FHA NOT A BUILDING CONTRACTOR NOR A MONEY-LENDING INSTITUTION

Contrary to the understanding of many prospective home-owners the Federal Housing Administration neither builds homes nor lends money for that purpose.

The borrowed funds all come from private capital thru the medium of commercial banks, loan companies, building and loan associations, etc. All that the FHA does is insure the lender against loss, so that he will be willing to furnish the money necessary to the man who wishes to build or repair his home.

Likewise, all construction work is done by private firms. The individual who borrows the money makes his own choice of architect, contractor and materials firm as he sees fit.

Loans made on the FHA plan for small homes may run for 20 years. Home owners to be may borrow up to 80 per cent of the appraised value of the property, not exceeding \$16,000 in amount.

SIMMONS TAKES OUTLOOK

With this issue of the Outlook we announce the return of Mr. Frank Simmons as Editor-Mgr. Mr. Simmons will be pleased to have your help and support in making the Outlook your community mouthpiece. He will also expect you to help finance the institution with advertising and printing orders.

The past six months Miss Ora Graham has been in charge of the paper and has given you the best there was to be had. Little cooperation was received from the community and little could be accomplished in the effort. She is grateful to all who responded to her appeal for material to make the Outlook the paper it should be. No great things are promised in the coming months, for without the help from the citizens and business men and advertising from the merchants no town can have the kind of newspaper it should have. Any town in the United States with a population of 200 can have and support a

Four speakers for the Universal Mills second annual dealers convention and seventeenth birthday party which will be held in Fort Worth Monday and Tuesday, Jan. 16 and 17. Left to right, R. E. Jackson, dean of the Texas State College for Women of Denton, toastmaster for the Monday night banquet; W. C. Homeyer, director of research for the Mills and head

of the Mills' experimental farms; Ralph W. Carney, Wichita, Kansas, nationally known luncheon club speaker who will deliver the main address at the banquet Monday night, and Gaylord J. Stone, president of the Mills. More than 400 visitors, among whom C. P. Schaub, Gatesville, Texas are invited for the annual event.

SUN VALLEY, LOCALE OF NEW SERIAL STORY

CAFE Society and the International Set are meeting in sparkling panoply at America's newest playground — Sun Valley, Idaho.

Glass-sheltered, warm-water swimming pool at Sun Valley, Idaho.

Here, in the midst of the latest sports craze, Faith Baldwin, well-known novelist, entered right into the fun and adventure and excitement of snow-trains and reindeer sleighing, and she has packed all the thrill of that snowy vacation-land into a romance born on the wings of skis. Sun Valley supplies a brilliant backdrop for "White Magic" beginning in the February issue of Cosmopolitan, the first serial to be written about the newest winter playground.

HORNETS TO TANGLE WITH MCGREGOR CAGERS TODAY

This afternoon at 3:00 in the local gym the Hornet cagers will go after a victory over their ancient rivals, the McGregor Bulldogs. This game is expected to draw a record crowd, both from the school student body and the townspeople.

McGregor has compiled a fine record this season and the game this afternoon is expected to be a battle, what with all the blood-thirsty rivalry existing between these schools. The Hornets will be shooting the works to win, even though it is only a practice game, and the same goes for the Bulldogs.

Last week the Bulldogs met Le Vega high five and were nosed out 37-36 in the last seconds of thruout the game until the last few moments.

Both the scrubs and regulars will play, thereby making it a double-header.

TURNER LEADS WORLEY'S BASKETEES TO WIN OVER BADGERS

Gatesville's Hornets took their fifth victory in eight starts by routing a hustling and game Methodist Home five 43-21 in the local gym Friday. Loraine Turner, who was a regular on last year's county championship quintet but who had not played up to form this year, finally got his eye on the bucket and looped 23 points to lead the scoring parade. He dumped in a long field goal from the center of the court early in the game and from then on he couldn't be stopped. He tossed 'em in from every angle, and sunk six free shots when the Home boys began fouling him in desperation. In addition, he played a sound floor game.

Big Ben McDonald scored 8 points in the first five minutes, but in the last three quarters he slumped and did not serve as an offensive threat. Moore and Weaver did not flash their usual brilliant brand of play.

Terry and Compton, Home forwards, led the scoring for Coach Malone's team, tallying 11 and 10 points respectively.

HORNETS COME THRU WITH UPSET OVER VAUNTED ROSEBUD FIVE

The Gatesville Hornets scored a sensational upset victory when they slashed thru the Rosebud Panthers' defense for a 19-14 victory in a game they were expected to lose by a wide margin. Rosebud had previously won 13 straight games, and were rated by Jinx Tucker, Waco scribe, as the No. 2 team in Central Texas. Big Ben McDonald tossed in three follow-up shots and two gratis throws to take high scoring honors with eight tallies. Loraine Turner played a fine floor game at forward, and looped four points when they were needed most.

The Hornettes took another close from the Pantherettes, 23-20. Margaret Weaver, Madylene Patterson and Treva Davis finished in a deadlock for high scoring honors with six markers a-piece.

LOCAL JUNIOR LOSE TO S. WACO IN CENTRAL TEX. TOURNEY

The Gatesville junior Hornets were eliminated from the Central Texas junior high championship basketball tournament held at Waco Saturday, going down in the last two minutes of play before the sharpshooters of South junior of Waco, 29-28. The Hornets were in the van by a three-point margin with two minutes to go, but lack of experience caused the locals to lose the ball several times and enabled the Waco five to loop a couple of field goals and annex the contest. The Gatesville boys were nervous at the opening of the battle, and missed many shots that they would have ordinarily made. The Waco boys led thruout the first three periods of play, and were in the lead 14-10 at halftime.

