SYNOPSIS

In Spanish-governed California of 1783 a conflict between Church and State is represented by two friendly enemies, frail old Fray Junipero Serra; Franciscan missionary, and Don Pedro Fages, civil governor. After telling Serra he is sending to Mexico for his wife and son, whom he has not seen for eight years, he refuses his aid toward founding the Santa Barbara Mission, Dona Eulalia agrees to go to California, accompanied by her duenna, Angustias. Don Pedro sends for Serra, telling him that two priests are on their way from Mexico with Eulalia and young Pedro and that he is leaving to meet them. Fages engages a young Indian girl, Indizuela, as maid for Eulalia. Eulalia sails from San Blas. It is a desolate trip. From the port of Loreto, a large cavalcade loaded with Eulalia's party starts out for the long overland trip. Eulalia, accustomed to lusury and comfort, bitterly regrets having been persuaded to come. The two priests, Fray Mariano and Fray Bartolomeo, call on her and arouse her suspicions as to their genuineness. As the cavalcade stops at various missions, Eulalia hears rumors of the approach of her husband. While Don Pedro plans a great fiesta to welcome his wife, Eulalia plans her costume. Don Pedro welcomes his beautiful wife and young son. Eulalia is toasted as the Queen of the Californias. On the long journey to Monterey, the reunited couple are royally entertained at the Presidio at San Diego. Eulalia disapproves of the democratic relations of Don Pedro and his people. Pleading weariness in the midst of the feast she goes to bed where Angustias tells her she knows Eulalia is again to become a mother. Don Pedro and his people. Pleading weariness in the character of the priests and dreads Serra's disappointment in them. Limping from mission to mission, Father Serra has a vision of St. Francis and tells his saintly master that he will be ready to join him when Santa Barbara Mission is founded. Meanwhile Eulalia finds there is a conflict between Serra's mission for mass, Don Pedro has an argument with

CHAPTER XIV-Continued -11-

"A blessing on this house," he can not reach him, through any muttered, making the sign of the

He blinked. The room was bright with candlelight, for though it was only late afternoon, a heavy fog darkened the day, and made it cool, so that the open fire was comforting and cheery.

"Ah, your Reverence!" La Gobernadora's voice was respectfully cordial. "Please do excuse me for not rising. Sit you here by the fire, Father, where you may rest, and warm yourself after your long walk. It is so good, so very, very good of you to make this visitation upon me, in answer to my plea to

Serra sat down absently, and stretched his hands a moment toward the fire. Then they fell into his lap, and his fingers twined about the beads of the rosary suspended

Eulalia waited nervously for him to speak. She stirred impatiently. Beneath her feet Escabellito sneezed. The sound exploded the silence. Junipero Serra leaned forward, and looked at the child.

"What is this!" he exclaimed. "What do I see? Senora, are you resting your feet on a little Indian

"Why, yes." Eulalia flushed. The missionary's eyes blazed suddenly

"But he is a human being, Senora! A soul! Not an insensate object, nor a dog."

"My husband, the Governor," she raised her eyes to the priest. "brought him to me in Lower California, and gave him to me for a foot-stool. We call him Escabellito. He is really my little slave. You may run along, Escabellito."

The child rose and darted from the room.

"A slave!" exclaimed the priest. "Dear God, how pitiful. My poor dark children, slaves! But it is what I would expect of the Governor of the Californias, in his arrogance." Eulalia's hands trembled a little

at her stitching. "It is not my wish to have him a slave, Padre. It is my husband's. . he seems to think it befitting

my position as his wife, to have an Indian for a slave. I have always been guiltily uncomfortable with him at my feet. But my husband She sighed virtuously, and shook her head.

"Praise God, then, your heart is tender toward the Indians! That cheers me, Senora. I am most encouraged to know your feelings. had not dared hope for such aid

"From the wife of the Governor?" asked Eulalia quickly.

Junipero Serra looked at her

searchingly. "You may speak openly, frankly, with me, Padre, I feel that I know what your problems are, and deeply sympathize with you. I would like to help you solve them, if I can."

The old man leaned eagerly forward, his eyes brightening.

"I believe you could do much, Senora la Gobernadora. Perhaps, he exclaimed as a thought seized upon him, "perhaps it is you who have been sent as an answer to all my prayers, instead of those two

La Gobernadora laughed nervous- thing will be done now, I know. I It is quite possible that many un- making the ruby

can not

"But you are, dear daughter! I prayed for help to found the Mission Santa Barbara, and you will be my help. Yes, I am sure of it!" His eyes were gleaming. Eulalia rubbed her hands restlessly before

the fire. "Father," she began, then hesitated. "Father, what stands in the way of founding that mission?"

"Nothing! The time has been long ripe for it. Nothing stands in the way. But there is one man that

He stopped abruptly, and looked sternly at La Gobernadora. Beneath his glance, she stirred and gathering up her needlework crumpled it in her nervous fingers.

"I need not ask you who that is. . I feel . . that it is my husband. Am I right, Father?

"So you know it then? Yes, it is he, Senora. The Governor himself, that proud rash man, who arrogantly believes his vain temporal power can stop the progress of Mother Church. And that, he must learn to his sorrow, he can not do!"

Eulalia shivered. "Yes, he must learn that. But how am I to help him, and you, and the Church?" she asked.

"Daughter," said the priest earnestly, "you are as close to Don Pedro as his very heart. You know how to reach him. And as a pious God-fearing woman, a true daughter of the Church, your prayers will surely be heard. He must be made to see that plans must go forward swiftly for Santa Barbara. You must make him see that. I, it seems,

"A Blessing on This House," He Muttered.

channel, though he has my pray-

'And if I can not reach him, Padre. What then?" "Then there must be someone

Eulalia took a deep breath.

'You mean someone else . . his place?"

