C. C. on interstate rates...

HOLD ARMED MAN IN CONNECTION WITH AN ATTACK ON GIRLS

ARDMORE, OKLA., June 13.—Charles Mulkey, young married man, is in jail here today in connection with an alleged attack on two 16-year old girls Sunday night, five or six miles from here. The two girls told officers they were picked up in Ardmore, Okla., in a motor car and taken to a place where they were assaulted four times. The other was not molested when she resisted her assailants, according to their statement to the police. The girls were forced to walk back to town late that night, they said.

ROB A DRY GOODS STORE AND BATTLE WITH POLICE

PONCA CITY, OKLA., June 13.—An unknown number of robbers early today entered a local dry goods store and escaped in a motor truck with clothing and silk valued at \$6,000 after engaging in a pistol fight with two policemen in which more than 20 shots were exchanged.

PROSPERITY SPECIAL ON LAST LAP OF JOURNEY

CORPUS CHRISTI, TEXAS, June 13.—The "Prosperity Special" composed of a giant locomotive valued at \$1,500,000, which were delivered to the Southern Pacific railroad, their purchaser, here yesterday, left Corpus Christi at 9:30 this morning for Houston. The train is scheduled to stop at Hearne tonight. The special was mobilized in one long trip and the girls were assaulted four times. The other was not molested when she resisted her assailants, according to their statement to the police. The girls were forced to walk back to town late that night, they said.

BEGIN TABULATION OF STRIKE BALLOTS RAILWAY WORKERS

CHICAGO, June 13.—A corps of clerks in union headquarters at the railway shop crafts today began tabulation of strike ballots as rapidly as they are returned from shopmen on the nation's railroads. Tabulation began with the first ballots favoring a strike. To make the poll as definite as possible each employee is expected to designate his craft and the road by which he is employed. Although the ballots are returned June 30, the day before wage reductions ordered by the United States railroad labor board become effective, B. M. Jewell, president of the railway workers department of the American Federation, urged the men to have their votes registered before June 25.

BILL PROPOSES TO PAY SOLDIER BONUS IN CASH BY TAXES

AMENDMENT IS INTRODUCED BY SENATOR LADD OF NORTH DAKOTA. PROVIDES SPECIAL TAX BE LEVIED ON THE BANKS

WASHINGTON, June 13.—President Harding, it was said today at the white house, hopes and expects that the tariff bill shall be passed prior to the soldiers' bonus legislation. Should funds from this source prove inadequate to meet the interest on the foreign debt, the balance would come from the treasury. Provisions would be made that after 12 months any holder of 100 or more of the currency bonds presently showing a loss of 73,543 members during the last year, but he said that the membership report showed a gain of 1,000 members and that many had been exempted from payments because of unemployment. Counting these, he said, he would be that we have lost none at all.

GEN. CHANG'S RISE FOR AN ARMISTICE IS TO NO PURPOSE

TIENTSIN, June 13.—If Chang Tso-Lin's suit for an armistice was a rise, as is believed here, to give his defeated and retreating Manchurian army a chance to reorganize, it missed its purpose. The commander of Wu Pei-Fu's Chinese army, remembering Chang's early falling from a bandit leader, was quite prepared for him. After an all day battle Sunday the Manchurians are again headed homeward. The Chinese right flank but were 74 pushed after severe fighting. A report last night said the Manchurians were withdrawing northward with Wu's army pressing close. As a result of the new outbreak, Wu has ordered his troops to leave the flower of his army, to leave its headquarters at Tang Ku for the front.

OFFICIAL INQUIRY INTO DEATH OF MRS. RIDGLEY AWAIT ADMINISTRATOR

JANA, ILL., June 13.—Relatives seeking an official inquiry into the death of Mrs. Ora Belle Ridgley, whose body was brought here from Hot Springs, Ark. June 4 today awaited the results of a move for the appointment of an administrator for the estate. Statements sent out yesterday to the effect that private investigation had developed evidence that Mrs. Ridgley had not died of natural causes and that much money and property had disappeared were unsubstantiated. No official charges have yet been brought in the case, nor has any official action been taken. Dispatches from Hot Springs quoted Dr. J. L. Greene, who attended Mrs. Ridgley as stating that her death was unusual in her death, which was due to neuritis atrophy, according to the death certificate signed by Dr. Greene. Advice from Chicago was that Mrs. Alice Horn, friend and companion who was with Mrs. Ridgley when she died, expressed surprise that any inquiry was sought. She said she believed Mrs. Ridgley had very little property when she died and that her death resulted from atrophy of the brain due to neuritis.

WIDOW IS ARRESTED IN CONNECTION WITH MURDER OF BRUNEN

MOUNT HOLLY, N. J., June 13.—Mrs. Doris Brunen, widow of John T. Brunen, circus owner, who was shot and killed on March 16, is under arrest here today on charges of murder. The authorities said that she was arrested upon information furnished by persons already held in connection with the case, but declined to give further information. Mrs. Brunen was brought from Philadelphia yesterday by two detectives for farmers and in which she said she was wanted for questioning. They were surprised when she failed to return home last night. Mrs. Brunen's brother, Harry Mohr, and a former employee of Brunen's circus, Charles Powell, are under arrest on murder charges. Powell is declared by the authorities to have confessed today that he did the actual shooting of Brunen at Mohr's request.

GARNER DEMANDS REPORT ON BILLS BEFORE CONGRESS

REPUBLICAN LEADERS ARE PRESSED FOR AN EXPLANATION. HOLDING BACK ON TWO WHILE URGING ANOTHER

WASHINGTON, June 13.—House republican leaders were pressed today by Representative Garner, democrat, Texas, for a statement as to action on what he described as the three major legislative projects—merchant marines, Muscle Shoals and ship subsidy, which will take \$75,000,000 to \$100,000,000 out of the pockets of the people annually, the president is insisting on action, said Mr. Garner. On the other two he is holding back or taking no interest. Representative Mondell, the republican leader, replied that the democratic minority have been responsible for placing on our doorstep most of the problems, should assist in solving them. "God only knows when we will get out from under the shadow of many of them," Mr. Mondell added, insisting that the democratic administration during the war had expended three and one-half billion dollars in building a fleet and equipping it with the most magnificent waste of money. Denying that the ship bill proposed to subsidize private interests, he asserted the question before the country was what it is to be done with the great fleet. "Do you want to sell them to foreigners and have them sail under foreign flags," he shouted, "instead of getting any assistance from democrats, they are making all possible opposition."

WIDOW FILES SUIT FOR \$110,000 INSURANCE AND FEES FOR INTEREST AND FEES

ST. LOUIS, June 13.—In the 15th district court here this morning suits were filed by Mrs. Jennie J. Dosselt, widow of John Dosselt, seeking the collection of three life insurance policies, amounting to \$110,000. The policies were taken for \$12,000 attorney's fees, together with interest and 12 per cent damages of the amount of the policies. The three companies named were the Franklin Life and the Missouri State Life.

SENATOR HARRISON DISCUSSES RECENT CASE OF GOLDSTEIN

WASHINGTON, June 13.—Discussion of the Nat Goldstein case was revived in the senate today by Senator Harrison, democrat, Mississippi, who declared President Harding's letter to Mr. Goldstein made public yesterday by the latter, was an attempt to "stick away all the odium that was attached to the incident." Goldstein some time ago was nominated to be internal revenue collector at St. Louis, but after attacks had been made upon him because of his action in taking \$2,500 from the hands of a man named Lowden, he agreed to allow the president to withdraw his nomination. Mr. Harding, in his letter, declared these attacks were "undesirable." "Evidently the president is not satisfied with appointing crooks to office," said Senator Harrison, but he would not "stick away all the odium that was attached to the incident." Senator Spencer, republican, Missouri, who recommended Mr. Goldstein, immediately challenged Mr. Harrison's statement, declaring that Goldstein was "clean as a hound's tooth," and that Senator Harrison's statement was "a gross insult." Senator Harrison broke in and called upon Vice President Coolidge to note that Senator Spencer was violating the rules, but the president was not present. The senators got into better humor, and each made emphatic protestations of "love" for each other.

