YOUR NEIGHBORS' OPINION

"Do You Expect Diversification of Farmer Crops to Be Further Developed, With Small Vegetable-Growing (Lettuce, Onions, etc.) Ever to Become a Major Industry Here?"

BOYD KNOX: "I think this land here is really more fertile than Deaf Smith County, and it could be brought into diversified crops if the people desire it enough. One thing they are going to have to have here is financing for small crops, which we don't have now. There will definitely have to be a labor camp here for transit laborers, because when crop time comes up it will have to be gathered immediately."

DAVID MOSELEY: "Being an ex-farmer, I wouldn't care to comment on the crops. But I think maybe it could possibly be that small vegetable growing would be profitable, if the farms continue to be cut into smaller pieces of land."

RAYMOND EULER: "Yes, I do. A lot of people are finding that under our present farm program it is hard to obtain a substantial income because of low acreage allotments. I don't know of any reason why they shouldn't. It will depend a lot on Hereford, Dimmitt and Mulshoe staying in the business as to whether or not Friona will develop small crops further. Also it depends on a good market."

JOHN KENNER: "I sure do. I think it is an up and coming thing here. In fact, I have 7 acres of cantelopes planted already. It will come sooner with crop allotments cut and grain prices cut. The water won't be too deep to pump if everything stays now at its present level."

JOHN LAMB: "I think there will be more different types of crops tried here than ever before, such as cattle feeding crops—hay, corn and sesame. It may never be on a huge scale, but it possibly could be. There will be lots of experimenting done before it happens, as there would have to be special equipment and machinery installed."

O. T. (Pat) PATTERSON: "I think this is the best region in the entire state for small vegetables such as onions and lettuce. With the maize price as it is, and with cotton acreage allotment cuts, I really look for more farmers to go into vegetable growing. We must have a considerable number of acres in these crops in order to establish ourselves and become known on the market—then the crops will meet with wider acceptance locally. Though I have none this year, I expect to grow at least one crop of vegetables next year. I don't know why we have been behind Deaf Smith County in this matter, but I look for us to catch up."

Looks as if plans to drastically alter operation of the local cemetery are gaining momentum. And not too soon.

J. L. Marcum, local funeral home owner, this week suggested a plan to the city commission wherein the city would take over operation of the grounds, operating them on a perpetual care basis.

Whether the city dads and cemetery association get together on this plan, or whether some other organization takes over, we are heartily in favor of the perpetual care plan.

The cost would be nominal. Most cemeteries charge at least \$50 per burial space. The cost here? Well, it has been \$7.50 per lot of 8 spaces, not enough to provide any care whatsoever.

A new and larger well is a necessity to provide a creditable plot. This and permanent care could be assured by sale of a few lots at this time at a more sensible price.

The Memorial Day week-end affords a good time to ponder on these things.

Why don't you observe the condition of the cemetery when you attend the services, then let Mayor Allen, Mr. Marcum, or a member of the cemetery association know of your own desires.

Something should be done soon. Attended any of the Little League baseball game? We'll guarantee there's fun aplenty for you there, regardless of age. Those little fellows really put their heart into the play, and we think the sponsors come in for no little commendation for fostering such activity.

Dr. Metzner, formerly of Friona, was through town the other night and directed his Friona Star to be mailed to his new address at Silver City, N. Mex.

Also glad to see another familiar face in town—Winnie Wilkerson here for a few days attending to business.

The eight-day clock, reposing in the window of Allen's Jewelry, finally ran down last Saturday night. Each senior had diligently watched the hand in its face turning from picture to picture. (Each graduate's picture was placed in a circle around the clock. The hand finally tired by its long journey, stopped and pointed to the picture of Miss Betty Hartis.

The reward? An ivory and gold Bulova clock-radio! Each year for six years, Allen's Jewelry has awarded a prize to some senior in the graduating class of that year. The clock stopped on the face of the winner and Miss Hartis was the recipient of the prize, valued at \$50.00.

CLEAN-UP SET FOR TUESDAY

The Clean-Up Week, originally scheduled for May 18, was postponed until Tuesday, May 31. The delay is due to the recent heavy rains which have showered Friona during the past weeks. Noticeable improvements have already been made. All citizens are urged to do their part. Even mowing grass and washing windows will considerably improve the appearance of a residence.