"There is no other way. The Governor of California must be a man willing to aid and succor the Church at every step. And Don Pedro Fages, unless you can influence him, Senora, is not that man."

La Gobernadora was trembling. When she tried to speak, her voice was lost. With an effort she con-

trolled herself. "Then, that would mean

almost a whisper. that, would you be willing, after all dom has any idea of what is wrong when driving, even on the coldest corner. the long wearisome journey you with him. have made to this place, to leave it? For the sake of our Holy Mother Church'

Eulalia lifted her head with a deep breath. She faced the missionary's questioning eyes, that gleamed into hers, bright with fires of new hope. Then she averted her head, and looked into the fire, answering, "I would, for the sake of Holy Mother Church

Serra lifted his hand toward her

in a gesture of blessing. "The Holy Mother bless you for that!" he exclaimed in a happy voice. "God will reward you for

your unselfishness!" Eulalia dared not raise her eyes. That guilty feeling, which had assailed her at her first meeting with the holy man made it impossible for her to look at him, even to speak.

The priest rose slowly. "Now I must depart, Senora la Gobernadora. It has been a happy visit with you, my good daughter. My heart is lighter for it. God has answered my prayers in sending I can not call them Francis- you here to intercede with the Gov. by so much as half a second, his cans . . . but you know to whom ernor for me . . . how I am count- car will travel 37 feet during that

ly, and dropped her sewing. "Padre mio, that is too much, to call me an answer to prayer. I... I really sich Santa Barbara. He may grant "Ha! What a glorious strategist . . he may deny it. But if he denies it, it will need the influence of the Governor to bring things about. And there is where you will

> Junipero Serra sighed. "I still have some temporal, some worldly influence, Senora. And if I must, will use it, to justify my just and

holy plans." "Of . . . of course." The priest moved toward the door,

where Angustias awaited to usher him out. "But I will only use that, and

very much against my will, if every other channel, and your gentle influence, fails. Ah, but I would hate to! I do not know if you can understand how I feel toward Don Pedro; how, although we differ on every point in life, I admire, respect, yes, love him, as a friend . brother." His voice trembled, and his eyes misted. "That is why all this hurts me so deeply, so mortally, for I love the man. Ah, well, you do not understand. Tell his Excellency for me, that he has my sincere, earnest prayers, and to lis-

ten to his wife's gentle counsel. Will you, Senora?" The lady nodded dumbly. "Adios, Senora la Gobernadora." Again he blessed the house and, fol-

lowed by Pio, was soon swallowed up in the fog. When he had gone, Eulalia pulled closer to the fire. She cast her sew-

ing impatiently on the floor. 'Escabellito!" she called sudden-"where are you, little imp? Come, get here where you belong!' The child scurried to his place be-

neath her feet. It was thus the Governor found her when he came into the palacio, his beard and eyebrows beaded with

"Junipero Serra has been here,"

she said slowly. "He has? What did he say?" questioned the Governor eagerly.

"He . . . he . . ." she hesitated. "He is impossible. Nothing can be done, I am afraid. It is hopeless for you, or for me, to try to

"I was afraid of that. He left no word, no message?"

The Governor sighed.

CHAPTER XV

In the cell that was their quarters at Carmelo, Fray Mariano your story.
Rubi and Fray Bartolome Gili were "Then the to amuse themselves wherever they Fray Mariano sprawled on the

boards of his celibate cot. Fray Bar- about and shouting, 'I see God! I half-finished letter that lay before him on the wine-stained table.

'Yes," he said thickly, "it is well I got this away from Fray Junipero in time, or it might have been finished and dispatched to Mexico. Then where would we have been? Eh, answer me, can't you, you.

Fray Mariano scratched himself. "I don't know where we would have been. In limbo, probably. How

"Ha! What a glorious strategist I am, Brother!" the other replied. "Listen well. It was this way. Fray Junipero had called me to his room. I went. He was reading all the dispatches that arrived this morning on the San Antonio: He had his spectacles on his nose, and his face was very intent, so that he did not see me at first. I made a little noise. A-hemmed, you know, very softly and respectfully."

The other sniggered. "Yes, I can imagine how."

"Then he looked up, and told me to wait a moment, that he had been writing a report about you and me to the Father Guardian in Mexico, and wished to speak to me about it. I was worried, and hard put to wait patiently. So I stepped outside the cell, and met an Indian. You know

him, Estevanico." Fray Mariano stretched himself

on his cot. "Indeed I do. He is the sweet neophyte from whom I won this nice

blanket at gambling. Go on." "The very one. So I whispered to him, and plotted a little plot. He was to steal the father's spectacles. Steal them, you understand, so that Fray Junipero could see to write no more letters! Wasn't that a beau-

tiful plot?" The other grunted a grudging admiration. "But what is he to get for doing that?" he asked suspi-

ciously "Oh, I am to give his blanket back to him, the one you won. But

"You are! Just try . "Ah, be quiet. I said I would. That is all. So in a moment he slipped into the cell and watched the father writing. Now of course you understand the father treats all those louse-ridden Indians like favorite sons, so when he saw this one standing there, he took off his spectacles and asked him what he wished.'

"The Indian expressed a great curiosity about the spectacles. 'What are they?' he asked, 'and do you see God through them?' And then

"Well, the father said yes, I suppose. Continue."

"Yes, he said he saw God everywhere, with the glasses or without." He stopped a moment thoughtfully. "What if he does see God?" he asked abruptly with a little shiver. 'Don't be a superstitious baby,' the other snarled. "Get on with

"Then the Indian said, 'I want to indulging themselves in a little recreation. It was only a tiny adobe Brother, so cute, so sly, just like a cubicle, but the two friars were spoiled child! So he snatched up able, through their peculiar talents, the spectacles and put them over his nose. He began to leap and chanced to be. No spot was too dance." The friar began illustrating small or too grand, too low or too his story. "Up and down, thus, with the spectacles hanging from his greasy ears, flinging his hands tolome was poring over a stained see God!' He circled around and around until he reached the door, then he scrambled out, still shouting, and was gone in a trice!"