NEW SOLDIER HOSPITALS AT GREAT LAKES STATION AND CAMP LEWIS, WASH.

WASHINGTON, June 13.—New soldier hospitals are to be built near the great lakes naval training station, Chicago, at a cost of \$2,000,000, and at Camp Lewis, Tacoma, Wash., at a cost of \$1,500,000. It was announced today by Director Forbes of the veterans' bureau.

FOUR ARE KILLED IN EXPLOSION OF AN AMMONIA TANK

DETROIT, June 13.—Explosion of an ammonia tank located in a tunnel under the boiler room of the Parker Webb Packing company shortly before noon today resulted in the deaths of four employees and damage to the plant that will cause suspension of operations for at least three days.

NEW YORK STORM TOLL IS 55 TO 60; MANY ARE INJURED

WILL BE SEVERAL DAYS BEFORE TOTAL NUMBER IS KNOWN. BRONX GRAND JURY TO MAKE AN INVESTIGATION

NEW YORK, June 13.—Revised reports today from Sunday's storm indicated that from 55 to 60 persons had perished in the tempest which swept the metropolitan area and took its great toll among boating parties at City Island. Last night it was reported that about 50 persons were in the morgue scattered along the coast, but this morning it was found in certain cases names had been duplicated. At noon the count of known dead stood at 55 with many more still missing. NEW YORK, June 13.—The death list resulting from the cyclonic storm that smashed and swirled its way through the city last Sunday evening, continues to grow. The known dead now total 55, with 18 other persons reported missing. The police launches continued to grapple today for bodies of those who were swept away. At least 40 widows to City Island were drowned and police are convinced that the death list will reach as high as seventy. It will be days before the total loss of life will be known. The Bronx grand jury has started an investigation of the wreck of the ferry wheel at Clason's Point in the storm. The investigation is being conducted by the grand jury today. The storm caused damage to the twisting wire runs into millions. Electric light and power lines were destroyed for miles. The sea was high and waves were breaking over the roofs of houses. A room from a church in Yonkers was lifted by the wind and dropped upon a passing automobile containing five persons. Rescuers were away the timbers and found that none were hurt.

SENATORS PROTEST DISCRIMINATION BY NAVAL ACADEMY

WASHINGTON, June 13.—Reported discrimination by the class just graduated from the naval academy at Annapolis against Leonard Kaplan of Weston, W. Va., a class member, was scored in a hearing today by Senator Sutherland, republican, West Virginia, who said that Kaplan had been "stigmatized because of his race." Sutherland and other senators joined Senator Sutherland's criticism and suggested further investigation. Senator Sutherland presented a report that Leonard Kaplan had been stigmatized in the "Lucky Flag" the Academy yearbook. Although very near the head of the class, Kaplan's name had been left out of the class roll in the publication, while the page containing his biography had been left unnumbered and perforated so it could be torn off without defacing the book.

LARGEST SHIPMENT OF GOLD BULLION EVER SENT TO U. S. ARRIVES MONDAY

HOBOKEN, N. J., June 13.—The largest shipment of gold bullion ever received in this country, according to shipping officials, arrived yesterday on the steamer Frederick VIII. The ship left Copenhagen June 11 with between \$1,000,000 and \$1,500,000 in gold bullion, \$20,000,000 of which is consigned to the National Bank of Commerce.

RIVAL MOBS CLASH AND STONES ARE USED FREELY

BELFAST, June 13.—Rival mobs clashed in the York street area last night using stones as missiles. A bomb was thrown and the explosion wounding a woman.

KATY WILL BUILD SHOPS IN DENISON

DENISON, TEXAS, June 13.—It was semi-officially announced here today that the Missouri, Kansas and Texas railroad would build in Denison a new car shop to take care of the road's freight cars. The new shops will employ about 150 men. It was stated that work on the new shops will begin when the new terminal is being built here is completed.

PARACHUTE RECORD BROKEN BY A MAN ON HIS FIRST DROP

CAPTAIN STEPHENS RELATES DETAILS OF SENSATIONAL DESCENT.

NO ILL EFFECTS FROM HIS HAZARDOUS TRIP

Loose Oxygen Tank And Haps To Cling to Ropes and Straps In Swift Gale.

DAYTON, Ohio, June 13.—Lashed and whipped about by a 120 mile an hour gale more than four and a half hours above earth, on the verge of suffocation caused by loss of his oxygen tank and compelled to cling to ropes and straps attached to the parachute for fear that a whirling cross current might weaken and cause them to break, a record of the "mere" details related today by Captain A. W. Stephens, aerial photographer, McCook field, who yesterday broke the world's parachute record when he descended 24,296 feet.

The fact that it was Captain Stephens' first "drop" in a plane, and that he is one of the most remarkable in the history of aviation, he suffered no ill effects from his hazardous trip.

The plane in which Captain Stephens ascended, a twin motored Martin bomber, piloted by Lieutenant Leigh Wade, broke the world's altitude record for this particular type of ship carrying three passengers, when it attained a height of 24,296 feet. Sergeant Roy Langham was the third member of the party. Captain Stephens was reluctant today to discuss details of his experience.

"For a long time I have wanted to make a parachute drop," he said, "primarily to obtain first hand information as to the sensations of it. I am highly gratified to think I was able to bring another record to McCook field."

"When the plane reached the ceiling I made ready to jump. As near as I could judge we were over Springfield, Ohio. Bidding my pals goodbye, I jumped."

"The opening of the parachute caused the oxygen tank to become loose from its fastenings on the front of my clothing. Grasping it with both hands, I endeavored to retain it."

"The wind was traveling at a speed of 120 miles an hour. I was forced to use both hands on the ropes and straps which held me to the chute. It was then that I lost the tank."

"Before settling down to a lower altitude, I thought my time had come as I was nearly suffocated due to the rareness of the atmosphere. Dropping out of the gale into clear atmosphere below, I quickly recovered, however."

"I landed at Jamestown, approximately 25 miles from where I left the plane. The descent took just 30 minutes."

"Two hours and five minutes were required by Lieutenant Wade to pilot the bomber to her record breaking altitude."

**NO AUTHORITY FOR NEWS
BRITISH SOLDIERS KILLED**

LONDON, June 13.—It is officially held today that there is no authority for news contained in a semi-official dispatch from Athens last night reporting a Turkish massacre of 12 British soldiers near the Dardanelles. The report, it is explained, apparently referred to an incident which occurred—48 hours ago, when three British casualties resulted from an encounter with brigands 150 strong, south of Chanak Kalesi, Asia Minor.

**Don't Spoil Your Child's
Hair By Washing It**

When you wash your child's hair be careful what you use. Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is Mulsified coconut oil shampoo, for this is pure and entirely greaseless. It's very cheap and beats anything else all to pieces.

Two or three teaspoonful of Mulsified in a cup of glass with a little warm water, all that is required. Simply moisten the hair with water, and rub it in. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is left fresh looking, bright, fluffy, wavy and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff. You can get Mulsified at any drug store, and a few ounces will last everyone in the family for months. Be sure your druggist gives you Mulsified—adv.

**WORN OUT AFTER
SHE COOKED
A MEAL**

Took Lydia E. Pinkham's
Vegetable Compound.
Read the Result

Cincinnati, Ohio.—"I suffered for a year with nervousness and irregularities before I took Lydia E. Pinkham's Vegetable Compound. My back ached, and I was unable to do my washing. My girl friends and my sister told me if I would take your Vegetable Compound and Liver Pills I would be relieved. After taking the first bottle I felt better, and neglected it awhile, but found I could not do my work until I was stronger. So I took the Vegetable Compound again and now I am the mother of a 15 months old boy. He is fat and healthy and I am sure I could never have carried him if it had not been for your medicine. I recommend your medicine to all women although I am young to be advising some one older."

—Mrs. C. W. FETTER, 513 W. Liberty St., Cincinnati, Ohio.

CHARLIE ITEMS

Some of the farmers are through harvesting wheat. They report that both the grade and the yield will be good.

Dr. Holton reports that the health of this community is good.

Rev. G. A. Fitzgerald of Bowie filled his appointment to preach at the Christian church Saturday night and Sunday.