Post and Gribble were the outstanding players of the locals, looping nine and eight points re-

Baylor Bears Go After Second Conference Win Against Aggies

The Baylor Bears will be out for the second win Thursday nite when they invade College Station for a tilt with Hub McClellan's Texas Aggies. Shown above is the Baylor team made up almost

entirely of sophomores who Coach Ralph Wolf is counting on to come through.

Pictures from left to right are: bottom row, Charles Boswell, let-

erman forward; Grady Vaughn, soph guard; Joe Terry, soph forward; Ernest Marshel, soph center; Walter Gernand, soph guard; Top row: Nelson McElroy, junior guard; Loy Gilbert, soph forward;

Sherman Barnes, letterman forward; Frank Bryski, Soph center; Dub Walters, soph forward; Pete Creasy, letterman forward, Wilson Wood, soph forward and Coach Ralph Wolf.

spectively. The floor game and passing of the locals was very sloppy, and this shortcoming was the cause of their downfall. The Waco team advanced to the finals before they succumbed to Central junior of Temple, 33-12.

The junior girls club annexed their fourth victory of the season by handing the Levita girls a sound drubbing Friday, 19-2.

PURMELA SCHOOL NEWS

School is progressing nicely since the Christmas holidays with the enrollment of three new pupils: Ned Price from Ewing and Lela and Mary Frances McClesky from Turnersville. We welcome these people to our community.

All are quiet proud of the shrubbery and evergreen recently set out around the school buildings. The fine rains have helped to insure a beautiful and well landscaped grounds during the spring and summer months. The school pupils plan to transplant some trees soon to complete this project started by the ex-students.

Senior boys basketball team enjoyed playing at the Ireland Tournament during the week end. They defeated the Levita team but were in turn defeated by a small margin by the Blue Ridge team.

The next regular meeting of the 4-Square Club will be on Friday, January 27. A fine program under the direction of Mrs. Warden is being planned.

Pupils of the primary room have just completed two quite interesting projects; one on Indian life in the Pueblos and the other on Eskimo life.

Holiday visitors in the community were Mr. and Mrs. A. R. Pointer of Fentress and Mr. Morris Webb of Woodsboro. All were glad to see these former teachers.

The winner of the Honor Roll award for the second month of school in the intermediate room was Seth Turner. He was followed by a close second by Geraldine Ballard, Sybil Basham, and Alma Lee Wise.

During the rainy days the high school room are having a ping-pong tournament among themselves with the losers bringing in the wood for the room. So far the official wood carriers have been Clayton Bell, Durward Thetford, W. T. Spenser, Move Featherstone, and Anson Bertrant. Better luck next time, boys.

The ideal California farm will be a feature of the agricultural exhibit at the 1939 Calif. World's Fair.

More than 100,000 applications for jobs are on file in the employment bureau at the 1939 California World's Fair.

AGRICULTURAL WORKERS HONOR PIONEER OF CONSERVATION PROBLEMS

At a banquet held Friday night in his honor at the Texas Hotel in Fort Worth, R. E. Dickson of Spur was presented the 1939 Merit Award of the Texas Agricultural Workers' Association for distinguished service of the sub-station of the Texas Experiment Station at Spur for twenty-four years. Mr. Dickson has served Texas agriculture with fidelity and distinction.

While his accomplishments in grain sorghum improvement and with livestock feeds and feeding have been significant, it is as a pioneer in the investigation of soil and water conservation problems that he is best known, and perhaps it is this field of agricultural research that he has made his most notable contribution.

In his work on the Spur Station, Dickson plowed a virgin field in unearthing many of the principles and practices of soil and water conservation that today are part and parcel of the broad and comprehensive national program with which the nation is seeking to protect and to restore its most important resource—the soil.

It is in recognition of these distinguished services, which have contributed to the agricultural welfare of not only Texas but the entire nation, that the Texas Agricultural Workers' Association is awarding its Distinguished Service Plaque of 1939 to Mr. Dickson.

Mr. Dickson, a native of Hunt County and a graduate of Texas A. and M. College, is the third distinguished Texan to receive the Association's Merit Award. In 1937, the late J. W. Stubenrauch of Mexia was honored for his distinguished services in the development of the fruit industry of the State. Last year the Award

was made to W. W. Cole of Chillicothe, father of the cooperative cotton gin, in recognition of his long years of service in the field of agricultural organization.