'And what did the father do?" "He ran to the door in a panic, calling Estevanico back. And when he saw he had gone, he shook his head and said, 'Poor little one, he doesn't know he has taken his fa-ther's eyes.'"

Ruby First Jewel Made for the General Trade

The ruby was the first precious stone to be manufactured commercially, according to a writer in the Washington Post. It is simply oxide of aluminum with a small amount of oxide of chromium, which gives to it the brilliant red color. Many methods of making the ruby were tried from 1870 to 1890, all more or less successful from the chemical standpoint, but failures from the commercial point of view. It happened, however, that rubies appeared on the market of Geneva, whose origin could not be accounted

As a matter of fact, a curate of Geneva had succeeded in fusing chips of natural ruby given him by the lapidaries into large stones. This brought about a revival in the synthesis of the ruby, for it was argued that if ruby chips could be fused, the oxide of aluminum, of which they are composed, could be.

WEEK

By LEMUEL F. PARTON

NEW YORK.—The Nazis haven't bothered Frau Katherina Schratt. Unlike the Pompadours and Montespans, usually among the first victims of po-

Frau Katie litical upheavals, Immune to Austria's "Gnaedige Frau," as Nazi's Ban Emperor Francis

Joseph called her, has ridden the surf-board of dynastic and political change for nearly 60 years. She is now eighty-two, doing crossword puzzles, disclaiming knowledge of the current cataclysm, but longing for the "good old days,"

In those days, she was pretty Katie Schratt, a dancer in the Burg theater, which was under the patronage of the emperor. After a hit performance, with the emperor attending, she obtained an audience.

"Sire," she said, with a low curtsey, "we cannot maintain ourselves on the salaries you pay. I owe \$50,000 for my cos-

The emperor promised a new benefice for the theater and said he would help her take care of her debts. She was backing gracefully to the door when the emperor said: "Gnaedige Frau, why do you

leave us?" villa by the palace gates. The fitted waistline and saucy little emperor, after a hard day swinging peplum. It can be worn with your the scepter, used to drop in at Frau spring suit skirt, too. Make it up Katie's, split a bottle of Pilsener in flat crepe for immediate wear and sing a few songs. She knew all and later in linen or pique, using the mellow old tunes which he par- all one color or a printed blouse ticularly liked. She used to darn his and plain skirt, as pictured. socks and tell him when he needed a hair cut.

by an amusing artifice, induced her arms, and the skirt that's narrow to accept a fortune in gems. He round the hips and slightly wide was a famous huntsman. He told at the hem. Gathers beneath the her he was sending her a wild boar raglan shoulders make the blouse he had killed.

it arrived, it had diamond earrings, will be your spring favorite. Lat-Slain Boar

Is Studded and a diamond With Jewels breast pin, and its back was studded with precious Hapsburg jewels. The 2 yards of 39-inch material for the money lenders got them, after the

emperor's death. She was supposed to know more of the secrets of the realm than any 38, 40, 42, 44, 46, 48, 50 and 52. other person. She guarded them carefully, but did reluctantly reveal | inch material. If contrasting a few details of the Mayerling tragedy of 1889.

She said Archduke Rudolf shot himself, after killing Baroness Vetsera. That's the version of the film now running. It would make a good story if somebody could take Frau Schratt to see "Mayerling" and have her write a critical review.

MARK ETHRIDGE becomes IVI "czar" of the radio industry. It is hard to think of Mr. Ethridge as a czar, or even a third assistant Simon Legree, but he clicks neatly as an able, deft, diligent and re-

sourceful executive. While Mr. Ethridge is only fortyfour years old, he is of the type of old-line, leg-man Radio 'Czar' newspaper man, Began Career with an insatiable

as a Leg Man appetite for news. A native of Meridian, Miss., with soft southern speech and instinctive courtesy, he ought to be an excellent troubleshooter for the radio, rather than a czar. He was a reporter on the Meridian Dispatch, studied at the University of Mississippi and romped on up through grades to the managing editorship of the Macon (Ga.) Telegraph. He was with the New York Sun in 1926 and his old friends there have been nominating him today for a loud cheer in this

He was lured back to Macon, went thence to the Richmond (Va.) Times, of which he was publisher, and later became general manager of the Louisville Courier-Journal and Louisville Times. He spent the year 1933 in central Europe, on an Oberlander Trust fellowship, studying politics and economics and -the only touch of anti-climax in his career—the Versailles treaty.

The radio has picked a man who knows the social and educational box-score as well as good entertainment. He is still general manager of the Courier-Journal, up and coming in the new enlightened leadership of the South. His "czar" job is unsalaried.

THE STATE OF THE S

Town of Velasco Has 3 Claims to "Cradle of Texas Liberty" Title

First of Stephen Austin's Colonists Arrived at This "Plymouth Rock" in 1821; It Was the "Concord" Where the First Gun of the Texas Revolution Was Fired in 1832; and the Treaty of Peace Signed Here in 1836 Ended the Struggle for Independence.

& Western Newspaper Union

By ELMO SCOTT WATSON

battlefield of San Jacinto, where Sam Houston triumphed over the Mexican dictator, Santa Anna. Then there's Washington-on-the-Brazos, where the Texan Declaration of Independence was signed on a March day 101 years ago.