Mrs. Hardwick entertained her Sunday school class at her home Saturday evening.

Mr. and Mrs. Paul Dowdy visited Mrs. A. A. Dowdy over Sunday.

Mrs. J. D. Bailey and children went to Wichita Falls Friday.

Mrs. Robert Stewart, who has been away for her health, has returned.

Commissioner Edwards, superintendent of the Sunday school, entertained his Sunday school class Friday evening.

Mr. and Mrs. Frank Manning and Mrs. Rhea, of Byers, visited relatives here Sunday.

J. D. Bailey and Lum Pepper visited Jay Davis Sunday morning.

Miss Pennington of Sunset is visiting relatives here.

J. L. Block, our blacksmith, has been kept very busy during the farm work week.

Bob Watkins, candidate for district clerk, was in town Friday.

Durley H. Davis and White-Moore, both candidates for tax assessor, were in town Friday.

G. W. McDaniel, candidate for county superintendent, was in town Monday.

Mr. and Mrs. Charles Jones and Mr. and Mrs. J. C. Luttrell attended church at Petrolia Wednesday evening.

Mrs. Bryant Patterson of Duncan, Okla., who has been visiting here for several days, returned home Monday.

Miss Maud Hensley, Miss Eunice Brown, Jack Bailey and Will Thornton attended church at Petrolia Saturday night.

Willis Pinkerton went to Petrolia Monday morning.

The game played Sunday afternoon by Charlie and Winston's drug store baseball teams resulted 13 to 5 in favor of Charlie.

Members of the Charlie cemetery association will hold their next meeting at the Baptist church on Wednesday evening of this week.

A thrashing outfit from Henrietta arrived here a few days ago. They will begin thrashing J. E. Hall's wheat soon.

A basketball dinner will be given at the Christian church on the second Sunday in July.

J. L. Burnett, assistant treasurer of the Superior Oil corporation, is in Lexington, Ky., in the city for a few days on business.

Christmas day among Armenians is celebrated on January 13.

Mince pie was known originally as "shred" pie.

**FACE DISFIGURED
WITH PIMPLES**

Itched and Burned. Could Not Sleep. Cuticura Heals.

"My skin became rough and red pimples broke out all over my face. The pimples were hard and scaly over, and itched and burned so that I could not sleep at night. My face was badly disfigured. I tried many remedies but could not get relief. Seeing an advertisement for Cuticura Soap and Ointment I sent for a free sample which helped me so I purchased more, and after using two cakes of Cuticura Soap and two boxes of Ointment I was healed." (Signed) Miss Nellie Mae Johnson, R. F. D. 2, Easley, S. C., July 18, 1921.

Use Cuticura for all toilet purposes.

Sample Book Free by Mail. Address: "Cuticura Laboratories," Dept. 512, P. O. Box 1077, Portland, Me. Cuticura Soap shows without soap.

**FROM THE
FAMILY
GARDEN**

You can get many tasty dishes that do not occur in the regular course of things. Fried tomatoes, for instance? Fresh tomatoes, sliced thin, and fried in thin batter, make an unusual but delightful fried dish.

For the frying of vegetables always use MRS. TUCKER'S SHORTENING, the purely vegetable cooking fat. It blends ideally with the tart, but delicate, flavors so desired.

Jack Bailey of Charlie was in the city Tuesday on business.

WILL USE GAS IN EVENT OF WAR, SAYS ADMIRAL

ALBANY, N. Y., June 13.—"You can bet your life that if we have another war and if we're attacked we'll use gas," said Rear Admiral Sims last night at the annual dinner of the Albany Medical college alumni association.

"Gas, he said, is not an inhuman method of warfare. The impression that the use of gas was so inhuman, he said, was caused by allied propaganda because the Germans were using it."

Jack Bailey of Charlie was in the city Tuesday on business.

EPISCOPAL WOMEN ACT AS HOSTESSES FOR VARSITY CLUB

Members of the University club were guests of the women of the Episcopal church in the parish house Tuesday noon at their regu- lar weekly luncheon. The attend- ance was disappointing, but what few did turn out were well repaid by an entertaining program which included vocal solos by Mrs. John King, a toe dance by Miss Leslie Davis and readings by Master Rob- ert Collier.

President Norrie Ewing stated that the nomination of officers for the ensuing term would be in order at next week's meeting which will be held in the Y. W. C. A. club room.

Fred Datson, son of Rev. F. T. Datson, returned Tuesday from St. John's Military college.

Boone Smith and son of Iowa Park were in the city on business Tuesday.

LAWYERS AT WACO OPPOSE PLANS OF AMERICAN LEGION

WACO, TEXAS, June 13.—Calling on the duly constituted authorities to enforce the laws, lawyers of Waco at a meeting today of the Waco

Bar association refused to adopt resolutions prepared by a committee of 10, composed of Mayor Ben C. Richards, American Legion man, a preacher and business men of Waco. It was provided in the resolution that the local post of the American Legion furnish 20 men to be used as a reserve police force, and to be offered to Mayor Richards and deputized by him to protect life, liberty and property in case of any emergency here.

The resolutions were inspired by the burning of the body of a dead negro here little more than two weeks ago, after which his body was dragged through the streets of Waco.

PRETTY RECEPTION AND PARTY CLOSES MISSION CIRCLES FOR SUMMER

Members of Circle One of the First Presbyterian Mission auxiliary were hostesses to members of Circle Two of the auxiliary Monday afternoon at a reception and party at the home of Mrs. J. W. Culbertson.

Mrs. A. H. Carrigan, Mrs. Culbertson and members of Circle One were active hostesses, and between fifty and seventy-five circle members enjoyed a very delightful afternoon. The home was most attractively decorated, with a big bowl of lead fruit punch in the reception room, which the guests were served on. After a short devotional led by Mrs. H. B. Patterson, and roll call answered by suggestions for next year's work, Mrs. L. B. Bucher, vice chairman of the auxiliary, took charge of the entertainment and directed the presentation of an informal and very interesting program. Miss A. Ruth Chandler played two piano numbers, "Marche Wind" and a Tschalkowski number; Miss Juanita Kisey gave two readings; Mrs. E. L. Parker, soprano, gave a most delightful song number, responding to the encore with "Kathleen Mavourneen". After the musical and reading number Mrs. Gibson conducted an original contest, in which Mrs. Platt K. Wiggins, who is visiting her mother, Mrs. A. Thompson, was most fortunate, and was presented a pretty candy box. Refreshments of orange ice cream and angel food were served.

Brief News Items

Mr. and Mrs. E. C. Carpenter of Elton, Texas, are visiting Fred S. Cone.

The Birthday Ring club meets Wednesday with Miss Lucile Duke, at the C. M. Duke home.

OUR FIRST YEAR

CHAPTER LXI—AGAIN JACK AND I BOTH IN BAD HUMOR AT ONCE.

By S. B. B. B.

"Did you have a pleasant walk last evening?" asked my husband when we exchanged an abbreviated and surreptitious caress on the mezzanine before breakfast.

"I took it for granted Jack had seen me go to the garage to hunt my pearls, so I answered: "Yes, did you? And did you sleep well?"

"Passably!" My chance to refer to my fox scar I was waiting for the first time did not come until we were finding our places in the cars. Then I whispered:

"How do you like my get fox?" "Stunning! Is it yours, dear? I noticed it at breakfast. Thought you'd put on Bonny's."

"It's mine!" I announced gleefully and indeed I was glad to casually break the news of my purchase. Not that Jack ever had been horrid about what I bought for myself, but sometimes my shopping trophies made me feel he wasn't earning enough.

Before noon I realized the fox scar I was wearing had started and I must accept anything, he never need explain. Therefore, my dilemma. I've just got to endure—and endure!—And it is not fair!"

(To be continued.) (Copyright, 1922, NEA Service.)

By S. B. B. B.

the way, I've found. Maybe it's action and reaction. Sometimes I've thought if I would make an effort to control my own nerves I wouldn't notice Jack's so much.

The big things, emergencies, disappointments, never disturbed us, but we seemed to be always on the lookout for some excuse for a petty mood.

If Jack had his reason for a petty mood, all that trip, I soon discovered an excuse for my own.

