OFFICIAL NEWSPAPER OF PARMER COUNTY, TEXAS

Vol. 10—No. 42

FRIONA, PARMER COUNTY TEXAS, FRIDAY, MAY 8, 1936

Published Every Friday

SCHOOL NEWS

The Annual Baccalaureate services for the High School will be held on Sunday morning, May 10 at 11:00 o'clock in the auditorium of the Grade School building.

The address is to be given by Rev. Caradine Hooton, pastor of the First Methodist Church of Plainview. The topic is, "Value of Ideals". Special music is to be furnished by the High School Chorus, while the High School band is to play the processional and recessional.

The seniors are to enter in a body and be seated in one section of the auditorium.

The various churches are to dismiss their congregations in order for everyone to attend the service.

Grade School will have its commencement program on May 14, at 8:00 o'clock in the school auditorium.

Stewart is to give the address. There will be a piano solo by Dorothy York followed by a song by the entire graduating class.

The presentation of the class is to be made by Mr. Montgomery, and Miss Lewis to present the diplomas and awards. The processional and recessional are to be played by Mr. Davis.

The High School Commencement is to be held on Friday evening May 15 in the school auditorium at 8:00 o'clock.

The band is again to play the processional and recessional numbers. The introduction of the valedictorian and salutatorian will be made by Mr. Stroud. Special music is to be furnished by Mr. Montgomery. The principal address is to be given by Wayne Eubanks, former teacher here, who is now on the faculty of the Amarillo Junior College at Amarillo.

After the address will be the presentation of diplomas and awards.

The third year Home Economics girls went on a field trip to Lubbock on last Friday.

They have been studying house furnishings, decorations and plans, and this trip completed the study. They visited the high school exhibit at Lubbock High School, the Home Economics department, and later they visited the College H. E. department, their annual open house and exhibit, the dormitory and the home management house.

These girls are furnishing and decorating the small room at the left of the office in the High School building as part of their study.

Eighteen were in the party which was under the direction of Mrs. Gee.

The Senior class held its annual picnic on Thursday of last week. The class went to Palo Duro State park.

After lunch many of the seniors went to swimming, and in the evening they attended the show, "A Message to Garcia" in Amarillo.

There were twenty-six seniors and sponsors who attended.

The Senior class is to observe Cap and Gown day on Thursday of this week. This is new for Friona High School and it is hoped that it will become a tradition of the school.

The Sophomores and Freshmen held their annual picnics on Saturday of last week. The Sophomores went to the State Park. Both classes attended the picture show in Hereford in the evening.

Final examinations are to be given in high school on Tuesday and Wednesday, May 12 and 13.

DEFENDS THE SENIORS

The Star is in receipt of a very nice letter signed "Just a Senior," written in defense of the class in the play presented her two weeks ago which was sponsored by the members of the Senior Class and known as the "Senior Play."

The letter is very nicely written - or rather printed - and is a very clean defense of the seniors, but unfortunately, the writer failed to sign his or her name to the letter, and it is not the custom of the Star to print anything in the way of a communication unless the writer's name is attached or signed to it. We admire the liberal generous spirit in which the letter seems to have been written and if the writer will come into the office and sign his or her name to it we will carry it in next week's issue. Your name will not be published with the letter unless you so desire it.

Editor

BAPTIST CHURCH

Sunday at Baptist Church as usual. Sunday morning the preaching services will be omitted on account of Baccalaureate.

Evening services as usual.

Mrs. "Shorty" Reese, who has been quite ill for the past several days with an attack of influenza, is reported as gradually improving.

Mrs. K. G. Parks, who was taken with an attack of influenza early last week, is still far from well.

W. O. W. Honors Veterans at Mother's Day Ceremonies

WOODMEN of the World Life Insurance Association will pay tribute to its Sovereigns who have been members of the organization for twenty-five years or more, at impressive Mother's Day ceremonies, to be held May 10 on the grounds of the Association's tuberculosis hospital at San Antonio, Texas.

De E. Bradshaw, president of the Woodmen of the World will come from national headquarters at Omaha to the ceremonies. Dr. Herbert B. Kennedy, of the Association's Medical Department, will also attend.

Bradshaw will present silver medals as symbols of service to the Sovereigns. Extensive plans and preparations have been made for the occasion. Invitations have been extended to veterans in the society's ranks throughout the country, and a large attendance is expected. The ceremonies will be open to the public.

SCHOOL WILL CLOSE FRIDAY OF NEXT WEEK

On Friday of next week will come the close of the present term of school for the Friona schools.

Commencement exercises will be held at the school auditorium at night, to which all are invited.

MRS. MOORE PRESENTS PUPILS

Mrs. David E. Moore will present her piano class in a musical playlet "In The Spanish Garden" Tuesday night, May 12 at 8:15 o'clock at the Grade School auditorium.

Miss Mollie Faye Coldiron will take part of the Fairy Queen; Gertrude Short, Eva Dean Hide, Nila Jean Baker, Gertrude Euler, Betty Turner, Deloee Jean York, Betty Lou Talkington will the fairies which will form the fountain in the garden. Claude Miller and Ira Benger will give a Spanish cowboy song.

Mrs. Jim M. McKnight of Roswell N. M. will read "Ashes of Roses." Everyone is invited to attend this musical program.

The following program will be rendered:

"Spanish Garden"—Holt—Muriene Carter
"Fairland by Moonlight"—Barns—Hazel Furlong
"Recreation March"—LeGrand—Maxine Hide
"Woodland Waltz"—Metcalf—Wanda Woods
"Silvers Balloons"—Eichhorn—Marjorie York
"Purple Pansy"—Duet—Fearis—Marjorie and Dorothy York
"Humming Bird"—Scheller—Dorothy York
"Song of the Rose"—Presser Book—Johnny Dean Hicks
"Blush Rose"—Duet—Fearis—Wanda Woods and Mrs. Moore
"Orange Blossoms"—Ludoric—Dorothy York
"Flower Song"—Allen—Hazel Furlong
"Evening Bells"—Ellenberg—Maxine Hide

Presser Book One
Johnny Dean Hicks
"O. Sole Mio"—DeCapers and Sarahann Moore
"Gavotte" from Rigoletto—Verdi—Sarahann Moore
"Beautiful Lady in Blue"—Coats—Marjorie York
"Juanita"—Ford—Muriene Carter
"Dreamland of Love"—Duet—Sawyer—Maxine Hide and Sarahann Moore
"Moonlight Reverie"—Barns—Hazel Furlong
"Pretty Bird"—Delaney—Wanda Woods
"Goodnight My Love"—Presser—Book One—Johnny Dean Hicks
"Spanish Garden"—Holt—Muriene Carter

Connecticut, Constitution State
Connecticut is the Constitution state or the Nutmeg state and the mountain laurel is its flower.

God of Silence
Harpoocrates, the Egyptian god of silence, was represented holding one of his fingers on his mouth.

Love's Longest Word
In one of the Indian dialects the word love is "Chemlendamoughkungekager."

An Expletive
An expletive is a word, often profane, added for emphasis or rhetorical effect.

Irish Shamrock in 19 Varieties
There are 19 varieties of the Irish shamrock.

CANNING DEMONSTRATOR COMING

The Star is in receipt of an announcement from the county demonstration agent, Miss Margaret St. Clair, to the effect that Miss Gladys Kimbrough will be in that county to give canning demonstrations to the Home Demonstration Clubs.

The exact date nor the place or places where these demonstrations will be held have not yet been learned but will be announced later.

LOCAL RIFLE CLUB HAS MATCH

The Parmer County Rifle Club had an official match shoot Sunday at its range just south of Bovina, with the champion rifle team of New Mexico, which is located at Roswell.

This match had been arranged for some time ago, the Parmer County Club having gone to Roswell last summer for an official match with the Roswell club and this was its return match.

The first two stages of the match were shot resulting in a loss to the Parmer County Club of 33 points. The last stage of the match will be shot at Roswell next Sunday.

Several members of the Amarillo and Clovis National Rifle Club Associations were visitors of the local men and took part in the shoot some of them shooting with the Parmer County boys and others shooting with the boys from Roswell.

Not only is the Roswell team the champion team of New Mexico, but one of its members is also champion individual shot of that state so that the local team came in contact with some of the best shooting talent in the United States, that team having attended the National Meet Rifle Clubs at Camp Perry, Ohio, where they came in contact with shooters from all parts of the world, and their champion won fourth place in world competition.

Lunch was served on the grounds with good coffee made over a fire of prairie wood. The secretary informed L. F. Lillard, secretary of the local club, that they had attended shooting meets all over the south-west as well as the National Meet mentioned above, but they had enjoyed this match and the hospitality of the Parmer County boys better than any they have ever attended.

LEGION AND AUXILIARY TO OBSERVE MOTHER'S DAY

On Sunday, May 10th, "Mothers Day," thousands of people in our country will be thinking with love, emotion and considerable devotion on the meaning to them of "Mother."

We the America Legion and Auxiliary of Friona Post No. 296, are dedicating our next meeting, May 12, to "Mother."

To Mother on this Mothers Day
We bow in gladness praise,
For care and love and tenderness
Our hearts in joy we raise.
The years have quickly fled away,
And now we share the load,
May we be equal to the task
May we with strength be shod
To guard the very life and health
Of her who bears our children,
God!

A CORRECTION

The Star wishes to call attention to the fact that the name of G. B. Buske was unintentionally omitted last week from the list of names composing the Troop Committee for the local Boy Scouts organization. We beg pardon for the omission, which was wholly unintentional.