All of these places, of course, are important landmarks in the history of the Lone Star state and of the United States as well. But before the "cradle of liberty" title is finally awarded to any one of them, consider the claims of another spot in Texas to some share in, if not a complete right to, that distinction. Brazoria county, or more specifically, the old town of Velasco at the mouth of the Brazos river is that

It was at Velasco that the Lively, the first vessel with emigrants for Stephen F. Austin's colony of Americans, arrived on December 21, 1821-exactly 201 years after the arrival of another band of colonists on the "stern and rockbound coast" of New England. Thus Velasco became the "Plymouth Rock of Texas." It was here on June 26, 1832, that the opening gun of the Texas revolution was fired, thus baptizing in blood the "Concord of Texas." And it was here on May 14, 1836, that public and secret treaties of peace between the Republic of Texas and Santa Anna were signed, thus bringing to a successful close the Texas struggle for liberty.

So it would seem that Brazoria county, and especially Velasco, has an uncommonly good claim to that title of "the cradle of Texas liberty." The arrival of the Lively, the "Mayflower of Texas," at Velasco in 1821 marked the beginning of Stephen Austin's effort to carry out the plan of his father, Moses Austin, for the colonization of Texas. During the next 14 years between 25,000 and 30,000 settlers were landed there. In the meantime there had begun the chain of events which would culminate in the revolution against Mexican rule and the establishment of the Republic of

In 1832 Velasco was a Mexican port, garrisoned by about 250 men in a circular fort with a mound of earth, on which artillery was mounted, in the center. It was also an important port with several vessels plying between it and New Orleans. Among these vessels was the Sabine. Up to this year no duties or customs had been demanded by government officials. But when they found the trade was becoming profitable the commander of the fort notified the Sabine's captain, Jerry Brown, that he must pay certain duties and procure a clearance of his vessel from Col. John Davis Bradburn, then commanding at Anahuac on what is now Galveston bay.

Travis Imprisoned.

Bradburn, an American who had entered Mexico in 1816 or 1817, had allied himself with Bustamente when the latter, as vice president of Mexico in 1829, had headed a successful revolution. Bradburn had been put in charge at Anahuac, one of several military forts that were part of Bustamente's scheme of dictatorship and oppression, and had perperated a series of annoyances and indignities on the colonists, including the arrest and imprisonment of William Barrett Travis, tho later was to die a hero's death at the Alamo.

This occurrence was really the spark that fired the powder trail of revolution. Shortly afterwards, a meeting was held at Brazoria, where the unjust confinement of American citizens at Anahuac and the unfriendly attitude of the Mexican authorities were discussed. After passing the "Turtle Bayou resolutions" reciting the tyrannical acts of Bustamente and his minions and their subversion of the Mexican constitution of 1824 and pledging their support to Santa Anna, who was then supporting the 1824 constitution, the colonists made their plans to

overthrow Fort Velasco. Three companies were organized, and the schooner Brazoria, then at Brazoria after bringing a

cargo from New Orleans, was

Bronze tablet on the monument located near the coast guard station at Velasco, Texas, which tells of the fame of that town as the "Cradle of Texas Liberty."

pressed into service by order of John Austin, "master of the military forces at this place," apparently a thoroughly unofficial title. One company of marines, under William J. Russell, sailed down the river on the schooner and the other two companies-led by Austin and Henry S. Brown-marched to Velasco. They converged on the fort, intending to attack at daybreak. But an accidental shot by one of the men about midnight disclosed their presence and the battle was on.

All through the night the fighting went on, and the next morning-June 26, 1832-the fort surrendered, with more than twothirds of its defenders lying dead

STEPHEN F. AUSTIN

or wounded. One of the terms of surrender was release of Bradburn's prisoners at Anahuac.

Not long after this historic battle, Santa Anna succeeded Bustamente as the ruler of Mexico. The coming into prominence of Santa Anna, a "liberal," led the Texans to ask for reforms, such as the right to use the English language in public places, privilege of organizing their own militia, separation of Texas from the state of Coahuila, and other changes.

Eventually Stephen F. Austin went to Mexico City to lay a new constitution for the proposed Mexican state of Texas headed by Sam Houston, before the Mexican government. Apparently successful, he started back. But a letter he had written back home advising his Texas friends to go ahead with their separate statehood organization plans without waiting for authorization, fell into the hands of Mexican officials. He was arrested and kept in prison

for 15 months. By the time of his release and return to Texas in 1835, Austin came back convinced that war was Texas' only course. Several local assemblies were held and declared Texas a free and sovereign state, notably one at Goliad on December 20, 1835. Then followed the battles of the Alamo, Goliad, and others, leading up to the final

triumph at San Jacinto on April 21, 1836.

The revolution which was started at Velasco four years before was destined to return to that same setting for the final dramatic act. David G. Burnet, who had been named Texas' provisional governor at a constitutional convention at Washington-onthe-Brazos on March 1-at the very time of the tragic siege of the Alamo-made Velasco the temporary capital of the new republic and there the treaty of peace which ended the revolution was signed on May 14, 1836.

Changes of a Century.

During the century that has elapsed since that historic event the geography of the region has undergone several changes. The present town of Velasco is four miles inland. The original Velasco, which was situated at the very mouth of the Brazos, virtually disappeared before the turn of the century with the failure of the many efforts to create a satisfactory deep-water harbor, due to lack of funds and the constant silting of the Brazos.