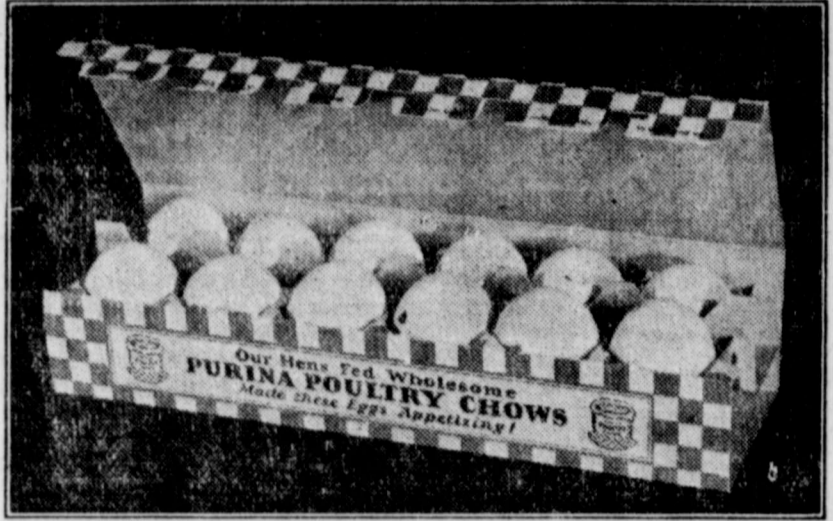

Preceding the presentation of the Merit Award plaque of Mr. Dickson by Eugene Butler, Chairman of the Merit Award Committee of the Association, A. D. Jackson, Chief, Division of Publications, Texas Agricultural Experiment Station, discussed the "History of Agricultural Research in Texas." Victor Schoffelmayer, Agricultural Editor of the Dallas News, spoke on "R. E. Dickson—His Contribution to Texas Agriculture." The Merit Award banquet program, which is featured each year at the annual meeting of the Association, was broadcast over KTAT.

Meeting in Fort Worth for its twelfth annual convention, the Association, which is composed of workers in all phases of agricultural endeavor, was presided over by President Louis P. Merrill, Region Conservator, Soil Conservation Service, Fort Worth. Miss Maurine Hearn, District Agent of the Texas Extension Service, is Secretary of the organization.

NOTIONWIDE RADIO PROGRAM BUILDS QUALITY EGG MARKET

Egg Cartons Furnished Layena-Fed Flocks

A new national radio program designed to make the American public more quality egg conscious and to increase the demand for high quality eggs was inaugurated recently over a network of 85 stations. Sponsored by Purina Mills, the new fifteen-minute broadcast is scheduled every Monday, Wednesday and Friday throughout the winter months.

By dramatic appeal and convincing demonstration the "Checkerboard Time" broadcasts are featuring the more appetizing appearance, superior flavor, and high food value of eggs that come from flocks fed and managed to produce uniformly better eggs.

Better Market—Better Prices
Of special interest to egg producers is the promotional value of the

"Checkerboard Time" programs in helping to build a greater demand for eggs of superior quality, for which people are willing to pay better prices. Of exceptional interest, too, is the new egg marketing program that is being made available to all poultry raisers who follow Purina's program for producing quality eggs with Layena laying mash.

Egg Cartons Furnished
With every bag of Layena laying mash flock owners are receiving up to twenty Checkerboard egg cartons. These are enough cartons to pack the eggs built into every bag of Layena. All Purina dealers have a supply of these Checkerboard cartons and have available rubber stamps to imprint the producer's name on them.

The House has just passed the emergency relief bill providing an additional 725,000,000.00 to carry on WPA work until the beginning of the next fiscal year (July 1, 1939). Last year we attempted to make provision for the WPA work for the full fiscal year. That organization seemed to get along all right and to have plenty of money until just after the election, but early in November they began to lay off workers. In our section, although many needy farmer had been certified as eligible as required by law, this retrenchment made it impossible to ever give them work. This was not the fault of the local officials at Waco and Austin. It was due to orders from the WPA headquarters at Washington. Since Christmas it has become evident that all WPA funds will be exhausted early next month. We all realize that there is still a pressing need for work relief. On the other hand, we also recognize that unless we actually begin to reduce expenses it will not be long before the Government ceases to be able to aid anyone. We, therefore, want a program that will give work to the needy with the least possible expenditure of funds.

The President recommended a special appropriation of \$875,000,000.00. This would mean an expenditure of approximately \$6,000,000 per day. The Appropriations Committee cut the appropriation to \$725,000,000, which means about \$5,000,000 per day, or about a 16 per cent reduction from the amount for which the WPA officials asked. I think \$5,000,000 per day will provide work for all of the needy if properly administered, and if improperly administered, twice that much would not give the needed relief. I, therefore, voted for the 725,000,000 figure. This is much more than many members felt proper, and much less than others claimed was needed.

I also joined in trying to get some amendment on this bill to give us a more equitable distribution of the money, and to require its expenditure in more constructive ways. I think that the difference that exists between the wages paid WPA in the North and in the South is outrageous. I voted for an amendment that would have prohibited more than a 25 per cent difference. This amendment was passed by a close vote. I believe it will go a long way toward correcting the unfair advantage many Northern states

have long enjoyed. I also prepared and introduced and amended to require WPA to furnish the labor for soil conservation projects where sponsored by the Soil Conservation Service and where local agencies agreed to furnish the machinery and materials necessary. The amendment was defeated. Had it been adopted, WPA could have done the same kind of soil conserving work that is now done by CCC camps. I hope we may get this provision in the regular bill for next year, and have assurances of support from a large number of members.

If this bill is passed by the Senate in the form it passed the House it will assure our unemployed that work relief will go on until next July 1st. At the same time it will show the Nation that Congress means to hold appropriations down and not to simply accept and rubber-stamp every request of the departments.