LAZBUDDY HOME DEMONSTRATION CLUB

"The more we are together, the happier we are," so the Lazbuddy Home Demonstration Club found at their "Old Fashioned Sewing Bee" Tuesday, April 28, at the Home Economics Room.

Mrs. A. G. Thorn was appointed to attend the Recreation School to be held soon. Mrs. R. P. Daniels was appointed to attend the Short Course at Canyon, May 7.

Those present were: Meses. Cecil Simms, R. White, O. M. Jennings, Elsie Jennings, Kenneth Jones, A. G. Thorn and John Gammon.

The Lazbuddy Club will search the "Treasure chest" for treasured heirlooms and have an illustrated lecture on "Care and Storage of Bedding" by Miss St. Clair, May 11, at the Home Economics Room. Everyone is invited.

LIVE AT HOME CLUB

A special meeting of the Live At Home Club was held Wednesday, April 29th, with Mrs. Terry, to build and plant a "cold frame"

With the co-operation of everyone present the frame was put up, the seeds planted and the cover placed over the frame in a very short time. The frame is approximately 15 x 20 feet and planted in lettuce, mustard, radishes, turnip, cabbage, carrots and pepper.

Attendance was excellent with twelve members, one visitor and the home demonstration agent. The next meeting is with Mrs. Ervin Johnson, May 19, 1936.

JUNIOR CLUB ENTERTAINS

One of the nicest social events of the week was the entertainment by the young ladies of the Junior Women's Club and As You Like It, or Junior Mother's Club, of Friona.

The entertainers with their guests assemble at the Grade School auditorium, Tuesday night, where a short musical and literary program was rendered by the entertainers.

Following this program the host club with its guest repaired to the basement of the Congregational church here they all enjoyed a program of music, games and contests, following which the hostesses served a repast of delightful refreshments to the guests.

Centennial Buildings Uniformly Cooled

Dallas—The Texas Centennial Exposition will be the first air-conditioned World's Fair in history.

"For the first time, an exposition has been designed and is being built with the comfort of its visitors primarily in mind," said William A. Webb, general manager of the \$25,000,000 show which opens in Dallas June 6.

"More than \$1,000,000 is being spent to provide fresh, cool air throughout every major building. The temperature and humidity of the atmosphere will be kept constant over more than ten acres of floor space. The air over all other floor space will be changed completely every eight minutes or less, thus lowering the temperature ten degrees or more and insuring fresh, clean air at all times.

RETURNED HOME WEDNESDAY

Mrs. Charles Baxter and baby daughter, who have been here the past two weeks visiting with her father and brother, F. S. and Frank Truitt, departed for their home in Elk City, Oklahoma, Wednesday morning. Mrs. Baxter was formerly Miss Mary Lou Truitt.

PERSONAL PARAGRAPHS

Miss Gladys Kimbrough, Food Preservation Specialist, Educational Department, Ball Brothers Co., Muncie, Indiana

Wide Experience in Foods

Her general foods experience includes teaching foods and cookery; working as Home Demonstration Agent; acting as foods editor for a magazine; broadcasting tested recipes; and serving as Home Economics Laboratory Director for a national organization of millers.

Individual Problems Discussed
Miss Kimbrough has taught Home Canning to large groups of women in 20 states and has met most of the questions that can be asked about food preservation. She includes the answers to the more usual ones in her lecture-demonstration. This period is always followed by taking up the individual canning problems of those who attend. Food values, storage, dietary value of different products, all are frequently related to her informal and entertaining way of telling how and showing how to keep summer's goodness for winter's table.

Demonstration is Made Practical
Miss Kimbrough's lecture-demonstrations are given under conditions and in a way that can be repeated by the women in their own homes. Their kitchen equipment may vary widely, she says. "How many women really have model kitchens? Very few. Then isn't it important for me to show how to do the best that can be done in the average home? Fortunately food can be prepared perfectly under rather primitive conditions. Modern equipment may have labor; modern methods certainly save both labor and material. My work is to teach the best methods and practices now known. We present those which can be used in any home."

MORE PWA WORK APPARENT
It seems an assured fact that another PWA project will soon be in operation for Friona and vicinity, which will be the straightened and deepening of another portion of the bed of Friona draw.

It has been apparent all the while that the work now being done on that part of the draw south of the Santa Fe Railroad track will not keep flood waters out of Friona, unless that portion of the draw from the north side of the railroad and extending across J. W. Perry's land should also be straightened, deepened and leveled.

Accordingly the project was surveyed, submitted and is reported approved by the authorities at Washington, according to County Commissioner J. M. W. Alexander, who submitted the project and has urged its approval. Judge Alexander hopes to have everything in readiness to begin work on this project as soon as the one they are now working on is completed.

When this project is completed it is expected that the waters of any ordinary flood will be confined within the banks of the draw.

College Educations Becoming Obtainable

Austin—Twenty Freshman College Centers set up by the National Youth Administration last fall, have enabled more than 900 students unable to enroll in regular colleges, to continue their higher education during the current school year. J. C. Kellam, Director of NYA Student Aid, said today.

Mr. Kellam stated that each student will have had an opportunity to secure an average of six semester hours of accredited first-year college work by July 1, the date on which the last center will close.

Each center is co-sponsored by a college or university. Twenty-four teachers are employed in the centers and subjects taught include: Business administration, history, social science, education, mathematics, orientation and English.

MRS. WALTER LANDER

A pall of sorrow overspread the entire county last Saturday when it was learned that at 5:45 a. m. the Angel of Death had settled upon the home of our worthy and esteemed County Judge, Walter Lander at Farwell and had taken Mrs. Lander from among the living.

The death of Mrs. Lander came as a result of an attack of pneumonia, which she had contracted several days previous, from which medical aid and careful nursing could not rescue her.

Mrs. Lilly May Lander, nee Perry, was born at Euola, Texas, May 1st, 1890, and died at Farwell, Texas, May 2nd, 1936, at the age of 46 years and one day. At the age of ten years she was converted at Morgan, Texas, and joined the Baptist church. She became the wife of Walter Lander and to her was born one daughter, Mar Elizabeth Lander, who is now eleven years old.

Besides her husband and daughter, Mrs. Lander leaves to mourn her death, her aged mother, Mrs. Maggie Elizabeth Black, J. T. Perry, of El Paso, Texas; J. D. Perry of Abilene, and Dr. J. C. Perry, of Wichita Falls, as immediate relatives and a host of friends.

The funeral services were held at Texico Sunday afternoon at 2:30 o'clock, attended by a large concourse of sorrowing friends and relatives, and the great wealth of floral offerings bore mute testimony of the high esteem in which the deceased was held by all who knew her. Following the services the remains were carried to the cemetery at Bovina for interment.

Mrs. Lander was an accomplished musician and was possessed of high degree of literary ability, and always took active part in the social, literary and religious activities of the community in which she resided. At the time of her death she was president of Woman's Clubs, in which she always took a deep interest, and through which she had come in personal contact with the women of the entire county, by whom she will be sadly missed and sincerely mourned.

The Star joins the host of other friends in extending sincere sympathy to the bereaved husband and daughter.

LAZBUDDY NEWS

Mrs. Lester Burch and daughter, Betty Joe, Mrs. Luther White and Herbert White, of Maude, Oklahoma, were week-end visitors of Mr. and Mrs. Roy White.

Miss Lois Faye Heath visited her parents and friends over the week end. Miss Lois is attending Wayland College at Plainview.

Mr. and Mrs. John Gammon were week-end visitors at Plainview.

Mr. and Mrs. A. G. Thorn and Mr. and Mrs. Elwin Julian accompanied the Junior Class on their trip to Carlsbad Caverns, El Paso and Jaurez.

Mr. and Mrs. E. V. Rushing, of Farwell, were Sunday evening visitors of Mr. and Mrs. W. H. Gammon.

Mr. and Mrs. W. H. Gammon and family, Mr. and Mrs. A. G. Thorn and family, Mr. and Mrs. Kenneth Jones, Mr. and Mrs. Albert Carroll and daughter, and Mr. and Mrs. R. P. Daniels and family visited in the Roy White home Sunday.

The Baccalaureate services will be conducted at Lazbuddy on May 10.

Miss Thelma Joe Matthews was the guest of Miss Hortense Hudnoll Sunday.

Miss Mary Prather and her grandparents, Mr. and Mrs. W. R. Prather, returned Tuesday from a visit to Childress.

Claude Heath had the misfortune of painfully burning his right hand Saturday evening while he was working on his tractor. Gasoline dropped on the hot exhaust pipe and ignited to cause the burn.

Scattered showers ranging from one half to two and a half inches have fallen over the community making everyone feel better.

HAS SCARLET FEVER

Mary Lou Manns, small daughter of Mr. and Mrs. Fred Manns, has been very sick with an attack of scarlet fever and pneumonia, but is some better at this writing.

NEW TRAIN SCHEDULE FOR FRIONA

The new train schedule of the Santa Fe railroad, which will go into effect the coming Sunday, May 10, so far as Friona is concerned will be as follows:

East Bound, No. 2, 3:31 a. m.; No. 10, 3:11 p. m.
West Bound, No. 1, 2:04 a. m.; No. 9, 5:07 p. m.

Owing to the fact that there seems to be some uncertainty in the minds of Friona people, the above information may be of service to our readers.