No change has been made in the plans of the Chamber of Commerce. The project will begin at 1:00 p. m. and will include, not only the business district, but the residential section of the city as well. The business firms will close from 1:00 until 2:00 p. m., and give their full cooperation in making the slogan "Clean-up, Paint-up, Fix-up" turn Friona into a "well-scrubbed" town.

Citizens are requested to place all garbage in boxes and barrels. Further instructions denote that these should be left in a convenient place so that the city trucks and volunteer workers can gather and dispose of the trash. Everyone is urged to obtain a cover for their trash disposal barrels.

Any suggestions for the day should be given to Mr. and Mrs. H. K. Kendrick, Mr. and Mrs. Joe Douglas, Mr. and Mrs. A. W. Anthony, Sr., or Mr. and Mrs. Henry Lewis.

Friona Water, Sewer Contract Let to Amarillo Firm for \$68,679

Contract for waterworks and sewer construction and improvements within the city of Friona was awarded Monday to H. B. Jordan of Amarillo.

Jordan's bid of \$68,679.35 was the lowest of seven bids opened by city commission. Highest bid was some \$13,000 higher. Broken down, the waterworks were bid in at \$42,256.40, and the sewer at \$26,422.95.

It is expected by City Secretary Wilson, that the Jordan farm will be ready for operation here within about three weeks. Ninety days are allowed for completion of the work.

Included in the program are improvements in various sections of town, and will also include the Staley and the Lakeside (former Whiteway) additions.

Jordan has previously contracted for the city here, doing considerable work in 1950.

Lazbuddie made two scores in the first and two in the second, establishing a 4-3 lead at the end of the second. Their next scoring spree came in the ninth, with three runs being made on two singles, 1 error and one fielder's choice.

AUSTIN. — It's amazing how quickly pennies can grow into millions of dollars.

But, it is with pennies that Texas is solving its financial problem.

Big discussion of the week has been the proposed two-cent increase in gasoline taxes. Right behind that big topic has been the 1-cent increase in cigarette taxes and the hike to 1 cent per bottle (\$1.30 per barrel) in beer taxes.

With these topics before them, the Legislators came back almost to where they started—namely Gov. Allan Shivers' original tax recommendations. Tossed out by the Senators, after many hearings on numerous phases of taxation, were virtually all other tax proposals.

When the tax bill bogged down in the Senate, Governor Shivers threw in a surprise strategy move.

By message, he told the House and Senate—now working without pay—that if they wanted to end this session, he would call them back in a special session when they could be paid \$25 a day.

Lt. Gov. Ben Ramsey and Speaker Jim Lindsey at once responded that the session could complete the tax chore, unblock the bill and a half dollar appropriation bill, and finish its job.

Filibuster Record Busted

For the third time during the 1955 Legislative session, a new talkathon mark was established by a member of the usually sedate Senate.

This time the speaker was Sen. Kihner. Corbin of Lubbock, who took 28 hours, 25 minutes against a state water project financing plan.

Previous holder of the record was Sen. Wayne Wagonseller of Bowie. Before that it was Sen. Jimmie Phillips of Angleton.

Corbin was opposing a committee report on Sen. Dorsey Harde-man's proposed constitutional amendment to the \$100,000,000 water program. He was objecting to the three-cent ad valorem levy.

Governor Shivers had advocated the plan as a key part of his water conservation legislation. The proposal would set up a six-man board, to be appointed by the Governor. Corbin also contended that the board should be elected, rather than appointed. In objecting to the method of taxation, Corbin said that it would cause dry land farmers to bear the burden of water projects in other districts.

Like the other "billbusters," it was fruitless.

Rain Steals the Show

General rains throughout the state stole the spotlight from the Legislators' past week. It was NEWS—BIG news. Even where there were floods, there were smiles of gratitude for the moisture.

As for the capital city, weathermen here report that Austin already has received more rain this year than it did throughout 1954.

Recent almost statewide rains have changed "Texas" crop outlook from "dismal failure" to "fairly good" according to Agricultural Commissioner John C. White. Rain came too late to help the wheat and oats, says White, but benefits to pasturelands were rated "excellent." He pointed out the need for a normal amount of moisture the rest of the year.

Probe in Senate

Lack of information prompted them to approve veterans land deals as a matter of routine. So said two state officials testifying in the Senate phase of the Land Office investigations.

