written the finances, and city employees have erected the installations without cost, the city also paying electricity bills.

All decorations will be in place by Saturday when the first of the pre-Christmas "Appreciation" events will take place. Prizes in-cluding an electric roaster plus eleven cash awards totaling \$140 will be given. Awards will be made across the street from the post-office promptly at 4 p. m. Satur-day, Retail Trades Chairman Joe Ferrell has announced.

Merchants are cooperating as never before in providing the tickets necessary in the give-away. Anyone making purchases in Friona is invited to ask for the "Appreciation" tickets.

Another awards day will be held December 20, with prizes to be announced in the Reminder and Star of next week.

Youths Charged On Theft of TV Set

Three youths are lodged in the Parmer County jail this week, charges having been filed Monday citing them as having entered the J. G. Morrow farm home, taking a television set.

Bonds were set at \$1500 each, but late yesterday none of the trio had made bond. Sheriff Charles Lovelace apprehended the fellows Sunday night. They were charged with entering the Morrow home while that family was at church while that family was at church

earlier in the day.

The boys charged were Charles Leaf, Richard Leaf and Lloyd Hopkins. They have been working as farm laborers in the Muleshoe vi-

ranging up to 205 H.P.

There's so much fresh new styling in the "One-Fifty" it's hard to believe the car costs so little. It has new chrome—including both windshield and back window reveals-and its own distinctive two-toning. It stretches long and clean from grille to taillights (the left one hides the gas cap). It offers new power, V8 or 6, steering and handling ease few oars can match, plus all

of Chevrolet's great performance and safety features. Directional signals and safety door locks are standard equipment. Seat belts, with or without shoulder harnesses, and instrument panel padding are available at extra cost. Truly, the "One-Fifty" represents more quality than before. Come in soon and let us tell you its big secret—its low price tag!

HOW FIRE INSURANCE

GIVES THEM a better chance to live

have been working to reduce fire and accident hazards in the nation's hospitals. In the last three years, they have surveyed over 7,000 hospitals and recommended essential safety measures. As a result of this public service, hundreds of people are living today because of fire tragedies that did not happen.

This is only one of the public services performed by capital stock fire insurance - a private enterprise-of which the insurance agent is an important part. His professional advice is yours for the asking. Phone me about your insurance-for, in these high-cost days, too little insurance protection for your home and belongings can be costly.

And so does the thrill - with Buick's new Variable Pitch Dynaflow!*

WITH ALL the big excitement of Buick's 1956 styling and power and ride and handling-it's easy to overlook this fact:

Gas mileage in the '56 Buicks takes a big step upward. One reason, of course, is the new power plant itself.

Every new Buick cradles an advanced 322-cubic-inch V8 engine with the highest horsepowers, Series for Series, in all Buick history. Yet every engine delivers more efficiency, and more usable power to the rear wheels-because each one has a new double "Y" manifolding, and a new high in compression ratio.

But the major reason for the happy news in gas mileage -and for the new step-up in safety and thrills-is Buick's latest version of Variable Pitch Dynaflow.

In this airplane-principled transmission, you always had a gas-saving cruising range-and, at a switch of the pitch, a full-power getaway range.

Now Buick engineers have brought to this cruising range what they call "double regeneration." It simply means a new way to make flowing oil add to its own velocity to build up driving force.

> Get 4-Season Comfort in your new Buick with FRIGIDAIRE CONDITIONING -now at a new low price

So now, you merely nudge the pedal to part throttle and get new breakaway getaway. And since you get this quicker, safer response in your normal cruising range -where you don't use full power-you get plenty more miles from every tankful of gas.

But when you do need sudden safety-surge for emergencies, you just floor the pedal to switch the pitch. Instantly, you're at full-power acceleration-and it's the most thrilling safety measure in the land.

How about coming in to try the most modern transmission yet?

The absolute smoothness of this new Dynaflow is worth a visit in itself. So you can be sure you're in for a wealth of wonderful surprises-for that's just the start of the best Buick yet. Can you make it this week?

*New Advanced Variable Pitch Dynaflow is the only Dynaflow Buick builds today. It is standard on Roadmaster, Super and Century-optional at modest extra cost on the Special.

It's the 56 Buick-

One Way to Lessen Washington Views: Gin Fires:-

COLLEGE STATION, Dec. 9. There is a simple and practical answer to the fire problem which confronts cotton ginners and farmers during every harvest season. A majority of the destructive fires originate from sparks blown from bur burners or bur pits, says F. C. Elliott, extension cotton work specialist, eliminate these hazards and the problem is pretty well whipped,

He strongly recommends that cotton burs be returned to the land. Each ton of gin waste contains about \$7 worth of plant food to say nothing of its value for adding needed organic matter to the soil. This organic matter greatly increases the waterholding capacity of the soil and helps make it more drouth resistant.

Elliott says that tests conducted on the Spur Experiment Station on land which had received an application of four tons of burs an acre the year before against a pen-

stored in the soil, it endeds, is limited against a crop failure.

Elliott says he has watched one farm where burs were applied five years ago and today the difference in plant growth can be noted between the treated and untreated areas. Production likewise has been effected during the five-year period. Elliott says demonstrations have proved that a jump of 10 per cent in 'yield can be expected the first year after burs are applied to save needless waste of property, the specialist advises all parties concerned to get the materials back on the land.

He factory to which I refer to have many the tould when we went through. We wisted about the right of workers to strike but match the workers had the machine tool shop, the found the workers to strike the weaked in each of the industries that we wisted about the right of workers to strike. says MRS. JOHN C. CORNEL

2720 WALLACE STREET CLOVIS, N. M.

"My husband's experience in the home building business helped us in planning enough outlets and wiring circuits to enjoy all of our electric ing a new home.

You, too, can call on the experience of your

When you plan for modern electric living, as the Cornells did, you plan for pleasant, gracious, comfortable living.

builder and qualified electrical contractor for electric wiring that will meet your present day needs—and those of the future. Good home wilding the lifeline of pleasant electric living. wiring — the lifeline of pleasant electric livi never costs less than it does when you are build-

Plan for modern electric living, as the Cornells did and you plan for living at its best.

Mrs. Cornell's all-electric kitchen features built-in electric range and refrigerator units. "We chose built-ins because of the convenience and space saving features which they

'Automatic and exact", that's the kind of heat Mrs. Cornell gets from her electric range. And that's the kind you'll get from an electric range, whether your choice is for built-in units or a conventional range.

'Plenty of freezer space was one of our goals in planning our new home. This built-in freezer-refrigerator takes very little space, and gives Mrs. Cornell plenty of right-at-hand food storage capacity.

'Our electric washer-dryer combination is wonderful because I can do my laundry at any time - day or night - with such little effort". Here's the real beauty of electric living, you can do the work when you want to, and, because it is done electrically, there's less work to do.

Heating and cooling are wonderful jobs to give electric service, too. Clean, safe, modern - and, most important of all, healthful, because accurate temperature control is always yours electrically

And here's Mrs. Cornell's utility room freezer, the one that makes her plan for 'plenty of freezer space' complete. Plan for complete living, plan for electric living.