O. D. McLellan, who suffered a severe attack of brain fever early last week and was seriously ill for several days, is again able to be out. Attorney A. D. Smith and Mayor F. W. Reeve were business visitors at Farwell Tuesday afternoon, having gone over to attend the sale of lots, which were being sold for taxes.

Work Starts on "Cavalcade of Texas"

The history of Texas, under the six flags which have flown over it from the days of the first Spaniards to the present, will be set forth in pomp and color in "The Cavalcade of Texas," an expansive pageant to be presented three times daily during the Texas Centennial, the \$25,000,000 World's Fair, which runs in Dallas from June 6 to Nov. 29. Above J. Mark Hamilton, director and expert on lore of the Southwest, and Jan Isabelle Fortune, well known magazine writer, confer over the script.

CURTIS DOUGLASS

Panhandle Press

Pampa Daily News: Wooden nick-
els, proposed by the Centennial group,
are all right—we have no trees to
lose and as far as we know the
things won't compete with any Pan-
handle industry.

Leader, Clarendon: You don't have
to bite a dog to make news. Just try
fighting your neighbor's live stock
and chickens out of your flower beds.

Standard, Wellington: To help a
man save his barn when it is being
licked by tongues of flame is a good
deed in a naughty world. To help a
man save his character when it is
being scorched by flaming tongues
is nobler and requires far more tact.

Borger Daily Herald: Still the re-
percussions of the Hauptmann-Lind-
bergh case echo through the nation.
Ellis Parker, Jr., is the storm center
of accusations concerning the kid-
napping of Paul M. Wendel. Where
the end of the trail concerning the
latest angel in the "crime sensation
of the century" lies no one knows nor
dares to venture a guess.

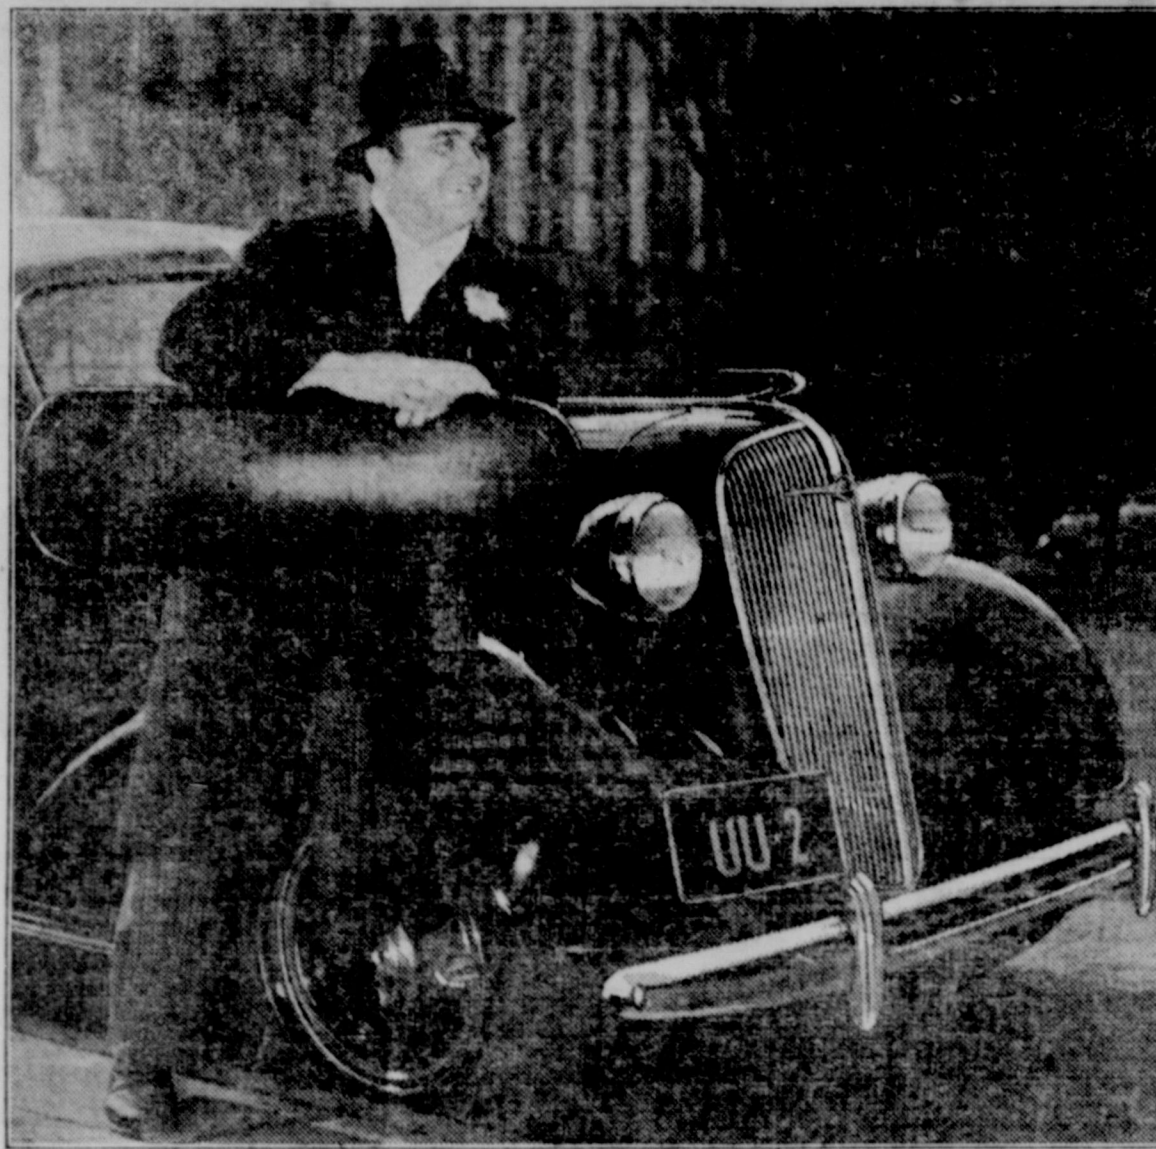

Hesperian, Floyd: Those who
admire the fine qualities in Tom F.
Hunter and have liked his campaign
in the past will regret in particular
that he has been fit to get into the
gubernatorial race again this year.
Governor Alfred, who fired the im-
agination of friends during his cam-
paigns for attorney general and later
for governor, has come up to all the
promises made for him by his friends
who said he would make a
governor of whom the State of Texas
would be proud.

McLean News: The same road
that takes customers to the city will
bring them to the small town mer-
chant. If he uses modern methods to
attract them. The trend can easily be
made toward the smaller town, with
its smaller overhead costs, if right
methods are used.

News, Tahoka: By far the most
conspicuous wild flower blooming on
the vacant lots of Tahoka and on
some of our pasture lands this year
is the beautiful Tahoka daisy. Its
only rival for first place is the wild
verbena. The gallardia or "Indian
Blanket" is also found occasionally.
We have been wondering if the num-
ber of these very attractive wild
flowers could not be increased from
year to year, particularly along our
highways, so as to enhance the beau-
ty of our roadways and rural distri-
cts.

News, Dumas: Why by merely

Rubinoff Holds World Record for Broadcasting

Rubinoff and his violin—and Chevrolet—are a combination that few, if any, radio listeners in the United States have not received in their homes via the air. The famous violinist and his Stradivarius, stars of the Chevrolet Musical Moments programs, have the distinction of going on the air from more broadcasting stations than any other program in the history of radio. Three hundred and seventy-eight stations broadcast Rubinoff three times a week, a total of 1134 fifteen-minute programs. That figures out at 283 hours, and if one week's programs were broadcast one after the other, day and night, it would require 11 days. The illustration shows Rubinoff, carrying his precious violin, posing with his car after a special appearance at Detroit.

"I know a minister who always has
wen in his congregation."
"How does he manage it?"
"He built a small chapel at the
eighteenth hole and they attend after
the game!"

Prudence

"Do you agree with everything the
college professors say?"
"Yes," replied Miss Cayenne.
"But some of the theories they sug-
gest are very startling."
"Yes. But if you don't agree with
them they are likely to prolong the
argument and think up something still
more startling."

Where's the Ball Game?

Boss—Say, what does this mean?
Some one called up, said you were
sick, and that you couldn't show up
today.

Employee—Ha! Ha! The joke's on
him. He wasn't supposed to call up
until next Friday.

News-Reel

Excited Boy—Quick, my father's be-
ing chased by a bull!
Druggist—Good heavens! What can
I do about it?
Boy—Give me a roll of film for my
camera, quick!

Father Speaks

"Father, what do you mean by a gen-
tleman farmer?"
"A gentleman farmer, my son, is one
who seldom raises anything but his
hat."

Give Me Time

Teacher—Bobby, do you know the
population of Chicago?
Bobby—Not all of them, Miss Shaw,
we've only lived here three years.

using the Dalhart Texan measuring
stick; by which they call the Moore
County development taking place in
a suburb of Dalhart, just a mere 40
miles away; us folks here in Moore
County have a whole lot of stuff we
have overlooked by not checking the
building permits in our suburb a
mere 50 miles to the south called
Amarillo, yes, runs up into many
thousands of dollars—and then to
think that we have been overlooking
that little Texas Centennial building
program down in our little suburb
called Dallas, a little old 4 or 5 hun-
dred miles away and then there are
others too, but not from now on—
live and learn.