State Comptroller Robert S. Calvert and State Auditor C. H. Cavness were the witnesses.

Cavness showed a form used by Giles to request funds for loans. Bearing the seal of the land board, the form carried no signature other than Giles'.

"Nothing came to us to cause us to have any suspicions," Cavness said, adding that he had assumed the deals had been approved by a majority of the three-member board.

Governor Shivers and Atty. Gen.

John Ben Shepperd recently have made affidavits to the effect that they were absent from board meetings on certain dates when the minutes cited that they were present.

From San Antonio, the district attorney's office announced it was demanding the maximum 10-year prison term for Giles, in his scheduled trial on charges of accepting a \$30,000 bribe. Also that C. V. Wynn and Arthur McKenzie of San Antonio, charged with offering the bribe, would "turn state's evidence," against Giles.

Week-end discussion of a further postponement of the trial was based on the reported employment of an unnamed member of the Legislature as counsel. This is automatic grounds for continuance until 30 days after adjournment of the Legislature.

SOMETHINGS FOR NOTHING
(The Ochiltree County Herald)

The American merchandising field today has been saturated with "give-aways" to the point where merchandise comes second and the "free" extras often seem to come first.

The fellow who first put a cheap gimmick in Crackerjacks really started something. Today the grocery store shelves are lined with cereal boxes filled with coupons or announcements of box top prizes.

Soap containers also have coupons, companies who introduce a new product feel that they just have to conduct a give-away program to get it properly introduced. The flood of radio and TV shows which busily give away everything from trips to cash have not diminished in the least.

Trading stamps, given as "bonuses" on purchases, the flood of mail advertisements offering "wholesale" prices, all play upon the desire of the average American to get something for nothing.

Of course, this "something for nothing" idea can be readily explained. There is a background of some twenty years of government handouts of one form or another to indoctrinate the people as they grow up.

It used to be that sales of merchandise were made largely on the merit of the product, plus the skill of the seller.

Nowadays, you also have to throw in something for nothing either a cut price or a piece of bonus merchandise as a prize.

RETIRE AT BIRTH

(Denver City Press)

Hail to the happy new era which is seen just over the hill. Comes now a pastor from Sioux City, Iowa, with the very best pension plan of all.

I'm not sure of all the details but it would work something like this: At birth each child would receive a promissory note from his Uncle Sam for \$20,000 bearing interest at 3 per cent. The child would thus have an income of \$500 per month from interest. Each year Uncle Sam would put \$1,000 into a sinking fund to pay off the note at maturity. When the child reached 20 he would thus receive the sum of \$20,000 to start him on his way.

Boys and girls who elected to marry at 20 would thus have combined capital of \$40,000. If they chose to have four children right quick they'd have an assured income of \$200 from the children. They'd invest the capital in Uncle Sam's bonds at 3 per cent and have an additional \$100 per month income.

The plan would cost Uncle Sam only \$150 a month.

At this time, no work, everyone making a living by having a family! The promised land at last! The slogan for the new plan is a dinger. "Why Wait? Retire at Birth!"

Short Snorts

Venue in the future income tax trial of George B. Parr, political boss of the Duval County area, has been transferred to Austin.

Sen. William H. Moore of Bryan has pending in the Senate a resolution to investigate Southwest Conference athletic recruiting, following accusations against A. & M. College.

A Senate committee struck from the House-passed "unfair sales" bill authority for a trade association to sue a merchant for selling goods below cost. Sponsors said they wanted that provision because an individual merchant might hesitate to sue—and give housewives the idea he was trying to keep them from buying as cheaply as possible.

Cuts in allowable oil production, made by the Railroad Commission, whittled the State's prospective revenue from oil. June allowable was cut 64,820 barrels daily, and July 67,219.

The Senate joined the house in passing Rep. Dolph Briscoe's stringent bill regulating veterans' land sales and outlawing block deals. Briscoe's constitutional amendment replaces the Governor and Attorney General as Veterans Land Board members. Two appointive members would serve with the land commissioner.

CANADIAN BANK PAYS TRIBUTE TO COMMONWEALTH

(The Canyon News)

There are 963 weekly newspapers in Canada, with a total circulation of almost 2,500,000. The January issue of a monthly letter issued by the Royal Bank of Canada was devoted entirely to them and their significance. It said: "Singly or together these weekly newspapers have a great influence on the thought and action of our people.

