Mr. Walls was introduced by Lion Andrew Kendrick, Secre-tary of the Gatesville Industrial Foundation.

Sam Walls, 28, has been involved in the operation of Walls Manufacturing Company for almost 20 years.

Mr, Walls spoke to the Lions concerning the origin of the present Walls Manufacturing Mompany. George Wall, originally from Georgia, moved to Dallas prior to World War II and opened a retail men's clothing firm. During the War, Mr. George Walls bid on and received a contract to make work uniforms for a large airplane manufacturer.

Sam points to this contract as the beginning of the present firm and the work coverall is still a major item in the 'Walls Line".

The "heavy weight one piece suit" as Sam describes the original product is still "a big part of our business". "It is one of the easiest products to make" reported Walls. Sam pointed the coverall as the basic product with production

T'was a grim night indeed last Friday night for the Gatesville Hornets as they took a 46-0 beating from the Killeen 'Roos. The score didn't tell the whole story as the Hornets turned out one of their best performances this season. The bright spots on the Hornet team were playing on the offensive team. Gatesville standouts were quarterback Marshall Edwards; tailback Chris Bone; and split end Buddy Wiggins. For once the Hornets showed a noticeable improvement in offensive punch but were really ailing on defense. The one offensive problem was fumbleitus as usual.

The player of the week -- Buddy Wiggins offensive split end. Wiggins has the best pair of hands we've seen around this part of the country in several years. He made several great catches and must be one of the best pass catchers in 13AAA.

In basketball Gatesville has a great year coming up. The girls lost only three starters off a great team last year .. No matter how you look at it Gatesville might have two district crowns under their belt before the year is over.

This week in 13AAA football the only team in action is Del Valle. It's almost a sure bet that the district's number one team can come out victorious over Smithville. It should read Del Valle 18 Smithville 12.

What is America? What does this our country, stand for? Is America going to the dogs? Is today's youth all bad? The preceeding questions are ones that are asked quite frequently. The answer to these queries are rather simple. Literally, America is made up of a group

of states which are united for the purpose of protection and survival. These united states occupy a part of North America and several islands in the Pacific. The geographical America has always been looked upon as a concrete refuge from tyranny, intolerance, and suf-fering. This reputation, however, has been built on the symbolic and abstract ideals of our government and our people. The aforementioned ideals are ones which try to combat and eliminate strife caused by tyranny, intolerance, and suffering. America is not, I repeat is not, going to the dogs. There are plenty of what one would call good solid citizens who love their country and who are willing to die for it. The only trouble is, most of them are too kar away to be heard clearly, and the ones who can be heard from are afraid to take a stand because they don't really know if anyone else believes as they do. The protestors and draftdodgers are like inexcusable children with narrow minds and if only a few Americans would take a stand then maybe something could be done Finally, is today's youth all bad? No, quite a few of the