Times, Clovis, N. M.: Between the
leadership of Roosevelt and that of
the Liberty League, the farmers have
between bread and a stone. To the
no more difficulty in choosing than
Liberty Leaguers, the new farm plan
is a danger signal because it adds to
the buying power of the nation's
farmers. As far as they know, this
country is still as the Pilgrim Fathers
found it—soil as fertile, vegetation
as lush, game as abundant.

Claude News: Last fall and winter
editors of this state saved aged citi-
zens thousands of dollars when they
warned against that petty racketeer,
the bogus pension agent. This to us
is an outstanding example of what
the Texas press means to Texas.

POULTRY

SPOT, THEN STOP
POULTRY LOSSES

Extension Economist Offers
Good Advice.

By F. H. BRADSHAW, Extension Economist,
Massachusetts State College,
WIND SERVICE.

You can't run a henhouse by guess.
You've got to have facts. You've got
to spot the leaks in your business, then
stop them, and the only way to do
this is by keeping good records of your
flock.

One of the biggest leaks in the poul-
try business is the failure to keep
enough hens. Plants with less than
1,000 birds do not offer very great in-
come opportunities, if the owner is de-
pendent on poultry alone and has only
a wholesale market for his eggs. Kept
in conjunction with other farm enter-
prises, flocks can be profitable in num-
bers from 100 to 500 or even more.

Failure to operate the plant at ca-
pacity throughout the year causes an-
other important leak. Overhead costs
go on whether the houses are full or
only half full of layers, and the same
is true of labor costs. This leak can be
stopped by hatching two lots of pul-
lets, one early and one late, and by
keeping through the late summer and
fall the yearling hens that are finish-
ing their first year's lay.

A third leak in the poultry business
is failure to plan ahead so that a
large proportion of the year's egg sup-
ply will be produced during the late
summer and fall months when egg
prices are rising. Here again, hatch-
ing two lots of pullets rewards the
poultryman. He can also retain the
best of the yearling hens through the
fall months, force them for egg produc-
tion, and dispose of them before win-
ter sets in.

Keeping too many old hens is likely
to cut into poultry profits. Records
show definitely that labor returns per
bird on the entire flock decrease as
the proportion of old hens increases
above 20 per cent. It is good business
to keep the best of the yearling hens
through the fall until they stop lay-
ing, but from then until late winter
they usually do not lay enough to pay
their feed bill.

Failure to maintain a high rate of
egg production causes heavy loss and
is perhaps best controlled by buying
quality chicks from proven sources of
supply. The failure to control disease
is another potent reason for decreased
profits and is closely related to the
factors of operating capacity and egg
production.

There is an extremity of distress
which, of itself, ought to reduce a
great nation to despair.—Junius.

WE SAY—

"That takes the cake"—because a
cake made of wheat and honey was
given as a prize in ancient Greece.

"He's a brick"—because an ancient
king said that his soldiers were a wall
around his kingdom, and in that wall
every man was a brick.

"Not worth his salt"—Because the
Roman soldiers used to receive an
allowance of salt as part of their pay.
Hence a useless soldier was not worth
his salt.

Numerous Things May Be Cause of Water in Eggs

The cause or causes of water in
whites and some other conditions do
not seem to be understood, states a
writer in the Rural New-Yorker. The
physical condition of the bird, season
of the year, food, age and rough han-
dling of the egg and partial freezing
are all mentioned as possible causes,
and it is quite possible that one or
more individuals in the flock are re-
sponsible for all the defective eggs
found.

Candling is the practical way of
detecting such eggs before they reach
the market but is of little help in find-
ing the bird or birds responsible for
the trouble. Trapping would, of
course, give opportunity to find the
ailing fowl and perhaps a suspected
bird may be isolated and caught, if
the offender.

Rooster Likes "Safety Zone"

Young roosters appreciate safety
zones when they find it hard to hold
their own against other fighters in the
flock. They often get bruised heads
when they are unable to escape from
stronger or larger foes. Pole perches
in chicken yards provide safety zones
on which the cockerel can get his "sec-
ond wind," say poultry specialists of
the United States Department of Agri-
culture. Once a cockerel realizes he
is defeated he hunts a spot where it
will be difficult for his opponent to at-
tack him. In the poultry house he
often finds refuge on the roost. In the
chicken yard it may be on top of a
coop or under a bush. Extra perches
in the houses are desirable for these
cockerels during winter months.

In the Poultry Yard

New York city gets more eggs from
Iowa than any other state.

The turkeys should be fed much the
same as chickens during the winter.

The poultry industry in North Caro-
lina has grown into a \$13,000,000-a-
year business.

A "mechanical gizard" has been de-
veloped to test grit best suited for
feeding chickens.

Reproducing Byrd's Camp

DALLAS, Texas.—Visitors to the
Texas Centennial Exposition, the \$25-
000,000 World's Fair of the South-
west which opens here June 6, will be
able to see an exact replica of Ad-
miral Richard E. Byrd's Antarctic
camp in Little America. The admiral
is supervising its construction. The
project will cost \$50,000.

\$58,000 for Fair's Shrubs

DALLAS, Texas.—The City of Dal-
las Park Board has let a \$58,000 con-
tract for shrubs and flowers to be used
in landscaping the city's section of
the grounds at the Texas Centennial
Exposition, the \$25,000,000 Southwest
World's Fair, which opens here June
6 and continues until Nov. 29.

Gold Mines on Display

DALLAS, Texas.—The most elab-
orate exhibit of precious metals to
come from Texas earth is being as-
sembled for exhibition at the Texas
Centennial Exposition at Dallas. Here
Texas gold mines will show their stuff
for the first time in the history of
the state.

Druggists to Meet

DALLAS, Texas.—Six National
drug groups will hold annual conven-
tions in Dallas during 1936. All meet-
ings will be held on the Centennial
Exposition grounds in the Federal
Government building.

Making Pile Carpets

It is considered fairly certain that
the making of pile carpets in England
was first started during the reign of
Queen Elizabeth. The method of weav-
ing was copied from the rugs that had
arrived from the East, hence came the
term "Turkey Work." The pile was
of wool and panels worked in this way
were used for the coverings of chairs.
The designs were typically English
small detached floral sprays, knotted
in colored wools. The colors generally
used were shades of green, red and
yellow, which blended admirably.

John Wesley's Last Sermon

John Wesley preached his last ser-
mon on Wednesday, February 23, 1791,
and the next day wrote to Robert Wil-
berforce, urging him to carry on a cru-
sade against the slave trade. Wesley
died in his home, on City road, Lon-
don, March 2, 1791, in his eighty-eighth
year. He was buried March 9, in the
graveyard behind the City road chapel,
London.

A Planet

A planet is defined as any celestial
body, except a comet or meteor, that
revolves around the sun or any solar
system; all the planets therefore re-
volve around the sun, as does the earth.
The name "sun" is also applied to
other self-luminous celestial bodies like
our sun that form the centers of solar
systems; Sirius is one of the best
known of these suns.

Bought Site of Cincinnati

In 1787 Matthias Denman of Spring-
field, N. J., paid five shillings per acre
in continental script or less than \$125
for the 740 acres which comprised the
original Cincinnati. He purchased this
tract from John Cleves Symmes for
the purpose of establishing a ferry to
run between the northern and south-
ern sides of the Ohio river.

Industrial Paints Defined

"Industrial paints" are those con-
tainers designed for use in the multi-
farious products of industry. The
range is very wide—from automobile
to agricultural machinery and im-
plements—and in each case the paint is
designed for its specific purpose.

Willed to Death

Faith can kill quite as readily as
cure. Among the Maoris of New Zeal-
and it is a well known practice to
will a person to death; and in a sur-
prisingly large number of cases the
person so willed to death does die.

Starfish Enemies of Oysters

Starfish, according to Science Ser-
vice, are among the worst enemies oys-
ters have. They have a habit of fold-
ing themselves over the oysters' shells
and smothering them until they open
up, then devouring the oysters.

Baboons Travel in "Armies"

Baboons are the only animals who
ever have learned to travel in "armies"
under the direction of a leader. They
never can be depended upon, have less
affection than a cat, may turn on their
owner at any moment.

Poe's Claim to Fame

Edgar Allan Poe's claim to fame
numbers, among other things, the claim
to have originated the detective novel,
the novel of scientific imagination, the
psychical story, and the realistic
method.

Gift of Cheerfulness

Be cheerful always. There is no
path but will be easier traveled, no
load but will be lighter, no shadow on
heart and brain but will lift sooner
for a person of determined cheer-
fulness.

Temper and Friendship

You cannot keep your friends unless
you learn to keep your temper. And if
you wish others to enjoy your company
you must see that you are a cheerful
companion.

Germany's Neighbors

Germany borders on 11 countries:
Austria, Switzerland, France, Luxem-
burg, Belgium, Netherlands, Denmark,
Poland, Danzig, Lithuania and Czecho-
slovakia.

The Flowerpecker Bird

Flowerpecker is the name given to
the members of a family (Dicaeidae)
of small Old world birds which usually
build hanging nests.

Temple Bar

Temple Bar, London, was a stone
house above which the heads of tra-
tors used to be exposed. It was torn
down in 1878.

Rank of Commodore

The relative rank of commodore in
the United States navy was next above
a captain and below a rear admiral.

Ambition and Character

Ambition is an important factor in
character building. Ambition is often
blind and mistakes the road.

The Word "Alright"

Alright (all right), is a form com-
monly found, but not recognized by
authorities as good usage.

