HOME TALENT PLAY

The ladies of the Junior Woman's Club will present a home talent play entitled, "Keeping Up Appearances," at the school auditorium Friday night of this week.

This is a three-act comedy drama, containing enough spicy comedy to provoke the mirth of an audience, while at the same time it presents one of the most serious and timely lessons of the day in its pathos and generalities. You will thoroughly enjoy this play and the proceeds will be devoted to some worthy public purpose. The public is most cordially invited to attend and you cannot well afford to miss this very choice entertainment. The admission will be the price usually charged. One can by attending this play, enjoy an evening of good wholesome recreation and help some worthy purpose of the community at the same time.

P. T. A. Entertainment

The Local P. T. A. organization sponsored a highly appreciated entertainment at the school auditorium last Friday night at which Mr. Car Farley, and his group of entertainers, of Amarillo, presented the program.

According to reports there were about 250 or possibly 300 in attendance and all speak in very complimentary terms of the program. Following the program a light luncheon was served to all present.

Help kill the depression by "Keeping Up Appearances." School auditorium, Friday, March 20.

Doctors in Fight On Typhoid Fever

Austin.—"High up on every health officer's list of 'Disease Prevention Duties' at this time of the year, is the reminder, 'Typhoid Fever Immunization,' stated Dr. John W. Brown, State Health Officer.

Through the protection of public water supplies from contamination, the pasteurization of milk supplies, vaccination against the disease, improved sanitation of homes not served by protected water supplies, sanitary supervision of sources of food supplies and other protective measures, typhoid fever can be controlled.

Here are the facts: As somebody has aptly said 'Nobody catches typhoid -- he swallows it.' Typhoid is a fifth-borne disease. It causes great suffering and many deaths. That is not all. It is like an endless chain. A certain number of people who have the disease and recover from it, become 'carriers.' They continue to pass the typhoid-producing germs in the discharge from the bowels and kidneys. If the discharges are not disinfected before they are disposed of, the germs may spread into the soil and pollute it, or they may be carried into an unprotected water supply and contaminate it. A carrier may also spread typhoid when he handles or prepares food and is not careful to wash his hands.

In vaccination against typhoid we have an effective means of protection which lasts for a certain period and then must be renewed. If you have not been protected against typhoid within the last two or three years, go to your doctor and have it done now. The disease is both preventable and unnecessary.

New Automobiles On Upgrade For Texas

Austin.—New passenger automobile registration in Texas during February showed a moderate increase over both the preceding month and the like month last year, according to the University of Texas Bureau of Business Research. Total new car registrations in fourteen representative Texas counties were 5,327, an increase of 2.9 per cent over the month before and 6.6 per cent above February, 1935. For the first two months of the year sales in these counties were 13.1 per cent above those of the corresponding period last year. The increase over a year ago was again most marked in the upper intermediate and highest price brackets; the lowest price group actually showed a decline.

Eva Jordan Sets New Accidentless Record

If there are trophies to be awarded for safe driving, or medals to be presented for long distances on the high-ways of the country, they had better be polished up and made ready to give away, for there comes an Iowa lady to claim them all with the astounding record of over 1,000,000 miles in the short space of 13 years and not a single accident to her name.

Nothing wonderful about that? Well, no one has offered to equal it. The lady is Eva Jordan, 45-year-old resident of McGregor. She is an alumna of the Iowa State Hospital at Iowa City and she won her spurs as the drivers seat of her own cars on the high-ways of eastern Iowa.

COMES THE DAWN by A. B. Chapin

Suggest Reference To Previous Years

College Station.—Farmers who want to participate in the benefits of the new Soil Conservation and Domestic Allotment Act but also want to go ahead with their planting while the season is favorable without waiting for full details might do well to be guided by their last year's plantings, putting acres which were "retired" under the old program into soil building crops for 1936, according to Jack Shelton, vice director and state agent of the Extension Service, who has just returned from the regional meeting at Memphis called by the Secretary of Agriculture to help work out ways to put the act into effect.

"It is a soil utilization and soil conservation program and crops will be classified as soil depleting crops, soil conserving crops and soil building crops," Shelton stated. Cotton, corn, wheat and grain sorghums are our principal soil depleting crops in Texas and farmers making planting plans will have to remember this fact. There will be no crop control program, the Secretary of Agriculture has stated, but for working out the details of administering the Act, a job which has been assigned to the Agriculture Adjustment Administration, recommendations made at the four regional meetings will be assembled in Washington and from there will be developed the program which will finally be sent to the country.

"It now seems that payments will be made directly to farmers based on the productivity of the land devoted to soil conservation; and that they will be made on proof of compliance," Shelton stated.

Her job is to take patients to and from the hospitals and their homes. Miss Jordan averages an average driving distance during these 13 years has been equal to more than three times around the world. And she first put her hand to a steering wheel at the age of 52, thirteen years ago, when this remarkable marathon began.

She has owned 14 cars. The last ten of them have been Pontiacs, starting with the first Pontiac ten years ago. The present car is a new 1936 model. Since 1930 she has put over 100,000 miles on her five cars, the longest distance being 137,000 miles on the 1936 Pontiac six. All told, Miss Jordan has driven her Pontiac cars over \$50,000 miles.

Miss Margaret Goodwine, who is teaching in the Vernon schools, came over and spent the day Saturday with her mother, Mrs. Minnie Goodwine, and other relatives. She came as far as Amarillo with a group of debating students of Vernon, who were in a contest at Amarillo, Saturday, and returned to Vernon with them Sunday morning.

Ed White, one of the very efficient clerks at the T. J. Crawford store, was confined to his home a few days the first of this week with a slight attack of pleurisy.

CITY ELECTION NOTICE

Notice is hereby given that there will be a City Election held in the City of Friona on Tuesday, April 7, 1936, for the purpose of electing one Mayor and two Commissioners for a term of two years.

Poles will open at 8:00 A. M. and close at 6:00 P. M.

F. W. REEVE, Mayor
J. W. WHITE, City Secretary.

Appearances amount to a whole lot. Learn how to "keep 'em up," by attending the play Friday night, School Auditorium, March 29.

MUCH FEED TO SELL ON STREETS

During the greater part of the past winter season there has been nearly every day to be seen large truck loads of bundle feed exposed for sale on the streets of Friona, and it appears that it has always found a ready sale.

