

MORE THAN THREE THOUSAND RAISED FOR SALVATION ARMY FIRST HALF DAY OF CAMPAIGN

After only a half day's campaign, subscriptions to the Salvation Army Home Service drive to the amount of \$2,389.50 were reported when the workers met at noon Wednesday as the guests of the Wichita Club.

The team captained by G. C. Wood reported the largest sum, \$795, with Dr. Mike Walker's team running second with \$635 and W. L. Robertson's team third with \$450.

A number of the teams made no reports, the members having had no opportunity of working during the morning, but are at work during the afternoon.

The teams making reports at noon were as follows: W. L. Robertson, \$450; T. B. Smock, \$360; T. T. T. Reese, \$329.50; J. B. Bridwell, \$162; I. C. Wood, \$135; N. H. Monroe, \$100; Walker, \$635; Fred A. W. Hoffman, \$100.

Some discussion was raised as to the amounts assessed on the cards which are in the hands of the workers. It being stated that these assessments are too high in view of the quota assessed against this county.

The increased assessment is due to the fact that out of the counties south of San Antonio, the Gulf coast flood, and the northern counties are asked to make that amount up, said B. F. Johnson, county chairman. The campaign for this season, our quota has been raised from \$4,000 to \$12,000.

The regular business of the Wichita Club was suspended in order that the campaign workers could report.

Among the guests introduced were J. D. Farnell, of Vernon, representative of the Texas legislature from this district, guest of W. W. Gardner; William Viner, formerly of Tulsa, now in business here, guest of N. O. Monroe; Miss L. G. Hays, reporter, postmaster Claude, guest of Len Clark, superintendent of schools; and Rhea S. Nixon, president of the American National bank.

to do what I could. For in this movement every dollar is going to count and count heavily.

Mr. Wade spoke of the Corpus Christi disaster, and how because of this other sections of Texas are going to have to double their efforts and subscriptions, and how the work that the Salvation Army has done and is doing in the stricken areas is just another proof of the worthiness of the organization, and another reason why this drive for \$600,000 from Texas and \$12,000 from Wichita Falls, should be more than successful.

A speech from "Pa" Burdick was insisted upon and he spoke for a short time about the religious side of the work in France, and the rescue work in this country. He was introduced by B. F. Johnson as the "young man that 'Ma' Burdick took along to make the fires in France so that she could fry doughnuts."

He stated in opening that he would rather let Mrs. Burdick's talk be sufficient for the both of them, as he had been used to letting her do the talking. However, he recited several instances of the religious work which the Army had found time for in France, while filling the stomachs of the soldiers, and the care of some of the many rescues that had been effected at his various stations, during the fifteen years that he and his wife have been in France.

The following captains and workers will serve as soliciting teams: Willey Robertson, captain; Burton Stavros, Dan Hardy, G. Clint Wood, captain; E. W. Carter and Charles Popenohl. J. S. Bridwell, captain; John W. Thomas.

Dr. Everett Jones, captain. Dr. M. M. Walker, captain; C. W. Beavers and E. H. Eddleman. Tom Smock, captain; Jack Barnard and E. H. Halley. Fred Weeks, captain. T. T. Reese, captain; V. H. Shepherd and O. P. Maricle. N. O. Monroe, captain; W. E. Huff and J. C. Lewis. W. M. McGregor, captain; Judge Edgar Scurry and W. Y. Hammack. R. H. Collier, captain; Frank Griffin and R. S. Nixon. H. H. Bray, chairman; C. H. Reid and John W. Naylor. Dr. C. R. Hartsook, captain; P. A. Martin and John Good. N. H. Martin, captain; Dr. N. F. Grafton, J. W. Bradley and Hubert Harrison. Orrville Bullington, captain, and Lee Clark.

WOMEN TO ORGANIZE THURSDAY AFTERNOON Thursday afternoon at 3 o'clock the women's part of the campaign will be organized, the chairmen of the teams and the volunteer workers being called to meet at that time at the First Christian church. The women are to have Saturday as their campaign day and will have booths in the stores, banks and other places of business.

Saturday in this worthy cause are asked by Mrs. Smock to provide one of the team captains. The captains who were named at the Tuesday night dinner are: Mesdames J. W. Lee, L. Jetter, E. W. Nicholas, T. T. Harcasiano, N. L. Inge, W. K. Davis, H. L. Young, W. B. Chauncey, P. A. Martin, C. J. Barnard, C. Payne, W. M. Priddy, C. M. Miller, N. F. Grafton, N. H. Martin, L. E. Stone, C. F. Spitzer, G. W. Beavers, E. W. Carter, O. W. Hines, Charles Popenohl and C. R. Hartsook.

LOVE LETTERS ATTACHED TO DIVORCE PETITION Fervid love letters are attached to a petition filed in the 78th district court Tuesday in a divorce suit brought by Charles J. Beeler vs. Jessie L. Beeler.

James McQueen dies at hospital last night. James McQueen, employe of the Main Oil & Gas Company, died Tuesday night at the General hospital. Mr. McQueen was brought here from Burkburnett several days ago. He is about forty-five years old. He came to Burkburnett from Seattle, Washington. The

High School Principal Arrives from Waco; Has Splendid Record S. H. Rider, new high school principal to succeed H. E. Hill, resigned arrived in Wichita Falls Tuesday afternoon and closed his contract with the local school board. Mr. Rider was at the time he accepted the principalship of the Wichita Falls high school, head of the history department of the Waco high school, resigning there after having taken up his work for the term. He is a graduate of Baylor University, and also of Brown University of Rhode Island, and has done graduate work in the University of Chicago. Before going to Waco he was for five years principal of the Grigham high school. His record of successful work is such as to give the superintendent, Lee Clark, and the school board, much pleasure that they were able to secure his services.

BURKBURNETT CHILD DIES HERE TUESDAY Stenale Henrietta, six month old daughter of Mr. and Mrs. B. M. Seagraves, of Burkburnett, died Tuesday morning at 1 o'clock at the Arbonne Hotel. The baby had been brought to Wichita Falls a few days ago for treatment for intestinal trouble. The funeral was held at the cemetery chapel this afternoon at 2 o'clock. Rev. W. H. Wallace conducted the services.

BOLSHEVIKI CLAIM RED TROOPS OCCUPY THE TOWN OF TOMSK

LONDON, Sept. 24.—A bolshevik wireless message received today from Moscow says that red troops commanded by General Lubloff are reported to have occupied Tomsk, 500 miles east of Omsk, the All-Russian seat of government on the trans-Siberian railway line.

PARIS, Sept. 24.—The attempt by the bolsheviks to negotiate peace with Estonia and Latvia and indications that the Poles and the forces of General Kenkine, the anti-bolshevik leader in South Russia, soon may establish communication and cooperate their efforts in fighting the bolsheviks in the Ukraine have revived interest in the Russian situation among the peace conference delegates.

The refusal of the German general, Von Der Goltz, to obey the orders of the peace conference that he evacuate the Baltic provinces of Russia and Germany is the responsibility for his movements, leaves the conference for the moment in a helpless position, as there is no disposition to ask the Poles, who already are engaged, to expel Von Der Goltz and no other nation has forces available.

Reports received from Kolchak by the Russian committee in Paris give hope that the anti-bolshevik leader in the Omsk region has greatly improved his position on both lines of the trans-Siberian railway and that his armies against the bolsheviks are moving westward against the bolsheviks. Reports from the Denikine forces are favorable.

TO PROHIBIT STRIKES MEANS A REVOLUTION SAYS GLENN PLUMB

WASHINGTON, Sept. 24.—Prohibition of strikes of railroad workers would lead to industrial revolution, Glenn E. Plumb, appeared to oppose the Cummins bill which would return railroads to private owners and make strikes a misdemeanor.

This bill goes to the problem wrong end to," he said. "It is not protecting public interests, but private, and violates the constitutional privilege of the men. Two million workers can get by with a few million more."

Plumb does not believe labor would be justified in calling a general strike to force adoption of the Plumb plan.

In future, Plumb said, strikes will be used to reduce the price of commodities.

Senator Poindexter asked Plumb to tell what kind of revolution he expects if Congress enacts the Cummins bill.

Either the party in power in the government will be displaced or there will be such a total suspension of production that much worse things may follow," Plumb replied. "We don't want a revolution—we are striving to prevent it, but we know the forces underneath, and you may make us powerless to stop it if you pass the wrong kind of legislation."

Plumb predicted that if transportation rates are increased the deficit which the government is incurring will be increased instead of reduced. "Reduce rates if you want to increase revenues," he said.

SAYS BILL MEANS SLAVERY FOR THE RAILWAY WORKER

WASHINGTON, Sept. 24.—The anti-strike provision of the Cummins railroad bill is "an attempt to place shackles of involuntary servitude on railroad workers," Wm. Doak, vice-president of the Brotherhood of Railroad Trainmen, told the interstate commerce committee today.

