FRIDAY, JULY 25, 1941 NUMBER 63

TEN ARE NAMED TO ADVISORY COMMITTEE FOR REHABILITATION TENANT PROGRAM

Appointment has been made of ten Coryell County citizens to advisory committees which will assist in the operation of the rehabilitation and tenant purchase program of the United States Department of Agriculture here.

George C. Moore, Coryell County supervisor for Farm Security Administration, announced the appointments as made by C. M. Evans, Regional Director of FSA at Dallas.

Committeemen for Coryell county are: Mr. Fred Schloeman, farmer; James W. Summers, farmers; Lloyd Williamson, farmer; C. H. McGilvray, Real Estate Agent; Jack Weaver, farmer; Early Bennett, farmer; J. H. McClellan, Postmaster; Guy Powell, County Agent; W. F. Stiles, School teacher; John L. Voss, farmer.

Mr. Schloeman, Mr. Summers, and Mr. Williamson will serve as

members of the sub-committee for the tenant purchase program. Members of the subcommittee for the farm debt adjustment and tenure improvement work are Mr. McGilvray, Mr. Voss, and Mr. Weaver, while Mr. Bennett, Mr. Schloeman and Mr. Williamson will serve on the subcommittee for the rural rehabilitation program. Mr. McClellan, Mr. Powell and Mr. Stiles are members at large to advise on the various phases of assistance to low income farm families, with which the Farm Security Administration program is concerned.

Under the tenant purchase program funds are provided for the purchase of family-type farms by qualified tenants under the Bankhead-Jones Act. Coryell County already has 18 new farm owners who were financed under this program. Funds are available for

WHY NOT PAY THE NEWSPAPERMAN FOR SPACE

(The Hamilton County News)

Any ordinary sized waste paper basket is absolutely impractical under an editor's desk. Instead, a fairly good sized commercial cardboard carton is used, and, at that, requires emptying maybe twice daily. We viewed with dismay the contents of this box last Monday. It was full and running over with little or nothing else than envelopes containing matter from various schools, colleges, universities, state departments, national organizations, army, navy, promotion thru free newspaper space. The pile of aviation and other business of the country seeking literature would have made us laugh at the ludicrous idea of getting it into an eight- or ten-page weekly paper—if its significance were not so tragic. Somebody is getting pay for preparing the mats for pictures and the pages and pages of information on this, that and the other, and this, that and the other never gets where it is intended to go—before the public thru the newspapers. If some of that money were budgts for "advertising", and the advertisements were prepared briefly, attractively and to the point, the public would be advantageously reached.

The County News is as patriotic as Uncle Sam or any branch of the service that it is so necessary to promote, and this paper is happy to have the privilege of aiding in getting over any kind of information necessary for the benefit of recruiting all branches of service. We appreciate the service of the different agricultural and stock extension departments rendered the people, but paying somebody to send out thru the mails literally thousands and thousands of pounds of articles to the poor "Country Editor" is no favor to him, and is rather in the nature of a nuisance. Of course, we do not know if any of this "dope" is sent to the dailies or not, if it is we never "catch up with them" printing it.

But, one thing is proven beyond the shadow of a doubt, and that is, the estimate of the value of the country weekly as a disseminator of information is rated highly by those who wish, and whose business it is to get "things over" to the masses of the people.

This Week in Defense

F.D.R. ASKS LONGER SERVICE

The War Department asked Congress for legislation to retain the National Guard, Reserves and Selectees for the duration of the emergency. President Roosevelt told his press conference that unless Congress acts the Army faces serious disintegration.

The President said no violation of contract or faith would be entailed in such extension of service, because the Selective Service Act had provided for such an extension of service by Congress in the event of a national emergency.

The War Department announced initial deliveries of the A-24, a new dive bomber that can outperform those used by other nations. The Department said rifles and submachine guns are now being produced at a daily rate of 1,150, compared with 289 one year ago. Under Secretary Patterson issued a statement of Army progress showing expenditures increased six-fold in the past fiscal year.

LEND-LEASE AID

President Roosevelt sent Lend-Lease Administrator Hopkins to London for a new survey of British needs, and assigned two Army generals to speed the flow of munitions and food to Britain. The Surplus Marketing Administration purchased 30,000,000 pounds of tobacco, 2,544,000 bushels of corn and 75,000 bales of cotton for shipment abroad under the Lend-Lease program.

CIVILIAN SUPPLY

The OPACS announced a program to give preference over other civilian needs to repair and maintenance parts for privately-owned automobiles, trucks, trailers, tractors, household refrigerators, stoves, ranges and water

heaters, plumbing fixtures, and furnaces, hospital equipment, surgical instruments and eye-glass frames and parts.

SHIPS

The Maritime Commission said expansion of the merchant shipbuilding program requested from the Congress would provide 566 new ships by the end of 1943. Although only one of the 312 emergency cargo ships was scheduled for delivery this year, at least 10 will be in operation by December 31, the Commission said. The fastest ship construction during the last war was seven months and 24 days, the Commission said, but it now hopes to reduce the time to 4 1-2 to 5 month, with two ships completed every day in 1943.

The Maritime Commission took title to 16 more Danish vessels and to four Italian vessels under provisions of the Ship Requisitioning Act and the Coast Guard seized 15 other Italian ships and one German ship to be put into service as soon as sabotage damage is repaired.

