MANY COMPLETIONS IN PROVEN AREAS DURING PAST WEEK

WATER SHORTAGE CONTINUES TO BE HANDICAP IN MOST DISTRICTS.

PANHANDLE TERRITORY SEES MUCH LEASING

Good Wells in Eastland and Young Areas—Planet Deal is Among Week's Features.

A review of activities throughout the north and central sections of the state fails to show any development outside of the usual drilling campaigns now under way.

Some completions are reported from the various pools but in all cases in proven territories the Electric Young and Eastland pools furnishing their quotas.

Many tests are shut down for water and if soaking rains don't soon come many new operations will have to stop drilling.

The Planet Petroleum company's sale of their lease on the Burnett tract in the south Electric pool for a consideration of \$2,000,000 to the Empire Oil and Gas company is the topic of conversation among the oil men in that field.

On the Waggoner tract the Shamrock Oil company's No. 4 came in Thursday and is making 400 barrels from the 1900 foot sand.

The Gadiolous-Hobbs company's No. 73 Burnett was completed early in the week and is good for 350 barrels from the sand at 1900.

McDonald and associates are on top of the sand at 1274 in their tract on the L. F. Douglas tract, north of the tracks, and will drill in the next day or two.

The Texas company continues to keep up an extensive drilling campaign and at the present time has 18 strings at work on the Skins and Waggoner leases.

In spite of the many handicaps which include uncertain railroad facilities and water shortage the field with the possible exception of outside wells shows a healthy appearance in the oil industry.

May Ratings South Pool The Burkhardt pool is devoid of drilling but showed a gain of over 600 barrels in the runs for the past week acquired by the cleaning out of the hundreds of offset wells throughout the field.

Several tests are drilling in the shallow field to the south and an important addition to this part of the field is looked forward to by the completion of the Swan Petroleum company's No. 1 on the Peterson farm, about five miles southwest.

The top of what looks like a good sand was encountered at 2145 feet with a show of both oil and gas, casing has been set and the sand will receive a thorough testing out.

In the K. M. A. section the Freeman company's No. 2 on the Ferguson tract in the 1400 foot sand and it is estimated as a 100 barrel pumper. J. I. Bailey No. 2, an offset to the Freeman No. 2, is about to start drilling, having made water connections, and the White Oil corporation has started operations on their No. 1 test in the Kemp Kemper tract.

Young Continues Active While the slump in the price of crude oil has affected operations in almost every oil field inside and outside of Texas, at the same time the reports from Young county show that operations are going forward at a steady pace and show, if anything, an actual increase.

A review for the week in Young county shows the following com-

pletions: Collette & O'Leary, No. 1 7. C. Greenwald, has a good showing of oil around 2350 feet. Elk Basin Oil company, B. No. 15 Driver, was completed for 150 barrels at 1800 feet.

This well was started for a deep test and unexpectedly picked up this shallow pay. Fred B. Foster and company, Mahaney No. 2, struck the pay at 2123 and drilled into 2185, shot with 20 quarts of nitro, and is producing 250 barrels. This well was also started for the deep pay offsetting their big Mahaney No. 1 well when they unexpectedly picked up this shallow producing sand.

Halmack Oil company, No. 1 Hall, encountered the sand at 2150 and making 1,000,000 feet of gas. This test is a howling wildcat and is watched with considerable interest. If it proves a producer it will extend the Dunger field four and one-half miles north and east and will mark another producer north of the Burnett river. Ligon company No. 4 Whittemburg, was completed in the 1800 foot sand for 125 barrels. Mann of the K. M. A. completed their well for 125 barrels in the 1800 foot sand. Miller, Horner & Taylor Oil Operators and Bertrand No. 2 Whittenton is making 155 barrels in the 1900 foot sand. New Dominion Oil company, No. 2 Evans, tapped the pay at 2000 feet, and is showing up for 150 barrels. Penn Cities Oil company, No. 2 Heron, was completed for 200 barrels in the 2300 foot sand. Pomona Valley Oil company, No. 1 Hughes, is making 10,000,000 cubic feet of gas from the 1900 foot sand. P. H. West, No. 3 Costello, completed as a 25 barrel pumper at 1800 feet. R. L. Reed of No. 1 Williams, producing 100 barrels from 1900 feet sand. Blinn Oil and Gas company's No. 1 Heron completed for 275 barrels at 2200 feet. Tuloma Oil company's No. 1 Heron is showing 3,000,000 feet of gas with considerable oil at around 4300 feet.

New derricks are being hauled out every day and quite a number of locations, as well as applications to drill, have been filed this week.

In the Heron District Two weeks ago the sale of the Miller, Horner and Taylor property here for \$145,000 was reported. A substantial deposit was made at that time and the balance is being received. The purchase price covers a three-fourths interest as there is a one-eighth over-ride as well as the one-eighth royalty. There is one good producing well, another one nearing the pay sand and the new owners have started work on No. 2 and 3. The property is located just north of the Penn Cities Oil company lease, about a mile and a quarter northwest of Heron City.

The Heron City pool was extended about two miles to the north this week, when the Tuloma Oil company's well on the Mrs. Emily Kellum survey came in as a good producer. This well, however, about defines the northern limits of the field, as the golden field was found way down deep—1470 feet.

The Harrison-Crawford test across the river from here, has tapped the pay sand at 2040 feet and it will be given a shot. The hole is standing near full of oil.

The Trelle Oil corporation speeded in two new tests this week and has five rigs building. This company has completed a rig across the Brasos river, three-quarters of a mile west of the Miller, Horner and Taylor well (No. 1). It is on the Criswell survey. If it tests the "pay" will open up considerable territory to drilling.

The nearest producer at present is the Whitehead-Hinson well, 1400 feet to the south, which is making 500 barrels daily.

Nearly a mile to the south of the Whitehead-Hinson well, on the J. J. Pawley tract, Messrs. E. C. Read and Charles Burton will start a test next Monday. This is on the south side of the Brasos river and

a mile and a half directly west of Heron City.

Heron needs a hotel and needs it badly, as it is difficult to get a room there at any time.

Westland Completions. Westland county is still adding good completions to the district both from the Pioneer pool and the territories adjacent to the city of Eastland which includes the Lake and Martin sections. Many tests are being forced to shut down. Arrangements are being made by the Eastland Water company to lay a four-inch water line from Lake Eastland to the oil fields in this district, a distance of four miles, work to commence immediately.

A contract was also closed for the erection of a gasoline plant to be built on the Martin tract south of Eastland by the capitalists at a cost of \$200,000. The plant will have a capacity of 5,000 gallons of gasoline per day and will use over 1,000,000 feet of oil daily. The plant is expected to be in operation within the next 90 days.

Two good wells were flashed in the Eastland of the county with a combined production of over 200 barrels. On the Bond tract the Gordon Petroleum company's well five miles north of town, came in good for 500 barrels but has gradually increased and is producing 1200 barrels from the sand at 2550 feet. After tapping a sand at 2550 feet showing 15,000,000 feet of gas, the test of the Car-De-Zone company on the Hough tract settled down to an average of 1000 barrels with an estimated production of 1000 barrels daily. The company is drilling a well on the Latham farm three miles northwest of Eastland and is expected to hit the pay within the next day or two.

On the Owens farm about three miles southwest the Plateau Oil company's No. 1 test encountered a shallow sand at 1540 feet with a good show of oil and gas. This well is about half a mile north of the Car-De-Zone company's big well on the Hough tract. The owners are undecided whether to test out or drill to the deeper and more prolific pay in the Pioneer section.

At 2140 feet in the Pioneer section a shallow sand was encountered. The 2100 foot interval. No showing up

in drilling is anticipated as the water supply is still good.

Settling in Pampa. Activity in the Panhandle oil field for the past week has been confined largely to assembling acreage in blocks of from 1000 acres to 2500 acres for drilling contracts. Pending upon the distance from production. All of the 335 mile stretch between the Carson county producing fields and the Harvey gas area is receiving a share of this attention.

Many operators are in the field with geologists, selecting the choice contracts and many locations are expected in Carson, Gray, Hutchinson, Roberts and Wheeler counties within a short time. The present price of oil does not seem to worry land owners and in such instances they are insisting on immediate drilling.