Although most people think of Texas in terms of cattle, grain, fruit, and oil, the fact is that it is rich in other products. One of these is sulphur and it was sulphur that turned the trick of providing this region with a satisfactory harbor. Though some of the richest farmlands of the nation lie along the lower Brazos, the bulk of the farm commerce had to turn to the port of Galveston, and later Houston. Then the famous Spindletop oil strike of 1901 turned attention on the "salt domes" of the coastal plain, sulphur was found at Bryanmound, near what is now Freeport, and operations on it were begun in

The shoal conditions still were troublesome, however, and it was eventually determined that the only way to create a practical harbor would be to divert the Brazos river, letting it empty its water and alluvial deposits into the gulf at another point, and retain the original mouth, as an estuary, for a port. This unique engineering project was accomplished by October, 1929, and Freeport harbor has been easily

maintained at 32-foot depth since. The state of Texas now supplies nearly one-fifth of the world's production of oil and sulphur. The importance of oil in the machine age is familiar to everyone but sulphur plays almost as vital a role. In one form or another it enters into the making of almost every article of modern life, notably rubber goods, newspapers, steel, plastics, paints, dyes, inks and synthetic textiles, and it is of particular importance to the farmer as it is the primary processing factor in making fertilizers and is invaluable in fung-

icides and insecticides. So, historic ground that Brazoria county is with its claims to being the "cradle of Texas liberty," it is also an important factor in the economic picture of the modern commonwealth of Texas and of the United States because of its harbor and the large oil and sulphur tonnage that moves through it.

It is doubtful if one American in a thousand ever heard of the battle which was fought at Velasco on June 26, 1832, or realizes the importance of this "Concord of the Texas Revolution." For that matter, it is a none-too-familiar tale to many citizens of the Lone Star state. For, as John Henry Brown, in giving an account of the battle in his "History of Texas" said in explanation of his care in verifying the facts:

"This special care was taken because of the great historical importance of the first actual measurement of arms in the succession of bloody dramas which led to the independence of Texas and which had been so imperfectly described, not to say partially ignored, by writers on Texan history. A deep sense of patriotic duty impelled the effort also to secure and place in enduring form the names of those dauntless pioneer-farmer heroes who first punctured the arrogance of Mexican despotism and gave a foretaste of the grand achievements yet in store for the knightly chivalry destined to win Texas from barbaric misrule to peaceful civ-

Couched in less poetic terms, but in its frankness perhaps more indicative of the temper of the Texas colonists, is the report of Henry Smith, one of the Velasco colonists who participated in and was wounded in the battle, and who afterward became provisional governor of Texas. In his version of the affair at Anahuac and the Battle of Velasco, he said:

"We had declared in favor of Santa Anna (as opposed to Bustamente), not that we had any advice!"-The Improvement Era. choice in names, for we had no more confidence in one Mexican than in another, but we had been sworn to support the constitution and were willing to redeem our pledge. The fact is we were determined to protect ourselves from insult and injury. We could not be called rebels, because we were battling for our constitution and, too, under the Mexican flag which we had nailed fast to the masthead, with 'Constitution' in large letters on it so that it could not be mistaken .

"Our remonstrances, though courteous and respectful, were bold, manly and calculated from our bold and dignified manner to show the Mexican nation that our constitutional and vested rights could not be infringed with impunity and that if we were not respected by them, that at least we respected ourselves as freemen."

But the significance of Velasco rather the whole region around the mouth of the Brazos river-in Texas' economic and

New Monument Erected on the Battlefield of San Jacinto.

military history by no means begins and ends with its role as setting for the overture and the finale of the revolutionary drama.

It was at Brazoria that Austin, upon his return from imprisonment in Mexico, made one of the greatest political speeches of history, putting into the record his strong conviction that war against the Mexican oppressors was the only recourse left to the American colonists. Then, too, Austin's home was at Peach Point plantation, only a few miles north of the modern town of Freeport, and when he died in December, 1836, he was buried in Peach Point cemetery. The original gravestone may still be seen there but fastened to it is a bronze tablet which reads: "The state of Texas October 18, 1910, removed the remains of General Stephen Fuller Austin to the capital city of Austin where they were reinterred in the state cemetery and a statue erected over the grave.

Near the town of West Columbia in Brazoria county also stands a marker designating the site of the first capitol of the Republic of Texas. Here on October 3, 1836, the Texas congress met and elected Sam Houston, the victor of San Jacinto, as its first president and Stephen F. Austin, its first secretary of state.

GOOD GOING

The village policeman was pass ing the local inn when, noting that it was well past closing time, he saw a man still sitting in the bar. He went to the proprietor and remonstrated.

"That man should be outside,"

"Yes," replied the proprietor, "but I can't get him out."
"I'll soon see about that," replied the constable, promptly, and pitched

the unfortunate man out. "Thanks," replied the boss. "I've been trying to get him out for a long You see, he's the bailiff."-Tit-Bits Magazine.

Big Heart

A well known attorney was always lecturing his office boy, whetner he needed it or not. One day he chanced to hear the following conversation between the boy and the one employed next door:

"How much does your chief pay you?" asked the latter.

"I get \$1,500 a year. Five dollars a week in cash and the rest in legal

Tests Prove the Power of Food

Demonstrate a Vitamin-Rich Diet Is Vital to Health

By C. HOUSTON GOUDISS

ANKIND owes many things to the animals which have been used as test subjects in laboratories all over the world. As doctors and scientists have waged their war against disease, as they have made great strides forward in the study of foods and nutrition, they have carried on many of their experiments with rats.

The rats pictured here dramati-cally illustrate the power of food to influence growth. Although these two rats are exactly the same age,

brother. Where one animal is puny and underdeveloped, the second is fat and sleek and full of vitality.

What has produced such a difference in weight and general physical well-being? Merely a slight difference in diet. The two rats have lived under identically the same conditions, but the smaller animal on the left has received food lacking in sufficient vitamins, while the other rat has been fed the same diet. reinforced with vitamins.