"It is the boldest attempt at individual and economic bondage since the civil war and would create an industrial involuntary servitude worse than the slavery that existed prior to the civil war. I believe this proposed bill is contrary to the letter and spirit of the constitution."

The arbitration features of the bill would constitute the "meanest form of compulsory arbitration, and would place it under a political board under supervision of a political body," he asserted.

"We can not and will not accept it as a proper tribunal," Doak declared. "Voluntary arbitration is the only sort that this country ever used attempt to set up. This bill declares null and void all laws set up to protect labor."

P. J. McNamara, vice-president of the Brotherhood of Locomotive Firemen and Enginemen, declared the bill was a step towards making "serfs of loyal American citizens."

REPORT MICHIGAN CAN WEATHER TWO WEEKS OF STRIKE

DETROIT, MICH., Sept. 24.—Michigan's industries can weather a two week's steel strike—one longer than that might prove disastrous. This was the consensus of opinion among manufacturers throughout the state today.

At Lansing, Reo and Olds automobile plant officials reported themselves well fortified against a strike—"providing it is not too long a one." Buick and Chevrolet officials at Flint and others at Detroit likewise expressed their preparedness.

Few manufacturers expected complete suspension of shipments.

Unless there is a strike of lake carriers, there is no immediate prospect of curtailment of operations at any of the mines at Marquette Range because of the steel strike, reports from that district indicated today.

NEARLY BILLION DOLLARS LIBERTY BONDS RETIRED

WASHINGTON, Sept. 24.—Nearly a billion dollars of Liberty bonds have been retired and paid off by the government with loans returned by the allied governments and certain taxes which were paid in bonds themselves. The total of all issues of bonds ran to \$17,000,000,000.

Great Britain already has repaid United States and France also made a \$32,000,000 of the billions she owes the small payment. In all the allies owe the United States about ten billion dollars.

MINIMUM WAGE BOARD TO HAVE PUBLIC HEARINGS

AUSTIN, Sept. 24.—The Texas minimum wage board will hold public hearings at Dallas October 3 to 11, Houston 22 to 24, and Waco October 29 to 31, according to plans formulated at a meeting of the board here and given out today.

Inspectors, who have been working since the law to establish a minimum wage for women went into effect the latter part of June, have made reports on wages and living costs gathered in cities which are considered representative of all Texas conditions, says State Superintendent of Public Instruction Annie Webb Blanton, who is a member of the board.

The board, composed of Superintendent of Public Instruction Annie Webb Blanton, Labor Commissioner T. C. Jennings and J. H. Fowler, a member of the industrial section of the board. The board will hold hearings in other Texas cities following those outlined above.

ELEVEN WAR VESSELS TIED UP AT NEW YORK ACCOUNT SHORT CREWS

NEW YORK, Sept. 24.—Eleven United States war vessels are tied up at the New York navy yard without crews sufficiently large to man them, it was said today that as a result of the shortage of enlisted men and the possibility of many resignations because of salaries, among the officers, the annual fall and winter maneuvers of the Atlantic fleet may have to be abandoned.

CHARGE DESDEMONA BANKER AND BROTHER WITH EMBEZZLEMENT

FORT WORTH, TEX., Sept. 24.—Officers were filed at Eastland late yesterday charging Roy E. Smith, operator of a private bank at Desdemona, and president of the state bank at Sipe Springs, and his brother, cashier of the Sipe Springs bank, with embezzlement of \$150,000, both banks have closed. It is understood the directors will re-open the Sipe Springs bank.

BLACKSMITHS AND HELPERS AT DENISON ON A STRIKE

DENISON, TEX., Sept. 24.—Fifty blacksmiths and helpers employed by the Missouri, Kansas and Texas railroad here walked out this morning, claiming wage awards for certain work were unsatisfactory. It is said that unless a settlement is reached soon, the strike may spread over the entire system.

NEW MILITARY TANK EVEN SMALLER THAN LITTLE "WHIPPET"

WASHINGTON, Sept. 24.—A new military tank, even smaller than the "Whippet" used so successfully in France in the closing weeks of the war, is being produced as an experiment by the army ordnance bureau. Beyond the fact that it will weigh only three tons against six for the "Whippet," no details have been made public. The tank program of the War Department includes four thousand five-ton, 2800-ton, 10-ton, 20-ton and 267 twenty-ton tractors, 850 six-ton, 100 thirty-ton and 15 of new 3-ton tanks.

MEANEST MAN WIFE TESTIFIED

DAVENPORT, IOWA, Sept. 24.—William Lang was the meanest man, according to his wife, testifying in her divorce suit here today.

Mrs. Lange declared when she asked her husband to take her out for an automobile ride and a good time, he drove her to the cemetery where she might view the thousands of graves and select a site for her own resting place.

CHANGE IN SCHEDULE ON FRISCO RAILROAD

VERNON, TEX., Sept. 24.—The officials of the Frisco railroad has announced a change in schedule, effective Sunday, September 28, which will give Vernon a through train to St. Louis. The train will leave Vernon at 1:30 p. m. and will arrive in St. Louis at 7:30 on the morning of the second day. Leaving that city at 9:45 p. m. it will arrive in Vernon at 4:45 on the second morning. A plug to be installed between Vernon and Clinton.

REPORTS EIGHT TESTS IN HARDEMAN COUNTY

E. E. Frizell, of Quanah is here today. Mr. Frizell is head of the Frizell Oil Company, which is putting down two tests in the northwestern part of Hardeman county. He reports that there are now eight tests being made in Hardeman county, the wells being pretty well scattered over the county.

NO COMPROMISE IN THE LONGSHOREMEN'S STRIKE

SAN FRANCISCO, CALIF., Sept. 24.—With all hope for a compromise gone for the present the strike of riggers and stevedores along the waterfront was brought to the danger point today by the employment of 500 strike breakers—many of them negroes.

The employers, who have refused an offer of arbitration from Mayor Rolph, are advertising widely for non-union men.

The striking employes late yesterday adopted by unanimous standing vote a resolution that slapped the San Francisco Labor Council at the same time it rejected the only compromise proposition the employers are willing to make.

The resolution accused the council of "spreading the propaganda of the employers."

The longshoremen gathered in force along the waterfront today and the employers asked for further police protection. More police were sent. It was admitted the situation is serious.

TELEPHONE OPERATING

A VOCATION FOR WOMEN

The Southwestern Telegraph and Telephone Company's offices are good places for Wichita Falls young women to work, because:

- The wages are good.
- There is plenty of opportunity for advancement to supervisory and executive positions.
- There are various kinds of operating to be done, local, long distance, information, service observing, monitoring, etc.
- The female force is directed and is in charge of female executives.
- There is protection from favoritism and discrimination.
- There is protection of health.
- There is protection of morals.
- There is development of those personal characteristics which blend girlish charm with strong womanhood.

The Southwestern Telegraph and Telephone Company

"KID" GLEASON AND HIS CHICAGO CREW OF BALL PLAYERS HOPE TO WRECK PAT MORAN'S REDS

DECLARES THE SOX HAVE BETTER TRIO PATROLING GARDENS

By HENRY L. FERRELL (United Press Staff Correspondent) NEW YORK, Sept. 24.—Gleason has a better trio patrolling his gardens than Moran has. The outer defense of the White Sox doesn't rank with the greatest of the game, nor has it snatching attack of the Tiger outfielders. But in Jackson, Felisch, Leibold and J. Collins, the American Leaguers have a more formidable array of talent than Rousch, Neale, Magee and Duncan. As in the case of their infielders where they have a pair that fairly shout its class, both the Reds and White Sox have in the gardens a bulwark of strength in Rousch and Jackson. This pair embodies almost the maximum power with the bat, while in Rousch and Felisch there is a pair that is outclassed only by the great Tris Speaker in the range of operations. The most glaring weakness of Moran's club is in left field. It has bothered the great Red leader all season, and it is not until the arrival of the new outfielders that the problem seemed solved. With the arrival of Pat Duncan from the Southern League, his work has been close to sensational. But it is not until Moran will try a grown youngster in the big series. A smashing hitter, the league's leading batter and fielder who covers across the ground, Eddie Rousch outclasses Happy Felisch in center field. He has a fifty point advantage over the White Sox star in batting, has scored more runs, poked out more hits and is faster on the bases. The afternoon sun which floods the right field of the Cincinnati yard will drive Joe Jackson to left field for the series. Compared to Sherwood Magee he towers in strength over the Red guardian. Jackson is having one of his best years, batting around .324. While Magee's stick work amounts to .228, Moran has been resting the veteran for several weeks and he may come back to participate in the world's series. Eddie Rousch, who has made their sticks work for .298 and .259, respectively. Nemo Leibold and "Shano" Collins both get the call over "groovy" Neale. Batting only .241, Neale falls behind both Nemo and Shano, who have made their sticks work for .298 and .259, respectively. The quartette of Reds have stolen 82 bases against 45 for their opponents, in hitting the American League leaders have a unit average of .295, the Reds .261; the White Sox have scored 225 runs and the Reds 147. The Sox fielders have knocked out 462 hits, the Reds 325.