Evidently, however, the demand for this kind of feed is not now so great since these large loads sometimes await buyers for two days or more before meeting with a sale. According to reports, the greater part of this excellent feed stuff was grown in Bailey county to the south of Muleshoe, where abundant rainfall during the growing season of last summer produced an abundance of feed crops.

GETTING DRIVERS LICENSE

Quite a number of our people have secured their State Drivers License in order to be qualified drivers when the First of April arrives, and it appears that others are filling their applications for same, which all bears evidence that we will soon have none but licensed drivers for all cars and trucks. These license cost the applicants nothing, so why risk being fined for driving without a license?

L. G. Simpson was a business visitor at Amarillo Saturday, returning home Saturday evening.

Mrs. L. F. Lillard spent the week end in Amarillo as the guest of her friends Mr. and Mrs. J. C. Winn.

Attorney A. D. Smith, spent the greater part of last week over at Fort Sumner, New Mexico attending court and looking after business matters.

John Gosnell departed the latter part of last week for San Angelo, where he will visit for a few days with relatives.

M. A. Crum, who has been ill for the past few weeks, is slowly regaining his strength.

Miss Emma Stover was hostess at a small party at her home Sunday night, the guests being Misses Gladys Sattie, Lillian Rainey and Orma White.

Owing to the fact that no evening services are held at the Congregational Church on Sunday evenings, the pastor, Rev. K. G. Parks, was able to accept an invitation from Rev. Thurston, of the Methodist church, to preach from his pulpit last Sunday night, which invitation he accepted.

Brooks Pulls Big Campaign Surprise

Tyler.—Pierce Brooks, of Dallas, candidate for Governor of Texas, sprung a surprise on state political circles here today when he appeared on top of a snow white automobile equipped with loud speakers to make his opening address in the campaign. The auto, a large sedan, not only has an office inside to serve the candidate as portable headquarters, but a platform on top with chromium steel railing to serve as a speakers stand. Brooks made a progressive address, speaking on the issues involved in his political platform as the auto moved slowly through the business section of the city. He said he will campaign all over Texas in the car.

"I am advocating free licenses for passenger automobiles in Texas," Brooks declared in his address, "and I am using my personal car in order to bring this important issue close to the people. I want to impress on every Texas owner of an automobile, especially the owners of little cars, the injustice they are suffering by paying a heavy license for their cars in addition to burdensome Federal, state and county taxes on gas, oil and other essentials in the use of the cars. The loss of tax revenue will be made up from the additional sale of gasoline, upon which the state collects a heavy tax and shifting some of the weight to commercial transportation."

Immediate payment of pensions to the aged under existing laws, with advocacy of pensions to all over 60 years; drastic reforms in the tax system to produce more revenues and less unfairness in the levies, and the establishment of a real estate and rehabilitation board to cooperate with local civic bodies in restoring industrial prosperity to Texas communities are among the Brooks platform proposals.

He was greeted by large crowds in Tyler.

GIRL SCOUT NEWS

The scout meeting was held at the basement of the Congregational Church, Thursday afternoon, March 12.

Mrs. Stover, our captain, gave each girl a bird puzzle, which we had to figure out. We also played running games.

A new member, Beula Ruth Fallwell, joined the Girl Scouts. Each scout box passed "bed-making," and some scouts have passed their "cooking."

We were given a lesson in "observation" when we all went out doors and found all the articles beginning with the letter "A."

Saturday the members of the Star Patrol had a party and each scout of the Star Patrol passed "Fire Building." After the fire had burned down to coals they toasted marshmallows. Beula Ruth Fallwell had the best fire in the Star Patrol. There were seven Girl Scouts at the patrol party, and there were seventeen scouts present at the meeting, Thursday, March 12. Scribe—Jaquelyn Wilkison

LAZBUDDY HOME DEMONSTRATION CLUB

Mrs. R. P. Daniels, Reporter

"If we serve vegetables to our families, we give them the sixteen life-giving elements," Miss St. Clair, home demonstration agent, told the Lazbuddy Home Demonstration Club at its regular meeting, Tuesday, March 10, at the Home Economics room.

She also said that some form of raw vegetables should be served once each day at least. There never was a happy home in the world where the stomachs of the family are upset. Each member of the family should have each day one half gallon of milk, one half cup of leafy green or yellow vegetables, half cup of starchy vegetables, half cup of other vegetables, half cup fruit, fruit juice and tomatoes at least three times each week. One table spoon of butter, half cup of whole grain and 1 cup protein.

Those present were Meses, W. C. Williams, Kenneth Jones, Vernon Simmons, Irene Thorn, Roy White, J. Q. Marrs, C. D. Julian, L. Last, R. P. Daniels, W. H. Gammon, L. D. Taylor, A. L. Haberer, S. A. Davis and H. L. Bledsoe, and Mrs. Voda Goodrich.

The Lazbuddy Home Demonstration Club will meet at the Home Economics room to make a wool comforter, under the direction of "Bed Room" Demonstrator, Mrs. A. G. Thorn. Everyone is invited to come.

Keep up with appearances by attending Jr Women's play Friday night.

VISITED AT LAZBUDDY

John Chronister spent a part of last week visiting with friends and former neighbors over in the Lazbuddy community, returning home Tuesday.

Mr. Chronister reports that the dust storm of Sunday night did untold damage to farms and crops lying between Friona and Lazbuddy, and that many crops appear to be hopelessly ruined and the land badly damaged by having all the loose soil blown from them, while the highways in some places are almost impassable by the drifting dirt being blown onto them.

HAS SOLD BARBER SHOP

George Living, who has been conducting the Post Office barber shop for the past year, sold the shop to E. L. (Smoky) Price one day last week, and will retire from the barber business.

Mr. Price operates a shop on the east side of Main street also, in the J. G. Weir building, and he has not definitely decided whether he will move his business to the Post Office building, or close that shop definitely and continue his business at his present location.

Mr. Living has expressed his intention of securing land and engaging in agricultural pursuit in time to set out a spring crop, but, at any rate, he does not plan to leave Friona community.

CAR WENT TO DITCH IN STORM

One Sunday night as F. A. Spring and Dan F. Ethridge were returning to Friona from Lubbock they were met in the neighborhood of the Jesse school by the severe dust storm which swept over this locality that night.

The dense wall of dust came upon them so suddenly that vision was utterly excluded and before their car could be stopped it had taken to the barn in the blindness that enshrouded them.