Last night Mrs. Poage and I attended the President's reception. This is the one occasion each year for which I dress up in all of the accoutrements prescribed by the social masters. This reception is attended by cabinet officers, etc., as well as the Members of Congress. It is true that the guests simply line up and file past the President and Mrs. Roosevelt, shake hands with them, and then pass on to the dining room where they drink a cup of very indifferent punch and eat a small piece of cake, then mill around with the crowd, or if you dance (I can't) take a turn or two in the ballroom. Still, there is a thrill to it all just to know that you are in the White House and that you are

seeing and meeting the people who actually administer the government of the United States of America. There are lots of people who have become cynical and who say that nothing ever thrills them, but I have lived in small communities long enough that I don't think I will ever cease to thrill at meeting the President, or for that matter, at seeing the White House or the Capitol. I hope I don't.

I have just been advised by a member of the Way and Means Committee that I have been elected to membership on the Committee on Flood Control. This is not a major committee, but I asked for membership thereon because I hope that as a member I can be of more help to our own flood control program in the Brazos, Bosque, and Little River Valleys.

BRITISH SIDE WITH U. S. IN REJECTING JAPANESE POLICIES

London,—Great Britain in a stern note to Japan published today rejected any change in the status of China brought about by force.

The government in effect aligned itself with the policy of the United States government.

The note was handed to the Japanese government yesterday by Sir Robert L. Craigie, British ambassador to Tokyo.

In the most forceful language Britain has used since the undeclared Chinese-Japanese war started, the communication declared:

"His majesty's government are at a loss to understand how (former Japanese premier) Prince Konoye's assurance that Japan seeks no territory, and respects the sovereignty of China, can be reconciled with the declared intention of the Japanese government to compel the Chinese people by force of arms to accept conditions involving surrender of their political, economic and cultural life to Japanese control."

REDS ATTACK LINDBERGH

Col. Charles A. Lindbergh, famed American flyer, was denounced as a "reactionary fascist agent

of Hitler and Chamberlain" in the English edition of the "Communist Internationale," organ of the comintern, here today.

Travel authorities predict that 1939 with "Fiesta in the West" climaxed by the World's Fair on San Francisco Bay, will see new records set for westward tourist travel.

GATESVILLE, TEXAS, TUESDAY, JAN. 17, 1939

NUMBER 8

CORYELL COUNTY ORGANIZES WILDLIFE PLANNING BOARD

Coryell County organizes County Wildlife Planning Board. Officers of the Board are President, Dawson Cooper; Vice President, J. R. Bates; Secretary and Reporter, Guy Powell. The organization of a county wildlife planning board is in cooperation with Texas Game, Fish and Oyster Commission and Texas Extension Service for the planning of Wildlife development work within the county. The Board is composed of representative men thruout the county who will be asked to make recommendations for development work which is now being undertaken in cooperation with existing agencies.

The Board set-up as its immediate objectives:

First. Urge every farmer and rancher of the county to sign cooperative agreements offering their cooperation toward the development of wildlife in Coryell County.

Second. To put up Game Conservation Signs.

Third. Urge communities to organize local community game conservation organizations.

Fourth. Offer the cooperation of the County Game Conservation Association to the State Game, Fish and Oyster Commission.

Approximately 200,000 acres of land have been signed up in recent weeks under cooperative agreement and approximately 100 game conservation signs have been constructed.

The meeting held the night of January 10th was the second at which Assistant Regional Game Manager L. D. Lamb has attended. The State has been divided into regions, with S. M. Melton, whose headquarters is Fort Worth as manager of this region, and trained game conservation men are aiding wild life planning boards in those regions toward the development of adapted species of wildlife in each respective area.

Coryell County men have long felt the need for such development work and have had a county organization working toward this end. It now seems probable that some of the objectives may be realized in the near future. The Board received encouragement regarding the stocking of a portion of Coryell County with deer and turkey, provided the men within the respective areas will assure the State Department, through the local organization, that deer and turkey will be protected until such time it is felt the area is stocked. The County Wildlife Planning Board is most anxious to have the cooperation of the people of the county in this development work. Much benefit can be realized if the people as a body support such a movement.

C. C. N.

SEC. OF DUROC BREEDERS HERE

Coryell County Duroc breeders were honored on Sunday by a visit from B. R. Evans, Secretary of the United Duroc Record Association, and editor of the Duroc News. This was Mr. Evans' first visit to Texas. Since only a short time was allowed in Coryell county only a few of Coryell County's many good Duroc were seen. Mr. Evans was very complimentary in his remarks regarding the quality of the Duroc which he saw, and suggested that one of the main things we need is more size. He especially appreciated the medium or "in between" type which is being produced here, which with added size, would be on an average with any other section.

PIGS LIGHT IN FALL CONTEST

The Pig Production Contest which ended December 31st show that the fall litters as a whole were somewhat lighter than the spring litters in weight. Albert Jacobs of Coryell City had the highest total weight in the contest of 29 entries. The winning litter was a Poland China litter as was the winning litter in the Spring contest. Second heaviest litter was the 9 Duroc pigs of C. W. McConnaughey. Third heaviest litter was 12 registered Hampshire pigs fed by Tom Chaney.

Several new angles are being worked on for the contest starting January 1st and ending June 30th. These announcements will be made in the near future.

STATISTICS ON 4-H CLUB PIGS

4-H Club pig records for the year 1938 disclose many interesting facts. Thirty boys had in their demonstrations 289 pigs and hogs weighing a total of 39,763 pounds. These 289 animals were composed of:

Seven boars weighing 2,471 lbs. Twenty-four sows weighing 9,514 pounds.