BRIEF SKETCH OF THE MEN WHO ARE EXPECTED TO STAGE BATTLE WITH CINCINNATI REDS

It is no team of "spring chickens" that Pat Moran is going to stack his Cincinnati Reds against in the world's series. Both in years and experience "Kid" Gleason has in the White Sox what can be considered a team of veterans. The main cog of the machine that weathered a heavy storm and capped the American League rag for him are real veterans at the game, while the majority of them have been on the "ups and downs." "Happy" Felisch, one of the bulwarks of the outfield is the youngest member of the clan. He is 25 years old. Gleason, gray topped with 54 years, is the senior member of the firm. Betwixt and between, as they say, are Eddie Cicotte 33, John Collins 32, Joe Jackson 32, Eddie Collins 32, Faber 31, Chick Gandil 30, Bill James 29, Claude Williams 28, Buck Weaver 28, McMullin 28, Eddie Murphy 28, Hey Schalk 27, Leibold 27 and Risberg 26. Brief history of the career of the American League champs follows: Edward F. Collins (second base) born in Millertown, N. Y., 32 years ago. Played three years with Columbia University before Connie Mack signed him in 1906. The White Sox bought him in 1915 for a reported price of \$50,000. He has a batting average of .331 for his major league career, throws right handed and bats left handed. George D. (Buck) Weaver (third base) was born in Stover, Pa., and is 28. He was signed by Cleveland in 1909 after a year with St. Mary's College and the Pottstown semi-pros. He was released to Saginaw in the Southern Michigan league and in 1910 played with Northampton in the Connecticut league and York in the Tri-State league. He went to the White Sox in 1911 and was released with strings to San Francisco. In 1912 he was recalled by the White Sox and has been a regular since. He bats around .360 right handed and throws right handed. Joseph Jackson (outfielder) was born in Brandon Mills, S. C., 32 years ago. He started in 1907 with the Greenville semi-pros. Connie Mack signed him in 1908 and he was sent to Savannah in the South Atlantic league in 1909. Was recalled to the Athletics in 1910 and sold to Cleveland. Later he was farmed to New Orleans in the Southern league and was brought back to Cleveland in 1911. The White Sox got him in 1915 in exchange for Roth, Klepfer and \$31,500. He worked in the shipyards during the war. He bats around .265. Arnold S. (Chick) Gandil (first base) was born in St. Paul and is 30. He started in 1906 with Amarillo, Texas, and Humbolt, Arizona. In 1908 he was signed by Shreveport in the Texas League and was drafted by the St. Louis Browns in 1909. He was released to Montreal by the White Sox in 1912 and then traded to Washington for Cunningham, Becker and Akers and \$3,500. In 1916 he was sold to Cleveland and ended with the White Sox in 1917 for \$2,500. He bats around .275. Harry Leibold (outfield) was born in Bentler, Ind., and is 27. He started his professional career in 1911 with Milwaukee in the American Association; was drafted by Cleveland in 1912 and released in 1913 to the White Sox for waiver price. He bats around .245. Oscar (Happy) Felisch (outfield) was born in Milwaukee and is only 25. He started with the city league of his home town in 1912 and went to Fond du Lac the following year. He was sold to the White Sox in 1914 for \$7,000. He is a .278 batter. Raymond W. (Ray) Schalk (catcher) born in Harvel, Ill., is 27 years of age. In 1911 he went from Taylorville to Milwaukee in the American

Sox in 1917 from the Vernon Pacific Coast League where he began his career in 1912. Edward V. Cicotte (pitcher) was born in Detroit and is 35. His career started in 1904 with Calumet in the Northern Copper league. He was sold to the Tigers in 1905, and released to Augusta in the South Atlantic league. Detroit recalled him in 1906 and he was later released to Indianapolis. From there he went to Des Moines in the Western league. Again Detroit recalled him and sold him to Lincoln in the Western league in 1907. Boston claimed him in 1908 and he pitched for the Red Sox until 1912 when Chicago got him on waivers. He won fame as the "whispering" artist and is one of the head set, cleverest pitchers now in the game. Claude P. Williams (pitcher) was born in Springfield, Mo., 28 years ago. He started in 1911 with Springfield and went to Nashville in 1912. Brooklyn signed him in 1913 and he was released back to Nashville. He was returned to Detroit in 1913 and was sent to Sacramento in 1914. He pitched with Salt Lake City in 1915 and went to the White Sox in 1916. Urban C. Faber (pitcher) was born in Cascade, Iowa. He is 31 years old. He first pitched with Dubuque in the "Three I" league where he came from St. Joseph's College in 1908. Pittsburgh drafted him in 1910; loaned him to Dubuque and later recalled him. He was released to Minneapolis in 1911 and from there went to Pueblo in the Western league. He was transferred to Des Moines and then sold to Chicago in 1914 for \$3,500. He served in the navy during the war. William Henry James (pitcher) is 26 years old. He came to the White Sox in 1917 for \$2,500. He started pitching

CHICAGO GOES AFTER THE ONE GAME NEEDED

CHICAGO, Sept. 24.—With the opening date of the world's series set and all seats for three games at the Chicago American League park sold, the White Sox today were out to take the single game needed from St. Louis to validate the arrangements. Eddie Cicotte, White Sox pitching star, pitched especially groomed to hurl a victory today and thus clinch the pennant. Of their five remaining games, Chicago needs but single game. Planning their hopes to a victory today, White Sox partisans were anxious Detroit to beat Cleveland, should Louis trounce the league leaders. With four games more to play a single loss would put Cleveland out of the running, and also give the flag to Chicago.

SALVATION ARMY TO RELIEF OF SUFFERERS AT CORPUS CHRISTI

"That part of Texas not affected by the great gulf flood disaster as was the southeastern tier of counties along the gulf, will have to increase their efforts and their subscriptions in this Salvation Army Home Service Drive," said L. D. Wade of Atlanta telephone, official who is on leave of absence from his company to manage the organization of the southwest district in this drive. Mr. Wade has been in Wichita Falls for several days assisting in the organization of the local forces, and spoke at the dinner Tuesday night at the Salvation Army Hall. The Salvation Army's work in the Corpus Christi disaster is a present and tangible plea for the generous assistance of the public in this demand. Mr. Wade stated, for while the campaign was just beginning, there came a great emergency and with characteristic speed and service the Salvation Army was on hand, 24 hours from the beginning of the disaster.

"On the eve of opening the Salvation Army Home Service Campaign," said Mr. Wade, "the Corpus Christi disaster has impressed upon every thing person in Texas the importance of attacking the work of raising \$600,000, beginning September 29, with renewed zeal. Twenty-four hours after this coastal city was devastated overseas workers and rescue assistants of the Salvation Army were on the grounds with food and clothing, saving lives and giving succor to the sick and injured. Again the Salvation Army goes to the front and meets an emergency with a spirit of self-sacrifice and devotion to duty, seldom equaled.

"Right in the midst of a campaign for funds so badly needed for its regular work in Texas the entire welfare resources of cash and workers are put at the disposal of the Corpus Christi relief committee. This great unforeseen disaster should serve to strengthen every county campaign organization. We have seen that calls for relief come unheralded and must be met. In view of what we have seen every campaign organization should be strengthened and sent to the field with the determination to overcome every quota. Money is now needed than was expected. Such disasters as that of Corpus Christi make rich men poor and poor people penniless and helpless.

"Wichita Falls has come forward and has pledged itself to raise through its campaign committees \$15,000 instead of the \$4,000 as first set. From Wichita Falls past records in such worthy calls I am convinced that this quota will be met."

HAVE A NEW PLAN FOR REORGANIZATION OF REGULAR ARMY

WASHINGTON, Sept. 24.—A new plan for reorganization of the regular army on the basis of a skeleton army corps, in each military department with the department commander also acting as commander of the corps, has been laid before Secretary Baker and General March, chief of staff. This is now being examined by a special committee of officers on duty here. Officers who evolved the plan say it would provide a means for rapid mobilization of six army corps, or of ten if the insular departments were included. In the event of war reserves drawn from the universal training system would be called out to fill up the units to fighting strength. All troops within a department would be placed under the department commander, to be organized into such provisional divisions or brigades as their numbers warranted.

The project is an alternative for the present War Department proposal to hold enough divisions intact to form a field army, but to organize the corps only when an emergency arose.

LAWSON AIRPLANE CONTINUES JOURNEY

WASHINGTON, Sept. 24.—The Lawson de luxe airplane with its sixteen passengers—some of them women, was ready today to fly to Dayton, Ohio, the next stop on its trans-continental journey to San Francisco.