Elephants' Trunk Strong

The elephant's trunk is extremely
muscular, and a blow from it could
kill a man instantly.

Albatross Is Speedy

An albatross is said to have covered
3,150 miles in 12 days.

Tail of Comet Long

The tail of a comet may be millions
of miles in length.

READY FOR KISSES

Mr. and Mrs. Jones had been invited
to a friend's for tea.
"Come along, dearie," said Mrs.
Jones to her three-year-old son, "and
have your face washed."
"Don't want to be washed," was the
reply.

"But," said mother, "you don't want
to be a dirty little boy, do you? I want
my little boy to have a nice clean face
for the ladies to kiss."

A few minutes later the boy stood
watching his father washing.

"Daddy!" he cried, "I know why
you're washing!"—Whitley Seaside
Chronicle.

FADE-OUT

"What about the bride's culinary
efforts?"
"Well, she can make ice cream that
melts in your mouth."

Who Lies Here?

A party of tourists were being shown
over the cathedral by a guide.

"Behind the altar," he told them,
"lies Richard the Second. In the
churchyard outside lies Mary Queen
of Scots, also Henry the Eighth. And
who," he demanded, halting above an
unmarked flagstone, "who do you think
is a-lying 'ere?"

"Well," answered a nearby tourist,
"I don't know for sure, but I have my
suspicions."

New Way

Jean was visiting his grandmother
in the country when some of the
neighbors came to call. When they
were all out in the yard he climbed
upon the henhouse ready for a jump.
He called:

"See what I can do."
Suddenly his feet slipped and down
he went. He jumped up quickly, say-
ing, "I've done it lots of times, but I
never done it that way before."—In-
dianapolis News.

Paint Being So Sticky

A portrait painter approached an
old villager and asked to be allowed
to paint his features. The old man re-
fused even after he was offered money
by the painter.

"It's money easily earned," prompt-
ed the artist.

"I know that," the old settler re-
plied, stroking his whiskers thought-
fully, "but I'm wonderin' how I could
get the paint off."

Removed All Her Doubts

They were going to visit a friend
who had moved out in the country.

"John," said his wife, "are you sure
you know the way out there?"
"I know it as well as your hand does
the way to my pocket," he growled.—
Cincinnati Enquirer.

Invitation Accepted

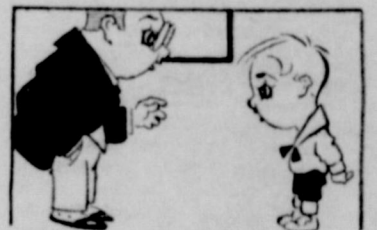

"What did the reception committee
say to the political boss?"

"He said, 'Welcome to our city.'"

"What did the boss do?"

"As requested, he has helped him-
self."

MAKING A CHOICE

"Mother asked me what you wanted
for your birthday, and I told her may-
be you'd like something for the house."

"Oh, you did! And what did she se-
lect—new curtains or a pickle dish?"

Right, Your Left

Old Lady (on train platform)—
Which platform for the London train?
Porter—Turn to your left and you'll
be right.

"Don't be impertinent, young man."
"All right, then turn to your right
and you'll be left."—Gazette.

Santa at the Gulch

"Did Santa Claus visit Crimson
Gulch?" asked the traveling salesman.

"Maybe," said Mesa Bill. "A few
gangsters happened along and we took
their guns away from them, which as
Christmas gifts were highly appreci-
ated."

Perfectly Natural

Visitor to Toy Maker—You make
your toys very natural and human-
like. Have you ever made a failure
with a toy?

Toy Maker—Sure. One day I made
a toy tramp an' it wouldn't work.

Double Sympathy

"Why did you stay away from school,
Tommy?"

"Me mudder broke her arm."

Texas Exposition 150 Per Cent Over Original Size Plan

Chrysler Contract Puts Dallas World's Fair on Top in Motor Exhibits

DALLAS, Texas—The Texas Centennial Exposition today turned the home stretch toward its June 6 opening, two and one-half times larger than its sponsors originally anticipated.

From \$10,000,000 value, estimated when the project was begun, the first World's Fair of the Southwest, has grown into a \$25,000,000 affair, the steel framework of its construction jobs stretching down mile after mile of parallel courses.

New Building Ordered

With the signing of the Chrysler Motor Corporation for a huge display space the Exposition boasts the largest motor exhibit ever shown at a World's Fair.

Originally the \$400,000 Hall of Transportation was intended to house exhibits of both transportation and petroleum industries.

So large was the space taken by Chrysler, however, that Exposition officials were forced to hurriedly realign their plans and build a separate Hall of Petroleum.

Ford, with its own building, General Motors, with a huge, air-conditioned auditorium where changing shows of radio and stage stars will be presented in one-week engagements throughout the June 6-Nov. 29 Exposition period, and Chrysler with an elaborate participation in the making, will give Dallas a record-breaking representation of the motor industry.

Livestock Also Featured

Further, the big fair will boast the largest livestock show ever assembled.

Other exhibits keep the pace, with the city display space at a premium and officials assured of an exhibit "sell-out" long before the opening day.

The City of Dallas, the State of Texas and the Federal government are keeping step with their important Exposition building programs.

W. A. Webb, general manager of the Exposition who holds an international reputation for his railroad construction work, has announced every building will be completed by the June 6 opening date.

The spirit of the Old West will be recreated at every turn.

In a city as metropolitan as any in the nation, the frontier days will live again.

Ten-Gallon Hats Epidemic

Ten-gallon hats are blooming on every corner. Service stations are garbing their attendants in the cow-puncher's regalia. Department stores are clothing their elevator girls in cowgirl uniforms similar to those of Exposition Rangerettes. Other stores are donating the big hats to their employees with instructions to wear them on all occasions.

Even the Exposition police will be in full Old West attire.

The Texas Rangers will have a camp on the Exposition Race Track, with a replica of an old Ranger bunkhouse as their headquarters.

Not a single detail has been overlooked by the Exposition chiefs in their efforts to make the Southwest's World's Fair the most colorful in history.

THINGS THAT ARE NEW

A leather substitute will be produced from seaweed in England.

Germans have invented a noiseless engine using dry ice as motive power.

A new mirror process of depositing metal on glass is an aid to astronomers.

Radio waves are reflected from layers of ionized air high in the atmosphere, scientists say.

A new electric "saw" which cuts very hard metals easily with an electric arc has been developed.

Tests made at the University of Pennsylvania show that mental arithmetic greatly increases the rate of perspiration.

Synthetic stone, made with lime and finely ground silica, is thought likely to have useful adaptations to home construction.

Weighing only one-quarter of an ounce, and about as large as a fingernail, an electric motor that works has been made by a jeweler of Nebraska.

SHORT SHAVINGS

It is estimated that there are more than 5,000,000 lepers in the world.

Eighteen young women have been appointed detectives in Turkey to solve political crimes.

A Lathrop (Mo.) housewife bought a bedroom suite with the 13,000 cents she has saved the last 18 years.

Periscopes have been specially designed to give drivers of high motor trucks views of the roads behind them.

Control of automobile parking on state highways through small cities and towns in California lies with the state motor vehicle department.

Plate glass developed in Russia is said to be six to seven times as strong as ordinary glass and unaffected by light or temperatures up to 400 degrees Centigrade.

Just a Little Smile

W. B. C. FICTION

"Crimson Gulch is a tough little town," remarked the salesman. "We're tryin' to keep up that reputation," said Bronco Bob. "We've got to do something that sounds terrible."

"What is the program?" "Well, so long as there isn't a married man or a married woman in the community, we think we'll organize a Wife Beaters' club."

A New Angle

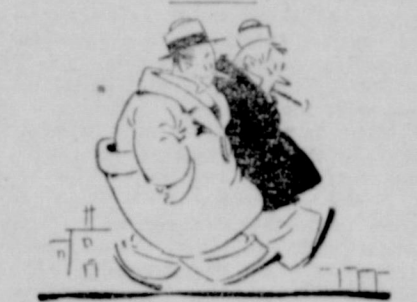

"You complain that you have had to support your wife's family?" the court questioned the man seeking divorce.

"Yes, your honor." "How much of a family has she?" "Four children, your honor." "Who is their father?" "I am, your honor."

Stringing Her

The proud mother was listening to her son demonstrating his ability on the violin to the instructor. "Isn't that divine," breathed the mother. "Listen to those beautiful slurs from one string to another." "Madam," said the instructor, "those aren't slurs, they're insults!"

OPENS WIDE

"Play poker with a dentist? No sir." "Why not?" "He's too blamed expert at drawing and filling."

Mistaken

A simple countryman saw a gaudy-plumaged parrot on the roof of his cottage. He climbed up to capture it. The parrot looked at him and said sharply, "What do you want?"

The countryman touched his cap. "Beg pardon, sir. I thought you was a bird."

How It Started

Mrs. Nagg—We are invited to the Longwood's golden wedding anniversary. Just think, they've been married 50 years. Wonderful, isn't it?

Her Husband—Yep, beats all what a man can get used to.

Sounded That Way

"The world is round, isn't it?" "Certainly." "Then if I wanted to go east, I could eventually get there by going west." "What are you—a taxi driver?"—Stray Stories Magazine.

Back-Fire

Henry's Wife—Dear, did you notice that Mrs. Blank has another new hat? Henry—Yes, and if she were as attractive as you, honey, she wouldn't have to depend on millinery so much.—Copper's Weekly.