One hundred and eighty-eight pigs weighing 11,577 pounds.

Sixteen gilts weighing 3,705 pounds.

Fifty-four butcher hogs weighing 12,496 pounds.

The above animals were worth \$1,127.50 at the beginning of the demonstrations and worth \$4,060.87 at the end of the demonstrations.

Eighteen of the twenty-four sows are registered. All of the sows except one were bred to registered boars. Fifty-seven animals were exhibited at State and District shows during 1938. All of

the boys provided adequate pastures for their hogs and fed them on home grown feeds. All of the animals were fed some form of protein supplement, including milk and commercially prepared forms.

PRECOVERAGE? WHAT IS IT? IT'S PICTURES AS EVENTS PASS

Starting this month, as you may have noticed, we are giving readers a new feature, which gives pictures of events, state, national, and international as they HAPPEN.

Follow these interesting events as they happen—they're in the News.

C. C. N.

Tobacco was originally the name for a tube thru which West Indian natives inhaled smoke, the plant itself being known as cohoba.

Murders declined, burglaries increased in the first nine months of 1938 compared with the similar period in 1937.

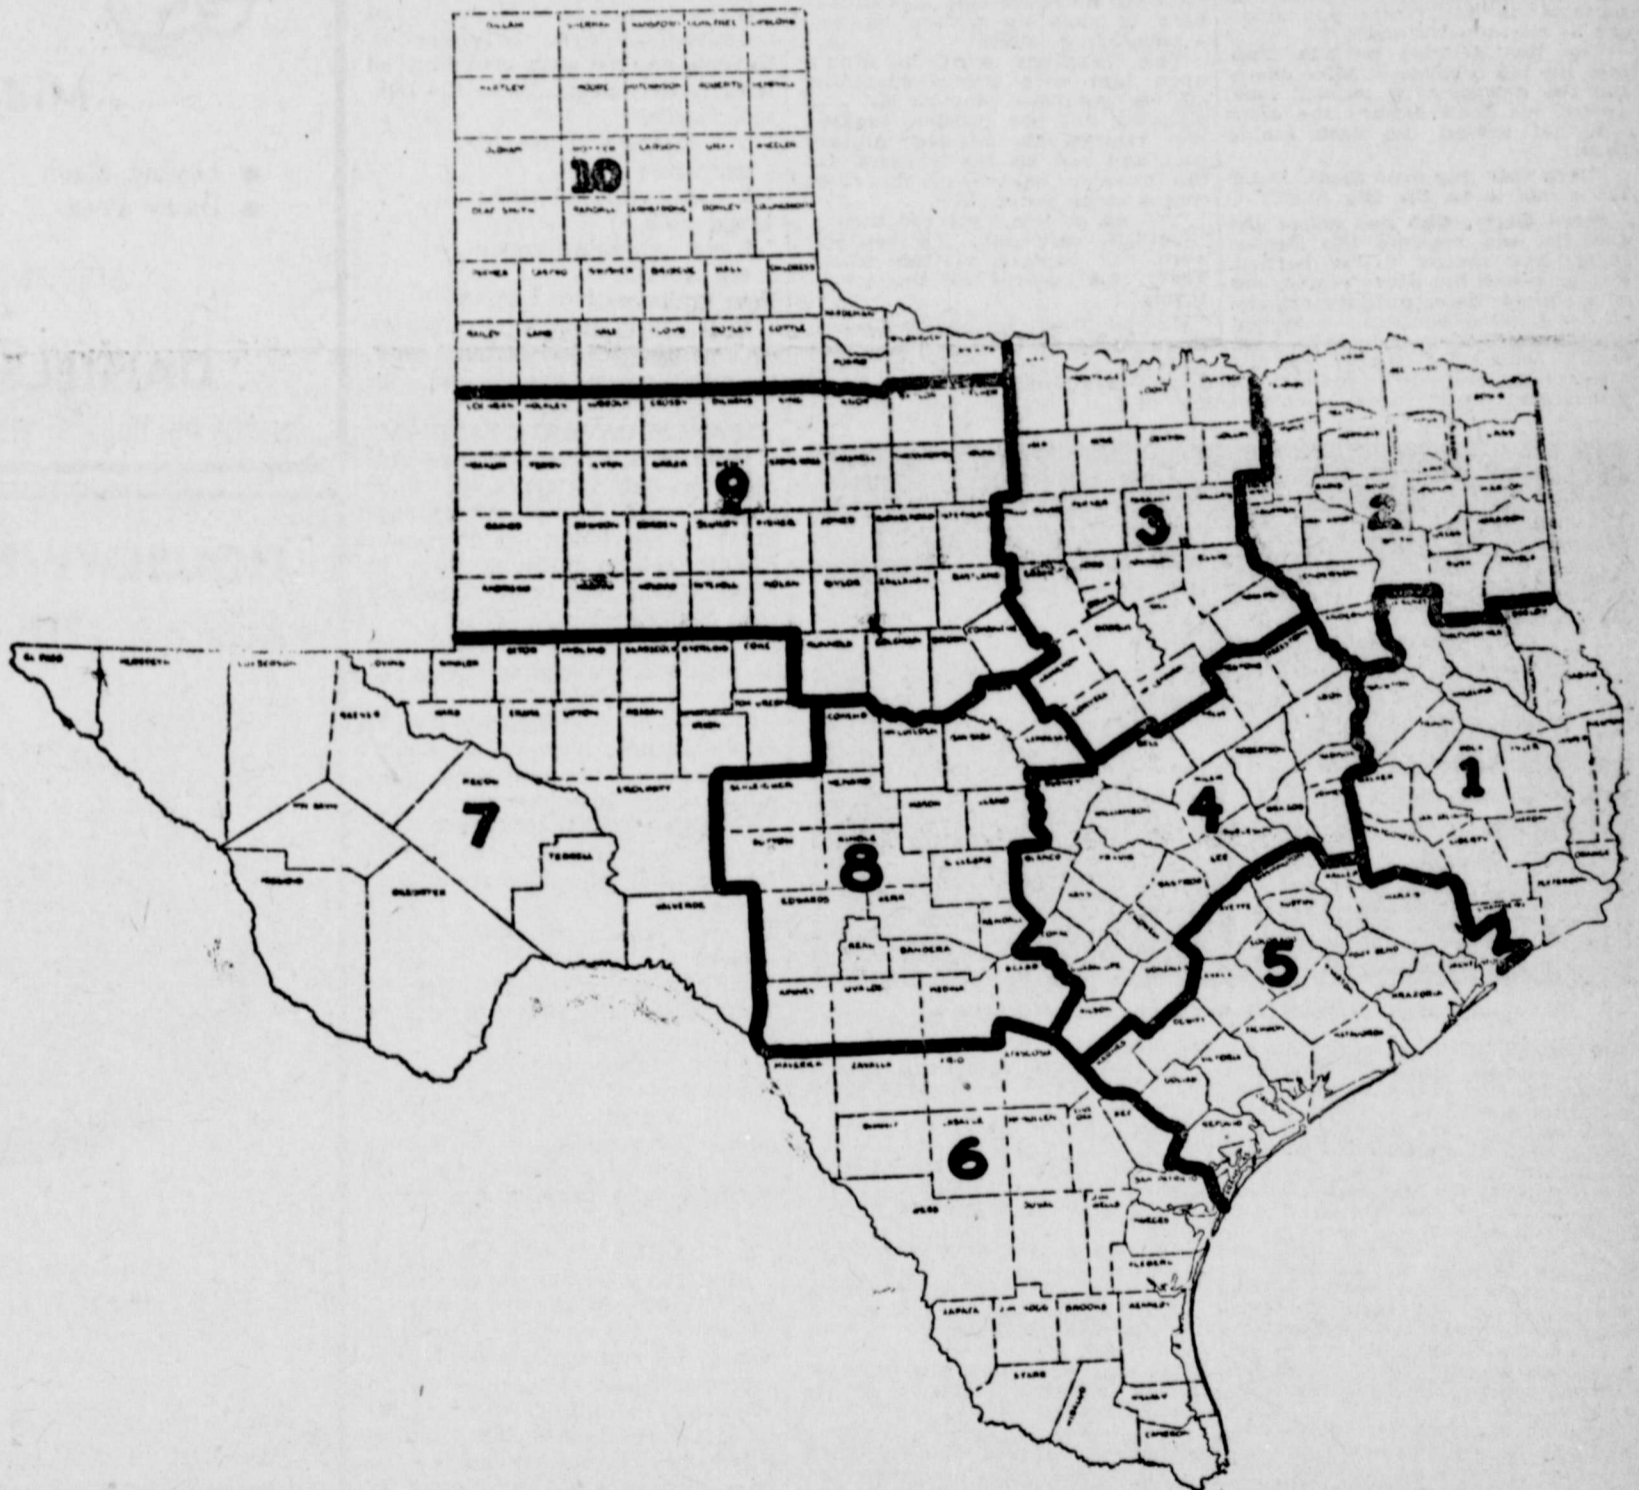

"VISITATION" OF LIONS AT SCHOOL SHOWS "BOYS" SOMETHIN'

Gatesville Lion's Club has instigated "Visitation Weeks" designed to give businessmen a better idea of what the "other fellow" is doing in his particular line.

Last week, Lions visited C. E. Alvis, Jr., Arnold Electric Co., and Gatesville Public School System, and visitors at the latter were Crawford Scott, V. C. Ray, Howard Franks, George Painter, H. K. Jackson, J. Hurl McClellan, Carl McClendon, Floyd Zeigler and Dr. Ellworth Lowrey.

E. D. Shelton gave a "talking picture" on butterflies, used in a biology class, we saw the speed and dexterity of the NYA boys, and their work; and a lot of new ideas in 1939 school work, all of which was in Gatesville's biggest business, manufacturing "brain-trusters". It was interesting to the Nth degree, and showed us how ignorant we were, since when we were on "gravel hill" we did not have all those things.

REGIONS OUTLINED FOR STATE-FEDERAL GAME PROJECT

Above is shown a map of the State divided into 10 regions for the purpose of carrying out the State-wide wildlife survey, demonstration and management project under terms of the Pittman-Robertson act passed at the last session of Congress.

In each region there is stationed a Regional Game Manager, and in addition there are three assistants. The names and headquarters addresses are given for the convenience of those desiring to get in contact with them.