At McLean, the well four miles east of town, is expected to produce 1000 barrels daily. The well has been shut down at 441 feet for four months, is fully financed and drilling was resumed August 21. The location is eight miles southeast of McLean. These wells are ten miles east of the Harvey gas area at Alameda and at once on the Hampe ranch one mile south of LaFlore county seat, where he has several thousand acres in a block. Elk, Bullington & Clark, Mayfield No. 1, sec. 43, blk. B-2, Gray county is drilling at 800 feet in "eyes."

In Carson county, Tipton No. 1, sec. 10, blk. 7 is drilling at 2300. Texas Co. No. 1 Burnett in the "6600" pasture is drilling at 2400 feet with 2,000,000 feet of gas. This well is in proven territory and a well is expected at 2000 feet. Elk, Bullington & Clark, No. 3 Burnett, five feet in pay, swab test indicates better than 500 barrels daily. Further drilling is expected to increase production. Shut down at 2075 feet.

In Hutchinson county, Gulf No. 1, Dial, sec. 20, blk. E, setting 5-inch pipe in red rock at 2045 feet. Casing off 75 feet of water sand. Whittenton No. 1, Seaford, sec. 22, blk. 45, shidding derrick, first hole lost at 200 feet. Holmes, McIlroy & McGee No. 1 Smith, sec. 10, blk. Y, after several days test with halter, well

shut down at 2000 feet, estimated 200 barrels daily.

In Potter county, Amarillo Oil Co. No. 3 Irvine, sec. 15, blk. M-20, drilling at 2250 feet. Two million feet of gas was encountered at 1530 feet. This well is 15 miles west of the Carson county producing wells and near the west line of the county, Amarillo Oil Co. No. 2 Masterson, sec. 102, blk. 6-18 is drilling around 2200 feet after casing off gas, this is to be a 600 feet well near the giant gassers, all of which suspended drilling around 2000 feet. against 62,000,000 pounds at \$2,000,000 a year ago.

The general decline in the exports of meat and meat products for July and for the seven month period, the department said, is a tendency which has been noted for some time.

"Most of these adjustments," the department said, "are in accordance with what has been anticipated in the trend of foodstuffs trade and they indicate in general the slow return to pre-war conditions which should be expected in the export trade with Europe."

FOODSTUFFS EXPORTED DURING JULY DECLINED

WASHINGTON, Aug. 26.—Foodstuffs exported during July declined sharply according to foreign trade reports issued today by the commerce department. Grains exported during the month aggregated \$46,700,000 as compared with \$44,000,000 July a year ago, while for the seven months ended with July, grain shipments a.m.s. aggregated \$275,000,000 against \$260,000,000 during the same months of 1931.

Reports of meat for July amounted to \$15,000,000 as against \$14,000,000 last year, while for the seven months period the total was \$78,000,000 compared with \$100,000,000 during the corresponding months last year.

Rice exports for the month aggregated \$2,000,000 pounds at \$1,000,000

SAVE YOUR EYES

L. R. BAILEY, Optometrist

To my friends and patrons: I wish to announce my removal from Dave Paul's jewelry store to the Kruger Jewelry Co. where I will take charge of the OPTICAL PARLOR.

Assuring all my customers as well as those of the Kruger Jewelry Co. the best of service. Confining myself exclusively to the examination and the fitting of proper lenses to the eyes, to relieve eye strain and muscular inefficiency.

L. R. BAILEY Optometrist WITH KRUGER JEWELRY CO. Eighth and Ohio Wichita Falls, Texas

Now Comes This New Ladies' Store

AND with it the joy of selecting your Autumn fashions from a brand new stock of ready-to-wear. Our old friends will all come. They have learned that the knack of dressing well lies merely in knowing where to buy.

Women who seek style do not choose at random. They know that apparel that is fashionable, in good taste and fairly priced is not to be found everywhere.

We have chosen to concentrate upon these important essentials.

We extend you a cordial invitation to call and just look. We will be glad of the opportunity to show you through our new store and what we have accomplished in preparation for the coming season.

Kimberlin-Smith Co INCORPORATED Correct Apparel for Women & Misses

820-822 Indiana Ave. Building Formerly Occupied by Martin's Book Store

IVER CHANNEL TO BE CLOSED SHORTLY AT STORAGE SITE

ING IS TO BE EXTENDED ACROSS RIVER, READY FOR DREDGE.

EXCAVATION STARTS ON SPILLWAY STRUCTURE

Drag Line and Steam Shovel Now at Work; North Side Survey Continues.

Excavating for the concrete spillway at the storage dam, which started early last week, is progressing rapidly, according to reports from the damsite. The concrete is a plain shovel and drag-line both at work at the spillway site.

The river channel at the storage damsite will probably be closed this week by the driving of steel sheet piling across the stream, although it is not unlikely that this will be delayed until the present period of unsettled weather is over. The piling will be driven from the conduit across to the existing piling on the north side. When this is done, the final step preliminary to the starting of dredging will have been taken.

The north side surveying party continued its progress down the river during the week, and has located the line for some distance below Wichita Falls.

RAILROAD GRADING OUTFITS TO MOVE TO OKLAHOMA SIDE

Grading crews and outfits on the Wya-wauka railroad will start work this week on the Oklahoma side of Red river, having their work on the Texas side about 85 per cent complete. Chief Engineer H. M. McFarland said Saturday.

Electra News Budget

ELECTRA, Aug. 24.—A premium of \$20 has been paid E. L. Graves for the first bale of cotton. Mr. Graves lives six miles north of town and best John Sanders of County Line by a matter of a few hours Wednesday. He brought 1512 pounds of seed cotton, while the second man has 1494 pounds. The local gin will not start until Monday.

Continued dry and hot weather is causing the plant to open rapidly, and Graves expects to have another bale within a few days. He estimates that he will pick 25 bales from 150 acres.

Electra was among the last towns in this part of the country to receive its first bale. J. W. Baggett had a first bale in Harris Saturday for which he received 21 cents plus a premium of 32. Burkburnett's first bale came in Wednesday of last week from across Red river. J. D. Laney was on the streets of Erick, Okla., Monday with the first cotton there. He received 22 cents a pound and a premium of 214.

Braet Schur of Hinds had the first bale in Vernon a week ago Thursday. It was Acala variety with that 1 1/2 bales in Harris Saturday for 23 cents. Seymour, Quannah and Olney also reported first bales last week.

M. Miller, living in the south-east part of the county, brought in the first bale to Wichita Falls August 11. Some cotton on the deep sand promises a yield as high as three-quarters of a bale to an acre, despite the terrific heat of the last few days. On tight land where planting was late the yield will be a practical failure.

Teachers on Program. ELECTRA, Aug. 24.—Four Electra teachers will appear on the program of the four-county institute which convenes in Wichita Falls September 4 and includes Wichita, Wilbarger, Archer and Clay counties. Superintendent E. M. Dismore will speak on "Supervised Play and Athletics." Principal J. K. Stalcup of the local high school will deliver an address on "Science Tests."

Misses Louise Kelly and Vera Jobe will talk on "Teaching of History" and "Classification of High School Libraries," respectively. The Electra schools begin work September 4 with a faculty of 46 teachers. This represents an increase of 11 over last year, and includes Superintendent E. M. Dismore; J. R. Stalcup, principal; C. M. Eden, mathematics and athletics; Minnie Wilson, assistant in English; Leta Mae Cooke, English; Opha Dennis, domestic economy; E. E. Rogers, mathematics and athletics; Louise Kelly, history; Marie Alexander, Latin; Ruth Simpson, commercial subjects; Ruth Bradshaw, bookkeeping; general assistant; Vera Jobe, librarian and general assistant.

Junior High School—J. V. Harrison, principal; Mary Smith, high 4th; Mrs. Homer Jones, Mr. and Mrs. Wesley Hogue, Misses Juanita Douglas, Lois Mae Gibson, Laura Randall, Mabel Edwards, Grace Morrow, Josephine Hagan, Lierena Friend; Messrs. Lon Cox, Frank Doover, Jim Gookin, Gordon Roberts of Decatur, Charles McGinn, O. B. Grant and Claud Vaughn.

ing the trip in their automobile. On their return Miss Lobus will leave for Nashville, Tenn., where she expects to enter Ward-Balmeont college. She graduated from the local high school last May.

Misses Moore, high 4th; Hope Tackett, writing; Edna Costly, high 4th; Allie Mae Unsell, reading; India Short, mathematics; Christina Broadstreet, English; Margie Ellison, supervisor of music.