JEWISH NEW YEAR OBSERVANCE BEGINS 8 O'CLOCK TONIGHT

Tonight at 8:00 o'clock the first of the religious services in observance of the Jewish New Year will take place, this New Year's Eve service to be held at the First Presbyterian church, corner of Tenth and Bluff, at 8:00 o'clock. Dr. David Goldberg will conduct the services. A cordial invitation is extended to the public to attend, and all Jewish families are especially urged to be present.

Tomorrow, September 25, is the Jewish New Year's Day, and services will be held in the morning at 10:00 o'clock at the Presbyterian church. Dr. Goldberg will have a sermon at both services, and the ancient Jewish service in commemoration of this religious holiday will be followed, it is announced. Tonight and tomorrow's services mark the opening of a 10 day period which terminates in the Day of Atonement on October 4, which is the most sacred day in the Jewish calendar. Dr. Goldberg has come here from the Great Lakes where he is stationed, being still in the government service, and will be here through the 10 days to have charge of the services for the congregation.

OKLAHOMA UNIVERSITY FOOTBALL TEAM PLANS A SUCCESSFUL SEASON

NORMAN, OKLA., Sept. 24.—Early athletic prophecies have it that the 1919 football season at the University of Oklahoma will be a notable one. Grid stars of former Oklahoma line-ups, some of them almost forgotten as athletes because of their service with the colors, are returning in time for fall practice, according to Coach Bennie Owen.

"Benny" James, winner of honors in the recent inter-allied field meet in France, heads the list of returning veterans. The big ex-center is expected to be at his best, either at his old position or to the right of left of the line. He has also done some excellent work as full back. "Tubby" Taylor, "Big" Tolbert, McLothlin and McDermott will return for practice. Ross Johnson, the 1917 squad's crack end, has announced he will be a candidate for honors on the new team. Captain-elect Dean; Deacon, tackle; Johnson, tackle; Ham, center and White, Swatek, Hardy and Tyler of the 1918 eleven will try for places on Owen's new team, with Quarterback Luster, Haskell, end, and Martin of Wagner added to contestants for places the season's future seems assured.

CARDINAL MERCIER TO ADDRESS CONFERENCE

WASHINGTON, Sept. 24.—More than 600 bishops and other prelates of the Roman Catholic church, representing every section of the country, were on hand to attend the opening session at Catholic University today of the conference called by Cardinal Gibbons. Cardinal Mercier of Belgium will address the conference and later perhaps participate in some of its discussions.

UNITED MINE WORKERS TO CALL NATION-WIDE COAL STRIKE NOV. 1

CLEVELAND, OHIO, Sept. 24.—The United Mine Workers of America convention delegates were scattering to all parts of the country today, determined to call a nation-wide coal strike on November 1 unless a satisfactory wage and working agreement is reached with the coal operators on or before that date.

The convention adjourned late yesterday after endorsing the wage and hour scale and clothing their officials with the power to call the strike. A flat increase of 50 per cent in wages for all classes of work, time and a half for overtime; a six-hour day and a five-day week will be demanded at the conference of miners and operators in Buffalo tomorrow.

International officers were bound by the action of the convention to negotiate but not to sign any wage working agreement. If the officers declare themselves satisfied with the agreement offered by the operators they must reconvene the convention in Indianapolis for ratification of the new scale. The scale endorsed by the convention also calls for the abolition of all automatic penalty clauses.

Little or no debate greeted the presentation of the report by the scale committee. Several of the clauses were discussed, but no opposition de-

veloped. Delegates to meet the operators represent the central competitive district, comprising Western Pennsylvania, Ohio, Indiana and Illinois.

The agreement negotiated for the central competitive district shall apply to other bituminous districts, the convention specified. Anthracite miners are provided for in the resolution, which promises support of the whole organization for the demands framed by the tri-state convention.

While nationalization of railroads was not written into the scale, the convention voted to have their representatives reflect the demands of the miners on that point at the conference.

Acting President John L. Lewis said "our work is done for the present. It is now up to the operators."

CLAIMS FOR THE COTTON TAKEN OVER BY BRITISH MUST BE FILED SOON

WASHINGTON, Sept. 24.—The British embassy in a statement today gave notice that all outstanding claims resulting from cotton cargoes taken over by the British authorities during April

and May 1916, while enroute from United States ports to neutral European countries, must be filed before next January 1. The claims are to be presented to the British board of trade, purchase department.

NEW APPLICATIONS MUST BE MADE FOR WHEAT MOVEMENT

GALVESTON, TEX., Sept. 24.—Notice to grain shippers that all applications for permits for movement of wheat to Galveston and Texas City are cancelled and that new applications must be made, has been forwarded by J. W. Daley, associate member of the Southern Export Committee.

In this connection it is also announced that applications for permits for grain in distress in Texas and Oklahoma, that is grain that is not and cannot be properly stored, will receive first consideration.

Definite relief for the congested grain situation in Texas is promised early in October in the large number of ships which will be available for loading here and at Texas City. Detailed instructions regarding application for permits for moving grain have been mailed to shippers in Texas and Oklahoma.

FARM CONGRESS TO HAVE CONFERENCE DELEGATES

KANSAS CITY, MO., Sept. 24.—The International Farm Congress will have five delegates at the industrial conference in Washington, October 6, despite failure to secure representation through request on the administration, according to W. I. Drummond, a director of the Congress.

Telegrams sent President Wilson and Secretary Taft more than a week ago, asking them to seat five farm congress delegates in the industrial conference, are as yet unanswered, according to Drummond.

He stated the demands of the Congress will be stated again to the administration, "but in any event we will send our five men there with instructions to be seated and obtain recognition, if possible."

SEVERAL INJURED IN COLLISION OF TRAINS

ALBUQUERQUE, N. M., Sept. 24.—The collision of westbound passenger train No. 1 on the Atchison, Topeka and Santa Fe near Kennedy, N. M. with a light engine yesterday tore up a considerable stretch of track and eastbound trains were held here until this morning.

Both engines were badly damaged and three baggage cars derailed. Among the injured passengers were Mrs. Frances Whitworth, Little Rock, Ark., leg bruised, and Myra W. Shaw, Fort McPherson, Ga., nose broken.

FACE ERA OF ACTIVITY.

The next few years will see a number of great public improvement campaigns under way and on the road to completion in Wichita Falls, in Wichita county and in this section. In Wichita Falls many miles of street paving must be laid, a city hall large enough for the needs of the city's business built, new parks laid out, additional sewer lines laid, a city abbatoir built and many other improvements made. In Wichita county a system of good roads must be built and in adjoining counties road building campaigns must be gotten under way. The damming of the Big Wichita River and the building of an irrigation system in the valley and a great water system for Wichita Falls are two other great projects that must be brought into realities. The foregoing are some of the public improvements that are now in sight. Others will develop with time and the possibilities for private enterprise are practically limitless. Leaving out of consideration the oil industry the future in Wichita Falls will continue to appeal to men of enterprise and ability as it always has done, and the offices of aldermen in the city of Wichita Falls and commissioner in the county will call for the best business ability in the county.

MUST ELIMINATE I. W. W.

Charges have been made that William E. Foster, secretary-treasurer of the steel strikers' organization committee, has been active in I. W. W. propaganda. Mr. Foster will be questioned about this by a congressional committee investigating the steel strike when he is called before the committee this week. I. W. W. affiliations would weaken the cause of the strikers not only with the general public but with the leaders of organized labor through out the country. The hardest fight that leaders of union labor are having to make in this country today is not a fight against their employers or against capital but against the I. W. W. and syndicalism within their own ranks. And it should be said that they are fighting these tendencies wherever they appear. They are standing for order and for American institutions. In this they are not wholly influenced by idealistic motives; they know that the very existence of labor unions is threatened by the I. W. W. and syndicalism. If the steel strike is to succeed in gaining recognition for organized labor in that industry it must free itself of leaders who have any I. W. W. affiliations.

NOT FORGETTING THE PLUMS.

that their dreams for carrying the state for the G. O. P. come true. The program will doubtless include resolutions for reservations to the peace treaty, for making the tariff the leading issue in 1920 and for the protection of American lives and property in Mexico. But really the party ought to get back next year some of the republicans who have been voting in the democratic primaries in recent years. Next year is presidential election year. There is always the chance that the republicans will elect a president. In that event the boys will want to be among the faithful when the plums are handed out.

TANKAGE ENROUTE FOR BURK SENATOR RIVER LAND TEST

Tankage is reported on the way for the Burk Senator river bed test, which has furnished the interesting developments of the past week. Information as to when the well will be completed is not available from the offices of the company. Visitors to the well continue to be enthusiastic over the prospects for good production, and reports from the well yesterday were that there was an intermittent flow. Interest in Oklahoma is increasing because of this river bed excitement and there is an increased demand reported for Tillman county acreage. Drilling activities will probably be increased considerably in a short time, though at present there are few tests drilling. The Fisher-Walkey test has been slowed up waiting for 12-inch casing, and is still only a few hundred feet deep. All tests on Indian lands must be drilled 2,500 feet, unless oil or gas in paying quantities is found at a lesser depth, since the government puts this proviso in all leases.