Bonny always ran for the letters when we stopped for the night. "Who's your lady friend, Jack? Your steady correspondent?" she cried as she flipped a note to him. "Your mother!"

"Somebody old enough to be his mother," I answered for him. "Jack put the letter into his pocket, made no comment, and never referred to it again."

"He never opens them until he is alone. And I'm quite helpless. He and I are to be good chums and pals. I must accept anything, he never need explain. Therefore, my dilemma. I've just got to endure—and endure!—And it is not fair!"

Campfire Girls, First M. E. South, To Have Big Camp

More than 50 girls of the big new Campfire organization of the First M. E. church, south, in which over 100 girls of the church are enrolled, will take part in the big Campfire camp the first two weeks of July, according to an announcement from Miss Glenore Fisk, leader of the organization in that group, Tuesday.

On Friday of this week, June 16, there will be a Campfire picnic for the girls of the intermediate and senior departments of the Sunday school, and each girl is requested to be at the church at 3:00 o'clock with her lunch to leave for the picnic grounds. Cars will be provided for those not physically able to hike to the grounds.

The girls of the church are organized into groups by class, every teacher of which has taken a well-outlined course and accepted the duties of camp guardian.

Miss Fisk, who is a trained worker with the Campfire program, is just back from Lake Worth in Fort Worth, where she took a general course in camp craft and general Campfire work under the leadership of Campfire workers from headquarters, adding this course to considerable previous training in the organization.

CIRCLES PLAN DAY NURSERY FUND WORK

The First Baptist Auxiliary circles in meeting Monday discussed plans for the day nursery home funds drive, which will be conducted this week among their membership, and also discussed the membership in the Mission Federation, dues for which go to the day nursery.

Members of the circle five met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Five Members of circle five met with Mrs. R. C. Ray and Mrs. R. C. Carter and Mrs. George H. Watson leading the Bible study. The circle discussed plans for raising their part of the auxiliary's Day Nursery home quota, and some plans were made. Those who were present includes Mesdames Bert King, John Abbott, Roy Carter, W. T. Ferguson, E. V. Leslie, E. W. Carter, George Watson, J. H. Martin and Fox.

Circle Seven Circle seven met with Mrs. Hubert Harrison, with five members present. Mrs. Maples led the lesson, and there was an interesting discussion of the day nursery plans.

Circle Eight Mrs. Pat Simmons was hostess to circle eight, with 12 members in attendance. Mrs. Heaster led the lesson, and Mrs. Simmons invited the members to remain for a social half hour, during which faintly refreshments were served.

Circle Nine Members of circle nine met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Ten Members of circle ten met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Eleven Members of circle eleven met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Twelve Members of circle twelve met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Twenty Members of circle twenty met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Twenty-One Members of circle twenty-one met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Twenty-Two Members of circle twenty-two met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Twenty-Three Members of circle twenty-three met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Twenty-Four Members of circle twenty-four met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Twenty-Five Members of circle twenty-five met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

First Christian Women Complete Raising Their Day Nursery Quota

The women of the First Christian Church Aid society have raised their day nursery permanent home quota and several hundred dollars over the amount of their pledge, from reports given by the campaign fund workers at Monday's all day meeting of the aid.

The women reported \$71,500 raised, with \$500 the quota. That sum was in addition to \$280, raised at Monday's meeting for the regular annual aid budget for social service, making a total of \$1,040 reported at the business meeting.

About one hundred women attended the all day meeting, with Mrs. Patton's circle in charge of the entertainment. The hostesses included Mesdames Patton, Jarvis, Hollingsworth, Weissenborn, Russell, Gray, M. T. Rogers, Boyd, Oakley, Ferguson, Shears, Ray, Casey, McGrath, Wildeman, Miller, Henry, Sloan, Hall and J. W. Bradley.

An informal program comprised a song by Mrs. R. C. Ray and a reading by Miss Eula Nell Ray. The dinner menu comprised chicken loaf, baked beans, tomato salad, lettuce salad, brown bread, ice cream and cake.

Offerings were taken at most of the circle meetings, which were held as follows:

Circle One Mrs. E. J. Ashmore was hostess to circle one Monday afternoon, when 14 members enjoyed an interesting Bible study lesson. Quite a liberal collection was taken for the day nursery permanent home fund, for which the auxiliary has made its pledge.

Circle Two Mrs. R. C. Smith led the lesson, and the following were present: Mesdames G. W. Burns, R. W. Morgan, J. J. Lory, W. H. Barringer, J. T. Brooks, S. E. Carter, G. R. Dowdy, R. C. Smith, M. L. Tuttle, Frank Cipliver, Beans, Gibson, White and S. J. Ashmore.

Circle Three Circle three met at the home of Mrs. Cook on Burnett, with seven members present. Mrs. Bennett and Mrs. Davis led the Bible study on Judges and Ruth.

Circle Four Members of circle four met at the home of Mrs. T. M. Smyre, with 22 members present. Mrs. W. L. Robertson led the Bible study, and Mr. Bourland led a very spirited missionary lesson. Several new members were present on this occasion.

Circle Five Members of circle five met with Mrs. R. C. Ray and Mrs. R. C. Carter and Mrs. George H. Watson leading the Bible study. The circle discussed plans for raising their part of the auxiliary's Day Nursery home quota, and some plans were made. Those who were present includes Mesdames Bert King, John Abbott, Roy Carter, W. T. Ferguson, E. V. Leslie, E. W. Carter, George Watson, J. H. Martin and Fox.

Circle Six Circle six met with Mrs. Hubert Harrison, with five members present. Mrs. Maples led the lesson, and there was an interesting discussion of the day nursery plans.

REPUBLICANS MAKE PLANS TO LAUNCH A FULL STATE TICKET

CANDIDATES TO BE SELECTED AT FORT WORTH ON AUGUST 8.

PRECINCT CONVENTIONS ARE CALLED FOR JULY 22

Will Select Delegates to the County Convention to Be Held July 29.

SAN ANTONIO, June 13.—Plans for putting out a complete state ticket in the general election in November were outlined here at a meeting of the republican state executive committee.

A call was issued for precinct conventions to be held in country precincts on July 22, at 2 o'clock in the afternoon.

The basis decided on for representation in the county district and state convention is one delegate from each county and one additional delegate from each 300 votes or major fraction thereof.

It is the plan to put out a complete state ticket. Mr. Creager said in discussing the future of the party in Texas.

The meeting of the state executive committee was preceded by a meeting of the county executive committee.

Of the 31 members of the state committee, 19 were present in person or by proxy.

In addition to Mr. Creager, C. O. Harris, attorney of San Angelo, prominently mentioned as the new federal judge for the district.

DOLPHUS PICTURE IS IDENTIFIED AS THE PARTY WANTED

DALLAS, June 13.—That's the man, declared W. S. Scrivner, confessed member of the band of seven which robbed the Jackson street postoffice station here January 14, 1921.

TEMPORARY INJUNCTION RESTRAINING MINERS

COLUMBUS, OHIO, June 13.—A temporary injunction restraining United Mine Workers in Harrison and Jefferson counties from interfering with coal stripping operations in the two counties has been granted by Federal Judge Sater.

Mrs. George W. Hougland of Louisville, Ky., and Miss Maude Summers of Marano, Ind., are visiting their uncle and aunt, Mr. and Mrs. G. C. Summers.

LEADER OF REVOLUTION DEAD

DR. WOLFGANG KAPP

By Associated Press. BERLIN, June 13.—Dr. Wolfgang Kapp, leader of the Kappist revolution in Berlin in 1920, died in Leipzig today.

FRIENDS ANXIOUS TO SIGN BOND OF LAWTON PREACHER

LAWTON, OKLA., June 13.—Friends of the Rev. Thomas H. Irwin, former pastor of the First Presbyterian church here, and H. C. Lewis, former elder, were prepared today to make bond for the two to insure their freedom pending trial at the next term of district court on charges of arson in connection with an alleged incendiary fire at the church last April.

GALVESTON, June 13.—The weekly weather and crop summary of the United States weather bureau will be issued on Wednesday, June 14, at 10 a. m.