"Everybody, in a sense, lives two lives, one in a small and the other in a great circle. He belongs by birth of choice to various intimate groups, like his family, his neighborhood, and his cluster of friends. He is also a member of the whole society of Canada, and he is living within an interdependent system of nations. The weekly newspaper belongs in his intimacy."

The same thing is true of the thousands of United States weekly papers and small-city dailies. They are the running record of the community, and of the individuals, families, enterprises and institutions which created, forged and maintained it.

framed with cold realism. There is no reason why there cannot be a meeting of the minds among reasonable men that will prevent conflicts between man. It will certainly furnish a basis from which we can evaluate the burning question of whether or not Russian policy has been changed.

WALKY VACCINE

The Salk vaccine argument, of course, continues. We hope to have it settled in time to make the safe inoculation of many children in this nation possible before the polo season sets in. The Interstate and Foreign Commerce Commerce Committee of the House, of which I am a member, is considering a bill that will implement the President's suggestion that this vaccine should be made available to all children regardless of their economic status. As I told you in a previous newsletter, the Congress has kept a vigilant eye on the distribution of this vaccine and will not tolerate the exploitation of the American people through such a medium. Frankly, I had hoped that the entire program could be handled without the exercise of any jurisdiction over the subject matter by the Federal Government as such. However, the situations that have arisen have required that the Congress step into the picture and keep a tight rein on the handling of the program. It was recently pointed out by a member of the United States Senate that this Salk vaccine is the result of research paid for in a large degree by the dime sof children contributed in the annual March of Dimes campaigns. Certainly these children and their parents should be protected from exploitation at the hands of any unconscionable individual or group of individuals. Our committee hopes to coordinate the forces that should be instrumental in getting this vaccine to the public with the greatest possible speed and to avoid unnecessary red tape and political backbiting of pressure groups.

The remark that Mrs. Hobby was charged with having made to a Senate Committee to the effect that no one could have foreseen the public demand for the Salk vaccine was most unfortunate. I cannot believe that Mrs. Hobby intended the meaning that has been placed on her remarks. It would seem to me that the remarks, whatever the exact words might have been, have been taken out of context and blown up completely out of proportion. This is not a new practice in this country, but the fact that it has been employed before does not, in my opinion, detract from the unfairness of it. Neither does such a questionable practice add anything in accomplishing the result to be attained, to wit, the early and full distribution of a vaccine that may relieve great mental and physical suffering among mankind.

VISITORS

Washington greeted the Panhandle entry in the 28th annual National Spelling Bee. He was John D. Glenn, Jr., of Canadian, who was sent to Washington by the Amarillo Globe-News. He was accompanied by his father and mother and his aunt, Miss Maud Glenn of Amarillo. John D. didn't win the top honors, but he made an excellent showing against tough competition and is entitled to much acclaim from our section. These boys and girls are under terrific strain and we should all be very proud of them and the fine work they do.

Miss Louise Evans, that very able writer with the Amarillo News and Globe-Times, was the representative of the Amarillo papers in escorting the spelling champion to Washington. Louise has been doing some visiting around Capitol Hill the past few days and has made a fine and lasting impression on all with whom she has visited. She expects to see many Texans in

WASHINGTON AND SMALL BUSINESS

BY C. WILSON HARDER

Unless something reverses trend, spring of 1955 might well go down as Washington's silliest season.

Report of Attorney General's Committee to study the anti-trust laws appears major contribution to season's silliness. As already pointed out by Rep. Henry Reuss, Wis., 22 of the 60 committee members were corporation lawyers engaged in fighting government anti-trust matters.

But probably outstanding absurdity was inclusion of Edward F. Howrey, Federal Trade Commission chairman, on committee.

Apparently, even Howrey recognizes the absurdity. In commenting on fact that he signed report which included recommendation elimination of anti-trust laws, Howrey is quoted "This should not be construed as prejudgment of issues which may come before the commission in individual cases."

Inasmuch as FTC is quasi-judicial body, this is somewhat akin to situation that would exist if judge went on solemn record stating pickpockets do no wrong, then orally assuring everyone this would have no bearing on his trials of pickpockets.