Fortunately the car did not upset and was not damaged, but they were unable to push it back to the high way by man power, and Mr. Spring walked about a mile along the highway until he came to a farm house and secured the aid of the man and his car to get them back on the road again.

They then made their way slowly to the farm home and waited until the dust had subsided before continuing their way homeward. They were accompanied by Prof. and Mrs. Montgomery and their baby.

FRIONA WOMAN'S CLUB

The Friona Woman's Club held its regular meeting Wednesday, March 11, at the home of Mrs. J. E. Stover, with Mrs. L. Ritter as joint hostess.

After the usual business hour a very interesting program followed. Mrs. Stover gave a paper on "Modern Treatment of Modern Ills." Mrs. J. D. Buchanan also gave an excellent talk on the same subject, "New Scientific Discoveries for Health," was well brought out in a discussion by Mrs. G. Cranfill, Mrs. L. Baxter gave in conclusion, a paper on anesthetics.

After the program refreshments were served to twenty-six members and one guest. Mrs. Tom Galloway, Reporter

Junior Women's home talent play will teach you how to "Keep Up Appearances." School Auditorium, Friday night, March 20.

ANOTHER DUST STORM

In spite of the fact that our weather men and others who assume to know the vagaries of the Panhandle weather, have said that our severe dust storms for this season were past, we experienced, what is pronounced by nearly one to be the worst we have ever had, Sunday night about 9:30 o'clock.

After the wind had blown all afternoon at a rather swift rate, it suddenly shifted to the north and ere anyone was aware of its coming, the dust storm was upon us in all its fury.

The most intense part of the storm lasted about two hours, but dust continued blowing rather heavily until near morning and there was still a dust screen in the air at daylight, and dust was piled everywhere where any projection presented to afford a stopping place for it.

Presumably not a house that was so well built that the fine silt did not find many places where it could shift through and rooms on the north side of the houses had received so much that is covered completely, not only the floors but everything in the rooms and even clung to the walls and clung so tightly that it required energetic brushing to get it off.

Visibility was so completely cut off that a light could be seen no more than half way across a street, and at that it was just a faint glow. People who were away from home found it necessary to remain away until the storm began to abate so that they could see the road by the light of their cars, provided they were driving. Those who were out afoot found it even worse, for it was not only impossible for them to see where they were going, but it was also almost suffocating and the dirt filled ones eyes until it was painful.

On Monday morning all the housekeepers became very busy with brooms, brushes, vacuum sweepers and some even resorted to shovels and pans in getting rid of the most plentiful accumulation of the dust, leaving the residue to be taken up with dust cloths and mops.

Not only was the dust storm a source of trials and tribulations for the housekeepers, but out at the farms and elsewhere the farmers found their feed and tools and machinery literally loaded with dust, and it is said that the static that accumulated on live-stock, causing horses to neigh and cattle to low either with pain or terror.

The few wheat fields that had been showing some signs of life in their greenish cast, had the blades of the young wheat killed either by the sand or the electricity and the same are now showing gray instead of green.

In many places it is reported that the sand or dust is piled so deep that it is very hard work driving a car through it without wiring in the dry, soft silt, and many fields are reported as being covered with small sand dunes of from eight inches to three feet in height, these dunes forming where ever any object served to check the movement of the dirt. In many places, it is reported, the Star Route mail carriers had great difficulty in getting their cars through the deeply piled silt silt.

A FRIENDS TRIBUTE TO MRS. JOHN N. GILMER

Our hearts were made sad when word came Saturday morning, March 7th that Grandmother Gilmer had passed away. She had been living for the past two years with her daughter, Mrs. C. A. Gilmer, of the Lakesview community, but had gone to visit her daughter, Mrs. John Glasscock, at Vega, when she died.

Grandmother Gilmer, as she was known in our community had gathered about her a host of friends. All who knew her loved her for her tender smile and her quiet peaceful life. Grandmother Gilmer loved the simple things of life—the woods, the fields, the streams. She had a quiet, modest nature, ruled by a gentle friendly spirit, and it was these qualities that won for her the love and devotion of those who knew her.

She was weak and frail of body, but she thought not of herself but always of others and when the call came she was ready to go to that home not made with hands, but whose maker and builder is God.

Our deepest sympathy goes out to all the loved ones in their sad hour, and it is our prayer that the Comforter may give them consolation in their great sorrow and bereavement. Weep not dear children, Mother is not dead but sleeping.

A Friend.

HELD BRIDGE TOURNAMENT

The members of the A. Y. L. I. young women's club were guests to a goodly number of people at a bridge tournament held in the Pioneer Club Room Monday night.

The purpose of the tournament was two-fold—the social pleasure and as a means of raising funds for the needs of the club. There was a good attendance reported and all present spent a very enjoyable evening.

CURTIS DOUGLASS

Panhandle Press

Tulsa Herald — Do American workmen want to get ahead? Yes, says George E. Deming, top vice president of the Philco Company. Of the 10,000 men on the pay roll, possibly ten percent are taking correspondence school courses; about 350 women are whetting their ability through courses by Penn State college; more than a hundred men are attending evening classes at the University of Pennsylvania.

Floyd County Hesperian — Much of the lore of the country in which one lives escapes him. Historians and students of folklore who come along behind, pick up the thread of events only from the written word, the saga, or in instances, from chance remarks that are followed up and in history before those who actually saw pass into the beyond.

Shamrock Texan — Pride in their state is characteristic of Texans. Even naturalized Texans of only a pride, which is justified by the historical background, rich in patriotic and romantic incident, of this state of ours. It is not a pride of snobbishness, not vainglory in our own accomplishments, but rather a deep consciousness of the need to live up to the ideal set by freedom-loving pioneers, who carved homes out of a wilderness and wrested an empire from the clutches of tyranny.

Miami Chief — The gross unfairness of the Centennial commission in the division of its funds is really ridiculous. For instance in writing the history of the counties, the district agent gets the salary and is advised by the high ups to ask her friends in the counties to do the work without enumeration—and they, out of patriotism and anxiety to do something for their beloved state and county, undertake the work, free gratis. Can you beat it?

Canadian Record — Prohibition is coming back. So says one of the directors of the National Methodist Board of Temperance and Public Morals. He does not say when it is coming back. That is like saying it is going to rain in the dust bowl.

LUETA BORDEN

Texas U. Queen To Be Named In Voting

Austin—Secret balloting by 7,000 students on March 16 and 17 will determine who shall reign as sweetheart of The University of Texas at the spring Round-Up. April 3, 4, and 5. Jenkins Garrett, president of the Students' Association and chairman of the Round-Up Sweetheart committee, has announced.