REPUBLICANS DISCUSS PLANS FOR FULL TICKET IN CAMPAIGN OF 1920

Plans for having a full ticket in the field in 1920 in every county and precinct in this congressional district were discussed at a conference Wednesday by the principal Republicans of the section, meeting with W. P. Carey and party who are touring the state as representatives of the Texas Republican council in their interest of the 1920 campaign. "We not only expect to have a full ticket in the field, but we expect to elect them," said O. P. Maricle, county Republican chairman, in discussing the conference. "We believe that the dissatisfaction with the Democratic administration in such that Texas is ripe for a Republican victory."

Similar plans were formulated at a meeting Tuesday at Amarillo, when a committee of 25 were appointed, with W. C. Kenyon as chairman, to see that a full Republican ticket was brought forward throughout that Congressional district.

A sweeping Republican victory in Texas in 1920 was predicted at the Amarillo meeting by J. L. Vannatta, a prominent citizen and one of the Republican leaders at that district.

The issue of a protective tariff is expected to be revived as the chief Republican issue in Texas in 1920.

EXPECT APPROVAL OF HIGHWAY BONDS BY ATTY. GENERAL

FOR A TIME IT WAS THOUGHT POSSIBLE THAT ELECTION WAS ILLEGAL.

NEW LAW ON THE SUBJECT

County Attorney Davenport Expects to Go to Austin for Approval at Early Date.

Fears that the \$1,500,000 road bonds of the county, which were voted several months ago, would be refused approval by the attorney general's department because they did not conform in minor details with the wording of the law, were dispelled at a conference between Judge R. E. Huff and County Attorney John Davenport Wednesday.

County Attorney Davenport will depart for Austin with the view of getting the bonds approved just as soon as he receives the transcript of the procedure. There now seems to be no doubt but that the bonds will be approved, issued and sold.

However, for a fortnight fear that another election would be necessary to legalize the bond issue has been manifested at the courthouse. Nearly two weeks ago County Judge Jones and Judge Yeager discovered that the law, relative to bond issues had been amended by the legislature in 1907 to provide that when bonds are voted the ballots also shall bear provision for the levying of taxes to pay the interest and sinking fund on the bonded debt. Ballots in the good roads bond election bore no such wording as "For the levying of a tax, etc."

Ballots in that election, in fact, all the procedure incident to the election, were prepared exactly as in the previous highway bond election when \$750,000 was voted. In fact, the identical wording appeared on the

FOR RENT

Two excellent office rooms to reliable parties only. Inquire Livingston Bldg., 513 Seventh Street.

ballots in both elections with the amount of money only being changed. At the time of the election it was not known that the law had been amended.

Judge Huff and County Attorney Davenport have concluded that the amendment does not apply to bond issues in which the entire county takes part and benefits, but is for subdivisions of a county where the whole county is to pay off the bonds but only a part of the county benefits.

Until Judge Huff's return from California Tuesday no decision could be reached as to whether the election was legal or whether it would have to be held over again. No one would authorize a statement, as to either the validity or invalidity of the election and efforts of a Times reporter to learn the exact status of the \$1,500,000 bond issue situation proved futile, until the conference Wednesday.

Martin D. Rowe has returned from a two weeks trip to Shreveport and other Louisiana points.

MISS HAMMER IS SPEAKER TODAY AT TEACHERS INSTITUTE

Miss Laura V. Hammer, postmistress at Claude and prominent in club circles of the State, was the out of town speaker at the Wichita Falls Teachers Institute this morning. Other addresses were made by E. C. Hall, superintendent of the Wichita county schools, and by Rev. J. L. Sewell, pastor of the First Christian church. The routine reports of the committees were made, according to the scheduled program.

This afternoon the teachers are being entertained with a reception at the Y. W. C. A. recreation room. Owing to the postponement of the address of M. H. Moore, superintendent of the Fort Worth schools, there was no session of the institute this afternoon. Mr. Moore will be in Wichita Falls Thursday, his arrival being delayed one day.

Cletrac TANK TYPE TRACTOR

—More kinds of work
—More days in the year...

A Million American Farmers Can Profitably use This Tractor Twelve Months in the year

Rollin H. White, the well known automotive engineer, designed the Cletrac Tank Type Tractor to do most of the work formerly done by horses and mules—to do it better, quicker and cheaper, and do it 12 months in the year.

That is only the beginning of its usefulness. It goes through with the entire preparation of the seed bed, from plowing to seeding. And in addition it reaps, binds and threshes, hauls, cuts ensilage, fills silos and does many of the numerous other chores always necessary about the farm.

It does far more than merely plow.

We can convince you that the Cletrac is the ideal, all-purpose tractor. Call and see it today. Immediate delivery.

SOMETHING OF THE ONLY COLONY THAT AMERICANS CLAIM

WASHINGTON, Sept. 24.—Liberia, whose president-elect now is touring the United States, is the subject of the following bulletin from the National Geographic Society:

"The African republic, America's only colony, has an area equivalent to that of Kentucky, and a total population estimated to be greater than that of any one of 30 states of the union. But of these 2,000,000 or more inhabitants only about 50,000, of whom one-fourth are of American origin, may be considered civilized, and take a part in the government.

"Liberia is situated on the west coast of Africa at the point where the coast line makes the great bend to form the Gulf of Guinea. Its position puts it directly on line of ocean communication between Europe and South Africa and points reached by way of Cape Good Hope.

"Its southern boundary is its Atlantic coast line of some 350 miles. On the west is the British colony of Sierra Leone, where futile attempts at colonization were made before Liberia was reached, and on the east and north are French possessions of the Ivory coast and Niger basin regions.

"For some 40 or 50 miles back of its coast Liberia has been cleared and developed, but from that imaginary line inland there are dense forests, primitive people, and Sir Henry Johnston encountered beasts, birds and reptiles living today which, he wrote, are found fossil in Miocene formations of France and southern Germany.

"Thus there is the contrast of one of the most unique experiments in political annals—Stevenson referred to Liberia as 'a footnote to history'—amid the heat known region of the erstwhile 'dark continent.'

"Planned as a reparation for the seizure of its natives as slaves, and at first a transplanting of a far-flung race once more in their native soil, the beginnings of Liberia had many contact points with early American history.

"It will be recalled that the movement for emancipating slaves had its beginnings a year after the Declaration of Independence was signed, with the abolition of slavery in Vermont, and that, as early as 1808, the importation of African slaves into this country was prohibited. Meanwhile George Washington having set the example, many slave owners made provision in their wills for freeing their human property.

"Thus it came about that the freedmen's problem antedated the Civil

War by half a century and Henry Clay presided over a meeting in Washington, D. C., in 1816 to form a colonization society. Bushrod Washington was the first president of this society, formally organized on New Year day in 1817, and after several expeditions had met with misadventures through epidemics and opposition of natives, the Rev. Jehudi Ashmun, in 1821, founded Liberia.

"The country's name, signifying 'Land of the Free,' and that of the principal city, Monrovia, in honor of the then President of the United States, are variously attributed to Rev. Ralph R. Gurley, Ashmun's friend and biographer, who drafted the first Liberian constitution, and to Robert G. Harper, of Baltimore, Md., a patron of the colonization movement.

"Within a decade of Ashmun's arrival the American population had risen to nearly 1,500, a daily newspaper had been started, and a code of laws was in practical operation. Originally the Portuguese and the Dutch had sought gold, pepper and slaves from Liberia. Today, as then, it has a split, undeveloped, resources, both mineral and agricultural. But before the war it exported goodly quantities of rubber, palm oil, fibre, coconuts, and ivory.

"Liberia is asserted to have one of the hottest climates in the world, and few areas have more rain. The yearly fall amounts to nearly 13 feet of water.

"The colonists declared Liberia an independent republic in 1847, and it was recognized within a few years by nearly all countries except the United States. Previously there had been a split, and Maryland, now the southern county of the republic, was a rival state to Liberia. It had its inception from the state of Maryland, in the United States.

"Ten years ago President Roosevelt sent a commission to Liberia to investigate conditions. That commission's report resulted in negotiations for an adjustment of Liberia's debt, and placing of United States officials in charge of Liberian customs collections. The following year the American government, acting in agreement with England, France and Germany, assumed supervision of finances, military organizations and boundary questions.

"German merchants offended the chief executive of the republic in 1913 and out of this incident a quarrel developed which resulted in two German gunboats forcing an apology from the president. But the president retaliated by giving English traders special privileges and in the World War Liberia cast her lot with the Allied nations. The government of the republic is modeled after that of the United States.

"Now that the stream of colonists has long since stopped, the future of Liberia lies in the natives, ranging from barbarity to the verge of civilization, but practically all splendid raw material for civilizing influences.