CHANCELLOR WIRTH GETTING READY FOR FIGHT OVER LOAN

BERLIN, June 13.—Chancellor Wirth and his principal cabinet members who have been returned here from a week's holiday, are preparing for the parliamentary fight which is certain to grow out of the loan negotiations failure in Paris and the relation of this to Germany's acceptance of the reparations commission's terms in her note of May 28.

A THOUGHT FOR TODAY

Therefore, my beloved brethren, be ye steadfast, unmovable, always abounding in the work of the Lord; forasmuch as ye know that your labor is not in vain in the Lord.—1 Corinthians 15:58.

Did you ever hear of a man who had driven all his life faithfully and singly toward an object and in no measure obtained it? If a man constantly aspires to be not elevated? Did ever man try heroism, magnanimity, truth, sincerity, and find that there was no advantage in them, that it was a vain endeavor?—Henry D. Thoreau.

THE CUMULATIVE COST OF TARIFF.

How a tariff that is designed to add \$45,000,000 to the income of the wool growers of the United States will cost the American people \$361,000,000 is set forth in the pamphlet of the Fair Trade League, a protective tariff organization which purports to advocate only a fair and reasonable tariff.

Here's how the League explains the cumulative cost of the wool tariff:

"The domestic clip of wool in 1921 was approximately 275,000,000 pounds.

"Total mill requirements in 1921, approximately 650,000,000 pounds.

"Excess, which must be imported, approximately 375,000,000 pounds.

"Average shrinkage of importations, as shown by tariff board report during period of Payne-Aldrich bill, 40 per cent.

"The clean content of all importations therefore, 225,000,000 pounds.

"The domestic shrinkage approximately 50 per cent.

"The clean content therefore of all domestic wool, 137,500,000 pounds. The total domestic and imported wool on a clean content basis, 362,500,000. At 33c duty per scouring pound, approximately \$120,000,000 duty.

"Assuming that domestic wool will sell slightly under the price at which similar wool can be imported, we still have added through the placing of a 33c duty on wool from \$110,000,000 to \$115,000,000 to the cost of the wool that we consume of which the domestic grower will get only \$45,000,000 to \$50,000,000.

"Wool, in going through the various processes of manufacture, pyramids 1.14 times the amount of the original cost of the wool, before it reaches the consumer. This is illustrated by the following table:

"It takes 4 pounds of clean wool to make an all-wool suit of clothes, medium weight. Four pounds of scoured wool at 33c, \$1.32. Wool grower sells it to commission house or wool merchant, who averages 10 per cent mark-up on his selling price to cover profit and overhead when he sells it to the spinner. This makes \$1.464.

"The spinner sells it to the cloth manufacturer at a mark-up to cover his manufacturing overheads and profit of 15 per cent, which makes \$1.72. The cloth manufacturer sells it to the clothing manufacturer, who to cover his distribution costs, overhead and profit, adds 20 per cent mark-up, which makes \$2.064.

"The clothing manufacturer sells it to the retailer, who sells it at retail and adds 23 1/2 per cent mark-up, which makes \$2.57. The retailer sells it to the consumer and adds 33 1/3 per cent to his selling price, which brings the cost to the consumer on a suit of clothes of a 33c clean content duty, as proposed in the senate bill, of \$4.15.

"The original cost of the duty on that wool, \$1.32, therefore, divided into \$4.15 shows that through the pyramiding process the duty has increased 1.14 times, and when we multiply the \$115,000,000 cost of the wool duty by 3.14, we get \$361,000,000 as the total cost to the American people of the proposed duty of 33c per clean pound to protect an industry the whole value of whose output in 1921 was only \$65,000,000 and which will get only \$45,000,000 of the \$361,000,000 in additional price for its commodity.

"The wool growers must have some protection, but 50 per cent on the value of his clip is believed by many to be enough. It would greatly reduce the burden upon the public."

"FATTY" WANTS ANOTHER CHANCE.

"Fatty" Arbuckle is broke. He will appeal to Will Hays to reinstate him as a motion picture actor.

"Fatty" is not only broke but he is penitent. He is off "the hard stuff" for good and all, he says. He wants back and a chance to make some money. His fate is in the hands of Hays. If Hays says the word "Fatty" can go to work and can have his chance with the public.

The public is the sternest judge of all. If there was general belief that "Fatty" was guilty of the crime of which he was acquitted it would be useless for him to attempt to "come back" in motion pictures. It would be "thumbs down" for him for all time.

But there is a feeling that the verdict of acquittal in "Fatty's" case was a proper one and that his offense was one of indulgence of his appetite, which was bad enough. But he has been living up to his declaration to leave liquor alone, as long as he

keeps to that declaration, it is believed the public will support him, if he is given a chance to appear. But let him fall again and he will find just how stern a judge the public is.

SOME CANDIDATES WILL BE DISAPPOINTED.

The eagerness exhibited by certain candidates for the senatorial nomination whenever there is any mention, no matter how subdued or feeble, of the liquor question gives rise to the suspicion that they will be sadly disappointed at the action of the democratic state committee in refusing Jim Ferguson's "light wines and beer" petition a place upon the ballot.

Probably some of these candidates are more disappointed than Ferguson himself at the action of the committee, for some of them must realize that they have no chance unless the prohibition issue is injected into the campaign. It doesn't make any difference much with Ferguson whether his "light wines and beer" plank is submitted or not, for the very action of the committee in turning it down furnishes him with all the thunder he wants anyway. With some of the other candidates, however, it is different. They can hardly inject the prohibition issue into the campaign without some pretext, no matter how slight, and it is difficult to see how they can discover a pretext.

TODAY'S TALK

By GEORGE MATTHEW ADAMS

A LETTER FROM A MOTHER.

"My dear Mr. Adams:
I cannot refrain from writing you to say how many times your beautiful lines have helped me. I clip them out every night and keep them in my desk, and read them time and time again. A great many times, when I am tired, and after putting baby to sleep, I get these clippings and read them. They help me so much.
—A Mother."

Thank you, Mother, for this letter. I wish that you had signed your name so that I might have written you personally. I get many letters from Mothers and it makes me very happy. A letter from a Mother strikes a responsive note in my heart—for I had such a wonderful Mother myself.

From out of your heart has always come the great of this world. And when the world gets very ill and has to suffer, it's you, Mother, who has to pay so heavily.

Today I watched a little worm with a tiny worm in its mouth perch itself on the step of a house that I had made and placed in my yard. Soon some little worms poked their heads from the nest hole, and you should have seen the pride in that mother's attitude. I said to myself then that mother love was made of the same ingredients no matter where it is found.

These brief talks are written each day to make people happy and to encourage and inspire them—as well as, occasionally, to make them think. They are not written to attract critics to their style. Critics usually tear them to pieces!

So that when a Mother writes me, I am inspired. Right here I want to thank every Mother who has ever written me and to say—God bless you, Mother. It's a credit to this newspaper that Mothers read it.

If I were a cartoonist I would represent the world with a wreath of roses about its circumference, and on the upper half I would draw a Mother rocking her baby in her arms. And then I think I would put a line like this underneath the drawing: This world wouldn't be a world without Mother!

You get very discouraged, Mother—and very tired. I know that. But never mind. Perhaps an entire nation will sometime thank you. It often has. Lincoln once said that all that he was or ever hoped to be, he owed to his angel Mother.

Thank you again for your letter, Mother. And may beauty and happiness fill your life.

LINES TO A FRIEND.

When I have needed sunshine you have brought it. When I have needed help you came to me. Sharing my battle, fighting as I fought it, Giving your strength to win my victory.

That which I lacked, when doubt and danger, tried me—
—Courage and faith and hope to carry on—
—You, with your friendly graces, have supplied me; Always you stood for me to lean upon.

Sometimes I feel that over-much I task you. With every day increasing friendship's debt; You proffer joys for which I would not ask you. And fill the need before the need is met.