Ward School—Ida Lee Falls, principal; Eura Wilkinson, Ethel Durso, Ernest Adams, Lillie Wells, Lowry, Mabel Perry, Irene Windsor, Marie Farham, Lorna Shephard, Katherine Donnell, Imogene Henton, Margie Robinson, Amy Crutchfield, Thelma Sherrill, Edna Wendon, Francis Bossert, expression; Mary Ellen Scott, piano. Miss Nettie Campsey is principal of Red River ward. Miss Lois Smalley, teacher of agriculture, geography and music, has resigned and will attend North-western University.

Visit East Texas. ELECTRA, Aug. 24.—Mr. and Mrs. George LeBus and daughter, Archie, have gone to East Texas where they will visit relatives for 10 days, making the trip in their automobile.

WILL NEAR TEMPERATURE. ELECTRA, Aug. 24.—The Electra board of education will hear complaints next week from property owners who insist that their taxes are too high. The board has been studying this week to pass on conditions. The board was appointed by the city commission. It is composed of R. E. Schaefer, E. V. Halton and J. R. Lawrence.

Inspect Improvements. ELECTRA, Aug. 24.—Sanitary Officer William Schribe, and City Health Officer Dr. Carl Steen of Burkburnett have been in Electra this week inspecting the improvements being installed in the city's water system. Burkburnett officials are considering making additions to their water plant similar to those made here.

Comment was made as to the remarkable simplicity of the local plant. It consists principally of three large concrete settling basins, together with a mixer for the treatment of the water, which is set between the basins. Water passes through this mixer into the basins and is allowed to stand from 12 to 16 hours before being used. Each basin is filled in turn and allowed to settle. The sediment is drawn off twice a week through an outlet at the bottom, the walls being washed down at the same time. The system carries a bonded guarantee to provide water which will at all times meet the government standards of purity.

Electra's improvements, when completed will cost between \$50,000 and \$60,000. This includes a new 10-inch pipe line from the municipal lake to the stand pipe, a new pump-out plant, a new sewage disposal plant, and the settling basins.

Miss Moore Entertains. ELECTRA, Aug. 24.—Miss Faye Moore entertained with a bridge party at her home Wednesday night. Ice cream and cake were served to Mr. and Mrs. Jera Barnes, Mr. and Mrs. Jera Barnes, Mr. and Mrs. Jera Barnes, Mr. and Mrs. Jera Barnes.

Tag Day For Legion. ELECTRA, Aug. 24.—A tag day will be conducted by the Clinda E. McDonald post of the American Legion next Saturday. Its purpose is to secure funds with which to complete the new ornamental iron fence around the local cemetery. About \$175 was secured on the occasion of a tag day last month for the same purpose. One hundred dollars was contributed by the Ku Klux Klan.

No More Boxing Events. ELECTRA, Aug. 24.—The Good American Legion post announces that no more boxing bouts will be sponsored at this time, as a result of the ruling by the county attorney that such are contrary to the state law. Boxing and wrestling have been regular events with the legion in Electra for a long time. "The American legion is for the law all the time," was the comment made by the local adjutant when asked for a statement of the matter.

Team to Enter Regatta. ELECTRA, Aug. 24.—An invitation of the Electra lodge No. 393 K. of F. has been accepted by the third degree team of the Wichita Falls lodge to give the initiatory work here Monday night. After the initiation-ice cold watermelon will be served. Plans are being made to have a large attendance at the D. O. K. K. ceremonial in Wichita Falls, Monday, September 4.

Refugees From Vacation. ELECTRA, Aug. 24.—County

Agent Guy R. Jones has returned from a two-weeks' vacation spent in Colorado. He reports that crops in this section are the best he has seen. Even on the irrigated lands of Colorado there is a shortage of water.

Texas-Oklahoma Fair, September 20 to October 4, Wichita Falls.—Adv.

When a gang of confidence men a few years ago fleeced J. Frank Norfleet, a Hale Center, Texas, farmer-herd out of twenty thousand dollars they had little thought of what a retribution they were bringing upon themselves. Norfleet was no common sucker to lose his money and after a futile effort to give up an attempt to bring to justice the men who fleeced him. Norfleet took the trail of the confidence men and hung on like a bloodhound. After the expenditure of thousands of dollars and a year's work he captured one of the men, who was finally convicted and has since died in prison. Norfleet's experience made him a specialist in trapping confidence men and he didn't give up his work with the capture and conviction of the man directly responsible for swindling him. Dispatches from Denver Friday told of the arrest of thirty-three persons in different parts of the country alleged to have been connected with swindling operations through information given by Norfleet.

Confidence men hereafter are likely to be more careful and not select Texas farmers for victims, and especially a Texas farmer who happens to be the sheriff of a West Texas county.

We don't know what Frank Norfleet's middle name is. It ought to be Nemesis.

King George is broke again. That man must be farming.

By fall all fish left are hard-headed from sinkers bouncing off.

Domestic clouds are usually accompanied by a lot of thunder.

In Johnstown, the mayor said they could sell beer. Remember the other Johnstown flood?

The sad thing about ears being back is it takes more rouge.

A THOUGHT FOR TODAY

A prudent man eschews the evil, and hides himself; but the simple pass on, and are punished.—Proverbs 27:12.

Who shall decide when doctors disagree, And soundest consultants doubt, like you and me?—Alexander Pope.

TEXAS-OKLAHOMA FAIR, SEPTEMBER 30 TO OCTOBER 4, WICHITA FALLS

LET'S NEVER HAVE ANOTHER CAMPAIGN LIKE ONE JUST CLOSED.

Everybody, even the defeated candidate, must be glad the primary is over.

In the campaign just closed a very large number of voters were confronted with a choice which they could make with little conviction or enthusiasm. Their choice really being a choosing between the two candidates for United States senator whom they considered the least objectionable. A good many voters have made such a choice with the hope that it wasn't as bad as they feel it is.

No real issues have been discussed in the campaign and the people are without any more light on big issues than they were before the run-off campaign opened. On the other hand the voters have been regaled with unsavory personalities that have been disgusting.

The democratic party has a position of high prestige in Texas but even as strong as it is another campaign or two like the one just closed is likely to weaken this prestige.

But the people themselves are to blame for the kind of campaigns we are having, for as long as they will applaud and shout and yell at personalities and pay scant attention to those who offer an earnest discussion of real issues we will have just the sort of campaigns we have just gone through. The candidates give us the kind of stuff we seem most to want to hear. And that is one reason why we have the kind of candidates we have to choose from.

Our salvation must come from a big constructive program—a program so big and splendid that it will challenge the imagination of the people and will make piffle and personalities look so small and mean that no candidate will dare to conduct a campaign of that character.

DEMOCRATS IN TEXAS TAKE THEIR NOMINEES STRAIGHT.

It may be poor policy for this newspaper to criticize the writings of its Washington political correspondent but when Mark Sullivan wrote in The Times a few days ago that the alternatives offered in the run-off primary in the Texas senatorial race would make favorable conditions for an independent candidate, he showed he had not really fathomed the depths of Texas democracy.

Many readers, we are sure, have agreed in the main with Mr. Sullivan's very interesting observations on the Texas campaign, but there are few of them who believe there is any hope of electing an independent senatorial candidate in Texas. It just isn't done down here. Nominations in a democratic primary in Texas still means election. And as the majority of voters go into the democratic primary there is nothing else to be done, for the voter in voting in the primary automatically pledges himself to support the nominees of the primary.

No even though it might be highly desirable, there isn't any chance of an independent candidate for senator being elected in Texas.

The Denton Record-Chronicle discussed this tendency on the part of Washington correspondents to speculate on the chances of an independent candidate in Texas. "Washington correspondents," says the Record-Chronicle, "apparently have about as remote an idea of political conditions in Texas as it is possible to be no further away. The gossip they send out about Texas politics may read interestingly to the people of other states, but it sounds pretty much like a joke to Texans. Even trained observers, conversant with political situations generally, never seem to realize the fact that the democratic primary brings an end to politics in Texas, because nomination is equivalent to election. Talk, therefore about an 'independent democrat' entering the Texas senatorial race and making any headway with it or of a coalition of democrats and republicans, is the simplest kind of 'bunk' in the face of the brutal democratic majority in the Lone Star State and the fact that Texas democrats take their post-primary politics like they used to take their liquor B. F. straight."