"There are no pyramids in Liberia, and some tribes, such as the Mandingos, are fine physical specimens, with

THREATEN ENGLAND WITH NATION-WIDE RAILROAD STRIKE

LONDON, Sept. 24.—Great Britain today was threatened with a nationwide railway strike.

After a meeting of the executives of the national union of railway men today, James Henry Thomas, general secretary, issued a statement announcing that an ultimatum had been sent the government rejecting its offer of wage and working conditions.

Thomas intimated that unless a favorable reply was received by noon tomorrow the men would be ordered to cease work.

AMARILLO REPUBLICANS FAVOR RESERVATIONS IN THE TREATY OF PEACE

AMARILLO, TEX., Sept. 23.—A resolution favoring reservation to the treaty of peace property safeguarding American rights was passed at a meeting of prominent business men here tonight. Recommendations were made to the Texas Republican Council for making the reservation permanent, issued in the campaign in Texas in 1920. The conference was called to meet W. P. Gage and party who are touring the state in the interest of the Texas Republican Council.

W. C. Kenyon was appointed chairman of a committee of twenty-five to organize the Republicans in this congressional district and see that a full Republican ticket is put in the field in every county and precinct in the district. J. L. Van Natta, prominent cattleman, predicted a sweeping victory for the Republicans in this congressional district in 1920.

Mr. Gage and associates will hold a meeting at Wichita Falls Wednesday.

FUND SUBSCRIBED FOR FOOTBALL EQUIPMENT

A total of \$185 was subscribed to the high school's football equipment fund in an hour's time Monday. Sufficient money now has been secured to purchase uniforms and equipment that the high eleven will require.

Contributions to the funds for equipment were as follows:

M. J. Basham, \$1; C. W. Reid, W. McGregory, J. L. Arr, C. W. Snider, W. R. Ferguson, F. P. Timberlake, H. P. Welton, Dr. R. H. Graham and H. H. Friedly, \$5 each; G. C. Wood, \$10.

HIGH SCHOOL STUDENTS AT EL PASO ON STRIKE

EL PASO, TEX., Sept. 24.—More than 300 high school students were on strike here today, following orders from Principal R. W. Fowler that students sign an obedience pledge or quit school.

Students paraded through the city yesterday, wearing Red emblems. Red has been adopted as the strikers' color. The school board has backed Fowler in his stand, announcing schools will be closed if the students refuse to give in.

Embargoes on paints and varnishes do not worry us, we just received a car load from Cook's Paint & Varnish Co. Tank paints and etc. for the oil people. Service. W. E. Thomas Lbr. Co., Park. 112-422p

W. E. Thomas Lbr. Co., Burkburnett, Texas, has received a car load of Cook's Paint and Varnishes, including tank paints and etc. for the oil and refining trade. 112-421c

The Cuticura Trio Is All You Need For Your Skin

Bathe with Cuticura Soap to cleanse and purify the pores. If signs of pimples, redness or roughness are present smear gently with Cuticura Ointment before bathing to soothe and heal. Finally dust on a few grains of the exquisitely perfumed Cuticura Talcum. It takes the place of other perfumes for the skin. They are all you need for all toilet purposes.

The Soap, Ointment and Talcum \$1c each everywhere. For sample of each free address: "Cuticura, Dept. 77, Malden, Mass."

FOOTBALL FAVORITES IN MISSOURI VALLEY ELEVEN

KANSAS CITY, MO., Sept. 24.—Missouri Valley colleges and universities never experienced such a return of former football stars to the game in one year, hardened as so many of them are by a year or more of army life, as is indicated in the reports of coaches and athletic directors on the prospects of the coming season.

The S. A. T. C. organizations last year developed many tried players, most of whom, of course, will return to the same schools for academic work this year, and will be available for the football eleven. But many of the small army of returning players,

fresh from athletic competition in France and in camps in the United States, are men whose names were known to football followers in the valley during the seasons of 1916 and 1917. This latter prospect alone is sufficient to indicate keen competition for state and valley championships.

For the first time in years stare will compete for practically every line and backfield position on most of the valley conference teams. Kansas University, claiming the expected return of 17 letter men, Nebraska, Washington University, Ames, Oklahoma and the Kansas Aztecs, are confidently asserting that the 1919 season will show the fastest teams ever developed on those gridirons.

Drake and Missouri Universities haven't the same definite information

on the return of letter men claimed by the other schools in the conference, but even Drake and Missouri are looking forward to the best seasons in their football history.

Football coaches frankly admit they have no advance opinions to give on the probable outcome of the valley season, inasmuch as such an unusual situation in all probability will upset any predictions made now. One thing they do know—not in all the years of valley football have so many good men been available, and they unanimously predict football's banner season in the Middle West.

Cook's Paint and Varnishes for the oil and refining and all other trade, in car load lots at W. E. Thomas Lbr. Co., Burkburnett, Texas. SERVICE 112-421c

Will Buy Oil Wells In North-west Field For an agreed number of barrels of oil in pipe line or storage—or paid for at an agreed price. You get the full benefit of every barrel of oil your property produces until it is paid for in full. This will not interest the oil well owner who is running all his oil at the posted price— It should interest hundreds of well owners who are selling little or no oil—while a hundred thousand barrels daily are being withdrawn from the "lemonade glass", by others. We want firm offers on a definite, reasonable basis. With such we can surely do business to our mutual advantage and profit. See— H. L. FAGIN Room 205 Westland Hotel

How Track-Master Builds Street Car Track

Monster Machines makes Operation One of Days instead of Weeks as of Old

"O H, heavens!" sighed Mrs. Brown, who is a very tidy housekeeper, living on a street traversed by car tracks, "the street railway company is going to fix the track. They'll be all summer here, hammering and pounding, and the dust will get all over everything."

But Mrs. Brown was wrong. For all summer is no longer required to repair a line of car tracks—not in the modern way, and the neighborhood does not have to become accustomed to a noise like that of a boiler factory operating day and night.

There was a time when the reconstruction of a section of track meant the spending of a long period of time, the raising of an immeasurable quantity of dust and dirt, and the creation of raucous noises which made enterprising boiler works sound like inquisitive amateurs at the art of disturbing the peace and quiet of a community.

That time has passed. Its passage has been effected by the introduction of time and labor saving devices on track reconstruction jobs, so that now the replacing of worn-out track is not the prolonged matter it once was. Nor is it the noisy and dusty job which was the dread of countless Mrs. Browns.

The preliminary steps in track reconstruction is the laying of switches to provide for the continuous operation of the cars during the course of the work. Where the line to be repaired is a double track, temporary switches are installed at both ends of the section upon which work is to be done, and the cars are made to use the single untouched track for travel in both directions. If this is not done, then the cars are rerouted one way over the nearest adjoining line and allowed to continue to the run the other way on the untouched track of the section undergoing reconstruction. In the case of single tracks the cars are rerouted or else a temporary track is laid on the surface of the street and the service continued over this improvisation.

From the use of this temporary track the idea of the traveling switch was obtained, a device which is the marvel of passers-by and the greatest of time savers for the company.

Not long ago a certain trackmaster was laying some new tracks. The situation was one where only a single track occupied the street and the cars could not be rerouted over any other line. The usual method of procedure was employed. A temporary track was built on the street for a distance of several blocks, and the cars used it to pass around the portion undergoing construction. When a section was finished the temporary track was taken up and moved to the next section until the job was completed.

It was while attending to this job that the idea occurred to him to adapt the temporary track to use when he was working on double track lines. Upon thinking over the matter, he saw the utility of his idea and proceeded to put it into practice.

Massive Machine Breaks Rails With Very Little Effort.

After the traveling switch has been installed the rail breaker advances into the so-called dead area of track and begins to pull up the old track. The rail breaker is an ordinary work car with the powerful machinery for breaking the old rails, located at the rear end. This car advances over the track, pulling up the rails and ties like an army retreating and destroying the road behind it.

Protruding from the rear end of the car are two massive vertical steel beams separated from each other by the width of the track. The lower ends of these beams taper to a fairly sharp edge which rests against the track. At the upper end of each beam is a wheel, about two feet in diameter, over which a 3/4-inch steel cable operates. The two beams are connected, of course, by iron tie beams, and are so constructed as to be elevated and lowered from and to the surface of the rail by compressed air.

The cables which slip over the wheels at the tops of the beams terminate in heavy steel jaws large enough to grasp the rail. At the start of a job a complete severance must be made between the rails to be taken up, and the end of the untouched portion of the tracks. At the point of this severance on each rail the steel jaws of the cable are grappled on the flange

of the rail, the vertical beams of the rail breaker are lowered against the track and a powerful electrically driven drum begins to wind in the cables. The cables become taut and gradually the resistance of the rails decreases and they come up, dragging ties and paving bricks and concrete with them. As the rail starts to give way at the point where the jaws of the cables grapple the flange the beams press harder and harder upon the tracks. There is a snap. The 6-inch or 8-inch rail is broken in two as you might snap a piece of steel spring by trying to bend it double.