Free Wheeling

An old Indian came to town and for the first time saw a man riding a bicycle. "Huh," he exclaimed, "white man heap lazy. Sits down to walk."

Hopeless Outlook

Patient—Yes, doctor, the four other doctors seem to disagree with your diagnosis. Doctor—But I know I'm right and the post mortem will show I'm right.

Homelike

Guide—This castle has stood for 600 years. Not a stone has been moved, nothing altered, nothing touched. Tourist—Huh, must have the same landlord we have.

Sometimes Spared the Trouble

Cautious Customer—Do you rectify mistakes here? Druggist—Yes, sir, if the patient is still alive.—Stray Stories Magazine.

QUICK CHANGING

"She looks older than twenty-seven." "Yes; but you see, she can't change her looks as easily as she can her age."

From a Fig Tree

Bookkeeper (impatiently)—Who started this loose-leaf system, anyway? Steno (sweetly)—Eve did.

Science Meets New Animals

Three specimens of animals brought from an island off the northwest coast of New Guinea to Melbourne (Australia) university had to be introduced to science. Two are only carcasses, but the third, a lively ball of white fur, keeps itself daintily alive on banana passion-fruit, biscuits, milk and honey, and an occasional paw-paw or carrot. It is a small marsupial, with some slight similarity to a rare species in the tropical part of Australia.

Some Indian Tribes Wealthy

Not only are many tribes of American Indians wealthy but, up to a few years ago, the Osage nation was considered to be the richest community in the world. In 1925 the income of the average Osage family of four—from oil royalties, land leases and trust funds—was \$52,500.—Collier's Weekly.

Oddities in Cans

Canned lion meat sold to those who would be brave is said to have enriched a Frenchman to the extent of \$25,000 annually until the gendarmes caught up with him. In this country a good business is done in canned rattlesnake meat, which may be no reflection on American character!

Had a Taste of It

Missionary—And do you know nothing whatsoever of religion, my poor fellow? Educated Cannibal—Well, we had a taste of it with the last missionary.—Pearson's Weekly.

Soft Job

"Does your husband enjoy his work?" she was asked. "I imagine so," she replied, "he is one of the government shovel-leaners."—Cincinnati Enquirer.

Took First Prize

Jimmie—My dog took the first prize at the cat show. Johnnie—How could that be? Jimmie—He took the prize cat.—Pathfinder Magazine.

Statesmen in Danger

Japan's most eminent statesmen always go in danger of their lives at the hands of patriots if they fail to exalt their country sufficiently either here or abroad.

WOMEN TAKING OVER MANY AUSTRIAN JOBS

Women are making such rapid inroads into Austrian trades and professions that some men fear in a few years they will lose control of all key positions, asserts a Vienna United Press correspondent.

A recent census of all trades and professions shows the approximate "gender" division of two-thirds men and one-third women.

At the rate women have been penetrating the higher-paid professions since the war it is feared the percentage soon will be reversed because as the women advance to better positions they engage feminine assistants instead of men.

The women, as might be expected, dominate certain trades like ladies' tailoring, clerking and stenography, but the astounding thing is that 19 per cent of the country's pharmacists are women, 8 per cent of the country's doctors, 15.2 per cent of the dentists and 3.1 per cent of the lawyers.

One-fourth of Austria's private industrialists, musicians, writers and journalists are women, while even in the field of engineering there are 36 accredited feminine engineers. In addition, there are 13 contractors, 175 mail carriers, 153 chauffeurs and eight chimney sweeps.

In the textile industry 60 to 80 per cent of the workers are women, while one-third of the total farmers are female.

PERPETUAL MOTION CLOCK STILL RUNS

A "perpetual motion" clock which has been keeping correct time since November, 1916, without being rewound, is seen in this city, says an Orebro (Sweden) United Press correspondent.

The clock, actuated by changes in air pressure, is so constructed that if there should be no air pressure change for more than twelve months the clock still will keep on going. The clock movement consists of seven metal boxes which are affected by changes in atmospheric pressure. The movement they receive from such variations of pressure is employed to draw up a weight, which turns the clock hands. Never since the clock first started ticking has the weight ever been near its lowest position. The inventor declares that only the wearing out of the parts can stop the clock.

The amount of power the clock needs to move is said to be a one-hundredth part of one horse power. Or, as the inventor puts it, if a line of such clocks were placed around the earth at the equator, the amount of power required for them all would be no more than is needed to operate an ordinary sewing machine.

Auto Speed Expensive

Those who would drive at an excessive rate of speed must expect to pay for the privilege judging from tests conducted by the American Automobile association. Different makes of cars were tested at various speeds and the ratio of gas and oil consumption to speed was found to be about the same. An automobile which goes 18 miles on a gallon of gasoline at 30 miles per hour will go but 12 at 40 and 8 at 50. Oil consumption is seven times greater at 55 miles per hour than at 30.—Pathfinder Magazine.

Folk Leader

Gertrude Knott, noted authority on folk lore, is supervising handling of the third annual national folk festival, which will open at the Texas Centennial Exposition in Dallas June 14. Special attention will be paid this year to the songs of the old Southwest. Miss Knott's staff plans to make the festival the largest on record.

Instinct Rules in Egg

According to a great naturalist writer, among birds instinct inhibits all sounds whenever any noise is heard. With certain species this suppression may be noticed even before the young are hatched. "When the little prisoner is hammering at its shell," he says, "and uttering its first feeble 'peep,' as if begging to be let out, if the warning note is uttered, even at a considerable distance, the strokes and complaining instantly ceases, and the chick will then remain quiescent in the shell for a long time."

English Boys Raise Poultry

Junior Poultry club work is carried on in Great Britain under the name of the Young Farmers' club movement. Northumberland was one of the first counties in England to develop Young Farmers' clubs. In the Junior Poultry club there are 100 members, and 200 in the Shorthorn calves club, whilst a further 150 people are associate members, taking a keen interest in all club work.

Turkey House Needed

If the mature turkeys are given their choice they will remain out of doors most all winter except in time of storms. Their winter quarters or shelter should be a place where no other poultry has been kept. When a building is used, windows should be covered with slats or wire fencing on the south. Other openings on the south should equal one square foot for each ten square feet of floor space. This additional opening should be covered with wire netting and burlap.

Selecting the Breeders

For those who "hatch their own" and particularly if they hatch early chicks, it is not too early to begin selecting the breeders for next year's layers. Too much care cannot be exercised in this task, for careful selections of the individuals to be used in the breeding pen is a most important step in raising the standard of production whether the final object in view be more eggs, improved plumage color and body type, or a better meat quality.

EDITORIAL CONFUSION

What Happened When Two Articles in a Newspaper Office Were Mixed.

The editor of the country newspaper, after receiving a column of type from a linotype operator containing an account of a marriage and an auction sale, dropped the galley containing the typed material. The lines were assembled hurriedly and this was the result of the editorial effort to give an account of a neighborhood wedding:

"Mr. John Eaton and Miss Mary Thompson were united in marriage at public auction, on the premises, on last Friday at high noon, in the presence of two yearling heifers and 13 year-old steers.

"The bride wore a beautiful gown of two tons of unbailed timothy hay and several hundred bundles of fodder, trimmed with two spring-tooth harrows and one riding cultivator. She carried a bouquet of beautiful sausage grinders, stuffers and cooking utensils.

"The groom has been a lifelong resident of Bentonville, being general manager of two dozen Berkshire pigs and about 100 Leghorn hens. The bridesmaids were: one Oliver chilled plow, a 4-hoe drill and two shares of telephone stock. The groom's best man was a cider press, wheat fan and two barrels of elder vinegar.

"Miss Emily Johnson, a friend of the bride, softly played 'O Promise Me' on one New Idea fertilizer spreader, a corn-sheller and two copper kettles and stands. The color scheme of lavender and yellow was carried out, the room being decorated with a 1925 Ford sedan, one double-barreled shotgun, and 14 Jersey heifers eligible to registration.

"After a luncheon and reception the happy couple left for a trip of two months' time, with 2 per cent off for cash, and upon their return will be at home with 2 sets of almost new work harness, 2 sets of

TOM GALLOWAY
FRIONA, TEXAS

"LET'S SEE TEXAS
this Year, Dad!"

Show Him the Texas He Reads About in School

Centennial year is a thrilling, interesting school year for the youngsters. They've held classroom pageants, produced plays and observed various historical celebrations. They want to see more of this big Texas they've been hearing and reading about! What more interesting and educational vacation can you plan than to show your boy or girl the real Texas? Elaborate historical celebrations are now occurring in every section of the state—carefully planned events that depict the Texas of the past and present. Read the calendar at the right! For more detailed information, write the Chambers of Commerce at the cities you are interested in!

Animals That Nature Forgot

Back in the age of reptiles several crude mammals began to appear and some of them probably were the ancestors of the solenodons. These ancient solenodons started out to be something, but became the animals that nature forgot. They started to grow a nose that would be of some use, but left off when the job was half finished. The result is that Solenodon paradoxus has a nose that's always in the way. He looks as though he might be an insect-eating animal, but his strong jaws and teeth indicate he subsists on more durable fare. In order to pick it up and eat it, however, he has to do something with his nose. He turns it up, down or to one side.

Origin of Great Ice Age

The origin of the glacial period is not definitely known. Some attribute it to a temporary elevation of the parts of the earth over which it spread; others to astronomical causes. The most probable hypothesis is that great changes in climate are results of changes in the constitution of the atmosphere, as, for instance, of carbon dioxide. A decrease in the amount of carbon dioxide would lower the temperature.