President Roosevelt signed legislation giving him power to grant defense materials priority in merchant shipping space and loading facilities.

ALUMINUM COLLECTION

OPM Conservation Chief McClellan announced housewives' donations of used aluminum were during the collection campaign July 21-29 should permit construction of more than 2,000 additional fighting planes. He said tests indicated a minimum of 15,000,000 net pounds usable in defense manufacture will be collected in the national campaign. Civilian Defense Director LaGuardia said State Procurement offices of the

Treasury Department will direct shipment of collected material from concentration points in each State to the nearest selected smelter.

Price Administrator Henderson said additional supplies of waste paper and cardboard are needed for packing articles produced by defense industries and urged that waste paper be saved by the household for collection by waste paper dealers.

PRICES

Labor Secretary Perkins announced retail food prices increased 1.7 percent during the last two weeks of June, in addition to 1.6 percent in the first two weeks of the month. Principal rises were in the price of eggs, lard, butter, pork chops and canned tomatoes, she said.

President Roosevelt told his press conference he is considering placing a ceiling on rents and on commodities and asking Congress to put "teeth" in price-fixing measures.

Price Administrator Henderson, speaking at Atlantic City, said costs and prices have risen at the wholesale level and will soon hit the nation's pocketbooks. Before long, he said, "there will be more purchasing power running around hunting something to buy than there are goods available."

W.P.A. AND DEFENSE

WPA Commissioner Hurter said total average WPA employment during the 1942 fiscal year will be maintained at 1,000,000 instead of 1,700,000 as in the past year. He said a most 30 percent of all WPA workers were employed on national defense projects in June and cuts will be made more slowly from these projects than others

STATISTICS

If you got statistical, and should figure the reading in this issue of the News, there are over 222 inches of "copy", "type" or "reading matter", and, figuring further, 8 lines per inch, that's over 1,776 lines of reading, and figuring at the legal publication rate of 1c per word, or 5c per line, that would be \$88.80—a very nice donation—we'd say. Figuring the advertising in the issue, it won't be near that figure.

It's just one of those things and we do it every issue.

This IS part of our business to put out this information, and free, but, as we think you will agree, we can't give up this much space each edition, even for this. This is the ONLY way we can impress on our readers, the agencies, etc., how much unusable material of this nature is received by, not only us, but all other publishers. It's really tremendous.

Free Show For "V"

Saturday morning, compliments of Charles Powell of the Palace Theatre, there will be a FREE show (picture not announced) and the price of admission for everyone will be a piece of ALUMINUM.

This is in cooperation with the Nation-wide Aluminum Drive which is in progress.

OUR ALL-OUT EDITION

First, read the editorial on the opposite side of this page which was recently published by The Hamilton County News, Hamilton, Texas.

We think The Hamilton County News is entirely correct. WE get the same thing as do over 600 other Texas "county editors," and probably the 22,000 weeklies in the USA. The expense of this certainly must be in the 7 figure class, we mean, the million dollar class.

Colleges advertise in the dailies; we get the stories; the armed services advertise in the dailies; we get the stories. These, as many of them, come to the local agencies with these instructions in a separate letter the editor is not supposed to see: "get this run in your local papers if it DON'T cost anything, and have (also free) checking copies sent to this office; or get this article run and send us a clipping."

Now, right now, according to "Newsweek" the U.S. Navy thru a New York advertising agency is spending \$1,500,000 on a Navy recruiting campaign; so far, we've gotten the free stories. Right now, or only recently, the Air Corps has spent (appropriated by Congress) \$250,000, if our memory is correct, advertising for Flying Cadets in the U.S. Air Corps; we got the free stories.

This issue of the NEWS has only government stories, written by the government and run "as is". We've cut the regular features, story, columnists, personals, society, correspondents—everything except these stories: In THIS issue is ONLY a part of a week's supply, and each and every item is said by the agency to be of utmost importance. We won't argue about that. Our Rodeo or Christmas editions, if we had them every issue would not be large enough to carry this publicity and what we call "news", that is, features, columnists, stories, personals, society, correspondents, market news, the weather, etc., etc., which we think (or, are we wrong?) you enjoy.

We're 99.44% patriotic, but it is utterly impossible to give complete coverage, as is done in this issue of the News for all these agencies, and too, we're a little funny, we like to receive, as well as to co-operate (ie, give).

We wanted you to KNOW about this, and that we ARE co-operating, but can't possibly do what is ASKED, and sometimes practically DEMANDED.

Big Increase in Net Worth Made By FSA Families

Farm families in Texas who are borrowers of the Farm Security Administration have increased their average annual net income 42 per cent, or from \$470 to \$669, it is revealed by a new nationwide survey comparing the status of FSA borrowers in 1940 with their condition before coming into the program.

Results of the survey, just completed in Washington, were received by George C. Moore, Coryell County FSA Supervisor, from C. T. Watson, acting state director of FSA.

Total annual income of the 29,658 Texas FSA borrowers covered in the survey was increased by \$5,899,273, the survey showed. The total annual income of the 154 Coryell County FSA borrowers was increased by \$12,562.89. This growth in prosperity and purchasing power, Mr. Moore said, is reflected on the books of the merchants and other business men in Texas.

