MORE BONDS NECESSARY TO SATISFACTORY ROADS.

If Wichita county is to have a satisfactory system of good roads it will be necessary to vote more bonds. There have been great increases in the costs of labor and materials since the estimates for the road system were made several years ago and what would have built fairly satisfactory roads then will not do so now. Traffic over much of the mileage planned has also increased, being ten or twenty times heavier over some stretches than was contemplated when the es timate on which the bonds were vot ed was made

But if more bonds are to be voted and better roads built, some action ought to be taken immediately so that the right kind of roads can be built with the money already voted. Most of the grading has been done and the bridges and culverts built for the road system as planned. It is very fortun ate that the grades and bridges have been built in a most substantial manner. The roads are now ready for the surfacing and it is here that it will be necessary to skimp if the entire road system is to be covered. The course of wisdom, it appears, would polled TAKE OVER be to vote more bonds without delay and to surface the roads as they should be surfaced.

This is a matter on which there should be prompt action after proper investigation.

When the deputy sheriff reported his list as summoned he reported to the court that one certain man had used insulting language to him and said the court could fine him, but he was not going to appear nor was he

was not going to appear nor was no going to service as a juror.

When the court called the names of the jurors, this man did not answer. The court ordered the clerk to issue an attachment for the juror and the sheriff to arrest him under the write of attachment, and bring him. the writ of attachment, and bring him

into court.
The man came before the sheriff could get to his place of business, and was fined \$100, and as the law directs he was cited to appear at the next session of the court and show cause why said fine should not be made

final.

Judge Scurry in speaking of the matter expressed regret that the court should have to take the action it did, but that it had gotten so that when a panel of 24 to 30 men would be summoned not more than one-third of them would appear. He states that under these conditions the sheriff would have to summons others and every week when juries were drawn it cost the county to pay for a day lost in getting a jury. "But that is not the worst part," the judge adds. "Phe utter disregard with which jurors utter disregard with which jurors treated a summons to serve on juries brought the courts of the county in disrepute and contempt, and from this time jurors when summoned must obey or take the consequences."