General Grant's Memory

Gen. U. S. Grant would have made as great a civil engineer as a military strategist. With his excellent memory of things topographical, he would, soon after establishing himself in a camp, know the position of every road, hill, stream and other landmarks in the vicinity and the distances between them, all these appearing in his mind as though on a map.

One of Deadliest Poisons

Although the toxin produced by tetanus bacilli, which causes lockjaw, is one of the deadliest poisons known to mankind, lethal amounts vary widely with different animals. As one example, the amount necessary to kill a chicken will fatally poison at least 500 horses.—William Hoffman, New York city, in Collier's Weekly.

Figurehead of U. S. S. Delaware

Tecumseh was the figurehead of the U. S. S. Delaware. This figurehead is on the grounds of the Naval academy, and is a mascot for the midshipmen. It is the "god of the 2.5." This figure is the passing grade for most of the examinations at the Naval academy.

Salmon Once 'Too Pleasant'

Salmon were at one time so plentiful in the Hudson and Connecticut rivers that servants, when signing up for a term of years with their employers, stipulated they were not to be fed that noble fish more than once a week.—Gas Logic.

Rare Papyrus on Exhibition

A rare piece of papyrus, no bigger than a playing card, is the oldest manuscript of any part of the New Testament. It dates from the first half of the Second century. It is in a library in Manchester, England.

Wood Poisons Insects

The weed, "devil's shoestring," contains rotenone, an insect-killing poison. Georgia, Texas, and Florida plants have the highest toxic content, according to the American Chemical society.

Evolution of Cupboard

Cupboards were evolved from original "boards" arranged to hold drinking cups. Gradually the drawers were added and the additional shelves for convenience in serving in the dining room.

Goat Eats Cactus

The cabretta, the half-wild goat of Curacao, practically lives on thorny cacti. The animal pounds the thorns off with its hoofs and then proceeds to feast on the cactus bark.

Approbation of Men

True glory is the unanimous approbation of good men, for their praise is not bought with money, and they alone are able to estimate real merit at its proper value.

Trees Protected

Forest trees situated in the cloud-belt of Java and the Moluccas are enveloped in a soaking mossy felt which may be thicker than the trunks themselves.

Martin Luther's Work

At the time of his death, Martin Luther had seen 377 editions of his translations of the Scriptures published, exclusive of the Low German version.

Hats in Fourteenth Century

Hats were not generally worn in Europe until the fourteenth century, when the manufacture of felt hats was introduced in Germany and France.

African Highlands

Equatorial East Africa has highlands comparable in extent to the plateau of the Andes, with climate and resources suitable to white settlement.

Getting Rid of Trouble

"Nobody ever got rid of trouble," said Uncle Eben, "by tryin' to sic it onto somebody else."

India's Flora

Plants widespread over India have been originally imported from America since its discovery.

Discovered Planet Uranus

The planet Uranus was discovered in 1781 by Sir William Herschel.

Changing Weight of Body

There frequently is a little confusion between the terms mass and weight. The mass of a body is a measure of the amount of matter in it, while the weight is the gravitational force acting on that mass. For most purposes on the earth's surface the two terms are interchangeable without serious error. The mass is unchangeable, but weight depends upon the distance of the body from the earth's center. The farther we move out into space the less we would weigh, because we would be farther from the center of the earth. However, for such altitudes as we are actually able to reach this loss is almost imperceptible.

Snake Walks on Its Ribs

A snake really gets along on its ribs. It has a lot of ribs, and at the end of each of them there is a large scale. Also, each rib has a number of strong muscles attached to it. The muscles move the scales forward, their edges catch on the ground and so the snake goes along. The scales move in turn, one on one side and then one on the other. This gives the snake that wavy, gliding motion.

Highest Railway

Fremont pass on the Denver & Rio Grande is the highest part of any United States railway, being 11,339 feet above sea level. The second highest also is on the Denver & Rio Grande, Lizard Head pass, 10,248 feet. The highest railway in the world is in Peru, South America, where the Peruvian Central attains an elevation of 15,865 feet in crossing the Andes at La Clima pass.

Daylight at the Equator

The equator has fewer hours of daylight than the poles, and nearly double the number of hours of darkness. During the year the equator has 4,407 hours of daylight, 864 of twilight and 3,495 of darkness while the poles have 4,450 of daylight, 2,403 of twilight and 1,913 of darkness.—R. A. Bardwell, Gainesville, Fla., in Collier's Weekly.

Meaning of "Sino"

"Sino" is taken from the Greek "sinal," an oriental people mentioned by Ptolemy. "Sino," therefore, is the combining form used to denote (a) "Chinese"—in nouns, as "sinology," and (b) "Chinese and"—in adjectives, as in Sino-American, Sino-Japanese, Sino-Russian.

Sabbath Every Day of Week

A Sabbath falls on every day of the week. Sunday is the Christian Sabbath, Monday the Greek, Tuesday the Persian, Wednesday the Assyrian, Thursday the Egyptian, Friday the Turkish, and Saturday the Jewish.—Pearson's Weekly.

Germany's Offer

During the World war Germany offered an alliance with Mexico and, among other things, offered Mexico help in getting her "lost territories" of Texas, Arizona, and New Mexico back from the United States.

Muffled Voices

"My neighbor Hi Hat does not speak to my neighbor Ho Hum," remarked Hi Ho, the sage of Chinatown. "I speak to neither, for I discovered long since that none of us ever has anything worth saying."

Making Dreams Come True

"My neighbor Ho Hum was all right," said Hi Ho, the sage of Chinatown, "talking of making dreams come true until he formed a habit that gave him the wrong kind of dreams."

Smoking in Churches

Smoking in churches was quite a common custom during the early days of the use of tobacco and was finally forbidden because the use of flint and steel was so noisy.

Etiquette Note

Wiping your hands on your neighbor's coat after a meal is considered a compliment among some Mongolian tribes. Grease helps make the coat straight.

Scorpions of Old

Scorpions were already in existence in the carboniferous period and there is no essential structural difference between these fossils and existing forms.

Good Voice Counts

"De man wif a clear conscience," said Uncle Eben, "may be a desirable citizen, but he ain't necessarily as popular as de man wif a good voice."

Odd Ixes

The Ixes, also known as the steinbok or bouquetta, one of the hand-somest of all wild goats, has the fore-legs shorter than the hind legs.

An Ancient Indian Tribe

The Nacotchtans was a very small Indian tribe that once lived on the site of the District of Columbia.

Termites Cause Great Loss

It has been estimated that termites cost American home owners more than \$45,000,000 a year.

No Golden Weddings

The anniversaries of about everything except weddings are celebrated in Japan.

Ohio Once Cheese State

In the 1880s more than 16,500,000 pounds of factory cheese were produced in Ohio per year.

City in Three Counties

Fostoria, Ohio, is located in three counties—Seneca, Hancock and Wood.

When Shaking Hands

It used to be the custom that persons were required to remove their right glove before shaking hands. Men still are expected to do this before shaking hands with women acquaintances, particularly so if the woman's hand is ungloved. However, failure to remove the glove is no serious offense and will not be the object of criticism. In fact, it would be better not to attempt to remove it if it is not to cause embarrassment and an awkward pause, which is bound to occur when a closely fitting glove requires frantic tugging in order to remove it quickly and gracefully to meet the proffered hand.

Making Olive Oil

In making olive oil the olives are first crushed in a machine, consisting of a circular stone trough in which revolves a stone wheel. The crushed fruit next goes into a press, being first placed in flat, woven bags of reeds. This process gives the finest, so-called virgin oil, of commerce. Subsequent pressings yield pure but somewhat inferior oil, and finally water is added to the crushed mass, and oil suitable for various manufacturing purposes is obtained. The refuse is dried and used for fuel.

Coffee Used as Medicine

When in 1624 Sieur de La Roque returned to Marseille from Constantinople he brought with him a small metal pot and some coffee beans, which he roasted and brewed in it. At first the beverage was considered a medicine and sold in pharmacies. Doctors prescribed it for scurvy, smallpox, consumption, drowsy and other ailments and warned their patients against mixing it with milk.

The Passion Vine

The term "passion" is applied to any flower or plant of the genus Passiflora—so named from a fancied resemblance of parts of the flower to the instruments of Christ's crucifixion. The corona represents the crown of thorns, the stamens and pistil the nails of the cross, and the five sepals and five petals the ten faithful apostles.

An Ancillary Receiver

An ancillary receiver is a receiver appointed in a state or a district other than the one in which the principal, or original, proceedings have been begun. The duties of an ancillary receiver are to gather in and administer property in the state or the district of his appointment.

Use No Marriage Rites

Legal marriage is not universally accompanied by some form of religious, civil or social ceremony. Tribes exist, such as the Kurumba on the Nigiri plateau of southern India, that manage to get along without marriage rites of any kind.—Collier's Weekly.

Roads Dodge Spirits

Roads in China are notorious for their crookedness, so designed to dodge the ever-present evil spirits, who, traveling always in straight lines, are bothered by turns and bends, and apt to fly off the road and get lost.

Mince Pies Once 'Mutton Pies'

As early as 1596 English mince pies were popular under the name of "mutton pies." A century later they were known as "shred pies." In the time of Queen Elizabeth they were called "minched pies."—Gas Logic.