The families are making satisfactory progress in the repayment of their long-term loans. They have already repaid \$17,188,077 on loans totaling \$35,912,207, although much of this money does not fall due for four or five years. The Coryell County FSA borrowers have repaid \$29,884.75 on loans totaling \$37,726.49.

Mr. Moore said that none of the borrowers were able to get adequate credit anywhere else and that many of them formerly were in dire circumstances.

"In view of this fact, the repayment record of Texas FSA borrowers is a tribute to the honesty and industry of these needy farm people," Mr. Moore said. "There is ample evidence that the majority of them are getting back on their feet and becoming permanently self-supporting."

Their progress, Mr. Moore explained, is due in large measure to the advice and technical guidance in sound farm and home management which accompanies each Farm Security loan.

During 1940 the average Texas FSA borrower produced \$295 worth of goods for home consumption,

as compared with \$166 before coming into the FSA program. The average Coryell County FSA borrower produced \$428 worth of goods for home consumption, as compared with \$218 before coming into the FSA program.

Goods produced for home use included 423 gallons of milk per family, 388 pounds of meat and 287 quarts of vegetables and fruit canned for winter. For Coryell County FSA borrowers, goods produced for home use included 649 gallons of milk per family, 484 pounds of meat and 153 quarts of vegetables and fruit canned for winter.

Another important phase of Farm Security's rehabilitation program, Mr. Moore explained, is adjustment of the family's old debts. "Local Farm Debt Adjustment

committees are set up for this purpose. They have no legal authority to compel adjustments," Mr. Moore said, but by bringing the farmer and his creditors together, they usually are able to help both parties reach a friendly understanding settlement."

This service, Mr. Moore said, is available to all farmers, whether or not they are FSA borrowers, and creditors as well as debtors may apply for assistance.

Besides its rehabilitation program, FSA is carrying out the Bankhead-Jones Farm Tenant Act, Mr. Moore said. This act provided a limited number of loans to competent tenants to enable them to buy family-size farms. During the first three years of this program, 1,048 tenant purchase loans were made in Texas and 12 tenant purchase loans were made in Coryell County and the program is to be expanded during the coming season.

This Year's Peach Crop Is Finest And Biggest in 10 Years

Peach Producing Industry and Food Trades Industry in Cooperation With the Surplus Marketing Administration U. S. Department of Agriculture. FOR RELEASE: July 25th, 1941 Americans this year have the privilege of enjoying the finest and largest peach crop in the last decade. Unlike war-torn Europe, America is not suffering from a shortage of needed foods—but is suffering from under-consumption with more than 40 percent of our entire population actually undernourished.

In making this statement, Mr. Louis Thomson, Chairman of the Coryell County Food Industry Committee added that a cooperative public spirited educational campaign sponsored by the Peach Producing Industry and Food Trades Industry in cooperation with the U.S. Department of Agriculture is now under way to increase the consumption of fresh peaches by everyone.

During the period July 24th thru July 30th all housewives in this area and the South are urged to serve more fresh peaches, and to preserve thru home-canning an adequate supply for year-round use.

Mr. Thomson said, "Very few people know the importance of peaches in nutritional and dietary values. It is not generally known that peaches are rich in valuable minerals, calcium, iron,

phosphorus and potassium, needed to build bone structure, protect the teeth, enrich the blood, regulate body functions, and make clear complexions.

"The abundance of valuable food factors in peaches, scientists say, includes Vitamin A, which helps growth and vitality and is nature's first line of defense against diseases of the nose, throat and lungs; Vitamin B, needed for

growth and health, increases appetite, stimulates digestion, and aids in protecting the body from nerve diseases; Vitamin C, needed to keep the body in good condition, aids in resistance to infection, and stimulates growth, and Vitamin G (b2), vital to nerve tissues and maintenance of body vigor, as well as helps to maintain normal skin and complexion."

269,789 Lunches By WPA Served During Past School Year

Assuring Mary and Johnnie of well-balanced lunches at school next year, pots are boiling in the Coryell County WPA Food Preservation Center.

Thousands of cans of beans, peas, okra, squash, tomatoes, turnip greens, spinach, beets, carrots, and fruit will be coming off the "assembly lines" during the summer months at the canning center operating in Gatesville.

It used to be that school children took cold lunches packed in pails or paper sacks or wrapped in newspaper. A sandwich or two and may be a piece of fruit comprised the noonday meal. Now, however, piping hot lunches prepared and served by WPA cooks are as much a part of the school's daily schedule as readin', writin' and 'rithmetic. Those able to pay a few pennies for their meals do so, those unable to pay, eat just the same.

During the past school year 269,789 well-balanced meals were served by WPA in the schools of this county and parents and teachers have noticed unmistakable results of improved nutrition among the students. Children attend school more regularly, they take more interest in their work, are quicker to learn and their general health is on the upswing, say the observers of the rapidly expanding school lunch program.

Vegetables from the 21.7 acre school garden at Gatesville and surplus fruits and vegetables donated by Coryell County residents will be canned throughout the summer. All incoming donated foodstuffs is marked and returned after canning to the schools for which it was donated and credit will be given to patrons of participating schools as payment on next years' lunches.