The most popular and representative girl in the student body of the University is chosen every spring to be the Sweetheart of Texas. At the Round-Up Revue and Ball on April 3, her court will be composed of sweethearts from the other six Southwest Conference schools, the 130 candidates for the Bluebonnet Belles section of the University yearbook, the Cactus, and the four runners-up in the Sweetheart election.

The identity of the Sweetheart is kept secret from everyone, including the Sweetheart, until the night of the Revue, at which she is presented.

Hereford Brand — Beautification along the highways to impress visitors from many states is one of the outstanding projects of the Texas Centennial observance. Hereford has such a project that should never have awaited the stimulus of the Centennial, but that by all means should be given attention now. That is clearing away the unsightly dump ground along the highway a few miles east of the city. Such dump grounds are the result of our mode of living. Every city has one. It is the burying ground of our discarded possessions.

Muleshoe Journal: Three years ago the Journal editorially predicted that once the farmers got on the government payroll it would be hard to take them off. That prediction has come true. The Journal has no objection to the farmers putting a nose bag on at the public feed trough. In fact it much prefers farmers to do so to some other classes of business obtaining their feed in such manner.

Canyon News: John L. McCarty is due the congratulations of thousands of friends over the Plains of Texas, and especially those living in Canyon who have known him for so many years. John has sealed the ladder of newspaperdom in the Panhandle area, starting from scratch and landing in the place of second in command of the biggest newspaper in Northwest Texas.

Amarillo Daily News: The past week in Amarillo has seen a wonderful revival of two big factors in Western life—the hearty, happy greeting of the cowboy and the cowboy and the handclasp that is a handclasp and not a weak, suterfeggie. Everywhere it was noticeable and everyone enjoyed the big, hearty, open greeting of the range folk.

McLean News: Now that the government has granted funds to a school to teach women to talk, it might be in order to establish a course to teach ducks to swim.

Pampa News: It is a reasonable goal of every state to have its history well known and appreciated by its citizens. Modern Texas has drawn its people from every state in the nation and from foreign countries. This condition is both its strength and a weakness.

Borger Herald: Reichsfuehrer Hitler ordered his goose-stepping crack troops into the demilitarized Rhineland thus violating the Locarno pact and the Versailles treaty. It was the first time that German troops had entered the forbidden area after a lapse of eighteen long years.

Herr Hitler called his action a move for peace, and offered to sign a 25-year non-aggression pact with France and Belgium, with Great Britain and Italy as guarantors. However, some—and perhaps many in foreign countries—pictured Hitler with a bayonet in one hand and an olive branch in the other. His next move was, without a doubt, questionable in the minds of most people.

Childress Index: Because of the excellent record he has established as the state's chief executive, Gov. James V. Allred need have no worry over the opposition that is cropping up against him for the July Democratic primary. His vigor, astuteness, honesty and constructive legislative program will assure his reelection, because Texans have accepted his administration of affairs with utter satisfaction.

Memphis Democrat: Just as if trouble did not already have enough spots to light on, Josef Stalin tells Roy Howard that Soviet Russia will most assuredly go to war if Japanese make a pass at the far-off and little-known republic of outer Mongolia.

Those intermittent cracklings and sputterings along a hazy boundry line in remote Asia, then, may be the first warnings of a new war; and if war starts there, it could jump all the way to Europe inside of a week.

Election is held the first day, and students nominate their favorite. No names appear on the ballot. On the second day, the five highest from the nominating election appear on the preferential ballot. These votes are counted and locked up until Round-Up Day.

Cabbage Juice Found Destroyers of Bacteria

A subtle new power in turnip juice and cabbage juice to kill bacteria was reported to the Society of American Bacteriologists by J. M. Sherman and H. M. Hodge of Cornell University.

This power they said is similar to the substances found in blood which inhibit bacteria. It is not, they explained, the germicidal power of some plant juices which has been known for many years, but "a more subtle type of bacterial-inhibiting substances."

This bacteria-killing factor in turnip and cabbage juice, says the Columbus Dispatch, is destroyed by a temperature of about 140 degrees Fahrenheit for ten minutes, and also by higher temperatures.

The germ power lasts 100 degrees for eight or more hours. The substance can be strained out of the juice by very fine filters. It will stick to the surface of activated carbon.

This turnip and cabbage germ-killing juice is more potent than the germicidal power of fresh milk, and less so than that of fresh normal blood. Attempts to find similar substances in carrots, parsnips and cucumber failed.

Pawned Wives Refuse to Return

Husbands of Peiping, China, who thought the idea of pawning their wives a great one, now are appealing to the police to get their mates back. They say that when they were ready to repay the loan they could not redeem the wives. The trouble is not with the lenders, but with the women themselves who refuse to return to their erstwhile husbands on a variety of pretexts. Above all, they accuse their husbands of harboring the design of sending them to Manchukuo next, and state that, although they are prepared for everything in reason, that is a step to which as patriotic Chinese women they can never agree. There is no law dealing with this particular form of pawn-broking.

Planes Stop Devil Worship

For the first time known aviation helped to suppress devil worship recently when a squadron of the British Royal Air force co-operated with Iraqi troops, sent out from Bagdad to stop the activities of 50,000 devil worshippers who had fled to the mountains. The worshippers were chased out by the British airmen.

Never Sure

Wife—It keeps a man guessing to find a good wife these days.
Husband—Yes, and after he's married his wife keeps him guessing the rest of his life.

Out of the Rut

"Remember, darling, you won't always be a junior clerk in a mouldy old solicitor's office."
"That's fact! I've already got a week's notice from London Hum-bist."

EIFFEL STRUCTURE TELEVISION TOWER

Back in 1887-88 Alexandre Gustave Eiffel built the famous tower which bears his name for the International exposition in Paris. It was then regarded as a mere engineering "stunt." Sober engineers declared it would be built and predicted it would be razed. Nevertheless the Eiffel Tower stood.

Today, states a writer in the Washington Post, important as a meteorological and wireless station and guide for airmen, it still towers above Paris. A short time ago France added to its usefulness by making it a station for the broadcast of television programs.

An interlaced ironwork structure, the Eiffel Tower reaches a height of 984 feet. The many visitors who ascend, by stairway and elevator, to the circular balcony surrounding the glass pavilion which tops the tower can see 55 miles on clear days.