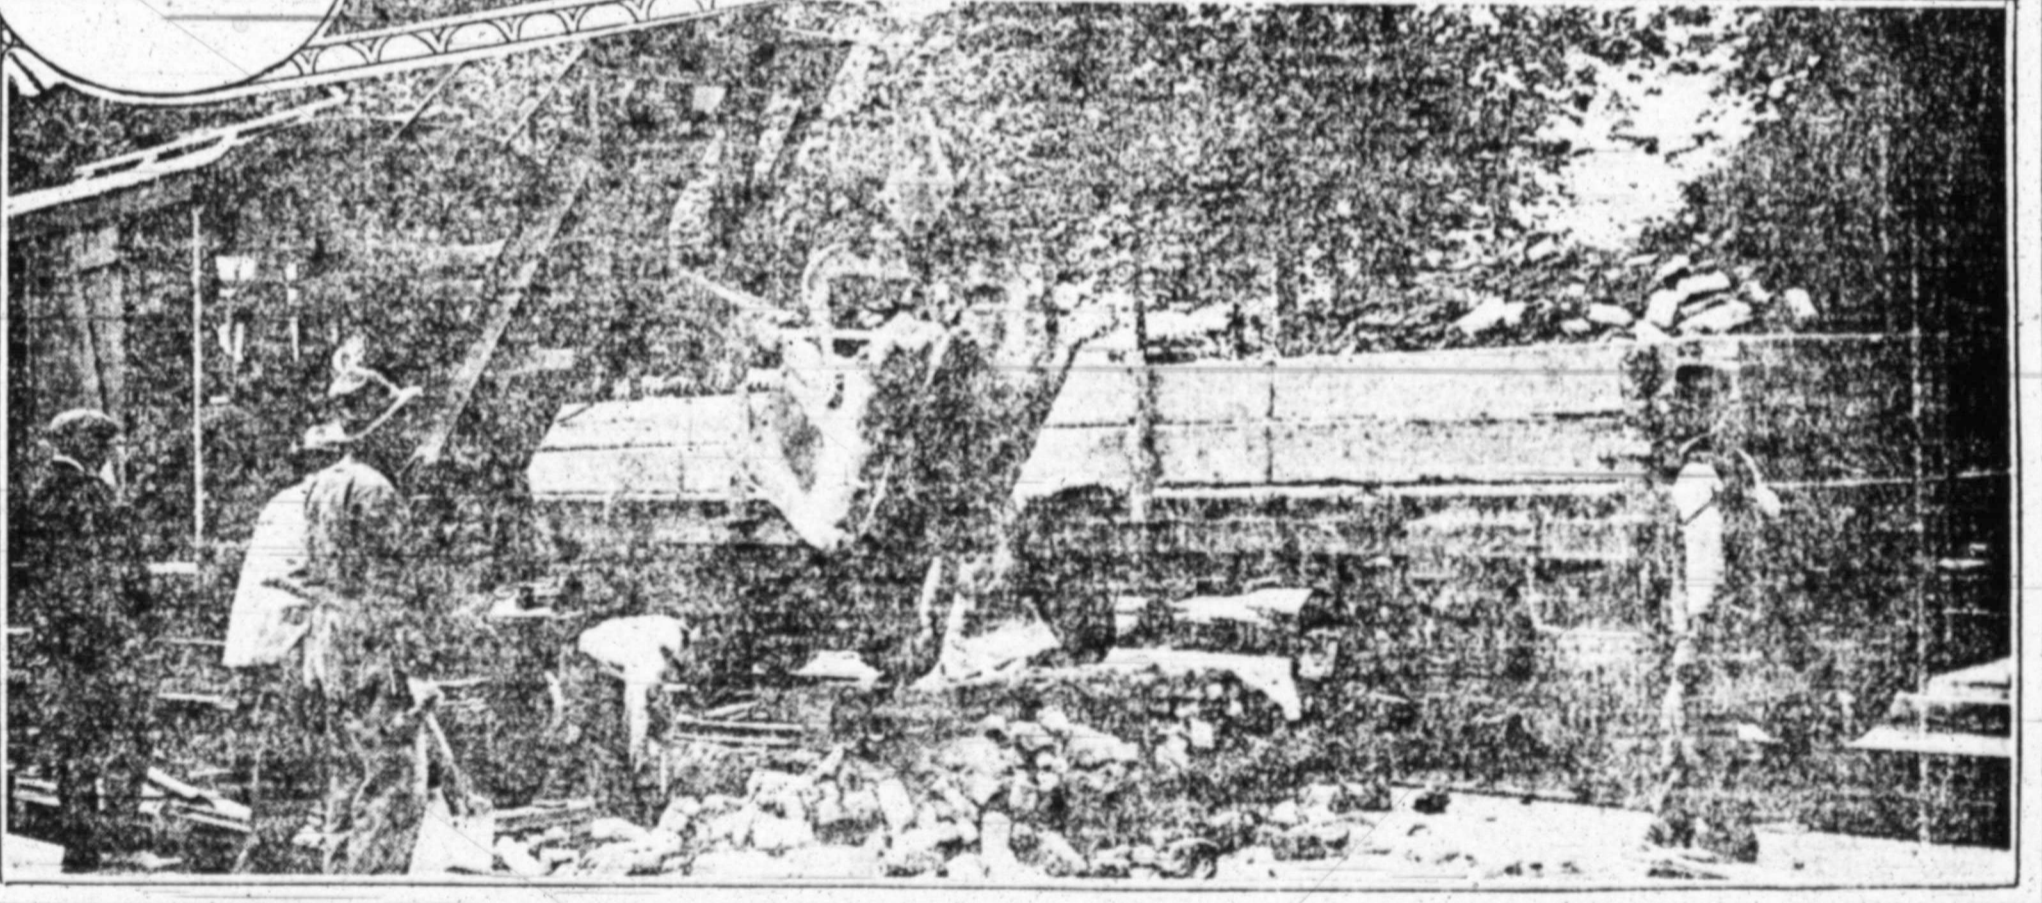

The rail is broken and pulled up in lengths averaging six to eight feet. The rail breaker goes gruntingly about its work, snapping the heavy steel track from the point where the new track is to be laid to the point where the traveling switch again hooks into the old track. There it stops. In between the two points the street looks as if it had been churned by an earthquake. Rails, ties, bricks, steel rods lie in a jumbled mass like a furrow turned by the blade of a gigantic plow. The switch laid on the surface of the street is the only means of maintaining continuity on the line.

Close behind the rail breaker follows the automatic shovel. At the start a small area must be dug out by hand in order to permit the entrance of the automatic shovel into the ditch which is to hold the roadbed. The shovel has its own track, three small sections of it, upon which it operates. These sections are laid and the shovel moves off the old track and onto its own special rails, which it never leaves until it has dug the whole length of the track under repair. This shovel always operates on two sections of its own light track, and the third is always free to be brought from the rear to the front, insuring continuous progress.

In the space between the shovel and the rail breaker a grizzled veteran of long years' labor on the tracks cuts the steel tie rods which extend between the rails. These are cut not by an edged tool, but by an oxyacetylene burner which rapidly sears its way through the steel. In this manner the rails are separated from each other, and a gang of negroes carries the separate lengths of rail and the ties which are also pulled up by the rail breaker to a position at the side of the street.

Then follows the automatic shovel, also electrically driven, scooping up the loosened clay and bricks and stones, digging out a level ditch for

THE RAIL BREAKER PULLING UP RAILS, TIES AND THE PAVING OF THE STREET

AUTOMATIC SHOVEL, SCOOPING UP DIRT AND BRICKS AFTER RAIL-BREAKER HAS PULLED UP TRACKS THE DIRT CAR IS STANDING ON THE TRAVELING SWITCH

the new roadbed, and—here's where the great utility of the traveling switch enters in—deposits the dirt in the work cars, which stand alongside on the temporary track or traveling siding.

Automatic Shovel Follows Rail Breaker.

An automatic shovel, which one interested onlooker called "an electric steam shovel" because of its similarity to steam shovels, advances and scoops up the debris loosened by the rail-breaker, dirt cars standing on the track receive the shovels full, and when loaded to capacity depart and let another and an empty car move into the siding.

The dirt is handled only once, where without the automatic shovel and the work cars on the movable track alongside, it would have to be shoveled by hand to the street, left there until the new track was completed and then shoveled from the

street to work cars standing on the new track. The new method does away with all this. A machine picks up the dirt and releases it directly to the cars which wait to carry it off. There is never any of it left on the street to spread around the neighborhood—not since Trackmaster Finn saw the possibilities of removing the dirt for good and all at the first handling of it.