This project is financed mostly

with Federal funds derived from the tax on firearms and ammunition. The Pittman-Robertson act diverted this tax money to the States for wildlife restoration and research, each State to receive an amount determined by the area of the State and the number of hunting licenses sold. Texas lags in the sale of hunting licenses, but its area made up the difference and entitled it to receive \$150,000 annually, the maximum amount allowed any State under the act. To obtain this wildlife money States must submit pro-

jects that meet the approval of the Biological Survey and the U. S. Secretary of Agriculture. Texas' first project submitted was the survey, demonstration and management program, which was approved early in August without change and is now under way. The Federal government allotted \$40,200 and the Game, Fish and Oyster Commission matched this amount with \$13,400 to finance the project through July 31, 1939. States must match Federal funds for each project in the ratio of 1 to 3.

The Texas program is essentially a research program. It is expected to last five years. Overnight miracles are not expected. The Regional Game Managers, cooperating with Wildlife Planning Boards in each county, and with other interested agencies and individuals, will make a survey of wildlife populations and possibilities in their regions, start restoration projects where they are justified, and recommend others that may be undertaken either with State funds or with additional Federal funds made available by the Pittman-Robertson act.

How Does Your Garden Grow?

By T. C. RICHARDSON, Secretary
Breeder-Feeder Association

The best time to start a spring vegetable garden is last fall, but it is never too late. Some soils require several plowings or spadings, with time for nature to do its share in aerating, pulverizing, and settling. If this was not begun with fall plowing and fertilization it can still be done, but with more labor. A poor seed bed is bad enough with the ordinary field crops, costing loss of stands and yields, but is inexcusable in the garden. In either case good preparation before planting is the best cultivation the crop will ever have, and the most economical.

It would be presumptuous to offer detailed instructions for making the garden ready, for every good farmer knows what his particular soil requires in the way of tillage and fertilization. For those who do not know there are garden bulletins to be had from county and home demonstration agents, or a neighbor who has learned and practiced good gardening under his own conditions of soil and climate. Smart men learn from others, and it is no disgrace to ask. Those afraid to ask pay dearly for experience.

The "frame garden" has solved the problem of having vegetables under difficult conditions of high winds, hot sun, and lack of timely rainfall with which much of the Southwest has to contend. It is nothing more than a huge box four or five feet wide, as long as desired, with plank walls rising 12 to 18 inches above the surface of the ground, of course the soil in the box is well spaded and fertilized before planting. Rows run crosswise for ease of planting and cultivation. It may be sub-irrigated by the usual methods or watered on the surface, and with rows eight to twelve inches apart an almost unbelievable amount of the smaller vegetables can be grown.

Burlap or canvas covers which can be hooked at one side, wire netting to keep the chickens out, also hinged at one side, complete the equipment. Besides furnishing early vegetables it will serve as a cold frame to grow early plants for the open garden when all danger of frost is over. Where wind and sun are most severe, as in western Texas, New Mexico, and Oklahoma, a half-shade cover made of plaster laths spaced one or two inches apart is advisable.

Sub irrigation for gardens has long been in successful use in the Southwest, and directions for installing lath pipes or tile may be had from county agents. This winter is a good time to lay out such an underground system as an insurance for a good spring and summer garden, larger than the frame garden. Subirrigation uses less water and does not encourage weed growth and baking of the surface soil as rain and sprinkling do.

There as site on most farms where the run-off water from other ground may be turned onto a garden for the vegetables which require considerable space. Fred Kveton of the South Plains plants his Irish potatoes, corn, melons, main crop bean, peas, etc. in regular cultivator-width rows and waters an acre or two by collecting the run-off from several acres of pasture on the garden plot. It thus gets two or three times as much water as falls directly on the garden, the flow being distributed by a system of "syruppan" terraces carefully laid out by the farm level instrument.

There is a way to have a garden in every soil and under every climate in the Southwest, and its value in contributing to a wholesome diet, besides the money value, is incalculable. A few cents worth of seed multiplies a thousand-fold in skilful hands.

been reported in recent months from small mines and prospectors' claims in Western Australia.

Missouri dairy heard improvement associations estimate cost of feed represents only 50 per cent of the expense of keeping a cow. The other 50 per cent goes for overhead, depreciation, interest and labor.

Many concessionaires have finished their buildings on Treasure Island and are awaiting the opening of the 1939 California World's Fair next February 18.

Fashion Spree Awaits Modern Matron

THERE is no period in a woman's life quite so discouraging or baffling as that 35-to-45 stretch when chic and charm demand an entirely new formula.

"We believe that today, as never before, every woman can be lovely and young looking and smart," the editors of Pictorial Review maintain. And to prove their conviction that a woman can be even more arresting and beautiful than her younger daughters on an extremely modest pocketbook, the magazine announces in its February issue, that it will bring to New York for a four day fashion and beauty spree the woman who writes the best letter about her personal figure, clothes, and beauty problems.

Any woman between the ages of 35 and 45 may enter the contest and the first prize winner will come to New York at the expense of Pictorial Review. She will receive a course of beauty treatments in one of New York's largest beauty salons; a figure analysis and a fitting by a famous corsetier; and a style analysis and a brand new spring costume, complete to the last detail from one of Fifth Avenue's most fashionable shops.

The four women who write the next best letters will also receive a course of beauty treatments with all the needed products supplied; a diet to meet their needs and a set of individual exercise instructions; a complete figure analysis and a corset to take care of this problem; and a style analysis with a length of fabric from which a dress can be made to conform to the lines suggested.