Until New York's Chrysler building came along in 1930, with its height of 1,046 feet, the Eiffel Tower was the world's tallest structure. Later, of course, the Empire State building topped both with 1,248 feet.

Rhine Touched England, Contour Map Revealed

The Rhine at one time formed the eastern boundary of England and Scotland and would do so again if western Europe were elevated about 165 feet. This is revealed by a new contour map of the bed of the North sea prepared by R. G. Lewis and published in a recent issue of the Geographical Journal, an English publication. This map shows a clearly defined channel of the Rhine. When this channel was cut England was part of the continental land mass and the North sea was dry land. The Rhine flowed westward from its present mouth until it reached what is now the east coast of England and then flowed north and east past Scotland.

An elevation of only 100 feet would create in what is known as the Dogger banks in the North sea a great island about as big as the northern half of England. These shallow banks are believed to have been caused by the dropping of a terminal moraine by the continental ice sheet. This elevation also would provide a land bridge eastward from the Humber river to Denmark and also eliminate most of the English channel.

Meter Tests Driving Ability

A person can test his own ability as an automobile driver with the aid of a reaction meter which measures the time required to do something after deciding to act. The apparatus consists of a box on the top of which are model cars in motion. The foot of the person being tested rests on what would be the accelerator of an automobile. At a signal he is told to step on the brake pedal. The time required to change from the gas pedal to the brake pedal is measured accurately and is your reaction time. Sir Malcolm Campbell, British race driver, who recently set a record of more than 200 miles per hour, required only one-fourth of a second to step on the brake, but at 200 miles an hour he would have covered 110 feet in that quarter second.

TEXARKANA Visit EL PASO BROWNSVILLE See AMARILLO!

TEXANS! PLAN TO TRAVEL TEXAS DURING CENTENNIAL YEAR

All Texans are traveling this year, seeing and knowing their own state—the real Texas!
Residents of the Rio Grande Valley are finding that the Panhandle and Pecos countries of North and West Texas offer scenic attractions unsurpassed anywhere in the United States. East and West Texans are finding in the Rio Grande Valley a garden spot such as they never realized existed anywhere before. They're enjoying picturesque San Antonio and her historic missions. They're seeing Houston, visiting the San Jacinto battlegrounds; and spending happy, care-free days at Galveston, Corpus Christi and other Gulf Coast resorts!
Elaborate Centennial Celebrations make it especially interesting to travel Texas this year! Every section offers interesting attractions—events that come once in a century! Read the calendar printed at the right. For more detailed information, write the Chamber of Commerce at the cities you are interested in.

- MARCH 13-22—FORT WORTH — Southwestern Exposition and Fair Stock Show.
- MARCH 17—CRYSTAL CITY — Spanish Festival.
- MARCH 27—GOLIAD—Pontifical Field Mass.
- MARCH 28—AUSTIN—Texas Centennial Day.
- APRIL 3—AUSTIN—Texas Round-Up.
- APRIL 3—COLLEGE STATION — Centennial Cotton Festival.
- APRIL 4—ELTON — Texas Literary Parade. (At which 100 Texas writers representing 100 years of Texas will review literary achievements at Mary Hardin-Baylor College.)
- APRIL 6—PLAINVIEW — Panhandle Plains Dairy Show.
- APRIL 10—EDNA—Educational Fair.
- APRIL 10-11—GEORGETOWN — Historical and Cultural Fair.
- APRIL 12-21—HOUSTON — San Antonio Association Celebrations. (Ten-day festival, parades, banquets, concerts, and patriotic events, including Catholic Field Mass of great national importance.)
- APRIL 14-16—SANTON-TAFT — San Patricio County Celebration.
- APRIL 15—VICTORIA — Field Mass and Pageant. (Commemorating a mass held on the banks of the Guadalupe in 1659 by Alonso de Leon.)
- APRIL 15-21—EL PASO—Schools' Centennial. (Revisiting the History of Texas.)
- APRIL 17—RAYMONDVILLE — Texas Cactus Fiesta.
- APRIL 17—KINGSVILLE—Historical Celebration. (In heart of world's greatest cattle domain, the King Ranch.)
- APRIL 20-25—SAN ANTONIO—Fiesta de San Jacinto. (Gay festival of San Jacinto, Battle of Flowers parade, April 24.)

International Sunday School Lesson

By DR. J. E. NUNN

FOR SUNDAY, MARCH 22, 1936

General Topic:—Jesus Teaches True Values.
Scripture Lesson:— Luke 12:22-34 (Revised Version)

22. And he said unto his disciples, Therefore I say unto you, Be not anxious for your life, what ye shall eat; nor yet for your body, what ye shall put on.

23. For the life is more than the food, and the body more than the raiment.

24. Consider the ravens, that they sow not, neither reap; which have no store-chamber nor barn; and God feedeth them: of how much more value are ye than the birds!

25. And which of you by being anxious can add a cubit unto the measure to his life?

26. If then ye are not able to do even that which is least, why are ye anxious concerning the rest?

27. Consider the lilies, how they grow; they toil not, neither do they spin; yet I say unto you, Even Solomon in all his glory was not arrayed like one of these.

28. But if God doth so clothe the grass in the field, which today is, and tomorrow is cast into the oven; how much more shall he clothe you, O ye of little faith?

29. And seek not ye what ye shall eat, and what ye shall drink, neither be ye of doubtful mind.

30. For all these things do the nations of the world seek after: but your Father knoweth that ye have need of these things.

31. Yet seek ye his kingdom, and these things shall be added unto you.

32. Fear not, little flock; for it is your Father's good pleasure to give you the kingdom.

33. Sell that which ye have, and give alms; make for yourselves purses which wax not old, a treasure in the heavens that falleth not, where no thief draweth near, neither moth destroyeth.

34. For where your treasure is, there will your heart be also.

Golden Text:— Seek ye first his kingdom and his righteousness; and all these things shall be added unto you.—Matthew 6:33

CHRIST'S WARNING AGAINST COVETOUSNESS.— Luke 12:13-14

While our Lord was speaking on the oft-repeated theme, he was suddenly interrupted by an unnamed man of the multitude who asks him to make a decision on a very personal problem involving himself and his brother.

"He does not ask Jesus to arbitrate between him and his brother, but to give a decision against his brother. There is no evidence that the brother consented to arbitration."