If a well-balanced food ration is vital to the health of animals, how much more vital it must be for human beings. Surely the lesson is plain to see. If a mother wants her children to thrive she must feed them adequately. The child who is receiving a diet lacking in vitamins has no chance to grow and develop properly. Nor will the adult on a deficient diet attain or maintain opti-

EDITOR'S NOTE: To plan a diet

wisely, to recognize the foods rich in

important food elements, we must learn to utilize the discoveries of science. We must keep abreast of the newer knowledge of nutrition as it is presented by wise, unbiased interpreters such as C. Houston Goudiss, nationally known food authority, who each week offers his "What to Eat and Why" column in this newspaper. In this column Mr. Goudiss translates the latest developments into simple, non-technical language. By following his articles regularly, it is easy to keep in step with the most up-to-date findings of nutritional science.

MINNEAPOLIS-MOLINE UNI-CARRIER AND TOOLS NEW METHOD OF FARMING

This famous farm machine was developed mostly for use in semi-arid sections, and in groves, or-chards and vineyards. With the M-M Uni-Carrier and tools, and any modern tractor, the farmer has been able to produce a larger crop in the semi-arid sections of the country than previously. This new type of farming, using the contour lister methods, sponsored by the U. S. Dept. of Agriculture. calls for a new type of farm implements. Thousands of Uni-Carriers and tools in use for many years have proved that the Uni-Tiller is more practical and economical than a series of control of the Unit Tiller bandles. single unit implements. The Uni-Tiller handles as easily or easier than ordinary implements-and

all tools are operated by a double power lift.

A carpenter does not buy a BRACE for every BIT used in his work. If he did he would spend a lot of money uselessly, and have an extra chest or two of tools to carry around.

The UNI-CARRIER may be considered the AGRICULTURAL BRACE and the various tools

are the AGRICULTURAL BITS-and only those

needed are bought. You get away from paying for a lot of extra frames, levers, wheels, power lifts, etc. The Uni-Tools fit the UNI-CARRIER similar to the way a BIT fits a BRACE. That is, the implements are attached to the Uni-Carrier by means of clamps that fit the tool bar. But further than that, the Uni-Tools may be used in combinations and adjusted to fit the job and tractor power available.

All you buy is the new heavy duty UNI-CAR-RIER—only one sturdy frame, one set of levers, wheels, and any of the simple Uni-implements you may need. The carrier hitches directly to any wheel or crawler type tractor. The Uni-implements attach directly to the square, high carbon steel tool bar of the UNI-CARRIER by means of the tool bar clamps. The tillage tools can be used individually, or in almost any desired combina-

C. Houston Goudiss Discusses

TEETH -- Your Passport to Good Health -- and Tells How You Can Avoid the Tragedy of Dental Decay

By C. HOUSTON GOUDISS

A SCIENTIST, who was also a wit, once remarked that you must be true to your teeth or they will be false to you. That most people do not heed this advice is evidenced by the fact that almost 100 per cent of the adult population is affected by some form of oral disease, and from 90 to 97 per cent of all school children have decayed teeth.

As there is a close relationship between healthy teeth most universal, more than half of and healthy bodies, and conversely, between decayed Mothers Are to Blame teeth and sickly bodies, it is easy to understand why science views this appalling situation with the greatest alarm -and why such an eminent authority as Professor Ernest A. Hooton of Harvard Univer- the first grade, 90 per cent of the sity warns that "unless steps are taken to discover preventives of tooth infection, and correctives of dental deformation, the course of human evolution will lead downward to extinction."

Health and Happiness Depend on Sound Teeth

That is a strong statement, but it is not an exaggeration, for it would be difficult to over-estimate the influence of the teeth upon human health and happiness.

Do you wonder how teeth can affect happiness? Consider, then, that a pretty face depends, first upon the position of the mouth when the lips are closed, and second, upon the appearance of the teeth when the lips are parted. You cannot have a lovely mouth when the lips close over crooked front teeth; you cannot have an attractive smile if the teeth are

And when gums recede, and loosened teeth are forced out of their natural position, the position of the lips is likewise changedwith the result that the lower part of the face is disfigured.

Surely this is tragedy enough. But the effect of decayed teeth upon health is of far greater significance.

Dental Decay Does Extensive Damage

A decayed tooth is a poison factory, distributing its noxious product to every part of the body. In the body, that poison attacks and centers in the weakest spot.

It may lead to neuritis, rheumatic ailments, dyspepsia, or even duodenal ulcers. It may be a contributing cause of heart dis-

In view of such extensive damage, it is easy to understand why given proper care, so that dental decay became rare, instead of al-

DO YOU WANT TO REDUCE

Safely . . . Surely Scientifically?

Get This Free Bulletin Offered by C. Houston Goudiss

READERS of this newspaper are invited to write to C. Houston Goudiss, at 6 East 39th Street. New York City, for his scientific Reducing Bulletin, which shows how to reduce by the safe and sane method of counting calories. The bulletin is complete with a chart showing the caloric value of all the commonly used foods and contains sample menus that you can use as a guide to comfortable and healthful weight reduction. A postcard is sufficient to carry your request.

all sickness would be eliminated.

For Children's Bad Teeth It has been estimated that the temporary, or "baby teeth" of children come through the gums practically perfect in 98 per cent of all children. Yet, statistics check the condition of the teeth. show that by the time they reach both from wealthy homes and from homes where money is scarce, have bad teeth; one-third have abscessed conditions in their mouths, and every fourth or fifth child does not have proper masticating surfaces.

If this disgraceful state of affairs is allowed to continue, the blame must be laid squarely at the doors of the nation's mothers.

Formerly it was thought that oral hygiene alone would prevent tooth decay. But though the importance of thoroughly cleansing the teeth is recognized today as never before, nutritional scientists have discovered that correct diet, plus mouth hygiene, is the real key to dental health.

Diet and Its Relation To Dental Disease

The teeth are living tissues, which require proper nourishment just as much as any other part of

the body Every food element required for a healthy body plays its part in building healthy teeth. But special emphasis must be placed upon providing adequate amounts of calcium, phosphorus, and three vitamins, A, C and D.