Rev. A. C. Parker, grand cyclops of the Dallas Ku Klux Klan, has raised a question of veracity between himself and former president Woodrow Wilson, and says that he is willing to stand or fall on his statement. Watch out below.

About this coal, it takes a lump sum to get a lump.

YOU AND I OUT OUR WAY

By ALBERT AFFLER
DIFFERENCE
Dr. Harvey Fletcher, summing up experiments by telephone companies, says that no two people hear exactly alike. Each member of an audience, listening to a musical concert, hears something a trifle different than heard by the neighbor.

PERSONALITY
An able statistician, electrician, or other specialist who is called upon to make a diagnosis of a patient's condition. He is wrong. Personality is the most mysterious force.

RACING
The 1160,000 stables that used to be the home of Dan Patch burns at Savage, Minn. It will open locked doors in many memories.

MONEY
General Contractors check up and predict that 1922 new dwellings will be built in the United States this year.

GO-GETTER
In Sweden socialism is leveling the wages of skilled workmen down to the unskilled level. So claims Dr. Hugh P. Baker, who made a trip to study the books of the American Pulp and Paper Association.

DANGER
American corporations, establishing factories in Germany where they can get cheap labor, are warned by economists that a day of reckoning is inevitable.

SPRITS
A "spirit picture" of Conan Doyle's soldier-son is printed in the American Magazine. Doyle is convinced there was no trickery. He took his own marked photographic plate to the medium, put it in the camera, and when he developed the plate himself, the deceased son's likeness showed up in the background.

OUTLOOK
Information that will soon affect your pocketbook: In the week ending August 5, the railroads loaded 28,122 cars less than the corresponding week of 1919, when business was going so fast it threatened to burst.

LEARN A WORD EVERY DAY.
Today's word is—turpitude. It is pronounced—tur-pi-tyoode, with accent on the first syllable. It means—inherent baseness or wickedness of principle; depravity. It comes from—Latin—"turpis," foul, base.

Uncle Gus.
Uncle Gus has his pain-leaf fan blattely, keeping time with the steady rhythm of his jaws as he munched his quid of natural leaf.

I reckon you heard about Sam Howard," said he. "He come back from the north with a new kind of medicine, an' them doctors up there says he ain't got no other chance of getting well. Live for five months, maybe. I reckon Sam's in a different kind of feller now. He's always been right rough, but if you'll watch close you'll see a change. Folks that get incurable diseases begin to understand things down here ain't so dang'ed important after all, an' they begin to give their hearts right. Well, I reckon that's a sign of good sense, but what I can't understand is why folks don't see that everybody has an incurable disease. You got it, son, an' I got it. I got a bad case. It's a disease called age, an' the ain't nobody escapes it. Seems to me if folks was right bright they'd understand an' kind of keep the houses in order, without waitin' for no doctor to break his news."

God Help Us I
The great wonder of all time is that God does not despise these every creature called men and their His back upon them, leaving them to work out their own damnation without benefit of mercy.

Aunt Het.
I reckon the reason modern girls run around with older men is because the boys they'd like to go with ain't got no money to spend on 'em."

LET'S GIVE THE GIRL ACROSS THE STREET
The course of true love never runs smooth. Miss Sallie Jones and her mother, from the county seat, are guests at the home of Hiram Patchit, the butcher boy. Miss Sallie is Hiram's cousin. Mrs. Jones is a stout lady, destined by force of circumstances to do her own cooking and when the heat of summer makes kitchen work burdensome she escapes it by coming down to visit the Patchit family. Miss Sallie is an annual sensation. She has two excellent reasons for wearing her skirts unusually short; she employs rouge with discretion and is charming effect, and she possesses evening frocks that cause the ladies to thrill with mingled awe and consternation. Hiram met Miss Sallie and her mother at the train station last night, and it isn't long before everybody. Word of it got about town, of course, and when a swain

While examining his reflection in a mirror Tuesday morning, little Willie Morris asked his mother if Indians were just white people that years ago had got freckled solid.

FOLKS BACK HOME

Sketches by J. H. STRIEBEL

ANXIETY
Nearly the whole of man's energy is expended in pursuit of happiness; that he so frequently fails of his object is due in large measure to the fact that he pursues too eagerly and thus becomes prey to anxiety, arch-enemy of happiness. One who courts too eagerly but invites indifference to his wooing.

Persons having defective mental equipment are uniformly happy—no joyousness, perhaps, but placid content, as an ox is content as it munches fodder in a stall. They are happy for the same reason that an infant is happy while devouring the contents of the mangle bottle. They have so little understanding of the situation that they do not realize that something unpleasant impends. These folk are classed as morose. They may be happy without benefit of either philosophy or religion.

The purpose of life is to attain happiness and religion is a religion. By promise of bliss hereafter they take away the sting of existence. They explain that life is but an interval between better states; that nothing is so important as it seems; and that misfortunes, being inevitable of affecting the soul, are not to be dreaded, but accepted with resignation and properly scorned.

This philosophy and religion afford happiness by removing the cause of anxiety, and because these alone can conquer anxiety they are essential to the happiness of all persons who have developed the ability to think.

The morose may be happy without conscious effort. Anxiety requires thought, and the morose think very little. But if intelligent folk would be happy they must contrive a philosophy to overcome the anxiety that intelligence encourages.

Willie Willie
While examining his reflection in a mirror Tuesday morning, little Willie Morris asked his mother if Indians were just white people that years ago had got freckled solid.

TODAY'S TALK

By GEORGE MATTHEW ADAMS

ON KEEPING WARMED UP.
I note that a machine goes better after it gets warmed up. Your automobile frequently has to be coaxed until its engine begins to warm. Then you get the best from its power—smoothness and dependability.

The human being works best as his interest is stimulated, for without interest, the brain works mechanically.

We all have levels of energy—and the majority of us work far below our best marks.

The world is filled with surface workers and surface lives.

The runner knows that he must get his "second wind" before he can hope to cope with long distances and become a champion.

To us all comes a period in our attempts when we become tired. As though the body began to say: "Oh, it isn't worth while—quit!" But the real man says at that time: "Keep on a-keepin' on"—and before he knows it he is doing the unexpected and the seemingly impossible—only to wake up some fine morning and feel that he is among the ones of power and influence in the world.

The hardest thing about any task is the deciding to do it. Then the next hardest thing is to get over the first rough places. Then it is easy sailing, for you have learned confidence and have stimulated your faith to the production point.

Effort must be tapped before they are able to show their possibilities.

Then as you warm up, your enthusiasm carries you along to newer heights, your vision is kept alert, and your creative powers awake from their slumbers.

Get warmed up—and then stay warmed up! The engine takes less fuel after it gets well under way than it does at the start. It's the same with the machine that it is with you. The higher you go in achievement, the easier becomes each added task—for having secured confidence, you have an accumulated knowledge of your capacities that spurs you on to bigger things.

Keep trying for a higher level—for a newer and better record.

Another good thing to remember is that if you keep warmed up, you are able to meet emergencies and to act with good judgment—sure of your ground. (Copyright, 1922, George Matthew Adams)

PART ONE

PLANET \$3,000,000 DEAL FEATURE OF WEEK AT ELECTRA

ELECTRA, Aug. 26.—A \$3,000,000 deal in the outstanding event in local circles for the week. It is the purchase of the holdings of the Planet Petroleum company by the Electra company in the Electra field. Included in the sale are some 55 wells with a production over 5,000 barrels daily. The Planet lease covers slightly less than 50 acres in the south Electra field out of the Burnett holdings. In a recent suit, the Glendon interests secured a decision which gave them a strip claimed by the Planet people, the tract proving to be short.

The Planet company has had since April one battery of three wells said to be the best trio in the north Texas field. These put 1,900 barrels a day in the tanks for some time. Planet's No. 44 Burnett was the second well brought in from the 1905 foot sand in the south Electra field since last April, and this started an intensive drilling campaign to prove up the deep sand over an area of perhaps three or two miles.

J. C. Holman of Fort Worth started the Planet Petroleum company three years ago. At first the company confined its efforts to drilling shallow wells and brought in a number of 50 barrel producers at 900 feet. Later on wells were drilled into the 1400 foot sand and until later went to the 1600 foot sand. Some of these producers are credited with being good for 350 barrels a day.