Howrey's appointment was opposed by National Federation of Independent Business on grounds he was actively engaged as lawyer for rubber firm fighting FTC quantity discount rule.

This still to be enforced ruling provides there is reasonable limit to quantity a dealer must take to obtain top discount. National Federation of Independent Business.

involved is vital principle applicable to many antitrust cases now pending, or certain to arise.

But before Senate confirmation committee, Howrey promised to force himself from the case, and by inference, from any case in which this principle applied. This led Sen. Warren Magnuson, Wash., to remark, "I am afraid you might be on a vacation almost permanently."

It is significant that since Howrey has been serving as chairman, this vital FTC ruling has not been enforced. Now Howrey, FTC head, goes on record as opposing principle involved, same position he took prior to appointment as a rubber corporation attorney.

General Douglas MacArthur was removed from command for much less.

But this is not only evidence of current silliness along the Potomac. Recently, Senators seeking facts about foreign giveaway program, and specifically on a contract that looked dubious, were informed by FOA officials they could not report on how people's money is being spent under orders from their superior, Harold Stassen. Somehow, it appears the American FOA has "lend leaséd" an Iron Curtain from the Soviet GPU.

Besides being head of "operation giveaway," Stassen is now also filling a specially created job to promote disarmament and world peace.

With this act of censorship in mind, some observers express hope Stassen's first official act as peace promoter will not be clamping rigid censorship down on age old expression "Peace on earth and goodwill to men." It is somehow felt there must be some limitations on bureaucrats.

DIVISION OF SEPARATE ESTATES BY STATUTE

The death of an intestate person (one who has made no will) may give rise to many problems regarding distribution of his separate estate. In the preceding column we investigated the manner of dividing the community estate upon the death of a husband or wife. Now we shall see that, where separate property is involved, a completely different set of rules applies in determining heirship and apportioning the estate among the rightful claimants.

It may be well to recall that the separate estate of a husband or wife includes property owned by either before marriage, and that which is acquired after marriage by gift or inheritance. Any other property acquired after marriage is presumed by law to be community property until the contrary is clearly proved.

Now, here is a general idea as to how your separate property will be divided if you do not make a will with contrary provisions prior to your death.

If your husband or wife survives and if, in addition, there are surviving children or descendants of previously deceased children, the children and their descendants immediately obtain a full (fee) title in two-thirds of the real estate involved. The surviving spouse receives a life interest in the remaining one-third of the real property, which passes on to the children and their descendants upon the death of the spouse.

The rule for distributing personal property—cash, stocks, bonds, furniture, or any other items not constituting real estate—is different. Here the surviving spouse gets full ownership of one-third, and the children and their descendants inherit the balance.

Now suppose your husband or wife survives, but there are no surviving children or their descendants. In this case the surviving spouse inherits all of the personal property involved.

With regard to real estate, the survivor obtains full title to one-half, and the other half is divided between your mother and father, if both survive you. If only one of them survives, he or she receives only half of this portion, and the other half (or one-fourth of the entire real estate) will be divided among your brothers and sisters (and their descendants) who survive. If there are no surviving brothers and sisters and their descendants, then the one surviving

We also had a nice visit with Boys' Ranch number 1 wrangler, our old friend Cal Farley. Cal was with an old war buddy of his, Horace S. Dennis, from Bridgeport, Conn. We had the pleasure of meeting Mr. Dennis several years ago in the company of Cal. Needless to say, Cal was talking Boys' Ranch from the time he hit Washington until he departed. With this kind of work going on, Boys' Ranch is assured of great things in the future.

Sales get BIGGER!  
 and BIGGER!  
 and BIGGER!

This '55 Buick must have something that folks just won't do without!

TWO months ago, in the public print, we said that this looks like Buick's biggest year—and we weren't fooling.

But what has happened—and continues to happen—is almost beyond belief.

People buy up these stunning new Buicks practically as fast as we get them from the factory. Buick production—already revised upward several times—keeps keeping ahead to new highs every month to meet the mounting demand.

And Buick sales keep soaring higher and higher—and outstripping by far the phenomenal success of last year—the success that moved Buick into the "Big Three" of America's best sellers.

What is it about the '55 Buicks that folks by the

hundreds of thousands just won't do without? It's many things.