Fifty-two thousand cans have been delivered by WPA to Gatesville. These cans will be filled during the canning period which will last as long as food is available to be canned. As it has been previously determined, 35 No. 2 cans per child is the minimum needed for the school year supply. By preserving fresh fruits and vegetables during the summer months the cost of foodstuffs, furnished by the sponsoring school

to supplement surplus commodities, will be much lower during the next school term. Since there has been so much rain, the school garden has been extremely slow and donated produce is particularly needed at this time.

MARINES GROW FROM 18,000 TO 50,000 SINCE SEPTEMBER

Today the U.S. Marine Corps is fast becoming an individual combined Army and Navy. Since September 1939, it has grown from 18,000 to over 50,000 men.

The marines of today are unequaled in military and naval training. It bases its superiority on the keen competition of its men; competition, the Marine Corps believes, makes men strive harder to do a little better than his fellow man. Promotions are gained by competitive examinations, giving each man equal opportunity. Meritorious non-commissioned officers of the Marine Corps, whose hard work, close attention to duty and who prove themselves leaders of men do not go unnoticed, but are given the opportunity of becoming commissioned officers.

Education in the Marine Corps is an essential element. For this the Corps is well equipped to meet the needs and desires of every man. Seventeen service schools, a sea school, and the Marine Corps Institute are maintained. The seventeen service schools are classified as follows: Clerical school, motor transport school, armourers school, quartermaster school of administration, radio operators school, field telephone school, telephone electricians school, radio material school, field service school, optical school, fire control school, aerographer school, aviation school, and school of photography. The sea school equips men for service aboard out ships. The Marine Corps Institute is a correspondence school, where more than 170 different courses are offered free to every marine. Many marines have learned worthwhile trade and are graduates of various art and science courses taught in these schools. As a result of training they have secured excellent positions in the business world. Show the right spirit, and you will find the Marine Corps ready to help you in every way.

Young men between 17 and 30 years of age who are interested in the U.S. Marine Corps are urged to apply at your nearest Recruiting Station; these are located in Dallas, Abilene, Fort Worth, Tyler and Waco, Texas. Enlistments are of two classes, the regular four year enlistment, and the Marine Corps Reserve, for the actual duration of the national emergency.

F.C.I.C. PICKS TEXAN

College Station.—Appointment of Jesse H. Watson of Newcastle, a Texas farmer and former State AAA committeeman as manager of the Dallas branch office of the Federal Crop Insurance Corporation has been announced by the U.S. Department of Agriculture. The Dallas office is expected to open about Nov. 1, and it will deal exclusively with the cotton insurance program recently authorized by the Congress.

YOUR COTTON STAMPS ARE GOOD AT

Davidson Bros. & Co.

Your belt, in your size is waiting for you NOW!

★ ★ ★ FINEST QUALITY KHAKI VAT DYED SANFORIZED

IT SOUNDS TOO GOOD TO BE TRUE---But it is TRUE!

Yes Sir, men—it's a fact. You can actually buy the "Westerner", America's most popular belt for men—the kind worn by Texas Rangers—for only 69 CENTS under this special combination offer. The minute you see the belt you'll want it.

DAVIDSON BROS. & COMPANY

Well, well, young fellow, are you sure you know what you're doing?

Why Babies can't VOTE!

Six-year-olds lack judgment; they can't READ. We'd end up with free lollipops and laws against spinach, maybe, if they were given the ballot!

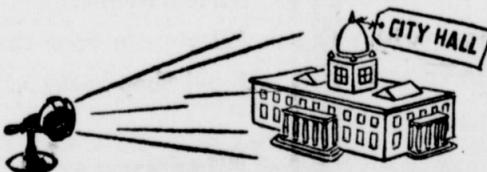

But THESE SAME SIX-YEAR-OLDS, fifteen years from now, will be able to take their places as EQUALS of the rest of us at the polls. And SAFELY, too.

Suppose, however, that during the next fifteen years someone cut these children off from ALL SOURCES OF ACCURATE NEWS—told them fairy stories, taught them to "heil" and to believe in their own weakness and to believe in the omnipotence of a dictator.

And suppose they were never taught to judge VALUES, nor how to pick and choose what they wanted to buy.

Would they be able to govern and care for themselves then—JUST BECAUSE THEY WERE GROWN UP?

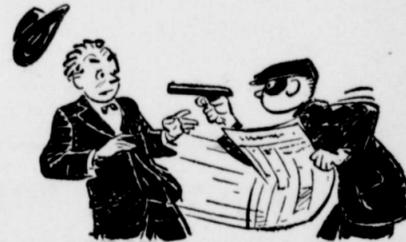

How do YOU know how to vote? Who brings YOU the good and the bad reports of your public servants?

How do you know when to write your congressman and when to attend a public meeting where some law that affects you is at issue?

Furthermore, how is it that you know better than to spend all your money on lollipops? How do you learn of bargains, of new products, better things to buy?

★ ★ ★

If you were robbed of your NEWSPAPERS, or if your newspapers were forced to feed you only the lies and the propaganda of a "leader," you'd

be as helpless as a baby and no more able to govern yourself! And if there were no newspaper advertising—no way in which merchants could compete OPENLY and FREELY for your patronage, you'd find yourself hopelessly lost in the market place.