Yours are the ways of friendship, rich with giving. And when at last I stand before the throne. Telling the story of my years of living. There I shall make your deeds of kindness known.
(Copyright, 1932, by Edgar A. Guest)

SMILE A WHILE

By TOM SIMS

The Irish free state is six months old and a very noisy child.
Wood wants more economy in Philippine government. He can have ours; we don't use it.
If skirts are longer, they are in them too far.
A small travels a foot in four minutes. Contrary to rumor, this is not as fast as a street car.
Nothing hurts your luck like having it in for somebody.

Jazz is popular because they can play the same piece over and you don't recognize it.
Several million Russians are homeless. Several million American's could be home less.
Detroit woman had a man arrested because he pinched her. The charge was not "impersonating an officer."
Cheer up. The first three months of summer are the hottest.
Fifty cents' worth of ice isn't always what it is cracked up to be.

HAMBONE'S MEDITATIONS

By LEE PAPP

Saturday afternoon pop was setting in the rocking chair on the porch, arching himself and looking comfortable, and I sed. Say pop?
Say it, pop sed, and I sed, There's a swell new Charlie Chaplin picture around in the Little Grand today, will you take me around to see it, I bet you'll love it.
Then you lose your bet, because it would be a sin and a shame and a waste of time to spend this afternoon in a close, stuffy, dark moving picture theater when the sky is shining so beautifully and the air so blue and the air is so refreshing and invigorating, pop sed, If you had investigated, taking a nice walk in the sunshine or in fact anything that would keep you out in the wonderful weather I'm sure you'd have enjoyed it more than listening to you, haven't you any feeling for nature? he sed.

Yes, sir, I sed. And just then he came out saying, O William, it's a lovely day, I think it would be just an ideal time for you to take me out to the park and give me another tennis lesson.

Man's avarice induces him to flirt with danger.
Knowing that a certain course is fatal, man still remains on the track, playing the stock market, over-eating, patronizing bootleggers.

YOU AND I

By ALBERT APPLE

BRAINS.

A horse ambles along Pennsylvania railroad tracks near Riverside Station, N. Y. Train approaches. Engineer toots his whistle. Horse starts running, faster and faster. It gallops three miles, locomotive at its heels, before its brain conceives the idea of leaping off the tracks.

Some will see in this the great value of man's power of reasoning and decision, which this horse lacked. But in many things, most of us rarely have sense enough to get off the tracks.

Man's avarice induces him to flirt with danger.
Knowing that a certain course is fatal, man still remains on the track, playing the stock market, over-eating, patronizing bootleggers.

HAY FEVER

On Wings of Wireless

By ARTHUR B. REEVE

(Continued From Our Last Issue)
But at the moment when it seemed that each was getting the upper hand of his man, a couple of others ran on suddenly. They had been trailing him from Garrick's, where they must have been watching.

The sight of the four now swung strikingly against Garrick and Dick. From the avenue whence had come the new assailants, now came a quick scurry of feet. A whistle. Someone rapped as with a hickory stick on the curb, making hollow echoes.

The four fled.
The newcomers hailed Garrick and Dick unceremoniously to their feet.
"You're under arrest!" One of them flashed a badge. "Saw you come out of the cellar of the Inner Circle last night. Also you were on that roof tonight!"

Garrick looked at the badge. They were revenue enforcement men. He pulled his own card, issued by the comptroller of the state. There was a moment of perplexity, then explanations and apologies.
"Thought you were in the Velvet Gang?"

"The Velvet Gang?"
"Yes—that's what we nicknamed that bunch of 'aristocratic run-runners' who were in the Velvet Gang last night."

One of them had picked up the key. "Ah-hal! We're in luck!"
So, without the formality of a search warrant, they entered the Grand house.

"If anything had ever been there—the stuff was gone!"
"Then why the 'light-with us' puzzled Dick as they parted from the disgraced raiders.

"Just to get us out of the way," grunted Garrick. "Goah! I ache!"
"Hump! I don't know whether it's a detective that needs a hump—or a psychoanalyst—or an alienist—or a spiritual adviser!"

ALTERING AFFECTIONS
It was late when Dick finished re-reading the conversation on which he had listened in over the wireless diagraph.

Nevertheless Garrick insisted on crossing the park and stopping in at the Usonia. On the register, freshly blotted, he read:
Miss Ruth Walden, Nonowantua, I.

"Miss Ruth Walden, Nonowantua, I. Too late to disturb them—but you can bet it won't be late in the upper air, where they're dining." Garrick turned into a telephone booth and rang up Nita Walden. "I'll wager Ruth doesn't sleep much tonight, he concluded. The thought of you and the wrecked car and the mess she is in will keep her awake. A few serious thoughts in the darkness will do her a lot of good. We'll start for you—early."

It was not much after 7:00 when Garrick, Dick and Mrs. Walden rode up in the Usonia elevator. As the door clanged shut, Mrs. Walden looked back, with a nod.

In her haste and nervousness she nearly stumbled to the door of Ruth's room. She put her hand on the wall to steady herself and listened. In the room she heard voices. She rapped but did not wait for Ruth to open, for the door was not locked.

"Mummy! Without a second's hesitation, Ruth ran to her mother's chamber, considered capable of producing the symptoms. No discomfort felt until the substance actually caused the trouble is injected when a slight swelling or reddening and itching occur. Once the right substance is thus detected, relief usually can be obtained by the use of a certain extract of certain foods—such as eggs, strawberries and certain cereals.

If these simple tests all fail, a physician, oftentimes, can decide what causes the attacks by inoculating into the skin of the arm minute amounts of a sterile extract of each of the various foods. Or the substances considered capable of producing the symptoms. No discomfort felt until the substance actually caused the trouble is injected when a slight swelling or reddening and itching occur. Once the right substance is thus detected, relief usually can be obtained by the use of a certain extract of certain foods—such as eggs, strawberries and certain

Treating railroad ties with cresote preservative

Testing the bendability of a heavy wheel rim

Routing Cars via the Air

IN CONGESTED areas of cities, where there is not room for an elevated railway of the usual type, it might perhaps be desirable to adopt the novel expedient suggested by Alexander D. Beech, of West Pullman, Ill., who proposes that passenger cars shall be run through the air above the streets.

Not to fly, however. His idea is that the cars shall be suspended by cables from a supporting structure on one side of the street, which in places might pass along the tops of buildings. The cars would be lowered to the street level to take on or discharge passengers.

Along the top of the supporting structure would run a heavy truck on an ordinary track, carrying at each of its ends a pivoted lever-arm with a pulley-wheel at its outer extremity. Along this arm and over the pulley-wheel would extend a steel cable to sustain the suspended car—the latter being hung by a pair of cables (from both lever arms) out in space and clear of the structure.

The rear end of each lever arm is provided with a wheel that runs on an inverted track. This is an essential part of the structure. The cables are wound on drums which are driven by motors carried by the truck, and by this means the car is lowered or raised. Electricity, through an ordinary third rail, furnishes power for the transportation of the truck, and therefore for the transportation of the passengers in the aerial car.

Tree Saving Discovery

THREE-FOURTHS of every tree cut is waste. To reduce this waste, and to make possible the most efficient utilization of the one-fourth used, is to contribute in a very effective way to forest conservation. That is the purpose for which a forest products laboratory was established by the Forest Service at Madison, Wis. It is devoted to experiments which have relation to the better and more economical utilization of wood, and already its work has come to be recognized as of enormous practical value.

If the improved method of nailing boxes devised by the laboratory experts, and adopted by the National Association of Box Manufacturers, saves only one per cent of the annual loss in claims for damages to shipments paid by railroads, the saving on that item alone will be \$1,000,000 a year.

Tests of strength, resistance to splitting and ability to hold nails, which make it possible to classify woods for box and crate construction, have been greatly helpful in the same direction; likewise tests of such containers in a revolving drum, which, capable of handling loaded boxes up to 1000 pounds, is so constructed that the box follows a cycle of drops simulating those received in actual transportation.

Wood in the form of railroad ties, mine timbers, posts, poles, etc., destroyed each year by decay, is approximately equal in value to the annual cost of forest fires. By proper treatment with preservatives, such as zinc chloride or cresote, it would be possible to save a billion and a half board-feet per annum in railroad ties alone.