The editors of Pictorial Review believe that this contest will provide a fund of information for every woman whether she wins a prize or not. "Nothing will be done for the prize winners that any woman cannot do for herself," they say, "no matter where she lives or how little she spends, provided only that she knows the rules and the ways and the aims."

When the designs of one or more house depart from the existing styles of architecture in a community, they should be segregated and grouped together rather than mixed with the conventional types of residences. This segregation will benefit both types, aesthetically and commercially.

IDEAL AMERICAN SPORTS GIRL

favorite winter sports costumes. For skiing: water-repellent, wind-resistant gabardine ski suit, with sailcloth jumper's cap and knitted socks and mittens. For skating: flannel skirt and knitted sweater of Norwegian Reindeer pattern with matching cap and underneath panties.

ARCHITECTS STRESS NEED FOR HARMONIOUS DESIGN IN NEIGHBORHOOD

A dwelling should conform to the same general type of design featured by other houses in its neighborhood in the opinion of leading architects.

By this they do not mean they want a monotonous repetition of the same styles, but rather that there should not be such a wide

difference in the styles as to provide a disturbing clash, from an aesthetic viewpoint.

As one example, they point out that a two-story English type residence would be definitely out of place if it were placed in a one-story Spanish type bungalow locale. They further agree that such a home would be much more difficult to sell, regardless of its individual merit from a construction and beauty standpoint.

CONSIDER THESE BASIC POINTS WHEN BUILDING YOUR OWN HOME
The more a prospective homeowner knows about building procedure, the greater are his chances of getting full value on his investment. Naturally, it is impossible for the average layman to arrive at an understanding of the smallest details in home construction, but it is possible for him to familiarize himself with the basic steps. With this knowledge he can often discern danger points in time to avert them, and, in the end, get exactly the kind of house he expects. Here are five basic considerations for home-owners-to-be:
(1). Familiarize yourself with

Vocal Defects Can Be Cured, Writer Says

If the afflictions of this country's ten million victims of speech could be cured, the national income would be increased over six billion dollars, according to Dean E. W. Lord of Boston University. This dollars and cents estimation of the serious disadvantage of those handicapped in vocal expression cannot possibly measure, of course, the untold mental suffering of the children or adults who are afflicted with speech disorders. Ten per cent of all pupils in our schools today are handicapped in vocal expression according to the American Speech Correction Association; and there are more youngsters who are defective in speech than there are youngsters who are crippled, blind, or deaf, combined.

Defective speech is indeed far from uncommon, but a great many vocal troubles can be cured. In the February issue of Pictorial Review, Maxine Davis after a thorough survey of the latest findings of science and speech schools in this field, points out the most common vocal defects and what can be done to cure them. She explains that there are three general classifications of speech disorders: stuttering; disorders of articulation (where the sound is not broken into its component parts); and disorders of symbolic formulation (where complete words or complete sentences cannot be formed). There is no one formula for treatment of stuttering for it varies with every single case. The medical doctor seeks physical defects and the scientist emphasizes the training of thought rather than of speech. Most men and women who train those suffering from defective speech take advantage of the fact that people don't stutter when talking in unison, so a whole class reads together. Later a pupil reads alone. When dealing with types of speech defects other than stammering, Miss Davis points out that other kinds of treatment must be used. Some of our leading scientists have devoted years to this

Maxine Davis, author of magazine series on medical problems.

whole subject and have a great volume of clinical experience and their own and their colleagues' research upon which to base their care of each case. "In spite of this the country is suffering from a plague of quacks," Miss Davis writes. "They promise quick and certain 'cures' while responsible scientists and teachers will usually advise you it is likely to take from six months to a year—or longer—to cure defects of speech. And they will never guarantee results." However, many disorders of speech can be cured, she says, and the sooner the cure is undertaken, the better the chance for good results. If your child shows signs of trouble or you have delayed until your child or your brother, or you yourself are older, don't despair. There is still hope—a great deal of hope.

the basic fundamentals of construction. Read up on the subject and discuss it with friends who have built their own homes, if possible. Knowledge of accepted building practices will enable you to discuss your aims with architect and builder in an intelligent manner. And it will give you a deeper understanding of where your money is going and whether certain extra items are worth the expense they incur.

(2). It is also well to gain an understanding of the rudiment of good design and efficient planning, for poor arrangement and unattractiveness can make the most expensive home a disappointment. Retain a capable architect as counsel to make absolutely sure that your home will be planned right. His assistance will outweigh the fee he charges.

(3). Investigate all financing possibilities before starting to build. Federal Housing Administration mortgage plans make home-ownership possible even for those who have small incomes. Payments may be extended for as long as 25 years in some cases; down payments vary from 10 per cent to 25 per cent of construction cost. Consult your local banks and building and loan associations for

additional information and advice on this subject.

(4). Build for the future as well as for the present; use reputable quality materials thruout. Skimping on quality seldom pays any dividend other than trouble later on. The few dollars you save at the present time will be expended later on in repair bills and impaired efficiency. Your local dealer can give you information concerning approved materials made by responsible manufacturers. They usually keep pace with the latest in safety, comfort, convenience and economy and you can be guided by their experience.

Sound planning and quality materials depend, in the end, upon the care and thoroughness with which they are used. In this connection it is imperative that you should hire a reliable contractor with a high reputation. Again it is wise to follow the recommendations of those who have had experience; your friends, your architect, your materials dealer. Consider his qualifications carefully before making your choice.