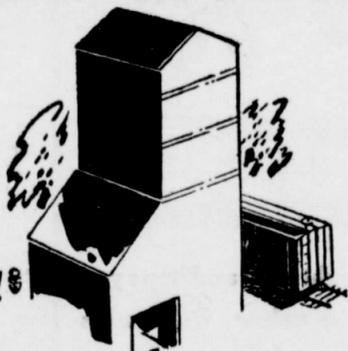

Thus, between you and the helplessness of a babe or the helplessness of ignorance is this very KEY to democracy you are now reading—your newspaper.

Defense Savings Bonds; What They'll Buy For The U.S.

IMMEDIATE RELEASE, AUSTIN, TEXAS, July 14, 1941. While the eyes of America are focused on the tense situation in Europe, Texas is bending every effort to aid in National Defense. Daily this state becomes of greater importance to the whole National Defense Program.

Bombers, of the type most needed by England, are being built at Dallas and Fort Worth. Ammunition will soon be turned out in large volume by the plant now under construction at Texarkana; other articles of vital importance are being turned out daily by Texas industries. Large numbers of ships will soon be constructed in the new yards at Orange and Houston. American soldiers are being trained in modern warfare at Brownwood, Abilene, Mineral Wells, Palacios, San Antonio, El Paso and other cities. American Air Corps pilots are being taught flying, bombing, and aerial warfare at Randolph Field, the huge Naval Air Base at Corpus Christi, Victoria, Cuero, Brady, Corsicana and Stamford. Soon new air schools will be completed at Lubbock, Midland, Coleman, Grayson, County, and several other points in our state. Mechanics to service American planes will be trained in large numbers at Wichita Falls within the very near future.

Citizens of Texas are thinking in terms of Defense Bonds and Savings Stamps. They are anxious to help. They know that the Canadian people were asked recently to subscribe \$600,000,000 to put over Canada's Victory loan and that these friends of our North went over the top by buying \$710,958,950 of these securities.

The Secretary of the Treasury, Henry Morgenthau, Jr., said:

"Defense Savings Bonds and Stamps give us all a way to take a direct part in building the defense of our Country—an American way to find the billions needed for National Defense.

"The United States is today, as it has always been, the best investment in the world. This is an opportunity for each citizen to buy a share in America."

WHAT YOUR DEFENSE DOLLAR BUYS

- \$1: 16 cartridges
- \$2: 3 cotton shirts
- \$3: 1 bayonet
- \$6: 1 anti-tank shell
- \$10: 1 tent
- \$11: 1 shell for 75-mm. gun
- \$15: 1 25-lb. fragmentation bomb
- \$21: pay for 1 army private for 1 month.
- \$27 1 .45 automatic pistol
- \$30: 1 staplain's outfit
- \$50: 1 Springfield rifle
- \$80: 1 Garand rifle
- \$100: 1 shell for 240-mm. howitzer
- \$160: 1 8-in. armor piercing shell
- \$450: 1 Browning machine gun
- \$500: 1 motor trailer
- \$1,000: 1 reconnaissance car
- \$1,300: 1 searchlight with tower mount
- \$2,400: 1 Army lieutenant's pay for 1 year
- \$5,000: 1 tractor truck
- \$10,000: 1 primary trainer plane
- \$20,000: 1 light tank
- \$70,000: 1 pursuit plane
- \$220,000: 1 4-eng. long-range bomber.

COTTON STAMPS OR CASH

You'll Do Better If You Shop At Painter's

This firm joins with the cotton farmers and the government in merchandising the principle crop of the South — COTTON.

For months you have looked forward to receiving your COTTON STAMPS, you have now received them or will receive them in the near future, your next thought should be where can I use them to the best advantage.

Months ago we filled this store full of cotton goods at the very lowest prices, we in turn are offering them to you for your cotton Stamps or the cash at prices, in many instances, even below replacement prices.

We offer you more for your stamps or the cash in shirting, cheviots, broadcloth, Prints, Domestic, curtains, Sheer piece goods, sheeting, sheets, Pillow cases, Cotton Dresses, towels, cotton blankets, bed spreads, Overalls, work shirts, work suits, cotton pants, Athletic shirts, men's pajamas, kerchiefs, slack suits, sport shirts, men's and boys' dress shirts, and hundreds of other items.

Compare the Price, Compare the Quality

Sec'y Agriculture Claude Wickard Is Life Member TFBF

Texas Farm Bureau Federation Waco, Texas
Emphasizing his belief in the value of farmer organizations, Secretary of Agriculture Claude R. Wickard accepted a life membership in the Texas Farm Bureau Federation during his recent visit to Texas to address a farmers' meeting in Waco.
The membership was presented to the Secretary by W. R. Tilson

of Brownfield, Texas, Farm Bureau director from District 2, with other Farm Bureau officials assisting in the ceremony.

Wickard has been a member of the American Farm Bureau Federation for 20 years, E. R. Alexander, general manager of the Texas

organization, pointed out, and, therefore the membership in the Texas unit is merely an addition to his other affiliations.

"Farm organizations in Texas never have achieved the membership they ought to have," Alexander said, "and they won't reach

their goals until Texas farmers realize that the tremendous gains made during the past eight years are directly a result of the efforts of organized farmers to help solve the agricultural problems."

EGG ASSOCIATIONS SPREAD

Texas A. and M. College Extension Service

Farm families in 26 Texas counties have organized egg marketing associations or are in the process of organizing them, according to Myrtle Murray, specialist in home industries for the A. and M. College Extension Service. In 1940 there were less than half a dozen associations.