Teeth Are Actually Formed Before Birth

These substances must be supplied before birth and throughout

Although teeth do not appear in a baby's mouth until some months after it is born, they are actually formed before birth.

It is during this period, there fore, that proper dieting should begin. The teeth are constructed of the same materials as the bones, chiefly calcium and phosphorus, and if the diet of the prospective mother is not adequate, these building materials are withdrawn from her own teeth and bones.

The old idea that mothers must sacrifice "a tooth for every child" a prominent medical authority arose because expectant mothers has declared that if the teeth were did not realize the importance of taking extra amounts of calcium, which is obtained from milk, cheese, dried peas and beans, green leafy vegetables and many nuts; phosphorus, which is abundant in egg yolk, cheese, whole grain cereals, dried legumes and milk; and vitamin D, which is supplied by fish-liver oils; irradiated foods, or those enriched with vitamin D concentrates; and egg

> It has been proved experimentally that when vitamin A is withheld, the teeth begin to deteriorate, and become chalky, white and brittle.

Vitamin C is so closely related to the health of teeth and gums, that when it is lacking, profound changes occur, including swelling and bleeding of the gums and loosening of the teeth.

Four Important Rules For Dental Health

The prevention of dental decay

and the preservation of sound teeth and healthy gums is founded on a four-point program: First, a well-balanced diet con-

Have You a Question?

Ask C. Houston Goudiss

C. Houston Goudiss has put at the disposal of readers of this newspaper all the facilities of his famous Experimental Kitchen Laboratory in New York City. He will gladly an swer questions concerning foods, diet, nutrition, and their relation to health. You are also invited to consult him in matters of personal hy-giene. It's not necessary to write a letter unless you desire, for postcard inquiries will receive the same careful attention. Address him at 6 East Thirty-ninth Street, New York City.

taining an abundance of calcium, phosphorus and vitamins A, C

Second, frequent and thorough brushing of the teeth, to remove all food particles. The use of an efficient dentifrice encourages efficient brushing and helps to keep the teeth looking attractive.

Third, the inclusion in the diet of foods that require the chewing, tearing, gnawing and biting for which our teeth were designed, such as raw cabbage, celery, apples and other fibrous foods.

Fourth, a visit to the dentist at least twice a year, so that he can

If every mother will follow this program, and train her children to follow it, the result will be a vast decrease in dental decay, and a forward step in human progress. For it is not too much to say that the SALVATION OF THE HUMAN RACE LIES IN SAVING ITS TEETH.

Write to C. Houston Goudiss, 6 East 39th Street, New York City, for information on How to Build and How to Maintain Healthy Teeth.

Questions Answered

Miss F. S. P .- The sulphur dioxide used to bleach a good grade of dried fruit is present in a chemical combination that is entirely harmless.

Mrs. E. T. D .- Answering your question as to the effect of cooking on vitamin D, this is no problem in the kitchen. Natural vitamin D is virtually absent from most foods, but in irradiated foods, or those to which vitamin D concentrate has been added, the vitamin D is stable and ordinary cooking has little destructive

Mrs. J. B. McK .- It is incorrect to say that rye bread is more, or less, fattening than white bread. A slice of rye bread supplies the same number of calories as a slice of white bread.

Terence Shea Tells of His Bulging Barrels

A social worker with more enthusiasm than tact went to call upon Terence Shea, night watchman, at his home.

"I hope, Mr. Shea," she said, 'that you do not squander your money in riotous living. May I ask what you do with your wages?"

"I'd just as soon tell you as not," replied Mr. Shea. "'Tis \$15 a week I make. When I've paid the rent, the provisions, and the milkman, and bought what's needed for Maggie and me five children, I deposit the rest of my money in barrels. Mostly, ma'am, sugar barrels. They're bigger an' hold more. But when I can't get them I use plain flour barrels.

More women use O-Cedar Polish and Mops than any other kind-for furniture, wood-I CLEANS

Irium contained in BOTH Pepsodent Tooth Powder and Pepsodent Tooth Paste

 No matter how long your teeth may have been clouded by dull, unsightly surface - stains, the regular use of Pepsodent can bring about a remark-able improvement. For Pepsodent is more effective. Why? Because Pepso-

dent alone contains Irium! . . . Irium helps Pepsodent to brush away those dingy surface-stains that hide the true brilliance of your smile... and then polish your teeth to all their full natural radiance! Contains NO GRIT, NO PUMICE. Try it! W. V. C. Eles . A. M. ACCRET TALL SECRETARY SHOT

Speaking of Sports

1938 May See Comeback of Sports Flops

By GEORGE A. BARCLAY WHILE Lloyds of London wouldn't give you any odds on it, there is a good chance that 1938 may be the year of the big comebacks in sports-a sort of retribution time, when the lads who stumbled last year or the year before will pick up their feet and overtake those who passed them in the

Take a fast inventory and you'll find that most of the lads on the comeback trail are making a fairly good showing up to the present. For instance, Max Baer whipped

Tommy Farr decisively and an-

Dizzy Dean

nounces that he will regain the heavyweight championship of the world which he lost to Jim Braddock. The Cubs after a dismal August fold-up in the past two campaigns inform you that they are going to win the National league pennant with the same club that did the fadeout in the home stretch.

They May Be Right

Schoolboy Rowe vows he will pitch the Detroit Tigers to the American league pennant if he can get some help from the rest of the pitching staff. Dizzy Dean says he will show Branch Rickey that he is still the greatest pitcher in baseball. Max Schmeling declares he will regain the heavyweight title now held by Joe Louis.