Decay of wood is disease, due to infection by microscopic fungi; the preservative kills the fungi, acting as an antiseptic. By the use of such preservative medicine great losses attributable to the so-called "dry rot" in buildings could be obviated. Every year fire destroys \$250,000,000 worth of houses and other buildings in the United States. If the wood used for such structural purposes were fireproofed with chemicals, much of this loss would be avoided.

It is estimated that all of the six billion

Wooden patterns for car-wheel castings are preserved by coating them with aluminum leaf

board-feet of lumber used annually in this country in the manufacture of small articles could be obtained from material that is now thrown away. This could be accomplished by cutting such articles direct from the logs, and by interchange between industries—i. e., utilization by one industry of the waste of another.

One way to save wood, which the laboratory has been working out, is to glue small pieces together. This idea has been successfully applied to the production of shoe-lasts, hat blocks, bowling-pins, wheel-hubs, and many other articles, not least important being propellers, struts and wing-beams for airplanes. A special kind of glue, which

Determining the amount of moisture in woods

whereby grain alcohol—utilizable for heating power, pharmaceutical products and colognes—can be obtained from wood waste. Its purity has created for this alcohol a special demand by compounders of medicines and scented toilet waters. It can

Revolving drum, with "drop" devices, simulating hazards of transportation for loaded boxes

makes a piece of "laminated" wood stronger than a solid block from the log, has been developed for the purpose.

The laboratory has sought successfully to develop uses for woodpulp—for waterproof containers; molded, for buttons and electrical fittings; and for the manufacture of smokeless powder, lacquers and artificial silk. Spent tanbark (a waste product) has been proved to be utilizable in the manufacture of roofing felt.

Discovery has been made of a process

derived in unlimited quantities from the waste sulphite liquor produced at paper mills, which contains nearly one-half of the original wood used for pulp.

Not the least interesting of the achievements of the laboratory is the discovery of a process for making cattle-feed from sawdust. As in the manufacture of alcohol from like material, the cellulose of the sawdust is first converted into sugar under pressure with dilute acid; then the sugar is boiled down to a thick molasses and mixed with the

Kill Blackbirds With Poison Gas

BLACKBIRDS do \$50,000 worth of damage in the Imperial Valley of California annually. They attack the milo crop (a kind of grain sorghum), and it is difficult to destroy them because of their habit of roosting in marshes, where it is not easy to get at them.

In response to an appeal for help from the farmers in that region, the United States Biological Survey has made an arrangement with the Chemical Warfare Service to wipe out the pests with poison-war-gas. Next autumn, on one or more nights when the wind blows in the right direction, a cloud of chlorine gas will be let loose over the marshes, and the blackbirds will pass out.

They are a migratory species, returning to the same feeding grounds year after year. It is thought that a wholesale killing will do away with the mischief for many years to come—perhaps birds will be incidentally and unavoidably destroyed, but the Biological Survey says that they will soon recover their normal numbers.

They are a migratory species, returning to the same feeding grounds year after year. It is thought that a wholesale killing will do away with the mischief for many years to come—perhaps birds will be incidentally and unavoidably destroyed, but the Biological Survey says that they will soon recover their normal numbers.

Peach Perfume

THE fragrance of a peach is surely one of the most delicate and delicious in the world. Where a quantity of the fruit, fully ripe, is heaped together, the "bouquet" intoxicates the nostrils.

Chemists have recently made a study of the odorous constituents of ripe peach pulp and have found that they are a rather complex compound of acids, esters, etc. By distillation of the pulp, they obtained small quantities of an essential oil, limpid, pale yellow, and with a very fragrant and intense peach-like odor. On cooling, it formed a transparent solid.

If means were found for utilizing this essential oil of peach in the manufacture of perfumes and pomades, it might furnish a welcome contribution to toilet luxury.

Aiding the Sand Hog

THE work of digging the vehicular tunnels beneath the Hudson River will necessarily involve exposure of many men to high air pressure in caissons, and doubtless there will be a good deal of trouble from illness caused thereby. Its most common symptoms are vertigo, difficult breathing, and nervous affections. Unconsciousness may even supervene.

As the matter is now understood, these symptoms are attributable to the formation of bubbles of nitrogen gas in the body fluids and tissues.

Experiments have shown that when a frog is put into a chamber filled with compressed air, and the pressure is rapidly reduced, a brilliant ray of light thrown upon the web of its feet will render visible bubbles of gas passing through the blood vessels. But when the pressure is raised to its previous height, the bubbles disappear.

The new medical idea for the treatment of so-called "caisson disease" is to put the sufferer into a suitably constructed chamber and raise the pressure of the air therein to the same height as that to which he was exposed in the caisson, thereby causing the nitrogen bubbles to be taken up by the blood in its circulation, and then to lower the pressure by slow degrees.

Newest Typewriter

THE newest invention in the way of a typewriter is a "cryptographic" machine. It is really two typewriters, which operate synchronously and in co-ordination with each other. You write on one of them in the ordinary way, and the other automatically produces a code letter.

That is to say, the letter you write is in ordinary English; the second machine reproduces it in code. The two machines are electrically connected, and by this means the second one is caused to operate responsively to the first.

The code employed may be any arrangement of letters desired, suitable adjustments of the electrical connections between the type-bars of one machine and those of the other determining, for numbers as well as letters, the system of the cryptogram.

A Device to Aid Golfers

A STROKE-GUIDING device for golf players has been newly patented by Dutox W. Flint, of Cranston, R. I. It is specially designed to cure the vicious habit of "slicing" the ball.

In playing golf there is commonly a tendency, especially on the part of beginners, to bend too much the left or guiding arm at the elbow, thereby shortening the swing and causing the club to slice or engage the ball above instead of below its center.

To remedy this difficulty, the player is told that he must hold his left arm rather rigid at the elbow, a requirement which the beginner does not find it easy to meet while making a stroke. Hence the usefulness of the above mentioned device, which is a sort of brace, readily attachable to the player's

Poor, Thirsty Terrapins

WHEN the great thirst fell upon this free country, nobody imagined that it could affect the terrapin. Yet it is a fact that, owing to prohibition, the demand for that once-valued turtle has almost ceased. Terrapin and champagne go naturally together. People cannot get champagne nowadays, and so they don't want terrapin stew.

The principal market for terrapin centers at Crisfield, on the Chesapeake. That town, which is built literally upon oyster shells, is also the chief crab center.

There is alarm about the threatened disappearance of the crab from Chesapeake waters, and it is partly on this account that the United States Fisheries Bureau has recently been making a biological survey of that great bay, which is the most productive fishing ground in the world. Upon the findings will depend measures of protection.

In a general way, the object of the survey (now nearly finished) is to obtain ideas

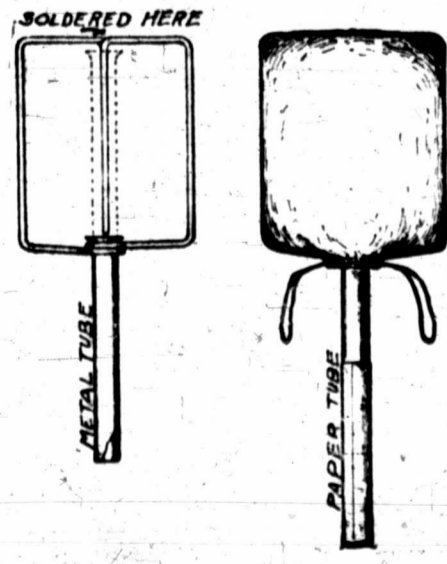

Pocket Cigarette Maker

TO "ROLL your own," and do it properly, is no mean art. Occasionally one comes across a gifted person who can do it with one hand—a most enviable accomplishment.

Anybody can make his own cigarettes, however, with the help of a simple little contrivance newly patented by Rodney S. Pullen, of Atlantic City. The performance requires no skill at all.

It is a small rectangular frame consisting of a single piece of wire, which is coiled into a ring to hold a hollow metal cylinder. The

latter is flared slightly at the top, to prevent it from slipping out of the ring, through which it slides easily up and down.

One end of the wire is turned down through the middle of the rectangular frame, forming a plunger which enters the cylinder when the latter is slip up through the ring.

