DISHONESTY seems to have broken out like a rash among zovernment employees. We can't recall any period in our history when it was so popular. There are millions employed by our government and only a tiny percentage are crooks, but to the casual news paper reader, Washington is beginning to sound like Sing Sing. This column has always main-

tained that it takes real money to get a real man for a real job. Why should one who has the brains to make \$25,000 or more per year give up his business and take a \$10,000 or \$15,000 job in expensive Washington? The answer is-he doesn't Some few who have plenty of money put away, do go into politics probably because they can give their full attention to the job in stead of worrying about when the kid can have a new suit, or the wife a mink coat; and because they have usually made their fortune with their own brains-they are apt to stand out among their less sagacious fellows. The American taxpayer is aware

that the government is overmanned Probably two thirds of the present personnel would manage our affairs much better without the other third. If Mr. Truman would get rid of one third and give their salaries to the remaining two thirds, it would help enormously But don't expect that as long as the one third knows the way to the voting booth.) If we added another 50% of this total to their salaries we would make the jobs tempting o a more successful element and thereby raise our standards; and the resultant efficiency would without doubt soon eliminate the additional cost to the taxpayer.

When a man has to face the many miseries of trying to keep up with the Joneses on an insufficient income, a little easy money on the slde is a great temptation. We are very foolish not to pay salaries for government jobs-from President on down-which will attract the ha-+ brains in the country.

Elsewhere in the department there is a figurative two-headed executive-Mr. Manly Fleischmann, who acts in a dual capacity as director of the national production authority and as administrator of the defense pro-duction administration. The move toward elimination of price controls is growing, fostered by such organizations as the U.S. chamber of commerce, the national association of manufacturers, the committee for economic development and the American farm bureau federation. However, there is little indication that enough pressure can be put on congress to eliminate either wage or price controls at coming session next month. The fact is that OPS itself may inaugurate a modified plan to decontrol some prices, for a testing period, but will slap controls back on if the decontrols don't work.