Considerable interest has been attracted by the announcement made by the O. L. D. syndicate of New York that the Electra field has been selected as one of the first three locations made by these interests in an endeavor to extend the pools that are already producing. The other two are in Kansas. It is the intention of this gigantic wild-cattling organization to drill 100 wildcat wells.

Two 400-barrel wells are reported this week, despite the drop in production to 23,400 barrels. One of these is the Shamrock Oil company's W. T. Waggoner No. 6 which found the pay at 1257 feet. The other is that of the Hobbs-Gladstone, No. 72 Burnett which is an inside location, at 1248 feet. No. 88 on the same lease is a recent completion from this sand and is reported making 350 barrels a day.

McDonald et al have a well on the Douglas in the east Electra field, which was brought in from the 1900 foot sand, which swabbed 50 barrels an hour.

The McClure, Grant No. 1, on the Jennings tract was finished for a 50 barrel well. This sand was found at 1800 feet and was first thought to be a dry hole.

POSTAL OFFICIALS ARE INVESTIGATING ROBBERY

ARLHNE, Aug. 26.—Postal officials are rigidly investigating the robbery of the postoffice at Blair Monday night. The robbers evidently were automobile yegmen from the fact that two cars were used in carrying away the loot, consisting of stamps, pocket knives, shoes, cloth and other merchandise which was carried in the store which also used as the postoffice.

BURKBURNETT IS PLANNING A BIG CELEBRATION SEPTEMBER 4 INCLUDING LABOR DAY PARADE

BURKBURNETT, TEXAS, Aug. 26.—Burkburnett is to be scene of a big celebration on September 4, the occasion being for the purpose of celebrating the formal opening of the concrete highways entering this city from the south and east and which are now opened up to traffic. Everybody is invited. Burkburnett people are going to show on that date some real hospitality. The chamber of commerce is sparing no expense to make the occasion one to be long remembered by those who avail themselves of the opportunity to attend.

The success of the event is already assured even thus far in advance of the occasion. Free watermelon will be served throughout the day. Plenty of music will be had and games for both young and old will be had during the day.

On September 3 prior to the big celebration the merchants in Burkburnett will offer special inducements to the traveling public for their patronage by offering many things of value at greatly reduced prices. This movement by the merchants is taking advantage of the chance to widely advertise their commodities through the same channels of advertising as will give the big celebration on September 4.

The following program has been arranged for this occasion:

8:00 a. m.—Baseball game at Harbin park. Masked Shriners vs. Magnolia. The Shrine band will be at the park and furnish music.

8:00 p. m.—Mammoth street dance.

does not travel backward, like the crayfish. Although it holds on to some of its old customs an unusually long time, when it does move it refuses the old, discarded ways and takes up something better.

The present primary law is not perfect, but it is preferable to the convention method in many ways. The national nominating conventions of both the democratic and republican parties are run on the delegate plan. Two years ago they passed up a Hoover and a Madole and nominated a Harding and a Jimmie Cox.

The voters, having once obtained the right to nominate candidates, will never relinquish that right to the politicians. Let political leaders beware what they think to do in this matter. There is but one thing to do and that is to amend the primary law to cure the defects.

Most of the states have the Australian ballot system. It came by its name by reason of having been tried out and perfected in Australia. No state having once adopted the plan has discarded it. Australia has also perfected a primary system so simple and effective that in the past eighteen years they have had no reason to change it. The plan provides that the voter shall indicate his first, second, third and fourth choice for an office if there happens to be that many candidates. On counting them, if no candidate has a majority of first choice, the second choice ballots are counted and added to the first, then third, etc., until some one has the majority.

The effect of this system is to insure the majority that their will

will prevail no matter if they have a number of candidates. The majority will always have the "kind" of a man they want. The minority no matter how skillfully they vote, will always be defeated. This also does away with the expensive and cumbersome second primary. Let's get busy and amend. Let's not destroy the primary law.

E. VAN DEVENTER.

COMPLETES SURVEY ALONG LAKE DITCH SEES MANY FARMERS

L. F. Gabbard, farm and ranch economist at the U. S. Experiment station at College Station, Saturday completed the first phase of his preliminary work here, and will leave early Sunday for Rockwall county, where he has a survey in charge.

During the week, Mr. Gabbard talked with about a score of farmers along the Lake Wichita ditch, and compiled a large amount of data based on their experiences. This data will be the basis for a report on some phases of irrigation farming in this section. Later, a similar survey of farmers in the territory to be irrigated from the big lake will be undertaken.

Members of the soil survey party will be here to begin their work before many weeks, Mr. Gabbard said Saturday.

BUILDING PROJECTS HELD UP; FEW PERMITS ARE ISSUED

Traffic conditions are seriously hampering building operations, according to local contractors, who report a number of jobs held up by inability to get material delivered. Building permits were few in

number last week, the total amount involved being only \$5,550. The following permits were issued:

Grady Taylor, garage, 1408 Bell; \$195.

Joe Young, garage, 1004 Fourth; \$95.

F. M. Mott, two three-room residences, Twenty-fifth street; \$2,000 each.

J. E. Patrick, garage, 2304 Teuth; \$100.

G. W. Backus, frame residence, Grant street; \$600.

J. C. Hunt, repairs, 908 Lamar; \$200.

J. E. Burris, servants house, 1415 Eleventh; \$150.

BANISH GRAY HAIR

MANY charming faces are aged by prematurely graying hair. If through illness or exposure to harsh conditions your hair has become gray, streaked or faded, "Brownatone" will bring back the look of youth. Thousands of women have found their hair to natural shades with this modern hair restorer. Any shade from golden brown to black. Acts instantly, easily applied and guaranteed permanent to hair, scalp or skin. All dealers for and \$2.50. Trial bottle sent direct for 15c. The Kenton Pharmaceutical Co., 610 Guggenb. Bldg., Chicago, Ill.

VOICE OF THE PEOPLE.

Editor The Times:

The people have just had a fine example of the shortcomings of the Texas primary law. It is certain that a large majority favored neither Mayfield nor Ferguson.

It has always been said that two compact minorities could win places on the run-off, where the majority is divided, and thus thwart the will of the people; and this apparently is what has happened. The disappointment with the present plan showed up at the recent democratic county convention where an effort was made to start a move back to the old delegate convention plan. Here it was contended that while the convention system gave us a Bill and a Culbertson, the primary has brought forward a Ferguson and a Mayfield.

In spite of the argument, the convention refused to go on record as favoring the discard of the primary.

There is just one reason why this was not done and will not be done. That reason is because the cause of progress and democracy never takes a backward step. The world

MOVIE CALENDAR FOR THE WEEK AT LOCAL THEATRES

The Prodigal Judge Coming to Empress Beginning Monday

One feature of "The Prodigal Judge," the Vitaphone special production which will be shown at the Empress Monday, Tuesday and Wednesday, in which the all-time star, is the painstaking care which is put into every little detail of costume and local color. The story deals with the old South, the South of 1835, when slavery and corn whiskey were still permitted by the constitution. To get the correct background, several big location trips were deemed necessary.

The story of "The Prodigal Judge" is well worth the plans that have been expended in making it. It is taken from the famous novel of the same name by Vaughn Ketter. This book broke all sales records for the year 1911. It was not merely a best seller, but time proved it also to be a great book, acclaimed by scholars and critics. And the reading public all over the country. It has enjoyed a steady sale since the year of its original triumph.

"The Prodigal Judge" abounds in whimsical, interesting characters, and in dramatic, adventurous action. And the whole culminates in one of the most thrilling duels scenes of history or fiction. On the stage, Maclay Arbuckle, the judge in "The Prodigal Judge," refused to look over the footlights during the performance, and this is due to an experience he had when he first appeared upon the stage. "Then I left my law office in Texas to go on the stage, I joined a theatrical company to appear in a farce," explained Arbuckle. "My part was one of Dutch-dialect comedy.

"They dressed me in a quaint suit of clothes, put a moth-eaten wig on my head and covered my chin with whiskers. When they had finished with me, I looked in a mirror and found all semblance of the Bowie county, Texas, lawyer vanished, and I stood revealed as a so-called stage-comic. During my first scene I heard quite a lot of laughter and concluded that I was a 'rot' as they say. I became rampant and looked out at the audience to enjoy the sensation I thought I was creating. I glanced at the front row and met the story stars of three set faces and overheard the remark: "Great Heavens! They must have got that fellow from a livery stable. "No sir, I never look directly at my audience, I had my lesson and I fear I might again see those scowling faces and catch some reference to a livery stable."