The device is inserted into a bag of tobacco, the mouth of which is closed upon the cylinder by draw strings. The cylinder is then drawn out of the bag as far as possible, and a cigarette paper is wrapped about it, wetted along an edge with the tongue and turned inward at the lower end of the cylinder to prevent the tobacco from falling through.

The paper tube thus made is then drawn down from the cylinder for half its length, and the tobacco, falling from the inverted bag through the cylinder into the tube, is pressed therein by suitably manipulating the plunger wire inside the cylinder. The paper tube, thereupon, is drawn further down the cylinder, and the operation is continued until the tube is entirely packed. Result, a perfect cigarette.

Described at length in this way, the process seems elaborate, but in reality it is simple and can be quickly performed. When the cigarette has been made the tobacco bag is turned right side up, the cylinder is pushed inside of it, and the draw strings are tightened. The device is then wholly covered by the bag, which can be restored to the pocket.

Poor, Thirsty Terrapins

WHEN the great thirst fell upon this free country, nobody imagined that it could affect the terrapin. Yet it is a fact that, owing to prohibition, the demand for that once-valued turtle has almost ceased. Terrapin and champagne go naturally together. People cannot get champagne nowadays, and so they don't want terrapin stew.

The principal market for terrapin centers at Crisfield, on the Chesapeake. That town, which is built literally upon oyster shells, is also the chief crab center.

There is alarm about the threatened disappearance of the crab from Chesapeake waters, and it is partly on this account that the United States Fisheries Bureau has recently been making a biological survey of that great bay, which is the most productive fishing ground in the world. Upon the findings will depend measures of protection.

In a general way, the object of the survey (now nearly finished) is to obtain ideas

for the conservation and development of the fisheries of the Chesapeake, the oyster being of special importance. Nowhere else in the world are there oyster beds comparable to those of the Chesapeake, but, if their productivity is to continue undiminished, they must be better protected. The oyster fishery is conducted without regard for the preservation of the species, and sewage from Baltimore has done much damage over wide areas.

Thus it appears that a crab problem—the trouble in the latter case being due to the wholesale destruction of spawning crabs in the lower bay, to which their breeding seems to be restricted.

The survey has included observations of salinity, currents and temperature, supplemented by the collecting of all kinds of fishes and other animals, including the "plankton," or drift-life, comprising minute crustaceans and miscellaneous animalcules.

ALL THE NEWS OF ALL THE SPORTS ALL THE TIME

Spudders Send Voight To Showers in First And Cop Easy Victory

By PAUL W. LARKIN.

"Rip" Wheeler and his mates spent another profitable afternoon at Athletic Park Monday—the second in succession at the expense of the San Antonio Bears. It would have been more profitable had the Exporters succeeded in taking their final contest from the Cats in Fort Worth, but at any rate the Salmites didn't lose any ground to the league leaders while they gained a full game on their closest rivals for second place. "Rip" and his slugging companions compared with the net result that the Spudders defeated the Bruins 7 to 2.

The game went nine innings simply because the rules so provide. It wasn't really necessary to devote so much time to the affair, for after the first inning the issue was settled, as subsequent results proved. The Wichita Falls sawamiths by that time had accumulated a half dozen runs, which were ample for the visitors to manufacture only two during the whole matinee, and those after two men had been retired in the ninth.

Though Bob Becher collected three hits, the real slugger of the day was "Lightning" Blachoff. The Spudder backstop belted out a home run and drove in three runs in the third inning, after which he was working behind the plate for the visitors the first time in the series. Two hits were bunched in the final chapter, with a base on balls manufactured the aforementioned brace of runs.

Voight, who early in the season gained a reputation as the best pitcher in the league, was today the San Antonio ace, essayed to stop the turbulent Spudders, but he made a poor job of it. He was entirely unequal to the task of stopping the home crew and was knocked off the rubber before the first canto was completed. The Spudders were in a rambunctious mood, and their base-ers feeling—that was it, scarcely safe for any slasher to trust himself in their company. While on the hill he hit by the bat, Beck and many runs. He was relieved by Kelly who was also belted freely for a few innings, but the locals did not extend the game. Kelly followed up their lead in the first round and were content with seven runs.

Sharp Fielding.

The Salmites had another good day in the field. They didn't make anything that even resembled a home run, but they did beat the peg. Beck and many runs. He was relieved by Kelly who was also belted freely for a few innings, but the locals did not extend the game. Kelly followed up their lead in the first round and were content with seven runs.

Umpires, Ealy and Brashear.

EXPORTERS 3, CATS 5

Wheeler was in excellent form. He pitched masterfully in all but the last inning, when the Bears scored both of their runs. He held Hub Norton's clan to eight errors, no two of which were garnered in any one inning except the ninth. Three of these were committed by working behind the plate for the visitors the first time in the series. Two hits were bunched in the final chapter, with a base on balls manufactured the aforementioned brace of runs.

FINISHING 'EM WITH A PUNCH

BOB FITZSIMMONS
THE GREATEST ONE PUNCH FINISHER THE GAME EVER PRODUCED

THE KNACK OF LANDING A KO WITH ONE BLOW IS A LOST ART

Across the pugilistic horizon since the day that boxing first became a professional sport there have stepped mightily few thumpers who knew the knack of landing a sleep producer with one punch. Bob Fitzsimmons was one of them. We might say King of them. When Fitz decided it was time to deliver a K. O. he took great pride in doing the trick with one blow. If it became necessary to strike again Fitz was greatly chagrined. He felt that he was losing his punch. Old Bob possessed such a punch that he could tell to a round in advance just when he would finish his opponent. Patience was another paramount

Sport Shots

Wonder what the Galveston hurriers thought in the stands Monday night when they saw the Spudders off the Spudders club. Also wonder if they learned how to pitch to them.

Safety First!

The safest way to pitch to the Spudders is to throw one and duck.

Yes, Be!

If the Salmites ever start hitting, they'll win a lot of ball games.

Ripped Second Doomed.

It looked for a while as if the boys were going to break their own league record for hits in a single game. They had collected 14 blows before a man was retired in the fourth chapter.

Soft For Outfield.

The outfielders of the Spudders can best be described as factors that Bob Becher had the only putout in the outfield. Summa might just as well have stayed in the club house.

Daily Can Dance.

If a Home Is Your Desire

Look Over the Following Buys Which We Have to Offer You

FILMORE STREET—A completely furnished six-room house, has also garage, \$2750. This property is just off Tenth street and has the pavement.

MONROE STREET—One of the nicest and most desirable floor plans in an east front home to be had in the city, consisting of five nice size rooms besides breakfast room. Has hardwood floors throughout, has also servant's house and garage, \$1,600. This property can be handled if desired on exceptionally easy terms.

HUFF AVENUE—\$3,000.00 buys a home consisting of six rooms on this street. Has also servant's house and garage. Is situated west of Brook. There is positively not another such buy in the city to be had in a home of this class.

\$1,500.00—On Lucile street, a north front consisting of five nice size rooms besides breakfast room, garage and driveway. This property could not be built at this price and is one of the most desirable floor plans to be had in a home of this class.

\$4,000.00—Buys a modern six-room house on a \$22,150 foot lot near the high school.

If you do not see in our ads the location or the price home you desire, remember we have it, and only ask that you call on us.

GOREE, TEXAS, June 12.—The Knox County Singing convention met at Goree Sunday in the spacious auditorium at the school building in a half day session beginning at 2 o'clock in the afternoon.

Such appetizing, nourishing food for the hot days—Kellogg's CORN FLAKES they're so easy to digest!

Kellogg's Corn Flakes will become a mighty important part of your summer diet if you'll realize what they mean to health.

Cut down on heavy food during the warm weather. You'll feel a lot better and get away from that drowsy, sluggish feeling.

Kellogg's Corn Flakes are wonderful with the fresh fruits now in season; and, as an extra-dessert treat, serve Kellogg's with fresh fruit and a generous helping of cream—a dainty feast that is appetizing and delightful!

Kellogg's TOASTED CORN FLAKES

Kellogg's Corn Flakes are sold only in the RED and GREEN packages bearing the signature of W. K. Kellogg, originator of Corn Flakes. None are genuine without it.
