#### OTIS & REN OPEN SAYING "WE WRECK 'EM"; ARE ACROSS BRIDGE

Otis and Ren, and not little Jennie Wren, have recently opened the West Side Wrecking Shop across the Leon River bridge west of Gatesville and assure patrons they'll take your car apart and sell it out piece by piece—that is, if you want to sell it that way and should. Anyhow, drive it up and they'll make you a bid.

Also, if the old bus drops a few parts, and you really needed them, go over, they'll have what you've lost, or get it. Go over and see how the West Side lives—and it's not across the track.

### Lateral Hwy. Projects Approved; Gv.-Elija and W. Leon-Blue Creek

#### HALLOWE'EN CARNIVAL AT PIDCOKE SCHOOL NOV. 1

On Friday night, November 1, at 7:30 p. m. the school is having a stunt show, pie supper and Hallowe'en Carnival at the school auditorium. Everyone is urged and invited to attend.

Ladies are asked to bring a pie and men are asked to bring their pockets full of pennies.

Come prepared for a good old jolly time and to see some real wonders of the world. (Specimens and material will be on exhibit from all parts of the globe.)

You will see an amazing and colossal feat. Come disguised and leave your dignity at home.

The money will be used for school material which will aid your child. So, come everyone.

#### TIMES CHANGE, AND SO DO EMPLOYEES—ASK THESE

Well, first, Clifford Adams, shifts to the west, from W. F. and J. F. Barnes Lumber Company, to take the quarterback's position with Foxworth-Galbreath Lumber Company at Balmorhea, Texas, out near the hunters' paradise, the Davis Mountains.

As his understudy, and a substitute, Kirby Perryman, changes from a "roll" as an "end" or something with Fletcher & Beerwinkle, twin coaches of the Grocers.

Finally, as a third stringer, Hazen Ament, has gone from "gas" to "prunes" leaving Texaco filling stations, for the inside job at Fletcher and Beerwinkle.

In all seriousness these three changes are being made. Mr. and Mrs. Adams will not leave for Balmorhea to make their home for some two weeks, but the other changes have already been made. We can only wish each and everyone of them success and a "letter" on the chosen team. May be they'll be able to play in the "rice bowl" anyway.

#### BAPTIST PASTOR LEAVES FOR HOUSTON

The pastor of the First Baptist Church, Rev. C. A. Morton, will occupy his pulpit both hours Sunday which will be the last Sunday services prior to his leaving Monday to attend the Baptist General Convention at Houston. He will be accompanied by Mrs. Morton who will be in attendance at the State Convention of Baptist Women. Rev. Morton appears on the Convention program. They will return Friday and be present for all the services Sunday, Nov. 10.

Norwich, England, is geographically an island—separated from the mainland by rivers.

Coryell county is finally getting "in the money" as far as WPA and PWA roads are concerned, with final approval of two lateral roads to be gravelled for all-weather use by the government.

Project No. 18, Beat 2 is the longer of these two approved projects and runs 10 1/2 miles from Elija to the Beat line near Turnover creek, in other words from the Cowhouse to Turnover creek. The total expenditure on this stretch will be \$8617.65.

Project No. 13, in Beat 4, runs from the Leon River at the bridge west of Gatesville, 5 miles to Blue Creek on the old Gatesville-Hamilton road. Allotment for this improvement amounts to \$3,865.00.

Since final approval has already been made, all that is necessary for the actual construction to start is orders from the Waco office.

FOREWORD TO 'WE DRIVERS'

Nobody knows so well as we drivers, how dependent a machine can be upon the man who runs it. Certainly everything has been done that could be done to make motor cars operate as they should, regardless of the driver's skill. And still, cars can't do a thing except under human direction.

Even the self-starter, for example, deserves its name only in part. There must still be a foot to press the pedal or a finger to touch the button or turn a key. Power and speed in abundance are waiting in modern engines—but they await the command of a driver. Steering is a direct and simple thing, but it still depends on a pair of hands on the wheel.

And so, in a very true sense, the automobile that comes to us from the factory is an unfinished mechanism. It still lacks the most important part—the driver.