"Shadows of Conscience." You don't need to be afraid to bring the kiddies, your best best of your grandmother to see "Shadows of Conscience" at the Empress Thursday, Friday and Saturday. It's just what we have been looking for in the way of clean, American drama. It has plenty of thrills but no blouses. The kiddies will like the child scenes and, best of all, your best would like the fights and the smashing climax and your grandmother will enjoy the good old-fashioned standard of morals that prevails.

"Shadows of Conscience" is a story of yesterday in this country, but the entertainment value is such that it can be appreciated at any time and in any place. Action and suspense run high but there is not a single objectionable scene or distasteful moment. Our censors must have had a light job when they gave this picture the "once-over."

Russell Simpson is a hero, as an actor and as a man in his role. He has two charming feminine assistants in the persons of Barbara Tennant and Gertrude Olmstead and a powerful aid-de-camp in Landers Stevens, the "heavy." This able cast has been directed by John F. Mcarty and have something to offer that will please all types of patrons. As an added attraction for the back half of the week the Empress offers Buster Keaton in "The Boat," a splendid picture, said to be the best comedy that Keaton has ever produced.

REGRESS ARRESTED IN AGGRAVATED ASSAULT CASE
Apts Jackson, regressed, was placed under arrest by the sheriff's department Friday night on a charge of aggravated assault. It is alleged that she attacked another regressed by the name of Jumper with a knife and cut the latter's arm. It is said that the row arose over a remark alleged to have been made by the injured party in the cutting scrape.

COMING TO STRAND, SEPT. 4

MONTE CRISTO. WILLIAM FOX SPECIAL PRODUCTION.

"Without Benefit Of Clergy" Comes To Strand Monday

"It seems to me that it must be the most carefully-worked film that has ever been staged." Those are the words of Rudyard Kipling after he had seen photographs of the production of "Without Benefit of Clergy." In writing to Mr. Randolph Lewis, father's scenario and technical expert, who spent several months in England conferring with Mr. Kipling and coaching the famous author in technique of photoplay continuity, Mr. Kipling said: "I am just back from Algeria and France, to find the photographs of the film waiting me. They are superb, and more correct in impression of detail than I could have imagined. The street and courtyard scenes are especially good, and I was very much amused to see how you had managed to get the native cart—the skis—in the foreground. I have, as you know no experience in these matters, but it seems to me that it must be the most carefully-worked film that has ever been staged.

"As to the characters, I find them extremely good. Mr. Khan is, as far as make-up and nose goes, quite perfect. I am glad to see the baby wears the little gold cap. The study of Amersa against the night sky is to cover her in a really splendid one. "I wish that you were here that you might have heard all that we said about the film, but since that cannot be, I want you to give every one concerned in the work, which has been done, my very best and heartiest thanks."

"Without Benefit of Clergy" as produced by Robert Brunton for Pathé and under the personal supervision for Mr. Kipling of Randolph Lewis, will be seen at the Strand Monday, Tuesday and Wednesday. James Young directed and the cast includes Virginia Brown, Patra, Thomas Holding, Evelyn Selbie, Otto Lederer, Boris Karloff, Nigel de Brulier, Ruth Shielin, Herbert Fryer and others. "Viola Dana in 'They Like 'Em Rough'" will be the attraction at the Strand for the last half of the week.

Texas-Oklahoma Fair, September 30 to October 4, Wichita Falls.—Adv.

MAJESTIC ON MONDAY

GLADYS BROCKWELL in "PAID BACK" A UNIVERSAL ATTRACTION

"Bonded Woman" Comes to Olympic Also May McAvoy

Richard Dix and John Bowers, both popular leading men, are seen in the support of Betty Compson in her new Paramount offering, "The Bonded Woman," which is attracting immense crowds and which comes to the Olympic theatre Monday, Tuesday and Wednesday. At the beginning of the picture, an interviewer asked Director Philip E. Rosen, "Which one is the leading man?" "Both," replied Mr. Rosen with a smile. This didn't satisfy the interviewer, so he sought out Albert S. Levino who wrote the picture play from the late John Fleming Wilson's story, and put the ques-

Saturday—Charlie Chaplin and Jackie Coogan in "The Kid."

along "Is Dix or Bowers Miss Compson's leading man?" "Neither," said Levino with a still more cryptic smile. "That is, neither one is so designated, because each has an equal chance for the girl until the end—neither has a lead until the final sprint in the last reel."

So the only way for you to find out which is which is by seeing the picture. There's little doubt that you will enjoy the task for "The Bonded Woman" is one of the best pictures shown here this season.

"The Top of New York."
New York roof-tops, the top section of a huge department store, and a beautifully animated doll are three especially interesting features of "The Top of New York," a Paramount picture starring May McAvoy, which opens at the Olympic Theatre for three days, beginning next Thursday.

The roof-tops afford an interesting locale for many dramatic scenes. One of the thrills, being a realistic blizzard sweeping across the roof where a helpless crippled child is marooned. A big toy department set which will interest the children most, however. Thousands and thousands of toys are shown and busy Christmas shoppers buying them. The piece-of-resistance of the toy shop is the appearance of Miss McAvoy as an animated doll in a huge doll house.

Around the tragic home life of this animated doll, Soyna Levlain has woven a most entertaining story. The production was directed by the late William D. Taylor. Prominent in the cast are Walter McMill, Pat Moore, Edward Cecil, Charles Bennett, Mona Marshall, Arthur Hoyt, Mary Jane Irving and Carrie Clark Ward. James C. Van Trees did the photography.

HAD PLENTY OF FISH AND ENJOYABLE TIME
Judge E. W. Napier and his family returned from a vacation trip to Colorado points. The majority of the time was spent near Creeds. The Judge reports the fishing was good and that at all times they had plenty to eat. He also states that he enjoyed his vacation more than any had in recent years.

Mabel Normand In "Molly O" at The Gem Friday

A production which has attracted wider attention than any that has been produced in years, because it is the result of a reunion of three factors which produced the most successful picture ever released is announced as the attraction that is coming to the Gem theatre Friday. The picture is "Molly O," produced by Mack Bennett, starring Mabel Normand, and directed by F. Richard Jones. The same three people produced "Mickey," which was shown in more theatres and to more people than any motion picture production up to the present time. Mr. Bennett began planning the present production as soon as "Mickey" proved itself the enormous success which it became, but it was not until last year that he was able to secure the services of Miss Normand and Mr. Jones to begin "Molly O."

The story of "Molly O" is primarily strong comedy but it has a tense dramatic background and many of the incidents in the development of the plot are surprisingly thrilling so that it might

TELLS YOU HOW TO INSTALL YOUR OWN STOP SIGNAL

Install your own stop signal. It's simple, requires a knowledge of only the elements of electricity...

The principle of operation is simple—merely closing of an electric circuit through depression of the brake pedal...

All that is needed for an ordinary stop signal connection are two metal contacts below the brake pedal, a two-candle-power lamp for the dash, a 21-candle-power lamp for the rear signal...

The diagram shows how the connections should be made. One side of the battery and one side of the signal lamp are grounded to the chassis to complete the circuit...

For efficient performance the distributor should be removed and cleaned at least once a month.

and the battery in the contact which is touched when the pedal is depressed.

The dash indicator usually uses up as much current that it is best to connect it so that it will glow only when the pedal is first depressed and will go out when the foot is pushed forward further.

By this system, therefore, there is only a flash of the indicator to show the driver that his stop signal is working. When the brake is released the indicator flashes again momentarily and the driver knows the lamp is out.

Only waste, grease and oil should not be permitted to remain in the drip pan under the motor.

Double contact and connecting the dash indicator in series with the lamp. When the pedal is depressed from the free position at 1 to 2, the dash signal is still dark. This is because the indicator uses up nearly all the voltage for the lamp.

When, however, the pedal is depressed further, to 3, the signal lamp gets a direct current from the battery and the indicator goes out.

This is accomplished by making a double contact and connecting the dash indicator in series with the lamp. When the pedal is depressed from the free position at 1 to 2, the dash signal is still dark. This is because the indicator uses up nearly all the voltage for the lamp.

When, however, the pedal is depressed further, to 3, the signal lamp gets a direct current from the battery and the indicator goes out.