Virginia Led in Population

Virginia led in population in the censuses of 1790, 1800 and 1810.—New York took first place in the census of 1830. Virginia ranked twentieth in the 1930 census.

Fuel Value of Wood

Dry wood is of greater fuel value than green wood. Each 10 per cent of water or moisture in wood will detract about 12 per cent from its value as fuel.

Beetle's Nose

Our perennial pest, the Japanese beetle, can detect the odor of geranium oil a mile away. It is the lure used in most of the traps and poison baits.

A Mural Crown

In heraldry a mural crown is a crown taking the form of an embattled tower given to the man who first set up his standard in a captured city.

Ancient Miners

It is believed that about 10,000 tons of metallic copper were mined at the Isle Royal pits in Michigan by Indians in prehistoric times.

Accept Things as They Are

Demand not that events should happen as you wish, but wish them to happen as they do, and you will go on well.

First Supreme Court

The first Judiciary act of 1789 formed a United States Supreme court with a chief Justice and five associate Justices.

Wrestling Grips Old

Egyptologists claim that every hold and grip known to modern wrestlers was known in ancient Egypt.

Knights of Pythias Old Lodge

The fraternal order, Knights of Pythias, was founded at Washington, D. C., February 19, 1864.

One County From Six

Auglaize county in western Ohio was formed from portions of six of the surrounding counties.

Denmark Level

Denmark has practically no mountains and few very lofty hills.

International Sunday School Lesson
By DR. J. E. NUNN

For Sunday, May 10, 1936
General Topic: Effectual Prayer.
Scripture Lesson: Luke 18:1-14.

1. And he spake a parable unto them to this end, that men ought always to pray, and not to faint;

2. Saying, There was in a city a judge, which feared not God, neither regarded man;

3. And there was a widow in that city; and she came unto him, saying, Avenge me of mine adversary.

4. And he would not for a while; but afterward he said within himself, Though I fear not God, nor regard man;

5. Yet because this widow troubleth me, I will avenge her, lest by her continual coming she weary me.

6. And the Lord said, Hear what the unjust judge saith.

7. And shall not God avenge his own elect, which cry day and night unto him, though he bear long with them?

8. I tell you that he will avenge them speedily. Nevertheless when the Son of man cometh, shall he find faith on the earth?

9. And he spake this parable unto certain which trusted in themselves that they were righteous, and despite of others:

10. Two men went up into the temple to pray; the one a Pharisee, and the other a publican.

11. The Pharisee stood and prayed thus with himself, God, I thank thee, that I am not as other men are, extortioners, unjust, adulterers, or even as this publican.

12. I fast twice in the week, I give tithes of all that I possess.

13. And the publican, standing afar off, would not lift up so much as his eyes unto heaven, but smote upon his breast, saying, God be merciful to me a sinner.

14. I tell you, this man went down to his house justified rather than the other; for everyone that exalteth himself shall be abased; and he that humbleth himself shall be exalted.

Golden Text: God, be thou merciful to me a sinner.—Luke 18:13.

INTRODUCTION

Two went to pray? O rather say One went to brag, the other to

HARD WORK

The Sunday school teacher requested the children to bring something towards the missionary fund, but stipulated that each child should do some kind of work to obtain it. When the day arrived for the money to be handed in the teacher asked one small boy what he had done to earn the sixpence that he had given.

"I got it from my father," he replied the boy.

"But that isn't work," said the teacher.

"Well," replied the boy, "if you knew my father you'd think it was."

CUT AND SLASH

"Gone on a diet, eh?"

"Yes."

"To reduce your weight?"

"No; to reduce expenses."

In the Same Vein

"No," said the schoolboy to his friend, "I certainly do not believe in brevity in letter-writing. It once left me down very badly."

"How was that?" asked his companion.

"I wrote home to my father like this: 'No mon, no fun, your son.'"

"Yes, and what did your father write back?" asked the other.

"How sad, too bad, your dad," the schoolboy explained.

Big Saving on Shoe Bills

An Ozark backwoods woman had gone barefoot so long the soles of her feet were almost as tough as shoe leather itself. She was standing in front of the fireplace one evening when her husband addressed her:

"You'd better move yo' feet a mile, Maw, yo're standin' on a live coal."

Looking down nonchalantly, she replied: "Which foot, Paw?"

Getting First News

"What are your reasons for wanting to be appointed postmaster of your village? The pay isn't much."

"No," replied Farmer Corntassel, "But I kind o' thought as long as Si Simlin had been gettin' first go at our postal cards for years, it was only fair for me an' ma to have our turn at theirs."

Extra Time

Teacher—Now, James, if your father can do a piece of work in one hour and your mother can do it in one hour, how long will it take them to do it together?

James—It would take three hours—including the time they wasted arguing about it.

Overtrained

"Is Higgins a shrewd business man?"

"He was, until he got such a reputation for being a shrewd business man that everybody was afraid to do business with him."

pray:

One stands up close, and treads on high,

Where th' other dares not send his eye;

One nearer to God's Altar trod, The other to the Altar's God.

Richard Crasshaw

"He who feels that he is not what he ought to be is already on the high road to amendment."—George Ebers

"Archbishop Usher often confessed that he hoped to die with the language of the publican in his mouth. His wish was fulfilled, for his last words were, 'God be merciful to me a sinner.'"—Quoted by Jane Stoddard.

THE PARABLE OF THE UNJUST JUDGE - Ver. 1-8

In "Men ought always to pray, and not to faint," we find Christ anticipating the parable and giving an explanation of it before he states it. It is a preface to the book.

TWO CHARACTERS STUDIED - Ver. 2-4

Here are two types, the judge and the widow, clearly defined, as clearly as a verbal photograph could make them. Note them and you have a perfect picture of the times and conditions, he Judge, "He feared not God."

Here is a cold, careless, unscrupulous character, who boasted fearlessly of his corruption, to the point of declaring that he did not take God into account at all. He is a type that lived in that day—and is still among us—who bought his way to prominence, and asked odds of no one, save the ruling prince, even as such men today defer only to the political gangsters who put them on the ticket for a price. "He regarded not man."

Though unscrupulous, he was not two-faced about it. He acknowledged that he didn't care a snap of the finger for public opinion, but was in office for the spoils; and cared not one whit for justice.

Note the widow. We must be aware that in that day and country a widow had hardly any rights, especially if she was poor and obscure. Imagine, then, this woman, with few if any friends, and without influence appealing to an unscrupulous judge saying, "Avenge me of my adversary," or, "Do me justice of my adversary," or, "Protect me from my enemy."

RESULTS OF PERSISTENT FAITH - Ver. 1-8

She came "oft," until "though he would not for awhile - but afterward said within himself, Though I fear not God, nor regard man; yet because this widow troubleth me I will avenge her, lest she wear me out by her coming." The widow's perseverance got results, not because the judge believed in or desired to render justice in her case, but because she was interfering with his physical comfort, had become an annoyance to him. The Lord tells us that God permits suffering among his servants long after they have prayed for deliverance. The church and true, dost thou not judge and cried out, "How long, O Lord, holy and true, dost thou not judge and avenge our blood on them who dwell on the earth?" (Rev. 6:10). "And yet he is long suffering over them." (Ver. 7). God bears long before his judgments, swift and terrible, are sent forth; but he bears long that he may have mercy. If sorrow and repentance shall be, "I say unto you that he will avenge them speedily." "He believed in and loved the old prophetic doctrine of the day of the Lord. The Herods, the Caesars, the unjust judges of the world, have their day, and their day passes." The hour tarries long, but at last it comes on rapid, flaming wings, and the God who has hidden himself so long flashes forth in judgement and mercy" (J. E. M. Ross).

THE PHARISEE AND THE PUBLICAN - Ver. 9-10

It is quite apparent that this parable is a perfect picture of what Christ intends to teach, namely, to frown down a self-righteousness. Could a more appropriate place be found for its setting than the Temple. "Two men were going up to the Temple to play." Those who have been to Jerusalem have seen just such a scene, here are still the two types to be found there. In the Holy City the Pharisee still calls forth the envious admiration of the people. There ostentation still is admired and private and public processions are still in vogue. Imagine this self-righteous individual, well-dressed, dignified, outwardly reverent, going up to the Temple to perform his religious duties. See the publican, weighed down with sin, and seeking surcease from the weight of it.

TWO KINDS OF PRAYER - Ver. 11-14

We discover that the Pharisee "stood and prayed thus within himself." Mrs. Montgomery translates it "stood apart." As Robertson says, he "struck an attitude ostentatiously where he could be seen." "Prayed thus within himself." He carried on

a conversation with himself. He gave himself a self-satisfied statement about his own virtues. He was not talking to God. He did not have God in mind. This man was outwardly very religious. The things he told himself: "O God, I thank thee." "I am not like . . . extortioners, rogues, adulterers," or, "like this tax gatherer" (Mrs. Montgomery).

"But the publican standing afar off, would not lift up so much as his eyes unto heaven, but smote his breast saying, God be merciful to me a sinner." Just the opposite in attitude and spirit is this "tax-gatherer." He holds himself aloof because he thinks himself unworthy to worship with others. There is the absence of self-assertion. He is painfully conscious of his sins. The Pharisee thought of others as sinners. The publican thinks of himself alone as the sinner.

THE ANSWER - Ver 14

"I say unto you, this man went down to his house justified rather than the other; for everyone that exalteth shall be humbled; but he that humbleth himself shall be exalted." This desp