Manufacturers may build into their cars any number of provisions for economical operation, comfort, ease of control, fine performance, safety, dependability and long life; yet all are subject in the long run to the intelligent use and maintenance of drivers and owners.

**WE DRIVERS**

A Series of Brief Discussions on Driving, Dedicated to the Safety, Comfort and Pleasure of the Motoring Public. Prepared by General Motors

**No. 1—CURVES AND TURNS**

**N**O MATTER how expert we may be as drivers, we are all apt to fall into habits of driving that don't quite measure up to what we really know is right.

For instance, we all know that we ought to be careful about passing cars, especially when another car is approaching from the opposite direction.

And yet there possibly isn't one of us who hasn't, at one time or another, moved over in the road to pass a car, and then wondered if we would get around in time.

Now here's an interesting thing about that. When we try to pass a car that's going forty miles an hour, it's just the same as if we tried to pass a standing string of cars 128 feet long. In other words, it's like passing eight cars parked bumper-to-bumper in the road. If we try to pass one going sixty, it's like trying to pass a line of more than sixteen cars standing in the road, and sixteen cars in a row will reach half a block. This is probably a new idea to most of us. If we kept it in mind, we would never pass a car unless we were sure that there were no oncoming cars for a good long distance ahead.

But turning aside to pass is not the particular kind of turning that we are interested in discussing here. What we are now concerned with is taking curves and corners. From time to time in these discussions we will find that the same old laws of Nature will be involved. Foremost among them will be the laws of momentum, and momentum plays the major part in going around curves. Because momentum not only wants to keep us going, but going in the same direction. When it is trying to make us go straight instead of curving our course, it operates under an assumed name, if you please. For then we call it "centrifugal force."

Now of course we all know what centrifugal force is. We feel it when we go around curves. Highways and railroads are banked at curves to offset centrifugal force. Aviators bank their planes at turns by tipping them with the controls. But even though we all know about centrifugal force, few of us realize how powerful it is, and how much greater it gets the faster we go.

A 3000-pound car making a turn of 500-foot radius, has to overcome a centrifugal force of only about 156 pounds at 20 miles an hour. But at 30 miles an hour, that force has grown to 360 pounds, and at 60 it is nine times as great as at 20... over fourteen hundred pounds trying its best to push us off the road! The only thing that keeps us on the road in the first place is the friction between our tires and the road. The minute the centrifugal force gets stronger than the force of that friction, off the road we go.

The trouble is that we often don't realize how fast we're going. On road trips, for instance, after we have driven at a certain speed for a long time, it seems a small matter to increase our speed a few miles an hour. Then after a while we may do the same thing again. In other words, we keep putting forward our basis of comparison till by-and-by we have lost our usual sense of how fast we are going. Then, the first thing we know, we are face-to-face with a turn or even half way around it and we feel Old Man Centrifugal Force trying to push us off the road.

So what do we do? We clamp down the brakes. It's the only thing we can do when we find we're going too fast. But just the same, approaching that corner too fast has kept us from taking it as we should have liked to. For if conditions permit, it is often desirable to increase speed as we go around a curve. As long as our rear wheels are not being retarded, but are actually pushing us around the curve, our steering is effective and our car is under control.

The long and short of it is that we can't take liberties with the laws of momentum and centrifugal force. Man's speed laws may not always be observed, but Nature's speed laws always are!

**KING NEWS**

Spring weather—and in the fall of the year! It's mighty comforting though, after the cold and rain of last week. We are hoping it lasts until the last of the cotton crop is gathered.

State Superintendent L. A. Woods, visited in the school recently on his tour of the State-aid schools of this county. He seemed to be well pleased with the way Miss Campbell is conducting her school work here. Well, we are too. Back in the days when this writer went to school, we always got a big kick out of the inspector's visit. Some of the boys dubbed him the "hen inspector". Wonder why? Perhaps it was because most of the teachers "used to be" old maids. What do you think? Most all we knew were.

Mrs. C. F. Dyson visited her sister-in-law, Miss Lettia Dyson, Sunday.

Miss Onida Campbell spent the week end in the home of her father, Mr. J. L. Campbell, of Turnersville.

Marshall Dyson has returned home from Dallas where he has been visiting relatives.

