The '57 Chevy can give lessons on taking curves and holding the road to just about any car going. Few cars at any price are so beautifully balanced and so smooth, sure and solid in action.

A car has to have a special kind of build and balance to keep curves under control. And nobody outdoes Chevrolet in that department! It "corners" with all the solid assurance of an honest-to-goodness sports car. Chevy doesn't throw its weight around on turns because it carries its pounds in the right places.

And if the road should turn upward, Chevy can take care of that nicely, too-with up to 245 h.p.*

Rep. John Lee of Kermit and Sen. Preston Smith of Lubbock, left to right above, were among the first of many Texas legislators to introduce one of the "Better Government" Bills sponsored by the Texas Press Association. TPA has prepared 15 Bills for legislative action. Each bill is designed to correct evils that exist in present Texas laws. "Had the TPA bills been in effect there would have been no veterans land or Duval County scandals," said Senator Smith. "Loopholes in present laws have made possible the scandalous events of the past few years, wherein public monies have been mis-appropriated," stated Representative Lee. The two Legislators are urging the public to back them in their determination to effect passage of the TPA Legislation. Lee's bill is HB-38. Smith's bill is SB-55. Both bills are known as The Mandatory Publication Act. They do not create any new publication requirements. But they do for removal from office of any public official who refuses to