—Alfred Plummer. Jesus did not come to invade the office of constituted authority and here refuses to hand down a decision, but he does take the opportunity of warning the multitude against the sin of covetousness, of which this man surely was guilty.

THE PARABLE OF THE RICH FOOL.— Luke 12:15-21

"Take heed and beware of covetousness." The warning against covetousness was followed immediately by a parable illustrating the teaching.

The man of which Jesus speaks was rich, he must have been a hard worker, as his harvest indicates, and he certainly watched over his estate with care. It was right that he should avoid waste.

On the other hand, there was no recognition of God in his thinking; he ignored the needs of his fellow-men, especially the poor; he thought he could satisfy his soul with material things.

"The man was all animal. His universe was a great wine-cellar. He told his soul that it would find heaven in the barn!" How many are attempting today to satisfy the soul which was made for God with the material things of this world?

"When God says, 'I want you tonight,' you cannot write an excuse."—Joseph Parker. "Stripped naked, a bare desolate soul, he passes from our sight lost in the darkness of eternal remorse, his own voice still dolefully echoing the condemning voice of God, his own soul saying, 'Thou fool, thou fool.'"

—(See Matt. 6:20-21, Col. 3:1-2)—Marcus Dods.

"BE NOT ANXIOUS" Luke 12:22-24

"And he said unto his disciples, Therefore I say unto you, Be not anxious for your life, what ye shall eat; nor yet for your body, what ye shall put on."

The verb here translated "Be anxious" comes from a root meaning "to be drawn in different directions," "to divide" and thus a person who is given to anxiety is one whose strength and attention are always divided.

"Consider the ravens, that they sow not, neither reap; which have no store-chamber nor barn; and God feedeth them: of how much more value are ye than the birds?"

He did not mean to say that we are to sit down and expect God to feed us as he feeds the birds. He said they sow not, they reap not, they have no store-chamber, and yet God feeds them. But we can sow and reap and have barns; and we ought to sow and reap and have barns; and, if God cares for the birds who have no thought and rationality, how much more will he feed us to whom he has given foresight and rationality."—G. Campbell Morgan.

"CONSIDER THE LILIES" Luke 12:27-28

Consider the lilies, how they grow; they toil not, neither do they spin, yet I say unto you, Even Solomon in all his glory was not arrayed like one of these.

"But if God doth so clothe the grass in the field, which today is, and tomorrow is cast into the oven; how much more shall he clothe you, O ye of little faith? In Palestine, wood being so exceedingly scarce, grass was often used for fuel.

"If God so clothe the lilies, which can neither toil nor spin, how much more will he clothe us, to whom he has given the capacity for toiling and the capacity for spinning. Supposing the day comes when I cannot toil and spin, and I cannot sow and reap, and gather into barns, then, when I cannot, God can; and I am safe in every way."—G. Campbell Morgan.

more will he clothe us, to whom he has given the capacity for toiling and the capacity for spinning. Supposing the day comes when I cannot toil and spin, and I cannot sow and reap, and gather into barns, then, when I cannot, God can; and I am safe in every way."—G. Campbell Morgan.

SPRITUAL VALUES FIRST Luke 12:29-30

"And seek not ye what ye shall eat, and what ye shall drink, neither be ye of doubtful mind. This verse is commonly and strangely ignored by most commentators. It cannot mean that we are not to devote ourselves to remunerative labor by which we are to obtain the means for the necessities of life, but it does mean that we are not to seek these things in the spirit of anxiety and faithlessness, about which the Lord has just been speaking.

"For all these things do the nations of the world seek after: but your Father knoweth that ye have need of these things."

The clear and blessed faith in our Father scatters all anxious care. Why should we be anxious if we know that we have a Father in Heaven, and that he knows our needs? He made the needs and will send the supply. My wants, so far as God has made me to feel them, are prophecies of God's gifts. He has made them as doors by which he will come in and bless me. Trust is the only reasonable temper for a child of a father. Anxious care is a denial of his love or knowledge or power."—Alexander McLaren.

"FEAR NOT" Luke 12:32

"It is your Father's good pleasure to give you the kingdom." v. 32. Untroubled and unfeared will be those who devote their lives to God and doing good. The flock may be little in number and resources, and it may be exposed to dangers seen and unseen; but it need not whiten and tremble with fear a single moment. The Heavenly Father here and now will give food and raiment and protection and in due time also his eternal Kingdom.

"In this text we find three names for God, three names for ourselves and three relations between God and ourselves, which are rich in meaning—Shepherd, King, Father; sheep, subject, Children; Shepherd and Sheep, King and subjects, Father and Children."

The Speaker's Bible.

"A TREASURER IN THE HEAVENS"—Luke 12:33

"Make for yourselves purses which wax not old, a treasure in the heavens that falleth not, where no thief draweth near, neither moth destroyeth."

(See especially Matt. 6:20-21). This might truly be called the "banking law of heaven."

There alone can our investments be safe for time and eternity. No moth nor rust can consume the treasure that is stored there. No thief nor gang of robbers can dig through the jasper walls and steal our heavenly deposits. But how can one store treasure in heaven? The master teaches that even the giving of a cup of cold water in his name wins heavenly reward.

Doing a little errand of mercy to one of the least in his Kingdom will be mentioned in the day of judgement. By the use of talent and opportunity, and sometimes by suffering patiently, we can store treasure in heaven.

Plan Proposed For Prevention of War

Dallas — Playing the role of good neighbor in world affairs, and cooperating actively in international efforts to promote peace, should be recognized by the United States as the most effective means to prevent war, economic authorities concluded Saturday after a five-day meeting of the Institute of Public Affairs.

The Institute, sponsored by Southern Methodist University as an educational highlight of the Texas Centennial year, and underwritten by the Carnegie Endowment for International Peace, presented during the week such names as Clark W. Elcheberger, director of the League of Nations Association, W. E. Dunn, assistant director of the Bureau of Foreign and Domestic Commerce, Peter Molyneux, editor of the Texas Weekly, and nearly thirty others.

Recommended strongly by the Institute were downward revision of the tariff structure, affiliation with the World Court and League of Nations in a concerted effort to prevent war, and general restoration of world trade to bring back prosperity. It was pointed out that Texas as the nation's leading exporting state, was more vitally affected than any other state by world economic tendencies.

"HELLALOOYA"

Clear the tracks, you whippersnappers!

Out the way, you flaming youth! Gangway, fashion plates and flappers. Your old granddad's heard the truth. From the old men's home he's hoppin'.