Members of these marketing groups produce quality eggs by proper feeding, and weed out small eggs as well as extremely large ones.

The clean, fresh, uniform, infertile eggs they sell are stamped with the name of the producer and the name of the association as a guarantee to persons who buy them.

Some associations pack eggs in cartons and enclose folders of recipes and hints on the use of eggs as well as on the value of eggs in the diet.

Counties where the associations have been set up are Gray, Collingsworth, Hansford, Hutchinson, Sherman, Deaf Smith, Lynn, Floyd, Haskell, Baylor, Wilbarger, Johnson, Parker, Navarro, Hill, Red River, Lamar, Gregg, Taylor, Nacogdoches, Uvalde, Harris, Cameron, Maverick, and Schleicher.

Over City Drug Phone 190

made by Director H. H. Williamson of the Texas Extension Service. Governor W. Lee O'Daniel has called upon the county judges to assume leadership of the campaign.

County Extension agents have been asked to assist with this work as it relates to rural areas. Gathering of aluminum is to begin during the week of July 21, and according to the plan, local committees of 4-H Club members, home demonstration clubs, land use planning committees and other groups will call on farm homes in the community to collect the aluminum scrap.

Anything which is made of aluminum will do. Among the items suggested for donation are pots and pans, radio parts, toys, shakers, screening, old washing machine parts, picture frames, book ends, ice trays, measuring cups, camera equipment, kettles and double boilers, bottle and jar caps, refrigerator plates and electric appliances of all sorts.

Earlier the Office of Production Management had asked the citizens to defer collecting scrap aluminum until the week of July 14 and warned against "sharpsters" posing as legitimate government purchasers buying up scrap. It is estimated that the campaign to collect secondary aluminum will result in obtaining 20 million pounds of first class metal for use in 2,000 fighter planes.

The metal collected will be sold to smelters at a special uniform price fixed by the government. Entire net proceeds will be available to the Office of Civilian Defense for expenditures required in the proper defense of the civilian population.

PRE-FABRICATED N.Y.A. SHOPS AT PORT ARTHUR, DENISON

Federal Security Agency
From The NATIONAL YOUTH ADMINISTRATION
Texas State Headquarters

714 Brown Building
Austin, Texas
FOR RELEASE: Wednesday, July 16, 1941, Or Thereafter
AUSTIN, JULY 16.—Texas NY A participation in the national defense program gained further impetus with the announcement by State NYA Administrator J. C. Kellam that work on foundation footings for two \$25,000 prefabricated NYA machine shops will start this week in Port Arthur and Denison.

Designed to provide young men with work experience in the machine shop, sheet metal, and welding fields, each shop will be completely equipped with more than \$60,000 worth of machinery, orders for which have already been placed.

The main shops will be 140'x56' in size, constructed of sheet metal with steel framework, with an addition to house an office and shower and locker space for the youth employees. Shop facilities will provide space for 100 youths to work during each shift.

A shop similar to those to be built at Port Arthur and Denison has been in operation since April on a three-shift basis at the South Houston NYA Resident Center.

Youth at both the Port Arthur and Denison shops will have the opportunity to attend related instruction and training classes after work hours, taught by instructors furnished by the local school systems and the State Board for Vocational Education. Youth will be referred by the Texas State Employment Service to the NYA for employment at the shops, with the assignment to work being made by NYA.

The Port Arthur Independent School District, is sponsoring the construction and eventual operation of the new Port Arthur shop, while the City of Denison is sponsoring the new shop in that city.

Texas' USO Quota Is Set At The Sum Of \$400,000

Texas, one of the most favored states of all in the receipt of defense contracts and training camps, is trailing in the raising of its USO quota of \$400,000, according to reports in the office of E. B. Germany, regional chairman, in Dallas. Germany is campaign chairman over four states, Texas, Oklahoma, Louisiana and Arkansas. Oklahoma, Louisiana and Arkansas have gone over the top.

Due to a political campaign and other unsurmountable obstacles the closing date of the fund-raising campaign has been extended until July 15, at which time Chairman Germany hopes to announce Texas has oversubscribed its quota. Congressional districts 2, 3, 4, 13, 14 and 15 are one hundred per cent organized and reporting their quotas practically finished.

A German purge of a year ago brought out a USO worker in a Panhandle county that went well over its quota. This worker made a patriotic speech before the student body of one of his county high schools. Later his mother was reported a victim of the German Gestapo. He had come to America several years ago. He had prospered and he was thankful to the land of his adoption for the freedom and liberty it had granted him—an adopted son. His aged mother remained in Germany.

SMALL FARMERS CASH MOST A.A.A. CHECKS

Texas A. and M. College Extension Service For release July 10

So-called "small" farmers are cashing the bulk of the AAA's conservation and parity payments

PROWLERS and the like are afraid of the TELEPHONE

GULF STATES TELEPHONE COMPANY

Gatesville, Texas

tribution of payments under the 1939 farm program, Vance said that 92 percent of the agricultural conservation payments and 98 percent of the price adjustment, or parity, payments were for less than \$200. The report to Congress, listing the names of cooperators who earned payments of \$1,000 or more showed approximately eight-tenths of one per cent of the total number of payees under the program were in that classification, he said.