Visitors in the T. L. McClesky home Sunday were Mrs. J. R. Bond and Henry McClesky.

Mrs. C. F. Dyson and Mrs. Dude Creacy spent Monday with Mrs. Dock Creacy.

Mrs. T. L. McClesky spent Monday in the L. D. Nobles home.

Miss Iva Lee Lipsey spent one night last week with Mr. and Mrs. Vernon Lipsey.

Mrs. Carl Wise visited Mrs. Lewis Herrington last Wednesday night.

As Presented by Ted Harris, News' Sports Editor, giving his views on Sports in Coryell County and Surrounding Territory.

## Hornets Play Moody in a Non-Conf. Tilt Today

This afternoon at 3:30 the Gatesville Hornets tackle the Moody Bearcats in a non-district tussle that has been looked forward to as somewhat a "breather." However, due to injuries the locals may be hard pressed to put over a victory.

Both Davis, the regular center, and King his replacement, are suffering injuries and neither will be in the best of form if they get in the contest at all. The pivot position is generally conceded to be one of the two most important places on a football team and with an untried substitute filling in, the locals offense will be weakened to a great extent along with the defense.

The tackle posts ranking along side the center as strong cogs in a grid machine will also be weakened. Myers, regular left tackle, is suffering from a leg injury received in the West game and will be slowed up to such an extent that he will probably see but little action. A football team is no stronger than its tackles and it can be readily seen that the locals are in poor shape for the contest.

So inadequate however is the Moody attack that the Hornets should win by three touchdowns despite the loss of the above named regulars. Coach Worley has been experimenting some with "Big" Williams, running him in the back field at the fullback post and stated that he might use him at this position some this afternoon. The outcome will be watched with interest as Williams is big and powerful with two years of competition left.

.....  
 This afternoon local coaches will put a badly crippled team of Hornets on Hornet field, completing with the Moody Bearcats. Last year Coach Maurice Ewing's Hornets downed the Bearcats 18-to-6. This year with Myers, King and Davis on the bench, the locals should defeat Schwartz's Bearcats three touchdowns.

.....  
 The game with Hamilton, originally scheduled for Friday, Nov. 8, has been changed to Monday, Nov. 11, according to Supt. Williams. The game of this year carries as much interest as any game the Hornets play due to the fact that these two teams have been competing on this day or the holiday set aside for the past seven years.

.....  
 The Mart Panthers and the Marlin Bulldogs meet today in Marlin in what will probably be the deciding game of the district. Both teams are undefeated and the winner will likely go on thru the season without a conference set back. As stated before we predict a Mart victory in so much that the Panthers have played a harder schedule and showed fair form in doing so.

.....  
 Another interesting game today pits McGregor against Itasca at Itasca. Itasca has lost in the district to Mart and won from West and Clifton. McGregor has beaten West and lost to Clifton. The Jenkinsmen after a loss to Clifton have found themselves and trounced West in a more decisive manner than did Itasca and though playing at Itasca we see a Bulldog victory.

.....  
 Speaking of the improvement shown by McGregor the Bulldogs may turn the district race into a wild scramble before the season closes, and with the Hornets continually improving the annual meeting of the Hornets and Bulldogs should be a classic and the final standings in the race for district honors could very easily be hinged on the outcome of the game. We mean by that that the McGregor by a victory over the locals may end the season tied for the top ring.

on a credit basis. We mark our merchandise in plain figures. . . . A child old enough to talk can buy merchandise here as cheap as the shrewdest shopper. We have just one price—we don't believe in the "Old Hoss Swapping" method of doing business. If we marked a \$1.00 article \$2.00 then sold it to you for \$1.50, would you be getting a good value? That is the old wornout way of doing business some stores cling to, and the way a few people like to trade . . . why, we cannot figure out. Don't believe I would care to trade with a firm and after I had paid \$2.00 for a supposed-to-be \$3.00 value, find that a neighbor on one side of me bought the same thing for \$1.50 and my neighbor on the other side of me paid \$1.00 for the same thing. No, we don't believe in the old Hoss Swapping method of doing business—We mark our merchandise in plain figures and sell at that price.