It's styling that's boldly distinctive and fresh as tomorrow. It's beauty of line and beauty of interior décor. It's a ride that's level, firm and steady. It's a new sweetness of handling. It's great power—walloping new V8 power of record might.

But above all, it's a new kind of performance, from a new kind of automatic transmission that was born of flight thinking.

It's Variable Pitch Dynaflo\*—engineered from the principle of the modern plane's switch-pitch propeller—and what it brings you in the way of pure thrill, mere words can't describe.

Just you drop in on us this very week and try it. That way you can see what a terrific automobile—and a terrific buy—the hottest-selling Buick of all time really is.

\*Dynaflo Drive is standard on Roadmaster, optional at extra cost on other Series.

## Seniors See Sights In New Orleans

The senior class and their sponsors left at 12:00 a. m. Saturday for their annual senior trip. The group left by chartered bus for New Orleans, La., where they have reservations at a motel. They have planned to be gone for approximately one week, depending on the money supply. The class has worked for the past four years to accumulate the money needed to take the students on a senior trip. Well over \$1,000 has been earned by the seniors through plays, hob days, bake sales, etc.

Hawaii was mentioned by the ambitious ones, but it was decided that no one wished to swab decks for passage. New Orleans was favored above other suggestions because of its historical background. Sightseeing and swimming rate high on the vacationers' lists of "what to do."

## Gladys Baxter - Troy Young Wed Saturday at Church

Nuptial vows were solemnized Saturday afternoon at 2:30 o'clock for Gladys Baxter, daughter of Mr. and Mrs. Oscar Baxter, and Troy Young, son of Mr. and Mrs. N. T. Young.

**Farm Bureau Report**

By **RAYMOND EULER**

Remember that when you receive a notice that your tractor gas exemption claims must be filed, you have a maximum of thirty days to take care of them. This is your money only if your claim reaches the comptroller's office before the expiration date. Your wife, son or daughter can file the claim for you if you don't have time. We remind you wives again that you do not need your husband's permission to file this claim for him. Just come in and state your desire and we'll take care of it for you. When the refund check arrives, you can either spend it or turn it over to your husband.

If you are a farmer, here is a question for you: Do you want a law that compels you to pay a minimum wage to your farm hands of \$1.25 per hour? This is not a maximum, but a minimum scale. We realize some hard's are worth more than that, but we've heard some are not worth quite that much, especially in some of seasons. As present, agricultural workers and employers are exempt from the minimum wage law, which is now 90c per hour. Gil-

bert Kaltwasser, your president, and Ralph Miller, your legislative chairman, have wired your representatives in opposition to this movement. If you really care, we suggest you do a little writing on your own. If you need help, come by the office. James G. Patton and Walten Reuther are the chief components of the minimum wage increase and elimination of agricultural exemption. Finland is buying 16,000 bales of U. S. cotton under the provisions of PL-480, a law championed by you and your American Farm Bureau. Three and seven-tenths million pounds of tobacco are also being purchased by Finland under this provision. We were told last week that we might as well forget "what is right" when it comes to settlement of agricultural problems and remember that the group of greatest influence was the deciding factor, regardless of "right or wrong." We are happy to note that we have seen and heard otherwise in many decisions reached by farm leaders and laymen.

CONSIDER THIS: The blessing of the Lord, it maketh rich, and he addeth no sorrow with it. Proverbs 10:22.

**NUT COVERED VANILLA DESSERT BALLS, SAUCE**

Do you need a real easy, inexpensive dessert... fancy enough for guests? These chill vanilla dessert balls are just the ticket! They're rolled in chopped, toasted pecans and served with hot chocolate sauce. Vanilla dessert balls are very inexpensive because they're made of lo cost rice cooked in nutritious milk.

- Broiled Chicken
- Whipped Potatoes Parsley Butter
- Broccoli with Egg Sauce
- Lettuce and Tomato Salad
- Hot Biscuits
- Nut Covered Dessert Balls and Chocolate Sauce

**Ingredients:**  
2 1/4 cups milk  
1/2 cup uncooked white rice  
1/3 cup beet or cane sugar  
1 1/2 teaspoon vanilla  
2/3 cup chopped, toasted pecans  
Chocolate sauce.