Dancin' like a crazy man, Singin', Shoutin', "hell's a poppin'." Gran'dad's read the Townsend plan. He has painted up his crutches, Polished up his wooden leg.

Gave his other tooth some touches, Took his toupee from its peg, Says he's found the wouthful fountain.

And the primrose path he'll seek He'll be coming around the mountain.

Whoopee! Fifty bucks a week.

SHARPS AND FLATS

Talking gets a job, but working holds it.

Don't overload a cannon or your stomach.

Doubt whom you will, but never yourself.

The population is most dense just above the ears.

You see no more signs: "Hitch your horses securely."

Do colleges teach the "science" of happy marriages?

Vacations lengthen your life if they are sensible ones.

To a romantic girl sweet nothings means everything.

The more "madding crowd" there is, the more people detest it.

Better to have two small desserts than a great helping of one.

A forest fire also burns all the billboards that line the forest highways.

The righteous may not be a bit chummy; but you can depend on them.

You can have only one "best friend," for the others must stand aside for him.

Get out the picture postcards every three or four years and live over happy vacation days.

One's duties are better performed if one doesn't let the disagreeable ones weigh on his mind.

Begin the day with a laugh, but better still, begin it at 7 a. m. and don't be behindhand all day.

Language was invented to conceal thought, but it is a miserable failure if you have a telltale face.

An interesting question is what Methuselah looked like when he had reached his three-hundredth year.

FIND "CHAPARRAL" VALUABLE HARVEST

Millions of acres on both sides of the Rio Grande river are covered with stunted growths of trees and bushes, called "chaparral." Formerly considered worthless, these plants may soon yield a rich harvest if plans of the Texas planning board materialize, says the Washington Post.

The board has found that the chaparral in the lower Rio Grande valley includes a large number of ebony trees. Ebony is especially suited for gun stocks, and several arms manufacturers are interested in obtaining a regular supply.

In the chaparral are also forests of mesquite, a bushy tree which covers one-third of Texas and most of northern Mexico. Mesquite beans have been used as a substitute for coffee by Mexicans along the border for many decades. Range cattle also relish the beans. Now mesquite wood is coming into favor for furniture.

A few years ago a plant was built at Marathon, Texas, to manufacture rubber from the guayule shrub. Three million acres of the plant were harvested before the factory stopped running. Now a new crop of guayule has replaced the old and is ready for harvesting.

Sun-Made Ice

The manufacture of ice is one of the last things one would imagine the sun to be utilized for; yet that is the purpose for which a California man harnesses it. The sun's rays strike a spherical metal ball and heat a reservoir of ammonia water, thus driving off ammonia gas which helps to form ice just as it would in any gas or electric refrigerator. The radiator being spherical, it does not matter from which angle the sun shines. Moreover, two hours' sunshine a day is sufficient to enable enough ice to be made for the requirements of the average household for more than 24 hours. In winter, when skies are often leaden, this home-made refrigerator can be run off a gas flame.—Tit-Bits Magazine.

Austrians Live Longer

People of Austria live longer than those of a generation ago. Twenty-five years ago 47 per cent of the people in the area now forming the Austrian republic were under twenty-three years old, and the percentage of those over sixty was 8.7. Analysis of vital statistics for 1934, announced in Vienna, shows 37.5 per cent under twenty-three and 13.9 over sixty.

Office to Be in Elevator

Heads of a concern in Zlin, Moravia, and their secretaries are to have their "office" in an elevator. Their office will be nearly 20 feet square, and the touch of a button will be enough to send it to whichever floor of the tall building it may be needed. There the doors will be opened, and the elevator will remain until all the required business has been transacted.

All in One Bill

"I must be very ill, nurse, with the doctor coming in three times a day."

"Oh, I shouldn't take any notice of that, Mr. Estwhistle. You see, we're engaged."—London Humorist.

Famous Clay Jug Traced

A four-in-one bluff clay jug that once dispensed liquid refreshment to the signers of the Declaration of Independence is now owned by a Pawtucket (R. I.) man.

Relic From Rubbish

Children in Oban, Scotland, recently found in a rubbish heap the first communion cup ever used in the city.

True Enough

English Teacher—Name a collective noun.
Student—Garbage can.

\$65 Cost of Year's Schooling

The cost of training future Texas lawyers at the University of Texas is \$65 a student for a year.

CRAMMED BARRELS

HID NOTED PAPERS

Present discussions about the proper care of Scottish family papers and charters and the appeals for their delivery into safe custody brings to mind a classical example of the rough handling of state papers from that country, says the Manchester Guardian.

When Grant Duff visited the Register house at Edinburgh in 1862 he was shown a number of valuable and important documents of that kind, including the list made by Mary Queen of Scots of her jewels, and was told that this, with many other valuable papers, had been taken to London in the time of Cromwell "and not sent back to Edinburgh till recent times. These valuable papers were packed in hogsheads and suffered much from the damp."

Joseph Robertson, the greatest of Scottish antiquaries of the period, had a good story about Mary's list of jewels which was one of the documents that suffered from the damp. He declared that Miss Strickland mistook the damp stains for the queen's tears and wrote a pathetic little passage accordingly.

GRAVITY CHANGING, SCIENTISTS LEARN

The force of gravity, which keeps rocks, houses, and men from flying off the rotating earth like water or mud flies from the rapidly turning wheels of an auto, is changing noticeably in some places on our globe. A Soviet scientific expedition in the Caucasus has found unmistakable evidence in that region that over a period of years the pull at the earth's center on all matter around it has varied. Objects whose mass has remained identical have fluctuated in weight. Since the pull of gravity comes from exactly the center of the earth's total mass and becomes greater as this center is approached, it is thought the variation detected must be due to gigantic shifts of matter under the earth's crust which result in moving the earth's center of gravity. It can easily be seen how such shifts would affect the weight of objects when it is understood that the weight of anything is greater at the bottom of a mine than it is at the surface of the earth. Likewise a man weighs more standing at the North or South pole than he would weigh at the equator, partly because on the flattened pole he is nearer the center of the earth.—Pathfinder Magazine.

Wind Magic

One of the big radio outfits was looking for an economical method for charging radio storage batteries. They heard about a couple of farm lads at Shou City, Iowa, who had developed a windmill charger. These boys had for several years been re-winding old automobile generators and attaching them to small windmill propellers, which they then sold to farmers for charging automobile batteries.