If you've been following Dizzy this spring you will note that he has made a real start. Above all he is serious for perhaps the first time in his life, and regardless of his quirks, 80 per cent of the managers in either league would like to have him on the payroll. He's about as handy with a baseball as anybody in the big time and if he really settles down to business he can be the most valuable pitcher in the Na-

As for the Cubs, they really may make it this time. Tony Lazzeri, who has played against the Giants in the last two world series will tell you that the Cubs have a better team today, man for man, than Bill Terry's outfit and he can see no reason why they shouldn't come through. A lot of people wonder why they didn't win the last two pennants.

With Max Baer, as with Dizzy Dean, the thing that will really count in the comeback effort is taking his game seriously. From all reports he has cut out the night clubs and the clowning.

Baer Can Punch

Max can really punch and take it. His best chance at regaining the championship is via Max Schmeling. If Schmeling should knock Joe Louis out, then Baer might be able to club the German into a count of ten once more, because he can beat anyone he thinks he can whip and he is fully convinced that Schmeling is his meat.

A lot of fight fans are convinced that Schmeling can repeat his for-

Max Baer

mer win over Joe Louis by means of that right cross and that's pretty good logic, since the best way to gauge the future is by means of the past. These fans will back their beliefs to the extent of even money. As far as Louis is concerned, he hasn't looked any too impressive

Max Schmeling

To be sure, he has only had to dispose of set-ups like Nathan Mann and Harry Thomas and maybe he hasn't taken these tune-up bouts any too seriously. But when he gets in the ring with Schmeling again he will have to show considerably more than he did in their 1936 engagement if he wants to remain boss of the heavyweight division.

Cage Game Brakes

and the transfer that the transfer of the second se

I THE MAKE THE PROPERTY OF THE PARTY AND A STAND PORT OF THE PARTY OF

BASKETBALL'S racchorse speed that some authorities regarded as detrimental to the athletes' health will be slowed down a bit next season by two brakes applied recently by the rules committee of the National Association of Basketball Coaches meeting in Chicago.

The coaches increased the permissible number of time-outs for the college game to five and provided for optional use of four ten-minute periods, instead of the usual twentyminute halves.

For high school games a new rule on ties will make the first overtime a "sudden death" period, for the first score made will decide the game. This will eliminate possibly harmful long-drawn out overtime games. While no extra timeouts were added to the high school game, officials were instructed to take an official timeout in the second and fourth quarters, provided no time has been called during the first four minutes of play by either

Among additional rule changes approved for the college game were: optional use of a four-foot instead of a two-foot out of bounds margin behind the face of backboards and the barring of substitutions after a goal is made until the ball is back in play.

The outer half of the foul circle was exempted from present provisions of the "three second" rule in the case of a player who does not have possession of the ball. The change eliminates last year's penalty for lingering in the area by players without the ball. The rule remains unchanged in regard to players having the ball.

He Threw 'Em Fast

WHO was the speediest pitcher you ever watched throw a baseball?

Was it "Smoky Joe" Wood, Bob Feller or "Fireball" Mungo? Or was it Lefty Grove, Dazzy Vance or Ed Walsh?

All these lads have or had plenty of "swift," but take it from Al Schacht, the baseball clown who is really serious in this instance, he still hasn't spotted a pitcher, rookie or veteran who can throw a baseball as fast as Walter Johnson used

For years Al has been making the rounds every spring working out with different teams and he has been watching the young pitchers, searching for the easy, flowing mo-

Walter Johnson

tion that made Johnson his idol. He has just about decided that he'll never find it.

Schacht, who was a team-mate of Johnson for years on the Washing- hit the Hollywood studios. "Beau ton club, gets vehement on the subject. He asks:

"Why do people keep talking beloved pictures, is about who was the greatest pitcher to reach the screen when anybody with any sense knows there was never one even close to Cooper in the title Walter? Ask any man who ever

"When I look at some of these guys that you'd like to they call fast-ball pitchers these see screened with days it hands me a laugh. Why, new actors, why not Johnson threw a ball harder when write the studios he was loafing along behind a one- about them? Many run lead than anybody else ever fans have wondered

Here and There

THE consensus of opinion is that "Slingin' Sammy" Baugh, recently transferred to Columbus by the St. Louis Cardinals will eventually stick to football. Training camp verdict was that he'll never be a big league hitter, a difficulty which has beset other gridiron immortals like Jim Thorpe who tried baseball. But Sammy should worry. He's certain of at least \$15,000

a year from the Washington Redskins for throwing forward passes in the fall . . . Joe Louis, whose Horatio Alger career led from an Alabama cotton field to the world's Alabama cotton field to the world's heavyweight championship, has earned almost \$1,000,000 in the prize ring since 1934. New York's the whistle blew for lunch—and his cothree major league ball clubs, the Yankees, Giants and Brooklyn Dodgers, will advertise the 1939 world's fair with blue and orange emblems attached to the sleeve of

each player's uniform. When "Goose" Goslin signed contract with Washington, it marked the third time the former Detroit outfielder has been a member of the Senators.

Gardeners HOW. To

General Garden Care

MOST flowers should have little or no artificial watering until they are at least half grown. To get better and larger flower lossoms, cease watering when buds have formed.

For a continuous bloom, pick flowers regularly. This is most important with sweet peas and pansies, less so with petunias. Avoid the common mistake of etting vegetables grow too large

efore picking. Root crops-radishes, carrots, eets-are at their best when ardly half grown.

Pick peas just before pods fill ut completely. Pick corn just at he "milk" stage, when the kernel, gouged with the finger nail, yields a milky juice. Use summer squash when they are small, just after the blossom has dropped off. Certain other vegetables, of ourse, must be allowed to maure. Tomatoes should be ripened well on the vine, as should winter

Uncle Phil ?

Relieve the Strain

You'll never get "I" trouble ooking for your own faults and other people's good points.

What stirs the admiration of everyone is to see a man who is always equal to the occasion.