This is accomplished by making a double contact and connecting the dash indicator in series with the lamp. When the pedal is depressed from the free position at 1 to 2, the dash signal is still dark. This is because the indicator uses up nearly all the voltage for the lamp.

When, however, the pedal is depressed further, to 3, the signal lamp gets a direct current from the battery and the indicator goes out.

This is accomplished by making a double contact and connecting the dash indicator in series with the lamp. When the pedal is depressed from the free position at 1 to 2, the dash signal is still dark. This is because the indicator uses up nearly all the voltage for the lamp.

The Standard of Comparison

Just Right for Two!

The 1923 Four Cylinder Roadster. Smart, sturdy—you won't find another two-passenger four cylinder roadster that compares with this new Buick in quality or in price.

Inspect it from any angle—snug, beautifully tailored top; long, low body lines; heavy one-piece crown fenders; lots of room for two people and two compartments for their luggage. A big steering wheel that comes up to you, a shifting lever that operates without bending forward, a transmission lock, and improvements which give 1923 Buicks a Class "A" insurance rating.

And, below the surface, the famous Buick Valve-in-Head motor and chassis with refinements throughout which set a new standard of quality and performance in automobiles.

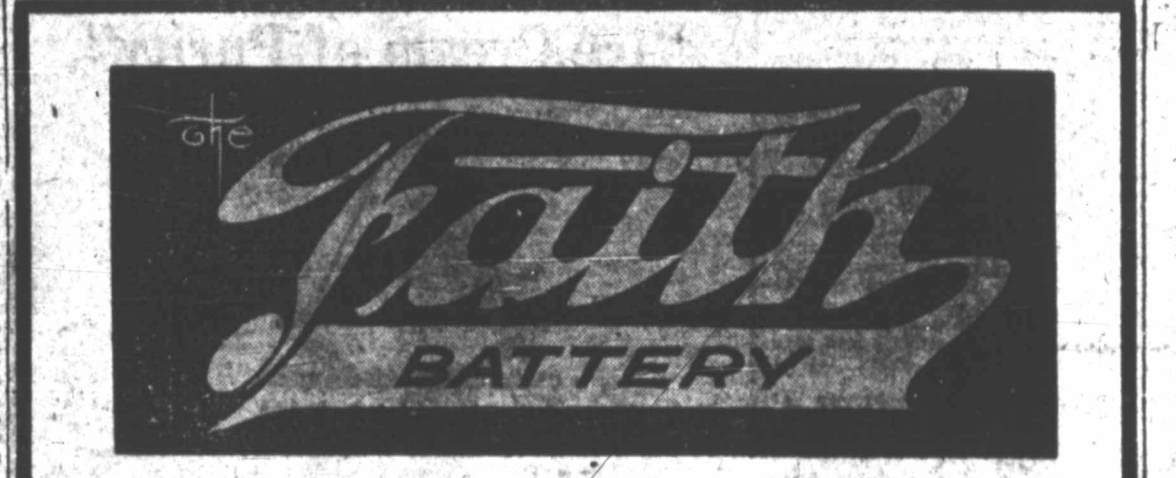

The Buick Line for 1923 comprises fourteen models Four-8 Pass. Roadster, \$265; 5 Pass. Touring, \$285; 5 Pass. Coupe, \$175; 5 Pass. Sedan, \$185; 5 Pass. Touring Sedan, \$195; 5 Pass. Roadster, \$175; 5 Pass. Sedan, \$195; 5 Pass. Touring Sedan, \$195; 5 Pass. Sedan, \$185; 5 Pass. Coupe, \$175; 5 Pass. Touring, \$155; 5 Pass. Sedan, \$165; Sport Roadster, \$165; Sport Touring, \$175. Price f. o. b. Flint. Ask about the G. M. A. C. Purchase Plan, which provides for Deferred Payments.

You Can Decide Quickly

CHANDLER SIX

\$1495

TOURING CAR F.O.B. Cleveland

EVERY motorist knows that \$1495 is little money for a Chandler.

Even a brief comparison for style, size and power proves the dominating value and makes decision easy.

The smart exclusiveness of its body rivals the custom-built product. Its chassis concentrates every advantage of ruggedness, durability, economy and smooth performance.

Whether in open or closed models, no more quality per dollar ever went into an automobile.

THIS IS A STUDEBAKER YEAR

"As Ithers See Us"

"O wad some power the giftie gie us To see oursels as ithers see us."

MAGNOLIA PETROLEUM CO. Wichita Falls, Texas August 4, 1923

F. D. KEIM MOTOR CO. Wichita Falls, Texas Attention Mr. Daugherty, State Treasurer

Dear Sir: One year ago today I purchased from you a Studebaker Light Six Touring Car. In the year time that I have owned my car I have enjoyed the following: 1. The car is a real beauty and has a fine appearance. 2. The car is very comfortable and has a fine ride. 3. The car is very economical and has a fine fuel economy. 4. The car is very reliable and has a fine record of service. 5. The car is very safe and has a fine safety record. 6. The car is very easy to operate and has a fine control. 7. The car is very quiet and has a fine noise level. 8. The car is very smooth and has a fine ride. 9. The car is very fast and has a fine acceleration. 10. The car is very durable and has a fine life span. 11. The car is very easy to maintain and has a fine service record. 12. The car is very easy to repair and has a fine repair record. 13. The car is very easy to drive and has a fine driving experience. 14. The car is very easy to park and has a fine parking record. 15. The car is very easy to load and has a fine loading record. 16. The car is very easy to unload and has a fine unloading record. 17. The car is very easy to clean and has a fine cleaning record. 18. The car is very easy to wash and has a fine washing record. 19. The car is very easy to wax and has a fine waxing record. 20. The car is very easy to polish and has a fine polishing record. 21. The car is very easy to shine and has a fine shining record. 22. The car is very easy to store and has a fine storage record. 23. The car is very easy to retrieve and has a fine retrieval record. 24. The car is very easy to use and has a fine use record. 25. The car is very easy to enjoy and has a fine enjoyment record. 26. The car is very easy to love and has a fine love record. 27. The car is very easy to cherish and has a fine cherish record. 28. The car is very easy to treasure and has a fine treasure record. 29. The car is very easy to value and has a fine value record. 30. The car is very easy to respect and has a fine respect record. 31. The car is very easy to honor and has a fine honor record. 32. The car is very easy to praise and has a fine praise record. 33. The car is very easy to thank and has a fine thank record. 34. The car is very easy to love and has a fine love record. 35. The car is very easy to cherish and has a fine cherish record. 36. The car is very easy to treasure and has a fine treasure record. 37. The car is very easy to value and has a fine value record. 38. The car is very easy to respect and has a fine respect record. 39. The car is very easy to honor and has a fine honor record. 40. The car is very easy to praise and has a fine praise record. 41. The car is very easy to thank and has a fine thank record. 42. The car is very easy to love and has a fine love record. 43. The car is very easy to cherish and has a fine cherish record. 44. The car is very easy to treasure and has a fine treasure record. 45. The car is very easy to value and has a fine value record. 46. The car is very easy to respect and has a fine respect record. 47. The car is very easy to honor and has a fine honor record. 48. The car is very easy to praise and has a fine praise record. 49. The car is very easy to thank and has a fine thank record. 50. The car is very easy to love and has a fine love record. 51. The car is very easy to cherish and has a fine cherish record. 52. The car is very easy to treasure and has a fine treasure record. 53. The car is very easy to value and has a fine value record. 54. The car is very easy to respect and has a fine respect record. 55. The car is very easy to honor and has a fine honor record. 56. The car is very easy to praise and has a fine praise record. 57. The car is very easy to thank and has a fine thank record. 58. The car is very easy to love and has a fine love record. 59. The car is very easy to cherish and has a fine cherish record. 60. The car is very easy to treasure and has a fine treasure record. 61. The car is very easy to value and has a fine value record. 62. The car is very easy to respect and has a fine respect record. 63. The car is very easy to honor and has a fine honor record. 64. The car is very easy to praise and has a fine praise record. 65. The car is very easy to thank and has a fine thank record. 66. The car is very easy to love and has a fine love record. 67. 2,583 MOTOR VEHICLES TRAVERSE IOWA PARK ROAD DAILY

ACTUAL CENSUS REVEALS THAT OPERATION SAVING WILL PAY FOR CONSTRUCTION IN 10 YEARS

The concrete pavement between Wichita Falls and Iowa Park, a distance of 11 miles, will be paid for in five years by the saving in the cost of operation of the automobiles that traverse its course.