"Increasing attention has been given the small farmer in the development of the AAA program," Vance declared. "As provided in the Act, automatic increases are made in conservation payments to farmers when the amounts earned are less than \$200, the smaller payments being increased proportionately more than the larger ones. Also, any cooperator may earn a minimum of \$20, with an additional allowance of \$15 for forest tree practices, making a total of \$35 which may be earned on any farm. This \$35 payment would be increased to \$46 under the provisions for increasing small payments."

The Act also provides that no individual can earn more than

\$10,-000 in agricultural conservation payments, but this provision

does not apply to parity payments, the AAA official said.

what a whale of a difference a few months make →

W-H-E-W-W but it's hot! And each week-end seems hotter than the last one. It's hard to realize now that only a few short months ago cold winter winds were sweeping this section. Soon they will be back again and the heat of summer will be forgotten.

Heating your home is important, especially so since many winter illnesses are directly traceable to catching cold due to inadequate heating facilities in the home during the winter season. It is not too early to be doing something about winter comfort now. Already thousands in this section are heading for an easy, healthful winter by bringing their heating facilities up to date ahead of the fall rush. Besides giving a widespread, healthful warmth, modern gas heating appliances look better and serve you more efficiently.

Standing by to Serve You When Gas Service Is Vital to Your Welfare

★ Modern facilities, including many powerful compressor stations located at strategic points on Lone Star's 4,800-mile interconnected pipe line system and an abundant gas supply developed through more than three decades, are standing by ready to deliver a dependable gas supply to you during the coming winter when unflinching, uninterrupted gas service is most vital to your welfare.

Snow Still Seen As Freeze Goes Into 13th Day
Texas' Coldest Spell For 41 Years Shows No Sign of Letup; Thursday Top Is 24

Dallas headed into its thirteenth day of freezing weather Thursday night as the Weather Bureau hoisted snow signals for this section in the south portion of East Texas. It was the ninth consecutive day of Dallas' coldest wave in a decade, and despite moderating weather in West Texas the state still was gripped in freezing weather which extended near the coast.

The cold wave is the most tenacious in Texas in forty-one years and in Dallas was comparable with the cold January, 1918, when the mercury dropped below freezing from Dec. 27, 1917, to Feb. 4, 1918. Since Dec. 27, 1939, all but five days have had sub-freezing weather, and some of the lowest temperatures were recorded since the all-time low of 8 below zero was set in January, 1930.

One of Lowest Januaries.
Notorious January, already branded the bitterest month of the year by Dallas' twenty-seven-year weather records and by pioneers' tales of the roaring blizzard of '99, will be recorded this year as one of the worst.

The average daily minimum temperature for the month for a twenty-five year period is 36.8 degrees, and is nearly two degrees less than December's average, next coldest month, and nearly four degrees less than the February average. For the current year, however, the average to date is 24.8, twelve degrees below normal.

AAA Pays Out \$7,862,338 To Texans In Three Years

IN ADDITION, MANY OTHERS IN STATE GET AMOUNTS UNDER \$1,000

(By Associated Press)

Washington, Dec. 29— The Agricultural Adjustment Administration disclosed today it had made payments of \$1,000 or more to approximately 3,550 Texas individuals, companies, ranches or estates for compliance with the 1938 AAA program.

The payments, which did not include those paid out in amounts of less than \$1,000, totaled \$7,862,338. Some of the AAA checks were issued late in 1938 and others in 1940, but the bulk were made out

in 1939. Six checks of \$25,000 or more were distributed in the state. Totalling \$231,399, the six and the amounts of each went to the following: King Ranch, Kingsville, \$85,028; Estate of W. L. Waggoner, Vernon, \$36,806; Estate of Mrs. C. Adair, Palo Duro, \$31,747, Lee Moore, Clint, \$26,012; Reynolds Cattle Company, Fort Worth, \$25,986; Estate of A. S. Gage, Marathon, \$25,820. It was announced that the Matador Land and Cattle Company, Ltd., with headquarters in Denver, Colorado, received \$59,387 for compliance with the program on its properties in Texas.

IMAGINE!

ENTIRE MEALS COOKED FOR ONLY A FEW CENTS

Electrically

NATIONAL AVERAGE COST OF ELECTRIC COOKING NOW ONLY \$2.30 PER MONTH

EACH year many thousands of families switch to modern electric cooking because it's cooler, cleaner, easier and better than old-fashioned guess methods. And, thanks to low electric rates and the greatly stepped-up efficiency of today's electric ranges, this modern method of cooking is within the means of families of modest income. Recent surveys show that the national average cost of electric cooking is about \$2.30 per month. Many customers of this company cook electrically for even less. Some pay a little more but all agree that the cost of electric cooking is modest in comparison to the advantages it provides. You, too, can afford to cook the new low-cost electric way. Ask your neighbor who owns a modern electric range! Or come to our office for full details, with no obligation on your part.

BIG VALUE! This beautiful, built-to-floor Hotpoint Century Model only \$117.95* installed. Liberal trade-in allowance for your old stove. Thirty equal monthly payments. See it today!