**METHOD:** Put the milk and rice in a 2-quart saucepan. Stir well. Put over a medium heat. When bubbles appear around the edge of the saucepan, turn the heat as low as possible. Stir well. Cover and leave over this low heat 45 minutes, or until the milk cooks into the rice and the mixture is quite firm. Stir several times during the cooking. Remove from heat.

Stir the sugar and vanilla into the cooked rice. Divide into 6 equal portions using a 1/3 cup measure. Wet inside of cup before measuring each portion. Place on a greased or waxed paper covered plate or pan. When cool enough to handle, roll into balls. Dip hands in water before rolling balls. Roll each ball in the chopped pecans. Cover well and store in the refrigerator until time to serve.

To serve, heat the chocolate sauce until very hot. Pour sauce over and around the dessert balls. If desired, top each ball with sweetened whipped cream. This dessert should be served the same day made.

This recipe makes six servings.

National Wheat Referendum Vote Set For June 25; Heavy Vote is Encouraged

COLLEGE STATION. — Texas wheat farmers will join with the nation's growers, June 25, to decide in a national referendum whether marketing quotas will continue in effect for their 1956 crop. The State Agricultural Stabilization and Conservation Committee urges Texas producers to participate in the vote.

"Under the present surplus situa- tion, we are required to proclaim marketing quotas," Secretary of Agriculture Ezra Benson said. "We will have almost as much wheat in the total supply after har- vest this year as we had a year ago. In other words, we will have enough wheat to take care of all our domestic and exports needs for two full years."

Benson has said that wheat is one of the major problems facing the Department of Agriculture this year.

Any producer in commercial areas who will plant more than 15 acres of wheat for harvest as grain in '56 is eligible to vote in the refer- endum. Two-thirds of the vote must favor marketing quotas be- fore they can be put into effect.

Local voting places for the June 25 balloting will be announced for each county.

The available supply of wheat for the 1955-56 marketing year is 66 per cent above the considered "nor- mal supply." The Secretary must call for marketing quotas when the normal supply exceeds 20 per cent.

In the referendum last summer, 73.3 per cent of the farmers vot- ing approved the quotas.

Findings Prove Early Insect Control Pays

COLLEGE STATION. — Early- season cotton insect control paid up to \$108.33 per acre at the Lub- bock Experiment Station in 1954.

Insecticide tests at the station included pre-square application for thrips control and post-square treatments for fleahoppers and thrips control. Toxaphene and dieldrin sprays also were compared in two experiments.

W. L. Owen, Jr., entomologist at the station, reports that the pre-square toxaphene applications controlled thrips effectively for at least two weeks. Two treatments reduced plant malformation but did not protect cotton from thrips in- jury where infestations persisted after the plants reached the fruit- ing stage. Where damage was confined to the pre-square stage of growth, controls did not increase yields materially.

Where fleahoppers and thrips oc- curred in damaging infestations, economical control was gained with two or three applications of toxaphene or dieldrin sprays, Owen says. Although both materials were equally effective in controll- ing fleahoppers, dieldrin was su- perior to toxaphene for thrips control since infestations were reduced for longer periods.

Yields of seed cotton were 653 pounds to the acre with two appli- cations of toxaphene while two treatments of dieldrin produced 700 pounds of seed cotton per acre more than untreated cotton. Three applications of toxaphene and dieldrin increased yields 727 and 934 pounds per acre over untreated cotton.

Owen says assuming the lint from treated and untreated cotton was equal in quality the average gross return from control was \$96.46 per acre for toxaphene and \$108.33 per acre for the dieldrin treatments.

Enjoy "White Glove" Cooking

That's electric cooking, of course — the modern cooking method, the white glove cooking way. That's because electric cooking is so clean that you can actually take a clean, white glove and run it across the top of the electric element. Unlike the old-fashioned flame-type burners, electric elements collect no soot.

Then, too, electric cooking is electrically controlled for accuracy and dependability. Ever notice how engineers build things with electric controls when they're after modern, automatic control? So, it's obvious that for modern cooking it makes good sense to go all-electric. Get the range that cooks with and is controlled by electricity.

An electric range is clean and it always looks modern. That's because electric cooking is as clean as an electric light bulb. And, it looks modern because if it's electric it IS modern. See the beautiful, modern electric ranges on display at your Reddy Kilowatt Electric Appliance dealer's store. Ask for a free demonstration. Go modern... and that's to go electric!

...of course, it's Electric!