This is one of the many interesting facts gleaned from a census taken at the instance of County Engineer J. M. Lohr, on the amount of traffic that passes a given point on the state highway.

After a day's census was taken, were astonishing even to those who knew that the traffic was exceedingly heavy. Following compilation of the figures, the pavement was made that this stretch of pavement probably has the heaviest traffic of any portion of the state highway.

The average daily traffic on the road which is known as Texas State Highway No. 8 is 1,448 automobiles, 173 trucks, six motorcycles, 66 horse-drawn vehicles and eight horsemen. County Engineer J. M. Lohr stated:

"The traffic is heavier than any other portion of the Texas State Highway No. 8 which is running through north Texas from Arkansas to Texline and through Paris, Denton, Henrietta, Wichita Falls and Amarillo.

"The daily traffic by actual census, not including Sunday is 2,411 automobiles, 173 trucks, six motorcycles, 66 horse-drawn vehicles and eight horsemen.

"The Sunday traffic shows an increase of 207 automobiles, but a decrease in the number of trucks. Following is the actual traffic on Sunday, August 26, 1923:

12:00 a. m. to 1:30 a. m.	1
1:30 a. m. to 3:00 a. m.	1
3:00 a. m. to 4:30 a. m.	1
4:30 a. m. to 6:00 a. m.	1
6:00 a. m. to 7:30 a. m.	1
7:30 a. m. to 9:00 a. m.	1
9:00 a. m. to 10:30 a. m.	1
10:30 a. m. to 12:00 p. m.	1
12:00 p. m. to 1:30 p. m.	1
1:30 p. m. to 3:00 p. m.	1
3:00 p. m. to 4:30 p. m.	1
4:30 p. m. to 6:00 p. m.	1
6:00 p. m. to 7:30 p. m.	1

10:30 p. m. to 12:00 p. m.	1
Total	48

These figures show a total number of motor vehicles of 2,583, 45 horse-drawn vehicles and five horsemen or a grand total traffic of 2,633.

On August 17 another census was taken and revealed the following results:

Automobiles	2,411
Trucks	173
Motorcycles	6
Horse-drawn vehicles	66
Horsemen	8
Total	2,664

Estimated persons 4,000. The average struck by the census

NO PRICE WAR ON IN INDUSTRY IS PACKARD MESSAGE

Price reductions made recently by several automobile manufacturing companies do not mean the automobile industry is entering into a price cutting war, asserts Alvan Macaulay, president of the Packard Motor Car company.

"The continuance of the demand for automotive vehicles, which ordinarily should show signs of decrease in volume," he said, "is the current year will be one of the largest in the history of the business.

"It is quite incorrect to interpret the price readjustments recently made by certain manufacturers as being the first signs in a general price war.

"These readjustments will not be general, but will be confined to those companies whose prices were named early in the year and before the trend of labor and material costs was fully understood and the effects of large production became clearly apparent.

"Now that these conditions are established, the savings are being passed along to the customer. This is the characteristic of the automobile industry today.

"In the case of such companies as Packard, whose prices were fixed more recently and which look into account large volume and lower production costs, readjustments are not to be expected.

"Particular significance, I think, should be given to the fact that announcements of these adjustments were made at this time. This means that the largest factors in the industry believe that the current volume of business is not only a temporary development, but that it will continue for many months to come. Further, it registers their conviction that the coal and rail strikes will either be settled before serious harm is done to the industry or that their continuance will not destroy the activity of the automobile business.

Test the wheels for side play about every three months.

STUDEBAKER CAR PRICES REDUCED ON ALL MODELS

Important reductions in the prices of all Studebaker cars, effective August 1, are announced by the Studebaker Corporation of America, through President A. R. Eskin. The reductions range from \$75 to \$200 on the Light Six models; from \$175 to \$125 on Special Six models and from \$135 to \$125 on Big Six models.

"Although we have on hand unfulfilled orders for 15,000 cars," said President Eskin, "it is a Studebaker policy of long standing that our manufacturing savings be shared with our customers—hence the reduction. The quality of Studebaker cars has not been decreased one iota. On the contrary, they are better than ever and offer the greatest value in the history of Studebaker.

"Studebaker plants, representing the investment of \$23,000,000, operating at capacity, produced 60,000 cars the first six months of this year, and broke all records. Every body knows that standardized cars manufactured complete in large quantities, reduce the cost of manufacturing and marketing and therefore give the greatest intrinsic value per dollar of price.

"By manufacturing complete motors, transmissions, axles, frames, bodies, tops, castings, forgings and stampings, parts makers profits on such items in Studebaker cars are eliminated and one profit only is included in Studebaker prices. Buyers benefit accordingly.

"With \$75,000,000 of actual net assets, including \$25,000,000 of plants, and an organization of able, experienced men and workers who participate in the profits of the business, Studebaker stands unsurpassed in resources and ability to manufacture economically and give maximum intrinsic value for a given price.

"The worldwide popularity of Studebaker cars rests upon their dependability performance in owners' use. Proof of their dependability is found in the fact that our sales of repair parts, covering repairs

Among the Dealers

F. D. Klein and family have returned from a month's trip to Corpus Christi. Mr. Klein reports fishing fine and has many stories to tell and he says that they are not the ordinary fish stories either.

Lloyd Weaver, J. G. Clark, Harry Smith and H. C. Price of the Lloyd Weaver Auto Co., want to Dallas Saturday to drive through several new cars.

Dr. J. W. DuVal, eye, ear, nose throat specialist, announces the removal of his office from Associated National bank building to 212 Scott avenue, where he will be associated with the Faith Optical company.

Clarence Dodge is back on the job again after a fine vacation.

A carload of Dodges has just been received according to L. M. Cragger of McCall Brothers. He also reports Adv.

FORMER STUDENTS OF A. & M. COLLEGE TO ORGANIZE HERE

Plans have been laid by local students of Texas A. & M. college to draw up plans for permanent organization.

Ninety per cent of the milk supply of Los Angeles is delivered by motor truck.

Keep battery plates covered.

FOR THE FESTIVE OCCASION

WE ARE used to those sudden calls for extra ice the hostess finds she will need.

They test our service—but we know, as she knows, that ice is indispensable these hot days and nights. Without it, "the party is spoiled."

But try and meet us half-way, please, by giving as much advance notice as you can.

Dr. M. D. Kalcherbocher, pastor of the First Methodist church, south of this city, writes a letter stating that he will be back in his pulpit next Sunday "with bells on." He has been away for several weeks for an operation, which has been a success and he has regained his strength and says that he is feeling fine and that he is ready to hit the ball with all of his power.

"Not only is he always ready to hit the ball, but he is always ready to hit the devil with all of his might whenever he sees his head bob up." Rev. J. D. Pinkston, the cyclone preacher, will be in the pulpit today. His morning theme being "A Prayer for a Revival" and in the evening the subject will be "Going Away from Jesus," says an announcement.

MR. W. B. SCHLESINGER IN HIS FUTURE NEXT SUNDAY

Best Results With Gas

Best results are obtained from burning gas in radiant or incandescent appliances.

The long yellow flames so often seen in round stoves or on gas logs may add to your aesthetic pleasure, but they cost you money. Gas logs are not economical at any time. Coal or wood stoves, into which gas fixtures have been put, cost more than they are worth.

Gas ranges, where the burners are set more than an inch and a half below the cooking surface, waste gas. Gas lighting devices without mantles do not give you much satisfaction in light and do make your meter go round.

Check up on these things in your own house. Get the best possible results from the consumption of gas. When you do that, you will find it to be the most economical as well as the most satisfactory lighting and heating known.

"What the STAR On the Bottle Tells You"

LOOK FOR THE STAR on the bottom of every bottle of Soda Water you buy, to be certain that it is pure, wholesome and good for you and for your kiddies.

THE STAR assures you of this. Star Soda Water is made of pure fruit juices, good sugar and sterile, carbonated water. It is manufactured and bottled in a clean, sanitary plant, by machinery. Human hands do not touch it.

TEACH YOUR CHILDREN to look for the Star; tell them what it means, and the importance of drinking only the purest soda water. Children like the fresh, zesty flavors of STAR SODA WATER, and it keeps them refreshed and healthy through the long, hot summer.
