Janie Parker, Nancy Outland, Margaret Malberry, Peggy Weidner. The leaders were, Mrs. W. S. Crow and Mrs. R. O'Brien.

Joyce O'Rear, Reporter.

aging and distribution methods, and and functioning of legume bacteria.

Maximum field production of legume crops is dependent on effective nitrogen-fixing bacteria. There is no other way so practical and economical of supplying legumes and in a cool place until used, and not associated field crops with an equal be exposed to high temperatures. quantity of available nitrogen. The amount of nitrogen supplied will vary from 25 to 200 or more pounds per acre, depending on the species possible. of legume plant, the strains of bacteria, and soil conditions.

Certain groups of leguminous plants use the same general strains of bacteria, e.g., the alfalfas and sweet clovers are in the same group, and true peas and vetches are together in another group. Its is important, however, to use strains known to have high nitrogen-fixing efficiency with the varieor species planted.

Soil conditions, climate, moisture, ertilizers, acidity, and other fac-ors affect the activity and effi-iency of legume bacteria. Those ditions assential to the satisctory growth of legumes must be lied if maximum results from tion are to be obtained.

Acid soils tend to eliminate leg-

## More Economical Method of Storing Grass Silage

Chopped Forage Is Blown Into Trucks Directly From Harvesting Iachines, Dumped on Pile and Packed Down by Tractor.

Grass silage is nothing new, par- crop. ticularly to thousands of eastern dairy farmers, but stacking it on op of the ground without the exand avoids the heavy losses genertain weather of early June.

The "silage pile" idea is to con- with a trench silo. struct a highway grade from 14 to 12 inches deep under either edge of ready for more loads.

When completed, the pile of silage contained about 400 to 450 tons, and was approximately 14 feet high in the center, sloping toward each end at ground level. It can best be vispile from one end to the other until to erosion control and to improving t was completed.

The pile was covered with 2 or 3 inches of soil and planted to rye. lowered costs of meat production, This makes it quite easy to peel off and substantial increases in the the soil as necessary in feeding the silage. However, many farmers through the only sensible route prefer to leave the pile without cov- increased yields per acre.

The story of a demonstration on er, as the spoilage seldom goe a Illinois farm of how grass silage deeper than 6 to 8 inches. If well n be made more economically by compacted and sealed the total sealed is told by loss should not be over 5 to 8 per hist of the Soil Conversation Serv- pared to the average loss in tempting to make hay of the first

Following are some of the reasons why farmers are so interested in

this new method: pense of digging a pit or erecting a silo is a radical departure from established methods. It is the most practical method of storing the first cutting of legume-grass mixtures (2) The site for storage can be chosen annually for convenience in

ally encountered in attempting to make a hay crop during the uncer
(3) There is no spoilage from water seeping in as may happen

(4) It is a rapid operation. Field 20 feet wide over the crest of a con- chopped forage is blown into trucks venient spot near where cattle or directly from harvesting machines, other livestock are fed. This gives dumped, and the trucks are back

(5) Spoilage is less because of the the pile from the center. The real case with which thorough packing secret in addition to good drainage can be done, by driving the trucks (6) Less labor is required than by

convenient and less expensive nique is that it climinates one of the most troublesome bottlenecks to the increased acreage of grass-legume crops—that of harvesting.

We must have grasses and legumes in the crop rotation to in ualized when it is realized that the trucks continued to drive over the production appreciably. It is basic soil structure and fertility. It also means not less but more livestock,

this way, but after a long cold spell he would be without

24th Psalm, "The earth is the Lord's, and the fullness thereof" Someone else said the right to our land does not give the right to destroy it."

Here is a slick way to make two crops in one year and at the same time improve your soil. (1) In fall seed wheat by

regular methods. (2) In early spring overseed vheat, across the drill furrows, to Hubam Clover. Inoculate

In spring or early sum-(3) In spring or early summer harvest wheat. The clover at this time will be too small to interfere with the harvest.

(4) In late summer or fall harvest clover. Then turn under residue by deep planning 8 to 10 inches.

The deep plowing is importan to insure aeration.

#### CALIFORNIA VISIT

Mr. and Mrs. J. H. Boyle returned home from California Monday where they visited during the holidays

They spent Christmas with their daughter, Mrs. Bill Warren, and family at Stockton,

They spent New Year's visitng Mr. Boyle's sisters. Mrs. E G. Schmidt and Miss Stella Boyle in Glendale, California. They visited places of interest while in Glendale. Among those visited were The Tournament of Roses Parade in Pasendena New Year's Day. Over 1 million people attended this 63rd Annual Event. They saw the Rose Bowl game, Stanford vs. Illinois over Television. They visited Forest Lawn Memorial Park in Glendale and some of interest the great painting of the Crusifiction of Christ in the Hall of Crusificition. They also took the drive along Sunset Bouvlovard to the Santa Monica Beach They also visited the Santa Amito Race Track when the races

Mr. and Mrs H.ugh White and Bill of Los Angeles, California have been visiting the R. C White family in Friona.

## NEWS LETTER

By J. Alan Romich, Mgr.

Some years ago the city of Friona, in plotting out the town, set up each lot by number so that when a house was built it would have a number. Now that the town is growing so fast, each house should have the correct number exhibted in a place where it can be seen. The next step will be to erect street markers, and then it will be easy to construct maps, city directories and phone books with

the correct address.