A dealer was soon made to have the boys build new windmill chargers which could be sold at a low price with battery radio sets. Their first order was for 50,000 windmill chargers. We happened to meet one of the officers of the radio company on the train not long ago. He told us the story and added that this farm invention had done a lot to boost sales.—The Country Home.

Spreading Beauty

The vast ultra-modern flats of Austria and Germany usually have bare, windowless sides which might be used for commercial posters. But an artist has altered all that, says Tit-Bits Magazine. He painted scenic designs on the side of one, and so enraptured were the people that he soon obtained other commissions. The craze caught on, and now dozens of houses have been decorated with ships, birds, vigorous figures in action, and all kinds of decorative futuristic designs. A few depict commodities, and they have given the artistic profession a bigger bill than it has received for a long time.

Fare for Fares

There is a thoughtful taxi driver who carries a needle and thread and a dictionary in his cab. He says that whenever two men get into his taxi they always argue about some word or other; hence the dictionary. The needle and thread are there because women often take taxicabs when they have a run in their stockings.

Artesian Wells Beat Drouth

When a drouth threatened their surface water supply the people of Harrisonburg, Va., went into the earth for a new one. This unusual water supply is an artificial subterranean reservoir fed by 12 subterranean streams.

'Fast Train' Goes 40 Mi. in 8 Hrs.

Passengers claim that the slowest railway service in the world is that between Buenos Aires and Tuburucaaya, Argentina, the fastest train on the line covering the 40 miles in eight hours.

Suspicion

"What is the principal business in Crimson Gulch?" asked the stranger.

"Let's understand each other," said Mesa Hill. "Are you a drummer or a detective?"

In the Woods

Visitor—Will I get any otter hunting here?
Native—Well, you won't get colder.—Pearson's Weekly.

Cars Crack Cathedral Dome

Street cars running near the cathedral in Florence, Italy, have caused Brunelleschi's famous dome to crack.

UPS AND DOWNS

Don't have any more opinions than are necessary.

The world is all selfish in the opinion of the selfish.

If a baby smiles in its sleep, it is talking with angels.

It takes the highest culinary talent to make good hash.

War is one place where human life is treated with contempt.

Can we be civilized unless we put our instincts in chains?

Where there is kindly feeling, injustices are easily put right.

If sheep apparel were "developed" it might excel the wax begonia.

Let people rattle their own family skeletons. Don't you ever do it.

An able-bodied sense of contempt would head off many a demagogue.

The possum provides the hunter both commercial fur and a dinner as well.

It is not until middle age that a man becomes interested in his destination.

Not one of us can really be a self-made man. Heredity has too much to do with that.

When you mind wants rest, you do not want to be in the vicinity of a "shoot mouth" man.

One's opinion of the human race seldom rises when he finds a chunk of chewing gum on his sole.

It takes mutual admiration to make conversation interesting; and that doesn't prove it is any account.

In the opinion of the rulers of states, marriage is never a failure if there are plenty of children.

It isn't the bitter words that hurt. It is the revelation of the heart bitter toward you that generates them.

If you want to make money, beat your brains to see if you can provide something that people want.

A youth with brains doesn't need to be taught much more than how to read. He'll learn whatever else he wants to know.

Science Calls on Animal and Reptiles for Cures

While the modern doctor scorns old wives' cures such as baked bats, newts, congress or fossilized shrews, he dispenses many medicines and antidotes today derived from sources equally fantastic. Consider the brains of the monkey for victims of infantile paralysis. These, crushed by the scientific chemist into a fine powder, have already saved hundreds of weakly children from the same fearful disease.

Since the discovery of the conulating power of snake venom, a dread has been lifted off the minds of countless sufferers from haemophilia, known as the disease of kings. Previously the least scratch exposed them to the risk of bleeding to death, while a tooth extraction, however great their agony, was unthinkable. Now a drop or two of venom on the wound clots the blood, bleeding ceasing immediately.

From the glands of sheep and cattle science has wrested insulin—the salvation of diabetic patients. Even bee stings now furnish Harley Street with an ointment which, as a salve for rheumatism, has few rivals.—Tit-Bits Magazine.

Koh-i-Noor Gets Annual Bath

The Koh-i-Noor, the most famous diamond in the world, recently had its annual bath. A dapper little man drove up to Buckingham palace in London. Five minutes later he emerged with two plain-clothes policemen. They jumped into the waiting taxicab and drove off to Commercial road, E. There the famous jewel was placed in the hands of one of the greatest experts in the washing and polishing of diamonds. Later in the same day the Koh-i-Noor was taken back to its safe near the queen's bedroom.

The Women in Iran

Women in Iran have always played a very important part in both the economic and political life of the country, even if they have not been in evidence socially. They have always enjoyed a much better position than many of their sisters in Europe.

U. S. Files Most Fingerprints

The largest collection of fingerprint data in the world now reposes in the federal bureau of identification of the Department of Justice in Washington. The fingerprint records of 5,154,254 persons were on file there July 31, 1935.—Scientific American.

He Can't Hurt Us

Trainer (encouraging his man)—What you've got to do is stick it and go for 'em, and you'll come through with flying colors.

Boxer (doubtfully)—Yes! At half-mast.—Royal Arcanum Bulletin.

Flows Up 20-Carat Gem

Flowing up a diamond of twenty carats in a field near Anantpur, South India, a farmer sold it for \$2,500 to a jeweler.

And Baby Found It

Mother—The baby is howling again. He gets his temper from you!
Father—I suppose so, for I can't see that you've lost any of yours.

Hawks Trained to Be Hunters

United States falconers are training hawks in an attempt to revive the ancient British sport.

SMILES

Bookkeeping

"I hear Jenn keeps a diary of all her quarrels with George."

"Really? A sort of scrap-book."

The Evidence

"Is your son bright?"

"He ought to be. He's burning the candle at both ends."

No Ifs or Ands

Sonny Boy—Say, Dad, what is meant by "the bone of contention?"

Dad—The jawbone, my son.

They're Off!

Counsel—Will you swear to it?
Bookmaker—I'll do more—I'll lay 6 to 4 on it!

That for Mama

"Has your son's college education been of any value?" "Oh, yes; it cured his mother of bragging about him."

More Economical

She—Darling, how could you live without me?
He—Cheaper.—Capper's Weekly.

Mistaken Identity

Barber—"Haven't I shaved you before?" Customer—"No, those scars are from war wounds."