The second phase of the work of reconstructing tracks, is so intimately connected with the first that it has already been partially described. Behind the automatic shovel and the rail breaker a gang of men keep the advancing ends of the new rails steadily spaced with the work of removing the old track and excavating for the roadbed. The shovel works so thoroughly and through such a small area that levels of the bottom of the ditch where the new ties are to be placed without ever necessitating men with spades finishing the work. Hence, as the shovel progresses, there is no de-

lay in laying the new track. Each advancing section of rails is rolled onto the ties, straightened out and hooked onto the end of the rails already laid. An electric drill bores a hole through the ends of the new rails, and the plates which are to connect the ends are temporarily put on, being held in place by steel pins.

The rails are gauged for distance between them at a space of every four or five feet along the section, and as they are given the correct spacing the upright fingers on the plates which hold the rails to the ties are hammered over the base flange of the rail, gripping it tightly. A pair of workmen with an electric screwdriver drive home into the ties the heavy steel screws which hold the plate to the tie, making a complete connection between the plate and rail.

Closely following the process of fastening the rails to the ties comes the crew which connects the rail ends. At each joint where the connecting plates are temporarily held in place by the two pins already mentioned it is necessary to drill holes through the rails so that the plates may be riveted to the rail. It is inadvisable to make the rails with the holes already in them because they might not coincide with those in the plates and time would be lost in trying to fit plates of rails. Accordingly the plates come with the holes cast in them and the rails are drilled afterwards at exactly the right spot to coincide with the plates.

Another electrically driven tool is used for this purpose. Sliding on two round bars which stretch across the tracks from one rail to another is a motor with a drill which bores the holes in the rails. This drill is inserted through the hole in the plate until it comes in contact with the rail; the current is turned on, and the hard-

steel drill grinds its way through the heavy rail as a gimlet goes through wood.

The Idle Rich. The teacher asked his pupils to write an essay, telling what they would do if they had \$5,000,000.

Every pupil except little William Powers began writing immediately. William sat idle, twiddling his fingers and gazing at the ceiling.

Teacher collected the papers and William handed in a blank sheet. "How is this, William?" asked teacher. "Is this your essay? Every other pupil has written two sheets or more, while you have done nothing."

"Well," replied William, "that's what I would do if I were a millionaire."

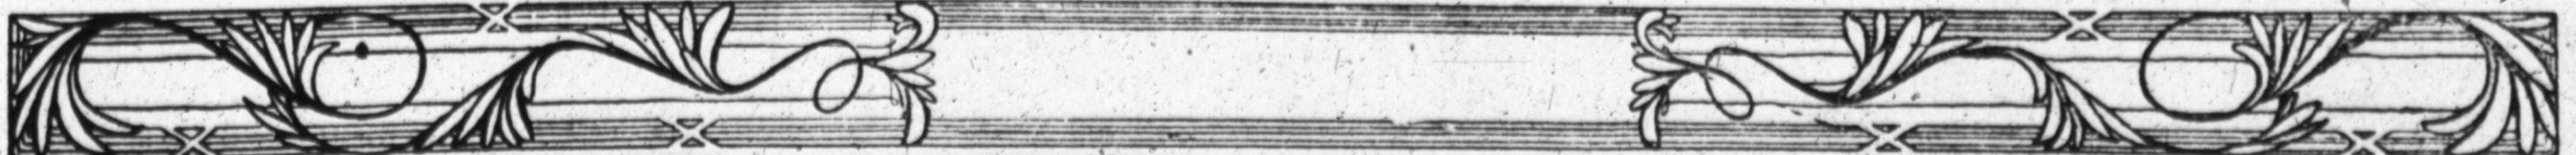

His Task. "What's the matter?" "I'm somewhat up against it," said the eminent composer. "I've got to write a singing part for a good dancer."

EXPECT KATY TO RESUME ISSUANCE OF PERMITS SOON

THOUGHT THAT ACTION WILL BE TAKEN WITHIN THE NEXT 24 HOURS.

EXPRESS DISSATISFACTION

Method by Which Permits Are to Be Issued Objected to by Business Men.

Resumption of the issuance of permits on the Katy, recently announced to have been deferred until October 1, may take place in Wichita Falls within the next 24 hours, it was developed at this morning's meeting of the local traffic committee, composed of representatives of the chamber of commerce, shippers and railroad officials.

Some dissatisfaction was expressed at the method by which the permits will be issued, having to be issued on the recommendation of the local agent by the superintendents of transportation at Dallas and Fort Worth for the Katy and the Denver respectively. Officials of the committee expressed the opinion that the shippers would find that the system worked out with no appreciable delay, as the permits would be worked on with direct telegraphic communication to the officials making the issue, and that the need of centralizing the control of this issuance arose from the fact that in no other way could this issuance be controlled so that the present congestion would not be duplicated, as would be the case with an indiscriminate issue, carried on by a number of different officials at various points on the lines.

Permits will be issued each day to the exact number of the cars unloaded and released the day before, it was announced. In making his recommendation for the issuance of permits the local agent, in cases of doubt, will inquire of local agencies in order to determine the legitimacy of the business status of the applicant for a permit. In this way it is hoped to eliminate the so-called "boot leggers" in various lines, the speculators and jobbers with no facilities for caring for their shipments, but who order materials in the expectation of resale at in many cases, an exorbitant profit, before the car is unloaded.

Return of empty tank cars was reported to be slow by most of the representatives of the local refineries in attendance, who expressed a belief that the return of these cars should be made without the necessity for a return permit. It was explained by F. W. Grace, division superintendent of the Katy, that this permit system for empty tank cars was the only method by which the railroad companies had been able to prevent the choking up of the local yards with cars belonging to speculators who would take advantage of the need of refineries to rent the cars at an exorbitant rate.

Return Billing. A system by which loaded tank cars leaving Wichita Falls would carry a return billing is under the consideration of the committee. Improvement in the local interchange of cars was reported by representatives of both railroads, as was an

PHYSICIANS NAME COMMITTEE TO PLAN FOR NEW HOSPITAL

Dr. Q. B. Lee, Everett Jones, J. Machechney, J. E. Daniels, and A. D. Pattillo are members of a committee appointed by the W. C. Medical Association to take charge of arrangements for securing a new hospital for Wichita Falls in the near future, at the Tuesday night's meeting of the association. Association members were unanimous in recognizing the necessity for immediate action in the statement that the situation here is acute, that hospital needs have been great in the past and are increasing daily. The association left the work in the hands of the committee who will place the matter before the proper authorities. The association is not concerned with the means for obtaining the hospital, Dr. Pattillo says, but rather with the necessity of having the work done at once, and the committee will push the question until action is obtained.

Tuesday night's session of the association was held as usual in the city hall. Dr. M. H. Glover read a paper on "Rheumatism" and Dr. G. H. Hampshire had "Neuro-Syphilis" as his subject. Both numbers were followed by general discussion. Members present included the president and secretary, Dr. R. H. Graham and A. D. Pattillo, and Drs. W. H. Walker, Jack Fletcher, J. A. Soren, dentist, F. J. Strone, W. M. Hoover, O. W. Wilson, W. W. Swartz, Q. B. Lee, G. H. Hampshire, O. B. Kiel, L. Machechney and F. R. Collard.

The association adjourned to meet again on the second Tuesday in October at the city hall.

Notice. Dr. Strong now has a telephone in his residence, 1507 Tenth, number 91-117-24.

POWER CAPACITY OF LOCAL DISTRICT IS GREATEST ON KATY

With a total of 140 locomotive units in service on the Wichita Falls district of the Katy, including the North-western, giving that road a power capacity of approximately 1,400 tons, this division has a larger power capacity than any other division on the entire Katy system, it was announced today by J. F. Hickey, general superintendent for the Katy in his district. An additional locomotive, an oil burner, was received Tuesday night from the Trinity and Brazos Valley, and Major Hickey has received notice that eight more locomotives are on the way, five from the New York Central and three from the Illinois Central.

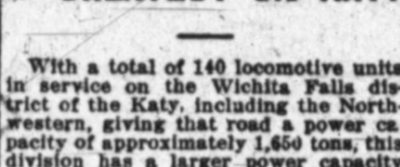

With the heavier steel connecting with the main line, recently completed, and the amount of power in use by the Katy in this district, it is felt that the Katy is in a position to rapidly clear up the situation which has led to congestion on that line since the development of the Burkentine and Waggoner fields, and to take care of any further business which might be developed in his district.

Plans to establish a beauty parlor in city.

Mrs. Grace McDill, graduate of the Burnham School of Beauty in Oklahoma City, announces her plans for establishing parlors in Wichita Falls during the first weeks in October. Mrs. McDill will be connected with the Kimberline Department store which will occupy the building in which the North Texas Furniture store is now located, about the first of the month. Her establishment will be independent of the store management, but arrangements for rooms from the floor space have already been made.

During the summer months Mrs. McDill will cover every phase of beauty
