Soil Conservation Set-up Explained to Lions Wednesday

Hico Lions were fortunate this week by having present at their regular Wednesday meeting three representatives of the Soil Conservation Service. They were among nine attending a special school here that day, facilities for which were provided by Hico Pub Schools, and were introduced as his guests by Harold D. Walker, local vocational agriculture teach Dupree Sanders of Stephenville.

peaking for the trio which also included Garland Jones of Stephenville and Charles Reeves of Meridian, explained briefly that the Soil Conservation Service was a Federal agency, set up under the Department of Agriculture, and distinguished between it and the various soil conservation districts "We act in an advisory capacity only," Mr. Sanders said, "leaving up to individuals and local organizations the application of our findings and suggestions. Our goal is to help farmers and ranchers use each acre of land according to its capability and treat it with respect to its needs to aspermanent agriculture."

Elaborating briefly on this theme, he explained that SCS eaves it up to each individual to make up his own mind about applying knowledge gained through constant study, realizing that blanket recommendations do not

Bluebonnet Members Elect Officers and Plan Valentine Party

Election of officers and initial plans for having a Valentine Party Saturday night, Feb. 14 were the main topics presented to members of the Bluebonnet Country Club in open meeting Thursday night of last week. Formation of a policy of future operation also came up for discussion, as well as reading of the current financial statement and calling for dues by the club treasurer, Ellis Randals.

Officers were elected for the ew year upon suggestion of the retiring president, Clyde (Sandy) Ogle, who called for reading of the minutes at meetings of the board of directors since Labor Day, when the annual championship sandgreen tournament was sponsored by the club.

IT'S THE LAW * in Texas *

START SIMPLE TAX RECORDS NOW, SAVE FUTURE HEADACHES

There is no time like the present while the great battle of Form 1040 is still upon us, to start a procedure that will aid you with year's income tax calcula tions. That is to maintain a record of your income and outgo. Such a record can be simple and brief but it may save you tax dollars.

The average man who works for a wage or salary doesn't have to concern himself about keeping books and records-at least so he thinks. His employer keeps a re liable record of his earnings and Uncle Sam looks primarily to the employer for information on his proof of the cost of anything you've earnings and for the withholding of various taxes out of his wages.

But whether or not you run a business of your own, you have a partner who each year is claiming a substantial interest in your personal income. And the law requires that you keep books for him in case he ever asks for an account-

are paying it out in installments. It's likely that some day you may sell that house. When you do you'll want to be able to prove whether you realized a gain or a loss on that sale. If a gain in capital resulted, it probably will add to your income tax. If a loss was suffered, it probably will reduce your inome tax.

You may have made certain apital improvements on the house while you lived in it, but unless you can show what out-of-pocket xpenses you incurred while mak ng them, you may not get credit for them in your cost basis so as to prove that you had no capital gain or that you had a loss.

Or perhaps you received that little summer cottage on the lake as a gift from your father. If you show Uncle Sam not only the cost of improvements you made on it while you owned it, but also what its fair market value was at the time Dad gave it to you.

It may be that you are receiving an annuity on an insurance policy If so, do you know how that policy costs you and how much of that cost you have recovered tax-free to date?

There are many kinds of transactions you enter into that may some day affect the computation of your personal income tax. The best purchased is a receipted bill or canceled check.

(This column, based on Texas law, is written to inform--not to advise. No person should ever apply or interpret any law without the aid of an attorney who knows the facts, because the facts may Perhaps you own your home or change the application of the law.)

Young Bobby Hornyak inspects a new type of space chamber, but not one projected for flights into the ether. This is a working model of a cylinder in the famous Hemispherical Combustion Chamber Engine of the 1953 Chrysler. A feature of Chrysler Corporation's touring "New Worlds in Engineering" show, this model demonstrates how the greater air intake in the Chrysler FirePower V-8 Engine makes engine "Breathing" easier and thus provides more economical makes engine "Breathing" easier and thus provides more economical power. cotton. Before the crop could Let Us Worry About Your Freight He had to destroy the entire crop. This story clearly points up the potential destructiveness of the in-sect. In 1952 the pink bollworm cost us \$34.6 million. In 1942 only about 75 counties were infested. By 1952, the number had jumped to 261. Is that a threat to the coton industry or isn't it?

Last year, entomologists found the pink bollworm had doubled and tripled in the Vernon, Wichita Falls, Knox and Haskell County areas. The same occured in many other areas of the state. If I were a cotton farmer, a ginner or a cotton oil mill man, I would be concerned.

The cotton business has lost enough of its value the past 10 to 15 years. If the bollworm joins the boll weevil as a force of cotton destructiveness, then we might as well forget the rich crop that made the South the great empire that it is .- Glenn Shelton.