TRAINING, EMPLO'M'T TO BE STRESSED BY W.P.A. DURING YEAR

Work Projects Administration Superior Life Building Waco, Texas
Training and reemployment in private industry for WPA workers will be emphasized during the current fiscal years of WPA operation, District Manager W. H. Beaz-

ley reported today on his return from a statewide meeting of officials of the Federal agency in San Antonio.

Creation of a new administration division for expanding the WPA training and reemployment program is now being perfected in Washington, Beazley said, and the new training program will be placed in effect in Texas immediately.

Development of a reservoir of public improvement projects as a cushion against possible widespread unemployment as a result of slackening or cessation of the current national defense program will be a vital task of WPA during this fiscal year, Beazley reported. A public works reserve projects has been formed to carry

out this activity and will begin work immediately.

WPA has forwarded the national defense program by several months, Beazley was advised at the San Antonio meeting through reports received by State Administrator H. P. Drought from representatives of the Secretaries of War and Navy. Currently, 190,000 WPA workers are engaged in national defense work in the nation.

Under the present reduced WPA appropriation, which went into effect July 1, national employment by the agency will be limited to approximately one million workers per month, the lowest in the history of WPA. Employment will be distributed between states and between districts on the basis of relative need, officials said.

In the community service division, District Managers were advised, priority will be given to public health activities, education, recreation, and to such cultural projects as music and writers projects. In the operations divisions, priority will continue to be given to national defense projects.

PRODUCTION CREDIT MEN MET IN HOUSTON ON JULY 16-17

Directors of the Waco Production Credit Association and J. R. Taylor, Secretary - Treasurer, attended a conference on June 16 and 17 at Houston, according to Ross Stricklin, Falls County farmer stockman, who is President of the Association. Other directors are: R. M. Jones, Bosque County; Ben D. Giles, McLennan County; Lloyd Williamson, Coryell County; and J. C. Edds, Bell County.

Mr. Stricklin said that Credit was the subject and that the discussions were led by John H. Seale Jr., Vice president of the Production Credit Corporation of Houston, and his assistant, Sam N. Hardy.

Directors and Secretary-Treasurers of four other Production Credit Associations also attended this conference.

FEW CHANGES IN 1942 RANGE PROGRAM

Texas A. and M. College Extension Service

Except for additional grazing practices and more local adaptation of practices designed to eradicate undesirable plants, recommendations drafted by delegates to the national AAA range conference and tour indicate no major changes in the 1942 Range Conservation Program for the AAA.

That's the word Howard T. Kingsbery, state AAA committeeman and ranchman from Santa Anna, brought back from the conference which was held in Idaho, June 23-27. The conference last year was held in West Texas.

Recommendations of the conference included proposals for many detailed changes, a number of which are aimed at giving assistance to small ranchmen and farmers, Kingsbery said. Two important changes recommended were the revision of the present deferred grazing practice to include limited and rotational grazing on the basis of range management plans approved by the county AA

A committee and the broadening of eradication practices for undesirable plants to make possible more local adaptation of such measures.

In the interest of national welfare, the conference pledged itself "to marshal the range agricultural resources of the country to best meet the needs of national defense," the Texas ranchman reported. The conference also went on record as advising ranchmen against speculative expansion during the present period of more favorable prices and urged that a balance be kept between livestock prices and industrial prices to keep the livestock industry in a sound condition.

The group advocated that measures be taken to avoid inflation and that the defense program be supported by higher taxes on excess profits, incomes, and luxury items, along with increased promotion of defense bond and stamp sales. Greater emphasis on better nutrition also was recommended.

HOW TO AVOID "HEAT" CRAMPS, BY THE STATE HEALTH DEPT.

To the Editor: This service is sent to you free and it is hoped that your use of it will assist in lessening preventable diseases in Texas.

Austin, Texas—If your work is such that it causes excessive perspiration, add a pinch of ordinary table salt to each drink of water you take to help prevent heat cramps. This is advised by Dr. Geo. W. Cox, State Health Officer, to prevent a possible increase in the number of heat victims as the Texas thermometer hits 95 degrees and above.

Laborers, mechanics, farmers and white collar workers whose work causes them to sweat profusely, are in danger of having their body salt content become deficient with resulting heat cramps or heat fag. Salt is a prominent constituent of sweat; the body may lose as high as 40 to 50 grams of salt during hot days.

In industry, a method of preventing heat cramps is to take a tablet of pure salt or mixture of salt and dextrose with each drink of water. Workmen whose duties require muscular exertion should be especially careful to add more than the usual amount of salt to what they eat and drink.

Salt deficiency may be prevented by taking salt in various ways. Where prepared tablets are not available, table salt may be added to each drink of water. Milk is a source of salt and will help to make up for the deficiency caused by sweating. Alcoholic drinks should be avoided.

Heat cramp is characterized by pains (cramps) in the abdominal region, headache, and in severe cases, by nausea and vomiting. The body temperature remains about normal, likewise the pulse

rate; body salt losses occur without the knowledge of the individual until there is a deficiency; then the abdominal muscles begin to cramp.

DEFENSE BOND QUIZ

Q. What is a U.S. Defense Savings Bond?
A. This Bond is proof that you have loaned money to the United States Government for national defense. Your Bond bears interest at the rate of 2.9 percent a year, if held to maturity (ten years).
Q. Why should I buy Defense Bonds?
A. Because money talks. To dictators it speaks defiance. To friends of freedom, it says, "Here is my hand!"
